## Discharged

old Brown came home Tuesday morning with his discharge from the army. Arnold has been in service nearly two years and saw plenty of action with an infantry division in Germany. He is to be home and back at work with his farming.

## Boedeker Out for District Judge

MY FRIENDS AND THE PEOPLE OF BRISCOE COUNTY, I am asking the people of the 110th Judicial District consisting of Floyd, Motley, Briscoe and Briscoe counties, for their office as District Judge. It is my plan to ask every voter in the district to ask you personally for your support, and I will appreciate any assistance you might give to my candidacy. I am asking you for this high office, I am mindful of the duties and responsibilities that go with it and have therefore prepared myself through education, temperament and experience I completed four years of college at Canyon, Texas, and am a graduate of the University Law School. I am licensed to practice law in Texas and by the end of this year I have served Dickens county as its county judge. I was born in the panhandle of Texas, reared on a Floyd county farm, and spent most of my life in this district. If you see fit to elect me as your next district judge, I shall promise courteous, efficient, friendly service, and at all times will be appreciative and grateful to you, the people, the office you gave me. Respectfully your, EDWIN H. BOEDEKER

## Man of the Year TEXAS AGRICULTURE

Frank Boutwell, health specialist at the Farm Security Administration at Dallas, has been named Progressive Farmer magazine the Man of the Year in Texas Agriculture. Editor Gene Butler announcing the selection in the January issue of the publication said Boutwell for "outstanding service to the rural people of Texas in the field of health." Boutwell, native of Hunt County, has been pioneering in rural health since he joined FSA in 1934. He is credited with having made a considerable part in fostering interest in rural health needs in the state, to the extent that last year the Texas Legislature passed a law empowering local communities to establish county-wide health programs. As a result of the new law, eleven cooperative health centers have been chartered in Texas. According to the article, Boutwell early appreciated the fact that "lazy" farmers in many instances were sick men. The agency and that low income farm people in certain areas suffered from malaria, hookworm, and pellagra. Inadequate medical care further aggravated the serious situation. Boutwell spent the last twelve years attacking this problem. Special tribute was paid the official for having gained support of the medical profession in pre-paid and hospital programs.

Mr. and Mrs. Joe Howard of Alamo, California are the godparents of a baby boy. Mrs. Howard is the daughter of Mr. and Mrs. W. L. McMinn. She was formerly resident of Silverton.

Bob Hill transacted business in Silverton Monday.

# Fire Destroys Co-Op Elevator

## First State Bank Open For Business

The First State Bank of Silverton opened its doors Wednesday for business. The officials of the bank were very well pleased with the first days business. "It couldn't have been better", Mr. Smith said.

On its opening day the bank had visitors from such places as Ft. Worth, Amarillo, Lubbock, and Plainview. These people came to Silverton to congratulate the First State bank on its opening.

It will interest the public to know that on the first day deposits amounted to more than \$100,000.00. This is exceptionally well for the first days running. The people of this community aren't hesitating to support the new bank, and seem to be very proud to do so after not having had a bank here in such a number of years.

The representative from the Federal Deposit Corporation was here and delivered his certificate of authority for operation. All deposits are insured up to \$5,000 by the Federal Deposit Corporation.

The bank plans to install new fixtures early in the Spring, which will make the First State Bank a most modern affair. The officials are now planning for a formal opening of the bank at a later date. They are thinking of having a big barbecue.

The operating personnel of the bank will be Mr. Hensley, Perry Whittemore, assistant cashier, Mrs. Faye Dunn and Mrs. Roberta Griffin. Mr. Hensley joins all the officers and directors in inviting everyone to use the bank for any financial transaction they may have.

The News plans to run the pictures of the directors and all of the officials in the very near future.

## School Paving Fund Just Needs \$500.00

Something less than \$1500 has been donated to the school paving fund. Since the amount needed is \$2,000, this leaves something over \$500 remaining to be raised. Practically everyone in the community has been solicited for donations, but some have not paid who promised to do so. On the whole, the response has been extremely good, but since the amount is so large, it is not surprising that the whole sum has not been raised.

People who have the interest of the school and community at heart are urged to help in every way possible to realize the goal and assure that the school can have the benefits of a paved street. A number of people who contributed expressed their willingness to increase the amount of donations if the full amount were not raised. It was hoped that this would not be necessary, but no stones will be left unturned that will help to put the project over.

## Mrs. Northcutt Urges More Clothes In Drive

There has been a god response to the clothing drive for the suffering people of Europe, states Mrs. D. T. Northcutt.

But there has not been a large enough response. There is need for clothing, more clothing, and more clothing, states Mrs. Northcutt.

Items which are the shortest are: Underclothing and shoes. However any and every kind of clothing is needed at once.

Mrs. Northcutt states that the question of delivery to Europe during the winter has been raised. The national committee in charge of this work states that there is no question about delivery. Facilities have been doubled to bale clothing for shipment. Ships bound for Europe are not heavily loaded with war supplies, and ammunition, as they were last year during the drive. The time for delivery to the needy people of Europe has been cut to a minimum.

Mrs. Northcutt urges that all who contribute clothing or any kinds of cloth to the drive shall write a friendly letter for delivery to the suffering people of Europe.

## J. W. Lyon Seeks Re-Election As Judge

J. W. Lyon, Jr. this week authorized the News to announce his candidacy for re-election to the office of county judge. In a statement addressed "To The People", Judge Lyon declared:

TO THE CITIZENS OF BRISCOE COUNTY:

In submitting myself as a candidate for re-election for a second term to the office of County Judge and Ex-Officio County Superintendent of Briscoe County, I do so fully mindful of the duties and responsibilities of the office. I feel that with the past experience which I have had in this office, I will be enabled to serve you even better in the future.

To all of you, I wish to take this opportunity to express my sincere appreciation for the fine help and cooperation which you have given me while serving as your County Judge, as the success of any County Official depends largely upon the help and cooperation of the citizenship of the county. A continuation of this fine spirit of cooperation is earnestly solicited.

Sincerely,  
J. W. LYON, JR.

## CANDIDATE

## Stovall Announces for Re-Election

TO THE PEOPLE OF THE 110th JUDICIAL DISTRICT:

In seeking my second elective term as District Attorney of the 110th Judicial District, I am basing my candidacy upon the record I have made as your District Attorney. Due to the high type of citizenship which we have in the four counties of this district, law violations of the grade of felony have been at a minimum. Records of Mr. J. Edgar Hoover of the FBI and Mrs. Homer Garrison of the State Department of Public Safety show that crime is on the increase. Prompt, vigorous and fair prosecution will do more than anything else to deter and stamp out lawlessness, and I stand on the record I have made as your district attorney in this respect. The experience I have had in the office will be of invaluable aid to me in taking care of the increasing problems of the office.

It is my pleasure to know personally most of the people in the four counties of this district, and most of the people know me. I know the people to be inherently fair, and in all fairness I submit that I have conducted the affairs of the office in such a way as, to merit a second elective term. I pledge you that, if re-elected your district attorney, I shall conduct myself and the office in such a way that you will have no cause to regret the confidence you bestow in me.

Your support and influence will be sincerely appreciated.

RICHARD F. STOVALL  
Candidate for second elective term as District Attorney.

Mr. and Mrs. Raymond Hiems and sons were over night visitors in the Chester Burnett home Thursday night. Mr. Hiems has his discharge from the Army. They plan to make their future home in the Vigo Park community.

Mr. and Mrs. Bob Smith were in Plainview Monday.

## Owls Reach Finals In Cage Tourney

The boys and girls basket ball teams entered the tournament at Flomot over the past week end. They played a very good tournament and the boys advanced to the finals. They lost however to Flomot for the championship.

The girls played their first game with Turkey and won by a decisive score of 31 to 13. The whole team played exceptionally well.

In the first game the boys played Estelline and won by a score of 46 to 16. Bobby Bradford and Joe Allard turned in very good games.

The Quitaque and Silverton girls were matched in the second game for the girls. It turned out to be a very closely contested match and Silverton came out on the short end of a score of 12 to 13. Mickey Carruth was seriously injured in this game. She was the victim of a falling accident. Her foot got the worst end of the deal receiving three broken bones. She is now on crutches and won't be able to play any more this season.

Saturday afternoon the boys played Carey and won by a score of 24 to 16. This put Silverton in the finals with Flomot. This was the last game played Saturday night. The Owls couldn't get to clicking and came out on the short end 22 -- 32.

Bobb McWilliams who has been out of the starting line up, due to eligibility played for the first time in quite a while. When he gets back in form and the team gets to clicking again it should be greatly improved.

## Polio Campaign Progressing Nicely

According to Mrs. O. T. Bundy, Chairman of the campaign to raise money for the Infantile Paralysis Fund, the program is progressing very nicely. Due to bad weather the campaign got off to a slow start, but the past several days has made it possible for the volunteer workers to operate over their assigned territory, and the response has been very pleasing.

It should be well to remember that one half of the money raised will be kept in this county for the treatment of polio victims. Also by the county chapter keeping in good standing with the National Foundation, in time of need will be able to call on them for any help and assistance this county might need.

Mrs. Bundy wishes to thank all those who have contributed, so generously to the cause.

## March of Time Study Club Meets

The March of Time Study Club met January 17, 1946 in the Red Cross Room for a brief business meeting and Newsweek program. After Miss Annette Wulfman led the discussion on "Future Travel by Air, the club adjourned until February 7, 1946.

Roma Clemmer of Plainview spent the week end with her parents Mr. and Mrs. Jim Clemmer.

Mrs. H. B. McClendon and Mrs. Jean McCutchen were in Tulia Friday.

Mrs. Bood Myers came home Monday.

## Stockholders Declare Total Loss Feared

Wednesday morning about 1 o'clock a. m. the fire whistle sounded bringing the local fire department to a scene that was well out of control when they arrived. Parts of the Co-Op elevator was already falling in and the entire building was well ablaze. About all the fire boys could do was prevent the fire from spreading to the gasoline supplies of the local wholesale agencies, and a large supply of coal near by.

## CANDIDATE

## Seeks Legislative Post

Joe W. Jennings of Plainview is a candidate for the Texas Legislature from the 120th Legislative district. Jennings continues to own and operate his Floyd county farm since moving to Plainview.

## Butter Decreases With More Milk Going Into Cheese

Consumers cannot have more milk, cream, ice cream, evaporated milk and cheese and at the same time have more butter too.

That is the way W. E. Morgan, economist with the Texas A. and M. College Extension Service, has summed up the butter situation.

Morgan explained that butter production has gone down steadily since 1942. Before that time almost half of the milk sold by farmers was separated on the farm or dairy for sale as cream, which was used largely for butter, while the skimmed milk remained on the farm. To increase the wartime food supply, the Government urged farmers to deliver whole milk. Part of the whole milk was made into evaporated milk, Cheddar cheese, dried ice cream mix and dried whole milk. Much of this went to the armed forces and Lend-Lease. Meanwhile fluid milk consumption in this country jumped 25 per cent during the war years, and butter production in 1945 was the lowest in twenty years.

During the war, Morgan pointed out, the Army and other Governmental agencies bought butter during the spring and early summer, when production is highest, so that all of the winter months production would be available for civilians. Last summer the Armed Services had to assume that the war would continue, and so butter stocks were bought to meet this winter's needs. With the sudden surrender of Japan all of the butter stocks were not needed. In December, for example, 70 million pounds were released for civilian use, so consumers actually had more butter in the last two months of 1945 than during any other two months of the year.

The Armed Services will continue to need butter and milk products and cheese, while evaporated milk and dried milk are still being sent abroad. Meanwhile with the end of rationing, demand for butter has increased. Although whole milk production is expected to continue high, Morgan sees little hope that the butter situation will be brighter in 1946.

Rev. Barnett, Mr. and Mrs. Bill Messimer and W. L. Mr. and Mrs. J. S. Fisher, Mr. and Mrs. E. L. Gardner and Betty, Mrs. M. C. McCain, Mr. and Mrs. Bailey Hill, attended the funeral of Rev. Frank Beachamp's father at Turkey Sunday afternoon.

Mr. Brock was there to cut the high lines in order to try to save the big motors that pull the elevator, but it was already too late. About 2:30 the fire was pretty well settled and the fire department left. Joe Mercer and Roy Henderson remained all night to see that everything was kept under control.

At this time the cause of the fire is still undetermined, but several opinions have been expressed.

The stockholders had a meeting Wednesday evening and fear that nothing can be salvaged from the remaining parts. They have expressed a belief of a total loss. An estimate has not yet been made, but it will run into thousands of dollars.

This is a great loss to all the farmers near since it was a co-op elevator and was run and maintained by local men. It is hoped that something can be done by the time harvest is here.

More details will be given next week.

## Chapman Announces for Re-Election

"In announcing my candidacy for re-election to the office of District Judge I wish to express my appreciation for your courtesies in the past and for the cooperation you have given me that has enabled me to make a record in the office which I feel I may claim a justifiable pride.

In addition to keeping current the docket of my own district I have held court in ten other counties during my tenure as your District Judge. This was extra work that is not compulsory and for which I received no remuneration whatever. In Lubbock County alone I held court for a six months period during a time when there was not a resident judge in the 99th Court. Through this service alone I was able to save the State of Texas a \$2,500 in salary.

"During the war years, with the manpower barrel scraped to the bottom, it has been very trying on the court to have to call in busy men for jury service. I have sincerely tried to be reasonable on this matter and have made serious effort to see each juror called was required to make a minimum of sacrifice in the days away from his work.

"In this district litigation is growing and the office is certain to take on increased responsibilities in the post-war years. Criminal violations are on the increase at this time. The divorce problem, which so often carries with it the even more serious problem of child custody and care, is going to demand the best experience and training available for the office of District Judge.

"If you believe the record I have made and the experience I have acquired in dealing with these, and the many other problems that arise in this very important office, are good reasons for retaining me I shall deeply appreciate your votes and influence, whether I have an opportunity or not. I serve you now than I was when first appointed, and if elected I pledge the continued best service of which I am capable.

Respectfully yours,  
ALTON B. CHAPMAN"

Mrs. J. N. Cantwell was called to Cleburne to attend the funeral of J. C. Cunningham, Mr. Cunningham is Mrs. Cantwell's brother-in-law.

Guests in the W. A. Holt home Sunday were Mr. and Mrs. Dock Wallace, Mr. and Mrs. Rex Holt and Mr. and Mrs. Ronald Kitchens and children.

# Cage Tournament To Be Held Here This Week End

The local high school will play host to both boys' and girls' basket ball teams in this general area Friday and Saturday of this week.

There will be five sessions, Friday afternoon, Friday evening, Saturday morning, Saturday afternoon, and Saturday evening.

The following pairing will make up the first round:

Boys  
Silverton—Quitaque 1 p. m.

Turkey—Estelline 3 p. m.

Flomot—Carey 7 p. m.

## Girls

Silverton—Kress 2 p. m.

Turkey—Quitaque 8 p. m.

This completes the first round of play for Friday. Lockney boys will play the Kress boys at 10:00 Saturday morning. The rest of Saturdays play will be scheduled according to the winning teams

of Fridays games.

Season tickets went on sale Wednesday. Adults may buy the season ticket entitling them to attend all games for \$1.25. Students will pay 75c for this privilege. General admission will be adults 30 cents and students 20 cents. The season ticket will enable each fan to save by buying them in advance.

MEMBER PANHANDLE PRESS ASSOCIATION

Mrs. J. W. Brannon and Mrs. Richard Hill were in Amarillo Saturday.

Leldon Gilkeyson left Monday for Dallas.

W. C. Donnell arrived Friday from the west coast. He is here on a 14 day emergency furlough. His baby has been seriously ill.

Mother Noblet returned Thursday from an extended visit with relatives in points of Arkansas.

Mr. and Mrs. Albert Rowland spent the week end in Quannah.

Mrs. Nell Hardin and father Mr. Pettit of Vernon visited Mother Hardin and the Hugh Stodghill family Sunday. Mother Hardin has been confined to her bed several days and is slowly improving.

Ross Wayne Dowdy of the Army Air Corp arrived Friday to visit his parents Mr. and Mrs. G. R. Dowdy. He has his discharge.

Gene Arnold went to Canyon Monday to make arrangements for entering school there next semester.

Mr. and Mrs. W. C. Smithee were in Tullia Wednesday.

W. V. Bomar, Jr. and Dick Bomar went to Tullia Wednesday where Dick took the bus for his home in House, New Mexico.

Freddie Royce Garrison of Camp Hood is here on a 25 day furlough. He is being transferred to Fort Bliss, Texas.

Miss Bonnie Dell Chappell, who is attending Wayland College in Plainview was home over the week end.

Mr. and Mrs. Travis McMinn of Plainview spent the week end here with relatives.

Mr. and Mrs. Roy Brown returned Friday from Ft. Worth where they have been visiting relatives.

Mrs. McMahan and son of Houston are visiting her father and mother Mr. and Mrs. Lawrence.

Mrs. C. C. Garrison who has been caring for her grandsons at Crosbyton returned to her home Saturday night. She was accompanied by her son Keltz.

Dr. and Mrs. Wells McClendon spent the week end here with Mrs. Emma Freeze and Mr. and Mrs. T. C. Bomar.

Rev. and Mrs. A. C. Hamilton have moved near Tullia. Rev. Hamilton has entered Wayland College.

Miss Lois Arnold spent the week end here with relatives.

Mrs. Hugh Stodghill and mother Hardin were in Tullia last week for medical treatment.

Ware Fogerson was in Amarillo Monday on business.

Mrs. C. M. Strickland and Mrs. Hugh Nance were in Tullia Monday having dental work done.

Mr. and Mrs. D. O. Bomar of Lubbock and Mr. and Mrs. T. C. Bomar were guests of their sister Mrs. Pearl Simpson last Friday.

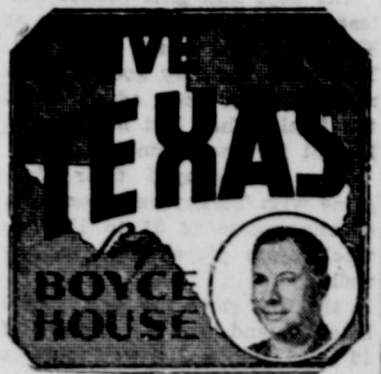

Mr. and Mrs. Walter Via of Happy spent last week with her parents Mr. and Mrs. G. C. Harrison.

Mr. and Mrs. Louis Gilkeyson moved to their new home in north Silverton.

Mr. and Mrs. V. R. Gardner of Tullia visited in the R. E. Brookshier home Sunday.

Mrs. John Kiezer of Floydada visited in the J. E. Daniel home last week.

Arnold Brown came in Tuesday morning with his discharge from the army.

It was Mark Twain's "Puddinghead Wilson" who remarked, after listening 15 minutes to a dog howling under the floor of the village grocery store porch:

"I wish I owned half of that dog."

"What would you do?" someone asked. Puddinghead replied, "I'd kill my half."

Like the fellow who bought a half interest in a cow. In fact, he bought half of the cow, the front half, and his partner owned the rear half. This fellow said:

"All I did was feed my half and the other man milked his half." "What did you do about it?" somebody inquired. "Oh, I quit feeding my half—and his half died."

Some years ago, Dr. A. C. Scott, Jr., noted Temple surgeon, was appointed to represent the United States when the Pan-American medical society was having its first meeting in Mexico City. He wanted to convey a greeting to the delegates in their native Spanish—but there was one drawback: he didn't speak Spanish!

But he wrote out his speech in English, had a teacher translate

it into Spanish, then he had these words written out phonetically so he could pronounce them correctly as, of course, letters have different sounds in a foreign language to what they have in English.

He then memorized the speech. But, unfortunately, he didn't know which words were important and which were not, so he pronounced them all with the same emphasis. If you will think back to the days when you were in the first grade and slowly read, "Does—baby—love—Rover—yes—loves—Rover." you'll have the general idea of what I mean.

But the Texan could not be discouraged. He had the teacher mark the important words. When at last he stood before the assembly of Latin-American medical leaders, he surprised them by waving aside an interpreter and addressing them in their own language. The ovation the audience bestowed was worth all the effort.

**ATTORNEYS TO HEAR LECTURES AT UNIVERSITY**

Texas attorney who are specialists in various phases of law will be lecturer for a lawyers' refresh-

**REST EASY...**

**What's Back of  
My Gas Burners?**

This is the third of a series of four advertisements being published in the belief that you would like to know more about the natural gas business, which so vitally affects your daily lives.

**CHAPTER III**

**The Gas Is Conditioned for Transporting**

In the previous chapter we saw how natural gas travels from a well through a meter house, through a field gathering line, and through a compressor station where it was squeezed into smaller space. Now what happens to it next?

Before starting on its long journey, the gas passes through a Gasoline and Dehydration Plant adjacent to the field compressor station. This plant removes gasoline and moisture from the gas to increase the efficiency of the pipe line system. If the gasoline were not removed, it would condense out in low spots in the pipe line and decrease the line's capacity. If the moisture, which is produced in vapor form with the gas, were not removed, it would, under certain pressure and temperature conditions, form "hydrates" which are similar to slushy ice. When formed, these hydrates accumulate in the pipe line, regulators and other facilities and restrict or stop the flow of gas.

The most important piece of equipment at the Gasoline and Dehydration Plant is the high-pressure absorption tower, 75 feet tall and weighing 123,000 pounds, which is used in our sketch to represent the plant. Actually, the plant consists of several buildings, steam boilers, heat exchangers, stabilizers, dephlegmators, generating plant, compressors, many pumps, and other auxiliary equipment, all quite complicated and scientific. The gas itself passes through only the absorption tower where the gasoline is removed by the use of absorption oil and the moisture is removed by the use of diethylene glycol, a liquid chemical which has a strong affinity for water. The absorption oil and the diethylene glycol are purified and used again, in continuous cycles.

Another advantage gained by drying or "dehydrating" the gas is that internal corrosion of the pipe line is held to a minimum, thereby reducing the roughening of pipe walls and the formation of scale and dust.

After passing through the Gasoline and Dehydration Plant, the gas flows into the high-pressure pipe line. This is the main transmission line which brings the gas across the country to your city and other cities, passing through one or more additional compressor stations on its way.

West Texas Gas Company owns and operates five compressor stations; one at the gas field, called the Turkey Creek Station, the McSpadden Station near Canyon, and the Plainview, Tahoka and Littlefield Stations. McSpadden Station is now being enlarged, and when this work is completed we will have in service 20 compressor units with a total rating of 4540 Brake Horse Power.

**HIND THE SCENES  
AMERICAN BUSINESS**  
by John Craddock

st week the office of Price Administration granted higher ceilings to manufacturers of ing trades machinery and pment, to redwood lumber, to oil burner manufacturers, furnace makers and others. The federal agency recognizes the production costs. Such industries as automobiles and to name only two, appear in to pay higher wages, and stripped of any political or aspects means additional. Meanwhile, stock markets hought the nation are enjoying substantial price rise, indicating a great number of people ve that the cost of goods will higher and that the value of dollar terms of thing it buys be lower. In the old days, opments of this type were together to spell inflation. y, people do not like the word. Into it too many of read such unpleasant things pression and hardship in fu- years. So let us just say that appear to be rising.

**BUILDING COSTS** — Home ing costs are causing con- not only to the general pub- also to the building indus- self. One segment of that in- y, the nation's floor and wall manufacturers, has decided to smething about the situation hough the Tile Council of Amer- these producers have just

launched a research program de- signed to reduce cost of tile in- stallations not only in new and remodeled homes but also in hos- pitals, schools and commercial buildings. The project will set standards for bonding compounds used in recently developed tile setting methods and thus assure better and more rapid tile in- stallations, according to H. E. Meyer, chairman of the Council's com- mittee on instalations. "In these days of increased housing costs, it is essential that the building industry explore every possibility which may lower construction ex- penditures for the home builder," Meyer declared.

**THINGS TO COME** — A vending machine which will dispense steaks of uniform size and quality. . . A railroad ticket dispenser, now being tested by South- ern Railway. By pressing the prop- er buttons, this device produces a ticket imprinted with the desired destination and origin points, amount of fare and tax, at the same time registering the sale. . . Diamond Match has a new adver- tising novelty not too dissimilar to the book matches. It contains little tissues for removing excess lipstick, cleaning glasses, etc. It will be distributed through beauty parlors. . . A new class of toxic agents to kill weeds all the way down to the roots and said to be effective against poison ivy and wild garlic. . . A new slide rule which places the decimal point at the end of long intricate com- putations. . . An electric water

heater, five inches long and two inches in diameter. It is said to heat a pail or bucket of liquid quickly. . . An automatic poultry picker which removes both feath- ers and pin feathers without effort. . . A mechanical oyster opener which has a combination spring and hammer to drive a chisel into an oyster and make it pop open.

**SUCCESS FORMULA** — More and more business are realizing that a company cannot measure its success by the profit and loss statement alone. Enlightened management men are increasingly evaluating their success in terms of a critical appraisal of how much they are doing to provide in full share a happy and secure existence for those associated with their companies. This long-range management planning for the worker is placing a newly signif- icant emphasis on corporate ef- forts to provide social security plus added recognition and re- wards for employees devoting years of service to the firm.

For the first time in five years, America looks forward to a full year of freedom from war. Labor disturbances have marred the first few months of peacetime operation and indications are that they will continue into January, if not long- er. To the more pessimistic anal- ysts, these disturbances represent a serious breach between man- agement and labor which is likely to continue for some time. The more optimistic outlook is that they are a corollary of the abrupt switch from war to peace economy and that out of them may come a sounder, better understanding be-

Just a minute! One of the dresses I gave you has my wife in it."

tween management and labor.

In either event strikes have de- layed conversion to full peace- time prosperity at a time when all other signs point to a high rate of business activity. Stated simple, people have money, need goods and are ready to buy them. That is a firm basis for business pros- perity and a high level of employ- ment. However, this condition could change if many people are out of work for a prolonged period

and are forced to spend their sav- ings. Mst industrial leaders think that differences will be settled soon and that business is in for at least several years of sustained high rate production.

**Large Volume for Rubber Industry** — The rubber industry expects to maintain a high rate of production in 1946, John L. Collyer, president of the B. F. Goodrich Com- pany, estimates that the nation will consume 900,000 tons of raw

rubber, which would be a new all- time high and approximately half- again as much as the average con- sumption in the last few normal prewar years. The new year, he believes, will be largely devoted to catching up on long deferred and urgent demands for civilian rubber products, while with 1947 will come the out-and-out com- petition between natural and syn- thetic rubber. Meanwhile, he points out, technical progress in the manufacture and use of syn- thetic rubber will continue. "Dur- ing the war period," he adds, "tre- mendous strides have been made in the synthetic field—so much so that we already have introduced a synthetic rubber passenger-car tire that will outwear prewar nat- ural rubber tires."

**Home Construction Outlook** — Home construction will not at- tain the high rate in 1946 which was predicted during the war years. Less than half the number of homes originally expected to be built during the first full year of peace will be constructed dur- ing 1946, Harold W. Sweatt, presi- dent of Minneapolis-Honeywell Regulator Company states. Short- ages of materials and manpower and the high cost of all components needed in the housing industry will serve as restraining influences, he predicts. Because of this, he anticipates construction of only 300,000 new dwellings in 1946 in contrast to the wartime estimates of between 600,000 and 1,000,000 new homes. He does, however, see a potential demand over the next decade for 6,000,000 to 7,000,000 new homes. Surveys conducted by his company indicate that approx- imately 30 per cent of all new homes will be equipped with auto- matic heating in contrast to the 10 per cent of existing homes which now have this advanced type.

**1945 Cotton Crop  
Low for 56 Years**

Cottonseed may be treated with fungicides at any time before planting, E. A. Miller, agronomist of the Texas A. and M. College Extension Service, has pointed out. After treatment the seed should be sacked and stored in a ventilated place, he said. Texas' 1945 cotton crop was the shortest in 56 years and this has focussed attention on the treat- ment of seed for the 1946 crop as

one phase of efficient production. **Agricultural Experiment Station** tests conducted over a four-year period showed an average in- crease in yield of 25 per cent at College Station, 14 per cent at Temple, 13 in the Brazos Bottoms and 4 per cent at Lubock. Increas- es of as much as 50 pounds of lint per acre have occurred at Temple in recent tests. The most favorable results followed plant- ing of delinted seed which was also treated with a fungicide.

Similar results have been on demonstrations conducted by county agricultural agents under farm conditions, Miller stated.

A number of chemical prepara- tions have been tested, including ceresan, spergon, cuprocid and sanosed, and gave approximately equal results. Cost of applications ranged from five to ten cents per bushel.

A large part of the yield in- creases came from better stands through control of two common diseases, sore shin and angular leaf spot. Seed treatment is most important where low rates of seeding are used. Thus, in sea- sons such as 1946 when seed sup- plies are short, smaller amounts of seed will be required if the treatment is used.

**Pneumonia Death Rate Still High**

According to Dr. Geo. W. Cox, State Health Officer, pneumonia caused over 1,934 deaths during the first ten months of the past year in Texas, a reduction over the previous year but still too high. It is more prevalent during

**POLITICAL—  
COLUMN**

Subject to the action of the Democratic primaries, The Briscoe County News announces the candidates below for the offices set above their respective names:

For Representative 120th Judicial District of Texas:  
JOE W. JENNINGS

For Judge of the 110th Judicial District:

ALTON B. CHAPMAN  
EDWIN H. BOEDEKER

For District Attorney, 110th Judicial District:

JOHN B. STAPLETON  
RICHARD F. STOVALL

For Sheriff:

N. R. (Jake) HONEA

For County Judge:

J. W. LYON, JR.

For County Clerk:

J. E. ARNOLD

the winter and spring months.

Pneumonia is usually caused by a germ called the pneumococcus, which many of us have lurking in our throats ready to start trouble when our resistance to it is lowered. We can keep up our resistance by avoiding undue fatigue and avoiding unnecessary exposure to extreme weather conditions. When we go out into the cold, additional wraps should be worn, sufficient to protect us. Keeping the temperature of our homes as low as is consistent with comfort will greatly lessen the difficulties encountered in adjusting ourselves to the cold when we go out.

Another method of prevention in pneumonia is not to neglect a cold, for the common cold often results in pneumonia when neglected. A person with a severe cold should stay at home, and call his physician for advice if temperature persists or the cold lingers on. He should follow his physician's advice until the cold has disappeared.

The successful treatment of a pneumonia case often depends upon starting treatment very early. That is why a physician should be called at once when pneumonia is suspected. A patient may really have beginning pneumonia when he thinks it is only a cold. If the physician's advice is sought, he will have an opportunity to start treatment early if pneumonia occurs in such cases.

**Joe W. Jennings of Plainview Enters Legislative Race**

Joe W. Jennings announced his candidacy for the office of representative in the Texas Legislature from the 120th Legislative district. This district comprises Bailey, Briscoe, Castro, Floyd, Hale, Lamb, Parmer, and Swisher counties.

Jennings, a Floyd county farmer, recently moved his family to Plainview, but is continuing to own and operate his farm.

He was a candidate for this office in the 1944 election, running against Tom W. Deen, incumbent representative.

"I believe the people of the district want a change," Jennings said. "In the 1944 campaign, there were 12,378 votes cast. Mr. Deen, who was re-elected received 6,353 votes to 6,026, a majority of only 327 votes. The results would have been reversed by only 165 votes."

"Many citizen have talked to me about again seeking the office and they predict much stronger support for me than in the last election."

"I am deeply grateful for the splendid support accorded me in the 1944 election, my first time to participate in any political campaign, and earnestly solicit that support in the coming Democratic primary as well as the support of every other voter in the district."

**More Calories but Fewer Vitamins in Meals This Year**

American meals in 1946 will probably be higher in calories and lower in vitamins than in 1945, according to Miss Jennie Camp, assistant state home demonstration agent for the A. and M. College Extension Service.

Miss Camp explains that larger supplies of meats, fats and oils, and possibly sugar will raise the average per capita supply of daily calories to about 3500. "This is seven or eight per cent more than the average of prewar years and somewhat above 1945," she says.

The fact that incomes of a number of families will be lower

influences the amount of vitamins in the diet. Lower income groups tend to buy less vegetables and fruits. For the same reason, Americans may drink less milk this year, which will mean somewhat less calcium and riboflavin in the average diet.

"Whether diets will continue as high in the B Vitamins and iron as they were during the war will depend considerably on whether bread and flour continue to be enriched at present levels, Miss Camp concludes.

Col. C. Esco Obermann, specialist in the field of counseling has joined the University of Texas staff as associate professor of educational psychology, and assistant director of testing and guidance.

**Do YOU suffer from CRAMPS NERVOUS TENSION**

Are you "CERTAIN DAYS" of the month? If female functional monthly disturbances make you suffer cramps, headache, backache, weak, tired, nervous, cranky feelings--at such times -- try Lydia E. Washington Newsletter

EUGENE WORLEY June Congress passed a providing for official along with representa- tives of that body to other nations of the world... of the Philippine Is- lands... to that Resolution... Committee, including was appointed to repre- sent Congress of the United

stake in our relations with foreign countries will find informative. If these reports appear in your newspaper, it is through the kind- ness and cooperation of your edi- tor. I might say in the begining that while all of the trip was most interesting and informative, the highlights were the Bikini Atomic Bomb explosion, the ceremonies attending the granting of inde- pendence to the Philippines, con- ferences with General Marshall in China, General MacArthur in Japan and other military and state department officials.

The Committee traveled be- tween twenty and twenty five thousand miles in a period of two weeks. More time of course would have been desirable but the press of legislative duties in Washing- ton demanded our early return. All of this travel was done by air.

FORMER PRESIDENT HERBERT Hoover, right, reports to Presi- dent Truman on the accomplishments of his South American Food Mission, and received great praise from the Chief Executive for his famine relief work.

The Congressional delegation left Washington late on June 25 flying overnight to the West Coast a distance of approximately 2400 miles. After conferring with State Department and military officials in San Francisco, we left the Coast about ten o'clock the fol- lowing night by a C-54 plane. From San Francisco to Hickam Field, Honolulu, is approximately 2400 miles, which was made in about twelve hours. Since there were only four bunks aboard the plane and since the House mem- bers felt the senators were en- titled to consideration mainly on account of their age, most of us slept sitting up, on the floor, or anywhere we could.

We arrived at Hickam Field the next morning which is the same Field the Japs virtually ripped apart on that black day of Decem- ber 7, 1941, but today practically all evidence of their attack has disappeared. Again there were conferences with State Depart- ment and War and Navy officials

and local citizens interested in statehood.

Quite a change had come over the Island since I was stationed there in 1942. At that time, a strict curfew was in order, mili- tary law reigned supreme, glass wind-ows were taped with adhe- sive for fear of breakage from bomb concussion, all Japanese, which represents a considerable portion of the Hawaiian popula- tion, were off the streets before dark, no one was allowed on the streets after ten o'clock without a pass, and the blackout was strict- ly enforced. All of these precau- tions were taken because an at- tack and invasion was expected to be launched by the enemy at any time. These expectations were confirmed when the Japanese sent the mightiest naval armada they had ever launched to take Mid- way, but where they were suc- cessfully turned back with heavy losses.

But now the Hawaiian islands are back to normal and most peo- ple there are clamoring for ad-

Q. Is it to my advantage to defer grain feeding of lambs?

A. Trials at the Kansas Experi- ment Station have shown the fol- lowing results from deferring grain feeding for 30 days at the start of feeding periods:

- 1. Saving in grain
2. Lower feeding cost
3. Little or no decrease in to- tal gain or finish.

Q. I've been told that DDT will not be effective when sprayed on my whitewashed walls. Is this true?

A. It is true that whitewash les- sons the killing power of DDT. If the wall has been whitewashed at least two or three weeks before the DDT is applied, DDT can still be used effectively, but it will lose its value more rapidly than on other surfaces and will have to be applied more frequently.

Q. Are pastures an important part of a profitable hog program?

A. Yes. The Ralston Purina Company's Research Farm has found that pastures are valuable and should be properly used and carefully developed, since pas- tures save feed and help keep the hog herd healthy.

Q. How much feed do Broad Breast growing turkeys require?

A. Broad Breast turkeys should consume about the following amounts of feed, per bird, per week:

- 3rd month - 2 to 2 1/4 lbs.
4th month - 3 1/2 lbs.
5th month - 4 1/4 lbs.
6th month - 5 lbs.
7th month - 6 lbs.

Q. How much time should it take to milk a cow properly?

A. Actual farm figures have shown that the milking machine is left on cows an average of 6.3 minutes. But close studies show that cows can be trained to milk in 3 minutes or less, and some cows can be milked in 3 minutes.

Send your questions about any phase of farm management to FARM FACTS, 835 South Eighth Street, St. Louis 2, Missouri. Questions will be answered without charge, either by mail or in this column, as a service of this newspaper.

mission as the 49th State of the Union, which proposition is now under consideration in Congress.

Pearl Harbor itself presents quite a different picture from the first time I saw it. It that time our ships were still sunk and desperate efforts were being made to raise them and get them back into operation because they were sorely needed. Just a short distance from the submarine base is a neat and well kept American cemetery where lie the bodies of nearly all men who were killed when the Japs attacked that fateful Sunday.

The worst marine disaster with- in American continental limits oc- curred April 27, 1865, when the Mississippi River steamboat Sul- tana's boiler exploded seven miles above Memphis. The dead totaled 1,450, nearly all of them exchanged Union prisoners of war.

Development has been reported of a system of formulas by which a total of 1,000 tones, tints, and shades can be produced from six paints.

The average New York worker spends four and a quarter hours a month in the subways.

THANK YOU Briscoe County Voters

I would indeed be an ungrateful piece of humanity, did I not try in some way to express my sincere appreciation for your vote and confi- dence in Saturday's election.

Until I can see each of you perso nally, I want to take this means of saying very humbly, "I Really Do THANK YOU!" It makes me very happy and proud, yes, and humble too, at the way my friends of this county showed that they believed in me. For all this I am very grateful.

I shall try to my utmost to give my office every ounce of my undi- vided efforts, to try to give you the type of service you are expecting and want and to which you are equally justified and entitled to.

Again I say "THANKS A LOT, FOLKS," I appreciate everything you have done for me and I shall do e verything in my power to be deserv- ing of the confidence you have pl aced in me.

A. G. Stevenson

J. R. Foust of Amarillo transacted business here Saturday morning.

Joe Lee, Patsy, and Mary Tom Bomar visited Billy Shives in Tulia Wednesday.

Lee Bomar and Mrs. Pearl Simpson were shopping in Amarillo Wednesday.

Three Associations Formed by Dairymen

Three artificial breeding associations have been established in Texas and several others are in the process of organization, according to G. G. Gibson, dairy husbandryman for the Texas A. & M. college extension service.

A look at the records of other states shows the success of the practice, Gibson says. Last year 350,000 cows were owned by members of 185 associations in the nation.

Traffic Deaths Up In First Six Months

Texas traffic deaths jumped 47 per cent in the first six months of this year compared to the same period last year, N. K. Woerner, chief statistician of the department of Public Safety, announced today.

The six-month toll was: killed, 874; injured, 30,346; and the economic loss: \$26,141,075. This compared with 594 killed and 20,790 injured in the previous period.

"The increase continues to be greater with each succeeding month," Woerner pointed out. Most dangerous today are highways and the small towns through

which motorists are prone to pass at high speed. Highway fatalities are up 66 per cent. Towns of 2,500 or less population recorded a gain of 70 per cent. Most such towns have little or no traffic policing, and enforcement on the highways is grossly inadequate because the Texas Highway Patrol's 125 cars are limited to 100 miles a day by depleted funds, Woerner said.

Navy Has Openings For Many Nurses

Applications are again being received for appointment to the Nurses Corps of the United States Navy, lieutenant commander Essie E. Coxsey, (NC) USN, of the office of naval officer procurement, New Orleans, announced this week.

Openings for at least 34 nurses are available through the New Orleans office, she added, and any nurse interested in making the Navy a career should write or call the office of naval officer procurement, Room 915 Federal Building New Orleans, 12.

Applicants must be unmarried, between the ages of 22 and 30, a native-born or naturalized citizen for at least 10 years, a graduate of a nursing school, a high school graduate and a registered nurse.

Appointment will be made in the rank of Ensign with pay and allowances totaling \$253.50 per month plus an initial allowance of \$250.00 for uniforms, Miss Coxsey said.

Miss Coxsey was appointed Ensign in the Navy Nurse Corps October 2, 1940 and served overseas for six months, being one of the first Navy nurses to return to the Philippines. She was stationed at the Fleet Hospital, Samar, Philippines.
