Southwestern Public Service Co. Install Radio Station

Silverton has a new radio station, and while it will not bring you any radio programs on your home set, it will help quite a bit to keep that set working. The new station has been installed at the Southwestern Public Service Company office here. It provides radio communication between the office, service trucks, the Tucco power plant, and ties in with the local office with Floydada and Plainview.

"We'll be able to handle service calls much faster with this new radio communication between the office and the service truck," Ralph Glover, Silverton manager for the electric light and power company, said. "In addition, we will be able to establish quick communication with Floydada, our division offices at Plainview and the Tucco power plant, in the event a local situation arises with which these offices could help," he added.

Both Mr. Glover and Lillian Lindsey, cashier at the Public Service Company office, are licensed radio operators and authorized to operate the new radio station. The new station is a Frequency Modulation, popularly known as FM, operation. This type of radio station is normally more static-free than other types. The transmitter for the new radio station is located at the Public Service Company office. This is the second major improvement, designed to provide dependable electric service, that the Southwestern Public Service Company has made recently in Silverton. Several months ago, a standby engine was installed here to provide electric power in emergency cases.

"Silverton is at the end of our transmission line, but not at the end of the line" as far as the efforts of our company to provide better service are concerned," Mr. Glover concluded.

VACATION IN COLORADO

Mr. and Mrs. Virgil Crow and son, Gary, Glenn and Bonnie Watters returned home Wednesday after spending a week with their mother and aunt, Mr. and Mrs. Tom Peach at Agrulas, Colorado. While away they attended "Seven Falls, Garden of Gods, Cliff Dwellers, Cave of the Winds." They also visited the zoo in Colorado Springs. Returning home they visited the Royal Gorge and the State Prison at Canon City, Colorado.

Ramsey Pollard On CBS Church Of the Air

Dr. Ramsey Pollard, chairman of the Radio Commission of the Southern Baptist Convention, will be the featured speaker on the Columbia Church of the Air broadcast on Sunday, July 29.

The program will originate in the studios of Radio Station WOX in Knoxville, Tennessee. Dr. Pollard, who is pastor of the Broadway Baptist Church in Knoxville, will have as his subject "Lead Me to the Rock."

Dr. Pollard has been in Knoxville for many years, having served former pastorates in Tama, Florida, and Handley and Fort Worth, Texas. He received his seminary training from Southwestern Baptist Theological Seminary in Fort Worth, and has been honored by A. D. D. degree from Carson-Newman College. He is director of the Tennessee Baptist Evangelistic Campaign, a trustee of Harrison-Chilhowee Baptist Institute, of Carson-Newman College, and of East Tennessee Baptist Hospital, and a member of the Tennessee Baptist Executive Board.

At the Southern Baptist Convention in San Francisco last month he was chosen to deliver the Convention Sermon to the Southern Baptist Convention meeting in Miami next summer. Many CBS outlets in the south, and throughout the country, carry the Columbia Church of the Air every week. If your local station does not schedule this service, you might ask them about it.

Honored Relatives With Dinner Sunday

Mr. and Mrs. Perry Thomas, Jr., honored Mr. and Mrs. G. D. Swenson and family, of Port Lavaca, Texas, Sunday with a family dinner. Attending were: Mr. and Mrs. Pat Pavlicek, Mrs. Perry Thomas, Sr., Mrs. D. W. Mayfield, Mr. and Mrs. Garland Parker and boys, of Wellman, Texas.

Mr. and Mrs. Swenson and family left Wednesday morning after having spent the past week with Mrs. Swenson's mother and sister, Mrs. D. W. Mayfield and Mrs. Perry Thomas, Jr.

Mr. and Mrs. Eugene Rowland and girls and mother, Mrs. Edwards, of Quanah, visited his brother, Mr. and Mrs. Albert Rowland Sunday.

FARM PROGRAM From the County PMA Committee

1951 Cotton Loan Rates Announced

The Production and Marketing Administration of the U. S. Department of Agriculture recently announced that the average loan rate for middling 7-8 inch upland cotton, gross weight, produced in 1951 will be 30.46 cents per pound, which is 90 per cent of parity price of cotton as of August 1, 1951. (The August 1 parity price, announced recently, is 33.85 cents per pound). Last year the average loan rate for middling 7-8 inch cotton, gross weight, was 27.90 cents per pound.

The average rate for middling 15-16 inch cotton will be 125 points (1.25 cents per pound) above the average rate for middling 7-8 inch cotton, or 31.71 cents per pound, gross weight.

The loan rate for Briscoe County of middling 15-16 inch cotton, gross weight is 31.46 per pound. Further information may be had by contacting your local PMA office.

USDA Programs to be Examined

Secretary Brannan's Nationwide Family Farm Policy Review program is aimed at obtaining farmer opinion of the present programs of the Department of Agriculture, along with suggestions for their approval according to B. F. Vance, chairman of the Texas Agricultural Mobilization Committee.

In carrying out the most extensive survey of any Secretary of Agriculture, Brannan is calling upon the 3,000 State and County Agricultural Mobilization Committees to take the program to the grass roots. Vance says these committees will hold meetings at the State, county and community levels, during which time representatives and leaders of farm groups, churches and civic organizations will be invited to express their opinions.

According to Vance, the USDA wants to adopt future policies to the needs and recommendations of family farms. It is important that all interested persons attend one of these meetings or send their recommendations and suggestions to the local county agricultural mobilization committee.

Vance says, "if democracy is to be a continuing scourge of hope to rural people elsewhere in the world, democracy must continue to advance in rural America." Progress in agriculture must be continued and he says no person is in a better position to make recommendations for their progress than the rural people and especially the man of family who operates a farm.

Jo Ann Allen to Wed Donald D. Paige August 26

Mr. and Mrs. Glen E. Allen, 1504 Beverif, Amarillo, Texas, have announced the betrothal of their daughter, Jo Ann, to Donald D. Paige, son of Mr. and Mrs. Lester E. Paige of Silverton. Nuptial vows will be solemnized August 26 at the Clarendon hotel in Clarendon. Miss Allen is a graduate of Amarillo High School and the prospective bridegroom was graduated from Silverton High School.

T. D. Davenport, of Hagerman, New Mexico, came Sunday to visit his sister, Mrs. W. H. Newman. Monday Mr. and Mrs. Newman and her brother went to Wellington to visit J. C. Davenport.

Mrs. Leo Trimm and daughters, Judy and Janet, of Martinville, Va., came last week for a visit with her mother, Mrs. C. M. Strickland and other relatives.

Bert Grundy Buys C. A. Tunnell Grocery Business

A deal was consummated Monday, August 6, when Bert Grundy of Quitaque, purchased the grocery business of C. A. Tunnell, better known locally as Tunnells Grocery.

Mr. Grundy will be joined by his brother, Jean, also of Quitaque, in operating the store here. Jean will have charge of the store in Silverton. He has had five years experience in the grocery business—working with his brother, Bert.

The store building will be closed for about two weeks, while the Grundy's repaint, repair and re-arrange the fixtures and stock. Announcement will be made when they are ready to open.

Mr. Tunnell says he does not know just now what he will do since disposing of the grocery store, but will remain in Silverton for the present, as he owns his home here.

"DALLAS" SHOWING AT PALACE THEATRE AUGUST 12-13

Lanky, drawing Gary Cooper is back in the saddle again, which should be good news for his legion of admirers. "Dallas" is a rousing he-man Western, beautifully photographed in technicolor, with plenty of action sparked by Cooper.

Cooper plays the part of a Confederate colonel in the Civil War which has just ended. He has not yet adjusted himself to the non-military life mainly because he is on the trail of a trio of bad men, three brothers, headed by Raymond Massey, against whom he has sworn vengeance. The Government, meanwhile, has a price on Cooper's head and sent out Leif Erickson to arrest him.

Things take on a different hue when Erickson shows up, for Cooper decides to take over the role of marshal and heads right into enemy territory. The crux of the action takes place on a ranch owned by Antonio Moreno which Massey is plotting to acquire for himself. Naturally Cooper will have none of this, and from then on follows a series of shoot 'em sequences that result in the inevitable triumphing of virtue over vice. Cooper is also successful in winning both a pardon and the girl, Miss Roman, who had been engaged to Erickson.

Next weeks program appears on page two.

ATTEND MONTE VISTA RODEO IN COLORADO

Mr. and Mrs. Bill Malone and Mr. and Mrs. G. Mayfield and Mena Kay just returned from a trip to New Mexico and Colorado. While there they attended the big Ski-Hi-Stampede Rodeo at Monte Vista Colorado.

OLES CHITTY SERIOUSLY ILL

Oles Chitty was stricken Sunday afternoon while attending a baseball game, and was carried to the Plainview hospital. Mr. Chitty is partially paralyzed it is reported, and so far they have not found the cause of his illness. His family and relatives have been with him all week.

Mrs. F. M. Price, of Floydada, visited friends here Tuesday night and attended church.

Mr. and Mrs. Bill Gilbreath, of Lockney, spent the week end with her mother, Mrs. John Bradley.

Dennis McGavock, of Tulia, spent the week end in the home of his aunt, Mr. and Mrs. Albert Rowland.

Tom Brooks left Thursday on an educational tour through the New England States. He plans to spend some time in Washington, D. C.

W. S. C. S. of Methodist Church Met Monday

The W. S. C. S. of the local Methodist church met in their monthly meeting Monday, August 6, starting at 11 o'clock. A very nice luncheon was enjoyed by twenty women. Our fellowship together was indeed inspiring and helpful. After singing and prayer the regular meeting started. Our program was given to discussion from each officer as to her duties for the year. There were thirteen officers to report, only one was unable to attend.

Our guest for the occasion was Mrs. Chester Strickland from Denton, Texas. She is the district president from the Denton district. She gave some very helpful suggestions as each officer reported. Before serving as district president Mrs. Strickland has held every office in the W. S. C. S. but one.

May we say thanks to Mrs. Strickland for being with us as well as congratulating her for the outstanding work she is doing in the work of the W. S. C. S. Mrs. Gordon Montague, president of the local club had charge throughout the program while Mrs. Joe Smith and Mrs. Dickenson were in charge of the music. Mrs. Secord dismissed the group with prayer.

Every woman that does not attend a church meeting are urged and invited to come work with our W. S. C. S. We are growing in membership and truly have a wonderful program outlined for the year. This program is being carried on in a different way and we are sure you will enjoy it. As a Christian won't you put every effort forward to attend each meeting you will be lifted spiritual for we each will be helped if we do not leave God out of our life.

May this be an invitation to you to come out to our next meeting, September 3, at the church at 2:30 p. m. Reported.

Baptist Hour Radio Broadcast Will be Financed by Mail

The ninety fourth session of the Southern Baptist Convention, meeting in San Francisco last month, voted to continue the present plan of supporting the nation wide broadcasts of the Baptist Hour by contributions mailed in to the Atlanta offices.

After some bit of discussion of the matter, the Convention reaffirmed the action it had taken in Oklahoma City in 1949, and in Chicago in 1950. Thus, the Baptist Hour will be dependent upon the financial support of listeners for the bulk of its work.

The Baptist Hour programs are being carried this summer by a few less than 250 stations. But all of these outlets have scheduled the broadcasts without cost to the Radio Commission.

Dr. S. F. Lowe, Director of the Radio Commission, explained, "We have been paying for some of our stations in our larger cities, and we plan to resume these commercial commitments in the fall. But our income from mail receipts always shows a drop during the summer months, and we felt it best to guard against a deficit by cutting our expenses as much as possible for this quarter."

Dr. Lowe went on to say that the Radio Commission is operating on a sound basis this year, and that mail receipts have been running about even with expenses thus far.

Mr. and Mrs. W. R. Humphries, of Tulia, visited Mr. and Mrs. J. S. Fisher Sunday afternoon and attended church.

Joe Ray Stodghill visited his brother and family, Mr. and Mrs. H. Stodghill in Birmingham, Alabama recently.

Stodghill Reunion Held at Fort McKensy

Mr. and Mrs. Hugh Stodghill left Friday for Munday, Texas, to attend the reunion of Mr. Stodghill's brothers and sisters. They went from Munday to Fort McKensy, Texas.

Those attending were: Mr. and Mrs. Lyle Stodghill and girls, of Munday; Mr. and Mrs. Cliff Stodghill and son, of Wichita Falls, Texas; Mr. and Mrs. Ralph Shultz, of Garland, Texas; Mr. and Mrs. Herbert Stodghill and son, of Munday; Mr. and Mrs. B. M. Stodghill and son of Kermit, Texas; Mr. and Mrs. Jack Cartwright and daughter, Mr. and Mrs. Harold B. Devine, Bill Trailer, Mr. and Mrs. Dave Mauldin, Mr. and Mrs. John C. Keeble, and Bob Young, all of San Antonio, Texas.

Mr. and Mrs. Jim Mercer and children, Sbinall, Texas; Mr. and Mrs. Billie Jack Cartwright, Mrs. Cartwright's sister and brother, Shirley and Mike, of Corpus Christi; Jo Ann Graves, Mr. and Mrs. H. C. Peace, Mr. and Mrs. H. H. Honeycutt, all of Wichita Falls; Mr. and Mrs. Hugh Stodghill, of Silverton.

All enjoyed fishing, swimming and boat riding during the reunion.

Bell County Re-Union Of West Texans Set For August 12

On second Sunday of August, August 12th, the annual reunion of Bell County Settlers who have located in the Plains and West Texas Area are given notice of the regular meeting place on the Northeast section of the McKenzie State Park at Lubbock, Texas.

Those who come to spend a full day of pleasure and pastime are expected to bring dinner baskets. Furnished by the Committee will be ice water, seats and some refreshment. Come one! Come all! The invitation is extended to the children and the children's children of those parents and grandparents who in yesteryears came from Bell.

T. M. Marshall moved Mr. and Mrs. Bob Mooney to Amarillo Tuesday night where they will make their home. Mr. Mooney will be employed with the Ford Motor Company.

Mr. and Mrs. Bob Hill and Mr. and Mrs. J. W. Lyon, Jr., left Saturday morning on a vacation trip to Colorado.

Mr. and Mrs. Edward May and children, of Gunter, Texas, visited his mother, Mrs. J. H. May and other relatives over the week end.

Drives 1,500,000 Miles for Kiss

SHREVEPORT, LA.—Shelly Liles, bus driver, is welcomed at the bus terminal here by his daughter, Elizabeth, as Liles completes a record-breaking 1,500,000 miles of driving without an accident. Liles, 49, established his amazing record in 20 years time, driving an average of almost 75,000 miles a year with a perfect safety record. It all began the year his daughter was born in 1931.

GOVERNOR ALLAN SHIVERS gets a smile from little Janalee Davis of Del Rio, formerly a patient at the Gonzales Warm Springs Foundation for Crippled Children. The governor has accepted the general chairmanship of the Foundation's committee for the third successive year and will spearhead the fall campaign to provide additional facilities vitally needed for the rehabilitation of thousands of physically handicapped Texas little ones.

Magic Material, Jack-of-Trades Is Little Known

What is it that fire-protects the home, was used in the construction of the pyramids of ancient Egypt, helped keep Roman contractors out of jail, makes your glass of beer more enjoyable, is important in the manufacture of aircraft, has its part in the sale of women's wearing apparel, greets you every morning in your toothpaste and has a thousand other uses?

What is this substance that stares at you from the walls of your home and office, helps you recover from a broken leg and is used by farmers to condition the soil?

What is this magic material that was putty in the hands of Michelangelo, that has its own sprinkler system and helps make American dentistry the best in the world?

No, it's not the "Thing."
It's just common, ordinary CaSO₄·2H₂O; or, to put that in English: it's hydrous calcium sulphate.

Simple Definition

Of course, we could come down to earth and tell you it is just plain "gypsum," but it's an amazing thing nine out of ten men and women on the street will come back with the question, "What's gypsum?" despite the fact that practically everyone comes in contact with gypsum in some form or another throughout the day.

Gypsum is a mineral, it's a rock. It is one of the earth's most plentiful natural resources. In its natural state it is about one-fifth water by weight. This is not free water, rather, it is water in chemical combination.

It is the water-chemical content that makes gypsum one of nature's most amazing substances.

The gypsum rock, which is mined and/or quarried, releases about three-quarters of its water content when it is calcined, or heated. The residue is a powdery, white substance, which has a great affinity for water.

It is, in effect, plaster powder. When water is added and mixed into the plaster powder, a plastic substance results, which can be worked into any shape desired—into a statue, a dental cast, a mannequin for a store window, precision molds for airplane engine parts, a cast for a fractured limb or a wall for a room.

When the plaster powder, plus water, sets, the substance again becomes rock gypsum—the same material that was taken from the earth. But now it is in the shape to which it was molded in its plastic state.

Nothing New

Builders, sculptors and surgeons have known about gypsum for years and years. The latter call gypsum, processed for their purposes, "Plaster of Paris." The name derives from the fact that the city of Paris, in France, is built over gypsum deposits.

Historians report that the Assyrians, 6,000 years ago, used gypsum as a fire protection. They recall that the body of King Tut was encased in gypsum plaster. Minos, semi-legendary king of ancient Crete, is said to have had a throne of pure white gypsum. Egyptian building genius which conceived the Great Pyramids also employed gypsum mortar to bed the blocks and gypsum plaster to cover the interior. Today, after more than forty-five centuries the plaster is still evident.

The Bible, in the book of Leviticus, tells of a law which required that all houses where leprosy existed be completely replastered with gypsum. Roman legislation, at the height of the Empire's glory, insisted that the magic mineral be employed in the fire-proofing of dwellings. Contractors who failed in the requirement were liable for fine, imprisonment or the death penalty, depending on the fire damage to life and property.

Army Water Supply Units Keep Troop Supply Fresh

The water supply units of the United States Army's Eighth Engineer Battalion in Korea, have purified nearly 60,000,000 gallons of water. The units convert contaminated Korean river water into safe drinking water for use by 1st Cavalry Division combatants.

Before the units can begin to function, small reconnaissance patrols locate suitable riverside pumping points; usually about 2,000 yards from the frontlines. The points selected must be protected from enemy artillery fire and accessible to regimental water trucks using the main roads.

It takes approximately 45 minutes to process one cycle of water after the unit is put into operation. The processing, which includes filtering, cleansing, and purification involves the use of assorted chemicals and three separate water tanks in which water is pumped from the river. Thus far, there has been no evidence that the enemy is poisoning water but, as an added precaution, water points are placed at flowing streams because such water is less likely to be affected by poison.

The fifteen 3,000 gallon tanks used in the operation could theoretically turn out 60,000 gallons of water in one 20-hour period.

Texas Game and Fish Commission Holding Public Meetings

Continuing the policy that was inaugurated last year, the Texas Game and Fish Commission is once more holding a series of Public Meetings in the twenty-eight counties of the Panhandle over which it exercises regulatory jurisdiction. The purpose of the hearings is to permit landowners, sportsmen, and other interested persons to present their opinions on open seasons, bag limits, shooting hours, and other questions to representatives of the Texas Game and Fish Commission.

The various opinions secured are then consolidated and presented to the Commission. To the extent compatible with the supplies of game on hand, as determined by Game and Fish Commission Biologists and Wardens, the Commission will be guided by the requests of landowners and sportsmen in making the actual regulations.

Mr. and Mrs. Milton Dudley went to San Angelo Monday morning for his mother, Mrs. J. B. Dudley.

Miss Martha Dudley, of Amarillo, visited in the home of Mr. and Mrs. Milton Dudley Monday.

Mrs. Dick Higgins, of Lubbock, is visiting her sister, Mr. and Mrs. J. C. Hill this week.

OLD FRIENDS VISIT WITH SCHRODER FAMILY AT HOME OF MRS. STONE

Friends calling in the home of Mrs. M. P. Stone last Wednesday to visit with Mr. and Mrs. R. J. Schroder, former resident of Silverton, were: Mrs. R.L. Campbell, Miss Roberta Campbell, of Hereford; Mrs. Glenn Burnett, of Amarillo; Mr. and Mrs. Lewis Francis, Dr. and Mrs. W. A. Sedgwick, Tulla; Mr. and Mrs.

Bob Dickerson, Mr. and Mrs. J. E. Arnold, Mrs. Pearl Simpson, Mrs. Emma Frieze, Mrs. T. L. Anderson and Miss Anna Lee Anderson. Mrs. Arnold entertained the group with her song: "Quitaque" and a reading of negro dialect. This was enjoyed by all. They were her own composition. The Schroder family left Thursday morning to visit Carlsbad Caverns.

"I got the story on
50,000 Miles-No Wear
and changed to New Conoco Super Motor Oil"

Says H. Joseph Johnson
Taxi Fleet Owner
Maryville, Missouri

"Our fleet of cars are driven 25,000 to 30,000 miles a month. We find that motors lubricated with Conoco Super outwear the bodies of our cars."

"50,000 Miles-No Wear!" Proved Here:

After a punishing 50,000-mile road test, with proper drains and regular care, engines lubricated with new Conoco Super Motor Oil showed no wear of any consequence: in fact, an average of less than one one-thousandth inch on cylinders and crankshafts. AND gasoline mileage for the last 5,000 miles was actually 99.77% as good as for the first 5,000!

World Death Rates Decreasing Through Medical Techniques

NEW YORK, N.Y.—Extensive application of the recent advances in medicine and public health has strikingly improved health conditions throughout the world.

Of marked significance, according to the statisticians, are the declines in mortality recorded in the so-called underdeveloped and poorer sections of the globe.

Substantial, though not as dramatic, declines were registered in Puerto Rico, Mexico, Costa Rica, Chile, and Venezuela.

England and Wales experienced a mortality decline of 27%, and the United States, a decline of 23%.

Recent gains in mortality in the Western nations are credited in large measure to control of the infectious diseases by the wide-spread and effective use of sulpha drugs, penicillin, and other antibiotics.

Prize-Winning Question Set Belatedly Accepted

BUFFALO, N.Y.—Contest winners are usually surprised when they are awarded prizes, but few could be more startled than was Mrs. Samuel Yochelson of Buffalo.

Mrs. Yochelson received an encyclopedia and a letter through the mail explaining that it was a prize on a radio program.

A panel of experts on a broadcast had failed to correctly identify all of a series of questions she submitted.

Mrs. Yochelson had mailed in the questions in 1939—twelve years ago.

Count Defies Ancient Curse, Hunts for Hidden Treasure

NEW YORK, N.Y.—A descendant of the Dukes of Burgundy is seeking the fabulous treasure of the Templars in an old French castle in the valley of Beaujolais.

According to history, Great Master Jacques de Molay of the Order of the Temple pronounced a curse on the hoard as he was being burned at the stake by Philip the Fair, the French king who wanted the bullion.

Phillip and a churchman associated with him perished within the year and no further attempt to locate the wealth was risked until the end of the 15th century.

Then Louis XI imprisoned the Lord of Arigny and after torture learned that the gold was concealed in his castle.

Louis died immediately after he had signed the search warrant. His daughter, Anne, who ruled as regent during the infancy of her brother, Charles VII, ordered the search continued.

But when the diggers began work in the subterranean hallway of Arigny castle, the foremost workman suddenly screamed. His fellows found him dead. The other diggers refused to proceed.

Centuries passed. In 1900, Count Pierre de Rosemont, owner then of the square towered fortress, discovered the entrance to underground galleries.

One of his servants entered and was promptly killed by two enormous stones that fell on him.

Two years later, however, two farmers from the neighborhood offered to search for the treasure. Before they even entered the castle they were found dead, their skulls bashed in.

Now the present owner of the castle is resuming the treasure hunt.

Dog, an Heiress, Loses Bequest of \$40 a Month

MEMPHIS, Tenn.—Dixie, a pet bulldog, is just a plain dog again. A court has ruled that she is no longer an heiress.

After a long legal fight, the court ruled that \$4,500 willed Dixie by her late owner, Gerald S. Richberg, must go to "next of kin".

Richberg's brother, J. K. Riehborg of Bishopville, S. C., and Mrs. Eddie R. Gamble of Charleston, S. C., a niece, contested the will.

They argued that Dixie was the property of her master and that property could not inherit property.

Dixie was to have received \$40 a month from the bequest. She was still in the custody of Miss Frances Cochran, a step-granddaughter of Richberg, and apparently unperturbed.

Larger Cities Are Hopping On Parking Meter Band Box

Big cities are rapidly "wising-up" to the use of parking meters as a means of controlling use of scarce curb space, as well as a source of revenue for off-street parking facilities.

The American Municipal Association reports that most recent major cities to approve use of meters are Chicago and New York. Chicago has already begun installation of the first of its anticipated 15,000 meters.

In New York, the city traffic commissioner recently requisitioned 1,500 of the parking-time regulators to be installed for a test run. Plans are for New York's meters to be in operation by mid-July.

Big cities are late-comers as meter users, the Association pointed out, for in late 1949 five major U. S. cities—Baltimore, Chicago, Milwaukee, New York and St. Louis—had no meters in use.

Milwaukee's first parking meter was installed in December, 1949, and by mid-May of this year 1,258 were in operation.

Average monthly collection from each meter has been running approximately \$11. St. Louis' first group of 300 to 400 meters went in operation in April and May.

Chicago hopes, through use of meters, not only to allow every shopper-driver a fair share of curb space, but also to speed traffic and to cut congestion.

Chicago hopes, through use of meters, not only to allow every shopper-driver a fair share of curb space, but also to speed traffic and to cut congestion.

Each curb parking space is being made between 22 and 24 feet in length in hopes of eliminating the usual jockeying and backing up in parking that causes street congestion.

New York's initial installation will be in shopping centers in the boroughs of Queens, Brooklyn, and the Bronx, as well as on the lower east side of Manhattan and in upper Manhattan around 125th Street.

The fee for use of the meter is set at 10 cents. The time limit is set at an hour in all locations except in Queens.

Lightweight Rubber-Canvas Boat Reported 'Unsinkable'

A folding boat said to be unsinkable is the latest item to go on the market for sportsmen.

A two-seater model, the boat weighs only 56 pounds complete with sails, paddles, and leboards.

The fabric of the boat is constructed from a combination of canvas and rubber, and its collapsible frame is made of seasoned mountain ash.

Popular Mechanics magazine reports that the folding boat is unsinkable even if it is completely filled with water because of two air-filled tubes wrapped around the hull at the gunwales.

The boat comes apart to form two compact bundles that can be carried by one person and which will fit into a car trunk.

It is said that the portable boat can be assembled in less than 15 minutes.

Looking Ahead

The Early Germans had specialists in divining the future from the cries and flights of birds and from the neighings and snortings of white horses which were kept in sacred groves or coppices by a priest or king with an eye for business.

The Mayans had their bird-and-jaguar-men and the Toltecs their priests and sorcerers with tattooed bodies—all of them rich in worldly goods, including magnificent feather headdresses, capes, and ornaments.

With a fifty-fifty chance of being right, fortune-tellers draw through the ages have been credited with certain historic predictions.

One of the most dramatic of these was that of a soothsayer who appeared suddenly and mysteriously to announce the end of his empire to the powerful Aztec king, Montezuma.

Shortly afterward, an army led by the Spanish explorer, Hernando Cortez, conquered Mexico and with it, the Aztec Empire.

Lions Attack—With Paint

In line with their program of good works, the members of the Lions Club have completed a painting project on the exterior of the Country Home for Convalescent Children at Washington.

Although the Home is supported by the Community Chest, there are just "not enough funds to do much fixing up," according to J. F. Crowell, president of the club.

Overlaid business and professional men worked under the direction of a member Lion who is a painting contractor.

While convalescent children watched through the windows with great interest, the drab exterior was given a gleaming new coat of white paint.

The decorating of the interior is also on the Lions' program.

Moon Trip

According to one authoritative work ("Rockets," by Willy Ley), a Rocket trip to the moon would take about 94 hours.

At first the rocket would move along a path which forms part of a long ellipse around the Earth, while the last part of the trip would follow a section of an ellipse about the Moon.

Science May Soon Give Man Longer Span of Lifetime

CHICAGO, Ill., June 8—Science will eventually be able to greatly delay the aging process in man and further increase his life span, a former University of Chicago professor predicted.

Speaking at Northwestern University's Centennial Conference on "Problems of an Aging Population," Dr. Anton J. Carlson said he does not foresee "rejuvenation" either in the popular or in the quick medical sense, but expects "intensive research to teach scientists how to better care for and operate the living machine."

Dr. Carlson, Hixon Distinguished Service Professor Emeritus of Physiology at Chicago, reported that man's hereditary constitution and the stresses and strains of living are the factors that determine how long he will live.

He defined stresses as faulty diet, infections and other accidents in the life of the individual.

Many Unknown Problems

The former University professor said that science does not yet know to what degree the aging process is due to genetic constitution or to the accidents of living, such as poor eating habits, overwork, laziness, gluttony, etc.

"The slowing up of the organ systems of the body is on the whole so gradual that it becomes practically impossible to separate the factors of aging from the factors of impairment due to the accidents or disease."

Dr. Carlson told physicians and social scientists attending the fourth of six Northwestern Centennial Year conferences that "if now longer life or longer abundant life is the desired goal... we must obviously reduce the production of those (persons) with less than optimum hereditary potentials, and provide optimum data and optimum environment for the others."

Tissues Dry Up

Age changes in man appear at different age levels, he declared, and come at different age levels in the organ systems of the individual.

The progressive age changes begin with gradual drying up of body tissues, gradual retardation of cell division and tissue oxidation, continue with cellular atrophy and lessening of tissue elasticity, and end with progressive degeneration and atrophy of the nervous system.

Dr. Carlson cautioned that underweight and obesity both shorten the life span. He said the prevention of obesity in all people past thirty is imperative in longer life expectancy.

Major Crime is Committed In U.S. Every 18 Seconds

WASHINGTON, D.C.—Just how bad is the crime situation in the United States? According to the yearly report turned in by Edgar Hoover, director of the Federal Bureau of Investigation, a major crime was committed somewhere in America during every 18 seconds.

The crime volume increased 1.5 per cent for the year and all individual offenses, save one, contributed to the rise. Surprisingly, robbery was the single offense that did not top the preceding year.

Every five minutes in 1951 someone was feloniously assaulted or killed. An average of 146 persons were held up and robbed every day, and the stolen car ratio was 468 for every 24 hours.

Hoover's Uniform Crime Reports for 1950 was compiled with the aid of 5,211 police agencies, but federal crimes and others, such as arson and embezzlement, were excluded, making the estimated total a conservative one.

One disturbing element of the statistics pointed out that, although urban crime remained about the same as 1949, rural crime showed an increase of 4.4 per cent. Also alarming was the fact that arrests of males under 21 increased 6.9 per cent. The predominant age among all persons arrested was 21 years.

Police were most efficient recovering stolen autos, returning 92 per cent.

Fire Company Shoots Works In Seeking Danger Source

NEWVILLE, Pa.—Chief John Bender and his firemen have a reputation for getting to the scene when called in a hurry.

One night recently the chief jumped from bed at 4 a.m. to answer an out of town alarm.

By the time he reached the fire station the tail lights of the fire wagon were disappearing up the street. Bender commanded a car and took off in pursuit, catching and passing the truck on the highway.

"Step on it," he remarked to a fellow fireman. "Must be a lulu by the bright glow."

The two vehicles raced through the night until the glow became more distinct, became a line of flame and then a semicircle. The chief flagged the fire truck to a stop.

The eager firemen had been racing toward the moon.

'Temple to Power Is Rome's Plant On Historic Tiber

WASHINGTON, D.C.—Along Rome's historic Tiber River a literal as well as symbolic temple to power has joined the ghost-haunted relics of imperial and fascist Rome.

Just opened by the president of postwar republican Italy, this modern temple is a hydroelectric plant which will harness Tiber waters at Castel Giubileo, about 10 miles north of the Eternal City. It is expected to contribute 70,000,000 kilowatt hours a year to Italy's power resources.

Compared with the 20-odd billion kilowatt hours annually produced in Italy as a whole, the Tiber plant's capacity is relatively minor. The station, however is part of a large-scale program for the region, and will meet a pressing need in Rome and environs.

It also represents an expansion of general power reserves now playing a vital part in rebuilding and expanding Italian industrial and economic strength.

Italy long has been handicapped by lack of domestic coal and oil. Most of such fuel has had to be imported at heavy cost and inconvenience.

Thus, the nation has come to depend more and more on electric power, generated chiefly from streams and waterfalls of the Alps and of the Apennines mountain spine along the peninsular "boot."

An estimated 87 per cent of the electric power that operate Italy's factory machines, its heating, lighting, and household equipment, comes from these water sources.

The other 13 per cent is derived from thermal (heat-produced) electricity. Of the latter, nearly half is man-made in plants that burn coal, oil, and gas—mostly coal at present.

The rest, known as geothermic power, is obtained through the ingenious tapping of nature's own heating system, available in various volcanic areas of Italy.

The main source of volcanic power so far developed is an awesome area of steam vents and boiling pools near the town of Larderello in west-central Italy. There a vast supply of underground energy was first put to work in a practical way before World War I.

Today, with the help of Uncle Sam's ECA funds to further Italy's over-all power programs, the modern plant and drilling machinery at Larderello are turning out a billion kilowatt hours annually, with considerably more in prospect.

Man Winds Up in Jail For No Sense of Humor

PONTIAC, Mich.—A guy who didn't have a sense of humor wound up in jail here recently.

Police Sgt. Gordon Hodges chased down a speeding convertible in nearby Birmingham and motioned it to the curb. Instead of the usual quip about "going to a fire", he said casually, "Where did you steal that car?"

To his complete surprise the driver stammered, "at Forest and Gratiot, sir."

Hodges booked the youth at the Pontiac jail. About an hour later the owner made the discovery that his car had been stolen.

Fuel Problem Cited Major Obstacle to Lunar Flight

NEW YORK—A rocket that could go to the Moon and other planets was termed a "marginal possibility" by a General Electric scientist.

Anthony J. Nerad of the G-E Research Laboratory said that the greatest factor in making such extremely long distance rocket flight possible, with fuels now available, would be a rocket built in stages.

Nerad, who is Assistant Manager of the laboratory's chemistry division, said there would be several sections, which would drop off one by one after fuel is used.

However, the scientist warned, still more development is required to make such rockets a reality.

Even by taking advantage of all known techniques to extract from propellants the best possible performance, we still "have not attained the real margins needed for very long-range terrestrial rockets or those which we can send to the planets."

Headliners of Yesteryear Just Quiet Citizens Now

CHICAGO, Ill.—Where are the people who made the headlines yesterday? They are living normal lives just like the rest of the world.

Douglas (Wrong Way) Corrigan, for instance, is a presently unemployed test pilot. He made world headlines when he supposedly took off in New York for Los Angeles and wound up in Ireland. Whittaker Chambers, long a headline figure in the Communist spy trials, now lives quietly on a farm in Maryland.

Tom Harmon, Michigan's great halfback, then war hero and short-time movie star, now works for Columbia Broadcasting System.

Eden Ahbez, robe-wearing follower of Yoga, knew momentary fame with the popularity of his song "Nature Boy", but now lives quietly in California. Ruth Elder, first woman to fly the Atlantic, took a brief fling at vaudeville, now lives in seclusion.

Time passeth on.

Mr. and Mrs. W. T. Massey and boys spent the week in Mineral Wells visiting her grandmother. They returned by way of Bryson to visit Mr. Massey's uncle.

QUEEN THEATRE QUITAQUE, TEXAS

Open 7 p. m. ADMISSION Adults 35c All Children 9c

Thursday, Friday, August 9-10 SO YOUNG SO BAD A story of delinquent girls Paul Henried, Catherine Leod, Grace Coppin, Cecil Clovelly.

Sat. Mat. & Night, Aug 11 BOWREY BATTALION (The Bowery Boys) Leo Gorcy, Huntz Hall, Virginia Hewitt, Donald MacBride.

Sun. & Mon., Aug. 12-13 JOAN OF ARK Technicolor Ingred Bergman, Jos Ferrer, Francis L. Sullivan, Ward Bond, Carrol Naish, and a cost of thousands.

Tues. Wed., Aug 14-15 YUKON MANHUNT Kirby Grant, Gail Davis, Nelson Leigh, and Chinook, The Wonder Dog.

Vine ripened cantaloupe and honeydew melons, cousins in appearance and refreshing flavor, are perfect in salads for all occasions. The cool, sweet meat of melons is tantalizingly good with mayonnaise, and the appearance of melon salads is always appetizing whether you slice the meat, cube it or make balls.

Melon and cherry salad highlights the good flavors of both melons in a salad you'll enjoy making for your family, and for all happy guest occasions which may be yours this season.

Place rings of cantaloupe on lettuce on a round chop plate. Fill the centers of the rings with the honeydew balls and cherries. Put a bowl of mayonnaise in the center of the plate.

Personal Debts in Record Rise; Double 1945 Figures

In the period since the end of World War II, the American people as a whole have gone into debt to buy homes and consumer's goods at a greater rate than ever before according to an analysis of figures compiled by Government and private sources.

As a matter of fact, the increase in personal debt in the aggregate in the five-year period ending last December was by itself substantially larger than the total of such debt outstanding both at the end of 1945, when the postwar rise began, or any previous year for which records are available. The total of individual debt in selected forms of personal borrowing added up to \$79.5 billions at the end of 1950, a rise of \$44.8 billions, or 129 per cent, from the \$34.7 billions owed at the end of 1945. Practically a quarter of this record increase took place in the year 1950 alone.

Much of this over-all debt increase may have been the natural result of an interplay of factors such as the great advance in incomes in recent years, the markedly higher price level, and the inevitable desire of the people to splurge after the long period of austerity and self-denial during World War II. Nor, by past standards, is the current level of aggregate personal debt abnormally high in proportion to total personal disposable income.

Nonetheless, more individual saving and less spending are essential to help meet the demands of today's emergency. Thus the extent and rapidity of the rise in personal debt, with their impact on an already swollen spending stream, provide a background to the moves for curbing credit expansion in general as a major weapon to combat the strong inflationary pressures released by the Korean war and the anticipated impact of the nation's rearmament effort.

Human Artifacts Constituted Of Nineteen Different Metals

Nineteen different metals were identified in studies on the composition of human hair, skin and nails, two University of Michigan researchers reported recently.

Minute quantities of heavy metals such as silver, lead, tin, zinc, iron, copper and aluminum were among those found as constituents of the human artifacts, the report indicated.

Other metals found were barium, boron, sodium, titanium, strontium, potassium, calcium, phosphorus, magnesium, manganese and silicon. Results of a two-year study of the metallic content of hair, skin (and nails) were presented before a meeting of the Society for Investigative Dermatology by Dr. Raymond W. Goldblum of the University's Medical School Department of Dermatology.

Dr. Goldblum was assisted in the research by Stanley K. Derby, a graduate student in the U-M Department of Physics. Derby performed extensive spectrographic examinations to determine the kind and amount of metal present in the samples collected by Dr. Goldblum.

Dr. Goldblum pointed out that many of the heavy metals, such as zinc, iron, magnesium, copper and manganese are involved in the chemical processes that take place in the skin.

Coal Supply

According to a recent report, issued by the U. S. Geological Survey, somewhat over 24,000,000,000 tons of bituminous coal have already been produced in the United States, while of what remains more than 616,300,000,000 tons are still recoverable, assuming 50 per cent recovery of these reserves. With all kinds, that is, bituminous, subbituminous, lignite, anthracite and semi-anthracite, nearly 30,000,000,000 tons have been mined while over 1,200,000,000,000 tons are still capable of recovery. If our use of coal continued at the same average annual rate as between 1940 and 1950, this would last until the year 3563.

Sterling Alloy

"Sterling" is a silver alloy containing 4 to 6 per cent of copper. It is strong enough to be used in articles made of "solid silver." The pure metal is very soft, but does have better resistance to corrosion than sterling silver. To give strength and low cost pure silver is plated electrically on brass, pewter, etc. This makes a very thin coating, usually only two or three thousandths of an inch in thickness. Since the exposed coating, in such plated articles, is actually pure silver, it is less likely to tarnish than sterling.

Safety Value

Checks for more than \$69,000 were given to welfare institutions and hospitals in more than 20 communities last year from savings realized through a reduction in accidents by a steel company. Officials of the company had previously announced a policy whereby savings in insurance and accident compensation payments on account of improved safety, as compared with the previous five-year period, would be used for the improvement of social agencies in communities where the company operates.

Era of Progress Challenge To America's New Generation

From the thousands of young primary and high-school graduates this year will come some of the historians of tomorrow. They will have personal impressions of this historic era. It is to be hoped that would-be dictators with dreams of world conquest will have vanished, and all the nations will be resolved to live in peace and harmony by the time these graduates are writing history.

Our population has increased significantly. But our industry has kept pace with it, and there is very little unemployment. The key to expanding industry is the invention of new products, and the key to invention is the incentive provided by our Patent System. A new product can create an empire of manufacturing industries. At the beginning of the century, the two Wright brothers, operating a bicycle-repair shop in Dayton, Ohio, conceived the idea of putting their skill and imagination to work to make a flying-machine. If they could produce a successful flying-machine, it could be patented, and they could get financing to start a manufacturing business protected by their patent rights. They did succeed and by 1910 there were 300 workers making planes. Improvements on the original model were also designed and patented. The industry expanded rapidly. Today, there are 300,000 workers in America making airplanes, and as many employed in allied sources of supply.

The airplane is but one of the many inventions that stand as milestones along the historic road of our industrial progress. Let us feel certain that our future historians will also have bright chapters of brilliant progress toward the betterment of all humankind.

Expert Finds Leftie Boys Outnumber Southpaw Girls

If there is a left-handed child in your family, chances are two to one it's a boy. And the chances of your having a left-handed child of either sex are about 6 in 100. (Or maybe 1 in 16 would be a more realistic way of stating it!)

No one knows exactly what causes left-handedness, but those are the probabilities of its happening to you, according to Miss Jerlyn Madison, handwriting consultant of the Sheaffer pen company, who has been doing some research on the subject.

But if you do have a left-handed child it's nothing to worry about. The experts are virtually unanimous that left-handedness itself has no relation to intelligence, physical appearance, or chances of success in life.

A left-handed child does often have some difficulty in learning to write, however, says Miss Madison. The reason is that in writing he can't just do with his left hand what others do with their right. He has to learn a completely different technique.

Therefore, it's a good idea to give him all the help you can while he is learning. Talk to the child's school teacher to make sure he has all the necessary help in school. And see that he has good writing equipment to work with.

With a little help over the rough spots, there is no reason why the left-handed child can't have a happy, well-adjusted life. He may even grow up to be President. After all, President Garfield was a southpaw, and Truman is partially so.

Canadian Steel

Canada, eighth largest steel producing country in 1950 with an output of 3.3 million tons, is rapidly enlarging its iron and steelmaking capacity and developing its vast raw material reserves, according to Dominion government reports. In recent years, Canada has augmented its own annual steel production about one-third by imports of steel products from the United States. Canadian steel companies now are spending \$100,000,000 in expansion and improvement programs which will bring steel capacity to about 4.5 million tons, blast furnace capacity to nearly 3.5 million tons and will add new rolling mill facilities, according to a Canadian government source.

Automobile Economy

The 1950 edition of "Automobile Facts and Figures," the auto industry's statistical bible, has just rolled off the presses offering still further evidence that a substantial share of the national economy revolves about the motor car. The handbook reports that one out of every six retail, wholesale and service firms in the country deals in automobile goods or services. In Wyoming, our most automobile-minded state, almost 30 per cent of all retail sales involve automobile business.

Dinner At Eight

A dining room which provides a perfect setting for treasured heirloom mahogany furniture has walls painted a lovely, cool ice blue and draperies to match. The Oriental rug on the floor introduces deep crimson tones that blend with the wood of the furniture as well as rose, blue and parchment-beige. Rose colored brocade on the seats of the chairs matches the lamp shades on the sideboard. Above the sideboard, a mirror reflects the silver service that rests upon it and the crystal chandelier above the table.

Gilkeyson-Garvin Vows Read in Home Ceremony

In an informal ceremony held Friday evening in the home of Mr. and Mrs. L. K. Gilkeyson, Miss LaRue Gilkeyson became the bride of L. R. Garvin, son of Mr. and Mrs. Dick Garvin.

The double-ring vows were read before an arrangement of silver columns topped with fern, and banked on either side by baskets of gladiolas. Rev. Elrod performed the ceremony.

Mrs. Toby Penn pianist, played the traditional wedding marches for the occasion. Candelighters were Sharon Gilkeyson, sister of the bride, and Kenneth Garvin, brother of the groom.

The bride, given in marriage by her father, was attired in a silk shantung suit fashioned with a fitted jacket and straight skirt. Her accessories were brown, and she carried a white bible topped with red roses.

Attendants were Don Burson and Miss Mary Tom Bomar. For her friends wedding, Miss Bomar chose a fitted gray dress, her corsage was of yellow roses.

Sister of the bride, Miss Gilkeyson, mother of the bride, Mrs. Gilkeyson; and mother of the groom, Mrs. Garvin, wore white chrysanthemum corsages.

A reception was held immediately following the ceremony. The lace-covered table cloth was centered with a floral arrangement of gladiolas. The bride and bridegroom traditionally cut the three-tiered wedding cake, which was topped with miniature wedding bells.

Mrs. Garvin was graduated from Silverton High School and for the past two years, has been attending Texas Technological

college at Lubbock. Mr. Garvin also completed high school in Silverton and has been enrolled in Texas Technological college. Reported.

Garden Party Complimenting Mr. and Mrs. Fred Mercer

Honoring Mr. and Mrs. Fred Mercer, recent bride and groom, a garden party and reception was given at the home of Mr. and Mrs. Clyde Wright on Thursday evening. The hosts and hostesses were: Mr. and Mrs. M. G. Moreland, Mr. and Mrs. Hank Brown, Mr. and Mrs. Alvin Redin, Miss Anna Lee Anderson, Mr. and Mrs. John Gill, Mr. and Mrs. Lee Deavenport, Mrs. Beth Joiner, Mr. and Mrs. Clyde Wright. They were assisted by Misses Mary Lou Bellinger, Kay Steele, Junis Mercer and Pat Redin, who showed to visitors the many beautiful gifts displayed on the lighted porch, and presided at the guest book where about 150 guests registered. Miss Joni Douglas helped arrange the gift display tables.

Rainbow colors were used at the refreshment table, in flowers, napkins, cakes and mints arranged artistically about the large bowl of lime punch.

Strings of vari-colored lights and balloons in trees, vines and porch, together with potted plants and flower arrangements on the porch and among the lawn chairs made a gay, festive scene as friends gathered to wish the couple happiness.

Mrs. Mercer, nee Jackie Wafford Wingo, is the daughter of Mrs. Lily Wafford. A former teacher in Dallas public schools and an S. M. U. student, Jackie has been in charge of public school music in Silverton for the

past three years, and she recently graduated from W. T. S. C., with a master's degree and M. E. Fred, the son of Mr. and Mrs. H. C. Mercer, is a popular and enterprising young business man and rancher. Both are of our best pioneer families and their hosts of friends were glad to use this opportunity to show their esteem.

Reported by Mrs. Clyde Wright.

Mr. and Mrs. Jack Burleson and son, Joe, of Amarillo, spent the week end with her mother, Mrs. Avis Cowart.

Mr. and Mrs. Alton Strickland and family, of Lubbock, visited his mother, Mrs. C. M. Strickland Sunday.

Mr. and Mrs. J. F. Cowan, of Happy, were business visitors in Silverton Monday.

will see my twins
through college!"*

MRS. MARY CALLON OF INDIANAPOLIS, INDIANA CAN TELL YOU—IT'S PRACTICAL AS WELL AS PATRIOTIC TO BUY BONDS FOR DEFENSE

"I have twin reasons for buying bonds," says Mary Callon, introducing 17-year-old Jack and Janet. "I've been a widow since my children were 8, but they'll have a college education. The U. S. Savings Bonds I've bought will see them through."

Mrs. Callon says, "In 1942 I enrolled in the Payroll Savings Plan at the U. S. Naval Ordnance Plant where I'm an executive secretary. I put 10% of my pay each week into bonds. I've discovered it's regular saving that makes saving possible at all!"

"By careful managing, the twins and I live comfortably. How thrilled I'll be to see them enrolled in Butler University this fall, thanks to my U. S. Savings Bonds! Every breadwinner should buy bonds—there's no better way to save money!"

Mrs. Callon's story can be your story, too!

What Mary Callon did, you can do, too—start now! It takes just three simple steps.

1. Decide to put saving first, before you even draw your pay.
2. Save a regular amount systematically, week after week or month after month.
3. Sign up today in the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

You'll be providing security for yourself, your family, and our free way of life.

**U. S. SAVINGS BONDS ARE DEFENSE BONDS—
BUY THEM REGULARLY!**

JOINT RESOLUTION

AN AMENDMENT to Section 48-d of Article III of the Constitution of the State of Texas...

RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. That Section 48-d of Article III of the Constitution of the State of Texas be amended as follows:

SECTION 2. That the Legislature be and it is hereby authorized to provide for the establishment and maintenance of rural fire prevention districts...

SECTION 3. That the Governor of the State of Texas shall issue the necessary proclamation for said election...

SECTION 4. That the Governor of the State of Texas shall issue the necessary proclamation for said election...

SECTION 5. That the Governor of the State of Texas shall issue the necessary proclamation for said election...

SECTION 6. That the Governor of the State of Texas shall issue the necessary proclamation for said election...

JOINT RESOLUTION

AN AMENDMENT to Section 49-b, Article III, Constitution of Texas, so that the amount of bonds or obligations that may be issued by the Veterans' Land Board is increased to One Hundred Million (\$100,000,000)...

RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. That Section 49-b, Article III, Constitution of Texas, be amended so that the same will read as follows:

SECTION 2. That the Governor of the State of Texas shall issue the necessary proclamation for said election...

SECTION 3. That the Governor of the State of Texas shall issue the necessary proclamation for said election...

vided, however, that said bonds shall bear a rate of interest not to exceed three per cent (3%) per annum...

"IN THE SALE of any such bonds, a preferential right of purchase shall be given to the administrators of the various teacher retirement funds, the Permanent University Funds, and the Permanent School Funds; such bonds to be issued as needed, in the opinion of the Veterans' Land Board.

"THE VETERANS' LAND FUND shall be used by the Board for the sole purpose of purchasing lands suitable for the purpose hereinafter stated, situated in this State, (a) owned by the United States, or any governmental agency thereof; (b) owned by the Texas Prison System, or any other governmental agency of the State of Texas; or (c) owned by any person, firm, or corporation.

"ALL LANDS thus purchased shall be acquired at the lowest price obtainable, to be paid for in cash, and shall be a part of the Veterans' Land Fund.

"THE LANDS of the Veterans' Land Fund shall be sold by the State to Texas Veterans of the present war or wars, commonly known as World War II, and to Texas Veterans of service in the armed forces of the United States of America subsequent to 1945, as may be included within this program by legislative act, in such quantities, and on such terms, and at such prices and rates of interest, and under such rules and regulations as are now provided by law, or as may hereafter be provided by law.

"ALL MONEYS received and which have been received and which have not been used for repurchase of land as provided herein by the Veterans' Land Board from the sale of lands and for interest on deferred payments, shall be credited to the Veterans' Land Fund for use in purchasing additional lands to be sold to Texas Veterans of World War II, and to Texas Veterans of service in the armed forces of the United States of America subsequent to 1945, as may be included within this program by legislative act, in like manner as provided for the sale of lands purchased with the proceeds from the sales of the bonds, provided for herein, for a period ending December 1, 1959; provided, however, that so much of such moneys as may be necessary during the period ending December 1, 1959, to pay principal of and interest on the bonds heretofore issued and on bonds hereafter issued by the Veterans' Land Board shall be set aside for that purpose. After December 1, 1959, all moneys received by the Veterans' Land Board from the sale of the lands and interest on deferred payments, or so much thereof as may be necessary, shall be set aside for the retirement of said bonds and to pay interest thereon, and any of such moneys not so needed shall not later than the maturity date of the last maturing bond or bonds be deposited to the credit of the General Revenue Fund to be appropriated to such purposes as may be prescribed by law. All bonds issued hereunder shall, after approval by the Attorney General of Texas, registration by the Comptroller of the State of Texas, and delivery to the purchasers, be incontestable and shall constitute obligations of the State under the Constitution of Texas. Of the total One Hundred Million Dollars (\$100,000,000) of bonds herein authorized, the sum of Twenty-five Million Dollars (\$25,000,000) has heretofore been issued; said bonds are hereby in all respects validated and declared to be obligations of the State of Texas. This amendment shall become effective upon its adoption.

SECTION 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of this State at an election to be held throughout the State of Texas on the second Tuesday in November, 1951, at which election all voters favoring the proposed Amendment shall write or have printed on their ballots the following words:

FOR THE AMENDMENT TO SECTION 49-b, CONSTITUTION OF TEXAS, FOR INCREASING VETERANS' LAND FUND FOR THE PURCHASE OF LANDS IN TEXAS TO BE SOLD TO TEXAS VETERANS OF WORLD WAR II, AND TO TEXAS VETERANS OF SERVICE IN THE ARMED FORCES OF THE UNITED STATES OF AMERICA SUBSEQUENT TO 1945.

THOSE OPPOSING said proposed Amendment shall write or

have printed on their ballots the following words:

"AGAINST the Amendment to Section 49-b, Constitution of Texas, for increasing Veterans' Land Fund for the purchase of lands in Texas to be sold to Texas Veterans of World War II, and to Texas Veterans of service in the armed forces of the United States of America subsequent to 1945."

IF IT APPEARS from the returns of said election that a majority of the votes cast were in favor of said Amendment, the same shall become a part of the State Constitution and be effective from the date of the determination of such result and the Governor's proclamation thereof.

SEC. 3. The Governor of the State of Texas shall issue the necessary proclamation for said election, and shall have the same published as required by the Constitution and laws of this State. 31-4tc

HOUSE JOINT RESOLUTION NO. 37

PROPOSING AN AMENDMENT to Article VII of the Constitution of the State of Texas by adding a new section after Section 11 thereof to be designated as Section 11a, providing for the investment of the Permanent University Fund in additional securities to those now enumerated in Section 11 of Article VII of the Constitution of the State of Texas; providing for the necessary proclamation and publication, and calling of an election therefor.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. That Article VII of the Constitution of the State of Texas shall be amended by adding after Section 11 thereof a new section to be designated Section 11a, which shall read as follows:

"SECTION 11a. In addition to the bonds now enumerated in Section 11 of Article VII of the Constitution of the State of Texas, the Permanent University Fund may be invested in such other securities, including bonds, preferred stocks and common stocks, as the Board of Regents of the University of Texas may deem to be proper investment for said fund; provided, however, that not more than fifty per cent (50%) of the said fund shall be invested at any given time in stocks, nor shall more than one per cent (1%) of the said fund be invested in securities issued by any one (1) corporation, nor shall more than five per cent (5%) of the voting stock of any one (1) corporation be owned; and provided further that stocks eligible for purchase shall be restricted to stocks of companies incorporated within the United States which have paid dividends for ten (10) consecutive years or longer immediately prior to the date of purchase and which, except for bank stocks and insurance stocks, are listed upon an exchange registered with the Securities and Exchange Commission or its successors. This amendment shall be self-enacting."

SECTION 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of this State at an election to be held throughout the State on the second Tuesday in November, 1951, at which election all ballots shall have printed thereon:

"FOR the Constitutional Amendment providing for the investment of the Permanent University Fund in additional securities to those now enumerated in Section 11 of Article VII of the Constitution"; and

"AGAINST the Constitutional Amendment providing for the investment of the Permanent University Fund in additional securities to those now enumerated in Section 11 of Article VII of the Constitution."

SECTION 3. The Governor shall issue the necessary proclamation for said election and have the same published as required by the Constitution and laws of this State. The expense of publication and election for such Amendment shall be paid out of the proper appropriation made by law. 31-4tc

Care in Handling Insecticides Should Be Exercised

The battle with bugs is now underway. As the fight becomes more intense, there often develops a tendency among the human fighters to become careless. Any relaxation of proper handling and methods of application of many of the commonly used insecticides can result in injury or even death, say the Extension entomologist of Texas A. and M. College, to the careless handler.

They point out that insecticides kept in the house should be stored only in a closed metal container. When insecticides that are classed as dangerous are being mixed or applied, the handler is urged to wear a respirator and avoid dust drift or spray mist. The clothing worn when dangerous materials are being handled should be removed and washed before being worn again.

They advise anyone to consult a doctor immediately if any degree of illness is noted during or after applying one of the dangerous type insecticides. All fruits and vegetables that have been treated with insect poisons should be washed thoroughly before they are eaten. Applications of organic insecticides such as DDT should not be made within two weeks of harvest.

Materials that are highly flammable should not be stored in places where there is a fire hazard. When sprays are used in the house or barn, the specialists caution against getting any of the material in dishes, utensils and drinking or feeding troughs. Insecticides stored in barns or other farm buildings should always be clearly labeled poison.

The specialists suggest that you check with your local county extension agent regarding the toxicity of any particular insecticide.

Mr. and Mrs. Grady Wimberly have returned from a visit with their children, Mr. and Mrs. Curtis Wimberly and Mr. and Mrs. Harold Seefeldt and family in Washington, D. C.

Mr. and Mrs. Clyde Mercer returned from a fishing trip to Red River, New Mexico.

SAN JACINTO NEWS

Thanks to our Customers

... For the nice volume of business given me while we operated the grocery business here in Silverton.

Effective as of Monday, August 6, we sold our grocery business to Mr. Bert Grundy of Quitaque, who will close the store for about two weeks while he repairs and refurbishes the store and building.

Tunnell Grocery

C. A. TUNNELL

Greetings To The People of Silverton

I have purchased the grocery business of Mr. C. A. Tunnell, known as Tunnells Grocery, and will be glad to meet all the former customers of the store as well as new ones.

My brother, Jean Grundy, of Quitaque, will be in charge of the store here in Silverton, and will conduct a cash business. The store will be closed for about two weeks while we paint up and re-arrange fixtures and building.

Bert Grundy

QUITAQUE, TEXAS

Appearances

The weather is hot, the ground is dry and the crops are commencing to suffer a little for rain, but it doesn't help us any to sit back and worry, does it? So let's take advantage of the time and opportunity to repair and fix up around the place. There are always a lot of things which need fixing.

See us for the following any time: Lumber, posts, fencing materials, wall paper and paints, plumbing supplies and fixtures, or home appliances.
