More not-so-subtle changes in Midland's skyline were made in 1979, giving further credence to the nickname "The Tall City." (Staff Photo by Bruce Partain)

# Afghan troops reported defecting

Soviet tanks and armored personnel carriers were rolling back into Kabul Saturday and fresh troops were being ferried in to the Afghan capital by air from the Soviet Union, American journalist reported after leaving the war-torn nation.

In Washington, Defense Department officials said thousands of Afghan army troops have defected to the side of the Moslem Afghan rebels, who have been fighting what they call a holy war against a succession of three Marxist governments for the past 20 months and against Soviet occupation troops for the past 31/2

"The Soviets have their hands full."

defense analyst said. U.S. reports have estimated Russian casualties at more than 1,000 killed or

The official Soviet news agency Tass said in a dispatch from Kabul "there is information" Moslem insurgents in the northeastern province of Badakhshan staged raids "with the direct participation of Chinese 'advisers'." The Tass report also claimed the Afghan army had routed rebels in nearby Takhar province.

United News of India had reported Friday that some 900 Chinese had "infiltrated" Badakhshan, where some of the heaviest fighting has been reported since the Soviets sent up to 100,000 troops into Afghanistan and helped install a new government Dec.

China said Saturday it was breaking off talks designed to normalize Chinese-Soviet relations. A Chinese Foreign Ministry spokesman said the decision stemmed from the Soviet action in Afghanistan. The talks, which began Oct. 30, had been expect-

A Chinese Foreign Ministry official said the Soviet action in Afghanistan 'threatens world peace and China's security, creating new obstacles for normalizing relations between the two countries

ed to resume early this year in Pek-

American reporters who left Kabul Saturday in compliance with a government expulsion order reported seeing about 10 tanks and armored

personnel carriers in the center of the ancient, mile-high city. Few Soviet troops or vehicles had been seen in Kabul during the past two weeks.

The reporters, who flew from Kabul to New Delhi, India, also said they saw several Soviet Antonov transport planes unloading troops at the airport in Kabul in a scene reminiscent of the Christmas airlift that signaled the start of the Soviet military interven-

The new Soviet troops arriving immediately boarded vehicles, but it was not known where they were head-

The Afghan government on Thursday ordered American reporters out of Kabul, accusing them of biased reporting and "interference in the

country's internal affairs." The expulsion order did not affect journalists in Kabul who were not American

Tass said Saturday in its reprt from Kabul that Afhan army troops routed rebels in Talogan, capital of Takhar province near the Soviet border, and captured American- and Chinese-

On Thursday, usually reliable sources in Kabul said there were unconfirmed reports Afghan government troops had recaptured the town from rebels. The sources said the rebels earlier had burned down a military garrison there and killed the chief of police, the town governor and the province's chief accountant.

# Midland's growth in 1979 was dramatic

## Building permits during the year neared the \$100 million mark

Staff Writer

Midland calls itself the Tall City In 1979, it not only became taller,

Numerous changes upward, outward and inward marked the face of Midland last year during the best year of growth in the city's history.

Building permits issued in 1979 are the first indicator of the city's strong economy. For the second consecutive year another record was broken with building topping the \$94 million mark. This was about \$7 million above the 1978 figure.

Part of that increased amount of building can be attributed to the city of Midland or, rather, the taxpayers. The new Central Fire Station and

Midland Center — the city's answer to a longtime need for a convention hall were started and completed last year. Improvements to Midland Regional Airport, which has been a twoyear project, finally came to an

More service was added to the airport in the form of Braniff International and a commuter line known as Permian Airways. And boardings were up about 50 percent during the same time period.

The city of Midland completed a nine-hole addition to Hogan Park Golf Course and constructed a new clubhouse that is complete with snack

Midland's downtown area enlarged as Marathon Oil Co., Petroleum Information and Midland Southwest Corp. pushed the barriers outward. Gibraltar Savings & Loan Association completed its new building and First National Bank reached the final stages on its several-story addition. Financial institutions marked a

# Kremlin and Iran

By WILLIAM RANDOLPH HEARST JR.

NEW YORK -The following article was sent to me by Ronald Hilton, the executive director of the California Institute of International Studies and editor of "World Affairs Report.' He has compiled

so much information that I had not seen elsewhere. HEARST that I asked and received his permission to reprint excerpts from his article.

I consider it a journalistic service to pass along the following quotations from Hilton, a distinguished professor emeritus of Stanford University.

U.S. intelligence on Iran was incredibly bad. Just before the shah fell, the CIA had reported to President Carter that there was no danger of his overthrow. Since then, television has provided ad nauseam pictures of the frenzied (programmed?) mobs outside the American embassy in Tehran; the uninformed comments by the courageous reporters who ac-

#### **Editor's Report**

cepted the assignment in Iran simply strengthened the visual impression that we were confronted with a case

of collective Islamic madness. The Paris student riots of 1968 which nearly overthrew DeGaulle revealed starkly how student mobs can be manipulated for political purposes. and the tactic is being employed all around the world. There is convincing evidence that behind the mob scenes and seeming chaos in Iran there is a (See EDITOR'S REPORT, Page 4A)

# Justice William O. Douglas dead at age 81

and Trust.

WASHINGTON (AP) — William O. Douglas, who during a record 36 years as a Supreme Court justice maintained as his goal taking "the government off the backs of the people," died Saturday. He was 81.

Douglas, who retired from the nation's highest court in 1975 following a paralyzing stroke, had been hospitalized since Christmas Eve for "progressive" lung and kidney failure.

There was no immediate word from the Walter Reed Army Medical Center as to the cause of death. The Associated Press was told Douglas died shortly after 10 a.m. The outspoken and individualistic Douglas consistently championed the

rights of all to speak their mind. He was praised as a legal giant and attacked as a dangerous radical. His personal life also aroused controversy. He was married four times

He spoke out on issues — particularly the environment — rather than retreating behind the solemnity of the court. There were three separate at-Appointed by President Franklin D. Roosevelt in 1939, Douglas had by the time of his retirement served with more than a third of the 99 other

justices who ever sat on the nation's highest court. He became an articulate and prolific dissenter as his views for decades often varied with his more conservative peers.

But the Supreme Court of the 1960s, under the leadership of the late Chief Justice Earl Warren, gave Douglas a chance to see many of his early dissents become the "law of the land."

Douglas became a spiritual and intellectual leader of the Warren court's liberal and activist majority - and the rights of the individual often won out over the needs and concerns of government or big busi-

"The purpose of the Constitution and the Bill of Rights, unlike more recent models promoting a welfare state, was to take the government off the backs of the people," Douglas wrote.

As more conservative justices were named to the court in the early 1970s, Douglas again found himself a dissenter. In all, his Supreme Court career — the longest in history — accounted for 532 published dissents. Of those, 181 were written during his last four

years on the bench. Endowed with the talent to write quickly and with passion, Douglas authored 21 books. On the bench, his most fervent writing was saved for his views on freedom of expression, the right of privacy and the environ-

In another opinion, he said, "The First Amendment says 'Congress shall pass no law abridging freedom of speech or press.' I take it to mean what it says. That's strict construction.'

"A censor can always find what he's looking for," Douglas once wrote.

In appointing four conservative members to the court during his presidency, Richard M. Nixon often spoke of the need for "strict constructionism" in interpreting the Constitution.

Why don't some of Midland's larger shopping centers provide facilities for parking or locking bicycles, since some people do like to ride their bikes, in view of conserving energy? — Miss Rand

ANSWER: A check was made with a manager of one of the larger shopping centers and he thought your idea was a good one. He also said at the present time there are no plans for this, but there is a possibility. A check will be made of the number of bicycle riders using the parking lot, and then it will be determined if it is "worth the effort" to install such fa-

Could you give me some information on "dead" batteries in auto-

ANSWER: The U.S. Department of Transportation notes that sooner or later most drivers are confronted by a "dead" vehicle battery. This often happens at a time when it is inconvenient or impossible to drop the battery off for recharging at a service garage, as on a cold winter morning or after the driver has forgotten to turn off the lights.

The Consumer Services Fact Sheet also goes on to say, "When the battery lacks the necessary power to start a car, most motorists will try to start their cars by using a pair of 'booster cables' to borrow starting power from the battery of another car.

Improper 'jump-starting' or carlessness with a battery can be hazardous, and can cause damage to the vehicle's electrical system. One of the hazards ininvolved — though not common — is the possibility of a battery explosion that can cause damage to the eyes or skin.

#### How can I get a John Wayne Memorial Medal? - S.C.

ANSWER: The medal for "The Duke," the first medal to commemorate an American film star hero by the U.S. Government, can be obtained by writing the American Treasury Mint, Dept. GJW-118, Caroline Road, Philadelphia, Pa., 19176.

Who is the current president of the Midland Symphony Guild? -

ANSWER: Our information has it is that the guild president is Mrs. Frank Powell

How much did the Ralph Vineys pay the school system for the Hill house?

I'm not trying to test your ability to get answers, but I really would like, and feel I have a right, to know. I know they have refused to divuige that information, but since our tax money is involved, I think we all should know. Don't you? -- Thank you -- R.P.

ANSWER: You are right, the amount is not being made available. The reason given by a person at the Ralph Viney office is that the Vineys are "not at liberty to divulge the amount because of the sale of

However, your tax money was not involved in the sale of the house The Vineys negotiated the purchase of the house from the three Hill heirs separately. The Midland Independent School District paid the heirs \$450, 000 for the nearly four acres of land where the house sat, but was not involved in the sale of the house itself.

#### Blind man, 27, convicted of murder

SAN FRANCISCO (AP) - A 27year-old blind man has been convicted of murdering the elderly heir to a Florida citrus fortune in a downtown hotel room

A Superior Court jury on Friday convicted Wayne Reed Golden of Los Angeles in the Sept. 27, 1979, killing of Howard O. Phillips, 77, who was discovered bludgeoned to death after what police said was a violent strug-

Golden, who is legally blind, was sexual advance, authorities said.

originally arrested on a trespassing charge when police found him hiding in the shadows of a building. He was later charged with murder after police discovered blood on his clothing and Phillips' motel room key in his

According to authorities, Golden said he met the Harvard-educated Phillips in a downtown bar. Afterward, the men went to Phillips' room

Golden said he hit Phillips with a television set after Phillips made a

### Living in sin, gals? Then try Lisa's Alibi Service

TUCSON, Ariz. (AP) — "Living in sin with your boyfriend without your parent's knowledge? Use the Alibi Service.'

That classified advertisement in the University of Arizona student newspaper is directed toward female college students who don't want their parents to know they have moved in with their boyfriends. Now they can hire Lisa to act as their roommate.

Lisa, who said she was a 22 year-old student and declined to give her last name, operates the Alibi Service and makes her services available for \$20 a month. The ad first ran Thursday and Lisa said she already has signed up two

customers. She said she will accept only eight more women as clients, because keeping track of more than 10 persons could become difficult. Lisa said her service includes taking unexpected telephone calls from her clients' parents, receiving mail for her clients and delivering messages to them. In case of calls or surprise visits, she said, she will act as the client's roommate.

For the \$20 a month, her customers get the use of her name as a roommate, her telephone number and her address. In case of parental visits, the customers can pay more — at hotel room rates, Lisa said — for use of her spare bedroom to make it look as if they live there.

In addition, women who make advance arrangements to get calls from their folks can take them at Lisa's house at prearranged times, she said.

Lisa said she plans to meet with each of her clients for dinner, at the client's expense, to get acquainted and gather information to enable her to feign roommate status in any phone calls she receives from par-

She said she will keep index cards listing information about her clients near the telephone so she can express some knowledge of the daughters of people who call.

summer Olympic Games in Moscow.

# Olympics boycott: Midlanders voice varied reactions

By LANA CUNNINGHAM Staff Writer

Soviet troops' invasion of Afghanistan is eliciting loud repercussions in the United States. But the loudest cries are over President Carter's proposal to boycott the Moscow Olympics this summer - a move the president feels would be a weapon to express U.S. displeasure over the Russian move into Afghanistan.

Midlanders voiced mixed feelings last week over the possibility of the

U.S. not participating in the International Olympic Games. Some Midlanders - despite their love for sports - said they will support Carter in whatever he does. Others - including one who has a personal interest in the Games - recognizes this would be the only chance for many of the young people to participate. In four more years, these youths may be too old and past their prime for such strenuous com-

Gil Bartosh, director of athletics for Midland Independent School District, said he would be in favor of whatever route Carter chooses to

"It is a political thing as far as the Russians are concerned," Bartosh said of sending U.S. athletes to Moscow.

"No matter how you do it (the Games), politics is involved. Politics and athletics can't be separated," he added. K.M. Jastrow, a Midland oil operator, helped to raise \$10,000 from this

area four years ago to support the Olympic Games. Despite that, Jastrow said he will support Carter's decision. "If we're looking for peace, we need to look at all accessess," he said, continuing that if cutting the U.S. out of the Games will do it, "I'm all for

it. This country has got to come first." The president and his staff have more facts on the situation (in Afghanistan) than do the rest of the citizens, Jastrow acknowledged. "If this

would help us to get the hostages (in Iran) out and return us to peace, I can't see anything wrong with it (an Olympics boycott)," he added. The oilman said he doesn't agree with the head of the U.S. Olympic Committee who has said politics and the Games are two different

"We have a problem, and we have to solve it. It's not just politics," Jas-

Berns McKinney said he also would back the president's move to boycott the Olympics.

'If the government is against it, it wouldn't be good for me," he said.

"There's enough trouble in Iran and a lot of things involved here," than just sending athletes to a world meet, McKinney added. "I'd hate to send some of our kids over there (Moscow) without some protection," he noted.

But one Midland man has a personal interest in the Olympic Games this year. Frank Schatz's son, Gary, is in Austin training for the Olympics and hopes to qualify this year.

"I think we should participate in the Olympics this year," said the senior Schatz. "I would like to see the Olympics as a sports event kept separate from politics."

The athletes train for a number of years just to participate in the one Olympics, he explained. "It would be an extreme disappointment on the part of the athletes if we pull out."

If the president can get the Games moved to an alternate site, then Schatz would support the action. But, he pointed out, "you need support

of the Third World Nations or it (the Games) will fall flat." Schatz admitted his son has been discouraged by recent suggestions to boycott the Games.

"Everyone wants to support the president," he added, "but this (boycott) is the gesture of a paper lion.

Bill Malone, a referee with the Western Athletic Conference, also feels that pulling out of the Olympics will do more harm than good.

"I feel it would penalize many young people who would never get the opportunity again for the Olympics.

"The Olympics have been kept rather free of politics with the exception of the West Germany incident" when Israeli athletes were killed, Malone said. "But there is always a problem of safety with athletes no

matter where you hold it (the Games)."

Boycotting the Olympics won't have much effect on the Soviets, he claimed. "There comes a time when you need to get that big stick and then they will listen to you. Boycotting the Olympics is just verbal garbage; it's not a big stick."

opposition to any government-ordered boycott. The officials said they felt such a move would be "tantamount to the destruction of the Olym-

After the meeting Friday, Robert J. Kane, commmittee president, and F. Don Miller, the organization's executive director said Carter had not yet

made a decision. In his Jan.4 nationwide address announcing the partial grain embargo against the Soviets, however, Carter had threatened just such a boycott.

Sen. Frank Church, D-Idaho, and Clement J. Zablocki, D-Wis., chairmen of the Senate and House committees dealing with foreign relations, respectively, have both said they favor moving the Games from Mo-

## McCartney fans stand vigil at Tokyo police headquarters

TOKYO (AP) - Hundreds of young female fans screaming "We Want Paul!" in Japanese staked out a Tokyo police headquarters Saturday, hoping to catch a glimpse of former Beatle Paul McCartney, jailed for allegedly bringing a half-pound of marijuana into Japan.

It was unknown whether McCartney, spending his fourth night in jail in a cell covered with bamboo mats, could hear his loyal supporters. On Sunday, a Nippon Broadcasting Corp. spokesman said the govern-

ment-owned radio and television network would not broadcast any songs by McCartney's group Wings or any Beatles' tunes composed and arranged by McCartney "for the time being." The Mainichi Daily News reported major commercial broadcasting stations also had decided not to play McCartney songs.

The 37-year-old rock music star was arrested Wednesday shortly after arriving here for a concert tour, which has now been canceled

Customs inspectors at Tokyo's international airport said they found 7.7 ounces of marijuana in McCartney's luggage. He is said to have told them the drug was for his personal use.

It still remained unclear whether Japanese officials would bring formal charges against McCartney. Officials said if he is formally charged and found guilty, he could be sentenced to seven years in prison and fined up to \$2,000 for violatwng narcotics-control and customs laws

Peter Symes, agent for McCartney's rock group, Wings, said the Tokyo prosecutor's office did not question the ex-Beatle Saturday. Officials said it was also doubtful that a decision on his case would be made Sunday

Authorities ruled Friday that they will hold the musician for up to 10 days while the prosecutor's office decides whether to press charges on marijuana possession or drop the case.

#### Odessa DA plans re-election bid

ODESSA - District Attorney John Green announced Friday his candidacy for a fourth term as Odessa's district attorney

First appointed to the post in February 1969 by then Governor Preston Smith, Green stated, "I am proud of the record this office has built since I

became district attorney." The district attorney noted in a prepared statement a child abuse section has been created in his office and he "considers this work one of the

top priorities" in the office. He further noted there has been a 100 percent conviction rate of persons charged with child abuse. After his annoucement Friday, Green paid his \$600 filing fee to local Democratic Party chairman, Robert M. Watson.

#### New traffic lights to be installed

ODESSA - Installation of new traffic lights in Midland should be completed in three weeks, according to John Aldridge, resident engineer in charge of the work.

A shortage of materials created adelay in the project which should have been completed last May, said State Department of Highways and Public Transportation officials.

Location of the new signals in Midland are at A Street and Louisana Avenue, A and Illinois Avenue, Garfield Street and Golf Course Road. Main Street and Texas Avenue, State Highway 158 on Wall Avenue and A Street, SH 349 on Big Spring Street and Illinois Avenue, SH 349 on Big Spring Street and Texas Avenue, SH 349 on Big Spring Street and Missouri Avenue and SH 349 on Big Spring Street and Wadley Avenue.

# Task forces formulating goals for city

#### Input of Midland's citizens sought

design goals for this decade.

By LANA CUNNINGHAM Staff Writer

Wanted: Suggestions for improving Midland. Members of nine task forces have started hashing out ideas for the city's objectives for the 1980s. But a few select people don't want to decide on some ideas and make the rest of the community live with these

Instead, these committees are soliciting help from everyone in Midland. They are seeking suggestions of goals Midland can accomplish in the 1980s to improve the city and the lifestyle of its residents.

"Objectives for the Eighties" is a project initiated by the Midland Chamber of Commerce to give city leaders an idea of what the residents actually want

Task forces are concentrating on nine areas: local government, economy, education, housing, urban design, spiritual, cultural, recreation and entertainment, health and welfare. Charles Priddy is general chairman for the

respective areas. In March, 100 conferees will Davis, Wayne Merritt and Pat Baskin retreat to San Antonio where they will hammer out numerous ideas, shaping a final list to be presented

to Midlanders for their approval. one of the committees. Or, if they want to be a Tubb, Don Harvey, Joe Campbell and Jack Steele. conferee they may contact Guy McCrary, 682-5263 or 685-2000, or write to Objectives for Midland, P.O. Box 1890, Midland, 79702.

Task force members and chairmen are:

LOCAL GOVERNMENT: Ernest Angelo Jr., chairman; Arden Grover, O.B. Harris, Steve David-

Bill Hill, Don Kyser, Steve Scott, Phil Bustamante, son and Giffert Alstrin. Cleaburn Nix and Conrad Coleman.

## Editor's Report

(Continued from Page 1A)

master plan involving "student" terrorists around the world, financed largely by Libya and tied to Moscow, which uses detente as a cover for these destabilizing activities, which the Kremlin propaganda machine loudly attributes to fascists, rightwingers and U.S. agents.

The tie-in between the Iranian students and the network is evident. On July 16, 1978, a suspected West German terrorist, Kristena Berster, age 27, was arrested when she and three companions tried to cross the U.S.-Canadian border by a little-used road in Vermont. She was carrying a false Iranian passport and was believed to belong to the Baader-Meinhof gang. The passport was one of several stolen by radical franian students when ey occupied the Iranian consulate in Geneva in June 1976.

It is probable that the well-known Venezuelan terroritst "Carlos" was involved in the take-over of the American embassy in Tehran. Le Monde (Dec. 17) translated an interview he gave the Paris Arab-language newspaper Al-Watan al Arabi He described his role in terrorist activities, including the planning of an attack of the French embassy in The Hague on April 3, 1974, by the Japanese Red Army, and of the seisure of the OPEC ministers in Vienna on Dec. 21, 1976. He boasted that he could inflict a mortal blow to American imperialism by blowing up all the oil fields in the Persian Gulf. He said Marxism was the religion to which he had devoted all of his life.

Behind this terrorist network stands Moscow. The American embassy was seized on Sunday, Nov. 4. 1979. U.S. specialists such as Dr. John Clark of Harvard said the act had been long planned: it certainly was not accidental or spontaneous. On Tuesday, Nov. 6, at a meeting of the National Security Council, President Carter was informed that foreign intelligence had identifed some of the "students" as KGB agents. He decided not to make the information public, since he planned quiet diplomacy to

negotiate the release of the hostages. In all this, the Soviet Union was, as usual, playing a double game. Its long-range aim has always been to gain access to the Indian Ocean and deprive the West of Iranian oil. Following the communist tactic of accommodating itself to reality, it cooperated with the shah, who was never criticized in the Soviet press. The Soviets' deals with his regime are seldom mentioned and never attacked in the Iranian press.

As soon as the shah fell, the Moscow propaganda machine gleefully depicted his rotten regime as a U.S. tool and encouraged the students in the take-over of the embassy, using a radio station, "The Voice of Iran, at Baku close to the Iranian border. At the same time, it increased its already large embassy in Tehran, many of the more than 300 staff members thought to be KGB agents.

The embassy building is being expanded and remodeled into a 10-story building. The KGB had penetrated the Iranian armed forces; Deputy Chief Maj. Gen. Ahmad Mogharrabi spied for Moscow for 11 years before he was

Meanwhile, Soviet broadcasts con-

tinued to encourage the students. When both President Carter and Secretary Vance protested, Moscow went through the motions of asking the students to release the hostages, but then it resumed its old tactics. The Iranian students were satisfied that Moscow was backing them, and when they were told that the United States might ask the United Nations to impose sanctions, they scoffed that the Soviet delegate would veto them.

The radical network on our campuses and the Iranian students in this country were encouraged in the Nov. 26 Pravda to organize protests like those which hamstrung the U.S. war effort in Vietnam. Iran may fall into utter chaos; Khomeini would be thrown like a squeezed orange and the Tudeh Party, with Soviet support, would pick up the power lying in the

streets, as Lenin put it.

United States may be necessary, but let us hope against hope that the hostages are released and the whole episode peters out.

One thing is certain. If the United States fails to meet this challenge,

there will be only one superpower, and it will not be the United States.

See the article on this subject by our London correspondent, Si Freidin,

# Soviet attache makes hurried visit to sick mother in Moscow

By KAY TATEIWHI

TOKYO (AP) - A Soviet military believe Kubota may have to assume attache, named in what is being responsibility for the allegations and called the worst spy scandal here resign. Kubota was quoted as saying since World War II, hurriedly flew off to Moscow Saturday after the Soviet Embassy refused to submit him to questioning. The colonel had to visit

his sick mother, the embassy said. Embassy officials, who claimed diplomatic immunity in refusing to have Col. Yuri N. Kozlov appear before police, denied he was involved in any spy activity and accused the Japanese news media of engaging in 'wild' anti-Soviet propaganda, Japanese Foreign Ministry sources said.

Police on Friday announced the arrest of a retired major general of Japan's Self-Defense Force and two junior officers on suspicion of passing 'top secret" military information to Kozlov and Maj. Gen. Pyotr I. Rybalkin, who left Japan in November

Authorities initially said they thought retired Maj. Gen. Yukihisa Miyanaga passed information about the location of Japanese Self-Defense units and the deployment and equipment of Chinese troops, and also data collected about Soviet armed forces by Japanese and American forces. They said late Saturday night most of the information was intelligence about the military situation in China

The Soviet Embassy told Japanese officials Kozlov flew to Moscow Saturday because "his mother is in critical

condition.' Prime Minister Masayoshi Ohira winding up a visit to Australia and New Zealand, said the arrest of Miyanaga, 1st Lt. Eiichi Kashii and Warrant Officer Tsunetoshi Oshima was "shocking to both Japan and the United States.

Police investigators said they searched Miyanaga's Tokyo home and seized classified documents on the Self-Defense Force, a code book and communications equipment.

They said Miyanaga, 58, an intelligence officer before he retired in 1974, is alleged to have passed on material assembled by Kashii, 45, and Oshima, 49. Both men served under Miyanaga while he was in active service.

The Kyodo news service said the Japanese prime minister, in a telephone call with chief Cabinet Secretary Masayoshi Ito, ordered the government to take "strict measures" concerning the case

Ohira is scheduled back in Tokyo on Sunday night and is expected to meet Monday with Enji Kubota, a Cabinet

minister and director-general of the defense agency. Political observers he would evualate his decision as the investigation progresses.

Kozlov spent six years in Japan after being assigned here in 1971. He returned in 1978. He was described by Japanese officials as an amiable, intelligent officer, fluent in several lan-

guages, including Japanese. In a previous espionage case here involving the Soviet Union, the Tokyo correspondent of the Soviet news agency Novosti was arrested in May 1976 for allegedly trying to obtain U.S. military information.

Kyodo said the government was worried that the latest spy case might affect diplomatic relations with China and the United States because it could cause mistrust of Japan's defense posture and capability.

## Basin ranks with Houston in average salary for 1978

AUSTIN (AP) - The Texas Employment Commission said Thursday federal figures show the average yearly salary for workers in Houston is the highest in Texas and 17th highest in the nation.

The average salary for a Houston worker in 1978 was \$14,085, the commission said.

The average yearly salary for a Texas worker was \$11,911, which was \$233 below the national average. Texas ranked No. 20 among all the states.

Six areas in Texas, including Houston, had higher average annual earnings than the national average. The other five areas were Midland \$13,794, Beaumont-Port Arthur-Orange \$13,-794, Galveston-Texas City \$13,079, Odessa \$12,771 and Dallas-Fort Worth

Ten Texas areas were among the 30 areas ranked as the lowest paying in the nation - Abilene \$10,131, Waco \$10,126, Lubbock \$9,881, El Paso \$9,-812, San Angelo \$9,601, Killeen-Temple \$9,478, Bryan-College Station \$9,-096, Brownsville-Harlingen-San Benito \$8,807, Laredo \$8,488 and McAllen-Pharr-Edinburg \$8,280.

Other Texas cities and the annual salaries in 1978 included Corpus Christi \$11,610, Longview-Marshall \$11,423, Tyler \$11,166, Amarillo \$11,-034, Texarkana \$10,564, San Antonio \$10,519, Austin \$10,514, Sherman-Denison \$10,501 and Wichita Falls \$10,-

The figures were supplied by the U.S. Department of Labor, the com-

#### Chance for rain, cold temperatures could cloud Super Bowl weekend

Midlanders probably can be thankful there's Super Bowl 14 to watch on television today. It's going to be too cold to do anything outside. The cool moist weather that hit the

Tall City Saturday should turn to freezing rain tonight. The National Weather Service at Midland Regional Airport is predicting a 60 percent chance of rain.

Northeasterly winds should gust

to 25 mph today. However, Midlanders can take some comfort in knowing they won't be the only folks huddling around the television. Andrews, Lamesa, Stanton, Big Spring and Big Lake residents should be experiencing the same cold, wet weather.

High for today should be in the 40's. Saturday's high was 68 degrees, near the record high of 74 set in 1951. The low tonight should be in the 20's. Record low for a Jan. 20 is 13 degrees set in 1963.

year's total remains at .05 of an A cold front brought threats of

freezing rain and snow to the Texas Panhandle, and icy drizzle was reported in the Amarillo area Saturday.

A winter storm watch was issued for parts of the Panhandle, where temperatures dipped into the 30s Saturday afternoon. Temperatures elsewhere in the state were mostly in the 40s and 50s at 3 p.m., although South Texas, ahead of the front, had readings in the 70s.

## PBGC offering two business courses

The Permian Basin Graduate Center announces it will offer two-business related courses at its headquarters, 105 W. Illinois St. in Midland.

"Put It In Writing" is scheduled from 7 to 9: 30 p.m. Thursdays, beginning this week and continuing

Joyce Sherrod, a member of the PBGC faculty, will be the instructor. Fee for the course is \$75, including a manual.

The course is an in-depth study in business and engineering writing designed to to teach clarity,

Women in Business" is a one-session course which is scheduled from 9 a.m. to 5 p.m. Jan. 29.

The emphasis of the course is to assist women in achieving a more business-like and professional approach to their work. Topics will include working effectively with men and women, recognizing an improving impact on other, understanding and using organizational and personal power, and developing career plans for the 1980s.

Fee for the course is \$65. Marion Kimberly of Midland, an individual, group and career counselor, will be the instructor.

#### Alamo YMCA plans varied swimming classes

Alamo YMCA physical director Guy Fish has reminded Midlanders that "swimming is still one of the finest of all exercises."

"Swimming brings into play every important muscle group in the body," Fish said. The Alamo YMCA is offering a wide variety of swimming classes for pre-school age children, beginning tadpole, intermediate tadpole and advanced tadpole. Classes for youths include polliwogs (beginners), minnows (advanced beginners), fish and flying fish (intermediate and more advanced swim-

For ladies who haven't learned to swim, the Alamo YMCA is offering beginners, advanced beginners and intermediate swimming classes.

For Alamo YMCA members swimming at various times during the day, and evenings is encouraged to relieve stress and tension the year round in the indoor heated pool. Certified lifeguards are on duty at all times when the safety of those using the facility, Fish said.

For more information, contact the Alamo YMCA by telephoning 694-2528 or come by 901 N. Midland

ministrators are experi- tough on the students or lost power and began menting with another al- will let them get away drifting in wind-whipped ternative to disciplinary problems in the school system - on-campus suspension centers.

This not-so-new approach to discipline problems received favorable comment for a \$68,636 grant from the Texas Criminal Justice Permian Basin Regional Planning Commission at

its Jan. 9 meeting. Schools in Abilene. Odessa, Lubbock, Deer Park, Longview, Austin and other Texas cities already have instituted oncampus suspension programs.

The idea behind the program is to provide school principals with another alternative besides off campus suspension to handle students with disruptive behavior problems, according to Maridell Fryar, fine arts coordinator for MISD.

Mrs. Fryar was responsible for drafting and researching the proposal sent to PBRPC.

Students assigned to an on-campus suspension center will be able to continue their school work while trained teacher-counselors try to help change the student's behavior, Mrs. Fryar said.

The on-campus suspension centers here when the state approves the proposal for funds will be located in a classroom at the city's two high schools. Students from the three junior highs, two freshman high schools and two senior high schools can be assigned to the centers by the school's principal or assistant principal.

According to the proposal, some of the major disciplinary problems in the Midland school system where suspension was used as punishment are truancy, drug-related offenses and disruptive behavior in the classroom.

"To me it does not seem logical for the school system to spend its time picking up a student for truancy and then suspend him from school for his truancy," Mrs. Fryar said.

'There has to be a middle ground between corporal punishment and off-campus suspension where the school can Directors:

# Vet turns gun on self after killing wife, father

MUSTANG, Okla. (AP) - Seven- tempted to talk to his son, at which year-old Stephanie Moore was awakened by the sound of gunfire coming from her parents' room Saturday and 'went in and found her mother's body laying on the floor," police said.

Police Sgt. Mike Thompson said the child then called her maternal grandfather, Allen Legg, and said, "Daddy shot Mommy

When Legg arrived at his gran-daughter's suburban Oklahoma City house, he found the bodies of his daughter, Barbara Sue Moore, 32; her husband, Ernest Earl Moore, 32; and his son-in-law's father, Ernest L. Moore, 69, officers said.

Thompson said that before Legg arrived at the house, Ernest L. Moore "came in and took her (Stephanie) out into the den where they confronted by Earl Moore, who still had a .38-caliber gun ..

"The grandfather (Moore) at-

Sears

time he was shot once in the chest and killed instantly," Thompson said. "Earl then grabbed his daughter by the head and put the gun to her face," Thompson said. "Before he could fire she pulled away from him ...

Thompson said Moore then apparently fired shots at a stereo system in the den before turning the gun on himself. Although he suffered a massive wound in the right temple, officers said Ernest Earl Moore was ma since Dec. 15, when he left the United States after still alive when they arrived. They undergoing medical treatment. said he died before an ambulance could get him to a hospital.

Investigators found 10 spent car- Union to withdraw its troops from Afghanistan. tridges in the residence. Thompson said there apparently was no provocation for the shooting outbreak since the shots themselves awakened the girl and her grandfather, who was visiting his son and had been asleep

# Minister sees hostage release soon

By The Associated Press

One of four black American ministers in Tehran leader. seeking a "spiritual" solution to the embassy crisis predicted Saturday the American hostages would be released soon. But the embassy militants showed no softening of their stand, angrily lashing out at the "Big Satan" America for allegedly trying to sabotage Iran's presidential election.

Iranian Foreign Minister Sadegh Ghotbzadeh also sounded a tough note, telling an interviewer there is only one way to free the hostages.

"It's easy," he said. "They give us the shah .... We give them the hostages."

Iranians seemed to be putting the hostage-holding issue aside to concentrate on next Friday's presidential election, in which about 10 candidates are competing. Depending on who wins, the election could hold the key to whether the captives, held for 77 days at the U.S. Embassy in Tehran, are freed soon.

In another development, a military plot to oust Ayatollah Ruhollah Khomeini from power was reported uncovered in northwest Iran.

The American clergyman, the Rev. Gene Moore. has been in Tehran for the past week with three other ministers from Houston.

They were not allowed to meet with Khomeini Saturday in the ayatollah's headquarters city of Qom. But Moore, who is leaving for home Sunday, said they were "unofficially told" that those ministers staying on might be able to meet with Khomeini

Moore, reached by telephone at his Tehran hotel, told The Associated Press in New York that they wanted to present Khomeini with their ideas about the hostages' release, ideas they discussed in several meetings with the Moslem militants at the em-

A "spiritual rather than a political solution" is needed, Moore said, adding that the militants are

'not going to listen to our government at all." 'We are just trying to get them to see that while they're looking at justice, we're looking at mercy. A solution will have to be give and take on both sides

and strictly spiritual. "I think they might buy it ... I don't think the hostages are going to be held much longer," he

He said he based this prediction on "faith" and his talks with Iranian officials, whom he did not iden-

tify.

The embassy militants refused the ministers' requests to see the hostages, Moore said. He said he and the Rev. J.P. Paley would leave Iran Sunday, but the Revs. Bobby Mills and Don Lee Everett, and Michael Cooper, an attorney accom-

panying the group, would stay behind. Ghotbzadeh's latest statements came in an interview with the Paris daily newspaper Figaro. 'We want the shah and his wealth. The United

States wants their hostages. It's easy, they give us the shah, and that's good. We give them the hostages," Ghotbzadeh said. 'Unfortunately, it's up to the United States to

make the first move because it is evident that the day the hostages are gone from here, nobody be able to return the dictator to us. Shah Mohammad Reza Pahlavi has lived in Pana-

Ghotbzadeh also was quoted as saying Iran planned to do everything possible to force the Soviet

# A policeman who cares

By SUSAN TOTH Staff Writer

Midland school officials call a volunteer "a person who cares."

For Jose Lopez, a Midland policeman who donates his spare time and for his patience. belping youngsters in the Crockett Elementary about, and they enjoy School Headstart program, that definition certainly fits.

Lopez spends two to four hours a week at Crockett, much of that time sitting on the floor reading stories to adoring 4-year-olds who blosattention.

He also spends an hour filled in. each week as a reading partner for a sixth grader at the school.

In his spare time, Lopez attends Midland College and plans to graduate with an associate degree in law enforcement in May. Last 4.0, according to his proud wife.

A number of people are proud of Jose Lopez. Wilburn Buttery, prin-

the time and effort Lopez is willing to give.

The teachers he deals with also give Lopez high relate to the youngsters

"It's something I care it," he said, stopping to praise a youngster bringing him a crayon creation to admire.

He became a school volunteer last year as a substitute for his wife. She had to stop coming to the school when she besom under his individual came pregnant with have a lasting effect. their second child, so he

#### FARM-RANCH ROUNDUP

# Midlanders attend Texas FU convention

CORPUS CHRISTI — Five Midlanders participated in the recent 76th annual Texas Farmers Union convention in which U.S. Congressman George Miller lambasted the federal government's handling of reclamation water for family farmers.

The government's attempt to provide reclamation water for family farmers "has been perverted by special corporate interests who seek to line their own pockets with the taxpayers' money," the congressman

The populist congressman from California denounced a Senate-passed measure which virtually eliminates acreage and residency requirements in federally subsidized irrigation areas as "as device to achieve victory over the taxpayer, over the family farmer and over the spirit of the reclamation program."

Miller has countered the corporate-backed bill with his own legisation, House Bill 5783, which would raise acreage limitations now set under a 1902 statute at 160 to 640 acres.

Midlanders attending the convention as delegates were Vernon Chandler, Doris Blissard and his wife Addie, and Pete Bryant. Another Midlander, Carla Bryant, helped draft the union's 1980 farm policy.

#### Upton County stock show set

RANKIN - The annual Upton County 4-H Livestock Show, which will include a "pet show" and barbecue, will be held Saturday in the Rankin Independent School District's bus barn.

The show's events will include a pet show at 10 a.m.; livestock weigh-in at 11 a.m.; pig show at 2 p.m.; lamb show at 2:45 p.m.; barbecue at 6 p.m., and the auction at 7 p.m.

The show's superintendent will be Jack Garner of McCamey, and heading up the pens committee will be Jake Shipp. Al Leck and Tommy Wilkes will be in charge of weighing livestock. Tommy Workman, E.L. Martin and Joe Loftin will head up the sales. The barbecue is being sponsored by the Upton County 4-H Clubs.

#### Texas may climb in ag production

AUSTIN - Texas farmers and ranchers stand an excellent chance of boosting their national agricultural ranking for 1979 due to gains in cash receipts, which have out-stripped all other competing states, reports Texas Agriculture Commissioner Reagan V. Brown. Texas ranks third in agricultural output.

For the first nine months of 1979, Texas registered substantially greater improvements in farm cash receipts than either first-ranked California or second-ranked Iowa.

Cash receipts were up 18 percent in Texas, up 13 percent in Iowa and up 5 percent in California.

During 1979, Texas recorded excellent crops of cotton, wheat, grain sorghum, peanuts and pecan," Brown said. "When marketing of crops and livestock for the entire year are tabulated, it is likely we will overtake the No. 2 position.

Texas farm-and-ranch cash receipts totaled \$6.34 billion in the January-September period, Iowa's totaled \$6.68 billion, and California's, \$7.23 billion. Nationwide, farm cash receipts were up 14 percent to \$85.59

But during the year, farm-and-ranch production expenses rose an estimated 16 percent. Inflation hit hardest in fuel expenses, which were up by a 45-percent average.

#### Clements to be TFB speaker

WACO — Texas Gov. Bill Clements will be a speaker at the Texas Farm Bureau's 1980 Leadership Conference Monday, Tuesday and Wednesday at the Marriott Motor Hotel here, according to Carrol Chaloupka of Dalhart, president of the 250,000-member farm organization.

Other speakers will include Mark White, Texas attorney general; Warren Newberry, TFB executive director; Dr. John McKetta of the University of Texas' Department of Chemical Engineering, and T.B. Pickens Jr., president of Mesa Petroleum Co., Amarillo.

White will speak on "Agriculture and the Law," and Dr. McKetta will speak on the energy crisis and future availablity of fuel. Pickens will discuss energy. And the governor is expected to outline issues to be considered in the special session of the Texas Legislature.

# Airline duplicates crack blamed in Chicago crash

Airlines officials at the company's maintenance and engineering center here say they have been able to dupli-cate a crack blamed for a DC-10 crash in Chicago that killed 273 persons.

The plane crashed on takeoff near O'Hare International Airport on May 25, 1979, after a wing engine fell off.

W.P. Hannan, chief of engineering for American's Maintenance and Engineering Center, said Saturday technicians have finally been able to duplicate a 10-inch crack in an engine pylon bulkhead and that may shed more light on why the DC-10's engine

Previously no one had been able to duplicate the fracture, which the National Transportation Safety Board listed as the probable cause of the

Other DC-10s owned by American and other carriers had been flown safely with cracks in the same position, but they were only six inches long. In the tests at the center, crews had to determine what caused the crack to reach a critical 10 inches.

Art Jackson, director of operations and public relations for American in Dallas, said Saturday the report y was submitted to the NTSB in October or November He said testing is continuing and additional reports might be made "if it contributed to the knowledge" about the crack in the

Jackson said the report did not eliminate the possibility that American's maintenance procedures could have caused the pylon crack.

## 'Very dangerous' quartet flee jail

AUSTIN, Texas (AP) - A statewide alert was posted Saturday for four potentially dangerous Travis County jail escapees who fled through an air conditioning duct, according to Sheriff Raymond

All four men have previous convictions and are considered dangerous, Frank said. The prisoners were awaiting trial. One of the escapees recently had done mainte-

nance work on the air conditioning system through which the men escaped, according to the sheriff. They also used a hacksaw to cut through an iron

The escapees were identified as Donald Sellers, 24, of Austin; Gary Shannon, 31, of San Saba; Bobby Joe Turner, 31, of Austin; and Antonio Gutierrez, 25, of Austin.

Frank said the four fled at about 5:30 a.m. Satur-

Law enforcement officials consider Shannon a "very, very dangerous person," according to the

#### Martin County Hospital proposal to be reviewed

Action on a certificate of need for Martin County Hospital will be submitted for review in Monday's 7:30 p.m. meeting of the Permian Basin Health Systems Agency at the Permian Basin Regional Planning Commission offices, Midland Regional

The hospital wants to convert four acute care beds into three intensive care beds at a cost of \$10,000.

No change will be made in the licensed capacity of the hospital.

In another action, the agency will hear a request from the Permian Basin Community Centers for Mental Health-Mental Retardation for \$75,000 from the Texas Department of Community Affairs-Drug Abuse division to develop a theraputic camping program for 13 to 17 year-old drug abuse offenders.

## DR. NEIL SOLOMON Stroke victims need treatment, therapy

Dear Dr. Solomon: My father recently had a stroke and is now undergoing rehabilitation therapy. What is involved in such treatment, and how successful is it likely to be? - Ann.

Dear Ann: A stroke patient who receives adequate rehabilitation therapy at an early stage will be able to get around on his own and handle his daily living activities in from 60 to 90 percent of all cases. From 10 to 25 percent additional patients will be able to get around and perform Stanley Cohen, chief of these activities with some assistance. Between 45 and 50 percent are able to return to com- more, there is sometimes petitive employment or resume homemaking activities, and another 10 to in a sheltered work situa-

The earlier the program of rehabilitation begins, the better the chances of recovery. When rehabilitation measures are delayed, a stroke patient may become so psychologically depressed and emotionally dependent that he will not be able to re-spond to subsequent efforts. Of course the patient's age and the severity of the stroke also determine the extent to which he can be helped.

Ideally, planning for the future should begin while the patient is still receiving medical treatment for the effects of the stroke. Skilled nursing care during this period is crucial. For example, care in positioning the patient can prevent deformities and thus facilitate rehabilitation efforts. The specific treatment plan and goals must be individualized, and may involve not only the usual members of the team - physician, nurse and physical and occu-

a social worker, psychol- is necessary. ogist, speech pathologist and vocational specialist, as well, depending on the patient's needs.

The patient's psychological response to the stroke requires evaluation throughout the course of rehabilitation therapy. Some at first deny the seriousness of their condition; others become depressed, almost as if a death had occurred.

According to Dr. R. the department of rehabilitation medicine at Sinai Hospital in Baltia denial of the neurological effects of a stroke. A patient may even fail makeup on, or dress the involved side. Most eventually become reconciled

pational therapists - but deal with the depression

Restoration of the ability to handle daily living activities is the first goal. These include toileting, bathing, dressing and grooming, and the ability to feed oneself. Where the person is physically handicapped in carrying out these day-to-day activities, he may either be taught to perform them with one hand or equipped with a device to help him. In terms of returning to work, much depends on the person's educational background, vocational experience and the position he held at the time he became disabled.

Since the ultimate re-15 percent can function to bathe, shave, use turn of functions is related to the promptness with which therepy is begun, the fact that your to the disability and par- father apparently is getticipate actively in the ting this attention means rehabilitation program. that his chances of In extreme cases, pro- achieving substantial refessional intervention to covery are good.

563-3060 or 333-4472

Fifteen years ago, Midlander Barbara Randolph was considered unique, and even today she gets a

few double takes. "I have my name written on the front of my motorcycle, and that is the only way you can tell I'm a female. People are delighted when I pull off my helmet to see I have hair," she said.

An employee at a local bank, Mrs. Randolph gets a few double takes at other times, too.

She's a diabetic. She carries the insulin with her on motorcycle trips, and stops to take her shots by the side of the road, if necessary. "The shelf life (of insulin) is the only problem. I

#### Midlander in Profile

have been in the desert a few times that I think it did go bad," she said.

'I learned to ride a bike because my husband rode and I had a little boy. It was ride the bike or stay home," she said.

'My husband taught me to ride, and I hated him and the motorcycle for a long time. He was hard on me, trying to make up for mistakes I might make, and it was very rough.

Now Mrs. Randolph rides her motorcycle whenever they go on vacation.

'I'don't think I've ever been on vacation in a car,'

Usually she and her husband plan their vacations to coincide with annual motorcycle rallies.

'Rallies have something for everybody. Sometimes they combine the age of the bike and the age of the rider to award a trophy. They have trophies for the oldest bike, the oldest person and the person that's come the farthest.

"I got one in New Mexico last year for the female riding the longest distance. I happened to be the only female there. I fell down going about two miles an hour, but I didn't hurt the trophy. Then I brought it up here to the bank; it fell off the shelf and demolished the thing," she laughed.

'When I first started riding it was a different thing for a woman to ride. And I rode a big bike, which was kind of unusual.

Rallies have been held in such states as California. South Carolina, Mississippi, Wisconsin, Vermont and "Of course, we know people from all over the

United States now, and it's old home week," Mrs. Randolph said. Rallies include field mects, dealer shows, rides,

safety programs and women's meetings, according to Mrs. Randolph. "You haven't seen the country until you've traveled like that (on a motorcycle)," she said of the

family vacations. 'We have been into the interior of Mexico for the past 12 years. If you pull up to a restaurant in your car, they won't give you the time of day. But if you pull up on your bike, they want to know how fast it

will go and how much it cost," she said. The Randolphs son, now 21, also rides a motorcycle, although his interest has been affected by his parents' love for the machines.

"He's not as interested as most kids because he had been around them all his life. He thought there had to be a better way," she said.

'You've got to be tough to handle cycling because it's either raining or the sand's blowing. You've got to be enthusiastic.'

C. 'Peck' Noland

ABILENE - C. Stewart "Peck" Noland, 75, of Abilene and formerly of

will be in Cedar Hill Cemetery. Noland was born Aug. 29, 1904, in Kansas. He was graduated from Abilene High School in 1922 and received his degree in geology in 1928 from the University of Oklahoma. He was married March 9, 1927, to Mary Parks in Tulsa, Okla. The couple lived in Tulsa until 1937 when they moved to Midland where he was employed by Skelly Oil Company. They moved to Abilene in 1946.

Noland was a member of a number of geological organizations including the Geological Society of West Texas and the American Association of Petroleum Geologists. He was a past president of the Abilene Geological Society.

He was instrumental in finding the Escota oil field in 1946, the Old Glory field in 1950 and the Flowers field in 1951. At the time of his death he was an independent geologist.

Survivors include his wife; a son, Donn S. Noland of Abilene; a sister and five brothers, and three grandchildren, Sharon Noland and Marc Noland, both of Midland, and Matthew Noland of Abilene.

#### James Thompson

GRAHAM - Services for James Clinton Thompson, 73, of Graham, father of Mary Jo Boyd of Midland, will be at 2 p.m. today in the Morrison Funeral Home. Burial will be in Graham Cemetery.

He died Thursday at his home. Thompson was born in Caddo and had lived in Graham since 1929. He was a retired oil field worker. He was married Dec. 18, 1929, to Mary Lou Zena in Breckinridge.

Other survivors include his wife, four daughters, a son, 18 grandchildren and six great-grandchildren.

#### Roy J. Wallace

LUBBOCK — Services for Roy J. Wallace, 77, of Lubbock, brother of Annie May Corona of Midland, were Saturday in Faith Baptist Church with the Rev. Royce McGowen, pastor, officiating, assisted by the Rev. Russell Moore, pastor of the Skyline Baptist Church. Burial was in Resth-

aven Memorial Park directed by Resthaven Funeral Home. He died Thursday in a Lubbock hospital after a lengthy illness.

Wallace moved to Lubbock in 1960 from Odessa. He was a retired farmer and a member of Faith Baptist

Church Born in Munday, he was married Jan. 16, 1937, to Cleo Marie Wright in Seymour.

Other survivors include his wife, five sons, six daughters, six brothers, a sister, 40 grandchildren and 17 great-grandchildren.

#### Mary Ann Probst

SAN ANGELO - Services for Mary Ann Barrett Probst, 61, of San Angelo, sister of Bill Barrett of Midland and mother of B. Jack Probst of Ozona, will be at 11 a.m. Monday in Robert Massie Riverside Chapel with burial in Lawnhaven Memorial Gardens. Bill Morrison, minister of Ozona Church of Christ, will officiate.

She died Friday in a San Angelo hospital.

Mrs. Probst was born May 20, 1918, in Sherman. She was a resident of San Angelo for 45 years.

Other survivors include her husband, a daughter, two brothers, a sister and three grandchildren.

#### Adam W. Jones

BROWNWOOD - Services for Adam W. Jones, 91, of Blanket, father of William R. Jones of Midland, will be at 2:30 p.m. today in the First Baptist Church in Blanket. Burial will be in Blanket Cemetery directed by Davis-Morris Funeral Home.

He died Thursday in a Brownwood hospital. Jones was born Feb. 11, 1888, in Russell County, Kan. He was a retired

steamfitter. He was a Presbyterian. He was married to Agnes Jordan. Other survivors include his wife, two sons, three daughters, 18 grand-

children and 18 great-grandchildren.

#### Dominic Onofre

### Students invited to capital

Four Midland high school students have been invited to attend the Presidential Classroom in Washington, D.C. during January and February.

Scott Eleanor of 2011 Country Club Dr., Edward Coffield of 2813 W. Denand Annemathe B. Rubner of 2011 Country Club Drive, all students at

Midland High School, will attend week-long sessions that focus on the formation of national policy.

Over 400 high school students from other states will be involved in various seminars designed to foster leadership potential and civic responsibil ity by exposing them to the dynamics

# Shoppers turn tables on economic forecasts

WASHINGTON (AP) - By spendthan at any time in 30 years, U.S. shoppers turned the tables on economists who forecast that 1979 would be marked by a recession and declining living standards.

"It's a nice, simple story," says econtmist Arthur Okun. "All you have to do is explain the consumer and you

explain everything else. Okun agreed with other government and private economists who have said that strong consumer spending kept the economy out of a recession last year, in defiance of most government and private fore-

casts, including his own President Carter had s\$id a year ago that the unemployment rate of 5.8 percent at that time was too low because it added to inflationary pressures. Nevertheless, despite government actions to slow the economy, unemployment 12 months later remained at 5.8 percent of the work-

Paul A. Volck3r, chairman of the independent Federal Reserve Board, said in October that people faced a reduction in their standard of living as the price for controlling inflation. But tham hasn't happened yet, either.

The failure of the economy to slow as expected has led some economists to joke that "the administration can't even start a recession when it wants

Under the government's definition, ing a greater share of their income a recession occurs whenever the nation's economy shows no growth for two consecutive quarters.

The Commerce Department reported Friday that the nation's gross national pro-uct increased 2.3 percent in 1979 and grew at an annual rate of 1.4 percent in the fourth quarter.

That wasn't exactly an economic boom, but it was definitely better than a recession. The GNP grew by 4.4 percent in 1978.

When asked to explain why administration forecasts for a recession were wrong, Courtenay Slater, chief Commerce Department economist, said, "We had not anoicipated the strength of consumer spending.'

The increased spending came at the

expense of savings, hhowever. Only \$4.30 out of every \$100 in earnings went into savings last year, the smallest amount in 30 years, government figures show. The savings rate in the final quarter of the year was 3.3

"If anybody had said in July there would be a 3 percent savings rate in the fourth quarter, he would have be5p a candidate for a mental institution," Okun said in an interview late last week.

Now a senior economist at the Brookings Institution here, Okun was chairman of the Council of Economic Advisers under President Lyndon B.

#### AREA REPORT

## Big Lake airport to get beacon

#### Austin Bureau

AUSTIN — The Texas Aeronautics Commission has granted the Reagan County Airport at Big Lake \$4,581 to install a non-directional radio

beacon at the airport.

TAC awarded the grant to the Reagan County facility after cancelling the same funds for Sulphur Springs.

Gerald Turner, TAC's chief airport engineer, said Sulphur Springs, which also received a federal construction grant, had enough funds left over to pay for its beacon.

#### Census manager picked

LUBBOCK — S. Mitzi Jordan has been named manager of the temporary 1980 census district office in Lubbock.

The office will be responsible for counting persons, and housing units in 30 West Texas counties, including Andrews, Dawson, Ector, Howard, Martin and Midland.

The 1980 census will be taken primarily by the mail-out, mail-back method.

#### Conservationists cite Allbright

ANDREWS - Joe Allbright has been named Andrews County's 1979 Outstanding Conservationist by the Andrews Soil and Water Conservation District.

Programs which Allbright has implemented include root-plowing of mesquite to increase grass production; the seeding of permanent grasses over 390 acres; allowing pastures to rest from grazing; building of a cross fence to close off portions of the land; rotating of croplands, and the proper application of native grass to increase range resources.

#### Clements will tour Tech

LUBBOCK - Texas Gov. Bill Clements and his wife, Rita, will tour the Texas Tech Universi-

ty campus Monday.

The agenda includes tours of the Textile Research Center, the Petroleum Engineering Building and the Ranching Heritage Center.

On hand for the governor's tour will be Robert L. Pfluger, chairman of Tech's board of regents; newly-appointed Tech President Lauro F. Cavazos and interim president, Dr. Lawrence Graves, who will present an over-view of the university's operation.

The governor also will hear reports from Dr. Charles S. Hardwick, vice president for academic affairs; Dr. J. Knox Jones Jr., vice president for research and garduate studies, and Tech Vice President Richard A. Lockwood.

#### Lamesa junking math system

LAMESA - A four-phase teaching system in mathematics and English at Lamesa Middle School has been abolished due to the social "elitism" it spawned and will be replaced by a less effective two-phase system.

The Lamesa school board scratched the program upon the recommendation of Principal

Though "efficient," the four-phase system, which places students in classes according to grades, test scores and the teachers' recommendations, has social drawbacks, McGraw said.

The students in phase four "don't get a chance to associate with other kids" and a "social drift" develops and spawns an elitism, he said. "Phasing is an efficient way to teach, but

would rather do away with some of the social effects it brings," McGraw said. The division of students is "not a socially healthy attitude..., McGraw said.

#### Donnie Kennedy won't run

STANTON - Donnie Kennedy, Martin County tax assessor-collector, will not seek re-election to the post she has held since 1977. She was elected in 1976, when the tax office was separated from the sheriff's department.

The two incumbent commissioners, Ronnie Deatherage of Precinct 3 and Troy Bradshaw of Precinct 1, are seeking re-election.

Harold Henley, an oil company consultant, is running for the sheriff's post, currently held by Dan Saunders.

> Do you have post-Christmas blues? Let us give you some New Year Cheer, by offering our oils and acrulics, canvas, art supplies and frames at 40% OFF - start your New Year right! (We have photographic art prints too). Offer good until February 2, 1980

# Reagan trying to regain lost ground in lowa

DES MOINES, Iowa (AP) - Ronald Reagan, whose status 30 minutes of television time to broadcast the Des Moines in the positions of Carter and Kennedy as is reflected in as presidential front-funner in Iowa was shaken after his speech across the state. refusal to join in a candidate debate, campaigned across the Reagan repeated his opposition to Carter's grain embargo the heartland.

The former California governor was one of several Republivoters take the first step toward choosing delegates to the strength. Republican and Democratic National conventions next sum-

the leaders of two major unions.

Republican campaigners, who included John B. Connally, Sens. Howard H. Baker Jr. and Bob Dole, and George Bush, who has remained in Washington since the takeover of the U.S. concentrated their fire on President Carter's conduct of Embassy in Teheran, defended the partial embargo, but ran foreign policy even while party chairman Bill Brock was into a demonstration in Mason City by farmers who carried saying in Washington that he believes inflation and energy will signs reading "Embargo Carter." be the major issues for GOP candidates in November.

Reagan campaigned in Mason City and Ft. Dodge before ing in Iowa on Friday. flying to Des Moines to address a rally. His campaign bought The Iowa Democratic race has seen the same dramatic shift campaign appearances in Iowa over the weekend.

state Saturday telling audiences "how good it is to be back in decision. "It hasn't worked hardship on the Soviet Union,"

said the GOP candidate. He also said the administration's foreign and defense can candidates campaigning in Iowa, two days before Iowa policies have led to loss of "American honor, prestige and

In the Democratic race, Sen. Edward M. Kennedy also has

maintained a steady attack on the decision to halt most grain The top Democratic contenders, meanwhile, got help from shipments to the Soviet Union in retaliation for its military move into Afghanistan.

Vice President Walter F. Mondale, stumping for Carter,

national public opinion surveys.

Once the underdog, Carter now leads Kennedy by a wide margin in Iowa opinion surveys. Among Republicans, Reagan

still leads, but by a far smaller margin than a month ago. And no one is certain whether polls are accurate indicators of how the caucus voting will go, because only a small percentage of voters attend the precinct meetings.

On Saturday, Carter picked up the endorsement of the 420,000-member Operating Engineers union.

J. C. Turner, president of the union, called Carter "a consistent champion of America's working people.

A major Kennedy ally in Iowa is the United Auto Workers union with 47,000 members in the state. The UAW was a key factor in Carter's 1976 victory in the Iowa caucuses, but this Kennedy and Mondale wound up their personal campaign- year local and national UAW leaders are backing Kennedy.

Douglas Fraser, national president of the UAW, scheduled

# Iranian 'students' recruited by pro-Soviet PLO

By SEYMOUR FREIDIN London Bureau

LONDON - Veteran terrorists of the top pro-Soviet wing of the PLO organized and recruited self-styled 'students' to seize the U.S. Embassy in Tehran and hold hostages the last two months.

The invasion of the U.S. diplomatic mission in Iran was under the direct instruction and programming of Dr. George Habash, long a communist' and chief trouble-shooter for the U.S.S.R. in the upside-down political arena of Middle East turmoil.

His deadly game plan was disclosed by highly qualified sources who are mystified that only now the adminis-

tration in Washington chose to reveal the captors as marxist terrorists.

They insist that regular reports have poured into Washington following the embassy seizure. Additional data has since been transmitted pinpointing identities and connections.

Habash, according to the sources, laid down his broad program first in his PLO headquarters in Lebanon, then he shuttled back and forth to Tehran for study session.

It began late last summer, when Habash selected his original team of eight to 10 terrorists - survivors of raids into Israel - and flew with them to Tehran to brief willing and eager members of Ayatollah Khomeini's Revolutionary Council.

Khomeini's pro-Soviet council delegates agreed to help Habash and his squad with qualified and trusted activists. They also went over his plan and approved it. Whether Khomeini himself was sounded out still remains unknown by knowledgable sources. But he saw Habash several times and separately had long discussions with

the Soviet ambassador. In between his regular shuttle runs to Tehran, Habash went at least twice directly to Moscow. On another occasion he flew Aeroflot from Moscow to Tehran with several aides.

Estimates of the captors holding the embassy and 50 American hostages runs to about 400. The majority are gun guards but the hard core activists

are said to total 125-150.

Besides the PLO veterans, drawn from the Popular Front for the Liberation of Palestine or PFLP run by Habash, they are mainly young and dedicated supporters of the Tudeh Party, backing Khomeini.

The Tudeh had long been the underground Iranian communist party whose leader has been in Moscow for years. It hailed Khomeini's rule which first was - and is - endorsed by the U.S.S.R.

To try and show solidarity, a sprinkling of dedicated Latin American and African terrorists trained by the PLO in Lebanon assist with logis-

tics for captors in our embassy. The sudden and swift strike by Soviet invaders into Afghanistan seems to have taken Habash and his disciples by surprise, but they recovered to send reinforcements from the American embassy to repel demonstrators at the Russian mission.

Habash, who years ago gave up medical healing for murder, did a personal inspection tour recently in our embassy. He also got an up-todate account of activities by the cap-

Habash arranged for what was billed as the world's first liberation conference. It is believed to have ended Thursday and brought together representatives of world-wide terrorism selected by the PLO

Yassir Arafat, nominal head of the umbrella PLO covering around eight offshoots, is expected to visit Tehran shortly to present his own special cause and challange Habash.

This is strictly and intramural quarrel within the PLO. Habash has persistenly been cutting down Arafat's role. They have both consulted Khomeini — Habash most often.

And it has been Habash, the diehard pro-Moscow communist, who has been allowed the longest leash by the U.S.S.R., to wheel and deal with the fate of the American hos-

## Tom Snyder has own special "I've got my version of York last summer when show like 'Prime Time

**Associated Press Writer** NEW YORK (AP) -After struggling for more than half a year. with little success, to build an audience for NBC's "Prime Time Saturday," you might expect to find Tom Snyder a discouraged man.

"It's frustrating." Snyder concedes. "We'd like more people to watch. In the ratings, you'd have to say it's been a failure.

"But I attach that to the fact we've been on the air such a short time, and it is difficult to establish an audience, especially against the appeal of the blockbuster programming we've had to compete with.

'The thing that discourages me is reading every week about 'Prime Time Saturday' losing to '60 Minutes' and '20-20' on ABC. We're not competing with them.'

Already one of NBC's busiest people, Snyder school films tries a "blockbuster" of his own Monday evening, "The Tom Snyder Special," at 10 p.m. EST.

with Snyder as host. The initial hour-long show includes interviews with Clint Eastwood, Bo Derek, Barry Manilow and Gary Coleman.

The face-to-face interview is Snyder's speciality, a technique he practices four nights a week as host of NBC's early morning "Tomorrow"

#### MC's late registration pace fast

Late registration for Midland College's spring semester is running at a fast pace ahead of last year's schedule, according to Registrar Dee Windsor.

By Friday, the student count was at 2,122. This is 133 students ahead of last year's registration at this time. Final registration total for 1979 was 2,164.

Late registration closes Monday for students wishing to take as many as five classes. Jan. 29 is the final day for those wanting three or fewercourses.

Students can register in the Office of Student Services in the Administration Building between 8 a.m. and 6 p.m. Monday through Thursday or 8 a.m. and 5 p.m. Jan. 25, 28 and 29.

DIRT, SQUIRT, QUIRT

# Moisture, warm weather bring weed problems

By CHARLES W. GREEN
Midland County Extension Agent — Agriculture

A routine view of agricultural activity was experienced in the Midland area. A little cotton is still being stripped, and gins are still processing field-stored and trailer backlog cotton. Most livestock producers are supplemental feeding range animals, and the mild weather has been favorable in reducing stress to livestock. Land preparation activity continues on

THE RAIN AND SNOW in December and the unusually mild weather in January are bringing on weeds in dormant turfgrass such as bermuda and St. Augustine. The weeds are cool season broadleaved and grassy species. Pre-emergence chemicals such as Balan, Dacthal and others applied in the early fall would have prevented some of these week problems, but it is too late to consider these materials for cool season weeks. Pre-emergents should be applied right now for control of warm season weeds. Postemergence herbicides may have some value for control of cool season weeds in dormant turfgrass as

Bermuda grass lawns: Cacadylic acid (Phytax 560, Ortho Center Weed and Grass Killer). Apply only to dormant bermuda grass. Temperature must be above 50 degrees at time of treatment for effective weed control. Endothall Turf Herbicide. Apply to dormant turf for winter weeds such as henbit, little barley and rescue grass. 2,4-D, Mecoprop (MCPP) or mixtures for chickweed, henbit, dandelion and other winter broadleaved weeds.

St. Augustine lawns: Endothall. Apply to dormant turf for winter weeds such as henbit, little barley and rescue grass. Mecoprop plus Chlorfluorenal (Maintain). Ortho Weed-B-Gon for southern grasses). Bromexynit (Buctril; Nu-Lawn Weeder). All these materials are suggested for winter annual broadleaved weeks such as henbit, dandelion and others.

WHILE MOST TAXPAYERS have until April 15 to file their 1979 income tax returns, farmers and ranchers face an earlier filing date — March 3. The March 3 date stands for agrucultural producers who didn't file an estimate of their income taxes and pay them by Jan. 15. Those who did file an estimate have until the April 15 deadline to file final returns.

For Texas farmers and ranchers preparing their 1979 returns, Dr. Ashley Lovell of Bryan, area economist with the Texas Agricultural Extension Service, Texas A&M University System, offers several considerations.

Filing requirements for 1979 are changed from 1978. For example, an individual must file a return if his gross income is \$3,300 or more, and a married couple under 65 years of age must file if their joint gross income is more than \$5,400. If both are 65 or older, they may make \$6,400 before having to file a

For some businessmen, a more urgent deadline is Jan. 31, the due date for Form 943 and Form W-2. Form 943 "Employer's Annual Tax Return for Agricultural Employees," must be filed if you withhold income tax under voluntary withholding agreements on farm labor wages during 1979. Form W-2, "Wage and Tax Statement," must be provided to each employee to whom you paid wages subject to social security taxes or from whose wages federal income tax was voluntarily withheld. Employees should receive W-2's by Jan. 31.

For other changes and reporting requirements regarding 1979 income tax returns, Lovell suggests a copy of the Internal Revenue Service Publication No. "Your Federal Income Tax" (1980 edition). Farmers and ranchers will want to get a copy of IRS Publication No. 225, "Farmer's Tax Guide (Revised October 1979), which are available at the County Extension Office.

CHALLENGES FACING county government in the 1980s will be the theme of the 22nd annual County Judges and Commissioners Conference at the Ramada Inn in College Station Feb. 5-7. Such key issues as energy and transportation will be discussed, and Gov. Bill Clements will deliver the keynote address. The conference is conducted annually by the Extension Service in cooperation with the County Judges

#### NOTICE OF AVAILABILITY OF EDUCATIONAL FUNDS

ELIGIBILITY - Those eligible to apply are descendants and spouses of persons who were employed for a minimum of one year by either the late Mr. Sid W. Richardson or by an organization in which he had a substantial business interest during his lifetime, or who subsequent to his death have been employed for a minimum of one year in a business enterprise which is a continuation of a business in which he had a substantial interest.

Limited funds are available to assist in defraying cost of college education and of vocational training. These scholarships are awarded on a competitive basis according to academic achievement and fi nancial need. Eligible persons applying for aid for the academic year beginning in the summer of 1980 must file application forms prior to March 31, 1980.

Direct inquiries to Sid Richardson Memoria Fund: 2103 Fort Worth National Bank Building: Fort Worth, Texas 76102 and include informatio establishing basis for eligibility.

Conditioning, Heating and Refrigeration is being offered by LINDSEY-COOPER REFRIG-Based on a projected ERATION SCHOOL, INC. in Irving, Texas. This intensive course is designed to teach strictly SERVICE, not engineering, to persons who are interested in getting into the service business. The 108-hour course, certified by TEXAS EDUCATION AGENCY, is the same course that has proven so popular and beneficial for residents in the Dallas/Fort Worth Metroplex, all areas of Texas, at least 25 states and several foreign countries for the past DECADE. The classes feature both CLASS-ROOM and LABORATORY TRAINING, and are limited to the first twelve persons enrolled

to 1880, Lum Medlin, a hunter who was traveling alone, made what was later to become Midland his home. Local history tells us that Lum was one of the first white men to settle in the area. Early in 1880, R. N. Garrett arrived here with a herd of sheep destined for market. Like so many of those who followed, Garrett took an immediate liking to the surroundings and made it his home. Soon, thereafter, his California family joined him.

MIDLAND IS NOW 95 YEARS OLD. A few years prior

In those early days the railroad people dropped off a box car to serve the growing community as a depot, post office and general store. On February 2, 1885 Midland County was established; 26 days later the City of Midland became a reality.

The old, middle-aged and young enterprises of Midland have contributed immeasurably to the progress, pride and prosperity of our city. You will be interested in reading this list of leading firms and organizations whose names have been arranged by the number of years they have served Midlanders and other West Texas residents.

#### Truly Unique Design

Houses for Sale 80

Wall-to-wall carpeting, new dishwasher, range/oven, garbage disposal, washers and dryers, plus a fireplace.

#### Extraordinary Value

With home prices spiraling Idlewilde Village is a great value, affordably priced, within the budget of most homebuyers. If your income was less than \$30,000.00 in 1978 or 1979, you may be able to buy under a unique mortgaging program.

Featuring

. 95% financing . Approximately 91/8% interest 30 year loan

Apartment dwellers paying as little as \$225.00 per month may be surprised to learn that they may be wasting over \$600.00 per month by renting, instead of buying.

#### Don't Delay

Stop by our office at 4501 W. Wadley for a free computerized personal budget analysis, or write P.O. Box 5185, Midland, Texas 79701

Duplex ownership gives many people the opportunity to buy their first home, with the tenant helping pay the mortgage

...But Hurry, these homes will not be available for long!

# It's Rams-Steelers today

By HAL BOCK
PASADENA, Calif. (AP) — The Super Bowl, climax of the professional football season and one of America's top sporting events, crowns the National Football League's 1979-80 champion Sunday when the Los Angeles Rams, champions of the National Conference, challenge the Pittsburgh Steelers, kingpins of the American Conference.

Super Bowl XIV will pack the Rose Bowl, perhaps the most famous football stadium in the country, for the confrontation

which has been termed a mismatch by almost everybody except the teams involved.

Steelers, shooting for their second straight title and seeking to become the first four-time Super Bowl winners, are rated 11-point favorites over the Rams, who are playing in the big game

Los Angeles struggled to a 9-7 regular season record, winning a record seventh straight NFC West title despite an inordinate number of injuries which often decimated the team. Then in the playoffs, the Rams eliminated Dallas' perennial NFC champs and beat Cinderella Tampa Bay to qualify for the Super Bowl.

PITTSBURGH, Super Bowl champions in 1975, 1976 and 1979, won the AFC Central title with a 12-4 season and then eliminated Miami and Houston in the playoffs.

Both clubs sneer at the 11-point betting line for this game. 'Lines are something you stand in, or try to avoid standing in," said Chuck Noll, coach of the Steelers. "I can tell you about offensive lines or defensive lines. Betting lines? That's strictly for suckers

Coach Ray Malavasi, who was under fire through much of the season when the Rams were losing with alarming regularity, agreed with Noll.

I've never gone into a game I didn't think I could win," he said. "This team has waited a long time to get to the Super Bowl and to get there and not win is a lot like not getting

Ironically, there are many factors that could play into the

hands of the underdog Rams Sunday. They are, essentially, the home team - the first time in history a Super Bowl club has had thatadvantage. They worked all week at their regular practice facility and the players were permitted to live at home instead of moving into a hotel. All four Pittsburgh losses this season have come on the road.

THE GAME will be played on grass, a surface much more familiar to the Rams than the Steelers. Los Angeles played all of its home games and five of 10 road contests on natural turf this season. Pittsburgh played on grass just twice, beating Cleveland 51-35 and losing to San Diego 35-7.

Then there is the matter of the Rams' uncanny domination of the Steelers. Since moving to Los Angeles in 1946, the Rams hold a 10-1-1 edge in 12 games, the last three victories coming in 1971, 1975 and 1978.

All those factors weigh on Noll's mind.

By ALAN GREENBERG

The Los Angeles Times

NEWPORT BEACH, Calif. -

Knowing where you are usually goes a

long way toward helping a person

survive. You're risking dire conse-

quences if you light a cigarette at the

gas pump, run your car with the

garage door closed, or hand out "Sup-

port Radio Free Europe" buttons in

Occasionally, however, it is best not

to know where you are or whom you are dealing with. That's the old igno-

rance-is-bliss theory. One that Terry Bradshaw advises Vince Ferragamo

to take to heart Sunday if he wants to

avoid freaking out when the Steelers

Bowl, he's in trouble. He's got to treat

it as if it's just another game."

'With all the pressure," Bradshaw

play the Rams in Super Bowl XIV.

Red Square.

'There's no such thing as an easy football game," he said. "We have trouble with everybody we play and we expect to have trouble with the Rams.

Super Bowl getting to be old stuff for Steelers' Terry Bradshaw. (AP Laserphoto)

# Carter may reveal position on boycott of Olympics

By TOM SEPPY

street from

PAILY

URSDAY

WASHINGTON (AP) - President Carter may announce today whether he will seek a U.S. boycott of the Olympic Games in Moscow this summer in retaliation for Russian military intervention in Afghanistan.

Carter will appear Sunday on NBC's "Meet the Press" television news show and the question of a boycott, which has gained strong congressional and popular support,

should come up. Officials of the United States Olympic Committee met at the White House for more than two hours Friday with Secretary of State Cyrus R. Vance and other administration aides to express their opposition to a government-ordered boycott which they believe would be "tantamount to the destruction of the Olympic move-

ment." After the meeting, Robert J. Kane, USOC president, and F. Don Miller, the organization's executive director, said they were told that Carter had not made a decision yet on whether he would call for a boycott, although the President, Vance and Vice President Walter Mondale have all said during the past two weeks they favor such an

A White House source said, however, that Carter should have a definite position before he appears on national television and before Vance appears before the Senate Foreign Relations

Committee on Monday. Chairmen Frank Church, D-Idaho, and Clement J. Zablocki, D-Wis., of

the Senate and House committees dealing with foreign relations, respectively, both said they favor moving the games from Moscow and indicated they would give high priority to resolutions calling for relocation of the games, a boycott or organization of an alternative "Free World Olympics" when Congress reconvenes next

All three options have been sent up as trial balloons by the Carter administration during the past couple of

Resolutions have been introduced in both houses of Congress urging various sanctions against the Moscow

Church said, "I support moving the Olympics from Moscow. Were the games to be moved, the Soviets would not only suffer a loss of prestige but, more importantly, it would be an event the Soviet leadership could not hide from its own people, tangible evidence of the world's indignation."

However, even Church questioned whether the International Olympic Committee could be convinced to change the games and whether other countries would support such a

If public statements mean anything, the answers to both questions would be a loud and emphatic,

Lord Killanin, IOC president, has said often since the controversy was begun that the games cannot be moved or canceled because the Soviet

However, Miller said Killanin gave the USOC approval Friday "to present a case for moving or delaying the games to the IOC executive board."

The IOC will meet at Lake Placid, N.Y., Feb. 10-12, just before Carter is scheduled to open the Winter Games there Feb. l3. The USOC executive board of 86 voting members will meet in Colorado Springs, Colo., Friday through Sunday to discuss, among other things, the possibilities of pressuring the IOC into changing the site of the summer games.

#### Bradshaw knows whereof he reaching a different group of readers speaks. At 31, he enters his fourth Super Bowl as one of the most rehowever belatedly. Someone suggested readers might turn first to the issue's pictures of a naked Bo Derek, the star of the movie "10." Bradshaw, who wears "12" himself, didn't seem

spected members of his craft, leader of one of pro football's most dangerous offenses, a man who has survived a failed marriage, the loss of his starting job, dozens of attacks against his character and intelligence, and hundreds of onrushing behemoths whose purpose is to stop him like freshly picked grapes.

He has emerged from all that with a second and seemingly happier marriage, a renewed sense of religious purpose, and his sense of humor - if

not his hair - intact. Bradshaw met the press this week at the Steelers' hotel here with a relaxed, friendly manner befitting one who has risen above adversity and succeeded in fulfilling the poten-

tial any saw in him. Bradshaw, whom former Dallas

Cowboys linebacker Thomas Henderson once said "couldn't spell 'cat' if you spotted him the 'c' and the 'a'," often showed a quick-wittedness that is becoming almost as much a personal trademark as the dime-size

Bradshaw offers advice to Ferragamo for Super Bowl

Ignorance is bliss, Terry

dimple in his chin. Aside from the prospect of being on his fourth Super Bowl winner in as many tries, Bradshaw was still

#### 'It's like swimming. The second or third time, it may not be exciting, but it's nice to cool off

said, "if he ever realizes it's the Super Bowl, he's in trouble. He's got to treat zine having selected him as the lead interview for its March issue: He appeared thrilled by the thought of

> WEARING a white button-down shirt, leather vest, dark brown pants and brown boots made of ostrich, Bradshaw talked about his team and

his life for 30 minutes. Most people wanted to know if this being his fourth Super Bowl made it less of a thrill.

"It's exciting, but we've been here two years in a row, so some of the atmosphere is dull," Bradshaw said. "We're here for the results."

Later, alone in his hotel room with a

reporter, Bradshaw amplified. "There's no surprise (being here),"

he said. It's like swimming. When you go swimming for the first time, it's exciting. The second or third time, it may not be exciting, but it's nice to

Bradshaw's first Super Bowl, Super Bowl IX, was exciting to him partly because he wasn't too sure what he was doing. The Steelers beat the Minnesota Vikings in new Orleans, 16-6, on a day when Pittsburgh's sensational defense accounted for 9 Steeler points and generally humiliated the

"I wasn't that important a part of the ballgame then," Bradshaw re-called, sipping coffee. "I was gonna just hand the ball off to Franco (Harris) about 35 times. I called audibles, and I called a good ballgame, but I didn't have control of the game the way I do now

Now Bradshaw, 6-3, 215 pounds, is the most devastating of offensive weapons. He can throw short or long with equal facility, and run for first downs, knocking over defenders,

when he has to. Still, he refuses to label himself a great quarterback, and hurriedly ticks off a half dozen at his position he considers better. He thinks Roger Staubach is the best.

But nobody's having a better time than Bradshaw.

"I'm having more fun (than ever)," he said. "When you climb that hill and you start going down the other side, you better be having fun.

"I can always improve. Until the day I retire, I'll say 'Dad gum, if I could have just had one more game. I could have done better.' I'll never be satisfied.'

THE STEELERS have played the Rams three times in the 1970s, the last time being last year on Monday Night Football. The Rams won all three. But the Steelers are an 11-point favorite Sunday, and although Bradshaw has spent a lot of time studying the Rams defensive tendencies, he's not sure it'll do him much good. He expects Rams defensive coordinator Bud Carson, a Steelers assistant coach for six years until coming here last year, to shoot the works in an attempt to confuse him.

"I've got no doubt in my mind he's gonna do something," Bradshaw said. "I'm not concerned about blitzes. If they brought everybody up (to blitz), I've got a great play. I'm gonna show it to you (leans forward)...but not right now.

"It doesn't get any easier...The 16game season has taken away all the excitement we could have. It's a different type of challenge for us. I'd rather beat them than anything in the world. Probably the entir NFL community is against us. They've had enough of us being here."

Are the Steelers a dynasty? "Maybe if we won four more Super Bowls in a row, I'd say yes," Bradshaw said. "But I wouldn't want to say yes because I wouldn't want to put pressure on me. But we've got to make the most of each of these super Bowls because some of us aren't gonna have too many more of these to

Is there a parallel between the atmosphere on the world champion Pirates and that on the Steelers. He said there probably are similarities, and defensive tackle Joe Greene might be the Steelers' version of the Pirates' Willie Stargell. But Bradshaw quickly scuttled the questioner's notion that Greene give his best-performing teamamtes gold stars to wear on their

headgear - as Stargell does. "Gold stars don't stay on a helmet very long," Bradshaw said, "Not if

(See BRADSHAW, Page 4D)

# Writers like Steelers from 3-0 to 56-3

LOS ANGELES (AP) - That great tradition of the Super Bowl - the sports writers pool — showed on Saturday that the press corps is convinced the Pittsburgh Steelers will win the National Football League

One day before the game the writers and broadcasters came to cover the pool stood at 102 participants picking Pittsburgh to win and 36 picking the Los Angeles Rams.

Like countless other office pools going on this week many of the hundreds of writers gathered at the press headquarters hotel here pick a team, a score and pay a buck.

The closest one to the correct score wins the pot. The widest margin of victory predicted for the Steelers was 56-3. The lowest predicted score had Pittsburgh winning a 3-0 Super Bowl vic-

Four other writers also predicted that the Rams would be shut out on Sunday - something that has yet to happen in 13 previous Super

#### Bible dies at Dana X.

AUSTIN, Texas (AP) - Dana X. Bible, the former college football coaching great whose teams won 14 major conference titles, died Saturday in Austin. He was 88. Bible died at approximately 3:30

p.m. Saturday, according to a spokesman at Saint David Hospital, where he had been hospitalized since a Nov.

Bible's teams captured five Southwest Conference football titles while he was coach at Texas A&M from 1917 to 1928, and three SWC championships during his tenure at Texas from 1937 to 1946.

He also coached at Nebraska from 1929 to 1936 where his teams won six championships in what was then called the Big Six Conference.

The University of Texas Sports In-Union technically has not broken any formation office said Bible was selected by seven different football halls of fame, including the National Football Foundation Hall of Fame. He received the Alonzo Stagg and

award for outstanding service to foot-He was a member of the national football rules committee for more

the New York Touchdown Club's 1954

than 25 years. When he accepted the job at Texas

in 1936 he was paid \$15,000 a year, an amount considered a lot of money at the time. He ended his coaching career in 1946, but stayed on as the Texas athletic director until his retirment in 1957.

He was born in Jefferson City, Tenn. He graduated from Carson-Newman College and coached at Mississippi College and Louisiana State before taking the Texas A&M job in

A funeral is scheduled for 3 p.m. Monday at the Weed-Corley Funeral Home in Austin.

# Little's free throws give Tech 69-67 SWC victory

LUBBOCK, Texas (AP) - David Little sank two free throws with 12 seconds remaining, then Julio Gallardo missed a 25-foot set shot at the buzzer, and Texas Tech hung on for a narrow 69-67 Southwest Conference basketball win over Baylor Saturday night.

With the score tied at 67-67, Baylor guard Pat Nunley was called for charging on an inbounds play, sending Little to the line for the deciding

The Bears outshot Tech from the field, 26-24, and outrebounded the Raiders 29-23, with Andy Sears grabbing nine Baylor caroms.

The lead changed hands five times in the final three minutes.

Baylor's Terry Teagle led all scorers with 24 points, but Tech had five players in double figures, led by Ben Hill and Kent Williams with 16

#### Winners to receive \$18,000 Super prize

PASADENA, Calif. (AP) - A Super Bowl victory will mean an \$18,000 pay-day for each member of the winning team.
The shares for members of the los-

ing team will be \$9,000.

All-in-all the Pittsburgh Steelers and the Los Angeles Rams will be playing for a pot worth about \$1.6

#### Stevens beats Barker

KANSAS CITY, Mo. (AP) Eighth-seeded Greer Stevens defeated an ailing Sue Barker 6-3, 6-3 Saturday night to move into the finals of a \$125,000 women's tennis tournament at Kansas City.

Texas 84, Rice 65- Firepower from an unexpected source, guard David Britton, helped Texas A&M surge by Rice 84-65 in a Southwest Conference basketball game Saturday night at

The Aggies usually depend on center Rudy Woods and forwards Vernon Smith and Rynn Wright for their scoring punch, but Britton blistered the nets for 25 points against Rice, gave the Aggies good ball handling and made three steals to lead the winning effort.

However, the Aggie big men made themselves felt on defense, forcing the young Owls into low-percentage shots much of the game. Rice hit just 32 percent of its field goal tries.

Ricky Pierce led Rice scoring with 18 points.

The win raises A&M's record to 12-5 for the season and 5-0 in conference play. Rice fell to 3-10 and 1-4.

**A&M** (84)—Wright 2 0-0 4, Smith 6 3-4 15, Woods 4 0-2 8, Britton 12 1-3 25, Goff 4 1-1 9, Riley 4 1-1 9, Ladson 1 1-3 3, Sylestine 1 7-7 9, Buford 0 0-0 0, McHugh 0 2-2 2, Sooter 0 0-0 0 Totals 34 16-33 84. # Mitchell leads in Phoenix golf

PHOENIX (AP) - Jeff Mitchell, a decided longshot and leading for the first time in his four-year PGA Tour career, planned a bold approach to Sunday's final round of the \$300,000 Phoenix Open 'You can't lay back on this golf course. You have

o attack it," he said after taking the 54-hole lead, the first time he'd enjoyed that position going into the final round. And it was that tactic, a bold approach, that gave

him the lead Saturday. He flew a 3-wood shot to the water-guarded green on the 18th hole and 2-putted for the birdie-4 that lifted him a stroke clear of the It was his second birdie in three holes and finished off a round of 69. He had a 205 total, 8 shots under par

on the rain-drenched, storm-lashed, 6,726-yard Phoenix Country Club course. "I'm nervous now and I'm going to be nervous tomorrow," he said. "I just hope tomorrow I can

play the same way. 'It's a new experience for me, but it's an experience I like," said Mitchell, whose last hole birdie pulled him out of a tie for the top with veteran Hubert

#### Storm halts OCU—UNLV game

OKLAHOMA CITY (AP) - Coaches for Oklahoma City and Nevada-Las Vegas refused to allow their players to play in a scheduled game at the State Fair Arena Saturday night after water from a heavy rainstorm leaked through the roof and onto the basketball court.

Las Vegas Coach Jerry Tarkanian tentatively set a new date for the game for late in February. They did not settle on an exact date immediately. The coaches said they feared their players could

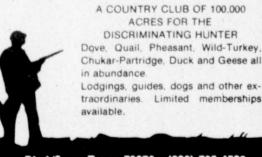

slip on wet spots and be injured on the court, which was dotted by puddles.

The approximately 1,700 spectators were given

# Super Bowl XIV matches Rams, Steelers in Pasadena Rose Bowl

(Continued from 3D)

Still, Noll recognizes the status of the team he leads into the Rose Bowl Sunday. During the decade of the '70s, Pittsburgh dominated professional foot-

"You begin with personnel," he said. "That's number one, that and their ability to work together as a team. I think we have a fine team but you have Tampa Bay in thr NFC championship game and set a to prove it on the field. Talking about it beforehand doesn't prove a thing.'

PITTSBURGH'S personnel starts with veteran quarterback Terry Bradshaw, who set Super Bowl records with four touchdown passes and 318 yards in last January's 35-31 victory over Dallas. Bradshaw enjoyed the first 3,000-yard season of his career in 1979 as the Steelers led the league with 416 points. His favorite targets are wide receivers John Stallworth, an All Pro who caught 70 passes for 1,183

yards, and Lynn Swann, 41-808. For their ground game, the Steelers depend on power-running Franco Harris, who gained 1,186 yards in 1979 - his seventh 1,000-yard season and second highest total of his career. His partners, Rocky Bleier and Sidney Thornton, added another 1.019 between them.

Facing those Steeler weapons will be a veteran Ram defense led by All Pro end Jack Youngblood, who has been playing with a hairline fracture of his left leg. Cornerbacks Pat Thomas and Rod Perry, both back from midseason injuries, are the key men in the secondary.

THE RAM defenders are coming off a shutout of record by limiting explosive Seattle to minus seven yards in total offense in a midseason contest.

On offense, the Rams will depend on quarterback Vince Ferragamo, who inherited the starting job when regular Pat Haden suffered a broken finger in that Seattle game. The Super Bowl contest will be only his eighth professional start.

Running back Wendell Tyler, a starter for the first time, responded with 1,109 yards and led the league with a 5.1 average per attempt. His partner is Cullen Bryant, 177-619. The receivers are Preston Dennard, who led the team with 43 catches for 766 yards and Billy Waddy.

They must solve a veteran Pittsburgh defense led by Mean Joe Greene and L.C. Greenwood up front, and All Pros Jack Lambert at linebacker and Donnie Shell at strong safety.

The talking ends and the proving begins today.

### Rote return revives memories

Who's Who in Sports, otherwise known as the Midland Sports Banquet, will bring to together many of the athletic greats from all sports, past and present, Feb. 7 at Midland Country Club, reviving memories from yesteryear. Retired baseball umpire and author Tom Gor-

man will be the guest speaker at the second annual fete put together by Midland Cubs General Manager Bill Rigney, Jr., and lure such baseball giants as Hall of Fame lefthander Warren Spahn; Texas Rangers third baseman Buddy Bell; Chicago White Sox pitcher Richard Wortham and Chicago Cubs General Manager Bob Kennedy to the Tall City. Also attending will be Texas Ranger owner Brad Corbett.

That's an impressive array of baseball luminaries, but there will be something for football and racing fans, too, with Tom Brahaney, the Midland All-America now with the St. Louis Cardinals; Texas Hall of Famer Bobby Layne; SMU's Paul Page from the Doak Walker; former Texas Coach Darrell Royal; Dante Lavelli, the pro football Hall of Famer from the Cleveland Browns; and Texas A&M running back Bob Smith, who set records back in the 1950s that stood until last year, in attendance.

And don't forget Kyle Rote, the former SMU

and New York Giants backfield star. The kid who won all-state recognition in football and basketball and established track records at San Antonio while attracting major league baseball scouts to San Antonio.

Of course, it was football where Kyle gained his greatest fame, although he did give baseball a brief whirl, batting .347 in the Gulf Coast League. But the SMU All-America gained national recognition as an All-America at SMU and in 1949 his heroic performance against powerful Notre Dame goes down as an effort that will be long remembered. The Texas Sports Writers Association voted it the "outstanding individual performance by a Texan in the first half

The measure of the honor is emphasized by the fact that his competition included Ben Hogan, Byron Nelson, Sammy Baugh, Babe Didrickson, Layne, and Davey O'Brien.

In typical Rote fashion, Kyle at his induction into the Texas Hall of Fame said, "It wasn't really that great a game. It was more the circumstances surrounding the game," a downtrodden SMU team, a hopeless underdog without a prayer pushing the No. 1 ranked Irish to the

very limit. The New York Giants took notice and made him the No. 1 NFL draft choice. It was a wise choice since Kyle during an 11-year career became the Giants' all-time leader in touchdown receptions, a record that has weathered the test

performance by Vanderbilt forward Mike Rhodes,

The victory boosted Kentucky to 15-3 overall and

Irish win; OSU upset LEXINGTON, Ky. (AP) - Fred Cowan scored 19 fourth straight victory on UCLA's home court, where points and Kyle Macy added 18 as sixth-ranked Ken- the Bruins have lost just 10 times while winning 225 tucky downed Vanderbilt 106-90 in a foul-ridden in the 15-year history of the arena. Tripucka, who also had seven of his game-high 10 Southeastern Conference basketball game Saturday rebounds in the second half, ended any UCLA hopes Kentucky's victory offset an 11-for-12 shooting by scoring a three-point play with 1:15 remaining to

give Notre Dame a 75-65 lead. The Irish went ahead to stay by scoring six straight points late in the first half to take a 39-35 lead. A jump shot by Kiki Vandeweghe, who led the Bruins with 22 points, made it 39-37 at the intermis-Freshman Derrick Hord added 17 points for Ken-sion.

Guard Rich Branning led Notre Dame, 11-2, with 20 points. Forward Tracy Jackson added 19 points, and guard Bill Hanzlik had 13 for the Irish.

Freshman guard Rod Foster added 13 points - all in the second half - for UCLA, which lost its third game in a row and dropped to 8-6. The Bruins with 17 points and made two important free throws had not lost as many as six games in a season since Saturday to help 15th-ranked Missouri to a 69-64 Big 1965-66.

Louisville 76, Tulane 59-Darrell Griffith contri-Missouri had a 38-34 lead at halftime, but a sudden buted 10 points to a 13-5 Louisville spurt early in the second half Saturday that helped lift the seventhranked Cardinals to a 76-59 Metro Conference victory

With just over three minutes left and Oklahoma Griffith was the game's leading scorer with 23 head. He made both free throws to tie the score, and points as Louisville moved into the Metro Conference leader with a 3-0 record to go with its 13-2 overall Oklahoma State's Don Youman led all scorers with mark. Tulane now is 1-5 in the Metro and 5-10

Duke 67, NC State 56-Vince Taylor scored 18 Michigan 75, Ohio State 74-Michigan's Thad Garner hit four of his 19 points in overtime as the points and Gene Banks grabbed 18 rebounds Saturday to lead fifth-ranked Duke to a 67-56 rout of Wolverines upset second-ranked Ohio State 75-74 16th-ranked North Carolina State in an Atlantic Coast Conference basketball game.

The 11-point final margin was as closest as the fans at Crisler Arena was the first in six conference Wolfpack managed to come after the first nine minutes of the game. Hawkeye Whitney of the State missed a chance to win it when Kelvin Wolfpack had a game-high 25 points.

Banks also added 16 points for Duke. Mike Gmins-Ransey's jumper from the top of the key — with two

second left in regulation play — hit the rim and sent the game into overtime tied at 66-66. ki contributed 15, and Bob Bender had 12 for the Blue Mike McGee led all scorers with 23 points, 11 in the Duke increased its record to 14-2 overall and 3-2 in first half and two in the overtime. Johnny Johnson the ACC, while N.C. State fell to 11-3 overall and 3-2 in came off the bench and finished with 17 as the

the league. Duke built a 15-point lead in the first 12 minutes of the game and held N.C. State scoreless for more than

in the second half but none in the overtime. Kelvin 11 minutes in the first half. The Blue Devils trailed 4-2 in the opening minutes, Ransey added 16 for the Buckeyes, while freshman but ran off 17 unanswered points to take control of the game. The largest Duke lead came at the start of the second half when Taylor scored to make it 39-20 Notre Dame 80, UCLA 73— Junior forward Kelly with 19:41 remaining. Tripucka, after being held scoreless in the first half,

collected 17 points after the intermission Saturday in Although Gminski was held well below his season leading eighth-ranked Notre Dame to an 80-73 interaverage, he pulled down 12 rebounds and managed to force two Wolfack centers, Craig Watts and Thurl sectional basketball victory over UCLA at Pau-Bailey, to foul out.

# LSU, Clemson, Minnesota notch cage upsets KNOXVILLE, Tenn. (AP) — Reserve forward DeWayne Scales scored 22 points and Durand Macklin added 21 to lead 14th-ranked LSU to a 75-74 Southeastern Conference

college basketball victory Saturday over No. 20 Tennes-

The Tigers held off a last-minute rally by Tennessee to hand the league-leading Volunteers their first loss in eight SEC games.

Ethan Martin went 8-for-8 at the foul-line during the final 81/2 minutes to prevent Tennessee from taking a lead. Reggie Johnson led Tennessee scoring with 23. Bertelkamp had 16 and Wood 13. LSU is 11-3 for the year and 4-3 in the SEC. Tennessee dropped to 12-4 for the season.

Minnesota 67, Purdue 61—Sophomore guard Trent Tuck-er scored 19 points and Darryl Mitchell hit two clutch free throws with 17 seconds left, to lead unranked Minnesota to a 67-61 Big Ten basketball victory over No. 11 Purdue Saturday at Minneapolis.

A near capacity crowd of 16,387 fans at Williams Arena saw the Gophers rebound from a heartbreaking overtime loss at No. 2-ranked Ohio State on Thursday.

Minnesota shot 71 percent in the first half to take a 34-29 lead in the regionally televised game. The Gophers held that five-point lead through most of the second half before 7-foot-1 center Joe Barry Carroll rallied the Boilermak-

through.

half and Arnette Hallman added 18 points as Purdue narrowed the gap to 63-59 with 38 seconds remaining. Both teams are now 4-2 in Big Ten play and Il-4 overall,

Clemson 88, Virginia 68-The 17th-ranked Clemson Tigers notched their third upset of a Top Twenty team in three weeks with a surprisingly lopsided 88-68 victory over 12th-ranked Virginia in a regionally televised Atlantic Coast Conference game Saturday at Clemson.

Clemson, now 12-3 overall and 4-2 in the ACC, led only 38-36 at halftime, but the Tigers blew the game open in the second half after 7-foot-4 Virginia center Ralph Sampson fouled out with nine minutes to play. Sampson, who picked up three fouls early in the first half, played only 14 minutes the entire game.

Clemson, which had recorded home-court upsets over Duke and North Carolina in the last two weeks, got 23 points from center John "Moose" Campbell, 22 from Billy Williams and 19 from Larry Nance in its upset over the Cavaliers. Campbell and Nance also had a dozen rebounds apiece for the Tigers.

Virginia, which slipped to 13-3 overall and 3-2 in ACC play, had trouble with all facets of its game Saturday. Jeff Lamp was the leading scorer for Virginia with 18

points, but he connected on only seven of 22 shots from the floor.

Old Dominion 68, Syracuse 67—Old Dominion's Monarchs overcame an 11-point deficit in the last 41/2 minutes

Saturday and upended Syracuse's previously unbeaten third-ranked Orangemen 68-67 on Bobby Vaughan's tip-in at the buzzer in Norfolk

Vaughan's was the fourth shot Old Dominion had at the basket in a frantic final five seconds after Syracuse had taken a 67-66 lead with 15 seconds remaining on two free

throws by Louis Orr. Syracuse, now 14-1, appeared a certain winner in the regionally televised game with a 63-52 lead with 4:38 left.

But the Monarchs went to a press and scored 10 straight points in the next 1½ minutes, Branch getting four and West, Ronnie Valentine and Ronnie McAdoo two

McAdoo finished with 21 points and Valentine with 20 for Old Dominion. Orr had 18 points and Roosevelt Bouie 17 points and 11 rebounds for Syracuse.

St. John's 71, Georgetown 69—Reggie Carter scored a field goal from the baseline and then made a foul shot with five seconds remaining to lift the No. 8-ranked St. John's to a 71-69 victory over Georgetown in a regionally televised Big East basketball game in Washington, D.C.

after Georgetown had erased a three-point St. John's edge in the last minute on a field goal by Craig Shelton and two foul throws by Eric Floyd with 24 seconds remain-

The victory was St. John's 14th in 15 outings. Georgetown

#### Cooper netters hand Purple Pack 11-7 defeat ABILENE - The Midland High tennis team visit-

ed the Key City Saturday afternoon for a District 5-4A match with a solid Abilene Cooper team. The Bulldogs came home with an 11-7 loss, but in the process, found out they can compete with the Cou-

"We had a lot of close matches and if we had won one or two more, we we would've won 11-7," said MHS coach Pete Barizon. "Cooper has a fine team, but I think that they're not much better than we

The setback leaves the Bulldogs 1-1 as they prepare for next Saturday's play in San Angelo, which will be a homecoming of sorts for Barizon, a former Central tennis boss.

U.S. Figure Skating Championships.

Smith, from Wilmington, Del., and Summers, Vienna, Va., picked up 10 ordinals and 157.40 points. Blumberg, from Tarzana, Calif., and Seibert, Washington, Pa., received 11 ordinals and

The third place couple

Earlier Saturday, Vikki de Vries, Newport Beach, Calif., won the junior ladies competition. Tiffany Chin, San Diego, was second and Melissa

third. The junior pairs was won by Dana Graham and Paul Wylie of Littleton, Colo. Deborah Lynch, Santa Monica, Calif. and Keith Green, La Hambra, Calif., were second and Maryan and Bryan Amaral of Cumberland, R.I. took the

bronze. In the novice men, James Cygan of Colorado Springs, Colo., won the gold. Craig Henderson of Stockton, Calif. was second and Tom Schneider of Dublin, Calif., was third.

Jon Cenis and Sid Snyder show what the best dressed heads in Pittsburgh will be wearing today as the Steelers try for their fourth Super Bowl win. The two are volunteer firemen who shaved their heads and painted them to look like Steeler helmets. (AP Laserphoto)

#### **Horned Frogs** surprise SMU in SWC action

DALLAS (AP) - Freshman guard Darrell Browder scored a season high 24 points and the Texas Christian Horned Frogs earned their first Southwest Conference road victory since 1976 with a 92-89 verdict over the Southern Methodist Mustangs in a regionally televised game.

TCU had not won a SWC game on the road in its last 33 attempts until Saturday. The Horned Frogs had only won two of their last 60 games in other teams' gymnasiums.

The Mustangs, who were led by Richard Harris' 19 points and Brad Branson's 18 points, tied the game 79-all, with 4:34 to play on a longrange basket by freshman Dave Piehler.

But at that point, Browder, and transfers Deckery Johnson and Eric Summers took charge.

Johnson's lay-up put the Horned Frogs ahead to stay with 14:17 to play. A basket by Summers and two baskets and two free throws by Browder set the stage for Ed Wineinger's clinching free throws with two seconds to play.

It was TCU's first win in Moody Coliseum since 1970. The Horned Frogs shot 61.3 percent from the field and connected on their first six shots of the second half.

TEXAS CHRISTIAN (12)—Summers 9 3-5 21, Johnson 8 3-4 19, Frevert 2 2-2 8, Wineinger 6 4-5 16, Browder 10 4-4 24, Bridges 2 0-0 4, Mansbury 1 0-0 2, Baker 0 0-0 0, Thompson 0 0-0 0, Totals 38 16-20 92.

SOUTHERN METHODIST (20)—Branson 8 2-2 18, Harris 8 3-4 19, James 0 0-0 0, Allen 1 8-8 10, Hale 3 0-0 6, Hollmann 3 2-4 8, Piehler 5 2-2 12, Hoops 6 2-3 14, Welch 1 0-0 2. Totals 35 19-23 89.

Halftime Score — TCU 51, SMU 43. Fouled out — Branson. Total Fouls — TCU 19, SMU 18. Technical Fouls — None. A — 3,416.

## McTear, Ashford win, Hightower upset

NEW YORK (AP) - Sprinters Houston McTear and Evelyn Ashford set meet records Saturday night and Stephanie Hightower upset indoor record-holder Candy Young in the women's 55-meter hurdles at the U.S. Olympic Invitational track and field meet.

McTear, the indoor record-holder for 60 yards, won the 55-meter dash — virtually equivalent to the 60 — in 6.17 seconds. He edged Curtis Dickey, the two-time NCAA indoor sprint champion and a standout football running back at Texas A&M University. McTear, a last-minute entry, won his trial heat in 6.16, bettering the mark of 6.17 set last year by Harvey Glance.

McTear's winning time equaled the meet record. Dickey was clocked in 6.18 and Glance, winner of the event the last three years, wound up third in 6.25.

Ashford, the American record-holder at 100 and 200 meters and the U.S. track and field Athlete of the Year in 1979, clipped

.01 off the meet record in winning her heat in 6.82. She then lowered the mark again, easily capturing the final in

Hightower, the Association of Intercollegiate Athletics for Women champion, pulled a stunning upset in the women's hurdles. Young, the sensational high school senior from Beaver Falls, Pa., had been rated the heavy favorite. She had set the indoor mark with identical times of 7.50 in the semifinals and final of the 1979 National AAU Championships at Madison Square Garden.

But Hightower was too quick for the 17-year-old Young, who was sporting a T-shirt reading "Go Steelers." Hightower, out of the blocks fast, finished in 7.67, with Young a disappointing second in 7.74.

The men's 55-meter hurdles was won by Greg Foster of UCLA in 7.16. Foster, taking advantage of the absence of indoor record-holder Renaldo Nehemiah of Maryland, posted his second victory in two nights.

## Stone's 'witch trial,' often delayed, due to start Mond

PLAINVIEW, Texas (AP) - The atmosphere in State District Judge ohn T. Boyd's courtroom was almost frivolous.

For nine days, in tedious hour-long interviews with dozens of prospective jurors the attorneys slowly picked those they believed could give a fair trial to the high priest of a witches

By Thursday, prosecutors and attorneys for murder defendant Loy Dean Stone could see a glimmer of light at the end of the long and monotonous jury selection process, and the prospect of beginning the trial proper vas making everyone punchy.

Momentum built as the last three of the 32 panelists — plus an extra were selected one after another

Thursday.

The cautious Boyd planned to add one or two more panelists as "insurance" Friday, choose the final jury of 12 and then proceed with opening

arguments. Almost 27 months since 15-year-old Roxanne Casas was killed, Stone fi-

nally was going to trial. However, even as Boyd joked with attorneys, journalists and the defendant, court employees learned some bad news. While notifying panelists to appear in court Friday, they found one was in Oklahoma and would not return until Friday night.

A frustrated Boyd called the attorneys into his chambers to see if they would agree to dismiss the wandering juror. They would not.

So Boyd, who had not specifically told the panelists to stay in town, ordered another delay. The trial already postponed twice - was reset for Monday

On Friday, attorneys picked another two "emergency" jurors, bringing the panel of prospects to 35

— 18 men and 17 women.

Stone, sporting a broken right wrist from a fall in his barn, sat stolidly through jury selection while his wife, Louise, took copious notes. Mrs. Stone, a high priestess in the Church of Wicca, also is charged with murder, but Boyd has granted a separation of the two trials.

The Stones stayed at their home near Dimmitt on Halloween 1977 for a quiet celebration of the witches' new year. Teen-agers in the Panhandle towns of Dimmitt and Hereford, however, had heard of the "witch couple"

and said later that the night had appeared perfect for observing a little Satan worship.

While the Stones practice what some witches call "mail-order witchcraft," they say the Church of Wicca does not even believe in Satan, much less worship him. They say they believe in reincarnation and that one's actions are returned threefold. They also say that an action is acceptable if

it harms no one The Church of Wicca is scorned by members of other covens because members do not believe in an earth goddess and because members can join only after taking a \$100 corre-

spondence course. The night of Oct. 31, 50 to 100 local teen-agers "were coming in droves" to the Stones' house, "spinning their wheels, yelling threats and obscenities; some of them firing guns," said

defense attorney Travis Shelton. The Stones called Castro County Sheriff Granville Martin to chase the teen-agers away about an hour before

sought directions to the house. Their pickup was pulling into the driveway when two shotgun blasts rang out, killing Miss Casas and

Miss Casas and four of her friends

wounding two others. The Stones were arrested the day of her funeral.

Stone, 50, and his wife, 49, say they never heard the shots and have pleaded innocent.

The case set off a scandal in the town's Hispanic community, and offers of justice came from such groups as the militant Brown Berets.

The trial was moved to nearby Plainview, in Hale County. Martin says Dimmitt still is "sitting on a powder-

Prospective jurors were questioned closely about their possible prejudice for or against Hispanics, witches, and law enforcement officers - whose testimony will make up the bulk of testimony in the case. Four of the

male jurors are Hispanic. Prosecutors Jimmy Davis, the Castro County district attorney, and Ron Felty, assistant Hale County district attorney, have called 22 witnesses. Defense attorneys Shelton and James Doores have subpoenaed 22.

Davis and Shelton said teen-agers involved would round out the slate of witnesses.

## Waste license rapped

AUSTIN, Texas (AP) Sen. A.R. Schwartz, D-Galveston, says his constituents - and anybody else who is interested - should have the right to a public hearing on radioactive waste disposal at Todd Shipyard

on Pelican Island. He told State Health Commissioner Robert Bernstein on Friday the shipyard's above-ground disposal site probably doesn't meet requirements set by the Texas Department of Water Resources.

Todd has a license from the Health Department to store low-level radioactive wastes. After discovering 12,000 barrels of waste at the site, Bernstein upped the limit in the permit from 2,000 to 5,000 barrels. He gave Todd until July 31 to ship the 7,000 excess barrels to permanent disposal locations.

'The Todd dump would not qualify under present waste management laws and regulations as a waste dispposal site for any purposes which are regulated by the Texas Water Resources Board, and I wonder whether they are xempt from those regulations simply because they deal in low-level radioactive waste, Schwartz told Bernstein

in a letter. "to thoroughly investigate the laws and regulations pertaining to waste disposal sites and require a public hearing for the Todd site, as would be mandatory for any other type of site." Schwartz objected to Bernstein's decision to increase the volume of waste allowed by Todd's

"The method in which Todd is storing its variety of wastes does not inspire any confidence in me that dictates they are entitled to an enlargement of their existing permit. I personally intend to seek a prohibition against any waste disosal facilities on any island or peninsula in our coastala area because I do not believe adequate protection for the public health can be obtained," Schwartz told Bernstein.

Schwartz later made a similar remark before the Texas Coastal and Marine Council, which he heads.

"I'll tell you one thing, Todd Drydock wouldn't store its gold on Pelican Island if it had any gold," Schwartz commented

He said he already had asked Gov. Bill Clements to include in his call for a special legislative session the creation of a \$5 million state fund to pay for cleaning up abandoned waste disposal

These, he said, would include locations where uranium mining companies disposed of the "tailings," or sand remaining after uranium ore has been milled.

#### North Korea renews offer

# A designer's special touch

By WANDA MOUTON Lifestyle Editor

It's a great introduction to

The Junior Woman's Association is fully in the midst of preparations for the annual style show and luncheon, "An Invitation to Spring," set for Jan. 29 at the Holiday Inn-Country Villa, the new Holidome.

A social hour begins at 11 a.m., followed by lunch and the exclusive showing of Albert

Nipon's designs for Spring.

Nipon and his wife Pearl will bring the best of Nipon Bou-

tique, Albert Nipon and Albert Nipon Collectable fashions.

Nipon is internationally renowned for fabric, color and style, and is one of America's top designers.

Julian Gold Inc. is sponsoring the showing.

Chairman of the benefit show and luncheon is Mrs. Kenneth Yates. Her committee chairmen are Mrs. Tom Brunet and Mrs Steve Kattke, reservations; Mrs Larry Long, table decorations; Mrs Dennis Rambo, door prizes; Mrs. Phillip Marcum, donations; Mrs. Jerry Suggs, correspondence; Mrs. Jim Highsmith

and Mrs. Courtney Barnes, special services; and Mrs. Michael Morse, publicity

Morse, publicity.

To be available for sale at the luncheon are spring floral arrangements donated by Mildred's, A-1 Floral, Peppertree, Flowerland, Buddy's and Midland Floral. Monterrey Floral is providing the greenery for the runway.

Proceeds from the event will go to the Pediatric Fund at Midland Memorial Hospital and the permanent scholarship fund at Midland College.

For information and reservations, call 697-5290.

Committee chairmen of the Junior Woman's Association Style Show are, from left, Vicki Kattke, reservations; Deanna Long, table decorations;

Patty Brunet, reservations; and Jane Rambo, special prizes. (Staff Photo)

The little basic dress is important for so many occasions. Albert Nipon's monotone floral print on black silk acetate is light and swings with the body. The white linen collar and cuffs complete a look of distinctive styling. From the 1979 Holiday/Resort Collection.

Nipon's dress suit worn by Donna Long fills in the gap of any wardrobe. Proper and feminine, it starts in the morning and slips into evening. Ms. Long will be modeling at the Junior Woman's Association Style Show Jan. 29. (Staff Photo by Brian Hendershot)

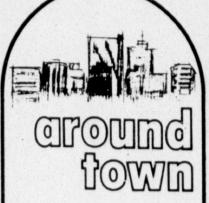

What wardrobe is complete these days without something in fashionable georgette? Nipon designs a dress in dramatic purple. The interesting petal sleeves are an added touch of creative styling to the partially stitched pleats and a narrow self belt.

Donna Long of Midland models a dress that floats with every move. The tiny ruffles at sleeves and neckline bear the designer's influence. (Staff Photo by Brian Hendershot)

...Jane Bauch, the former Janie Stephenson, born in Odessa, but reared and educated in Midland public schools, is librarian for four elementary schools in Newburyport, Mass. She assumed her duties last September.

Mrs. Bauch is the first librarian the schools have ever had, though the facilities did have libraries. Volunteers staffed the libraries, while principals and teachers ordered books.

Mrs. Bauch, daughter of Mr. and Mrs. R.L. Stephenson, 1002 W. Tenn. Ave., also attended Odessa College before obtaining a master's degree in library science from Texas Woman's University at Denton.

Before relocating in Newburyport, Ms. Balch was librarian for a geographically large school district located north of Houston.

The former Texan likes her new home, but will have to get used to the differences in accents. She recounts the time a boy asked her is she had a book on "shocks." Thinking he meant shock absorbers, she said she wasn't sure. What the young man really wanted was a book on "sharks."

OLL.

CE

One of the things she misses most about Texas, she said, is the Lone Star State's abundance of Mexican food...

...A SCHOLARSHIP FUND honoring a Midland man has been established at Golden Gate Baptist Theological Seminary at Mill Valley, Calif.

The Copper Daugherty Scholarship Fund is named in honor of Copper Daugherty, 1508 Bedford Ave.

The anonymous donor said that Daugherty had helped support him or her through college and seminary.

The scholarship, according to Dr. William M. Pinson Jr., Seminary president, will be awarded to a student selected by the seminary's scholarship committee, with a special focus on qualified married students. The president said, "I think the Copper Daugherty Scholarship Fund is a very wonderful kind of tribute to a special person. We are truly in need of scholarship assistance and this moves us one step further in a positive direction..."

...CISCO JUNIOR COLLEGE fall semester Dean's List includes one student from Midland, Joel T. Bond...

## Cosmetic use can affect eye health

FOREST GROVE, Ore. (AP) — Women are concerned about the relationship of cosmetic use to eye health, especially if they wear or plan to wear contact lenses, say two women who have undertaken research on the problem.

The Pacific University College of Optometry students, Nancy Jones of Everett, Wash., and Amy Postma of Kapaa, Hawaii, who say no previous research on this topic has been reported, hope to publish a paper on their study in an optometry journal.

Because they wanted to use "virgin cosmetic wearers," they selected 15 male subjects. All are optometry students so they were sympathetic to the project, the researchers report.

Three brands of eye shadow and mascara were used -- water soluble, water non-soluble, and hypoallergenic. The male subjects wore the makeup on one eye at a time. The non-made-up eye was the control eye. They kept the makeup on a minimum of eight hours at a time.

of eight hours at a time.

One type of makeup was used for four days on one eye and then switched for a four-day period to the other eye. Then the subjects had five days off before starting on the next

#### **CULTURAL BRIEFS**

#### PAINTING ACQUIRED

LOS ANGELES (AP) — "Soap Bubbles," a composition by French 18th-century genre and still-life painter Jean Simeon Chardin, has been acquired for the Los Angeles County Museum of Art by the Ahmanson Foundation.

"Soap Bubbles" was painted in the late 1730s.

Director Emeritus Kenneth Donahue says, "This painting of a young man blowing a soap bubble rendered with an extraordinary intensity and simplicity enriches the scope of the museum's French collection by providing a counterpoint to the sumptuous decorations and playful pastoral scenes by Fragonard and Boucher"

The newest creation, weighing five tons, now stands in front of the Phoenix Art Museum here.

The sculpture is made from a 12-foot by 14-foot rectangle of plate steel. George Elliott, foreman in the Tygart steel plant, supervised the sculpture, being made from models created by California artist Betty Gold.

#### Volunteers honored by state PTA

Four Crockett Elementary School volunteers were honored recently when Principal Wilburn Buttery presented each a Texas Congress of Parent-Teacher life membership.

Among those chosen by the Crockett PTA was Buttery's wife, Jann, a reading specialist at Lee High School. Mrs. Buttery has given of her time and talent to assist with the school's Partners in Reading program during the past two years.

The other three recognized from Crockett's active volunteer program were: Mrs. Elia Ramirez, treasurer of the Crockett PTA; Mrs. Ruth Andrade, school secretary, and Mrs. Diane Collazo, a Crockett parent.

Mrs. Ramirez has been an active officer and committee chairman of the Crockett PTA for the past five years, while Mrs. Andrade has assisted in every PTA project the organization has undertaken in the seven years of her employment at Crockett, and Mrs. Collazo has completed 200 hours of outstanding service to Crockett, students this school year.

The Texas life membership award is the highest honor that can be conferred on a PTA member.

Margaretta Bolding and Chuck Hunnicutt of Houston, and Elizabeth Real of Kerrville, will present Friday the musical "With a Song In His Heart," a tribute to the late Richard Rodgers, for the Midland Country Club Ladies Association.

A social hour will begin at 11:30 a.m., followed by a noon luncheon and the musical presentation.

Rodgers, as part of the teams Rodgers and Hart and Rodgers and Hammerstein, has supplied America and the world with some of its most memorable music. Songs from "South Pacific," "The King and I,"
"Oklahoma", "Pal Joey" and many

or

Mr. and Mrs. Kim W. Long, Route 1, Stanton, are celebrating their 50th wedding anniversary with a reception from 2 to 4 p.m. Jan. 27 in the Cap Rock Electric Auditorium in Stanton. Hosts for the reception will be the five children and 14 grandchildren of the couple. The children are Mrs. Wayne Stroud and Mrs. Dovle Hale. both of Stanton, Mrs. Bobby Ballard and Kimmie J. Long, both of Big Spring, and Mrs. Julian McDonald of Abilene. The honorees, longtime residents of Martin and Howard Counties, also have 12 great-grandchildren. Mrs. Long is the former Vallie Shugart. The children and grandchildren request that friends join Mr. and Mrs. Long and their family in celebrating the special occasion.

hol abuser.

directly affects 61,480 family members.

The 10 million persons in 1978 generated a \$42 billion annual drain on the nation's economy because of lost production and increased employee benefits. Texas share was \$1 billion.

Today a new approach has been taken by the Texas Com-mission on Alcoholism, which can generate 60 to 80 percent recovery rates for employed problem drinkers, and at the same time save the employer money. This is called the Em-

ployee Assistance Program. Ray Plumlee, industrial pro-

grams consultant for the Odessa

office of the Texas Commission

on Alcohol, is one of only six consultants for the second lar-

The Employee Assistance

Program is administered through the Occupational Divi-

sion of the commission and, said

Plumlee, "is structured to save

the company money, while sav-ing the employee and his family

The central focus of the pro-

gram is the employee's job per-

formance and stresses that the

supervisor's responsibility is to

evaluate job performance, not

gest state in the union.

at the same time."

"Our criminal justice system is more aware

and more effective now than they have been

in a number of years in recognizing problems

of their clients. Texas is probably more active

than other states in this area," said Ray

Plumlee, certified alcoholism counselor for the

Odessa office of the Texas Commission on

acknowledges that management recognizes people may develop living problems and they need professional guidance to help them through the trying times," said Plumlee. Companies using the program instruct their supervisors to em-

"The policy statement

ploy a four-step plan:

-Observe job impairment as demonstrated by excessive absenteeism and decreased pro-

ductivity. -Document examples of deteriorating job performance. Confront the employee with

his inadequate work record.

-When advisable, refer the employee to the person or agency identified by company policy for evaluation and possible treatment and rehabilitation

One of the requirements of a successful employee assistance program is that management and labor should be mutually committed to and supportive of a program for all problem employees, said Plumlee.

It is also important that a responsible individual should be assigned to administer the program, that records are kept confidential and that a followup system should be initiated for both participants and the pro-

Companies using this program will find employees are better workers and more loyal after their difficulties are solved, said Plumlee.

"If you have a referred employee whose difficulties have been overcome, at that point, you have a higher functioning person and an extremely loyal employee.

According to the NIAAA (National Istitute of Alcohol and Alpercent of his annual wage.

structured programs, "the re-tention rate of referrals in their job will run between 70 and 85

## Can new process make anti-virus substance cheaps

BOSTON (AP) - By planting a human gene in common bacteria, scientists say they will be able to make cheap and plentiful quantities of interferon — a protein that someday may be a weapon against viruses and cancer, but now costs \$50,000 per

The new process should be able to churn out the promising natural substance in such quantities that it will cost "a dollar or two a shot," says Harvard University biologist Walter Gilbert. The main source of interferon now is the Finnish Red Cross, which extracts it from human blood, and enough to treat one person can cost as

much as \$50,000. Interferon is the body's natural defense against invasion by viruses and disease. Some researchers believe the substance may be the perfect weapon against viruses, since it seems to attack virtually all of them, but until now the protein has been so scarce that only a few experiments have

been conducted with it.

A Swiss research team has removed the human genz that controls the production of interferon and inserted it into the genetic material of bacteria. The result, they announced here Wednesday, is bacteria capable of turning out vast amounts of inter-

In previous tests, doctors have found that human-produced interferon will fight hepatitis, herpes virus terferon caused tumors to shrink in three patients who were suffering

from a cancer of the lymph system. Last June, Gilbert led a research team at Harvard that used recombinant DNA to harness bacteria to make a form of insulin.

The researchers said the development is the most dramatic result yet in the new biological field of recom-binant DNA technology. Scientists hope eventually to program bacteria to produce cheap quantities of many

infection of the eye and rubella virus infection in the newborn. A nasal spray made with the substance even appears to combat the common cold. At Stanford University, researchers fourfd prolonged use of inuseful substances, such as human in-

The latest research was conducted at the University of Zurich by a team headed by Charles Weissmann, direc-tor of the school's Institute of Molecular Biology. It was financed by Biogen

S.A., a firm set up two years ago to exploit the commercial potential of genetic engineering. "We regard this as a very significant advance in what has been accomplished in recombinant DNA technology," said Gilbert, chairman of Biogen.

Gilbert said each bacterium in the Swiss lab will produce two molecules of interferon. But he said researchers should be able to refine the bacteria so they will produce at least 1,000 times that amount.

Weissmann said his research team spliced the human interferon gene into the genetic structure of a common bacterium found in the human

According to Gilbert, the bacteriaproduced interferon appears to be

very similar to its human counterpart and was able to protect human cells growing in test tubes against invasion by viruses.

Within a year, he said, researchers hope to test the newly made substance on humans.

Other groups have also induced bacteria to make human insulin and two other useful hormones - somatostatin and human growth hormone. None of these has yet reached the marketplace as a usable human drug, although insulin produced by a San Francisco firm, Genentech, Inc., for the Eli Lilly drug firm is expected to be on the market within a year.

## **NEWCOMER'S** By MARILYN

Remember the old joke about the little boy asking his mother where he "came from" and after a lengthy, biological explanation, answered her, "Oh, I just wondered, 'cause Billy said he came from North Carolina." Well, many people have wondered where they came from long before Alex Haley wrote

DYER

The Mormon people do extensive geneological surveys and keep the results on microfilm at Salt Lake City. The aspiring candidates for membership to the D.A.R. have been tracing their ancestry hopefully - back to the Mayflower.

Nearly every family has an old Bible or photograph album which stirs the interest or imagination of some member of the family sometime, and soon

they're off on the research trip.

It seems that the more we move around the country the more necessary it seems to become to learn where our families originated. Of course, we eventually learn that the fact that we're even in this country is due to migration. Often it is because the Kaiser was conscripting young men into the German army and our ancestors were really draft dodgers.

Or they came here because of religious persecution in Europe and then set about persecuting the American Indians because their beliefs were different. Sometimes they came because the crops had failed and food was scarce and then a few generations later, we burn crops or pour milk onto the soil because the prices are too low. Oh, how much we can 22): If tempting offers seem learn about ourselves!

The generations who were born in this country reveal some famous relatives and some infamous relatives. Even the least of them are interesting and to maintain the equilibrium of people should be prepared to find a few skeletons in their family tree closet.

I like to read the names: Johannes, Catherina, Rebecca, Emaline, Samuel, Hannah, Abraham, Alfred, Augusta, Otto, Lademia, Benjamin, Oliver, Victoria and Craster. Also, the fact that Abraham those things at which you are married Sarah or that my grandfather was James Monroe - and his brother was George Washing-

The extra notations are fun too, such as "married an actress," or "civil war veteran" or "water well driller," or the prize notation, "walked with his family from Bern, Switzerland, to LeHavre, France, where his wife gave birth while waiting on a ship to the United States." (And I think it's a big deal to edible fruit move across the country.)

Besides being fun, tracing the family tree can reveal valuable information. Try to learn not only when ancestors died, but what caused their deaths. I've found lots of deaths are due to consumption, the flu epidemic of 1918, or in childbirth. Doctors are now telling us that family histories of cancer or heart trouble are very valuable to them in making a diagnosis. High incidences of blood problems, nerve disorders, bone or spinal weakness or deformities all build to make a patient "pedigree." We may not like to learn it, but it could save us time, suffering and

expense if we become seriously ill.

We can also incorporate those pictures in the album into the "tree" and make it really come alive. I would love to have known that sharp looking old lady named Polly who smoked a pipe or the fat, little red-haired man with the moustache and twinkly eyes named Charlie. That pair on the tintype whose names were Craster and Victoria - now there's a

### Conserving energy topic at Lion Tamers meeting

Energy conservation in the home was the program topic Wednesday at the meeting of the Lion Tamers Club in the Woman's Club Building.

Sara St. Clair, with Texas Electric Service Co., was the speaker. She stressed the importance of conserving energy and offered several suggestions for achieving same.

A color motion picture film, "Tighten Up," also was shown. It, too, cited and illustrated numerous

means of conserving energy in the home.

Mrs. Gary Hart introduced the speaker. Mrs. Art Oestmann, president, presided.

## Jaycee-ettes observe special week

Midland Jaycee-ettes will celebrate this week as Jaycee-ette Week in conjunction with National Jaycee Week.

Midland Jaycee-ettes formed in 1949 and presently has 32 members, who are wives to the Jaycee members. The Jaycees is a leadership training organization for young men only.

The Jaycee-ettes serve primarily as an aid to the Jaycees in service projects such as Super Kids Day, the annual Swim Meet at Alamo Pool and manning the local high school football concession stands.

All proceeds from the fundraisers go to service projects.

Jaycee-ettes also engage in projects of their own. They host parties monthly for the Mental Health and Mental Retardation Center. They donate to the Cerebral Palsy Center and the Permian Basin Shelter for Battered Women. And they annually hold a Starving Artist Sale.

Outstanding Jaycee-ettes were recognized at a meeting of the group in the Commercial Bank and Trust Community

Barbara Barnett was named Jaycee-ette of the Quarter for members over one year for her participation in the Jaycee Spook House Cake Walk, Christmas Tree Lighting project and Shopping Tour, and the Starving Artist Sale.

Connie Campbell was presented the Jaycee-ette of the Quarter award for members under one year for her input in the dress fund, Christmas Tree Lighting and Shopping Tour, and the Spook House Cake

Named Jaycee-ette for De-cember was Claudia Roye. She served as chairman of the Mental Health and Mental Retardation bingo socials and the Secret Sister program.

Newly elected officers are Judy Robinson, president, and Vicki Cupp, vice president.

As part of their special activi-ties of the week, they hosted a regional visitation night for area Jaycee-ettes. Purpose was to prepare for the upcoming Area I Jaycee convention in February. Serving as co-chairmen are Cathy Credicott and Vicki

Cupp.
Mrs. Credicott serves as liaison between the two organizations. Carla Grant is coordinating the skit, "Fudpucker Fracas," which will be performed at the convention.

The membership luncheon will be at Shakey's Pizza Parlor

at noon Friday. The next regular meeting is Feb. 5 at 7:30 p.m. in the Commercial Bank and Trust Community Room. Jaycee wives interested in attending should contact Connie Campbell at 694-

The meeting is scheduled to begin at 7:30 p.m. in Midland Memorial Hospital's medical staff conference room on the ground floor by Medical

Ms. Blaschke, employed in the post critical care unit at MMH, recently completed requirements for an MA degree in education at The University of Texas of the Permian Basin at Odessa. As part of the course, she wrote a "Diabetic Instruction Man-

## Native gives talk on Nepal

of Midland, a native of Kathmandu, Nepal, gave a lecture on his homeland at the January land branch, American Association of University

During his speech Sharma pointed out that Nepal lies between India and China and has about the area of the state of Florida. It's climate, on the whole, said Sharma, is much colder than that of the United States.

It has 21 of the 26 of the world's highest peaks, including Mt. Everest; but in some areas the altitude is so low it is tropical, he said.

'It (Nepal) is a very conservative Hindu country, with a political system patterned on that of Britain, but the King of Nepal has a little more power than the Queen of England has. Nepal has been able to maintain its independence and neutrality through the years because it is so mountainous and the army has such excellent mountain fighters that they have been victorious against invations.

"However, the people are gentle and spiritual and the crime rate is

Niranjam K. Sharma very low. The schools chairman; Mrs. Robert Midland, a native of now are co-educational Hannefin, vice chairand patterned after the man; Mrs. Geneva Ashton and Mrs. Dottie Mer-

## Housewives a natural at 'Musical Furniture'

By ERMA BOMBECK

There isn't a housewife in this world who does not like to play "Musical Furniture." It has to be the challenge of adding a table, subtracting a chair, rearranging a piano, or angling a sofa that adds a little spice to the daily, humdrum chores.

No one has to teach a woman how to play it. She's born knowing how. I know, even as a child, I found that by

moving my tricycle from the back porch where it was stored to the center of the living room, my Daddy could do three flips in mid-air, touch the ceiling with his knees, and end up in a reverse wishbone in the door-

Men do not appreciate the game. Maybe it's because they're not good at it. Bill Milligan in Fairport, N.Y., even put his feelings into a parody of "Home on the Range":

A home is so strange where the furniture roams Where the spouse wih the furniture

plays, Where seldom is heard a discourag-

ing word, And the shins grow more lumpy each day. How often at night do I stumble and

fight, With that chair rearranged yesterday, When loudly is heard that disparagAs I kick that chair out of my

My husband is not nearly as poetic about it as Bill. He is struck with the absurdity of the game. Why is it a woman cannot lift a grocery bag of garbage from beside the sink to the garbage can by the door—yet can move a 2,000-pound freezer from the utility room to the garage? How come a woman cannot maneuver a simple

yet can guide a piano through two doorways to come to rest in a niche by the bookcase?

The other night I said, "I bought new pillows today and you know what?"

He dropped his paper. "Tell me you're not going to play Musical Fur-niture again."

"You're right. I'm not going to play Musical Furniture. WE are! I want the sofa bed brought out of the den

because it matches the pillows, the living room sofa returned to the familiving room sofa returned to the family room and the two chairs to the spare room. The picture grouping over the sofa goes into the hallway while the bookcases wil have to go on the opposite wall which will, of course, necessitate moving the TV set and the antenna. Oh, and come with me into the bathroom. Do you know that tub has been in the same snot for that tub has been in the same spot for. 20 years?"

## Weddings

Mrs. Charles Chamberlin III

#### SIMMONS-CHAMBERLIN

Andra Kay Simmons and Charles (Chuck) Wellington Chamberlin III, both of Midland, exchanged wedding vows at 3 p.m. Saturday at the First Baptist Church Chapel in Midland with Dr. Roy Carley officiating. The bride is the daughter of Mrs.

Marvin Edgar Simmons of Denver City, and the late M.E. Simmons. Mr. and Mrs. Charles Chamberlin of Midland are the parents of the

bridegroom. Matron of honor was Kim Buckner, sister of the bride, of Winchester Bay. Oregon. Maid of honor was Susan Harrison of Colorado City. Debbie Haggerton of Colorado City, and Vickie Ham of Brownwood, served as

bridesmaids. Dr. Arlis Baze of Wylie was best man. Ushers were Rance Green and Bobby Watson, both of Midland. Groomsmen were Rick Green, cousin of the bridegroom, of Midland, Bruce Simmons, brother of the bride, of Denver City, and Mike Buckner, brother-in-law of the bride, of Win-

chester Bay. Following a wedding trip to San Angelo and San Antonio, the couple will reside in Midland.

Mrs. Henry Clay Atchison III

#### McADAMS-ATCHISON

VICTORIA - Cynthia Ann McAdams of Victoria, and Henry Clay Atchison III of Midland were married at 3 p.m. Saturday at Our Lady of Victory Catholic Church in Victoria with the Rev. Father Michael Harold and the Rev. Phil McLarty, cousin of the bridegroom of Sherman, officiat-

## Adult-only rentals get nay vote

LOS ANGELES (AP) - The Los Angeles City Council, voting on an issue one critic called "so mother and apple pie," has unanimously approved a draft ordinance nearly outlawing adult-only rental hous-

ing.
"Our children are our future," said Councilwo-mah Pat Russell, sponsor of the proposal. "If we drive them out of our city, we doom ourselves to a doubtful future."

The proposal faces final vote next week. A spokesman for Mrs. Russell said the vote Tuesday was the key vote.

The measure, which would prohibit discrimination in rental housing on the basis of age, carries fines of up to three times the normal monthly rent. The measure exempts non-profit or rent-subsidized buildings operated entirely for se-nior citizens.

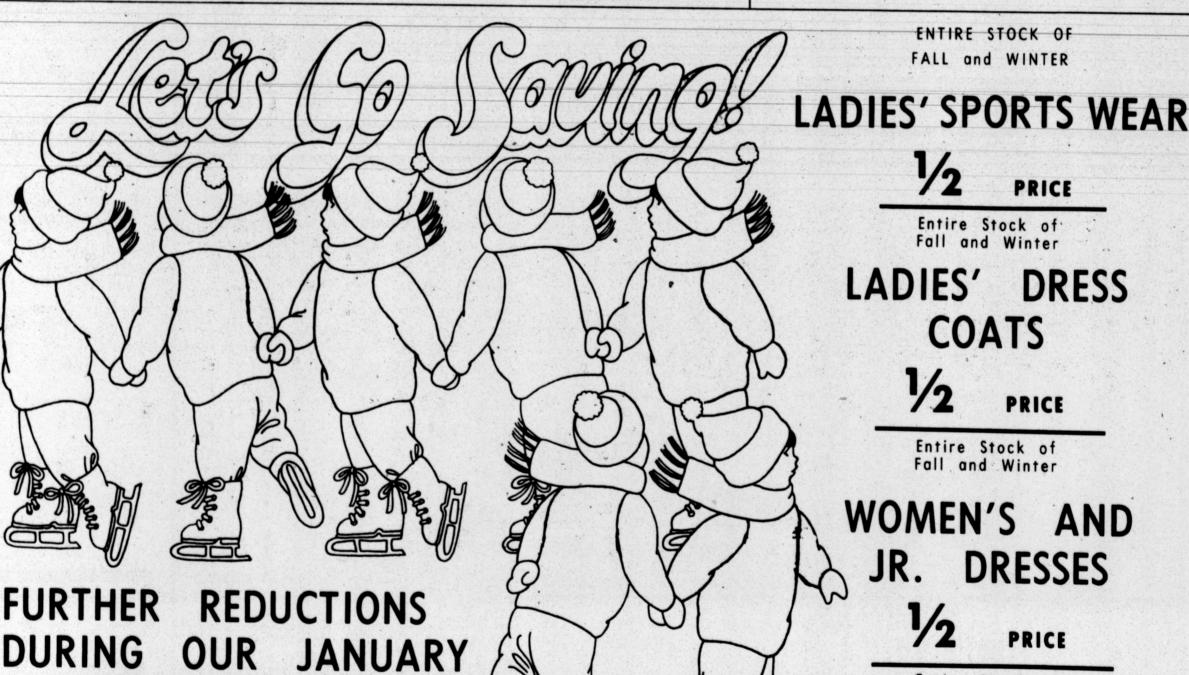

One critic of the measure, Mike O'Donnell of the Coalition of Apartment Associations, called the issue "so mother and apple pie" and asked "Who's going to vote against children?"

A similar measure sponsored by state Sen. David A. Roberti, D-Los Angeles, is due for a vote in the legis! re next

Ms. kussell, in arguing for the measure, cited a study released Monday that said 71 percent of the city's apart-ment units are off limits to families with children. The report said another 15 percent impose some limitations on child ten-

The study was con-ducted by the Fair Housing Project and funded by the San Franciscobased Rosenberg Foundation. Its findings were based on telephone sur-veys of residents of 902 units in nearly 850 apartment buildings throughout Los Angeles. There are 638,000 rental units in the city.

However, a spokesman for the Apartment Asso-ciation of Los Angeles, a major representative of landlords, said only 35 percent of the city's apartment buildings refuse to accept chilren as tenants, compared to the 71 percent cited in the

## Exxon official believes petrochemical industry's future attractive, bright

By MAX B. SKELTON

Associated Press Oil Writer

HOUSTON (AP) - When Ray B. Nesbitt discusses the future of petrochemicals he uses such words as positive, attractive, and bright.

The president of Exxon Chemical Co. USA says the industry, despite slower growth trends, will still be one of the most attractive areas for investment in the 1980s.

During the decade of the 1950s, he said, primary petrochemicals grew at an amazing average rate of 17 percent a year and the rate was still a hearty 13 percent in the 1960s.

"But in the past decade, the average growth rate dropped sharply to

STAMFORD, Conn. - Conoco Inc.

will continue to be a growth indus-

Nesbitt said primary petrochemicals afford a good measure of industry growth because they are the key starting materials, or building blocks, for the large majority of petrochemi-

Primary petrochemicals include such major basic chemical building blocks as ethylene, propylene, butadiene, benzene, toluene, and xylene.

Nesibtt said a forecast gross national product growth of 2.8 percent in the next decade is slightly lower than the 3 percent of the 1970s.

'This will have some dampening effect on petrochemicals growth," he

"But, by far, the major reason for the slowing growth rate is the maturing of the petrochemical industry as it saturates end markets and invents fewer entirely new products.'

Nesbitt said the chemical industry's good record for innovation is expected to continue and perhaps accelerate through increased real expenditures for research and develop-

"Recent heavy emphasis on process research will continue, and this portends further important breakthroughs in the technology of catalysis, adding to the spectacular successes in the 1970s," he said.

"These will benefit not only the companies making the breakthroughs, but the entire industry as it continues to out-innovate its competitors in the steel, aluminum, paper and glass industries.'

Nesbitt said research breakthroughs on the product side have been less impressive.

"A major challenge for research and development in the '80s will be to invent new products and find new product applications," he said. "I am optimistic that polymer re-

search in particular has much further potential for displacing traditional materials in the transportation and construction industries. The growing use of lightweight polymerics in automobiles and appliances are good examples. Overall, then, we see a slower but positive growth trend which will still make the petrochemical industry one of the most attractive

areas for investment in the 1980s. Nesbitt said soaring energy costs and shortages pose severe problems for the industry because petrochemicals use energy sources not only as fuel but also as raw materials.

"Yet petrochemicals, with their pervasive effect on our lifestyles in America, use only a little over 3 percent of U.S. energy as feedstock and another 2 percent in fuel for manufacturing processes," he said.

"In addition, petrochemicals are often less energy intensive over their entire life cycle than the products they replace.'

## Committee leaders forecast 'windfall tax' compromise

By JIM LUTHER

WASHINGTON (AP) - Leaders of a Senate-House conference committee are predicting final agreement next week on a compromise version of President Carter's proposed "windfall" tax on the oil industry.

If that forecast proves accurate, Congress could get the \$227 billion measure passed and sent to the White House by the end of the month.

Although no binding votes were taken Friday, aides said the way for such agreement was smoothed during a day of negotiations that included separate closed-door sessions by House and Senate conferees.

A key part of the final package, said Bernard Shapiro, staff chief of the Joint Committee on Taxation, probably will require the independent segment of the oil industry to pay a "windfall" tax over the 1980s of around \$25 billion.

The \$277 billion tax voted by the House last June would have imposed a \$57 billion burden on the independents, while the \$178 billion version adopted by the Senate in December would have cost them \$1 billion.

Another key part of the suggested compromise would result in a tax on newly discovered oil - included that yet to be found - of less than half the rate applied to other types of U.S.

'We made very significant progress in narrowing our differences," said Rep. Al Ullman, D-Ore., chairman of the House conferees. "I am very hopeful we will be able to conclude action Monday on the tax part" of the bill.

Sen. Russell B. Long, D-La., who heads the Senate conferees, agreed with that assessment, but noted that even after the tax is approved, the committee will have to determine how to spend the money.

Shapiro stressed to reporters that the lawmakers took no binding vote on how the tax would be spread among the various types of oil and between the major and independent segments of the industry.

Treatment of future discoveries and of all oil produced by independents are the two biggest items of controversy between House and Sen-

The conferees agreed before the Christmas holidays to peg the total tax take at \$227 billion, but put off deciding the structure of the tax. eciding the structure of the tax.
Although it often is called a "wind- to change

fall profits" tax, the measure is not directly on profits. President Carter proposed the new tax to take back part of the estimated \$1 trillion consumers will pay to the oil industry in the 1980s as a result of his action in removing price controls from U.S. crude oil. After existing federal and state taxes are deducted, the new tax would leave the oil industry with about 20 percent of that \$1 trillion windfall.

As outlined by Shapiro, the compromise tax bill likely will include these

## Huge heating cost jump due

WASHINGTON (AP) - It will cost homeowners 25 percent more next fall to heat and cool their homes than they paid last autumn, according to a pri-

That figure is part of an upward spiral that will mean homeowners

will pay an average of \$1,225 annually for heating and cooling, 53 percent higher than two years before. Last fall, homeowners paid \$1,000 a year and the year before it was \$800,

says the telephone survey of nearly 3,000 homeowners nationwide. The study, released Friday, was commissioned by Dow Chemical Co.,

a major manufacturer of insulation. The Consumer Federation of America criticized the survey for ignoring solar energy as a conservation step and concentrating on insulation.

But the survey revealed numerous homeowner attitudes about the cost of residential energy Residents of the Northeast, depen-

dent on expensive home heating oil, have been hardest hit. They expect their energy bills to rise 67 percent from 1978 to next fall But fleeing to Florida to escape

these costs may not pay. Last year, a typical Jacksonville, Fla., homeowner spent only \$90 less for residential energy than did a Bostonian because of steep air conditioning In the West, bills will rise 50 per-

cent, the study says.

The survey also says 79 percent of American homeowners have lowered thermostats to save money this winter; 55 percent installed weather stripping and caulking, and 51 percent lowered hot water tempera-

More expensive conservation measures have proved less popular, says

Only 21 percent of American homeowners added wall insulation; 31 percent have installed attic insulation, and 39 percent put up storm doors or windows.

The survey, estimated to have cost about \$50,000, was conducted last fall by Opinion Research Corp, before the latest round of price increases by the Organization of Petroleum Exporting Countries. The company does research for corporate and private

-The major oil companies would pay about \$202 billion of the \$227 billion total. The independents small and large companies that drill most of the nation's exploratory wells but generally leave development of the wells to the major firms - would pay up to \$25 billion.

Most oil discovered before 1979 and owned by the major oil companies would be taxed at the rate of 70 percent. That is, the government would take 70 cents out of each dollar of future price increase above a level of about \$12.80 per barrel.

main points:

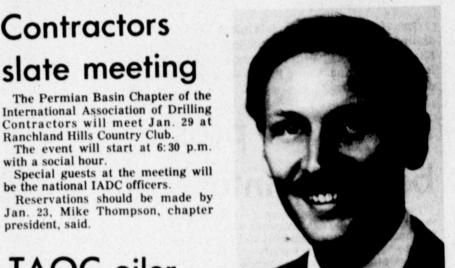

The event will start at 6:30 p.m.

-Pre-1979 discoveries owned by the

independents might be taxed at a rate of 50 percent. In exchange for that concession, however, the independents would lose the outright tax exemption, voted by the Senate, on the first 1,000 barrels of oil produced each

day.
Independents are individuals and companies that produce oil but don't refine or market it. That definition excludes all the familiar giant oil

-Oil yet to be discovered would be taxed at a rate no higher than 30 percent. This category of oil will account for nearly half of U.S. production by the late 1980s.

## **Geologists** meet Tuesday

The West Texas Geological Society will hold its luncheon meeting at 11: 30 a.m. Tuesday in the Midland Hilton.

The speaker will be Wayne R. Gibson, geologist with Earle M. Craig Corp. in Midland. He will speak on "Geology and History of Spraberry Sandstone Production in the Midland

Gibson received a bachelor's degree from Susquehanna University in 1968 and a master's degree in Geology from The University of Wisconsin (Milwaukee) in 1971.

He has been involved in West Texas petroleum exploration and development since 1971. He currently is serving as second vice president of

Reservations should be made by contacting 683-1573 by Monday noon.

## **Patterson** on program

The Midland Operations Study Group of the Permian Basin Section of the Society of Petroleum Engineers of AIME will meet at 11: 30 a.m. Monday in the American Legion Hall.

The speaker will be Kevin W. Patterson, a well stimulation research engineer with Chevron U.S.A. in La-Habra, Calif.

His topic will be "Downhole Corrosion Encountered in the Carbon Dioxide Flood at the SACROC Unit."

He is a graduate of the Colorado School of Mines with a B.S. Degree in Chemical and Refining Engineering. He joined Chevron in 1977 as a construction engineer at the Rangely Unit in Colorado.

He worked at the SACROC Unit from October 1977 to June 1979.

## Slight decrease shown in Permian Basin work

Drilling activity in the Permian Basin of West Texas and Southeast New Mexico showed a decrease of two units from the previous week, as Reed Rock Bit Co. reported 313 active rigs in the two-state area. The last count showed 315 rigs,

while a year ago at this time the Reed survey counted 255 rigs making hole. Lea County, N.M., reported an increase of five units as the survey ounted 43 operations. Eddy and Pecos counties each re-

ported 23 rigs. Eddy County decreased activity by five, while Pecos County reported an increase of two. Ward County was the scene of 16

units, an increase of two from the last Andrews and Upton counties each

reported 12 rigs going, with Andrews gaining one and Upton losing two from the previous week's tally. Crockett and Irion counties reported 11 units working. Crockett County decreased activity by one, while Irion

gained three units. Gaines, Hockley, Howard, Loving and Reagan counties each reported 10 rigs making hole.

## Mid-West pros bested winter

The coldest weather of the year is still to come, and then the hot West Texas summer will be on its way. The homeowner who makes his home more weatherworthy by installing energy-efficient windows through Mid-West Door & Window Company is not only assuring his family of more comfort, but is making good dollar sense, as well.

Energy-efficient windows — whether double-paned, insulating or well-fitted storm windows protect a building from either extreme of temperature. In cold weather, the furnace burns much less, and in summer, the air conditioner runs fewer hours. This naturally results in great savings in utility

The time for figuring income taxes is drawing near. Next year at this time, you can claim credit for your energy-efficient installations, as well as having a more comfortable year and a significant saving on

Mid-West Door & Window Company has full lines of aluminum doors and windows. Building a new house? Call for "SpaceGlass" windows by General Aluminum. This is an insulated window that eliminates the need for extra storm windows. These are available in white, bronze and mill finishes. Also, Mid-West is the distributor for Andersen Window Wall and Gliding doors and Republic Steel doors and

When you deal with an established, home-town firm, you have redress if adjustments are necessary. See Mid-West Door & Window, the professionals, for all door and window needs.

## Automobile sales improve somewhat

DETROIT (AP) - Auto sales by U.S. producers are a little better than expected, analysts say.

Thanks to a strong showing by General Motors Corp., the industry reported a sales decline for the first 10 days of the year of only 4.4 percent compared with the opening period of 1979. GM sales declined by

The five companies delivered 160,000 cars against 167,415 in the same part of last year, said reports

released Tuesday Elsewhere in the Big Three, sales at Ford Motor Co. fell 17 percent and at Chrysler Corp., 18 percent - performances typical of the dark days of last

Sales jumped an estimated 88 percent at small-car rising 0.2 percent in November. specialist American Motors Corp. and 64 percent for the Rabbit model built in Pennsylvania by Volkswagen of America.

'Some of the people who have been sitting on the sidelines are now returning to the marketplace," said Robert D. Burger, GM's vice president in

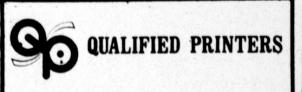

charge of the marketing staff. GM said its Buick and Oldsmobile divisions set

records for the period.

Ford said it detected an improvement from November and December, but Gordon B. Mackenzie, vice president for sales operations, said, "It's too early to call it a trend.

Two analysts agreed that sales were slightly better than expected, in light of December's 13 percent decline, but disagreed over the reason for GM's strength.

One analyst who declined to be quoted said some late-December sales did not get reported in time. He noted that GM's share of the market was only 57 percent in late December and 62 percent in early January, but averaged over the two periods, would be 59.4 percent, in line with what GM usually gets.

## **Qualified Printers has** computerized potential

Qualified Printers, located at 2803 N. Big Spring Street, has served Midland for 16 years. It is a family business, owned by the Rhodens, and their highly professional printing operation offers both today's technology and yesterday's craftsmanship.

Since 1964, when the business was formed, Qualified Printers has added qualified personnel and sophisticated machinery through the years to keep pace with Midland's growth. Their recently expanded typesetting capabilities have become almost unlimited through the acquisition of computer terminals. Publications, directories, accounting and business reports - any printed material - can be stored in the computer banks.

Four-color process printing is a spe-cialty of Qualified Printers. Anything from sales promotions to annual reports can be done professionally and effectively.

Office forms, letterheads and envelopes which can be sent out with pride are specialties at Qualified.

In the binder department, there is an automatic book stitcher which will modernize and upgrade their bindery production, giving them faster results with less spoilage.

To learn just how pleasant it is to do business with the people at Qualified Printers, 2803 N. Big Spring Street, bring in your specifications for the printing you need done, and they will gladly prove their professionalism to

Qualified Printers, 2803 N. Big Spring Street, is keeping up with today's trends by adding computerized typesetting equipment. Many new services are made possible by this new hardware, including an unlimited potential for information storage.

## Output of nation's factories rose .3 percent in December

WASHINGTON (AP) - Despite a sharp decline in auto industry production, the output of the nation's factories rose 0.3 percent in December, the

government reported today. The modest increase followed declines of 0.3 percent in November and 0.1

percent in October, according to the Federal Reserve Board. The December figure reinforced Commerce Department predictions that the U.S. economy probably grew at an annual rate of 2 percent to 3 percent in the

But the index in December stood at only 152.2. That is 52.2 percent ahead of its 1967 base of 100 but only 0.3 percent ahead of December 1978. Industrial production advanced during the first quarter of 1979, and then

fell somewhat, mainly as a result of strikes and motor vehicle fuel shortages,' the report said. "After a partial recovery, total production fluctuated slightly below the March high for the balance of the year."

The board said that "lack of further growth in total output was due in large part to a more than 20 percent decrease in the output of motor vehicles and U.S. automakers have cut back on production schedules after sluggish

summer and fall sales. Auto assemblies in December occurred at an annual rate of 6.8 million units,

or 6 percent below the 7.2 million rate of November. Assemblies had dropped 8 percent in November, Federal Reserve data showed.

"A further substantial decline in assemblies is currently scheduled for January," the report said. The report gave these breakdowns:

-Despite the decline in auto assemblies, the output of consumer goods rose

0.1 percent in December after falling 0.5 percent in November. -The 0.6 percent advance in December in production of non-durable consumer items, those with a usefulness of three years or less, outweighed a 1.1 percent decline in durable consumer goods.

-The production of business equipment rose 1 percent in December after -Production of construction supplies fell 0.4 percent last month after falling

0.1 percent in the preceding month. -Materials advanced 0.1 percent after dropping 0.5 percent in November.

#### Ford planning to build plastics plant in Berlin

DETROIT (AP) - Ford Motor Co. says it will build a \$70 million plastics plant in Berlin.

Ford's announcement Tuesday said the plant would produce components important in producing lighter, fuel-saving vehicles in Europe and would employ 700 workers.

The plant, to open in 1981, will be Ford's 25th in Europe. Though Ford has not had Berlin facilities recently, Ford President Philip Caldwell noted the company's German subsidiary was founded there and its first German car was produced there in

## U.S. industry preparing to fight new regulation

WASHINGTON (AP) - American industry is lining up for a fight over a new government regulation designed to increase worker protection from hundreds of potential cancer-causing chemicals found on the job.

Several industry groups are going to court to challenge the regulation, which the government hopes will speed up the lengthy process of identifying and regulating some 500 chemicals that may threaten the health of

hundreds of thousands of workers. The regulation, announced Wednesday by the Labor Department's Occupational Safety and Health Administration, would replace the current policy of regulating carcinogens on a slow case-by-case basis.

OSHA's administrator, Eula Bingham, estimated the new approach would enable the agency to establish worker exposure limits on about 10 chemicals a year, up from the current two per year.

A 1977 survey by the National Institute of Occupational Safety and

Health indicated that 1 million Americans may be exposed to known cancer-causing substances on the job. The government also estimates that between 20 percent and 40 percent of the nearly 400,000 cancer deaths each year are attributable to job-related

factors. The chemical industry, however, contends that only 1 percent to 5 percent of cancer cases are occupationally related.

Representatives of the chemical, petroleum and plastics industries complained Wednesday that the new regulation's method of identifying carcino-

gens is scientifically flawed, and that compliance could cost business billions

latory extremism" and "administrative overreaction. The American Petroleum Institute, contending that the government's cri-

teria for labeling a chemical as a carcinogen are too lax, said it has asked the U.S. Court of Appeals in New Orleans to review the regula-

The Society of the Plastics Industry and a group composed of industrial producers and users of chemicals said they would join in the appeal. Organized labor said it also would seek an appeals court review of

OSHA's action, but for different reasons George Taylor, director of the AFL-CIO's occupational safety and health settlement was that

department, praised the agency for the way it identifies hazardous chemi-But he complained that the agency removed from its original policy, pro-

posed two years ago, a requirement that mandatory worker exposure limits be established for any substance found to pose cancer risks. Borner refused to bid on Under the final policy, OSHA has the option of setting exposure limits. Midland School

#### case review AUSTIN, Texas (AP) An injured milkloader's \$100,000 judg-ment against Carnation Co.'s Houston plant will be reviewed by the Texas Supreme Court.

Milk-loader

hurt on job;

Court plans

The court Wednesday set oral arguments for

Willie Borner filed suit in 1975, claiming he was wrongfully discharged by the company.

A jury awarded Borner \$180,786 but the trial judge reduced the judgment to \$100,000, which was all Borner had sought. The 14th Court of Civil Appeals in Houston affirmed the trial court judgment.

Court records show Borner went to work for Carnation in 1955 and was discharged in August 1973.

He injured his shoulder twice — in October 1971 and in March 1973 when milk crates fell on him, and filed a claim for both injuries in 1973. Court records show he received a compromise settlement of \$7,500 in cash after a prehearing conference before the Industrial Accident Board.

Carnation discharged Borner two days after the settlement was reached, stating he was physically unable to perform his work. Borner's union, Team-

ster Local No. 949, filed a grievance against the company on Borner's be-Carnation said if

Borner could show with-

in a year he was physically able to do "heavy The U.S. Chamber of Commerce called the government policy "reguduty work" he could have his job back The appeals court said

the union took no further action on the grievance before Borner filed suit.

Carnation contends the effect of the 1973 cash Borner "had been permanently partially disabled by heavy lifting." Also, the company said, another job.

## Oil Industry Notes

CHICAGO, Ill. — Robert C. Johnson firm. has been appointed manager of engineering for Amoco Production Co. He was production manager of planning and economics.

Johnson joined the concern in 1966 as a petroleum engineer in Corpus Christi and other engineering assignments followed in Texas and Oklahoma. He was named assistant engineering manager for Amoco's Houston Division in 1976.

HOUSTON - Moran Brothers, Inc., has announced the addition of two persons to its North Belt Office staff in Houston and one addition to its Moran Drilling Corp. staff.

Joseph H. Cothen II joins the firm as a safety and training specialist for Moran Drilling.

Prior to joining Moran Drilling, Cothen was employed three years as a product training specialist with Varco International, Inc. He also worked for Sedco, Inc., two years in the North Sea and the Gulf of Mexico. Barry L. Brandt joined Moran Bros. as manager of management

information systems. Brandt joins Moran from Welltech, Inc. He was manager of information systems for that concern. He also has worked for Crutcher Resources Corp., Honeywell Information Systems, Inc., SCM and Global Industries.

Marvin E. Provost joined Moran Brothers as security manager. He is responsible for establishing security procedures for the protection of company and employee property of the entire Moran organization.

He previously was with the United States Postal Inspection Service.

HOUSTON - Ivan A. Stewart has joined Grant Geophysical Corp. as regional manager - Southeast Gulf Coast. Stewart has 10 years experience in the geophysical industry, having been most recently regional manager for Gulf Coast area operations for Seiscom Delta, Inc.

KANSAS CITY, Kan. - Olix Industries, Inc., headquartered in Midland, Tex., has announced that the board of directors of its subsidiary, Cramer Industries, Inc., of Kansas City, has appointed Norman Heying president of Cramer, succeeding Robert A. Stoll who will retire this year. Heying joins Cramer from Fixtures Manufacturing Co. of Kansas City where he served as vice president of sales and marketing. His business background includes experience with Westinghouse Corp. and Lawrence-Leiter As-

sociates, a management consulting

Olix is a Midland-based oil and gas company also engaged in the manufacture of business and institutional furniture through Cramer Indus-

WICHITA, Kan. - Tomlinson Oil Co., Inc., announced the election of Harold E. Harris as a director of the company and reported the promotions of Maurice L. Hollar to vice president - Finance, and Edward C. Hill to secretary-treasurer.

Harris replaces H. David Christian of Gonzales, Tex., who has resigned. Hollar was secretary-treasurer, and Hill was headquarters accoun-

DENVER, Colo. - Forest Oil Corp. has promoted Winstron R. Eddington from division engineer at Lafayette, La., to manager of engineering in the firm's operating headquarters in Denver. He has been with the company since 1962 and before that was employed by Gulf Oil Corp.

HOUSTON - C&K Petroleum, Inc., has promoted Del L. Wiegand to vice president in charge of the Northwest Venture and operations in the Rocky Mountain Area. He is located in Denver and has been with the company five years. He formerly was manager of the Rocky Mountain Division. He was with Marathon Oil Co. 25 years before joining C&K.

DENVER, Colo. - Lawrence E. Siegel has been named executive director of the Independent Petroleum Association of Mountain States, replacing Frank R. Lee, who resigned to become a Republican candidate for the U.S. Senate. Siegel was a goverment relations representative for the Independent Petroleum Association of America and resided in Washing-

HOUSTON, - National Supply Co. announced it will build a factory in Maracaibo, Venezuela, to produce fluid end parts for slush pumps. The investment will exceed \$6 million and is a joint financial venture with Venezuelan investors. Construction will begin early next year, and the plant is expected to be in operation by the end of 1980.

AUSTIN - The Farco Mining Co. of Texas has requested Railroad Commission authorization to conduct a surface mining operation to extract coal from a site in Webb County, 41 miles north of Laredo along FM

### Seminar set in Midland

Dr. Paul W. Newendorp, an educa-tor and consultant in the field of petroleum exploration and risk analysis. will conduct a seminar on "Petroleum Economics & Risk Analysis" at the Permian Basin Graduate Center in Midland Jan. 28-29.

The seminar is being held in cooperation with the American Association of Petroleum Geologists. It will meet from 8: 45 to 4: 30 p.m. each day.

The course will cover the various profitability criteria used by the oil industry to assess the value of drilling prospects. How to analyze complex, sequential decisions using decision tree analysis will be included.

Dr. Newendorp, who is associated with John M. Campbell Co., has more than 10 years teaching experience. He was with a major oil company nine years before joining Campbell.

He has presented more than 50 twoweek courses on exploration risk analysis in the U.S. and in England, Norway, France, The Netherlands, Italy, Libya, Iran, Singapore, Indonesia and Australia. Fee for the course is \$250.

### Wainoco well opens oil pool

HOUSTON - Wainoco Oil Corp. announced an oil discovery in central

Alberta, Canada. The Wainoco well 16-31-45-3-W5M. drilled on its Towne Lake prospect 48 miles southwest of Edmonton, flowed 255 barrels of oil per day on test through a 14/64-inch choke with 600 p.s.i. tubing pressure.

Supervisory and technical person-nel at Dawson Geophysical Co. recently attended a one-day seminar on the outlook of the geophysical contracting profession.

Guest speakers included Dr. Milton B. Dobrin, in charge of the geophysics program at the University of Houston; Arthur H. Dinsmoor, district manager of Marshall R. Young Oil Co. of Midland; James A. Porter, Jr., president of Litton Resources Systems, Inc. of Houston; John N. Botkin, consulting geophysist of Tulsa, Oklahoma; Charles F. Darden, president of the International Association of Geophysical Contractors; and Douglas W. Graham, vice president and personnel director, The First National Bank of Midland.

L. Decker Dawson, president of Dawson Geophysical, is the incoming chairman of the IAGC, and arranged the program

At the annual stockholders' meeting following the seminar, officers and directors of the company were re-elected. They include Dawson, president and director; Calvin J. Clements, vice president and director; Red Foster, vice president and director; Floyd B. Graham, vice president and director; Howell W. Pardue, vice president and director; Burnis R. Lambert, secretary; and

Dee C. Weston, treasurer. During a luncheon address at the Midland Hilton, IAGC president Darden told the Dawson group that geophysical contractors must take a leadership role in opposing unnecessary government regulation at national, state, and local levels. He pointed out that major oil companies are more preoccupied with resisting the so-called windfall profits (excise) tax and divestiture of subsidiary op-

"We've seen an awful lot of federal rules dumped on us that we thought could never become law," Darden stated. He cited a Department of Transportation edict which requires drivers of offroad vibrator units to meet the same qualifications as moving van drivers.

Other areas of regulation creating industry problems include OSHA's rules on the use and storage of explosives, and the shortening of notification time in certain accident cases from 24 hours to eight hours

Archeological studies which may be planned at an undetermined future date can conceivably hold up seismic

Darden added, "Those kinds of rules and red tape and eating our

lunch. Now we must evaluate the cost of these regulations. Some jobs have been cancelled because of senseless rules.

He stated that the IAGC membership should oppose some of the federal and state agencies on a "cease and desist" basis.

Darden also called for more careful operations by seismic recording crews. He urged scrupulous adherance to local and state permit requirements and the notification of appropriate government officials of plans for work. He stressed that crews be informed of any restrictions, and that permit restrictions be put in writing for the benefit of landowners and crews.

"We should treat the landowner's property as if it were out own, and insure proper clean-up and restora-tion," Darden added.

During the management seminar participants received a presentation on latest developments in seismic recording devices and data processing systems, including Litton's LRS-3200

computer. Guest speakers evaluated Dawson Geophysical from their particular vantage point.

Graham outlined a training program entitled "Role of the Supervisor" for Dawson mid-management personnel

## Discovery completes

HOUSTON - Conoco Inc. has announced a natural gas and condensate discovery well in Southwest Oklahoma with a calculated open flow potential of 21.3 million cubic feet of gas per day with 24 barrels of condensate per million cubic feet.

The well, No. 1-A Snider, is located in Custer County, near Clinton, Okla., and is wholly-owned by Conoco.

The open flow rate was based on a 24-hour test from the Red Fork formation perforated at three intervals ranging from 12,474 feet to 12,541

On test, the well flowed 7.6 million cubic feet of gas and 182 barrels of condensate through a 12/64-inch choke. Gravity of the condensate was 46 degrees, and the flowing tubing pressure was 6,750 pounds per square

Total depth is 17,000 feet and plugged back to 14,178 feet prior to testing.

## **IRA and KEOGH Retirement Plans** at First Savings are the sure way to build for a secure retirement, and get a tax break at the same time.

With an Individual Retirement Account (IRA) at First Savings you can save for the future at the impressive rate of 8% (effective annual yield 8.33%). Deduct whatever you save - up to \$1500 - from your gross income. And defer every penny in taxes on your IRA until you withdraw it, normally after retiring. Then, you'll probably have less income and possibly be in a lower tax bracket. (NOTE: There are severe penalties for early withdrawals.)

Here's an example of what an IRA can do for you. If you start an IRA at age 30, and deposit the maximum of \$1500 per year until age 65, at the current interest rate, your IRA will be worth over \$300,000. That's a tidy sum to start retirement, if you want to retire that young. By the way, your IRA is in addition to standard social security benefits. But remember, the deadline is the date your tax return is due in order to get your full tax deduction.

A Keogh Plan works much the same as an IRA except that it is designed for the self-employed individual, whereas the IRA is designed for the individual not covered by a pension or retirement plan. A Keogh Plan permits an annual deposit of up to \$7500. With a Keogh Plan, you get the same tax advantages and interest rate as an IRA. However, the deadline for starting a Keogh is December the 31st, and you can make your final deposit on the day you file your taxes.

So stop by the First Savings offices downtown or San Miguel Square and let the "FISCAL FITNESS PEOPLE" show you the sure way to save for your retirement. It's getting later than you think . . .

## This specialist is now helping cut insurance costs for oilmen in the Midland-Odessa area

Ron McFadden was born and raised in this area. He graduated from Midland High School in 1949 and with Honors from North Texas State in 1957. He has done graduate work at Southern Methodist and brings a decade of insurance experience to his work for John L. Wortham & Son.

Ron McFadden has joined John L. Wortham & Son. He is now part of the team of specialists helping oil men save money and preserve capital by proper application of insurance.

If you would like to explore ideas, call Ron. He knows this area. He knows the oil business. He knows the insurance business. He's at 1502 First National Bank in Midland. Call 683-9505.

headed by John Hervey. Backed by our entire organization, they help men like Ron help each client to get the most from carefully formulated insurance programs.

Ron can help you to:

- · Tailor-make coverage to fit your specific risk
- Market your insurance to your best cost advantage
- Use self-insurance and deductibles to your benefit
- · Design a safety engineering program to help control losses
- Take advantage of cash-flow studies and opportunities
- Use custom-fit loss records to help you analyze and control.

at \$1.9 billion

Phillips Petroleum Co. has approved a capital budget of \$1.9 billion covering projects planned for authorization in 1980, W.F. Martin, chairman and chief executive officer, announced.

"This is the largest capital budget in the company's history and is 36 percent greater than the 1979 budget approved a year ago," Martin said.

"Our strong earings performance is allowing us to expand substantially our expenditures to increase energy supplies," Martin said. "Nearly 90 percent of the total budget is directed toward energy-related projects, with the balance earmarked for the company's chemical business.

About 60 percent of the budget, or \$1.1 billion, covers energy-related projects in the United States. These projects include petroleum exploration and development, refinery and pipelines modernizations and expansions, as well as projects aimed at developing the company's reserves of coal, uranium and other energy resources, Martin said.

The company also has authorized a 1980 program to acquire up to 2.25 million shares of Phillips stock. with future use expected to be primarily for meeting the requirements of existing employee benefit plans. The stock will be acquired through purchasses from time to time on the exchanges or in private transac

## Harried trader says bullion market gone absolutely nuts

By KRISTIN GOFF **AP Business Writer** 

NEW YORK (AP) - Analysts have long since stopped talking about such economic fundamentals as inflation and loss of confidence in the dollar when explaining what's happening to

The bullion market is "absolutely nuts," commented one harried trader as the price of a troy ounce of gold leap-frogged past \$800 only two days after it broke the \$700-an-ounce bar-

"They have predicted the death of the world 10 times over," said another, alluding to political and economic fears arising out of turmoil in the oil-rich area of Middle East.

While such statements in the heat of trading exaggerate the situation, the latest rush to gold does appear to have its underpinnings in a crisis atmosphere that has developed since

### Ramcon sets mark

ODESSA - Despite tight mortgage money and rumor of recession, Ramcon's Midland-Odessa offices broke all previous sales records during the month of December.

While recording 30 sales for a total sales volume of 1,546,090.00 this according to marketing director Harry

Hilgers sited the bond money as the primary reason for the healthy sales. As well as other innovative financing plans utilized by Ramcon to lower dramatically the montly payments.

President Scott Moore described the Midland-Odessa Market as "somewhat unique" as contrasted with other areas in the state. "Our other offices in Abilene and Austin although healthy have not enjoyed the booming growth of our home base".

"Moore attributes Midland-Odessas growth to the somewhat questionalbe dichotomy of the O.P.E.C. crisis and the resulted growth created on the domestic front', according to

Ramcon will start 200 new homes in the Odessa-Midland area during the coming year.

Iranians took hostages at the U.S. embassy in Tehran Nov. 4.

More recently, the Soviet invasion of Afghanistan and the fear in the West that the Soviets may attempt to flex their muscles elsewhere in the Persian Gulf region and Yugoslavia have added enormously to international tension.

Analysts argue, that the rapid increase in the price of gold, is a barometer of that tension. In the Middle East it appears that many people are

## **BUSINESS NEWS**

moving their assets into gold, a traditional haven in times of war and political unrest.

While Americans and Europeans, for instance, don't face the same direct threat of governmental upheaval, gold's big price jumps along with the U.S.-Soviet confrontation over Afghanistan have had a snowballing effect among buyers in countries around the world, analysts say.

Forecasting price movements of gold is even more difficult than predicting next year's inflation. On both accounts economists were wildly wrong last year. Even the most enthusiastic gold bugs did not envision gold's startling price jump.

It took a full year — from July 1978 to July 1979 — for gold's price to rise from \$200 to \$300 an ounce. But the price has spiralled since then.

and alterations were issued last week by the city inspections department. Leading this week's total was Clark

Development Company with \$2,100,-000 for a construction project at 340 N. Eleven permits were issued for res-

idential improvements, remodeling and additions in Midland which totaled \$86,350. Gilbert Bates Construction Co. was

issued two permits totaling \$130,000 for new residence construction at 2305 Kentucky Ave. (\$65,000) and 2307 Kentucky Ave. (\$65,000). Two permits totaling \$120,000 were issued to Harvey Langston for new housing construction at 2402 Castleford Road (\$60,000) and 2404 Castleford Road (\$60,000). D.D.H. Construction Inc. was issued a new residence permit for \$50,000 at 3908 Bedford Dr.

#### United General: 6 years old and still growing thanks to you!

We started on December 15, 1973 insuring 49 companies. Now we insure over 600. Premiums written have also grown ... from about \$300,000 in 1973 to an estimated \$20,000,000 in 1979.

There must be a reason. In fact, we think there are really five:

☐ Low rates — We pioneered reasonable rates back in 1973, and kept them at the same level for over five years. Today we're still working hard to maintain one of the most competitive rate structures in the industry.

☐ Fast and fair claims service — We keep your hours, not the 8 to 5 routine of the typical insurance company. So, if you need us, just call our nearest branch ... day or night. If necessary, we'll have a man there within 24 hours. And, we fight the fraudulent claimant.

☐ Loss control expertise — We hire people with practical oilfield experience and teach them insurance, not vice plans and other employee benefits.

versa. We also have the highest ratio of engineers per premium dollar of any insurance company in the patch. So count on expert advice, fair appraisals and speedy repairs.

☐ Convenience — Stop wasting time with far-off home offices or underwriters who don't understand the oil business. We have our own claims and loss control staffs right here in Midland where you need them.

☐ Complete coverage — You name it. Rig or equipment insurance. Workers' Comp. Auto. Contractual and general liability. Even group insurance, pension

If you're already insured by us, thanks for your business. If not, think about joining us. After all, where else can you have your cake and eat it, too?

To find out how good it is; just call Dave Wassenberg, Ron Stroman or Mike

#### ARC OF INSTABILITY

## U.S. scrambles wildly to build more influence

EDITOR'S NOTE — This last part of a five—part series — "Arc of Instability"— looks at how the United States is seeking to maintain its influence in the Persian Gulf region.

#### By BARRY SCHWEID

WASHINGTON AP) - The United States, stripped of the comfortable notion that it could depend on a local "policeman" to guard its considerable interests in the Persian Gulf, is scrambling to maintain American influence in the oil-rich region.

Faced with the revolutionary loss of Iran and the Soviet intervention in Afghanistan, the Carter administration is attempting to establish a new alignment of pro-Western governments, focusing on strengthened ties with Egypt and Pakistan, an old relationship with Saudi Arabia and new bonds with

President Carter is redrafting U.S. military strategy, with the emphasis on establishing new bases in

#### Fifth in a series

the region, expanding existing facilities and setting up a large, mobile combat force that could be rapidly deployed to the area.

The diplomatic and military realignments began after the Iranian revolution eliminated the government upon which the United States relied for military might in the Persian Gulf.

While the Iranian lesson was sinking in, the Soviet Union sent thousands of troops into Afghanistan, taking advantage of the U.S. distraction with Iran.

WITH THE INCURSION, the Russians proved a sobering point: Strategically, the United States is largely incapable of countering Soviet power in the Gulf despite a decade of lining up friends and plying them with billions of dollars worth of American jets, missiles, tanks and other arms.

Zbigniew Brzezinski, the U.S. national security adviser, acknowledges "the fragility of the re-

That is why, he told The Associated Press, Carter is reinforcing "our political relationships and military presences, thereby enhancing the security of friendly states.

Said Brzezinski: "All concerned should know one central fact: This region is of vital importance to the United States and American power is available to

THUS, THE SOVIET intervention is seen in Washington as a watershed event in the geopolitics of the Gulf and one immutable fact dominates U.S. foreign policy in the area: So long as Americans maintain their love affair with the automobile, the United States must try to shape events there.

The Soviet move in Afghanistan complicates the U.S. task, transforming an already tense region into the center ring for East-West confrontation and providing a potential for open conflict.

The Soviet power play, reviving a historic southward push toward the Iranian oil fields and Arabian sea ports, raises new U.S. concerns about Western oil supplies. Through the Strait of Hormuz, gateway to the gulf, passes 60 percent of the Western world's foreign oil purchases.

Guarding this vital lifeline: tiny Oman's 17-ship

THUS, THE UNITED STATES is seeking new military bases in the region. A Pentagon-State Department team has surveyed prospects in Oman, Somalia and Kenya, and technical experts will return later this month to see to if existing facilities can be put to use.

If the Soviet intervention weren't unsettling enough, last year's political revolution in Iran has swept away one of the principal U.S. security buffers in the area. At the same time, there are private fears in Washington that the quiet, technical revolution in Saudi Arabia could make that pro-Western kingdom less reliable.

Forced to redefine its role, the United States finds itself with a limited number of dependable allies. Israel and Egypt are the most prominent and, according to experts, have the best armies in the Middle East.

But there is no Gulf "policeman" to guard U.S. interests, as Iran was supposed to do with \$21 billion in American weaponry. Saudi Arabia is neither capable nor interested in assuming that mission.

"THEY DON'T HAVE the population base, they don't have the inclination to be a major regional military power," William Quandt, scholar and strategist, said in a recent interview. "To somehow think of propping up the Saudis to play the role we had at one time envisaged for Iran is crazy."

Over the last 25 years, Saudi Arabia has bought \$25

billion in American arms. A new officer corps is being developed along with the technocrats who were educated in the West to handle oil-bought technology

Quandt, top Mideast specialist at the National Security Council until last summer, is concerned that this process is "creating an institution which has the capability to seize power.

People may not have the motiviation to do it, they may not want to, they may be perfectly loyal," he said. 'But for the first time you have an institution in the society with the capacity really to take power...

"WHAT THE SPARK might be, what the griev-ance might be, what the issue might be, which would drive some young officers to decide that the time has come, is hard to say. It may not happen for a long time. But simply creating that capability has to be a cause for concern."

James Schlesinger, who has been both secretary of Defense and of Energy, says, "The consequences of the disruption of Saudi Arabia would be so catastrophic for the United States and the Western world that we have been reluctant to look at it as a lively possibility." Yet, Schlesinger says, "the instability of Saudi Arabia would be an even greater catastrophe for the United States than the fall of the shah (of Iran) has proved to be.

America's strategic stake in the Persian Gulf stems from Britain's decision a decade ago to abandon all military commitments "East of Suez" and the growing U.S. dependence on imported oil.

The problem facing the Nixon administration in the early 1970s was how the United States should take over for the British.

ONE THEORY HOLDS that because the Vietnam war was so unpopular, a surrogate military force had to be found. This was principally Iran under the shah and, to a lesser extent, Saudi Arabia. Both hac immense oil reserves and fertile markets for American oil firms, manufacturers and bankers.

A related theory, held by a former Central Intelli gence Agency operator who asks not to be identified is that the Nixon administration promoted a military

## U.S. scrambles for influence

(Continued from Page 6G)

buildup in the Gulf region to offset weakness in Western Europe.

In any event, in one year alone, from 1972 to 1973, the United States boosted arms sales to Iran by more than \$1.7 billion, to \$2.2 billion.

Entering office in 1977, Carter embraced the shah and the Saudi royal family, even while pledging to reduce American arms sales abroad. In a dinner toast that year, Carter said, "If there

was ever a country which has blossomed forth under enlightened leadership it would be the ancient empire of Persia, whish is now the country of Iran. WE LOOK UPON IRAN as a very stabilling force

in the world at large. We are bound together with unbreakable ties. Our military alliance is unshake-The revolution in Iran loosened those ties with a vengeance. One of the first acts of the Khomeini regime was to cancel \$12 billion in U.S. arms contracts. Still, Iran is considered so important strategically that Carter continued diplomatic relations even after Americans were taken hostage

at the U.S. embassy in Tehran. Although defiantly anti-American, the Iranian regime is not pro-Soviet. Some administration officials hope the intervention of neighboring Afghanistan will shock the ruling Moslem clergy in Iran into a renewed, if modest, friendship with the United

The pessimistic view of the region is that the Soviet influence is gaining, with the intervention of Afghanistan only the latest in a series of provocative

Working along the periphery, the Russians have acquired strong political and military positions in Ethiopia, on the Horn of Africa, in Aden and South Yemen, and now are fighting to impose a puppet regime in Afghanistan.

THEY ALSO HAVE access to key ports in Syria and Iraq, although neither country has moved fully into the Soviet orbit.

The United States, meanwhile, has lost influence over the last several years in Iran, Ethiopia, and to some extent, Saudi Arabia and Jordan. It has gained ground in Somalia, while Egypt and Israel are

Trying to block the Soviet advance, President Carter is planning to ask Congress to allow a re-sumption in arms aid to Pakistan despite a disturbing nuclear policy.

Brzezinski, the presidential adviser who coined the phrase "arc of instability" in late 1978 to describe the region, compares the plight of the countries along the Indian Ocean to Western Europe in the 1950s and Asia in the 1960s and 1970s.

"Their internal fragility, social and political, could interact with the projection of Soviet power, and that together could create a problem as acute as the one that we faced even in the '50s and '60s, especially because of oil," he said.

#### TAX TIPS

## Taxpayers have choice of forms

EDITOR'S NOTE: This is the third in a series of tax tip articles provided by the Permian Basin Chapter of the Texas Society of Certified Public Ac-

When it comes time to file income tax returns this year, the taxpayer does have a choice in regard to which form he or she decides to use. The two choices include Form 1040 or Form 1040A.

Form 1040A is the easy form, designed for taxpayers whose income results from standard sources such as salaries, wages and tips. It is also for use by taxpayers who do not itemize deductions and who do not claim credits or adjustments to their in-

Form 1040, however, with its assortment of sched-

ules and forms, is for everyone else.

Taxpayers will be happy to learn that this year's tax forms are basically the same as last year's. There are a few minor changes for the sake of simplification.

Depending upon individual circumstances, the tax-payer should choose the form which will be easy to complete and which is right for him or her. This year, Form 1040A will accommodate taxpayers whose income is \$40,000 for a couple filing jointly or \$20,000 for singles and married persons filing se-

An exception to these income limits concerns interest and dividend income. If either exceed \$400, Form 1040 accompanied by Schedule B should be used listing the sources of income, no matter what total income may be.

Regardless of which form taxpayers use, items will be laid out sequentially to facilitate easy compo-

These and other questions concerning your 1979 tax return will be answered in the Taxpayer Education program. This public service course, sponsored by the Permian Basin Chapter of the Texas Society of Certified Public Accountants and the Internal Revenue Service will be offered Feb. 5 and 7 from 7 to 10 p.m. at the Allison Fine Arts Building at Midland College and at Wilkerson Hall, Room 105, Odessa College.

Odessa College.

To register for the program, send your name, address and location preference to Taxpayer Education, Box 870, Midland 79702. Registration fee is \$1 per person or \$1.50 per couple. Mailing deadline is Feb. 1. You may also pick up registration forms at the Administration Building, Room 156, Midland

## Another record year

Last year about this time The Reporter-Telegram published its annual Permorama edition, detailing all the fantastic, recordsetting growth of 1978.

Now comes the 1980 edition of Permorama and 1978's records have been shattered once again. Midland truly is on the grow, and looks forward to a spectacular

In last year's edition, we told you how the city had experienced "one of the greatest years ever, continuing the fast and furious pace set in previous years." We told you how bank deposits were at record levels, how building permits had surpassed the previous year's figures by some \$20 million, how the city's face was changing and business and industry were booming.

It was all true and now, in this year's edition, we are pleased to be able to report that Midland's progress during 1979 far surpassed the record-setting levels of 1978 in almost all areas.

During the past year Midlanders witnessed a change in the city's "face" that was so rapid and so far-reaching as to boggle the imagination.

Massive new buildings were constructed almost overnight, it seemed, in the downtown area and elsewhere in the city major new shopping centers began to grow. Midland Park Mall, a major enclosed facility at the intersection of Midkiff Road and FM 868, was developing at a rapid rate as this year's edition went to press. Just across Midkiff Road, Magnatex Corporation's Midkiff Plaza is under construction.

Throughout the city in '79 other businesses and industries were started and expanded.

Financially, 1979 was a "boom" year for Midland. Two new banks - Metro Bank and Texas National Bank - were started. But that certainly wasn't the only news from the financial community of Midland last year.

Deposits in all the city's banks last year grew tremendously, exceeding the \$1 billion mark at year-end. In all, the deposits figure was up \$196,393,780 from the 1978 year-end figure and loans and discounts jumped to \$675,150,575 - up more than \$143 million from the previous year.

It would be presumptuous to attempt here to detail all the areas of phenomenal growth in the city during 1979; that's the purpose of

the Permorama sections con-

WASHINGTON - The term "oil

consumption" usually makes us think

of that noble fluid being burned in our

cars or furnaces, and not of its petro-

chemical use. But oil put to petro-

chemical application means a quan-

tum jump in value added. The oil

producing nations know this and act

This truth was brought home to me

recently when I read an ad listing

more than 300 products (there are

thousands more) made from petro-

chemicals. Egads, aspirin, hair-

spray, laxatives, brassieres, over-

coats, deodorant, footballs, hearing

aids, antifreeze, antibiotics, mini-

skirts, mascara and dentures - all

More? Well, there's toothpaste, lip-

stick, toilet seats, panties, plastic

wood, soft contact lenses, thermal

blankets, shampoo, shaving cream,

epoxy glue, bikinis, eye shadow, fake

According to Union Carbide, 4.5

percent of all oil and gas consumed in

the U.S. goes for these petrochemical

products, and the proportion is in-

creasing. Some 413,000 people work in

the petrochemical industry, and 40

percent of our economic activity is

Indeed, we may wake up one day

and learn that the oil producing na-

tions turned stingy in apportioning oil

for burning, and decided to devote

more to petrochemicals. Why feed

mountain trout to cats or make fire-

No ope understands this better than

petrochemical-related.

wood of mahogany?

furs and swizzle sticks. Enough?

are made from oil and natural gas.

accordingly

NICK THIMMESCH

tained in today's edition.

Let it be enough to say that in 1979 the Permian Basin continued to ride the crest of the oil and gas industry, the lifeblood of this region. In that industry discoveries again exceeded the previous

Although the nation's economy is tightening up elsewhere, Midland's economy continues to be strong, boasting one of the lowest unemployment rates of any community in the state or nation.

Midland has a lot going for it financial solidity, a strong business base, a pleasant climate and hard-working, friendly people. With a formula like that, Mid-

land can't keep from succeeding.

#### Column opinions not always ours

Writers whose columns appear on this page are selected on the basis of their reputations, their philosophies and their writing skill...but opinions expressed in their columns are not necessarily shared by The Reporter-Telegram.

On the contrary, the editorial opinion of the newspaper and positions taken by columnists often differ greatly

Opinions of The Reporter-Telegram are restricted to our own editorials which appear daily on the left side of the page.

Readers whose views differ from our own editorials or those columnists whose writings appear on this page are invited to express their opinions in our 'Letters to the Editor' column which appears on Sundays.

#### HE SAID HE COULD WALK ON WATER

**WASHINGTON MERRY-GO-ROUND** 

## Carter drawing fire from critics

By JACK ANDERSON

WASHINGTON - Jimmy Carter's wavering, waffling response to the Iranian hostage situation and the Soviet invasion of Afghanistan has drawn increasing fire from his frustrated opponents for the presidency. Cowed by the possibility that criticism will sound unpatriotic in a crisis, they nevertheless have the feeling that to say nothing about Carter's uncertain management of foreign policy is, in the long run, the less patriotic choice to take.

As the hostage predicament drags into seeming infinity, and the Afghanistan outrage draws little more than rhetorical tsk-tsks from the White House, the critics are coming to realize that what was first seen as admirable restraint by the president may in fact be the symptom of a basic flaw in Carter's handling of foreign affairs.

The president is big on pious platitudes, but short on the kind of direct reaction that the Iranians and the Soviets would understand and respect. Carter, it is now clear, is no Harry Truman or even Dwight Eisenhower, both of whom were willing to use U.S. muscle in a way that would stop the Russians - much less the Iranians - dead in their tracks.

What is generally overlooked by the American public is the fact that Jimmy Carter's foreign policy has always reflected his pusillanimous tendencies when dealing with hardnosed street fighters on the international scene. Unfortunately, the president's hesitancy in earlier, less drastic situations was not overlooked by Ayatollah Ruhollah Khomeini or the

velopment program, jointly funded and run by the Saudi and U.S. govern-

ments, is already taking physical

form. Martin-Marietta Co. recently

tem will be completed in mid 1981.

tough, practical politicians in the

They observed Carter's wishywashy performance in relative minicrises of recent years and decided that he was someone who could be pushed around

Just such an opportunity to watch Carter in action - or, more accuratey, in inaction - occurred last year in Rhodesia. The president was offered a no-nonsense policy to pursue in that volatile situation, but chose instead to do what amounted to nothing.

Fiesty British Prime Minister Margaret Thatcher, stepping in firmly where Carter feared to tread, wasable to bring the white-supremacist forces of Ian Smith and the black Rhodesian guerrillas to the conference table and hammer out a negotiated settlement.

Though the White House was not reluctant to accept credit for the suc-cess of the British-engineered settlement, secret State Department cables make clear that Carter contributed virtually nothing. Indeed, the administration's refusal to play hardball in a tough international situation made the British efforts even more diffi-

The unwelcome suggestion that Carter play a little practical politics to bring the Rhodesian imbroglio to a peaceful solution came, my sources tell me, from former Rep. Allard Lowenstein, an old Africa hand and former New York congressman who served at the United Nations with Andrew Young.

Almost exactly a year ago. Lowenstein proposed a plan that was roughly the same as the successful one used by the British months later. But a

energy source.

swimming pools.

energy-poor Israel.

Capitol Hill source told my associate Bob Sherman that Lowenstein's plan was disregarded at the White House, the State Department and the National Security Council

What Lowenstein suggested - and the Carter administration tinkers apparently gagged at - was that the United States use the economic and military sanctions imposed on Rhodesia years before as a means to get both sides to the negotiating table. The black guerrillas would be impressed by a threat to lift the sanctions, which would give the white Rhodesians power to keep control of the country indefinitely. Conversely the white Rhodesians would be impressed by a threat to continue the sanctions indefinitely

Playing both ends against the middle is not the approved, born-again Carter way of doing business, at least in international affairs. There is evidence that President Carter's politically oriented chief of staff, Hamilton Jordan, may have failed to push this suggestion that a peaceful solution be achieved by knocking the two sides' heads together.

In an "eyes only" memo to the president, Lowenstein said the possibility of lifting - or maintaining the sanctions "can influence both sides to negotiate in good faith." But the memo was routed through Jordan, and it is not known whether the president ever saw it. What is known is that Carter never acted on the Lowenstein suggestion.

This was no top-of-the-head, will-o'the-wisp theory cooked up by a pipesmoking egghead far removed from the scene. Lowenstein had made an on-the-spot visit to Southern Africa last February to sound out leaders on

Not only did he clear his "big stick" sanctions policy with President Kenneth Kaunda of Zambia, but he was told by Ian Smith that Smith had "no problem" with renegotiation of the whites-only constitution, its submission to the entire nation - blacks and whites - and elections under United Nations supervision in which the black guerrillas would participate.

But the U.S. embassy in South Africa denigrated Lowenstein's diplomatic efforts, professing in a cable to Washington that Smith's reasonable attitude "boggles the mind." The embassy experts suggested that "Smith (intentionally) and Lowenstein (unintentionally) were...talking past each

So the administration sat on its hands. Eventually, the British moved along the lines recommended by Lowenstein and brought the whites and blacks to the conference table.

But Jimmy Carter's failure to act was not lost on the cold-eyed observers in Tehran and Moscow.

ART BUCHWALD

## Changing women's roles are changing men's roles

WASHINGTON - As more and more women join the work force, it follows that many of them are getting the key to the corporate washroom. When these women reach executive levels, it is only natural that companies not only investigate how effective they will be, but also how their spouses will fit in as "members of the team.'

There was a time when a man who was being considered for a good job had to produce his wife to see if she was the "right kind of person" to be married to a corporation executive. This was usually done discreetly by inviting the wife to dinner with her husband to meet the other executives and their wives

But now for the first time companies are taking a harder look at the husbands of women they are planning

Flagstaff, a pal, had just been put through an ordeal, and he reported back to me the next day about what had happened 'Janet told me," he said, "that she

thought she had the vice presidency of United Globetex all sewed up. The final test, she said, was how the top enchiladas reacted to me. You can imagine how nervous I was. Because her career was at stake. I asked her if should wear a hat and white gloves but she said a dark blue suit, a white shirt and a conservative tie would do just fine. Then I said, 'What do I say to all these big shots? I'm not "Just be yourself,' she told me,

Art

'they don't expect anything great out of an executive's husband. But since you'll be travelling with me a lot, they want to make sure that you won't do anything to disgrace the company.'
"I asked her if I should bone up on

the corporation so I didn't look ignorant when it came to United Globetex affairs. She said she didn't think I should discuss business as I would only make a fool of myself. So I said 'What should I talk about?' and she replied, 'The children, clothes, football - but don't forget to tell them you went to Harvard so they won't think you're a dummy!"

Well, last night i went through my ordeal of fire. They took us to the Four Seasons restaurant. There were three executives and their spouses.

"The husband of the president was a mousy type and he gave me the once-over like I was dirt. He wanted to know how my golf game was. I told him I didn't play golf. I thought Janet would die. But the president was very nice and tried to put me at ease. She said some of the husbands of the top echelon didn't play golf either. If you want to know the truth I think she was making a pass at me — but I ignored

"After the chitchat, the executive vice-president got down to business. She said a husband's role in the company was as important as the wife's. She expected us to be a team. That meant I had to entertain important customers in my home or in a restaurant, take the spouses shopping or sightseeing, and make them feel welcome while my wife was trying to close the deal.

'Janet's immediate boss asked me if I had a drinking problem, which I of course denied. She asked me if I minded Janet going to meetings in other cities and being away from home when duty called. I said, of course, I didn't. I was not one of those husbands who always complained when his wife started packing her

"This seemed to satisfy them all, and even the mousy husband of the president gave the impression that I would fit in. As a matter of fact, as we left the restaurant, the executive vice president whispered to Janet, 'I think your husband is adorable, and he seems awfully intelligent for a

'That must have pleased Janet no end," I said to Flagstaff.

"It did. When we got home she hugged and kissed me and said. 'Honey, I'm on my way up to the corporate ladder, and whatever happens, I'm taking you with me.

## Mark Russell says

Perhaps we all need to be reminded that the Olympic Games represent the cleanest spirit of competition - in the marketplace. Chiquita Banana did not become the official banana of the U.S. Olympic team without training for it.

Are we going to deny Chiquita her long-awaited chance to slip over the finish line in a blaze of glory?

And what about Speedy Alka Seltzer? Has he become the official U.S. Olympic team Effervescent Pain Reliever for nothing? Only to see his hopes fizzle?

How proud Elsie the Borden Cow must be that she, of all cows, is the official cow of the U.S. Olympic team. I'd hate to be the one to tell Elsie that her place is in the barn.

We're talking about the most competitive sport in America - the manly art of commercialism. Every business champion starts out his day with a big nourishing breakfast fruit, cereal, whole-wheat toast and a big bowl full of competitors.

These are the folks who bring to the Olympics the official shoelaces, the official dental floss, the official knitting needles, the official mustache wax and the official nutmeg of the U.S. Olympic Team.

## Texas lawmakers study new ways of exercising control over schools

By BILL KIDD **Austin Bureau** 

AUSTIN - One of the great apochryphal stories in Texas politics relates how a governor early in this century supposedly vetoed the appropriations for teaching foreign languages at The University of Texas on grounds that if English were good enough for Jesus, it was good enough for The University of Texas.

True or not, the tale illustrates the point that politicians and academicians often find themselves in conflict over the running of the state's higher education institutions.

Judging from current trends, the 1981 legislative session won't be any exception in that regard. In the 1960s, lawmakers focused on

what was happening with the students ing to reform what they viewed as - but that focus shifted in the 1970s to faculty and administration, and now seems to be moving towards the area of educational foundations.

In general, the trend has been to bring greater control by the Legislature over the schools, which had been allowed to operate in what might be called a semi-autonomous fashion under their various governing boards.

That's not to say the Legislature, at any period within living memory, has allowed universities to proceed without guidance - or interference, depending upon one's viewpoint — but the practice has seemed more sporad-

But in recent years, lawmakers

abuses in use of teaching assistants, deciding how many hours of instruction professors had to give, and generally thrusting their paddles into the broth of higher education.

Gov. Bill Clements appears to be accelerating the process having declared that higher education is the "most wasteful" area of state government (a view not universally shared, although university officials themselves have agreed some trimming and improvement is required).

Lawmakers generally like universities, although not necessarily, or perhaps primarily, for their educational aspects.

Some lawmakers have made careers, and created a certain job security, by representing universities, or

trying to get universities in their dis-

Like a large industry, a university provides community stability, a focus for attention and community pride, and often a nice payroll.

None of those things is undesirable; they are, in fact, highly sought after, and it's understandable why protecting "my university" becomes a major concern.

But at times it seems lawmakers are about to lose sight of the fact that a university really should be primarily a place of education — and that educational standards should be a legitimate concern, as well as how many students there are per classroom, and how many square feet of

dórmitory space may be needed. Those construction issues are being Board, Texas College and University System, and the governor's staff, and some other study groups.

And the question of controlling education foundations is being looked at - and indeed may be one of the major issues for the 1981 session.

Problems involving North Texas State University's foundation have helped fuel that effort, which came in for attention in 1979.

And lawmakers are expected to look at the touchy subject of tenure practices, a source of friction within the academic community as well as between lawmakers and professors. In many ways, the continuing de-

bates and tensions are healthy. No responsible person would argue that the Legislature, which collects the taxes which are used to support

mulled over by the Coordinating higher education, should simply shower largess upon the schools and never seek to assure that the funds were spent wisely.

But neither is it a good idea to have the Legislature deciding it will regulate and set policies in all areas of higher education, and at times it appears that's what lawmakers' intentions may be.

All in all, higher education in Texas is neither the best nor the worst in the nation: it has some very good aspects and it has some things that are

And despite all the demand for reducing waste and exercising control, would be well for lawmakers to move carefully, and to assure that they really are going to improve things if they change them.

## LETTERS TO THE EDITOR

#### **American Farmer**

To The Editor:

The "American Farmer" loves his God, his country and the soil he tills. As a farmer, he believes he is the backbone of this nation; not only because of the crops he raises, but in strength of the people that raise them. He is willing, and possibly has, laid his life on the line in defense of his country and his way of life. He is willing to make whatever sacrifice necessary for preservation of this way of life.

The "Farmers in America" are just plowing for GREED, and saying 'Government, what more can you do for me?" They are not willing to make

**POSITIVE THINKING** 

any sacrifices for this country or for their way of life. This fact has been proven twice in recent times. The first time was in the president's effort to hold down inflation (an enemy of real prosperity), and in the more recent crisis with Russia. They could not support our president in his efforts to boycott grain sales to Russia if that boycott would jeopardize their market place. And even our government cannot bring itself to ask the "Farmers of America" to make this sacrifice. Some politicians have advocated that a pseudo-market be created by the government's buying this boycotted grain to prevent farmers from making this sacrifice. Greed motivates the actions of the politicians supportive of this pseudo-market.

## But he said...

To The Editor:

'We do not need to conquer the United States or Europe, even if we could. We do not want to unleash a nuclear war because we are not crazy. What we want is lasting peace with all nations."

The foregoing was said by Presi dent Leonid Brezhnev of the Soviet Union in a meeting with United States senators in Moscow on Nov. 17, 1978.

In the light of recent events, it appears the Soviet Union will attempt to conquer the United States and Europe, unleash a nuclear war if necessary and there are doubts as to the sanity of the Bolsheviks.

John C. Healy P.O. Box 1325

#### To Friend Bill

To The Editor:

It was with extreme regret that I learned of the retirement of Bill Collyns as editor of The Midland Reporter-Telegram.

In the early 1960s, it was my privilege to have him as my immediate supervisor in the department then known as "Women's News." In the mid-Sixties, it was my husband's and my honor to have Bill and his gracious wife as godparents to our first child. Through all these years, it has been a pleasure to count him as a

Bill Collyns: quiet, courteous, always a gentleman in a world in which we need more gentlemen such as he. A person to emulate, a man for whom I have the greatest respect and of whom I have many fond memories. So, to ex-"boss" Mr. Collyns, to

Friend Bill, I wish the best. And, of course, to his successor, I offer best wishes and good luck. He has big shoes to fill. I hope he can. How I hate to see the Redwoods

Margaret Stewart Baum

1000 E. 20th St. Big Spring, Texas

## Who asked us?

To The Editor:

T.J. Melton can claim to have counted coup on the residents living adjacent to the proposed amusement park, but it must take some of the thrill away to have caught the victim with his pants down. Even though the topic is amusement, residents of this quiet neighborhood were hardly amused when they learned of this already begun project in the newspaper. Supposedly 2,500 people were interviewed prior to this noble undertaking but not one of us was included in this survey. The response would almost unanimously have been negative and not all of us are old and a

majority can certainly swim. While our protest may seem almost unpatriotic and certainly futile, it can at least be registered. We also love kids and want ours to be entertained but we do not wish our now peaceful street turned into a busy thoroughfare thereby endangering their safety and

It appears that someone so deeply concerned for the children of the area (with the prospect of making a profit on an otherwise useless caliche pit as an added bonus) would also show some consideration for this neighborhood and street by having only one entrance - off Holiday Hill Road. We do not mind being on the road to 'progress" we just prefer not to be "hit and run" victims in the process. Concerned Residents of

> 4600 Block of Princeton St. Lou Close Linda and Autry Stephens Peggy and Lloyd Hood Mr. and Mrs. Ralph Howell

#### Note of thanks

(EDITOR'S NOTE: A copy of the following letter was sent to The Reporter-Telegram.)

Fire Chief Raymond D. Lewis City of Midland **Public Safety Building 404 East Texas Street** Midland, Texas 79701

Dear Mr. Lewis:

On behalf of Magnatex Industries and the family of Mr. Jim Coffey, we wish to express our sincere appreciation of the professional and skilled manner in which your paramedical

#### heart attack in our office the morning of January 11th. Having watched the team in action,

beginning with their rapid response to our call, we were all impressed with

the expedient execution of their knowledge, skills and capabilities. Without their trained efforts we're certain the outcome would not have been as favorable.

Their exemplary efforts serves to add yet another dimension of our pride in the community and your de-

partment. While names were obscured during the trama of the moment, we hope you will make an effort to identify these individuals of the paramedic team and express our personal and sincere gratitude for a job well done.

To further evidence our appreciation of the efforts and training group, we wish to donate \$250 to be used in furnishing the recreation area at the new fire station. The use of these funds is to be solely at the discretion of the emergency team.

Charles H. Priddy Midland

#### Resolutions...

To The Editor:

I would like to suggest some changes in our country that would make excellent 'New Years Resolu-

1. A return to the policy of strength instead of weakness - militarily, politically, on the energy front, and in the intelligence area. To do this, we must urge our congressmen to insist that the money from the windfall profits tax be used to further our various energy fields, build up our military might, activate and support our dismantled and ineffective intelligence agencies, such as the CIA which has been a victim of some of our "doves" in Congress who serve their own interests first and their country's interest third or fourth, and elect men — and women — not politicians, in the upcoming elections to replace them. This would mean a general housecleaning. We have been ill-served by many of these people, a witness to which is the mess we find ourselves in today on every front

imaginable. 2. A realization that the new decade we are in may see the end of our way of life if we don't control the environmentalists who have impeded progress in various endeavors on local, state, and national levels, so that things that were badly needed could not be done at all, or with costly delays that render them financially impossible. None of us will have a country if this isn't controlled. Every new technology in the history of man has had a price tag, and man has accepted possible danger along with

3. A realization that "detente" is impossible with Russia. Russia's goals have not changed - this is becoming increasingly apparent they still plan to take over and rule the world. They are getting closer to us all the time - making inroads in South America, working in Mexico, and already in the Caribbean. Make no mistake — this is the enemy — and we must be strong in order to meet this challenge

4. A realization that Americans must be willing to sacrifice some of our comforts in order to meet the challenges of the future. We already realize this about energy. Other sacrifices are sure to come if we are to retain our freedom and stand strong and united in the face of difficulties. We must put country abouve self.

5. A realization that we need a strong, positive, and unafraid leader in the White House, and one who knows that when strength is shown by our country, everything improves — the value of the dollar increases, morale escalates, the American people are proud again! Oh, how we yearn for that - and I believe he would find all the support he ever dreamed of, and a united people!

6. A leader who is not afraid to stop all aid to a nation who does not support us, who kill and take hostages, and revile our representatives, defiling our flag, insulting us in every way, is needed. America is - and has been - a humanitarian country. We must realize that strength is what many peoples of the world respect, and when weakness is detected, someone comes in to help exploit it. We must learn to play the game by the new rules — rules that different cultures understand.

If you believe any of these things to be true, I urge you to let our national leaders know. I believe our country is in danger.

Mrs. Harry Tipton Midland

#### Good advice

To The Editor:

I have written several letters to the editor analyzing certain governmental actions as I see them. I have read many others with which I agree. But I believe that Charley Reese's column in The Midland Reporter-Telegram on Friday, Jan. 11, 1980, is the best I have read. I am firmly convinced that if his recommendations were to be followed by our government, the United States would experience such a rebirth that the world could well be reshaped. The U.S.A. would regain its standing in the forefront of the world's nations, engendering respect in all corners, and evoking a patriotic pride among her citizens.

The gist of his column was, and I quote: "The purpose of federal aid is to establish federal control over social decisions." His recommendations to correct the ongoing destruction of our republican form of government by the substitution of an all-powerful central government include the restoration of federally seized functions to the states, local governments, and business. He advocates the abolishment of many federal welfare programs, the Departments of Education and Energy, most of the grants for idiotic studies and art endowments, and the Environmental Protection Agency. All of these usurped functions had previously been performed by the states, cities, and counties.

Taxes could then be lowered, restoring much of our national wealth to the taxpayer to invest, save, or spend. This should free the federal government to perform its proper function: conducting foreign policy and providing for the national defense.

I cannot do justice to his editorial. recommend that those who missed it get a copy. Possibly The Midland Reporter-Telegram will repeat it as a public service. As a citizen, you owe it to yourself to read it.

Hugh G. White Midland

#### Try courtesy

To The Editor:

Today I went with my mother to The Midland National Bank to help her take care of some business due to the fact that my father passed away on Sept. 4, 1979, and she is now having to attend to all of their business. My mother, being the strong and self-sufficient person that she is, is trying to be independent by learning to drive (my father had done all the driving for the past 15 to 20 years) and to take care of herself. We had just left the bank and gotten into her car in the parking lot of The Midland National Bank and she was trying to back out and the car died several times and naturally, she was somewhat ner-

I hope that the young and very thoughtless and selfish couple who were honking their horn so inconsiderately at my little mother will read this letter. Surely your business could not have been a matter of life and death and if you had taken the time to look or think, you would have been aware that a little, frail elderly lady was trying to back out - needless to say your honking and mocking served to make her even more nervous and, in fact, almost in tears! Of course you could not have known that she had just lost her husband and the circumstances, but, nonetheless, I hope you will read this letter and perhaps stop and think before you act so rudely. We could all learn a lesson from this...try to relearn the thing that seems to be a dying breed - it's a thing called courtesy and thoughtfulness for the other person!

By LANA CUNNINGHAM Staff Writer

Unchanging, constant, stable.

On the surface, the face of Midland appears stationary. But upon closer examination that face has lengthened and a few more wrinkles added as the city undergoes changes to accommodate the increasing population.

Plans for Midland in the future were being drawn by the city's Planning and Community Development Department as 1979 came to its end. The master plan completed in 1970 had become outdated, according to City Manager James Brown.

Subdivisions planned and developed during the decade of the 70s followed configuration outlined in that master plan, Brown said. But the city has reached the limits on those early plans.

Expansion of city services was a major undertaking this past year by the city government.

A new central fire station located in Crier Park between Texas. and Wall avenues opened at the end of December.

THE 20,000-SQUARE FOOT building serves as headquarters for two aerial ladder trucks, three ambulances, several pumpers and an equipment truck. "This is a nice functional facility," Brown noted. "I think it's

big enough that the city should never need another central fire This location combined men and equipment from the old central fire station located at the Public Service Building on East

Texas Avenue and the substation located at Circle Drive. To retain the park atmosphere, Brown said a berm, or sloping piece of land, was built on the north side of the central fire station. A tall brick wall in back of the station, with the berm going up to meet the wall will hide the station from people on the north side of the park and cut down on noise, according to

To handle the fast-developing northern sections of Midland, a fire substation was completed last summer at the corner of Haynes Drive and Midkiff Road. It contains 6,500 square feet. The city saw the civic center come to reality, three years after

the residents approved a bond issue for the project. Located on the block bordered by Wall and Texas avenues, Main and Loraine streets, the brick building consists of two levels. The underground section contains meeting rooms and

THE UPPER LEVEL can be one large room to hold 1,400 persons, or can be sectioned off into three rooms, Brown said. The City Council decided towards the end of the year to go ahead

and use rolled carpet for the main room. "The carpet can be put down in sections for a banquet and taken up for an exhibit," the city manager explained.

The center has 1,400 chairs stacked on 119 dollys. And a

catering kitchen is capable of handling any large banquet, he said. The facility includes large walk-in refrigerators and warm-

Outside landscaping consists of concrete with Mexican tile interspersed to form designs, said Brown. Trees will be planted in wells left on the south and east sides of the building. Enlarging Hogan Park Golf Course by nine holes and adding a

new pro shop was completed in early fall. Grass on the new nine holes should be in good condition for spring golfers, Brown said. And the new pro shop includes a snack bar where hot and cold foods are being sold.

A TWO-YEAR RENOVATION and expansion project at Midland Regional Airport was completed in early summer. That project included expanding the terminal building at the north and south ends to accomodate more ticket counter space and two baggage carrousels, remodeling the entire terminal building, adding a concourse area on the east side with four jetways and constructing a two-level parking garage with an overhead walkway to the terminal building.

Work on two city projects is beginning with the dawn of 1980, both the result of a September bond election.

Plans and specifications for a \$3.6 million addition to the water treatment plant should be completed and the City Council will be

ready to advertise for bids on the project in early 1980.

Midland's present facility is handling a capacity load. The addition should handle the city's needs through the year 2000. Plans for expanding the city's water system are on the drawing

board and work should begin later this year.

That \$4.2 million expansion will include drilling five new wells in the Paul Davis Well Field north of the city, adding to the gathering system which connects these wells, installing a booster pump to handle the increased load, replacing the control system and building a pipeline to connect Paul Davis with the McMillen Well Field northwest of Midland.

WHEN COMPLETED, this work should supply the city's water needs through 1990. One project which has been talked about for the past two years

is a senior citizens center to be placed in the empty fire station building at Circle Drive. Brown said the project is in the drawing stage and remodeling

should begin this year. While new buildings and other projects have been slowly changing the face of Midland, underneath the surface more water and sewer lines have been going in, said Fred Baker,

director of public works for the city. In 1979, 24 miles of water lines were installed as were 17 miles

of sewer lines, he said. And 14 miles of streets were paved in the The number of active water customers last year was 22,400, up

471 from the previous year. Midlanders who thought they may have been stopping at more intersections last year were right. There were 103 Stop and Yield signs installed, along with 860 other types of traffic signs, including street names, Baker said.

Center line marker buttons were placed at spots on Ohio, N, Cuthbert, Neely, Scharbauer and A streets.

Three new school zones were established - at Trinity School on Wadley Avenue, on Golf Course at Culver Street and on Ward Street at the Fannin Street intersection. And, to make things a little more pleasant near businesses,

Baker said eight new stationary trash compacters were installed at local firms.

## Parks seek new money

By LANA CUNNINGHAM Staff Writer

Policies and philosophies in the city's Parks and Recreation Department are beginning to make a major swing-around as the new decade gets off the

In the past, the department has depended almost entirely upon the city for a budget to carry out everyday items and major projects, including purchasing land for new park

But the department is changing its longtime stand and is going to the public for support and help on out-of-the-ordinary projects, said Wayne Kohout, director of the Parks and Recreation Department.

A new concept is the Parks and Recreation Trust Fund that is getting under way at the beginning of this year.

"It will be available for people to bequeath funds in capital form for the advancement of the parks system," Kohout said.
"They (donors) can have strings attached to how the money is used, or let the Foundation Board use the money as it

sees fit." Through this system of contributions, Kohout said he hopes to provide as "diverse a program as possible" in the parks system. "We could provide facilities and opportunities that are feasible and practical for Midlanders.'

Funds primarily would be used for acquiring park sites and developing this land, he explained.

The department slowly has been seeking a more active role from Midlanders in the parks system. And the switch in philosphies already has brought help from some organizations, said Kohout.

A Kiwanis group is paying for the development of a neighborhood park. A Lions club is putting out \$4,000 to \$5,000 for an adventure playground at Gar-rett-Brown Park.

The Junior League of Midland, Inc., is donating about \$60,-000 for development of a com-munity park in the large tract of land south of Midland Air Park between Wadley and Ventura avenues. The Little League fields now located at County Park on North A Street will be moved to this community park. Work should be completed by spring 1981, according to Ko-

But this is only a drop in the bucket toward upgrading the city's park system, he contend-

The city has purchased land in an undeveloped area of north Midland for a future park site, and the parks department people are looking at more sites, he said.

"We hope to acquire a site next to Trinity School," he said, explaining that it would have joined with the Younger School site had the school bond issue passed last fall.

The city is considering a park site in a new housing development between holiday Hill Road and Midland Drive, Kohout said. But, to get these park sites, a lot of money is needed to purchase the land.

A city ordinance passed last year requires a developer to set aside land for a park if it falls within the parks plan. The city then has the option to buy that land within 12 months. If the city fails to do that, the land goes back to the developer, the director explained.

"If people would like to have a park named after them, it would only take \$50,000," Kohout said half-jokingly.

Developing current and future park sites is another matter, he added, listing some of the de-partment's ideas.

The Soil and Conservation Water District is developing a nature site at Hogan Park, and Kohout said he is considering including a seasonal animal exhibit much like a petting zoo.

It would be set up in a Midwestern-style barn with farm-

Developing a soccer complex at Hogan Park is in the making with the Midland Soccer Club trying to raise the money for the project. The cost will be about \$70,000, said Kohout, and the club already has about \$10,000.

Looking at the department's recreational facitilies, Kohout said expansion is necessary if more programs are to be

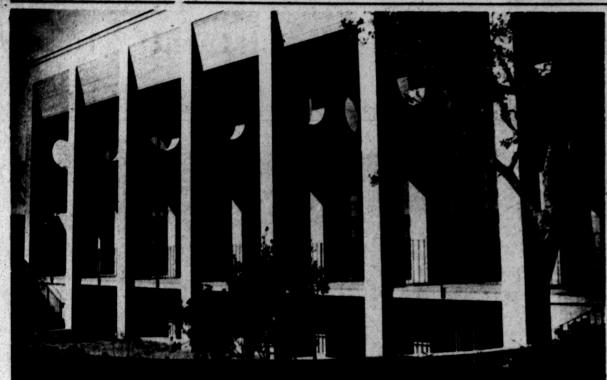

"The 65,000 people in this town don't have a place to go (for recreation) and pay a reason-

able fee," he remarked. In addition to putting an addition onto the current gymnasi-um at 300 Baldwin Street, Kohout mentioned building three racquetball courts, an exercise room and classrooms.

Em Carnett, superintendent of recreation, added that programming now is at a maximum with the facilities the city

"In fact, it's difficult to carry out some of those programs now," she said. "The future of programming will depend upon our facilities. And we'll strive to incorporate suggestions from people."

But until there are additions to city facilities, programming will have to stay basically the same, she said.

The imposing facade of Theatre Midland, the new \$2 million home of Midland Community Theatre, is an eye-catching addition to

West Wadley Avenue, in northwest Midland. (Staff Photo)

## Theatre Midland, amateur thespians among 'assets'

W. Wadley Ave., is the home of Midland Community

Theatre, one of the city's prized assets. Since 1946, MCT has been a leading cultural and entertainment force, not just in Midland but throughout a wide area of the Permian Basin.

In its more than three decades of existence, MCT and its leaders have held the theory that "You-can't stand still - if you don't progress, move forward,

then the only way you'll go is backward.' MCT has never stood still, and now that it's past forward - and growing and progressing - fas-

Since occupying its splendid and spacious new home in northwest Midland in the spring of 1978, MCT has vastly expanded its outreach to the public through its wide scope of activities and special

programs and projects. In addition to its annual season of major shows which includes a musical production and five comedies and dramas — the theater has a series of special off-the-subscription-season productions, a series of plays for children and young people, a classic films series, special dance concerts and a series of art

IN A DIFFERENT LOCATION, MCT's Summer Mummers present performances of an original melodrama each July and August. And there is a theater school offering classes in acting, play pro-duction and stagecraft for all age groups of children and young people

Midland Community Theatre's annual membership season is a calendar-year season, beginning in January and continuing through December.

Traditionally, the season-opening production is a Broadway musical, and this year's production now just a few days away from its opening - is the musical "Mame," based on the Patrick Dennis novel, "Auntie Mame," which later became an ac- chael Warburton, technical director; Beth Thomas, claimed stage comedy and then a movie before Jerry Lawrence and Robert E. Lee adapted it to the musi-

The 1980 season continues in March with a rollicking British comedy with an intriguing title, "No Sex Please, We're British." In May, Lawrence and Lee's new play, "First Monday in October," will be presented, and in June, MCT will do a revival of the mini-musical, "I Do! I Do!," which it first presented here in the summer of 1970.

AFTER THE SUMMER HIATUS, during which the Summer Mummers will be presenting their popular melodrama, the theater season will resume in October with a production of a new suspense play, "Death Trap." The season will conclude in December with a revival of one of MCT's most popular productions of all time, the comedy "Light Up the Sky."

All these productions will be presented in Theatre Mrs. William U. Sumner, special projects; Mrs. 1, the large main stage area of the new theater. In, James Boldrick, youth activities; Francis Y. Grubb, addition, Theatre Midland contains a small, more

Scheduled for presentation in Theatre 2 are "The representing Gin Game," "The Poker Session" and Ibsen's classic organization.

Five plays for children will be given during the year, including productions in the spring and fall, plus three plays during the summer. These produc-tions will be mounted by the Pickwick Players, the young people's producing and performing com-pany at MCT.

THEATRE MIDLAND-DANCERS, a new organi- Theatre Association.

One of the busiest-places in town, day in and day various composed of persons who enjoy dancing, and who study stage movement and theatrical dance, presents spring and fall concerts.

Cinema '80, another offshoot of Midland Community Theatre, is presenting a series of classic films. The series, which began in October and will continue through March, is offering such American film classics as "Anna Karenina," "My Little Chick-"All About Eve" and "Strangers On A

The spacious Theatre Midland lobby is the scene of several art exhibits each year — one during the run of each of the major productions at the community adolescence and well into maturity, it's moving theater. The displays feature paintings, drawings, graphics or photography by outstanding artists in Midland or surrounding area.

> During its 34 years in existence, Midland Community Theatre has presented well over 200 major productions - comedies, dramas and musicals. Space would not permit a complete listing of all these, but a random sampling includes the following: 'South Pacific," "Life With Father," "Harvey, "The Sound of Music," "Philadelphia Story," "Oklahoma!", "The Taming of the Shrew," "Room Service," "The Visit," "Death of a Salesman," "Laura," "Command Decision," "The Rainmaker," "Guys and Dolls," "Blithe Spirit," "Inherit the Wind," "The Fantasticks," "The King and I," "Barefoot in the Park," "The Man Who Came to Dinner," "The Crucible," "Camelot," "No Time For Sergeants" and "A Man For All Seasons."

> Art Cole, who, along with a group of farsighted and ambitious Midland citizens, organized Midland Com-munity Theatre in the spring of 1946, continues at the helm of the theater organization, with the title of executive director. MCT's managing directorship has been vacant since last October but is in the process of being filled from a large list of appli-

> COLE'S PROFESSIONAL STAFF includes Deborah Waddell, theater school director; John Mitheatrical intern and publicist; Mae Dawson, costumer; Bebe Fisher, secretary and office manager.

Still others are Cherry Jones, choreographer; Ava Young, bookkeeper; Mary Lou Swindell, in charge of The Costume Shop; Willie Swindell, custodian; Mick Epley, building engineer.

In addition, a large group of volunteers serve the theater as library personnel, box office personnel, and set builders, props gatherers and scenery painters. A single production at MCT involves several dozen volunteer workers behind-the-scenes, in addi-

tion to the volunteer actors and actresses on stage. William C. Morrow, a Midland attorney, is the current president of MCT's board of governors, the theater's governing body. J.M. Fullinwider is vice president for business and James Salners is vice president for production.

Other board members are Mrs. Robert Mann, secretary-treasurer; Mrs. Jim Conine, membership; theater plant; Larry J. Bell, finance; Lynn D. Durintimate arena-type theater, known as Theatre 2, in ham Jr., special properties; Mrs. George A. which several special productions will be given Thomas, representing ACT IX, the women's volunduring the year.

Thomas, representing ACT IX, the women's volunteer service auxiliary, and Mrs. Allen Hitchcock, representing Ham Hocks, the backstage workers

Midland Community Theatre is a member of the American Community Theatre Association, the American Theatre Association, the Children's Theatre Association, the Southwest Theatre Conference, the Texas Non-Profit Theatre Association, the Texas Educational Theatre Association and the United States Institute for Theatre Technology. The theater is an associate member of the International Amateur

and confident of still more progress to come

Chaparral Center, opened on the Midland College campus in September 1978, is Midland's largest indoor facility - and much in demand. (Staff Photo)

## Chaparral Center truly a multi-purpose facility

Chaparral Center, described as The Showplace of West Texas," has ecome a focal point for entertainent in Midland. Located on the Midland College campus, the multi-pur-pose facility has been busy beyond elief since its opening in September.

Circuses, graduation ceremonies, car shows, conventions, college and high school basketball games, and big name entertainers have been just a few of its many uses.

Chaparrel Center was constructed as the result of a bond issue passed in February, 1976. It opened in September, 1978, with great fanfare and the first show was "The Captain and Tennille." Although most new buildings like Chaparrel Center are slow to get started, that wasn't true in Midland.

An experienced management team and a brand-new market for touring shows made Chap Center a busy place from the first.

Such stars as Ginger Rogers, Char-ley Pride, Ted Nugent, Bert Ba-charach, and Mel Tillis have per-formed in the spacious center. The Harlem Globetrotters filled up the place for their always-enjoyable antics. Tens of thousands of residents came out to see new cars and trucks. Chruches used the building for several different services. Dignitaries have

been honored with banquets, lun-cheons and speeches in the building. Three different circuses, including Ringling Bros.-Barnum & Bailey, have thrilled audiences with trapeze artists, performing elephants, hilarious clowns and dangerous lion and

Midland College basketball teams Midland College basketball teams started playing in the building. Before long they were joined for a few games by the local high schools. This season, both Midland High and Lee High have been playing all their home games on the Chaparral Center court.

Manager Larry Campbell joined the Midland College staff five months before the building opened and started booking events. With several years experience in the arena management

experience in the arena management business, Campbell's contacts enabled the building to start drawing the

touring shows very quickly.
One of the highlights came, however er, when the Class of '79 from both high schools used the building for their graduation ceremonies. It allowed them to have their graduation inside rather than in the football sta-dium. Midland College also used the building for its own graduation cere-

have attended events in Chaparra Center...far more than the population of the city itself. With seating for more than 5,000 people, it is the largest indoor facility in Midland. And, becuase of its size, it is in constant demand.

Fees are charged to all who use the building, with a lower scale for local or non-profit sponsorship and higher

fees for touring shows.

Covering for the Pro-Turf permanent floor, portable stages, large sound system, portable chairs, moveable bleachers, and banquet tables make it truly "multi-purpose.

# Developing for the 80's and beyond.

CONSTRUCTION • DEVELOPMENT • PROPERTY MANAGEMENT • LEASING

The HBF organization includes three companies encompassing commercial real estate development, general construction and construction management, and commercial leasing and property management.

**HBF** Corporation is contributing to the growth of Midland and the Permian Basin. Major development projects over the last four years include San Miguel Square shopping center, The HBF Building and One Marienfeld Place. Additional development projects are also scheduled throughout the Permian Basin including the companies' involvement in the future development of an 8,000 acre tract of land west of Midland Air Terminal.

HBF Construction is currently working on several Midland building projects including the Petroleum Club and expansion of the First National Bank. Other important examples of HBF Construction's work include 600 N. Loraine Office Building, Marathon Oil, RK Petroleum, Chamber of Commerce, San Miguel Square and One Marienfeld Place.

HBF Property Management has more than 800,000 square feet of office space under leasing and management contract. Among several properties under its management are the Blanks Building, HBF Building, Empire Plaza, One Marienfeld Place, Western United Life Building, and San Miguel Square.

Offering a total service concept, the HBF organization will continue to participate in the growth and development of Midland and the Permian Basin. We welcome your inquiries concerning commercial, retail, and industrial development opportunities.

#### EMPIRE PLAZA

Scheduled for completion in Mid-1981, Empire Plaza will be downtown Midland's most prestigious new office building. The twelve story office building offers 180,000 square feet of select office space with three floors of covered executive parking.

#### OAK TREE PLAZA

Midland's newest medical office building, will be completed this fall. Over 16,000 square feet of space is available with occupancy anticipated for ten doctors' offices. Located at 2401 West Louisiana Avenue, Oak Tree Plaza is easily accessible to Midland's medical community and

## Oil museum adding to 'unique' facility

Since it opened in 1975, Midland's Permian Basin Petroleum Museum, Library and Hall of Fame has

drawn visitors from every state in the union and from many foreign countries, including the U.S.S.R. and the People's Republic of China.

And for good reason: The facility is unique, a one-of-a-kind, single-theme museum that tells the story of oil and the petroleum industry through a variety of intriguing displays, scientific shows and special exhibits.

But even as the institution continues to add up

But, even as the institution continues to add up impressive weekly, monthly and yearly visitor totals, a new expansion project has just been initiated which, when finished, will accommodate crowds and tell the story of the petroleum industry even more fully, interestingly and comprehensively.

Construction of a new north wing was begun in late fall and the structure is expected to be finished by

The facility is unique, a one-of-akind, single-theme museum that tells the story of oil and the petroleum industry through a variety of intriguing displays, scientific shows and special exhibits.

se in the

"Anyone who drops by to look at our guest register, notes where the people are from and reads their enthusiastic comments will readily see what a tremendous thing we have. It's going to be better yet if we continue getting public support."

this coming July or August, said Russell J. Ramsland, president of the museum's board of trustees.

THE 9,000 SQUARE-foot addition to the present building will increase exhibit space by 40 per cent,

Cost of the addition plus exhibits in the facility and related expenses will run close to \$1.5 million, it was announced. J.W. Cooper Construction Co., of Odessa is the contractor for the project.

Ramsland said that fund raising for both the new wing and for exhibits planned therein has been under way in recent months. Construction of exhibits for the new wing is expected to begin soon, when needed funds are given or pledged. Earliest date for completion of the entire project (building plus exhibits) is the final quarter of 1980, but opening of the new structure to the public will more likely be in the early months of 1981, officials said.

Ramsland is very proud of the oi! industry's picture as presented by the museum, and of the educational value of the institution for people in both non-producing and producing oil regions.

"ANYONE WHO DROPS by to look at our guest from Pecos and Big Spring taking guided tours of the register, notes where the people are from and reads museum.

their enthusiastic comments will readily see what a tremendous thing we have," he commented. "It's

preserve historical documents of the petroleum industry in the Permian Basin region. The archives-library facilities have a large microfilm collection of documents and oil industry records. Also maintained is an oral history collection — a priceless collection of taped interviews with oil pioneers and other early-day residents in this region.

The Permian Basin Petroleum Museum, Library

and Hall of Fame was for many years the dream of a group of Midland and area pioneer oilmen. Ground for the facility was broken in the early 1970s and a contract for contruction was signed in October,

west wing tracing the history of the Permian Basin, through the days of the Indian occupation to the Spanish explorers, to the American explorers, to the coming of the ranchers, and finally to the early days of the oil industry in the region.

Recently redone is the popular "Introduction to Oil" exhibit in the museum's central area. This audio-visual show talks about oil and how it is drilled and produced. In conjunction with this display is a new geology show which presents an intriguing geological history of the Permian Basin.

Always of interest to visitors is the museum's impressive marine diorama and various narrated slide shows depicting numerous facets of the "oil

A fine collection of paintings by Tim Lovell, dealing with the history of the Permian Basin, on loan from the Abell-Hanger Foundation, also provides interesting viewing for visitors.

THE INSTITUTION IS not just an "inside" muse um - it's an out-of-doors museum as well. The spacious grounds of the Permian Basin Petroleum Museum boast a treasure of antique drilling rigs and drilling equipment. In fact, the museum has the largest collection of antique drilling equipment in

Noteworthy among the equipment is the old National No. 2 rig, dating from about 1915, which came from the Pennsylvania oil fields and was still in use as late as 1975.

The museum also has the venerable Santa Rita No. 2 rig which made history in the early 1920s in Reagan

The museum is a source of learning for area school students. Fourth and seventh grade students in the Midland public schools are regularly transported to the museum to see the displays, and Odessa fifth grade youngsters also are bused to the facility. In addition, students from numerous other public school systems also come to the museum from time

On a recent day, for example, there were students

# **Marathon's** Profits At Work

America is short of energy. The shortage is so serious it threatens our economy, our jobs, our national security and our way of life.

At Marathon Oil, we're doing something to ease the problem. In the first nine months of 1979, we spent \$519 million on capital and exploration projects to fight the shortage. This is nearly twice as much as we earned.

During that period, we earned about 5½ cents on each dollar of sales. This profit – and additional funds – have been reinvested to produce and deliver more petroleum.

But that's nothing new. In the previous five years, we reinvested over \$2.5 billion in the oil and gas business. That's over twoand-one-half times our earnings.

We are using the profits of our business and the efforts of our people to respond to America's energy needs. Helping you, the country and ourselves.

An Equal Opportunity Employer

## When you'd like something more than mud, Delta delivers...

Lots of people sell mud. A select few suppliers give you far more for your mud dollar. One of those, throughout a growing segment of the oil country -- and now including the Permian Basin, is Delta Mud and Chemical. Look to Delta when total mud service is important to your operations.

- Advanced mud technology
- Active research and development
- Ample warehousing and liquid-mud storage
- Mud schools open to your personnel
- Qualified field-service representatives
- Sound mud programs

## Midland galleries offer wide variety of art for home, office

Art galleries abound in the Tall City, offering residents of Midland and surrounding area ample opportunity to view and choose art works for home or office

The selection is varied, ranging from highly-prized (and often highly priced) works by prominent American and European artists of yester-year, to relatively-inexpensive limited-edition graphics and reproductions of historic or contemporary paint-

Sculpture, ranging from bronze castings of Western subjects to stone and metal abstract and free-form sculptures, is offered the public. And, often, local galleries show excellent selections of fibre art - wall hangings and fibre "sculptures" - which many art collectors and interior designers have great fondness for.

It hasn't always been so, this readily-available array of fine art in the

Time was, not so many years back, when Permian Basin residents wishing to invest in a fine painting, a new sculpture, had to travel to Dallas-Fort Worth, to Santa Fe or Houston, Chicago, San Francisco or New York — or at least to Lubbock — to have a variety of art works from which to

But that's all changed, now. Art galleries, and shops offering at least a limited array of original art and fine reproductions, have blossomed in the city. And while many Midlanders may still elect to go farther afield to buy art, a goodly number of city and area residents are perfectly satisfied to shop for their art works right here

A listing of Midland art galleries and dealers is as follows:

Anease Gallery, 300 W. Wall St.: Fine English, European and Ameri-

## Symphony takes on new lustre with years

The Midland-Odessa Symphony and Chorale be- in December featured the orchestra and the Chorale lieves in change - as long as it's change for the

And the orchestra and its adjunctive vocal ensem-5 concerts featuring acclaimed young violinist Mark ble, now in the midst of the 1979-80 season, is not Kaplan. The top winners of the Midland-Odessa Symphony's annual National Young Artist Competistanding still as far as progress is concerned.

Over the last few season, the symphony has increased its membership and attendance, increased its budget and boosted the number of resident musicians to the point where it now is virtually self-sustaining-that is, no longer needing to import numerous qualified musicians from outside this immediate area to "beef up" the orchestra.

In truth, the Midland-Odessa Symphony is, indeed, an orchestra of and for the two cities and their satellite communities, such as Andrews, Crane, Stanton and Monahans.

IT WASN'T ALWAYS BEEN SO. Less than two decades ago, there were small, struggling symphony orchestras in both Midland and Odessa. Neither was strong enough, aggressive enough or professional enough to make much measurable progress.

Then the two ensembles were combined, in the early 1960s, into the Midland-Odessa Symphony, and the path of progress has led steadily upward and onward since

Under the baton of Dr. Lara Hoggard, the first conductor and musical director of the Midland-Odes- the late, great Pablo Casals during several seasons sa Symphony, the ensemble began to emerge as a at the famed Casals Festival in Puerto Rico. viable metropolitan orchestra.

THE SYMPHONY CHORALE came into existence in the early 1960s and added its special kind of lustre to each successive orchestral season. The orchestra and chorale continued to move

forward under the musical directorship of Robert Mann who, after several seasons, was succeeded by Phillip Spurgeon. Following his one-year stay, he was succeeded by Robert Kreis, who was at the helm of the ensemble for two seasons. He was succeeded in the fall of 1974 by Dr. Thomas Hohstadt who came here following 10 successful years at the helm of the Amarillo Symphony Orchestra. Dr. Hohstadt now is in his sixth season as conductor and musical direc-

The symphony and chorus are largely self-sustaining, with financial support coming from the sympho-ny associations of Midland and Odessa (and, through each, from the citizens of the two cities).

ADDITIONAL REVENUES are derived from contributions from interested individuals and business firms in each city and from donations by foundations and other private philanthropic organizations.

This season, the orchestra and chorus hold grants from both the National Endowment for the Arts and

the Texas Commission on the Arts. Neither grant is large but each enables the orchestra and chorus to expand its scope of activity somewhat and thus provide more music, and perhaps a wider range of music, for even more people in the Permian Basin. (The state arts grant, for example, helps fund the Midland-Odessa Symphony's annual trek to Andrews to present its extremely popular yearly concert in that city.)

THE SYMPHONY ORGANIZATION'S annual budget for the 1979-80 concert year exceeds \$300,000

- the largest budget in the orchestra's history. The symphony now has approximately 85 intrumentalists and the Chorale's membership is approxi-

The orchestra's 1979-80 season began in October with gala concerts featuring famed duo-pianists Ferrante and Teicher. This continued the orchestra's long-standing tradition of launching each season

with a big-name performer.

Some of the stellar performers who have kicked off previous seasons include clarinetist Benny Goodman, planist Roger Williams, guitarist Chet Atkins and pianist Peter Nero.

THE CURRENT SEASON CONTINUED with a concert pair in November in which the spotlight was on the orchestra intrumentalists. Third concert pair

## MWL Tool and Supply maintains 28-year record

MWL Tool & Supply Co. of Midland has been serving the oil industry in West Texas, Southeast New Mexico and Oklahoma for the last 28 years. The company, with facilities 1½ west of Terminal, is owned by H.

Edward Lindsey Jr. The company deals in oil well tools and services, including liner hangers, packers, completion tools, kelly vales and float equipment.

When tools are ordered by an oil producer the company's service tool operator delivers the tools and superises their installtion at the wellsite.

The company has 22 employees and the annual payroll is approximately 660,000 annually.

Active in civic and oil industry association affairs, MWL Tool & Supply is a member of the chamber of commerce and the Permian Basin Petroleum Association.

The firm sponsors junior baseball and flag football teams.

MWL employees are authors of many articles on liner cementing tools and deep well completions for all leading trade journals and associa-

Lindsey said the company enjoys a 20 percent growth annually.

Lindsey pointed out that recent expansion include new buildings in Midand and in Elk City, Okla. "The Rocky Mountain area is our next planned service base," Lindsey said.

He said that MWL has run liners, hangers and other equipment in the last five world-record depth wells. "Our company has run liners in more ultra-deep wells than any other company," he added.

'As a service organization specialising in designing and equipping completions and liner programs, MWL has provided technology and tools for more than 500 of the world's epest gas wells - throughout the

H. E. Lindsey Jr.

United States and in Mexico, France, Austria, Iran and other countries, both offshore and onshore," Lindsey

Many of today's most popular concepts in liner cementing and comple-tions originated with MWL, including such innovations as the PBR (packerbore receptacle), the retrievable PBR, and the dual PBR. MWL's balanced-piston design in the dual PBR eliminates potentially leaky and troublesome hydraulic hold-down slips. And MWL's advanced liner hangers, both mechanical and hydraulic set, are noted for their positive, problemfree operation.

'We chose Midland for our home office in 1952, probably before almost any other oil tool service company, because we had faith in the strength of the community. The Permian Basin is a wonderful place in which to work, and even though the competi-tion is keen, the rewards for good service and results are above aver age," Lindsey said.

## Planetarium serves as 'starry' classroom

Staff Writer

The Museum of the Southwest Planetarium has touched the lives of thousands of students in the years since it was established.

kemore Planetarium in tarium's auditorium, "arm" of the Museum of

The planetarium serves as an astronomy "classroom" for stu-dents in the Midland Independent School District and Midland College, as well as students from númerous nearby school systems - Stanton, Greenwood, Coahoma, Forsan, among others - and students of the various private schools in the city.

The planetarium, with its spacious auditorium, is the scene of unique "Star Shows" and special astronomy programs aimed at entertaining and/or enlightening adults as well as young people. During the month of January, for example, the planetarium is offering a special show on meteors that is proving entertaining as well as educational.

The show is having presentations at 2 and 3:30 p.m each Sunday this month and at 7:30 and 9 p.m. on Tuesdays.

John Hicks, a member of the Midland Independent School District faculty for the last 17 years, has served as director of the planetarium since its opening and estimates that "many thousands of students" have benefitted from the facility in the past seven years.

Hicks, as chairman of planetarium studies in the MISD, teaches classes at the planetarium for both Midland High and Lee High schools here.

In addition, the MISD's planetarium outreach has expanded in recent years to the point where it now includes kindergarten through high school levels. This is in addition to the special programs offered students in private schools here and students in nearby school districts.

John Wesley Deats, new head librarian at the Midland County Library reviews some of the films available with Ann Trout. audio-visual librarian. The 5-year-old audio-visual department will move to more spacious quarters this year, Deats said, allowing the already well-used department to provide better service to patrons. (Staff Photo)

## New director changing, improving library service

The Midland County Library, under the direction of new chief librarian John Wesley Deats, is making changes to improve services in a number of

Deats is one major change, taking over the reins of the institution Sept. 1 after the retirement of long-time librarian Frances Williams.

Deats came to Midland from Big Spring, where he had served as director of the Howard County Library since 1976. The Big Spring native received his bachelor's degree from the University of Houston and his master's degree from North Texas State University in

He currently is serving as president of the West Texas Library Film Circuit, and is chairman-elect of District 9, Texas Library Association.

Denton. He is a member of Beta Phi Mu, the library science honor so-

In Big Spring, he was vice chairman of St. Mary's Episcopal Day School board of directors and secretary of the Halfway House board of

Besides the MLS degree, Deats is certified by the Medical Library Association. He served as medical librarian for Malone Hogan Clinic in Big Spring and as a trainee in the Veteran's Hospital in Dallas.

HE HOLDS MEMBERSHIPS in the American Library Association and the Texas Library Association. Some of the changes Deats is implementing now were planned during Mrs. Williams' tenure, he noted.

One big change planned soon is expanding the audio-visual depart-

ment from its current space behind the fine arts department into new quarters in a converted garage and storage space. The new space is about triple the area currently available, Deats noted, and is

much more conveniently arranged. The new arrangement provides not only more working space, but also more room for storage and a viewing room for patrons to preview films and other materials they may want to check out.

Converting the space previously used for storing books donated for the Friends of the Library book sale into a usable audio-visual department took a little doing, Deats said, since several things had to be considered.

The first was finding new space for the stored books. Those were moved into two room in the American Legion Hall just behind the downtown library

The second was arranging security for the room, since the equipment and films are very expensive.

A new sound projector can cost up to \$1,000, noted Ann Trout, audio-vi-

sual librarian, and many of the films cost \$300 to \$500 each. The room with its cement floor had to be sealed and made as dust-free as possible, Deats noted, to prevent damage to the costly items being stored

"Film is highly susceptible to damage," Deats pointed out.

THE EXTRA ROOM was needed, Mrs. Trout noted, because the department had just overrun its room.

One of the most-used sections of the library, the audio-visual department circulates films, filmstrips, projectors, slides and other materials to audiences that range from church youth groups to school classes to nursing homes to

Topics vary from Disney films to Brittanica selections. Most, Mrs. Trout said, are entertaining, but the subject matter covers a vast variety from skateboarding to insects.

Inventory levels have just about filled available space, but most of the items are well-used. Library records show that in July, for instance, 405 showings of library audio-visual materials drew a total audience of 11,521 Midlanders.

One disadvantage of the old space is the lack of a preview room for patrons to decide on films, and no space for film viewing by groups is available at

While the library will still lack a meeting room, the new audio-visual department includes a 20-foot screening room which will allow patrons some privacy to preview films while allowing the staff room to continue

The audio-visual department was one of the most-cramped areas in the library. Deats said, but it is not the only one reaching the limits of its

A LIBRARY EXTENSION, which has been in the planning stages for several years, is looking more promising all the time, he noted, but must wait while other county priorities are met.

The new space, when it is built, will alleviate much of the overcrowding in the science-technical, geneaology and other specialized collections. It also will allow moving the children's library to a larger, more convenient location downstairs, create more room for fiction and non-fiction bookshelves and create a larger reading room.

How much can really be done depends on just where and how large the extension is, Deats said.

'We hope the county will authorize construction of a new underground library extension," he said.

The added space will allow for better library space to the citizens of the county, and slow down the "culling" that must take place in the library

Any book that does not circulate must be pulled off the shelves to make room for a newer volume, Deats said.

"One of the most painful things a librarian does is to have to withdraw books from the shelves," he added.

Many of the culls are offered first to the Midland College library, then end up in the Friends of the Library used book sale.

Right now, the library barely meets the state guideline of two books per

capita for a public library "The extension could meet our needs for the next 20 years," Deats

## Johnston offers new drill stem testing system

**HOUSTON** — The SPRO Test Sysem (Surface Pressure Readout) from Johnston, division of Schlumberger is the latest innovation in drill stem test systems. By providing immediate on-site information on flow rate, fluid type and reservoir information faster and more economically than any conventional drill stem test and eliminates wasted rig time.

The SPRO Test System is designed to provide accurate reservoir information at well depths to 20,000 feet, bottomhole pressure to 12,000 psi and bottomhole temperatures to 300 degrees Fahrenheit.

The difference between the SPRO Test System and conventional drill stem test systems is the relaying of downhole measurements by wireline to an on-site computer. The data is

then analyzed at the wellsite by a computer system consisting of a basic computer, magnetic tape data storage, plotter, printer, graphics terminal and support software. A minicomputer controls the acquisition, storage, retrieval, display and calculation of data before, during and after

The SPRO Test System's main computer date display includes a printer that offers real-time time reference, bottomhole pressure, rate of change in surface pressure per minute, bottomhole temperature, semilog plot coordinates, and log-log plot corrdinates. Other plots are available post-time from the computer.

When combined with Teleflow, Johnston's closed-chamber testing system, the SPRO Test System pro-

vides even better and faster data. Both the SPRO Test System and Teleflow are designed to function separately, but form an effective real-time DST system when used together.

Teleflow provides faster data than other conventional drill stem test systems on fluid type, flow rate and amount of recovery prior to surface flow. It also eliminates the human errors associated with etermining 'weak, medium or strong" blows in

the bubble bucket system.

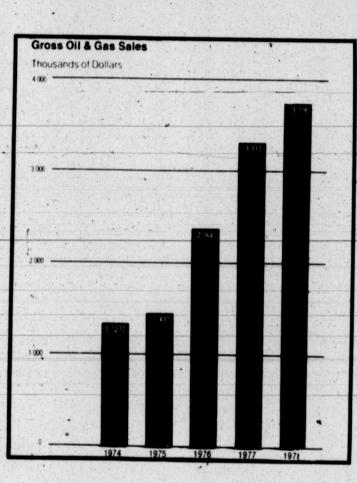

Johnston's Teleflow Test System comes as a package, providing everything necessary for accurate data in-terpretation, including the Multi-Flow Evaluator (MFE), Johnston Inflatable, or Pressure Controlled Tester (PCT) and the Teleflow computer complete with service supervision.

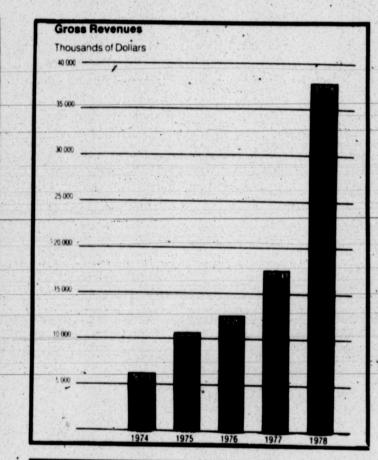

Another time-saving Johnston prod-uct is the Shock Guard drilling shock absorber, designed for long, troublefree operation while drilling through hard rock, intermittent streaks and broken formations.

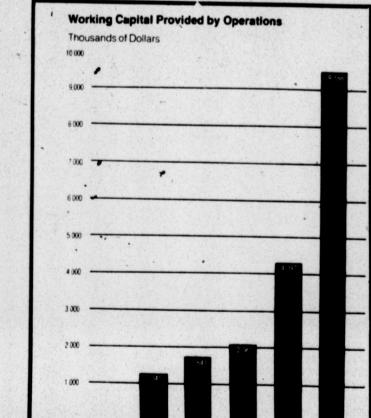

In a recent Texas panhandle well, a 9-inch Shock Guard was run in a 12%-inch hole where it drilled the 5,000 to 9,000-foot interval in 445 drilling hourss. Another Shock Guard then drilled the remaining interval to the 13,000-foot depth in 515 drilling hours. Both Shock Guards were serviced after the job and no wear was observed on the guide bushings or any other components. Since there was no wear on the guide bushings, the Shock Guards stayed rigid in the hole at all

# REPORT TO OUR PEOPLE

MGF Oil Corporation is an aggressive independent natural gas and crude oil explorer and producer. These graphs depict our growth during the last five years of our corporate history. Today, MFG is dedicated to building its reserves are amassed through our own exploration program and through acquisition by purchase or merger of producing and prospective non-producing

Currently, MGF owns varying interests in over 200 producing oil and gas wells located in Texas, New Mexico and Oklahoma. Sixteen drilling rigs operating in Texas and New Mexico, and Louisiana and substantial proven and non-producing acreage. MFG Oil Corporation has approximately 2000 shareholders residing in all parts of the United States and several foreign countries, and employs over 525 persons.

The Museum of the Southwest, a strong cultural force in Midland and surrounding area of the Permian Basin since 1966, has reaffirmed its basic objective as an educational in-

By ROGER SOUTHALL

Staff Writer

A new, major statement of purpose, endorsed and officially adopted by its board of trustees in mid-1979, is as follows:

The primary purpose of the museum is educational. The exhibits and collections exist to further the educational purpose

'In its primary functions, the scope of the museum will be the American Southwest, the time period will be from the earliest time until the present, and the subjects covered will be multi-disciplinary (i.e., art, history, natural science). In its secondary functions, the museum will have traveling exhibits to serve as a 'window on the world'."

ACCORDING TO JOAN E. HELLEN, the museum director, in its primary function, exhibits are set up for any period of time, even for as long as three years or more, or for an indefinite period. These are known as permanent exhibits.

In the museum's secondary function, the director explained, exhibits are set up for short periods of time and are usually so-called "traveling exhibits" from the Smithsonian Institution or from other museums or institutions. These are known as temporary exhibits.

With these definitions at hand, the official purpose of the museum has been promulgated by the board of trustees as

"THE PURPOSE OF the Museum of the Southwest shall be to enable the people of the Southwest to see significance in the features of the land to which they belong, to make the environment more interesting to them and the past more alive, to bring to them a realization of the values of their own cultural inheritance, and to stimulate them to observe and consider these things in relation to a broader cultural and historic

"Something for everyone," from youngsters to senior citizens, has long been the goal of the museum in its educational outreach to the public. Proof that it has succeeded is the fact that museum membership and attendance has increased each year since the museum was organized in the mid-1966s. There now are well over 2,000 members of the institution.

The institution now has its own "complex" on West Missouri and Indiana avenues not far from downtown Midland - the Turner Memorial Gallery and the Thomas Gallery, at 1705 W. Missouri Ave., the L.B. and Naomi Lancaster House at 1705 W. Indiana Ave., and the Marian Blakemore Planetarium in nearby

IN PAST YEARS, the museum has brought literally dozens of temporary exhibits to Midland for the entertainment and enlightenment of museum visitors.

A random sampling of outstanding displays include a collection of fine Indian basketry from a West Coast museum, a collection of guns and antique firearms from Belgian museums, an outstanding collection of priceless Old Master paintings from the Sarah Campbell Blaffer Foundation of Houston, a collection of abstract-expressionist paintings from the same foundation, an exhibit of treasures from 17th Century Spanish ships which sank off the Texas coast, an exhibit tracing the history and evolution of the Texas Rangers organization, and a display of fine Oriental objects and artifacts assembled from private collections and from several noteworthy museum collections.

These are only a few of the shows which have delighted museum patrons and city visitors in recent years.

AMONG "PERMANENT" exhibits or shows of long duration that have attracted throngs of vistors to the museum are the "Why Midland?" exhibit, presenting artifacts and photographs of early-day Midland, and an outstanding exhibit of Southwestern archeology which has been one of the special features of the museum during the past year.

Another long-time show which was well-received here was the Midland historical exhibit given to the museum by the Junior

Museum an 'educational' place League of Midland Inc., in 1976 as a Bicentennial gift to the museum and the people of Midland and surrounding area. Continuing its basic aim - education - are the classes held each summer at the museum for children and young people. The

classes, which have a "fun as you learn" approach, offer instruction in drawing, watercolor painting, printmaking, calligraphy and clay pottery.

THE MUSEUM IS A community institution, with financial support for its day-to-day functioning, as well as for its myriad programs and educational projects, coming from membership dues, from contributions from private citizens and corporations, and from bequests.

The museum does not receive support from any governmental agency or unit, other than from Midland County which is the official owner of the museum's Turner Gallery and which provides upkeep for the stately building, formerly the landmark home of the late Mr. and Mrs. Fred Turner Jr.

MEMBERSHIP IN THE museum is open to any interested individual, couple, family or business organization in the city, county or surrounding region.

For persons interested in working with and for the museum in any one of numerous capacities and fields of endeavor, Las Manos — "The Hands" — a volunteer service organization sponsored by the museum, is open to all museum members.

Las Manos sponsors the annual "Septemberfest" each year, which is one of the chief fund-raising endeavors for the museum, and its members work in all phases of the big arts-and-crafts festival. In addition, Las Manos members operate the Shop of the Southwest, the gift and book shop inside the museum, and members of the volunteer auxiliary also provide various other assistance and support to the museum and its programs

IN ITS EDUCATIONAL outreach to the community and the region, the museum has a strong docent program, to provide docents, or tour guides, for various important exhibits each

The guided tours are provided for school groups visiting the museum and for clubs and civic organizations making tours of the exhibition. The museum exhibits and special displays are always open to the public without charge. Hours are 10 a.m. to 5 p.m. weekdays, and from 2 to 5 p.m. Sundays. The institution s open on holidays except Christmas, Thanksgiving and New

VOLUNTEERS FOR the docent program are provided and trained by the Junior League of Midland Inc., from among its membership. The Junior League was one of the chief financial backers of the Museum of the Southwest at the time of its founding in the mid-1960s, and contributed importantly to its growth and development during the institution's formative years.

Guiding the museum's destinities is a 22-member board of trustees. The officers and board members of the institution are elected each December, to serve during the following calendar

Serving as president during 1979 was Rosalind R. Glenn, and other officers were Bruce Pearson, vice president; Mrs. George Thomas, secretary, and William H. Malone, treasurer.

SERVING ON THE BOARD during the past year were Dr. Brent Blonkvist, Mrs. Jack E. Brown, E.D. Dorchester, Mrs. John C. Dorn, Mrs. Lynn D. Durham, Edwin A. Dwyer, Mrs. James Isbell, Mrs. William H. Jowell, Mrs. Gordon S. Knox, Dr. Al G. Langford, Bascom Mitchell, W.F. Pennebaker, James H. Purvis, Mrs. Clarence Scharbauer III, Mark Schweinfurth, Pomeroy Smith, W. H. Thams and Edward B. Weyman.

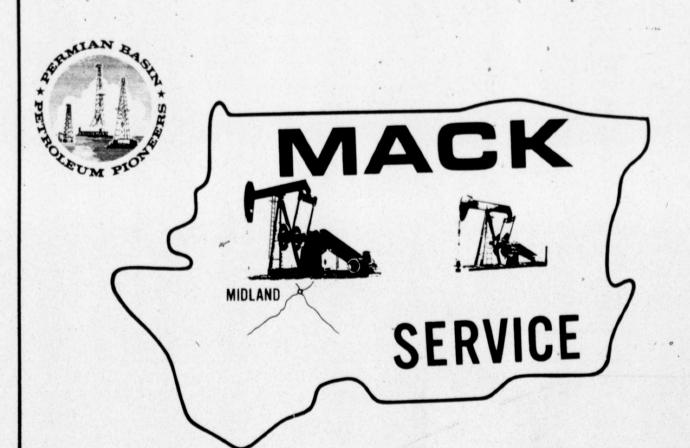

The museum director, Joan E. Hellen, came to Midland in July, 1979, from Davis, Calif., where for the previous four years she had served as assistant museum scientist in the anthropology department of the University of California at Davis, near Sacramento.

Miss Hellen holds both B.A. and M.A. degrees in anthropology with art history as an important secondary field of study.

the museum's board of trustees have placed renewed emphasis on the institution's prium services at the museum. (Statt Photo)

'progress in the permian basin'

## Permian Basin boasts complete carrier services

By LANA CUNNINGHAM Staff Writer

For a city the size of Midland -- or even an area the size of the Permian Basin - there is some of the best air service available at Midland Regional Airport.

Four major airline carriers and a fairly new commuter airline serve the Permian Basin with direct flights to many towns in Texas and with onestop flights to the east and west coast.

Texas International and Continental have served the Permian Basin for many years. Southwest started its Midland routes in 1977 and Eraniff began

in early 1979. The newest addition is the commuter airline, Permian Airways. It started in May 1979 and includes service from Midland to Lubbock, Amarillo, San Angelo, San Antonio, El Paso, Hobbs, N.M. Carlsbad, N.M. and Roswell, N.M. Seasonal flights also are scheduled for trips to Ruidoso, N.M.

FOR FISCAL YEAR 1978-79, a new boarding record was set -437,275 passengers, up about 25,-000 over the previous record set

the year before of 410,873. A master plan for Midland Regional Airport had forecast boardings this year would only be around 320,000. The actual count was 117,000 more than that

estimate and 50 percent higher. Although the major expansion and renovation has been completed at the terminal building, Col. Wilson Banks, director of

aviation, said plans are in the

works for updating hangars and facilities for general aviation next to the airport.

One hangar already has been constructed at the north end of the airport. "We need more hangars now that we have some of the improvements behind us," Banks said. "We need to start directing our plans and expenditures of funds to general

Flight Center. For passengers flying into Midland who need a form of land transportation, five rental car agencies are located at Midland Regional Airport. These are Hertz, Avis, Budget, Dollar and

National. And for those passengers who just need to get into either Odessa or Midland, taxis await each flight coming in, said Banks.

# boom at airport

By LANA CUNNINGHAM Staff Writer

Midland Regional Airport - with its new concourse, renovations, parking garage and rebuilt runways - could easily exceed a \$50 million price tag, and that isn't including the price

This airport which serves the entire Permian Basin and sees more than 400,000 passengers boarding planes, started in 1928 with one hang-

Sam Sloan, a World War I pilot, had asked for and received in 1928 a public subscription for a suitable landing field and small steel hangar. That hangar still stands on the southeast corner of the present airport property.

On July 1, 1939, the city of Midland acquired from Midland Airport Inc., 222.97 acres of land, a 1938 two-door Chevrolet sedan, several stucco and frame structures, a metal hangar, 17,500 gallon underground storage tank and several other minor pieces of property for \$14,000.

CLARENCE SCHARBAUER THEN deeded 1,328 acres over to the city in November 1940 and July 1941. This proved to be the catalyst for the city to immediately initiate a \$125,000 project which included 4,500-foot runways, a new tower on the Terminal Building and lighting of the runways

The airport had become a thriving business when in June 1941 the U.S. Air Corps notified the city that a bombardier training school would be located at the airport. Midland Air Force Base was constructed at a cost of \$5 million and was reported to be the largest bombardier school in the world. It was operated until late 1946.

While these training operations were going on at the main facility, a city airport was built at what was then north of Midland. Today, it is known as Midland Air Park and city buildings are beginning to surround it.

On Jan. 25, 1949, the Midland City Council accepted a contract with the federal government to take over the Air Base, thus setting the stage for development of a modern air terminal.

In August 1958, work began on a \$700,000 Terminal Building, and was completed by January 1960. In 1962 and 1963, two runways were constructed. In 1966, work began on a ramp area in front of the Terminal Building, a high-speed taxiway and a new taxiway complex.

BUT, IN RECENT YEARS, as the Midland-Odessa area grew, it became apparent the terminal building and runways were not adequate to handle the increasing business.

Since 1971, about \$20 million in capital improvements has been put into the airport and runways, said Col. Wilson Banks, director of aviation for the city of Midland.

The Terminal Building itself has undergone a complete face-lifting and expansion. What stands today is a modern, sleek building handling four major commercial airlines, five rental car agencies and more than 400,000 passen-

The change began about three years ago as a bond issue for the changes were approved by Midland voters. The plans were drawn and a construction firm approved. And as the work

progressed, changés in the plans were made to accommodate the rapid growth in Permian Basin air travel. One of the first major changes completed was

the rebuilding and extending of a runway by 2,500 feet, Banks said. "This gives us a runway length of 9,500 feet. This enables us to handle any airplane that any air carrier wants to bring in here," he noted.

THAT ADDED LENGTH WAS needed when in February 1978 - shortly after that runway was completed - Braniff landed an SST Concorde at Midland on a test flight.

When the airport expansion was started, only two major air carriers were doing business out of Midland - Texas International and Continen-

"Then Southwest Airlines came into the picture and we had to go back to the drawing board," Banks recalled. "We had an idea boardings would increase dramatically with Southwest, but we were not ready for a 50 percent increase which has been the case.

More space at the south end of the Terminal Building had to be added for a Southwest ticket counter and office.

Then Braniff threw its hat into the ring in early

'We had an idea boardings would increase...but we were not ready for a 50 percent increase...

— Col. Wilson Banks

1979, and the city had to change the plans and extend the building even farther.

"LOW FARES, THE GASOLINE crunch and lowering the speed limit have made more people think about flying rather than driving somewhere," Banks said.

Original plans called for the baggage pickup area, which was just a driveway with a platform for the baggage, to "be fancied up some," Banks said. But with increased passengers, the planners changed that to a baggage carrousel. Then, after Braniff came in and it looked like there would be as many as four aircraft unloading passengers, plans were changed again.

This time the building was extended to the north, a second baggage carrousel added and the five rental car agencies moved into the struc-

To handle the increasing number of passengers with ease, the city added a concourse at the back of the original building. This area can handle four airplanes loading or unloading passengers - all through enclosed jetways to avoid facing the West Texas weather extremes.

Two other areas can handle passengers, but without the jetways.

A NEW PARKING GARAGE holds 720 cars in

front of the Terminal Building. While that was being constructed, Banks said, cars had to be parked on a dirt lot west of the building. That lot still is being used today by persons who must

leave their car several days. The majority of the construction work was completed in June 1979 and a dedication service

But improvements to the airport have not

The air cargo building - which formerly had handled only Texas International and Continen-- is being expanded for the other two

A hangar for general aviation has been built on the north end of the airport property.

"PLANS ARE IN THE MILL to install a new road system coming into the terminal." Banks said. "This road will connect with FM 1728 and will be an improvement for people coming in from the west. And after the Loop Road (Loop 250) is built, it will help people who live in North

A separate service road for vehicles delivering goods or picking them up at the airport also is needed, he added.

There is a possibility of getting federal funds to aid in constructing the roads, Banks said.

While the airport is a self-supporting facility in the city system, Banks said the federal funds help on getting necessary additions, such as roads or runways.

The Federal Aviation Administration should be paying about \$1 million of the recent \$6 million on the Terminal Building improvements. And the federal government pays about 80 percent of the cost for new runways and taxiways,

BANKS EXPLAINED THE federal funds actually is money which persons using Midland Regional Airport have paid into the government. Taxes on airline tickets, for example, go into a trust fund of the government. A certain amount of this fund is allowed to go back into airports.

"That's why we've never hesitated to ask for this money," Banks said. The airport remains self-sufficient through landing fees charged to the air carriers, rental from businesses in the general aviation area, a fee on gasoline pumped into general aviation airplanes, rent paid by rental car agencies and the restaurant and fees charged for use of

the parking lot, Banks explained. While the regional airport has been sprawling out over the land, Midland Air Park also has grown, Banks said

TODAY, ABOUT 140 PLANES are kept there. And last fall the Midland City Council passed a resolution saying the facility would be retained in its present spot north of Midland College for the next 20 years.

"It's a viable facility and we need to do some work there. We need some more hangars, Banks said.

"Relocating Air Park would be extremely

completed.

By WANDA MOUTON of directors. They will Texas Lifestyle Editor

Upon admission, the Green Tree Country Club, Midland's third amount paid will be \$2,-500 membership fee, plus country club, is expected \$2,000 initiation fee for a to begin operations in August.

Planning for the coun-try club and surrounding sored non-voting mem-Green Tree Country Club berships can be pur-Estates began a year chased for a total of ago, according to Frank Mullins, officer in Midland West Development, a corporation formed specifically for this development.

Construction is well under way on the 36,000foot clubhouse. Facilities will include an 18-hole golf course, indoor racquetball courts, lighted tennis courts, swimming pool, handball courts and tennis clubhouse.

The clubhouse exterior is designed to be redwood and stone, with a copper roof and skylights. The back of the club will be almost entirely glass walls overlooking the golf course.

Features of the clubhouse include a luxurious dining room that can be converted to smaller meeting rooms, hydropool, spa, sauna, pro shop and other entertainment facilities.

The basement is to be a center for food storage, food preparation and lockers.

Developers are especially proud of the golf course and its fully computerized watering sys tem, according to Mul-

"This is only the third golf course in the United States to have a system which operates entirely on computer," he said.

The system is designed to save dollars and manpower.

The course is expected to be completed and open for operation in late February or early March, according to Mullins.

"The course is not long in yardage, but will be a demanding one," he said. He added that all of the course "rough" is grass or water.

The course includes 12 acres of manmade lakes which have already been stocked with fish. All lake bottoms are sealed.

Board of directors for the Green Tree Country Club and the Midland West Development are John W. Wood Jr., Jack Allen, Sam Conner, Pete Eastup, W. C. Osborne, Edmund Rigatti, Mike Richardson, Aldredge Estes Jr., Frank Mullins and Jerry D. Mobley.

Memberships are offered in four classes, including resident, associate, junior and companysponsored.

The resident members must have a primary residence within a 100mile radius of the City of Midland and will have use of all the facilities of the club. They shall be entitled to vote, hold office, become a member of the board of directors, or serve on any committee created by the board of directors. Upon admission, the member shall pay \$2,500 membership fee, plus \$2,000 initiation fee for a total of

The associate mem bership is a non-voting membership and is entitled to use all facilities of the club except the golf course. Upon admission, an initiation fee of \$1,500 will be due. This membership can be converted to a resident membership at any time by paying current resident membership fee. Dues for this membership are to be 60 percent of regular dues.

Junior membership is a non-voting membership for persons under 32 years of age. They will have use of all the facilities of the club. Upon admission, the member shall pay \$1,400, \$500 deposit and 36 monthly payments of \$25 each. At expiration of this period, they must either converted to a resident membership by paying current resident membership fee or terminate their membership.

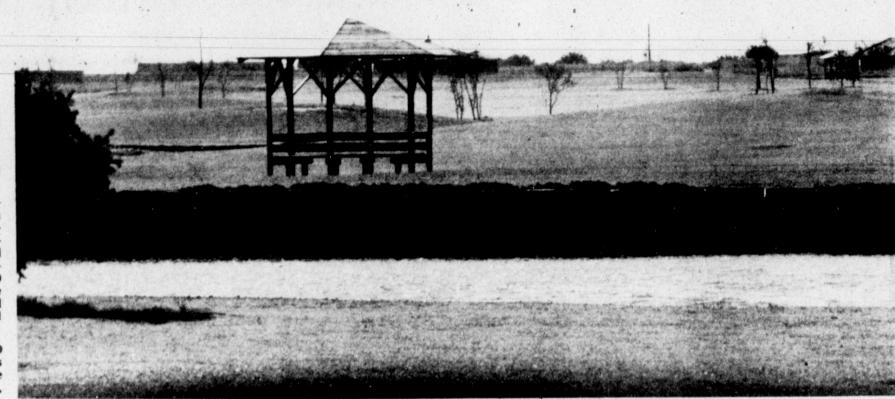

The company-sponsored membership must designate the person for whom the membership is intended. The first company member shall be entitled to vote, hold office, become a member of the board of diretors or serve on any committee created by the board

## Midland's Salvation Army riding Tall City growth boom

The Salvation Army in Midland is riding the same growth boom that characterizes other facets of Tall City life.

For the Army, that has meant the addition of a new facility. Captain Robert Vincent, director for the organization locally, said that the Army's new 11,000 square foot center located at 3500 Park Lane will enable the Army to provide more services than before to Tall City residents who need assistance, or who are down and out on their luck

"Our total concept is to have a neighborhood program applicable to the whole family in which we can help the family spiritually, economically and educationally," Vincent said.

The new \$374,000 facility was built mostly with funds raised locally, Vincent said. Operating it and the Salvation Army locally is a small platoon of 14 paid employees, several of whom were added through the

facility. More than 50 people volunteer to work with the Army over the course of the year, Vincent said.

mas program and a day care center.

Vincent, who has spent six of his 18 years with the Salvation Army in Midland, said the day care center and clubs for pre-teen and teen-age youths are among new programs which the Army originated following completion of the center.

The Army helps several thousand families each year, Vincent

Statistics for 1978 show that 4,592 adults were helped through various Army programs. More than 2,005 were helped through the Emergency Home center at the Army. The program provides temporary housing for transients and others who might need a night's lodging. Another 2,552 were aided through the Family Service Department, which handles any sudden emergencies that may confront a family.

Vincent said the Army bought new coats and shoes for 510 school-age children in 1978.

The Christmas Program aided 1,972 people, he added. In addition, the Army provided of

# Golf courses change

By RICHARD VINCENT Sports Writer

Although the saying goes that the more things change the more they stay the same, it's certainly not true of golf courses in Midland. Changes are evident everywhere, and they defini-

tely seem for the better. For starters, Hogan Park Golf Course, the city's

municipal facility, recently unveiled its new clubhouse and storage barn.

But that's just part of what HPGC professional Rex Worrell said was a \$500,000 reclamation job. The topper, of course, is the nine-hole addition that Worrell said is currently "ready for play" but won't be opened until "the first part of April because there's not that much play this time of year."

With a spiffy 27-hole track now available, Worrell predicted a jump in participation and revenue. We expect the number of players to go up about a

hours. It should increase it (revenue) by 33 1/3 percent." Worrell said.

There are, according to Worrell, numerous advantages that the new facilities offer.

He said having the extra nine holes will give course superintendant Robert Campbell, a newcomer to HPGC, "an opportunity to close nine holes and work on them without disturbing play.'

And, regarding the brightly colored clubhouse, Worrell said, "It's just real nice for the customers because they have a place to sit down and relax or have a sandwich.

OVERALL, SAID Worrell, "It's just got to help some. We'd like to have a little better junior program. We like to think we've got all the facilities any modern golf course should have. We think we can service golfers in Midland as well as anywhere."

In addition to the facilities, a pair of new faces will be seen on Worrell's staff. Steve Hendley, Worrell's top hand, is leaving the golf business and will be replaced by Terry Wilks. Also, David Teichmann will join the crew.

As far as tournaments go, 1980 looks to be another banner year at HPGC. Worrell said several biggies adorn the docket, including the Kiwanis event, Midland Jaycees, Eagles State Convention and men's West Texas and New Mexico Golf Association

That's not mentioning the package of men's and women's tourneys that seem to happen almost weekly during peak golf season.

On the private membership club scene, meanwhile, Ranchland Hills Country Club head professional Bill Keys reports that a major three-year refurbishing program is under way.

"We've completed remodeling of the clubhouse,"

said Keys. "The entire club has undergone changes. We're now in the process of reworking the golf course adding sand traps, water hazards, contouring and grassing the rough. We're also in the midst of changing the types of grass we have on our greens from tift to a bent grass."

WHY MAKE THE course alterations? According to Keys, the reason was simple.

'Just so we'll have a more beautiful, more challenging golf course. We started in the winter of last year. When it's finished, it should be one of the best tests of golf in West Texas.'

Helping Keys and his main assistant Price Courter operate the RHCC pro shop, which incidentally has been featured in national golf magazines, is newcomer Bert Wimberly.

Looking to the new year, there's a bevy of tournaments on the RHCC schedule. Among the gems are third on weekends, but not much during working the annual member-guest Stampede, the four-manteam Blowout, the Fiesta Del Ranchero couples championship and a co-hosting with the new Green Tree club of the West Texas-New Mexico seniors

> But that's not all, especially where youth golfers are concerned.

> "One goal we have for 1980 is to improve our junior program," said Keys. "We want to have more events for club juniors; we want to stimulate their inter-

> "Things are looking up at our club. It's (1980) going-to be a great year," Keys said optimistically. Over at another of the Tall City's private clubs, Midland Country Club, assistant pro Terry Lester said some remodeling has been done.

Lester said the women's locker room received a

More alterations may be in the offing. "They're thinking about it," he said.

A HIGHLIGHT OF the MCC 1980 schedule will be the Wild Scatter affair, which Lester said is held

Then, of course, the MCC season would never be complete without the nationally prestigious Ernie Nelson member-guest event.

Another private club has sprouted up in Midland, Green Tree. According to reports, the layout, which features an 18-hole golf course and a 36,000-foot clubhouse, should be operating sometime in 1980.

The course, with its unique fully computerized watering system, is expected to be in use by late February or March. Full club facilities aren't xpected to be ready until the summer or fall.

Certainly, 1979 was a year of change for local golf courses. And the results of such actions will be felt not just in 1980, but for many years to come.

## Timely changes in store for Texas Instruments in '80

Things are ticking right along at Texas Instruments' Midland facility.

And the manufacturer of electronic watches and other electronic devices

has some timely changes in store for 1980, according to company officials.

Texas Instruments announced in March 1977, that it would start construction of consumer products at the Midland site. Those consumer products would include electronic watches and calculators, officials said.

First the company leased the 66,500 square-foot Windecker building, formerly used for airplane construction, at Midland Regional Airport.

TI indicated the lease arrangement was only temporary and that at a

TI indicated the lease arrangement was only temporary and that at a later date it would construct a permanent major facility on a 200-acre site near the airport.

The first building on that new plant site, a high-rise steel building which ultimately will become a warehouse, began in November 1977.

Construction on other portions of the new plant were started in October 1978, and the phase of the facility now under construction, when completed, will comprise 330,000 square-feet, according to TI spokesman Dick Perdue of Dallas.

Perdue said the standard concept for TI plants now under construction in Texas involves a "central spine" which interconnects modules attached on either side of the spine "much like a shopping mall."

The modules can be constructed and occupied in increments so that construction may be proceeding on one portion of the building while another portion is actually occupied and in production.

Such a construction concept allows the company to start production long before the total facility is completed without inconveniencing those workers already occupying the building, Perdue said.

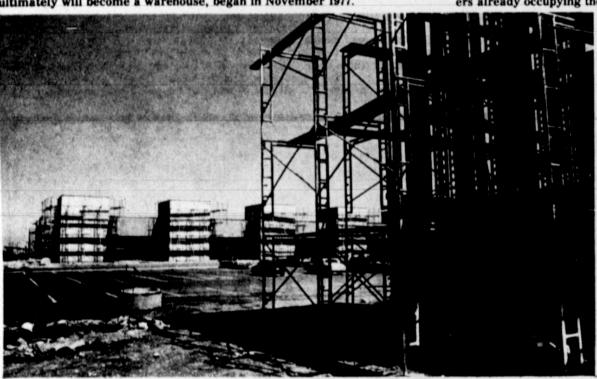

The first module in TI's Midland facility currently is being occupied, he said, and three other modules are scheduled to be completed between now and the first quarter of 1980.

Plant manager at the Midland facility is John Neill, who formerly was plant manager of the company's Taiwan facility for five years. Neill has been in Midland since May and replaced Bill Steele, the original plant manager here, who moved to Sherman.

The Midland plant hired its first employee April 4, 1977, and the first calculator constructed at the facility was completed April 25, 1977.

The company then added microelectronic digital watches and the first watch was completed May 9, 1977.

Products manufactured here include electronic learning aids, handheld electronic calculators, desk model calculators and several types of electronic watches for men, women and children.

Construction work continues on the Texas Instruments plant west of Midland. One module of the facility are occupied and

three other modules should be completed in the first quarter of this year. (Staff Photo by Bruce Partain)

# C&K Petroleum in exploration

C&K Petroleum, Inc., a Permian Basin oil and gas exploration and production company since 1953, is headquartered at 1 Houston Center,

Houston.
The concern's Midland office is headquartered

in the C&K Petroleum Building.

The company's activities are concentrated primarily in known petroleum producing areas within the United States — offshore and onshore.

C&K also owns acreage positions in the Canada frontier areas, offshore Labrado and in the

Beaufort Sea.
In 1974, the company had gross income of \$9,356,000. In 1978, the gross income was \$23,403,000, representing an average growth rate of 26.5 percent.

In 1978, the company's 150 employees drew a payroll of \$4,633,000.

The company in 1979 offered to investors

through a formal public offering up to \$15,000,000 in limited partnership units in a newly-organized program. The company also will offer up to

\$15,000,000 in 1980.

The Chambers & Kennedy organization has engaged in oil and gas activities since 1953, and in 1969 was incorporated and became a public

company in 1971.

The activities of C&K's Midland office are supervised by W. D. Kennedy, executive vice president. Kennedy also is a director of the

"The Midland area is one of the most important areas in which C&K operates, and has historically been an extremely important part of our comapny's oprations," Kennedy said. "We consider Midland an excellent place to do business and we plan to continue expanding our oil and gas exploration activities."

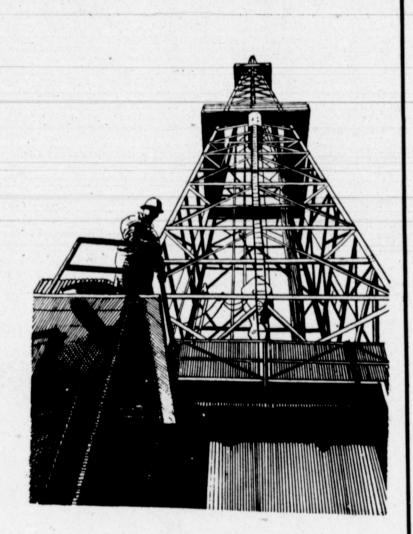

All systems are go in Hogan Park Golf Course's new golf shop, located near the con-to-be-opened nine-hole addition. Unveiled in late summer, the new shop,

operated by pro Rex Worrell, offers clients of the municipal facility a comfortable place to relax before or after a round of golf. (Staff Photo by Bruce Partain)

## Business booming at Permian Basin Graduate Center

Staff Writer

In its second year in a new building, business continues to boom at the Permian Basin Graduate Center.

The private institution in downtown Midland is designed primarily to meet the needs of the oil industry.

Starting its 11th year of existence, enrollment at the school is "up tremendously," according to Lola Igou, registrar and course coordinator.

The growth began last year with a 46 percent enrollment jump after the graduate center finally moved into permanent quarters in the former Reporter-Telegram building at 501 W. Illinois Ave.

Registration in 1979 continued that trend, with 2,666 students, up from

Another new look is scheduled soon, with the outside of the red-brick building set for a stucco covering to overcome persistent leaks through the old mortar, school officials

Before moving into the current quarters, classes were arranged from an office in the Gulf Building, andclasses were held wherever a room could be found, from building basements to the planetarium to the Pe-

The lush new facilities have helped give more visibility and a stable feeling to the facility, "and out-oftown instructors say this is one of the finest facilities they've seen," Ms. Igou noted.

Courses offered at the graduate center are designed to meet the needs of the growing oil industry. Some are one-of-a-kind offerings created especially for Permian Basin requirements, she said.

The center will offer about 57 courses this semester, up from 39 last

Subjects for the non-credit courses include geology, geophysics, engineering and land and oil manage-

Highly specialized instruction such as the recent Ninth Annual Symposium on Global Techtonics vies for position along with courses in calligraphy, business management, investments and group dynamics in the graduate center's list of offerings.

Some of the unique courses offered only here are "Prospect Evaluation for Non-Geologists" and "Oil and Gas

Fundamentals," according to Pat Beck, executive director of the cen-

In addition to the non-credit courses, the center offers a degree program in geology through The University of Texas at Arlington with the assistance of The University of Texas of the Permian Basin in Odessa.

Courses are taught by well-known consultants from all over the country and by a wide variety of local ex-

"Midland has probably the greatest wealth of educated people — especially in oil-related fields," Ms. Igou said of the area teachers:

While many of the local instructors donate their time to the center, stipends for many of the consultants can range up to \$1,000 per day, Ms.

Budget for the non-profit organization in 1979 totaled \$150,000 - all raised from student fees and tuitions. The center takes no state or federal funds, and depends entirely on revenues generated from courses and private donations, Ms. Igou said.

Probably 90 percent of the students at the center already are employed by oil companies here, Mrs. Beck added, and the fees usually are paid by the

There are "quite a number," however, who attend the center to gain initial knowledge about the oil indus-

"Some people who have an interest in the oil industry take courses just to find out what's going on," she said.

While 75 percent of the registrants come from Midland and an additional 11 percent are from other parts of the Permian Basin, an appreciable number come from Houston, Dallas and as far away as Alaska, California, Delaware and Pennsylvania.

Course offerings sometimes are suggested by potential students: A recent class in oil and gas accounting for secretaries grew out of requests from oil industry secretaries who wanted to improve their job perfor-

"We welcome suggestions for courses," Mrs. Beck said. "If we get a request for a class with enough interest and we can find a good, qualified instructor, we'll offer it.

The center is run by a staff of five full-time and one part-time employees. Jack G. Elam is president of the center and a 15-member volunteer

facility.

# Hilton's twin towers striking addition to city skyline

By BILL MODISETT Staff Writer

The Midland Hilton's twin towers rise out of the sands of the Permian Basin, a striking addition to the Tall City's skyline.

Until late 1979, the Hilton could boast only one of the 11-floor towers. But ribbon-cutting ceremonies were held for the second tower in October

With the addition of the second tower and its 120 guest rooms, the

Midland Hilton rupw offers a total of 270 richly appointed guest rooms near the heart of Midland.

Guests at the Hillton will be pleased with the luxury and spaciousness offered in the rooms. The rooms are encased in deeply smoked glass and a modern, marble-like finish. But the Hilton offers much, much more.

Housed in the Hilton are two fine restaurants, the Charolais for gour-met dining and the Courtyard; and two lounges, the Discovery Lounge and the Veranda loll by bar.

A "top 40" dance band entertains nightly in the Discovery Lounge, according to manager Andy Graham.

The recently-opened South Tower rises above the new Permian Ballroom and is connected to the North Tower via lower-level parking, lobbylevel restaurants, lounges and a second-level pool area.

The hotel's atrium soars four stories above the main lobby and is tastefully decorated with lush, eyepleasing vegetation.

Permian Ballroom, a second-level

facility in the new South Tower, can accommodate up to 550 persons for banquets and up to 1,500 for meetings and conventions, Graham noted.

For smaller meetings and gatherings, the Hilton offers three smaller meeting rooms - the Arbor, the Trellis and the Civic, Graham said.

Midland Hilton has rapidly established itself as a premiere social center for the Tall City, but history is not forgotten in the lovely facility.

The twin towers rest on the site of

the old historic Scharbauer Hotel, a decades old landmark in Midland.

The Scharbauer Hotel was purchased in 1973 and demolished to make way for the Midland Hilton.

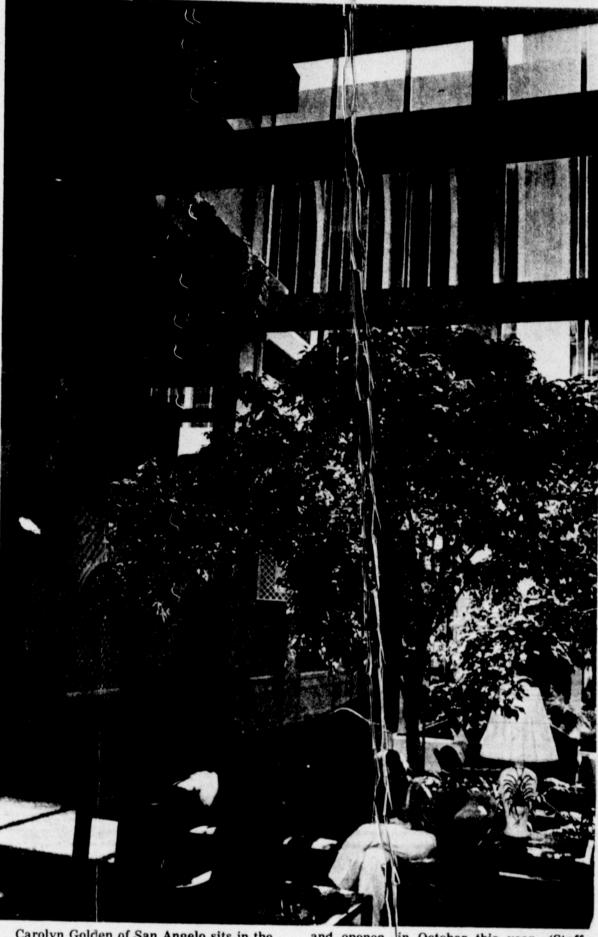

The venture originated as the project of 55 Midlanders who believed the city should secure an outstanding lodging facility.

Basin Headquarters Inc., a subsidiary of Midland Southwest Corporation and a real estate investments firm, continues management of the Hilton as it has for the past three

The facility is owned by Prudential

Insurance Co. of America. The hotel's North Tower was opened in June of 1976.

In addition to the luxurious accommodations, lounges, restaurants and exceptional meeting facilities offered in the hotel, the Midland Hilton complex also serves as home to several firms which have leased offices or

Carolyn Golden of San Angelo sits in the spacious lobby of the Midland Hilton. A second tower to the hotel was completed

and opened in October this year. (Staff Photo by Milke Kardos)

## **Serving The Permian Basin Since 1957**

We are now in our 22nd year of service to an industry that has progressed and flourished. We are proud to have been a part of the growth of the oil industry and the Permain Basin. Also, we are looking forward to many more years of continued

#### Midland Hilton listed in Mobil Four Star Guide

One of the more significant physical changes in the face of Midland was made in 1979 when the Midland Hilton completed its expansion program adding a twin tower to the downtown hotel at Loraine and Wall streets. Construction of the original Midland Hilton began in 1972 on the site of the

old Scharbauer Hotel. The hotel opened its doors to the public in the summer of 1976. The structure is one of the most beautiful in the downtown area, and Andy Graham, the general manager, is a firm believer that it is the finest hotel in West Texas.

In May 1978, the Midland Hilton was recognized for "distinguished achievement in service, cordiality and overall quality by its entrance into the Mobil Four Star Travel Guide. This prestigious distinction is shared with only 123 other hotels in the country, Graham said.

The hotel now consists of two identical 11-story towers which are connected by lower level parking, lobby level restaurants and lounges, and a second level pool area.

A four-story atrium, filled with lush green plants, accents an unusual smoked glass and white marble-lite

**Andy Graham** 

There are 150 guest rooms in the north tower, and an additional 120

guests rooms in the south tower The south tower was erected a bove the existing ballroom and was completed in October 1979. In all, there are 270 luxurious guest rooms, two great restaurants, two exciting and beautiful lounges and a variety of private banquet rooms, shops and offices, Graham points out.

The hotel's coffe shop, The Courtvard, serves breakfast, lunch and dinner seven days a week, featuring light snacks and full meals amid a setting of springtime.

"The Veranda Bar is our off-the lobby hideaway designed for pleasand intimate conversation and coctails," Graham said. "And the Charrolais Dining Room features the very finest of continental and southwestern specialties, including prime rib, se afood and steaks."

Graham believes the Discovery Lounge, with its unusual soup, salad and sandwich lunch buffet, is Miciland's favaroite fun spot. "Music, dancing and entertainment six nights a week are in a setting of castlell elegance," he said.

The hotel has several meeting rooms, the largest being the Permian Ballroom in the south tower. The ballroom can seat up to 550 for banquets and up to 1,500 for meetings and cam be divided into five sections four smaller functions.

In addition to the Permian Ballroom, there are several private function rooms throughout the property. "Our profesional and dedicated staiff is ready to assist individuals or organizations in planning meetings, conference or social function," Graham

Employing more than 170 Midlanof residents, the Midland Hilton not only has proved to be an asset to the City of Midland, but to the entire Southwest region. "Many of the distinguished visitors traveling through the expanse of West Texas often can be located on one of our 22 floors," Gra-

#### Telephone customers become 'communication consumers

In little more than 200 years, the telephone has advanced from the realm of simple electro-mechanical switching and basic voice transmission to the more sophisticated world of computers - which transmit not only voice, but video and data com-

munications. Telephone customers are becoming "communications consumers," expecting more service and receiving a greater selection. Custom Calling Services is an example. Electronic Switching Systems permit new uses for the phone, such as call waiting, speed calling, call-forwarding and three-way calling.

These are just a beginning.

In Chicago, Bell Telephone Labortories — the research branch of the Bell System — is testing a

Looking over computer printouts is one of the many executive duties performed by Jean Parks, district mananger of Business Installation and Repair in Southwestern Bell's Midland office. (Staff Photos)

#### Rogers Ford has served Midland for 15 years

Rogers Ford Sales, Inc., of Midland has been awared the Distinguished Dealer Award 11 years, and also has been the recipient of the Distinguished Service Citation.

The company has been in business 15 years, serving the entire Permian Basin Area.

The company, which employs 75 persons, recently became of of the 100 dealers in the United States to be awarded a 9103 Model "A" Replica Car for outstanding sales achievement. Included in the award was a trip for Mr. and Mrs. Bill J. Rogers, one of the company's owners, to mainland China and Hong

The other owners of the dealership are M. H. Endsley and Meil Florer.

lightwave communications cable system (pure glass fiber optics) which can handle twice the number of calls in much less space than conventional telephone

cables. Yesterday, a voice traveled over open wire strung on telephone poles. Today it is transmitted via

microwaves and underground cable. Tomorrow it

will be sent in pulses of light. Someday, residential customers will use telehone-accessed computers to bring needed information to television screens in their homes. Business cutomers eventually will control office operations entirely through computers. With a push of a button, these electronic systems will transfer funds, forward mail, transcribe memos, control heat and light levels - and perhaps perk the morning cof-

Southwestern Bell is changing to meet customer needs, and in Midland, as elsewhere, that means reorganizing to provide improved service for cus-

According to Clay Styles, district mananger Residence Service Center, the company is reorganizing to better serve three markets - business,

residence and network. "Our basic reason is to serve our customers better. We're trying to respond to changing demands of telecommunications customers.

"The mission of the business segment is to deal with all business customers, whether they have one line or hundreds. The residence department is divided into three functional groups: residence marketing, responsible for marketing research, the identification of customer wants and needs, long-range planning, etc.; residence services, responsible for installation and repair and the operation of business office and PhoneCenter stores; and public service, which coordinates the installation and maintenance of coin telephones.

"Customers are doing their own thing with phones these days," Styles said. "There are approximately 6.9 million households in the Southwestern Bell area. In Midland, there are more than 27,400 residence main stations, and more than 6,880 business main stations - not including about 8,387 private branch exchange phones (163 PBX systems). Including business and residence extensions, Southwestern Bell serves 78,726 telephones with 25,036 lines." Styles said Midland is "home base" for more than

670 Bell employees with a total yearly payroll of about \$11.4.

To further underscore the firm's investment in the Tall City, Styles said Southwestern Bell last year spent \$2.5 million upgrading telephone service in Midland and the surrounding area.

"The company placed underground cable and conduit," Styles explained, "along North Midland Drive, North Big Spring Street, West and East Highway 80 and along the Garden City Highway to provide improved service and new facilities for residence and business customers - especially the new Texas Instruments, Michelin and Flintcoat plants, which are three important industrial additions to

The area's projected construction budget for 1980 is \$4.5 million and includes new facilities between the Mutual 68 and Oxford 69 central offices and new buried toll cable from Midland to Monahans.

"The total expenditure on the latter is \$4.7 million

of which \$2 million will be spent in Midland," Styles Those 1980 construction dollars, however, do not

include money being spent on central office improvements or additions, he said. "For example, sometime this year the company

will introduce an Electronic Switching System for the Oxford 69 exchange. The cost of this project will be about \$4.6 million. Last year the company spent more than \$417,400 on the building addition to house the equipment."

In addition to central office improvements and new construction, the company recently announced the opening of a Phone Center store in San Miguel Square. This new facility is designed to help the company better handle growing communications demands and provide a pleasant shopping place for THE RIGHT SIGNAL TO CALL CLASSIFIED ADS - 682-6222

## Fire Department has expanded capabilities

Staff Writer

Changes are coming fast' and furious for the Midland Fire Department - with new personnel, buildings, equipment and expanded capabilities.

During the past year, the department has opened a new substation at Haynes and Midkiff drives and begun construction on a new department building on

Completion date for the new building, which will include separate offices for the deputy fire chief, fire marshal, assistant fire marshal and two inspectors, was scheduled for late 1979.

"The new building," said Fire Chief Raymond Lewis, "will be more centrally located. This building was built in 1954, and it looked like downtown Midland would develop in this direction, but it

"THE NEW STATION won't change our response time any on fire calls because we can call out trucks from the other stations, if the fire is too far from the new station. As far as the response time on the EMS (ambulance) runs, a lot depends on where we are able to station our ambulances.

"Right now it's just over three minutes, and that is to any part of the city. If we can station the ambulances where I want to (one at the New Jersey Avenue and Baird Street Station to cover the south side, one out of the old central station to cover the west side and downtown, and one out of the new station to cover the north part of town), we could equal or maybe even better our response time,"

When the new station opens, Lewis said the substation at Circle Drive and Delano Street would be

"We will go back to six stations in town. We're now operating seven, with the new substation at Haynes and Midkiff. Plus we have the Crash Rescue Station

at Air Terminal," Lewis said. With the addition of three new men, there are a total of 115 fire department personnel, with 102 of these being fire suppression and EMS-personnel, according to Lewis.

AMONG THE SEVEN stations, three shifts rotate with 34 men on each shift.

Each shift works 24 hours on, 24 off, 24 on, 24 off, 24 on and 96 off.

We have to...pay overtime pretty regularly to keep the 34 men on each shift, especially with vacations and some in rookie school, but this schedule gives them time to take a fishing or hunting trip,"

Equipment also joins the ranks of additions during the past year.

In March, 1978, the department received a 1,250gallon pumper and, in July, a 1,000-gallon chemical truck that is kept at the Crash Rescue station.

be carried up stairs," Lewis said.

"SOME OF THE bigger cities are getting more sophisticated, but we haven't found a need for it, although if our buildings keep getting taller and taller, we might.

In December, 1978, advanced telemetry or lifesupporting equipment was installed in the ambulances, and paramedics familiar with the equip-

ment were on duty. Chief Lewis said the equipment had arrived earlier, allowing the paramedics to train with it, but they were not able to have it installed in the ambulances until December

"Now we have the capability of going out on heart attacks and hooking up an EKG strip, and we can send it right to the hospital," Lewis said. "The doctor can tell them what kind of drugs to administer, and with heart or shock patients, they can start an

"They have a standing order on IV's of D5-W, which is a dextrose of some kind. If you watch Emergency,' you must know they've sold gallons of D5-W, because that's the first thing they tell them to do," he joked.

FIRE RUNS IN the city of Midland during the nine months of January through September 1978, totaled 850, compared to 842 for the same period in 1979, averaging 200 a month. Ambulance runs for the same time periods were 1735 compared to 1974. Fire runs in the county totaled 155 for the first nine months of 1978, compared to 141; and ambulance runs were 299 compared to 310.

Fire losses, Chief Lewis said, were up considerably during the past year due to two or three large house fires. Insurance claims due to fires in 1978 totaled \$95,865 through September. Claims for the same period in 1979 were \$171,274.

'But one claim during 1979 was close to \$60,000,"

Lewis said he thought the number of fire runs from 1978 to 1979 was down because people were becoming

"Our Fire Prevention Department is doing a terrific job on inspecting the businesses. Anyo wants inspections on their homes just has to call and we'll be glad to do it. But we can't just go out and inspect the homes like we can the businesses."

"THE BUSINESSMEN are glad for us to do that. No one gains from a fire.'

Lewis suggested that ambulance runs were up because of the growth of the city.

"When we went into the ambulance service, we were told that we would probably average one run per day for each 10,000 population. I think now they're estimating our population as between 70,000 and 80,000, and we're averaging between seven and eight runs per day," he concluded.

Chief Lewis has worked for the city of Midland for "The 11/2-inch hose is still our basic tool. It's more than 30 years, 27 of those with the fire departpre-connected to the truck, all of which are loaded ment. On January 15, 1978, he was promoted to with water - although the amount varies from 150 fire chief. Shortly thereafter, the deputy fire chief to 1,500 gallons. It's a quick attack line; it has an retired, and James Roberts was promoted to that adjustable fog-pattern nozzle, and it's light enough to position. Roberts has been with the department 19

### AC Drilling celebrates 15th year

Virginia Shrum is the owner of AC Drilling Special-es. Inc. of Odessa — a firm that has operated in the ties, Inc. of Odessa - a firm that has operated in the Permian Basin 15 years. The business is located just

Virginia Shrum

mud and chemical supplies, including reserve pit Ten persons are employed by the company.

The company maintains three warehouses well stocked with drilling clays and/or chemicals for immediate delivery. It offers 24-hour service for the benefit of mud service companies, mud engineers or

In addition to wholesale mud, AC also offers a large stock of polyethylene for pit liners. AC fabricates factory run rolls into larger rolls that in many cases will cover a complete reserve pit. These liners, both factory sizes and fabricated, are sold on a wholesale or a turnkey installation basis.

AC has three high 500 barrel-tanks piped into and made an integral part of a 165-barrel liquid mud pre-mix plant. This plant is available for mixing drilling fluids and kill mud on a 24-hour basis.

The Permian Basin area is in a unique position of economic stability due to self-generating service and business, Mrs. Shrum believes. "Each facet of our economy is required so that another segment of our industries may operate and they in turn furnish services and materials for yet another segment of Permian Basin industry, thus creating as close to an independent economy as any area can get. Consequently, business as a whole within the Permian Basin has a stability not found in many areas," she said.

AC Drilling Specialties, Inc., celebrates its 15th anniversary this year. It started as a one-man sales and service opration by the late Rex Shrum. Today, the company has grown and expanded until it occupies a 10-acre site on the south side of U.S. 30, six miles east of Odessa. The company's assets are close to \$1 million.

In 1968, AC Drilling Specialties started a mud-re-lated service of fabricating and installing plastic pit liners in reserve pits at the drilling sites. These liners, both factory sizes and fabricated sizes, are sold on a wholesale or a turnkey installation

The company started as a consulting mud engineering service, selling drilling chemicals and foamng agents. In 1971, AC became a wholesale mud

dealer, handling all types of drilling muds.

The company has a fleet of vehicles ranging from sales cars, pickups affd flat bed trucks to gooseneck trailers and 36-foot floats and vans.

#### Committed to the Future of the Oil Industry

## New Holiday Inn offers largest convention facilities

By SANDI BREEDEN Lifestyle Writer

Midland should continue to grow by leaps and bounds in the 1980's and with this growth, Tall City residents should see more conventions and major meetings taking place in Mid-

Country Villa Holiday Inn, the new Holidome on West Highway 80, was built with this growth in mind.

With combined ballroom-Holidome seating capacity of 2,400, the inn has the largest convention facility in Midland, according to manager Jerry

Texas Deck Ballroom has the capacity to seat 1,200 and can be partitioned into six smaller meeting rooms. Four of these rooms can seat 150 people, and two are able to seat as many as 300 per room.

These facilities also can be arranged in classroom and banquet style. As a classroom, the ballroom can seat 600. For a banquet it can seat 825 persons. The Holidome can seat 600 classroom style, and 825 for a

The meeting rooms, referred to as"parlor" rooms, also can be arranged in classroom and banquet style. Four rooms can seat 75 persons while the other two can seat 150. In banquet style, four of the parlor rooms have the capacity to seat 125 in banquet style and the other two can

The Holidome was completed in December after 14 months of construction. Glyn Day Construction Co. of Midland built the facility, which has a price tag of \$5 million.

Although the same people own the Holidome and the older Holiday Inn in Midland, the older inn will continue its business as usual, said the manag-

As do most other Holidomes, the Midland Holidome has an indoor sunken swimming pool with a sauna bath. It also is equipped with an indoor game and activity room, a 15foot Roman whirlpool, bathhouse, electronic amusements, pool tables, putting green, electrical hookups for booth exhibitions, poolside suites and rooms, ice and soft drink vending machines and guest laundry. Air transportation is easily accessible.

Color television and telephones are in the 205 rooms and five suites.

There are 20 rooms equipped with one king size bed, costing \$43 for double occupancy and \$35 for single occupancy. Four of the suites cost \$75 and the two-level suite, with a winding staircase in it, costs \$100.

There are 170 double occupancy rooms, costing \$36. The single occu-pancy costs \$30. (These figures are on a per-night basis.)

Sidewinders Restaurant and Sidewinders Discotheque are also located in the Country Villa Holiday Inn. Littlefield said the dining room and discotheque are not geared for hotel guests only.

"We are trying to become more of a food and beverage facility and not just a hotel restaurant and lounge,'

Sidewinders Restaurant has a seating capacity of 135, and is equipped with a built-in buffet. The Texasshaped, wood menus reveal the meals and beverages available in the dining area. Hours are 6:30 a.m. to 10:30 p.m. seven days a week.

Comfort is the style in the Sidewinders Discotheque with sofas, loveseats and chairs in a slightly upper level in the discotheque.

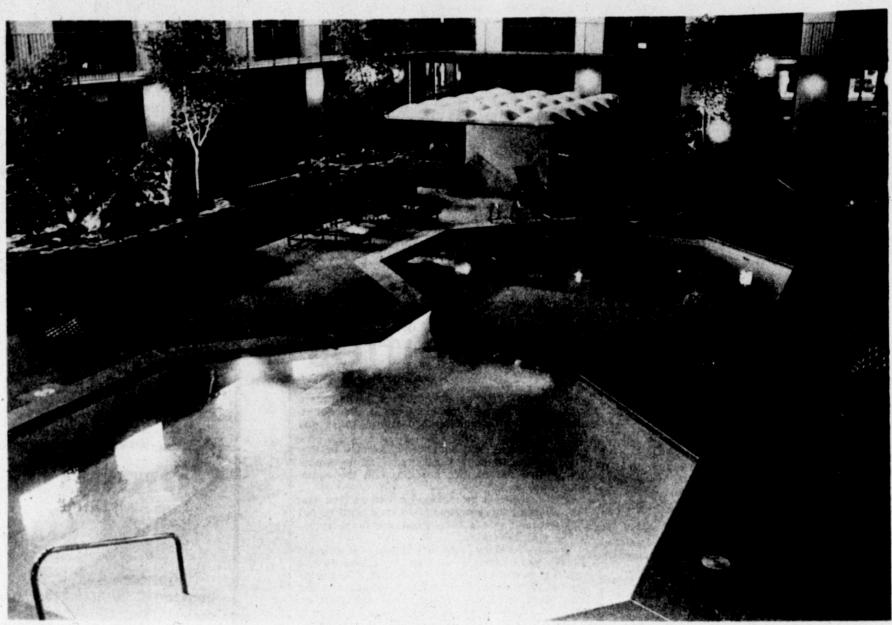

square feet, are available as commercial space, said Littlefield. One room covers 450 square feet and the other covers 400 square feet.

The Holidome has 90 permanent employees and 30 part-time employ-

SERVING THE PETROLEUM INDUSTRY FOR OVER 23 YEARS

MIDLAND, TEXAS

#### **Engineering and Construction**

The Ortloff Corporation and its subsidiaries, with offices and facilities in Midland, Houston and League City, Texas, Golden and Grand Junction, Colorado, and Tulsa, Oklahoma, are leaders in the development of certain proprietary technology and the application of that technology and technology developed by others in the engineering and construction of facilities for the processing of natural gas, sulphur recovery and field processing of sour crude oil and natural gas. Ortloff also engineers and constructs specialized facilities for the petroleum, petrochemical and minerals processing industries.

#### **Roofing Products**

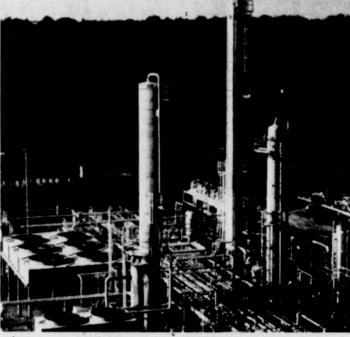

Elk Corporation, with facilities at Dallas and Ennis, Texas, Stephens, Arkansas, and Tuscaloosa, Alabama, is one of the leading manufacturers of quality asphalt roofing products serving the Southern and Southwestern Sunbelt markets.

Gory Associated Industries, Inc., a new acquisition with manufacturing and/or distribution facilities at Miami, Fort Lauderdale, Boca Raton and West Palm Beach, Florida, is the leading manufacturer of concrete roofing tile in the Southeastern United States. Gory markets its products primarily in Southern Florida, and is also the leading distributor of other roofing products and related equipment in Southeastern Florida.

#### **Industrial Products**

Chromium Corporation of America, with plants at Cleveland, Ohio, and Chicago, Illinois, is the leading plater of proprietary hard chrome finishes for original equipment and recycled dieselengine cylinder liners for the railroad industry.

Mosley Machinery Company, Inc. of Waco, Texas, is a leading manufacturer of medium-size hydraulic equipment for the scrap metal recycling industry.

## Elcor Corporation... proud to have Midland as our home

Elcor manufactures roofing and industrial products and engineers and constructs processing facilities for the energy, chemical and mining industries. Each of Elcor's principal operating subsidiaries is the leader or one of the leaders within its particular market.

# Hospital injected with new life

SUNDAY, JANUARY 20, 1980

By SUSAN TOTH Staff Writer

Midland Memorial Hospital soon will complete a \$10 million face-lift, expansion and renovation project that will add 47,500 square feet of space and 20 new patient beds to the facili-

In addition, the renovation, which is expected to be completed in early spring, will expand and update several areas of the hospital including the emergency room, critical care and post critical care areas and the obstetrics wing.

More is going on in the hospital, however, than just construction.

A three-month management study was begun late last year to find new, more efficient ways of working in all 34 departments of the hospital.

New equipment is being added, making treatment and diagnosis better each year.

MANY OF THE NEW changes are being supported with tax money from the Midland County Hospital District, a new entity approved by voters in September 1977 when Midland County voters also approved the \$10 million bond issue being used to finance the expansion and renovation of the existing structure.

In April 1978, reins of the hospital were officially handed over to the newly elected board of directors from the Midland Memorial Foundation, previous owners of the hospital.

The governors of the Foundation had opened Midland Memorial in 1950, and supported the facility entirely through patient fees and contributions from local citizens.

When the burden of maintaining a top quality facility became too much for the few to handle, the idea of the taxing district was presented to the voters of the county.

VOTERS WERE ASKED to pay for "bricks and mortar" for the hospital and care for indigent patients through a 15 cent per \$100 valuation tax rate. That rate has remained stable through the two years the hospital district has been in operation.

By taking the burden of maintaining and expanding the hospital off the patients and the few large contributors to the hospital, the campaign speils contended, increasing patient costs could be held to a minimum.

The change from a private to a public hospital apparently has not changed the attitude of many Midlanders toward the hospital.

Despite the help from the taxpayers, approximately \$3 million in private contributions have been given to the hospital since the district was formed, including one \$2 million donation for the new Allison Permian Basin Cancer Therapy Center.

Approval for the construction of the regional cancer treatment center was received Dec. 13, and construction of the project was to get under way Jan. 3, with a 14-month construction time expected.

Currently the hospital has 175 beds in mostly semiprivate rooms, but expects to raise that number to 195 in mostly private rooms with private baths when the construction — which began Dec. 9, 1977 under the direction of contractor Area Builders — is finally completed in early spring.

CURRENTLY, ROOM rates at the hospital average \$92 per day, hospital officials said.

The construction project has included a new 12-bed critical care pavilion and post critical care area designed to care for seriously ill patients in the most efficient and effective manner possible.

The new facility already is in operation. Another new area already being used is the new obstetrics wing, where new mothers and their babies have brightly colored, cheerful rooms during their stay in the hospital.

A fairly new program at the hospital allows rooming-in for new mothers and their babies, and a bonding program for the very newborn and their families has proved popular with the new parents using the wing.

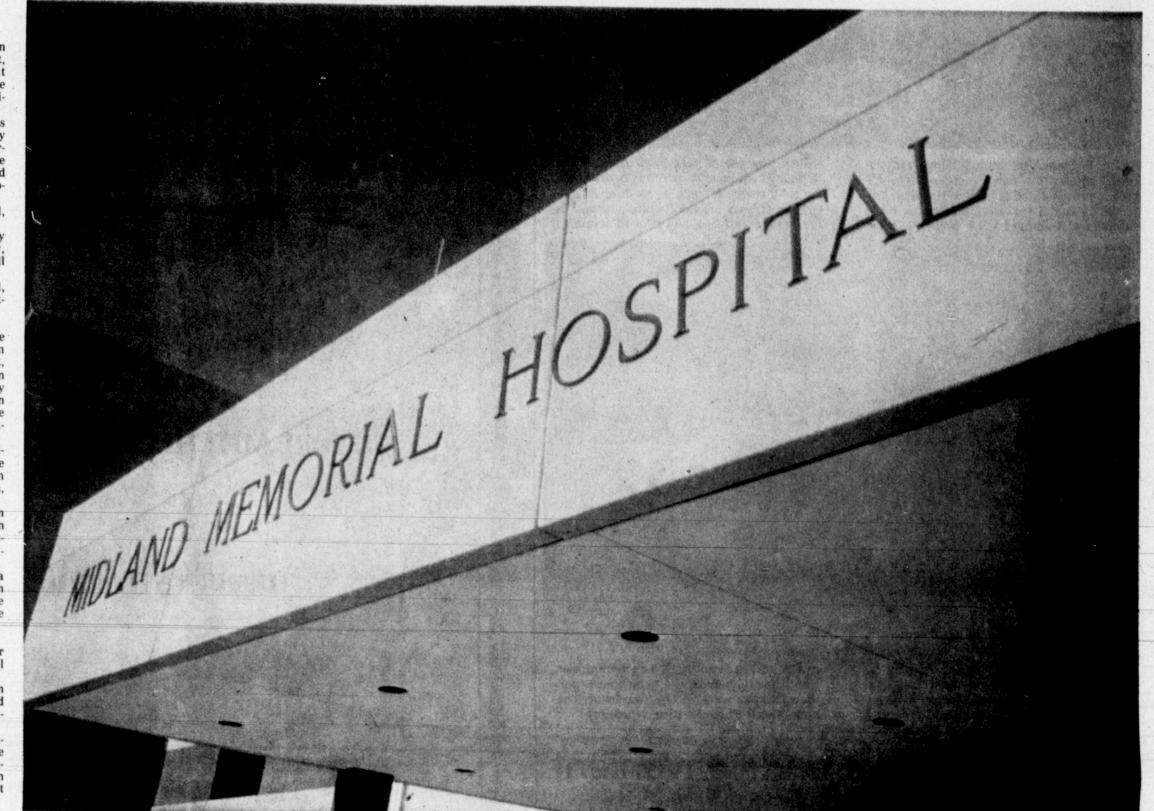

Plans for "birthing rooms" where mothers can go through labor and delivery in a more home-like atmosphere without the frantic rush from labor room to delivery room will be implemented as soon as the specially made beds arrive for the rooms, hospital officials said.

THE MOVE FROM the old west wing to the bright new south one expanded the beds available in the post partum wing from 16 to 23.

The expansion also has increased the number of surgical suites from four to six, allowing more convenient scheduling of a growing number of surgical operations.

Some 75 doctors with specialties ranging from allergies to urology are on the medical staff of the hospital, along with 11 dentists and several physicians on the courtesy staff and the rotating emergency room physicians.

In addition to family practitioners, pediatricians and general surgeons, the hospital has doctors on staff with specialties in anesthesiology, cardiology, dermatology, pathology, plastic and hand surgery, psychiatry, op-

Representing more than \$10 million in improvements is the refurbished facade of Midland Memorial Hospital. (Staff Photo by Bruce Partain)

thalmology, orthopedics, otolaryngology and radiology.

In addition, a strong recruiting program is bringing new doctors to the area to add different specialties and increase the number of doctors available in areas currently underserved.

ANY PHYSICIAN licensed in Texas whose office is in Midland County can be accepted for membership on the Midland Memorial staff.

Others may be admitted to the courtesy staff, where they may admit patients to the hospital, but do not have a vote on the medical staff and do not serve on the various committees of the institution.

Other privileges accorded doctors on the medical staff are determined by committees in the various ser-

The committee system has a great deal to do with the smooth running of the facility.

Several medical staff committees review hospital practices, credentials of new physicians and continuing education of current ones.

Other committees study infection control, safety, maintenance and a host of other areas to insure consistent operations in the hospital.

OVERSEEING MOST of those operations is the hospital board of trust-

ees.
The group of 15 volunteers are appointed by the five elected hospital district directors and members of the Midland Memorial Foundation, who still function in an advisory and fundation.

raising role for the hospital.
Under a management agreement with the district's directors, the trustees administer the day-to-day operation of the hospital, including expenditure of funds and setting policies.

Members of the board of trustees include president Tevis Herd, H. Eugene Abbott, Martin L. Allday, Roy E. Campbell, M.A. Cappadonna, John C. Dorn, Rosalind R. Glenn, John M. Grimland, Dr. E.R. Mickle, Ray P. Moudy, James H. Ramsoure, Douglas Scharbauer, Pomeroy Smith, Sheila P. Thompson and George Veloz.

The board of governors of the Midland Memorial Foundation includes community leaders and some of the original founders of the hospital.

MEMBERS INCLUDE H.G. Bedford Jr., Jno. P. Butler, Frank Cowden Sr., John L. Cox, Lynn D. Durham, Murray Fasken, Gerald Fitz-Gerald, George W. Glass, A.N. Hendrickson, J. Harvey Herd, J. Holt Jowell, Stanley C. Moore, Joseph I. O'Neill, W.F. Pennebaker, Foy Proctor, John J. Redfern Jr., Clarence Scharbauer Jr., Robert L. Wood and W.A. Yeager Sr.

Hospital Administrator Wayne Ulrich and his stall work closely with

the trustees to insure the smooth operation of the facility.

On the front lines in insuring smooth operations at the hospital are nearly 500 employees, including people with skills that run from assisting in delicate surgery to data processing to finding the best price on items ranging from paper and pensils to exotic medical equipment.

Those employees account for a payroll of \$6.17 million for the current

fiscal year.

That is the majority of the \$10.98 million total operating budget adopted for the fiscal year, which began

THE BUDGET PROJECTS \$13.37 million in patient revenues for the next fiscal year. Some \$1.17 million of that revenue will be used to cover bad debts, indigent care and other contractual allowances, leaving the \$10.98 million for the hospital operat-

ing budget.

According to the budget projections, if the hospital maintains an average 120 patients per day, no tax money will be used to finance operations with all the tax money going to

bond payments and \$620,000 in new equipment and other capital expense items

Another group contributing to the success at the hospital are the members of the Women's Auxiliary.

Some 500 "pink ladies" contribute

endless hours staffing the main information desk and information desks and hostess tables in the sugery and inensive care waiting rooms and distributing flowers, mail and magazines to patients.

AUXILIARY MEMBERS also run the Pink Place gift shop and sponsor a staff Christmas party and awards luncheon each year.

The auxiliary also donates about \$25,-000 each year to the hospital for new equipment in addition to sponsoring nursing scholarships. While the most obvious changes in

the hospital are the new construction and exterior changes, people are still the most important part of the facility.

And all those people are working to make quality health care a reality for every citizen of Midland County.

# Ulrich fights government

BY SUSAN TOTH Staff Writer

Wayne Ulrich is a generalist in a world of details.

In the almost 12 years he has been here, the administrator of Midland Memorial Hospital has seen the facility grow from a local community hospital into a tax-supported hospital serving a larger region and undergoing a \$10 million expansion and renovation project.

His increased work load hasn't come just from new services and a larger staff, however. His biggest problem, Ulrich noted, "is coping with the ever-increasing restrictive, repressive government regulation impinging on our

latitude of freedom and constricting our deci-

sion-making processes."

The government regulation of the medical industry has been increasing, Ulrich said, at such a rate that "within the last five years, our hospital has had to turn with greater frequency to attorneys and accountants for advice and assistance, not only in long-range planning, but

BUT FOR A MAN WHO thrives on problems,

in routine operations.

Midland Memorial may an ideal situation.

The expanding population — "the city will certainly reach 100,000 within the next three to five years," Ulrich believes — is challenging the

medical community to meet its needs, he said.
"The hospital must acquire the services need-

ed by the people in order to show any type of growth. As the population served increases, the need for health care services expands accordingly. The needs of the people must be met.

"Only by being able to provide the services needed by the citizens of the area, is our hospital able to show growth and progress," Ulrich noted.

"If one can accept the premise that life is no longer simple — and health care is no exception — it is the management of complexities that keep things continually interesting and challenging."

A MAN WHO DESCRIBES his approach to problem solving as "aggressive," he says he can see nothing but opportunities for the hospital in the future.

Ulrich, who worked as an assistant administrator for Methodist Hospital in Houston before coming to Midland in September 1968, sees no need to look for greener pastures for himself elsewhere.

He acknowledges being ambitious — "anyone who's not ambitious doesn't need to be in management," he says — but channels his energies into improving the hospital rather than moving on.

moving on.

"Midland, Texas is so totally unique that, having been part of the community for 12 years, I can think of no other place with a more pleasing lifestyle or more professionally rewarding than here," he said.

"To be a part of such a community in the provision of such a vital service as health care is a blessing in itself."

HIS VISION OF HEALTH CARE in Midland in the future sees a slackening in the federal regulation and more cooperation between existing local agencies.

"More and more, we're hearing less and less about national health insurance," he said. "It's an idea whose time has passed."

Since 95 percent of the population is covered adequately by private health insurance or existing programs, he said, "we must target on the unmet needs of the remaining 5 percent of the population to adequately provide for them."

One way of helping all health care consumers, he noted, is the increased cooperation between local hospitals and doctors in planning health care delivery.

"I think we will see more and more cooperation among the agencies in our community, rather than duplicate each other's facilities and compete for patients to serve.

"No one benefits from such health care delivery. The interrelationships will serve to hold down cost increases for those vital services," he

"While the cost of health care may be considered high today," Ulrich noted, "inadequate health care also is unacceptable."

specialized needs. This may involve international banking,

equipment leasing or highly specialized investment services,

"In our opinion, this is one of the best areas in the

state: All economic indicators bear this out. Additionally, current

efforts to diversify our economy should in time further strength-

en our position." Southerland added.

Odessa - Midland . . .

The Western Company And The Permian Basin

Pace setters...

Over the years, The Western Company of North America has become the pacesetter of the service companies to the oil industry. To become pacesetters, it takes innovation, ability and determination. Innovation to solve the difficult problems and to forsee new methods to solve the problems as yet unseen. Ability to apply methods born of innovation is yet another face of pacesetting, and The Western Company has proven ability time and again in places such as the North Slope. The Gulf of Mexico, The North Sea and last but not least, The Permian Basin. The Permian Basin, it's people and industries, have demonstrated the qualities of pacesetters also and The Western Company of North America is proud to join in this tribute to their progress.

Metro Bank, located at Air Terminal, opened in

Far from the hustle and bustle of downtown lies one of Midland's latest additions to the banking family. Texas National Bank, located at 4309 N. Garfield St., is home-owned by 140 Midland shareholders.

Officers are W.J. Mewhorter, president; Charles Danley, executive vice president; and Jerry Foote, vice pres-

Directors include John L. Cox, chairman, Max Christensen, Randall Gibson, James E. Hall, W.J. Mewhorter and B.J. Pevehouse.

"We, by nature, are a suburban bank," said Mewhorter. "We provide a differed need by being a suburban bank - just like a grocery store, if it's convenient you're going to go there. That is probably what we have

"We consider ourselves a full-service bank. We have all the standard bank services offered by any bank," Mewhorter added, including three drive-in windows.

"Presently we have 12 officers and staff members. We have no immediate plans for expansion, although we have provided in our original plans for expanding this building. The first would be in our drive-in positions. We presently have three and are capable of expanding to eight.

Deposits for Texas National Bank's first year of business totaled \$16,078,-028, with loans and discounts reaching \$2,459,322

"Our deposits, profits and growth have far exceeded all projections made prior to the opening of the bank," according to Mewhorter.

"In our economic study we did out here to determine need, we took into consideration the rapid growth of this area of town. We also got out on the north side, where there are some 20,000 homes to which we are the closest bank

land and Odessa. At the end of business in 1979

"Also talking from the investment standpoint, I guess it's the group that is involved that decided on a bank. I've been in the banking business for 30 years." Mewhorter said.

"That is what I do, and we felt that there was a need. Of course, you don't get into any investment without being reasonably sure that there will be a reasonable return to your shareholders through good operation. We feel that we are doing that and the shareholders at this point should be pleased with the growth we have had.'

Texas National Bank's lobby hours are from 8 a.m. to 4 p.m. Monday through Thursday and 8 a.m. to 6 p.m. -Friday. Drive-in hours are 8 a.m. to 6

## Midland's mobile home population constantly rising

By FLOYD HENDERSON News Staff

Midland is a booming community, and the changing nature of its mobile home population is a reflection of that fact.

Previously, Midland's mobile home population was comprised of about 70 percent long-term residents and about 30 percent new residents, with a low yearly turnover rate of both, say several area mobile home park managers.

The percentages have changed drastically to 20 percent long-term and 80 percent new residents in the past two to three years, with an accompanying rise in the turnover rate to between 30 and 40 percent annually

at the mobile home park, managed by Bruce Bauer, according to Bauer.

Some area mobile home dealers contend that increasing conventional housing costs, caused by the area's booming economy and its complementary area-wide rise in loan rates, is another factor in Midland's mobile home population equation.

These "portable houses" cost less to buy, and one need not purchase the land upon which it sits, as is the case with a stationary home. More people, especially young people, are finding it much easier to simply buy a mobile home for \$10,000 to \$20,000 and rent a lot for \$75 to \$100 per month than to purchase a \$60,000 conventional home, say these dealers.

purchase a \$60,000 conventional home, say these dealers.

Also, some older and retired people say they see an easier way of life

ahead if they sell their present home, buy a trailer house and rent or buy a

Jim Phillips of A-1 Mobile Homes says 65 percent of the people who buy mobile homes in Midland are long-term residents as compared with 25 percent two to three years ago, and 75 percent of these are young people as compared with 35 percent two to three years ago.

Phillips went on to say that sales were higher for this past year than for any previous year in A-1's history. He also said that December was an all-time record month, and that January also looks very good, thus far.

to indicate a change in the pattern of the mobile home population in and

#### Marathon ready for 80s advantages

FINDLAY, Ohio — Marathon Oil Co enters the 1980s well positioned to take advantage of opportunities in all phases of the oil business. This positioning is the result of a longstanding commitment to reinvest in energy related projects.

In order to meet its energy objectives, Marathon has spent nearly \$3 billion since the end of 1974 on captial expenditures worldwide. During the same period, long term corporate debt rose from \$208 million to over \$1 billion.

Through the first nine months of 1979, Marathon recorded total revenues in excess of \$4.9 billion and net income of approximately \$269 million. Yet the relationship of profits to sales in the first nine months of 1979 is essentially the same as that experienced in 1974. Specifically, net income for the first nine months of 1979 was equivalent to 5.45 cents on each dollar of sales, compared with 5.44 cents per dollar five years ago. Additionally, the rate of return on total invested capital for the twelve months ended September 30 was 15.5 percent, compared with 15.4 percent in 1974.

Operationally, Marathon is continuing an agressive program of exploration and production development in the United States, spending approximately \$295 million during 1979 in capital expenditures and exploration expense to meet our nation's urgent need for increased domestic oil and gas production. During 1979, the company participated in the drilling of more than 300 wells in the United States.

Offshore, Marathon is among the most active companies in the Gulf Coast of Mexico where it operates 25 drilling and production platforms. The company also has itnerests in elase offshore California and Alaska.

In terms of capacity, Marathon is now one of the largest refiners in the United States, with plants in Robinson, Ill., Detroit, Mich., Texas City, Texas, and Garyville, La. At the Garyville plant rated capacity was increased in mid-1979 from an original design rate of 200,000 barrels per day to 255,000 barrels per day. And a just completed \$230 millin expansion project has given the company the ability to boost unleaded gasoline production by more than 1.3 billion gallons per year. Since 1976, Marathon has invested more than \$665 million to purchase and modify the Garyville facility. The increase at Garyville, plus new investment in other Marathon refineries, brings the company's total U.S. refining capacity to 588,000 barrels per day. This is an increase of more than 80 percent in refining capacity since the end of 1974.

In addition to refining investments, Marathon has constructed product storage facilities, crude oil product pipelines and distribution facilities designed to better meet customer needs throughout most of the eastern half of the United States. And the company is a major interest holder in the Louisiana Offshore Oil Port (LOOP), the nation's first deep water offshore oil port. When completed, LOOP will allow the world's largest tankers to offload their oil directly into pipelines leading to shore-based storage facilities. These projects, combined with Marathon's Garyville investment will bring company refining and transportation investments in southeast Louisiana since 1976 to \$1 billion.

Overseas, Marathon has submitted a plan of development to the Department of Energy of the United Kingdom covering the southern portion of the Brae Field. Located in the North Sea approximately 155 miles off the northeast coast of Scotland, the field will be developed with a platform capable of processing 100,000 barrels of oil plus 12,000 barrels of gas liquids per day. Reserves developed from this platform are expected to be approximately 300 million barrels of liquid hydrocarbons. Initial production is anticipated in 1983.

While work to develop the Brae Field continues, additional exploratory drilling has been scheduled next year in the Natuna Sea offshore Indonesia where two wells have encountered hydrocarbon deposits. Additional drilling will be necessary to evaluate the commercial potential of this discovery.

ate the commercial potential of this discovery.

Offshore Abu Dhabi in the Arabian Gulf, production began in August from the Arzanah Field. Current production from the field averages approximately 25,000 barrels per day. Marathon holds a 31.5 percent interest in the field.

Elsewhere overseas, Marathon remains a major producer of crude oil in Libya and has production interests in Nigeria. The company holds a 100 percent working interest in a natural gas field offshore Ireland which produces approximately 90 million cubic feet of natural fas per day. It also holds a small interest in large catural gas reserves in the Netherlands North Sea.

Significantly, in the Midland District, company employee rolls have increased by nearly 14 percent during 1979 to a level of 309 full time workers.

An artist's rendering shows the planned Allison Permian Basin Cancer Therapy Center as it will look when construction is completed in early 1981.

Groundbreaking for the facility - which was in the planning stages most of 1979 - was held in December with actual construction begun Jan. 3. The \$3.5

million Type II cancer treatment facility being built adjacent to Midland Memorial Hospital was made possible by a donation of \$2 million from Midlander Helon Y. Allison who made the gift as a

memorial to her late husband, James N. Allison Sr., and son, James N. Allison Jr.

## Allison Cancer Therapy Center to be completed by spring, '81

By SUSAN TOTH Staff Writer

By the early spring of 1981, West Texas cancer patients will be able to stay close to home for the majority of their treatment.

That's the expected completion date for the Allison Permian Basin Cancer Therapy Center, a \$3.5 million facility for both radiation and chemotherapy treatments.

The 22,376 square foot building is being built on the east parking lot adjacent to Midland Memorial and connected with the hospital through a

Groundbreaking for the facility, in the planning stages most of 1979, was Dec. 21 with a 14-month construction period planned.

THE CENTER WAS made possible by a \$2 million gift from Midlander Helon Y. Allison, who made the donation as a memorial to her late husband, James N. Allison Sr., and son, James N. Allison Jr.

The Allisons were longtime owners of The Reporter-Telegram before the paper's sale to the Hearst Corp. in

The \$2 million Allison donation will pay for all construction costs. The remaining \$1.5 million for the equipment will be raised through other private donations, although the money is guaranteed by the taxing power of the Midland County Hospital District, which will own the facility More than \$318,000 of that amount was donated before the groundbreak-

Independence

動量で

Major equipment in the Allison center will be a 20-MEV and a 6-MEV linear accelerator, a computerized therapy beam simulator, a patient treatment information system and an orthovoltage therapy unit. In addition, complete chemotherapy services and a treatment planning computer system will be available.

AN ONCOLOGIST, A radiation physicist, a radiotherapist, a registered nurse, two radiological technoligsts, an aide, a secretary and two receptionists are expected to be hired to staff the center.

Mrs. Allison's commitment to the project and her ties to Midland Memorial Hosptial are not new. Her late husband was one of the founders of Midland Memorial and during the hospital's early years, he served as a trustee. He was an active member of the board of governors of the Midland Memorial Foundation at the time of his death in 1975.

Her late son was the only person to serve as a hospital trustee, be a member of the board of governors and then be re-elected to another term as a trustee. He was an active trustee when he died in 1978.

Midland County Hospital District began the drawn-out process of obtaining the certificate of need from the Texas Health Facilities Commission for the center on March 15, 1979.

THE PROPOSAL received favor-Systems Agency after a hearing in May, but a procedural error forced the matter to be reheard when Odessa

Working To Achieve Energy

officials registered their opposition to establishing the center in Midland because, as planned, the Midland center duplicated services already existing at Odessa's Medical Center Hosp-

On June 18, date of the next HSA public hearing on the center, the Midland hospital officials announced plans to amend the original application concentrating on a regional ap-

Under the new plan, a regional committee would help set bylaws and screen applicants for the cancer center's medical staff. The staff of the center would be separate from the staff of Midland Memorial Hospital so doctors with practices outside Midland could be part of the resident

Two days later, MCHD repesentatives met with members of the medical comunities from Big Spring and Odessa to form an ad hoc committee to assist in amending the certificate of need application and to determine equipment needs.

In July, H.O. McKenzie, a national ly known cancer center equipment and design consultant, was hired to help amend the application and design an equipment list that would make the Allison Center one of the best in the state.

Mckenzie's recommendations for more powerful and sophisticated equipment nearly doubled the original cost estimate for the center, but it removed the major obstacle to get-

ting local approval. Medical Center Hospital officials withdrew their objection to the center at the Sept. 24 hearing before the

project review committee of the local

cation was forwarded to Austin with a completely favorable report. Midland Memorial officials made

Health Systems Agency, so the appli-

their formal eight-hour presentation to the Texas Health Facilities Commission Nov. 26, and received word the necessary permission had been granted Dec. 13. Nearly \$1.3 million in equipment for

the facility was ordered the same day at a meeting of the hospital district board of directors, and the groundbreaking ceremony was held Dec.

The push to get the facility under construction was essential since the concrete in the seven-foot thick walls had to be poured during cold weather, according to officials with Area Builders, contractors for the facility.

**ACTUAL CONSTRUCTION** is being

handled as a change order to the \$12 million construction and renovation project already under way at the hospital, so costly delays in letting new bids and setting specifications could be avoided.

In fact, using the "fast track" method of construction, initial work was started on the facility before final architectural renderings were fin-

Much of the equipment is being built directly into the building, with part of the cost of the machinery including setting the massive works down on bolts and foundations poured and set to specification.

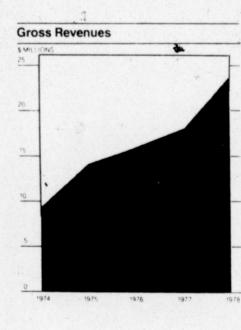

The speedy construction will help save money in building the facility by minimizing inflation costs and cutting labor time, hospital officials point

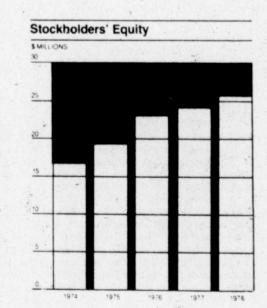

#### 12 areas qualify for tax deferments

WASHINGTON (AP) - Labor Secretary Ray Marshall says 12 states and jurisdictions have qualified to defer increased taxes on employers based on federal unemployment tax credits for 1979.

He said this deferral could lead to savings of millions of dollars to employers. Those qualifying Maine, Massachusetts, Michigan, New Jersey, Puerto Rico, Rhode Island, Vermont and the Virgin

## C&K Petroleum, Inc. Is Doing Their Part

C & K PETROLEUM, INC. is engaged in the exploration, development and production of natural gas and crude oil.

C & K's activities are concentrated primarily in known petroleum producing areas within the United States, offshore and onshore. C & K also owns acreage positions in the Canadian frontier, offshore Labrador and in the Beaufort Sea.

The Company's revenues are derived from the sale of its oil and gas production, and by management of petroleum partnerships and joint ventures that explore for hydrocarbon reserves.

C & K Petroluem's common stock is traded on the American Stock Exchange under the trading symbol CHK.

Bass Enterprises Production Company is continually striving to achieve energy independence for our country. We know this can be done and will pledge to do our part by continually searching for new areas of oil and gas.

## Midland County hospital board consists of five citizens

By SUSAN TOTH Staff Writer

The Midland County Hospital District is administered by an elected five-member board of directors.

These five citizens, elected at-large for staggered two-year terms, set the annual tax rate, adopt the budget and handle the money for the district which supports Midland Memorial

The directors have contracted with the hospital board of trustees to handle the day-to-day, administrative matters of running the hospital.

Neither the directors nor the trustees are paid for their services.

Directors include Edwin H. Magruder, president; Frank Cowden Jr., vice president; Pat Estes, secretary; Dr. Henrie Mast and Thomas P. In-

Magruder, 54, is one of the original members of the hospital district board. He was re-elected to a second term last April.

A 30-year Midland resident, he has been active in serveral elected positions, including four years as mayor of the city and four years as a city councilman.

He also is a former member of the

planning and zoning commission and is active in a number of civic organi-

Magruder's primary goal for the hospital, he said, is for it to deliver "the best health care service the district can provide to the people at the most economical cost.

Cowden, 60, is a native Midlander and has been in the ranching business all his life.

He is another original member of the board of directors and had served

previously on the hospital's board of trustees. He also has served on the Midland school board.

Active in many civic organizations, Cowden has served on the boards of the YMCA, Cerebral Palsy Center and the executive board of the Buffalo Trails Boy Scout Council.

Mast, 67, a retired Midland surgeon, was elected to his first term on the board last April. He came to Midland in 1950, the year Midland Memorial opened, and has been active in the hospital since.

Frank Cowden Jr.

Before his retirement in 1977, he served three years as Midland Memorial chief of staff, two years as staff vice pesident, three years as chief surgeon and six years as a hospital

He and his two brothers opened the Mast clinic in Midland. One brother is still practicing in the same building, while the other is in practice in

Mrs. Estes, who ran fourth in last April's at-large election for three hospital trustees, was appointed to the board after the resignation of Dr.

#### Language of oil business particularly colorful

world, every business has its own terminology. The oil business is no exception, and the language of the modern oilman is particularly colorful. It is not that so many of the words themselves are uncommon, bu the meanings they have taken on in the oilfields give an interesting flavor to the oilman's speech. Following, courtesy of Aminoil USA, Inc., is a listing of some of the more colorful

CHRISTMAS TREE. Saint Nick wouldn't recognize this variety. It is the assembly of fittings and valves that caps a completed well. It controls the flow of oil from the well to storage tanks or pipelines.

LIGHT ENDS. Not what weight watches hope to achieve after dieting. They are the more volatile products of petroleum refining, such as gasoline, propane and butane.

heat to the lower extremities...of a well. Involves installing a heater at the bottom of an input well to thin heavy crude oil and increase its flow. to nearby producing wells. FIREFLOODING. Although it sounds

like a contradiction in terms, it refers to another ay to increase production of heavy oil. Oil deep underground is ignitied and fed large amounts of air. This heats and thins nearby oil and provides pressure to move it to producing wells.

CRUDE. An individual who is crud is often said to be unrefined. In the oil industry, crude refers to oil that is unrefined. It is oil just as it comes out of the well.

FOINT. It is not a funny cigarette. It is a section or length of steel pipe or casing from 20 to 30 feet lone. Joints are added one at a time to drive the rotating drill bit into the earth. The string of pipe is pulled up out of the hole in sections of two, three or four

THRIBBLES. They are not the cute little creatures from Star Trek. When drill pipe and tubing are pulled from the well two joints at a time, they are called doubles. Oilfield logic then designates three joints as thribbles. Yes, four joints are called fourbles.

HIGH. Has nothing to do with joints. Has everything to do with the uppemost part of an inclined geological structure deep underground where the possibility of finding oil is considered to be the greatest.

SPUD. No. relation to the starchy tuber for which Idaho is famous. To oilmen it is a verb. To spud a well is to begin drilling.

WILDCAT. When is a wildcat not a wildcat? When it is an exploratory well drilled in an area where there has been no prebious oil production. About one wildcat well in 48 finds commercial deposits of oil or gas. At \$3 million per wildcat in an area like the Baltimore Canyon, it is an expensive gamble.

DUSTER. Feather dusters and oil field dusters have something in common, both are dry. A duster is a dry hole, one of the 47 out of 48 wildcats that doesn't find oil or gas.

ROUND TRIP. Describes the voyage of a drill bit when it becomes dull has to be changed. It is painstakingly pulled up out of the hole—2, 3 or 4 joints at a time-changed and returned to the bottom. A round trip can take more than 24 hours for very deep wells.

STRIPPER. Of course it's not an ecdysiast. A stripper well pumps (or "strips") oil from a reservoir. The standard definition of a stripper is one that produces lesss than 10 barrels of

HOUSTON - In today's complex oil per day. With average daily production for the 500,000 oil wells in the United States at 16 barrels of crude per day, we have many strippers. By contrast, in the Mideast, the average well produces 5,500 barrels per day.

> FISHING. The oilman's fishing is not done in a lake or stream. Instead, he fishes in the tight confines of an oil well's steel casing. He does it to recover tools, cable or pipe that have become detached or lost downhole. His "fish hooks" are a bariety of ingenious, highly specialized tools.

MUD. The earliest mud used to dill oil wells was not much different from the primary ingredient in mud pies. Drilling mud today, however, is a carefully blended emulsion of water, clay and chemical additives. It is pumped down the drill pipe and out through holes in the drill bit and recirculated back up to the surface. In the process it cools and lubricates the bit, flushes cuttings from HOT FOOTING. The application of the hole, cakes the wall of the hole and helps control underground pressure released by drilling.

> BLOWOUT. It is not the party oilmen have when they bring in a gusher. In fact, a gusher is a blowout Blowouts occur when he downhole pressure cannot be controlled and the oil or gas erupts out of the well bore. Mud helps prevent blowouts.

> DUCK'S NEST. A standby tank or pit used to hold extra drilling mud or the overflow if mud should be displaced from the well by a blowout.

HALF SOLE. When a section of pipeline becomes corroded, it can be patched with a half sole. The patch, cut from a pipe of the same diameter, is securely welded over the defective section.

PIG. Both oil field pigs and the fourlegged bariety have an affinity for dirt. An oil field pig is a cylindrical device that is forced through a pipeline, scraping the inside wall clen as it goes. Pigs are used to keep a quarter of a milliong miles of pipeline in this country clean and at peak operating efficiency.

GASSER. This is not a knee slapper on Hee Haw. It is the term for a commercial well that produces natural gas.

DOODLE BUG. See Rhabdomacy. Doodle bug is another term for a dowsing rod, the Y-shaped branch that, in the hands of a skilled user, is supposed to pinpoint favorable dilling sites. Today, it refers to any item of geophysical prospecting equipment. About rhabdomacy; of Greek derivation, it means divination by rods

LESSEE. Not the contraction for "let me see," as in "lessee now, where was I?" A lessee is the company or individual that, under the terms of a lease, is entitled to dill and operate an oil or gas well.

Aminoil USA, Inc., along with American Independent Oil Company, is a unit of R. J. Reynolds Industries, Inc., a diversified, worldwide corporation which is the parent company of R. J. Reynolds Tobacco Co., Del Monte Corp. (processed foods and fresh fruit), R. J. Reynolds Tobacco International, Inc., Sea-Land Service, Inc. (containerized shipping); RJR Foods, Inc. (Convenience foods and beberages); and RJR Archer, inc. (packaging).

#### Fast food chains add new outlets

By PATSY GORDON Lifestyle Writer

Almost everyone in Midland and the nation is eating out at least once a week and it's the fast food restaurants that are seeing the bulk of business.

Some fast food chains added at least one new outlet - others two - in the Tall City during 1979 and others will complete additions the early part of this year to take care of the increase in customers. One of these chains is What-A-Burger, a mainly

that will be 30 years old this March. A facility on Midkiff Drive opened early this month and one on North Big Spring Street is expected to open the first week in February, according to Darrell Barnes, area supervisor for the Midland busin- 683-1716.

Barnes expressed some views on why he sees "nothing but good" for the future of fast food services in the Tall City.

ONE BASIS FOR his philosophy is the influx of people from the northern part of the nation.

"Anytime you get a growth like Midland is experiencing, you get a lot of people moving here to work in construction, " he said.

Another reason is inflation. "As the economy goes, more people, including the husband and wife, are having to work. This gives less time to cook at home." said Barnes.

over the year before, despite a 7 percent price increase a year ago.

Barnes admitted that January and February are Midland Tower downtown, 684-8762. bad months for the fast food industry with the blame going to Christmas bills and income taxes, soon to be

"But Midland and Odessa have always supported restaurants. No matter what type of service the drews Highway, 682-0423. consumer gets or how clean a restaurant is not,

He explained why some fast food chains in Midland with only one outlet have not put in additional

"They can't keep employees. The nationwide turn-over is 300 percent," he said. "In Midland, it's a lot Taco Plaza, Mexican fast f higher. I can't pinpoint the reason except to say that the city is only a stopping point for oil company transfers and other transients. They move on because they don't like the climate or for some other

ALSO, THE HIGH per capita income in Midland the average is \$13,000 - gets blamed for a high 7516). turnover in employees.

"When you get this type of income, the wives and kids don't have to work. The vast majority of fast food employees are minorities. The caucasian wives try to work in retail outlets, such as clothing or department stores," said Barnes.

Also, in January and February, the oil fields shut down, another reason for decrease in consumers. He noted that Christmas sales at his store were up

17 percent over 1978. Barnes feels the new shopping mall being built in Midland will keep money in the Tall City that now is being spent in neighboring Odessa.

Other fast food chains opening new outlets in 1979 were Church's Chicken of Midland, Mr. Gatti's, Sonic Drivein, Sub Center Sandwich Shops, Taco Bell, Taco Villa, Golden Skillet, Taco Plaza, Create-A-Salad, Schlotsky's, and The Spot

Midland boasts an ever-widening arrany of restaurants, cafes and fast-food establishments.

The following is a list of the fast-food places in the

## Chamber fosters Midland's growth

By SANDI BREEDEN Lifestyle Writer

Bumper stickers and billboards with the slogan "Our Progress is Your Future" have been seen by almost everyone who comes anywhere near Midland.

Although the Midland Chamber of Commerce did not originate the slogan, it did sponsor the contest which Darlene Pomroy, 2300 Terrace Ave., won last year.

The chamber has sponsored the slo-gan contest, which is held every few years, since the early part of the 1970s. Last year's winner received

With a membership of 1,200, the Midland Chamber of Commerce is involved in a number of projects to help promote the Tall City.

MidTran, Midland's planned public transportation system, is one of those

With a tentative starting date of Feb. 4, MidTran was the result of a Chamber of Commerce task force assigned to study the possibility of public transportation.

When a study showed a high percentage of people were interested in such a program, a General Motors study team evaluated the situation and designed the MidTran program.

Joyce Fisher has been transportation coordinator for the system since

-President of the chamber's nine -member MidTran board of directors is John Ingram.

Some changes will be seen in the Chamber of Commerce this year, said Fred Tyler, executive vice president. "We are restructuring a little bit.

"We are getting involved in areas we were previously not involved in," he added. Tyler said managing the Midland Center is one of those

Like most other chambers of commerce, Midland's has many committees geared to promote the Tall City in every way possible.

Because Midland has a high rate of growth, housing is a problem. The Housing Task Force committee was established to discuss and promote solutions to those problems. Chair-

Greenery along Wall Street and at Midland Regional Airport is a welcome site. The Visual Improvement Projects committee, with Gordon Knox as chairman, is responsible

man of the committee is Joe Camp-

The hub of oil and ranching businesses, Midland is a natural setting for conventions and has accomodations for most. The Convention and Visitors Committee was established for this purpose and is chaired by Jim Crowder.

Industry plays a large role in Midland's growth. To help deal with that growth, the Chamber of Commerce established the Industrial Foundation of Midland, Inc. Howard D. Ford leads the 52-member group as president.

Public relations is important to any business, and the chamber has a committee to deal with this area. Chairman of the committee is Harry

And, like most businesses, the Chamber of Commerce has a board of directors. President of the board is Joe Kloesel. Other officers are Larry Bell, vice president; Wilbur Yeager Jr., vice president; William Ortloff, vice president; Ray Moudy, treasurer; Harrell Feldt, past president, and Martin Allday.

Other committees and their chairmen are: Leadership Midland advisory committee, Parker M. Humes; legislative committee, Ed Hagan; "M" Squad welcoming committee, Charles "Chuck" Logue; aviation committee, W.J. Mewhorter; farm and ranch committee, Charles Welch; highway committee, H. Eugene Abbott; and executive committee, Midland Area Sales Team, Ron Schwi-

By JOHN DORNBERG Copely New Service

of the gasoline shortage and the rising cost of gas, but compared to Bulgarians, they ought not to have a care in the world.

the equivalent of \$4.16 per gallon which, considering the statistical average wage of \$165 per month, means that the average Bulgarian earns the equivalent of about four tanks of gas a month.

Where the Bulgarians are lucky is in the fact that only about 500,000 people in that country of 9 million inhabitants own cars.

The price hike is one of the most dramatic symptoms to date of Bulgaria's inability to obtain suffifrom its chief supplier, the Soviet Union.

The Bulgarians, to judge from a complaint by

Romania, are not alone. In a front-page editorial in Scinteia, the Romanian Communist Party daily, the USSR was accused of failing to meet the needs of its allies and defaulting on delivery commitments.

But not just the Kremlin's dependencies. Its Third World customers, too, are complaining.

In March 1978, for example, India made an agreement with the USSR by which New Delhi would get 600,000 tons of crude, 1.2 million tons of kerosene and 400,000 tons of diesel oil from Moscow in exchange for the equivalent value in rice. In January of this year the contract was even revised to provide for delivery of an additional 1.5 million tons of crude oil and petroleum products.

India is delivering the rice, but has yet to get a month for a top-level meeting with Soviet President and Communist Party Chief Leonid Brezhnev.

Greece has an agreement with the USSR for delivery of 2 million tons of oil annually. But deliveries have lagged and the Athens government introduced a driving ban for every second weekend, suspended the sale of discount gasoline coupons for tourists and is seriously considering ra-

The trouble is largely that the USSR cannot keep up with the rising demands of its customers as well as growing domestic needs, and that oil production is falling behind the planned an-

The Soviet Union, though not a member of OPEC, is the world's largest producer of oil: 572 million tons last year, with 593 million tons projected for 1979. But those raw statistics tell only

Despite massive investments in the petroleum producing industry - a record 6 billion rubles (about 8.5 billion) in the current year — it has fallen short of

its planned output every year since 1972. Instead of annual increments of 30 million tons, plan period, output has grown only by an average of uncertain supply source.

20 million, and sometimes has fallen below that. The average increase has been 3.7 percent, but requirements in the USSR itself are rising at MUNICH — Americans may be groaning because about 6 percent annually, as are those of the East European countries.

By the 1980's, according to West German progno-The price in that Communist Balkan country, ses, the Soviet bloc will be a net importer of oil, known as Moscow's most loyal ally, has shot up to buying some 200 million tons from OPEC countries, triple the amount the USSR is currently selling

> The squeeze is already beginning to tell in Eastern Europe. Annual oil requirements in those countries currently are 100 million tons and rising at a rate of about 6 million yearly.

The Soviet Union in 1977 supplied 67 million tons - at world prices - and has agreed to step up cient quantities of oil and refined petroleum products deliveries to 76 million tons by 1980. Its allies are buying the difference in the Middle East and trying to make up the deficit with alternative fuels, such as liquified and gasified coal, and with stringent belt-tightening policies.

Czechoslovakia, for example, is putting the clamps

According to a Communist Party edict issued early last year, some 18,000 chauffeurs of cars belonging to state-owned industries and offices were to have been dismissed from their jobs by the end of

They were suspected of using company cars mostly gas-guzzling, Czechoslovak-made "Tatras" - for their own and their bosses' non-official plea-

But those cars being important status symbols for Communist managers and executives, only 1,000 drivers were actually released. Instead of drop of the oil — one reason, perhaps, why Prime an anticipated saving of more than 24 million gallons Minister Morarji Desai dashed off to Moscow last of gas last year, consumption by official limousines decreased by only 3.4 million.

> Recently an order came out requiring all Czechoslovakian companies to reduce their passenger car fleets to the 1975 level by the end of this year.

> Poland, the world's fourth-largest producer of anthracite coal, is planning to boost coal production to 200 million tons this year, largely in an effort to divert some of it for conversion into benzol as a fuel. But the rewards are considered minimal in Warsaw because it takes almost 20 million tons of coal to obtain 300,000 tons of benzol.

> Romania is an oil producer in its own right. In fact, the country's flag and coat of arms show an oil derrick. But the deposits, concentrated around Polesti, are expected to be depleted in about a decade. Romania is already importing large quantities of oil, in part to feed its burgeoning refining and petrochemical industry.

> Because it has pursued a policy of snubbing Moscow, Bucharest gets no Soviet oil and imports from the Mideast.

But given Romania's independent foreign policy - it is the only Soviet bloc country that maintains diplomatic ties with Israel and it played a key role in setting up Egyptian President Anwar Sadat's projected during the current (1976-1980) five-year- initial 1977 visit to Israel — that is a politically

# North Loop forms on horizon

By BILL MODISETT Staff Writer

Practically a city all its own is developing in the area of Midland's North Loop and that development may continue for years.

Taking shape slowly but surely in that area on the city's northern boundary are shopping complexes, residential subdivisions, retail developments and even some office developments, according to Richard Hennessy, director of planning for the

"I think it's (the North Loop area) obviously the most active area of development at this time," said Hen-

The current activity along the North Loop road began about three years ago with development of the Haystack Apartments complex and Saddle Club residential area, Hennessy said.

BUT THE AREA received a tremendous boost with the 1978 announcement that Midland Park Mall, a 750,000 square-foot facility now

under construction, would be built fronting the Loop Road and that the road itself would - by way of connectors and a new state highway - provide Midlanders a northern route to Odessa.

While those announcements have greatly increased the amount of activity in the North Loop area, Hennessy said the growth of that area of the city is "just a natural progression (of the city) to the north.

But the city apparently has few, if any, reservations about development along a thoroughfare, remembering

that the area "could become a highway strip development.

"I think cities today are attempting to take somewhat more of an enlightened view of development along important highways like this," said the planning director.

The North Loop, when constructed, would tie in with a state highway now planned which would provide Midlanders a "northern route" to Odessa. Although the highway is probably years away, it is becoming more and more necessary due to increasing traffic in this area on U.S. 80 and

Interstate 20, according to highway officials.

HENNESSY NOTED THAT the North Loop area is experiencing a "good mix" of retail and residential development.

Now located along the road, which also is known as Farm-to-Market 868, are the Haystack Apartments, Pueblo's Plant Place, Williams Feed & Supply, individual storage units, The Company Store, Betton Veterinary Hospital and Dodson's Fun 'n Party

Businesses either planned or under construction include Midland Park Mall; Midkiff Plaza, a retail, office and residential area being developed by Magnatex Corp.; and an office for Andrew K. Kauffman, a dentist.

Midland Park Mall, located at the intersection of Midkiff Road and FM 868, is now under construction and expected to open in mid-August.

Being developed by Melvin Simon & Associates, Inc., of Indianapolis, Ind., the mall will encompass 750,000 square feet of space on a 64.48-acre

SOME 80 STORES are planned for the facility, including Dillard's Department Store, Sears, Roebuck and Co., J.C. Penney and another major department store to be announced at a later date:

In addition to the mall facility, a fully-lighted parking area will provide spaces for about 4,000 automo-

Magnatex Corp. also is on schedule with its major development along the North Loop, Midkiff Plaza.

The retail, office and residential development will encompass some 450,000 square feet of space on a tract of land more than 55 acres in size. A total of 43.34 acres of land are being devoted to retail development and 11.83 acres of land will be developed into residential units.

Those residential units will include 56 attached townhouses and 17 singlefamily dwellings, according to Craig Eaton of Magnatex.

The retail development will include numerous stores and at least two large "anchor" stores.

EATON SAID THE land site has been cleared and work is currently under way on streets, sewer and water works in the residential portion of the development.

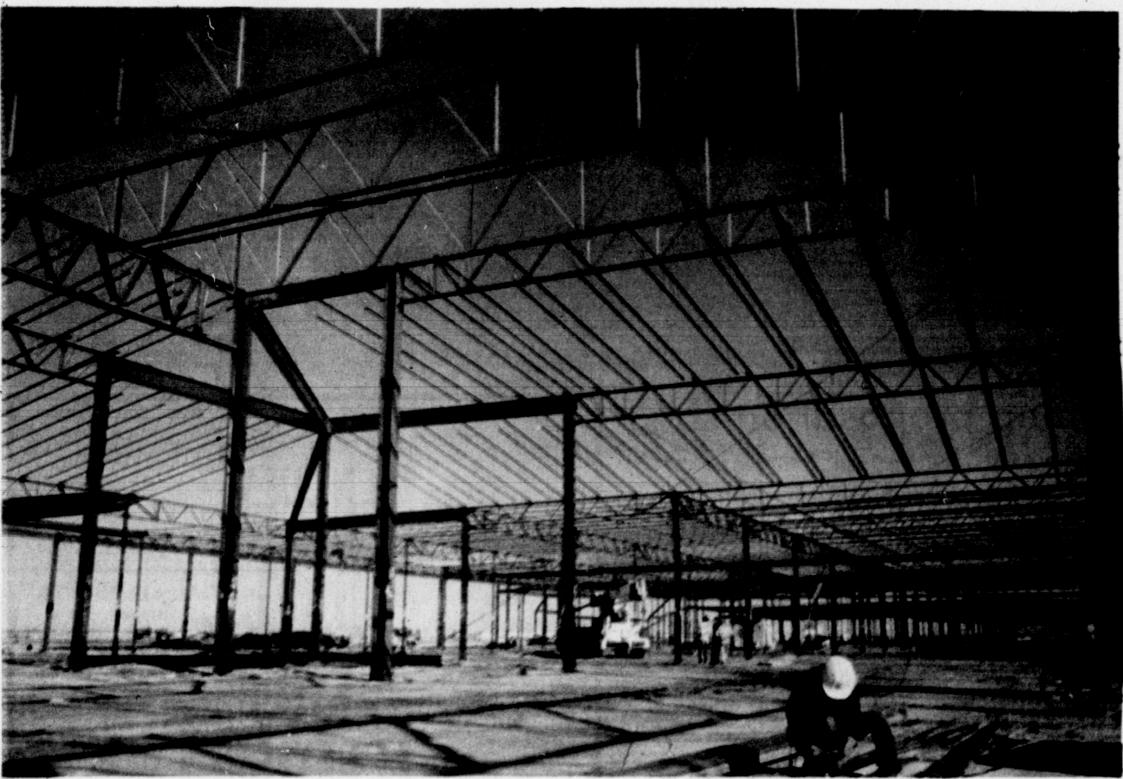

The stores will be "free standing," Eaton said.

He estimated that the total development will span two and a half to three

In addition to the retail developments existing and planned, 26 residential subdivisions are either under construction now or planned for the North Loop area, Hennessy said.

Those subdivisions include Wilshire Skyline Terrace, Hatfield Addition, Jones Addition, Saddle Club Townhouse Area "A", Emerson Heights Sections 1 and 2, Adams Addition, Plantation Hills, Blackburn Gardens, Madden Addition, Whitburn Estates and Fairway Park.

Also, Crestgate Section 1, Saddle Club South, Midkiff Plaza, Meadowpark Southwest, Skyline Terrace West, Meadowpark Section 1, Plantation Hills Section 2, North Ranch Manor, Crestgate, Whitman Addition, Crestgate Section 4, Wilshire Park Section 9 and Northgate Addition.

Four major department stores will be housed in Midland Park Mall, the largest of developments in the North Loop area. (Staff Photo by Bruce Partain)

## New malls lead retail construction

By WANDA MOUTON Lifestyle Editor

Midland expanded its retail shopping market in 1979 with the completion of several new shopping centers and announcement of construction plans for two major centers.

Groundbreaking for Midland Park Mall, the larger of the two planned centers, was held in

Construction of the 750,000 square foot facility is progressing on schedule, according to Len Weinman, spokesman for Melvin Simon & Associates Inc., the Indiana-based developers.

Weinman said that the mall should be open in mid-August.

Confirmed tenants for the anchor stores are Sears Roebuck and Co., Dillard's and J. C. Pen-

NO ANNOUNCEMENT HAS been made concerning the fourth anchor department store of the facility, located at Midkiff Road and FM 868. Final leasing agreements have not yet been signed, according to Weinman.

He added that it will be a quality, high-fashion department store and that announcement should be made within the

Speculation among members of the business community has been that it will be Sakowitz, a high-fashion store based in

"We continue to be interested in the Midland-Odessa area,' said Robert Sakowitz, president and chief executive officer of Sakowitz. "Nothing is finalized as of yet."

The largest store in the mall is Sears with 112,684 square feet. It is scheduled for completion in July. The two-level store will have about 700 parking spaces and a 14-stall automotive cen-

THE NEW FACILITY will replace the existing Sears located at Cuthbert and Midkiff Roads. Next in size will be J.C. Pen-

ney with a 100,271 square foot full-line unit. This store will be almost three times the size of its present fa-

cility at 212 N. Main St. Dillard's will be housed in a 100,000 square foot structure. Its floor plan includes single traffic aisles that permit shoppers to view all departments in the store with ease and accessibili-

A color scheme of natural woods and warm tones is planned, along with subdued natural lighting and a mirror application to create a chandelier effect.

The mall will feature storerooms opening onto pedestrian arcades and shopper avenues with planter areas, seating arrangements and water foun-

THE FULLY-LIGHTED and landscaped parking area will' have space for about 4,000 cars. Local leasing of the mall is being handled by Len Weinman.

pared the basic architectural design of the mall. Construction is being handled by Kelley-Nelson Construction Co. of Little Rock, Ark.

Heuer, Johns, Neel Rivers and

Webb of Monroe, La., has pre-

Following months of heated battles between a few Midland

citizens and Magnatex Corporation, a compromise was finally reached in zoning changes for the revised proposal of Midkiff Plaza shopping center.

When first presented before the Planning and Zoning Committee of the City Council in January, the plan drew vocal opposition from people living south and east of the area in question. Residents claimed not enough attention had been paid to drainage or a buffer zone.

The revised concept of the Magnatex plan was approved by the council, putting the local develoment firm's plans on the

THE PLAZA WILL be located in the southeast corner of FM 868 and North Midkiff Road directly across Midkiff Road from the Midland Park Mall.

The project is to be completed in two and a half to three years, according to Craig Eaton, spokesman for Magnatex.

The area will cover 35.46 acres of actual retail development, with a building acreage of 450,-000 square feet A buffer residential area will

include 73 units, including 56 attached townhomes and 17 single family units.

Acreage for the shopping, office and residential development totals approximately 57 acres.

"Currently, the site has been cleared and construction begun on the streets and water and sewer for the residential portion of the development,'

A STORM WATER retention

basin is also being constructed. "We are proceeding on schedule in getting our residential portion constructed," said

He said that the residential area will include a mini-park to provide picnic facilities and an atmosphere of relaxation.

The shopping center is a development of free-standing retail and service establishments which will use the owner concept

instead of a leasing concept. The two anchor stores will be

## Chamber getting its own home

Boosters have moved six times since 1924

By SANDI BREEDEN Lifestyle Writer

For the first time in its 56-year history, Midland Chamber of Commerce is housed in a building

constructed specifically for the chamber. With a price tag of \$600,000, the two-story building has been partially funded by \$325,000 the chamber received when it sold its building on Colorado Street. The remaining \$275,000 is financed through various financial institutions.

The new-structure is designed so that a third floor, if needed, can be added at a later date.

Midland for the land, according to Fred Tyler,

executive vice president of the chamber. Located directly north of the Midland Center, the building is on the corner of Main Street and Texas Avenue. The modern facility encompasses 11,400 office was in the lobby of the famous landmark government began construction on the Mahon Feder

Chamber officers are on the second floor of the building. The first floor has been rented for office and Gas Building, was the third site for the chamber. and retail space, and possibly a restaurant.

elevator, it was designed so one could be added later, said Tyler. Construction started on the new chamber site in for the organization.

May 1979. The building was designed by Frank Welch and Associates, the firm that also designed Midland Center. The two buildings have identical Federal Building constructed in Midland. architectural styles.

Having moved six times since 1924, the chamber's first office was in the old Llano Hotel, where Midland The chamber has a 50-year lease from the city of Center is now located. The office was in the basement. Name of the hotel was changed to Crawford Hotel, but the building eventually was demolished.

The old First National Bank Building, now The Oil After staying there about four years, it moved Although the building is not equipped with an backed to Hotel Scharbauer.

The chamber stayed at the Scharbauer Hotel until July 1971 when it moved into a building purchased

The federal government was searching for a city in West Texas in which to build a federal courthouse, but said it would not build one in Midland or Odessa because neither had a federal courthouse.

The chamber purchased the structure on Colorado In 1928, the chamber moved to the then new Hotel Street and offered the second floor as a temporary Scharbauer located where the Hilton is now. The federal courthouse. Shortly thereafter, the federal

#### Police department keeps watch over Midlanders with tried, true methods

\* Although it may have happened without a lot of fanfare, changes have been made during the past year at the Midland Police Department.

Presently, police personnel are waiting to hear if they will move into the soon-to-be-vacated central fire department space once the new, fire

In the meantime, they continue with their job - keeping watch over

According to Police Chief Wayne Gideon, the police department currently operates eight full-time patrol districts.

"While the city's growth has continued, we've had to re-adjust and reduce the size of some of our districts while enlarging others to compensate. And we have a late-night shift which we are able to zone across our zones without detracting from our regular patrols. It's been of great service," Gideon said.

Midland patrolmen are using the old tried and true methods for uphold-

We're involved in everything in the community from prevention and Trip-Alert to checks on stolen property and apprehension. Technology in law enforcement is just now beginning to catch up with other areas of industry," Gideon said.

One area where the officers are expanding their capabilities is in training.

"We've had two officers graduated from the FBI Academy, and one graduated from the Hostage Negotiation School in Washington (which I'm trying to get started in Midland sometime after the first of the year).

'And we usually send 24 to 25 officers to specialty schools conducted by the DPS on everything from communications to robbery, and homicide.

"And then our own Permian Basin Academy teaches throughout the

Permian Basin region," he said: Requirements for the Permian Basin Academy are set by the Texas Commission of Standards and Education.

Two new positions for non-sworn personnel have been added to the police department this year to work parking meters. By adding these employees, it releases two officers for other duties, according to Gideon.

Gideon also said he was very pleased with the personal car program. Under this plan, officers can use their patrol car while off-duty to give added visibility

of having more patrolmen on the streets. The equipment is obviously in much better condition, inventory losses have been greatly reduced and our visibility has been greatly increased," he said.

'Morale-wise I think it has been a tremendous boost, and it's provided additional patrol coverage at no increase in expense.

"I've had no complaints from officers being harrassed because the patrolear identified their residences," Gideon noted.

And I know in one situation recently, where because of that car sitting there, the off-duty officer prevented a suicide. We've had burglars caught in the act by off-duty officers, and back-up power is readily available," Gideon said.

#### Separate building proposal on shelf

The proposal for a separate building off the courthouse square for the Midland County Tax Assessor-Collector's office is in

For several years, the county commissioners had entertained thoughts of a separate tax facility, which would free the eastside of the courthouse's basement. "We need room for other functions," noted County Commis-

sioner Win Brown But the county's taxing agency may stay downstairs in the

courthouse for some time to come.

In the mid-1970s, the county missed, by a quirk of bureaucracy, cauiring the old U.S. Post Office building just across from the courthouse. The federal government would have handed the property over to the county for a pittance if the county would convert the property to a health service facility or a senior citizens operation.

But for some reason, the government would not permit tax-office use for the old building.

Instead, the federal government's General Services Administration turned the property over to the city which plans to make a park out of the property.

More recently, the county commissioners considered constructing a tax building two blocks to the east at Illinois Avenue

The county acquired half a block of land in the 200 block of East Illinous Avenue and had planned to construct the building there. and along the 100 block, of East Illinois Avneue. Plans, too, called for closing that segment of Baird Street between Illinois and Texas avenues

However, those plans now are in suspension since a new Texas law on public appraisals has caused the county commissioners to hold off on any decision-making in regard to the tax building.

America Meets The Challenge

Center's front lobby to the basement meeting rooms. (Staff Photo by Mike Kardos)

## Midland Center finally opens for meetings, special events

By LANA CUNNINGHAM Staff Writer

In the planning stage for two years and under beration in the room," Arnold said. construction for one year, Midland Center finally has Behind the main hall is a hospita

The two-level brick structure on the corner of Wall

and Main streets accommodated its first function in the middle of January.

Constructed over an old basement remaining from a Kress building that had been on that lot, Midland Center consists of 36,000 square feet with a large meeting hall, catering kitchen and hospitality room on the first level and five meeting rooms under-

While most of the building is decorated in neutral of food on trays. There are warming carts for food, tones of beige and gray, the entrance differs in an ice machine and large coffee maker. In the center covers the lobby floor. Redish-orange counters add more color to the concession and coat rooms. A lean-to skylight in the center of the lobby brings

appears to be constructed with emphasis on squares said. and rectangles, the lobby employs diagonals.

Going down the stairs to the basement meeting

rooms, a pyramid-shaped sky-light adds an architectural twist to the lobby.

Architect Gordon B. "Rusty" Arnold with Frank Welch and Associates who worked on the building's design explained the primary meeting area was structured to meet a wide variety of needs.

The large room is 16 feet from floor to inside will be available for use. ceiling and 25 feet to the outside ceiling, making it

tall enough to display even sailboats. Left as one large room, the main hall can accommodate 1,500 persons in regular seating, or 1,200 persons for a banquet.

But if the convention is going to be smaller, the main hall can be divided into three separate areas with movable walls. Those walls are construct-

ed of sound-absorbing material, said Arnold.

The stage area in the front center of the hall has a parquet floor with a hookup for a speaker's stand, he said. And a large movie screen is installed to pull down from the ceiling.

'The sound system here is very sophisticated," he said. "It has a wide range of capabilities."

Concrete block walls at the back of the hall is constructed with slots with "sound-absorbing material" behind the slots. "This cuts down on rever-

Behind the main hall is a hospitality room with a small kitchen.

"This is where performers could take a break or get ready to go on stage," he said. It will include couches and chairs. And a bathroom and projection room are connected to it for small meetings.

The catering kitchen is directly behind the main hall. Arnold stressed the facility isn't designed for preparing foods. "Food will be brought in, warmed and distributed," he added. A large walk-in refrigerator will hold several carts

design and color. Red-colored, kiln-fired clay tile of the kitchen a screen can be rolled up to pass food through for quicker distribution into the main

"We've devoted a lot of time and thought to make the outdoors inside. While most of the building sure catered affairs will go over well," Arnold

Next to the kitchen is a small office for someone to watch over the kitchen equipment and to handle deliveries from the alley

After going down the lobby stairs, a vending machine area and restrooms comprise the first section. Five meeting rooms, ranging in size from 16 by 20 feet up to 48 by 28 feet, line the hallway. A small room for making coffee and setting out refreshments

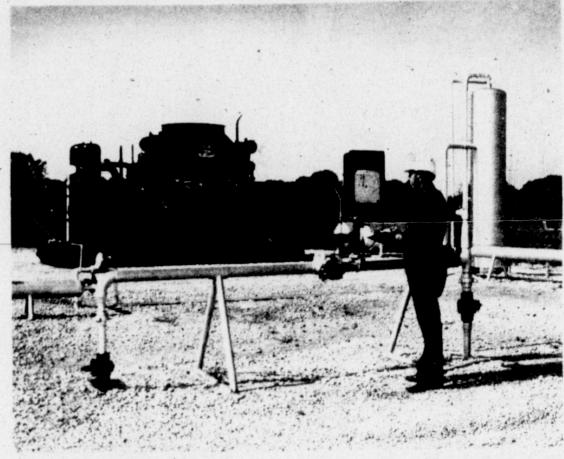

An unfinished room measuring 62 by 77 feet can be used for storage now, but also provide space if expansion of the center is needed, said Arnold.

And, in case the Midland City Council decides to go with an idea for underground parking next to the center, the vending area has been designed to open onto the garage, he said.

Cost of renting rooms or the building will be in line with other convention centers, according to Arnold. Site work next to the building should be completed in March. Preliminary plans call for an open house

sometime that month, he said. Looking at the steel and masonry structure, Arnold said, "The city has gotten a lot of building for the money."

## Oil-rich Andrews expects another prosperous year

By ED TODD Staff Writer

ANDREWS - Andrews, which bills itself as the "Oil Capitol (sic) of the World," experienced another prosperous year in 1979.

"The economy has been real good, as it has been in the Permian Basin," noted Andrews Mayor Maurice Simmons. "I think the economy is up by a real high

Andrews in 1979 under went a mini-building-boom in residential growth and in business-industrial con-

"IT'S PROGRESSING real good," Simmons said of residential building. "The thing we like about it is we're filling in old lots."

New industry settling in Andrews in 1979 included a fiberglass tank manufacturing company, which produces oil-field tanks up to 50,000-barrel ca-

Andrews County's economy primarily is based on oil and gas production and allied industries - from servicing to manufacturing.

ON THE CITY SIDE, Andrews' improvements last town fire station and the installation of two new lifts

for the sewer system. ago, has grown into a town of 12,000 or more people. An additional 3,000 to 4,000 people live in rural Andrews county and in or around such rural communities as Frankel City, Florey, Fasken, Shafter

Lake and Wilson. The city's more salient features includes:

- The Free Enterprise Spirit: The Andrews leadership has been straightforward in promoting capilikes of Dave Foreman, include:

> Andrews Loves God, Country And Supports Free Enterprise

Education: "Schools - that's one of our pluses," commented Simmons.

"WE'RE PROUD of our school system, which is known statewide, nationwide" for its trend-setting "superb" physical plant and quality education. The school system includes four elementary schools, a middle school and a high school. The public schools' teachers are among the highest paid in the state of

 Hospitals: Two hospitals serve the people of Andrews County — Permian General Hospital, which is operated by the county, and the privately-operated Community General Hospital.

Governments: City affairs are governed via the home rule, council-manager form of government. The county govenment supervises Permian General Hospital, airport, civic center and, among other duties, maintains a network of county roads which daily serve the industrial and agricultural needs of the people.

Churches: More than 30 churches representing 15 denominations are here to serve the spiritual needs of the people.

BUSINESS, INDUSTRY: The rapid growth of Though petroleum is "king" in Andrews County, the petroleum industry has stimulated business acagriculture - primarily ranching and limited farm- tivity in Andrews. Oil was discovered here in 1929, ing — contributes to the economy. "It's looking and since then, more than 1 billion barrels of oil have bright, (especially) mile and cotton" production, been produced from the more than 200 oil-producing reservoirs. oil and gas wells.

- Transportation: Three highways - U.S. 385 and year included the construction of an additional down- Texas 176 and 115 - serve the community. The city is served by a bus line, two motor freight lines and Andrews County Airport. Thirty-nine miles to the Today, Andrews, which was organized 70 years southeast is Midland Regional Airport, which is served by Continental, Braniff International, Texas

International and Southwest airlines. Water: Approximately 20 water wells reaching into aquifers supplywater to the city.

Communications: The Andrews-based semiweekly Andrews County News and radio station

KACT serve the area.

Key Points: Facilities helping make life enjoytalism and patriotism and decrying encroaching able in Andrews include the inner-city Lakeside federal bureaucracy. Billboards, sponsored by the Park, county-maintained 27-acre Florey Park, trapand-skeet range, rifle range, archery range, youth center, public golf course, swimming pools, tennis courts, civic center, public library, prairie dog town and much more.

Many more Midland families are contracting for homes to be built in Saddle Club South, a development owned by Magnatex

Corp. and opened in 1975. It is located north of FM 868. (Staff Photo)

#### Many new homes under construction in North and South Saddle Club areas

housing developments are currently under expan- divides the two developments, said Green. sion, with 12 homes under construction in South and eight being built in North.

George Landreth, formerly of Midland, had the original idea to develop this land north of Midland, said Bill Green, vice president of Magnatex Corp.

William Blakemore, prominent Midland rancher early 1970s.

Magnatex purchased the land from Blakemore in and T.J. Melton and Associates. 1974, said Green, and began developing the area known as Saddle Club South in 1977, after Saddle Club North was started.

When Saddle Club was started, the land was subdivided into lots of one acre or more, with a small area set aside for townhouses.

Saddle Club North was established as a high-security area with controlled entry, whereas Saddle Club Magnatex.

The 280 acres of North and South Saddle Club South is not. This is the reason for the fence that Saddle Club North also has a bridle path surround-

> An eventual density of 250 families is seen for Saddle Club, said Green, with swimming pools, a clubhouse and tennis courts also planned.

Price range of homes in Saddle Club South is \$75,000 to \$200,000. Some of the builders constructing and oilman, acquired the land from Landreth in the in the area are Paul Noel, Tabor Construction, David Pine, Reeder Construction, Jack Cook Construction

Saddle Club South is in the city limits, while the

north area is not, said Green "It was the intention of Magnatex to provide homes for more than one type of people, from the middle-income to people who wanted estate-size

homes," said Green. Charles Horne Priddy is president and founder of

#### More than 750 Midland College students share \$270,000 in financial aid last year

Depsite its relatively low costs, Midland College still provides or administers some type of financial assistance to about one-third of its students. For the past year, more than 750 students received some type of scholarship or financial aid. The total involved was more than \$270,000

The scholarships vary widely, both in the amount of aid granted, and where the money comes from.

Bill Burns serves as the Financial Aids Officer at Midland College. His position includes advising prospective students of the scholarships or grants which might be available, how to apply for them, screening the applicants and then distributing the scholarships.

There are local scholarships, set up by Midland businesses, foundations, clubs, organizations, and individuals. Qualifications vary from these, according to the conditions stipulated. For example, a local club might give a scholarship to a member's son or daughter. There are scholarships available for students studying in specific fields, such as music or journalism or engineering.

Midland College also provides "Top Five Per Cent" scholar-ships which are offered to area high school graduates who are ranked in the upper five percent of their class. A number of general scholarships are funded through reserve of a certain portion of the general fund of the college.

State of federal programs make scholarships available for manpower training students, vocational rehabilitation, veterns,

or low income students. Foreign governments often send students to Midland College, with Burns administering their basic

scholastic costs. 'We certainly don't have unlimited funds," Burns said, "But we can usually find a way to assits students who want to go to Midland College and who need some help. One thing wewant to emphasize is that it takes some time to process applications, particularly for first-year students. So they need to

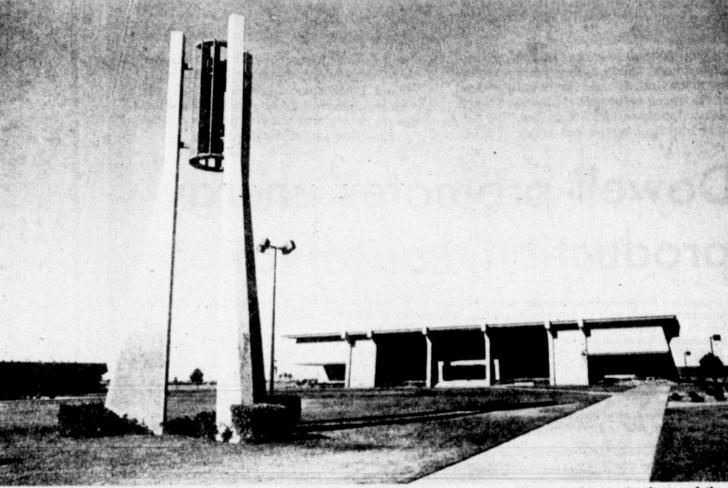

make their applications early.

Scholarships also are available for varsity athletes and cheerleaders. These sometimes are divided, and some of the student-

athletes qualify for other types of financial aid. "Although it usually costs only about \$250 per semester for a student to pay for tuition, books, and fees, there are some who simply can't afford it. Those are the students we try to help," Burns pointed out.

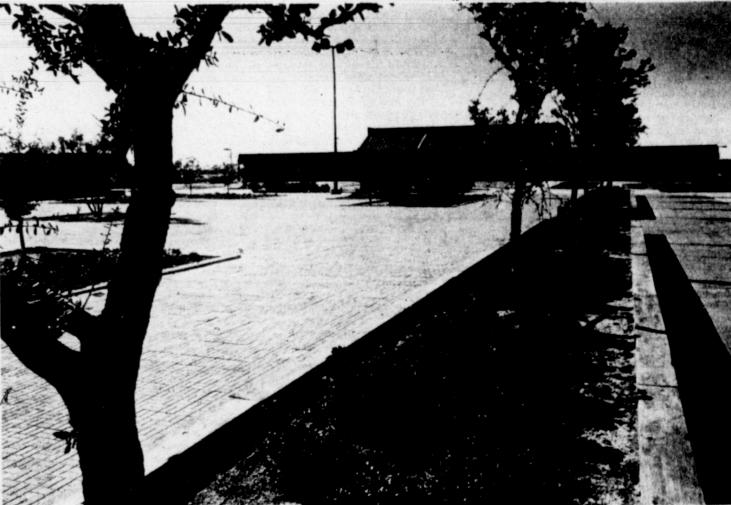

He also noted that the recently-enacted Middle Income Assistance Act had allowed more students to become eligible for

"The prople of Midland, both as individuals and through clubs and organizations, have been most generour since Midland College was started in providing scholarship funds. We can look back at so many of our good former students who just wouldn't have been able to attend college at all if it hadn't been for the presence of Midland College and some sort of financial boost when they really needed it," he said.

## Dowell promotes energy production, conservation

ing industry, dedicated to providing essential ser. applied by Dowell in 1978. vices to the industries engaged in the extraction

and conservation of energy resources.

in the energy industry. production of oil and gas wells; to increase the Houston; New Orleans, La. and Columbus, Ohio. energy efficiency of industrial plants; and to help coal producers deliver more coal, and better quality the headquarters in Houston, and at Tulsa, Okla., recoal, to their customers.

Dowell is an operating division of Dow Chemical which function within Dowe's U.S. operations as application-oriented profit centers.

Dowell poincered chemical services to the oilfield mands in the early 1930's, aided by a technical breakthrough in the "inhibiting" of hydrochloric acid, permitting channels in the oil-bearing limestone formations without corroding the metal fixtures of a well bore.

AS LABORATORY and field work confirmed the commercial feasibility of acid stimulation of wells, the demand for Dow's service increased. In Nobember 1932, Dowell Inc. was formed under the laws of Michigan, operating as a wholly-owned subsidiary of The Dow Chemical Co. In 1958, Dowell was pinistratively as an operating unit of the Dow Chemical Co.

account for an increasing portion of the total dollars spent for oil and gas production.

The current economic and technological perspective is radically different from the industry's early "gusher" era, when the biggest problem in the oil patch was keeping the oil and gas inside the drillpipe, thereby controlling the gusher. In fact, anything short of a gusher was not considered a commercial well.

Today, a major segment of Dowell's business is making commercial producers out of wells which would have been abandoned prior to the 1973 oil while MAINTAINING a balance addition and embargo. The embargo provided the economic in replacement program division-wide, capital expancentive to explore for oil and gas in complex geologic sion is effectively concentrated with minimal lead formations which had been bypassed because they time in areas of greatest exploraion and producwere too expensive to develop at pre-embargo tion.

STIMULATION TREATMENTS, one of Dowell's two major categories of oilfield service, are now employed in the completion of 80 percent of all new wells drilled. A large percentage of wells drilled in grates a variety of technical disciplines in a highly marginal formations would not produce at all without stimulation treatment, which is also employed to improve the producing characteristics of oil wells.

Stimulation by acidizing is the method generally recommended for wells drilled into limestone formations. Acid is pumped at high pressure into the well bore, and there reacts with the limestone to emlarge being evaluated at the field level indicate Dowell will the hairline fissures of the formation, through which petroleum passes into the well bore.

The action of the acid is controlled by additives selected for each application from stocks of over 300 chemical agents used as viscosifiers, surfactants, emulsifiers, friction reducers, weighting agents, retarders, clay stabilizers, corrision inhibitors and bacteriacides.

In 1978, Dowell applied more than 100 million pounds of hydrochloric acid to increase production of oil and gas. The addition of modifying chemicals and the application service increased by more than seven times the value of the raw acid manufac-

pumping of fluid and chemicals into a well bore to Industrial Service operation. These services will be "fracture" the formation, breaking the formation by in even greater demand as energy efficiency becomes producing cracks for the passage of petroleum.

Sophisticated technology has been developed to tions tailor the fracturing fluid, usually waterbased, to singular applications designed for specific conditions encountered in varying formations. The fluid is cause the formation to crack open. The fluid is same technology used in cementing and stimulating modified with gelling agents to increase its viscosity, oil and gas wells, include the prefracturing of coal allowing it to coarse allowing it t pumped down the well at a pressure sufficient to allowing it to carry a "propping" material such as

After pressure on the fractured formation is released, the gel is broken by another chemical agent, and the fluid flows back out of the cracks, leaving the proping material behind to hold the channels open for the production of oil and gas.

Chemical agents to reduce friction and fluid loss application service, increase the value of raw frac- around to prevent wind-blown loss of coal during

turing liquid 17 times. Dowell fracturing treatments have involved the gallons of fluid and two million pounds of sand, Dowell of Canada and for Dowell Schlumberger, a 50 pumping into a single well of as much as 800,000

> FOR EVERY OILFIELD job performed by Dowell, a plant on wheels is transported to the wellsite, often in remote and difficult-to-reach locations, where raw materials are mixed, instruments are tuned, and flow rates and pressures are established to produce the desired hydraulic and chemical actions in the pipes and strata underground.

Dowell moves and operates its mobile plants an average of more than 200 times a day, every day of the year.

The major components of these plants on wheels Services performed by companies such as Dowell are designed and assembled by Dowell at the division's manufacturing facility in Tulsa. More than 1,700 pumping units, blenders and transport units comprise about 70 percent of Dowell's \$300 million capital investment.

A new generation of Dowell pumping equipment is being manufactured to accomodate the fracturing of deep wells, which require pumping at pressures up to 20,000 pounds per square inch. The pressure multiplier units, which were put into field service in 1978, were developed by Dowell over an

To maintain its position of technological leadership, Dowell scientists and engineers are continually developing new products and services in a relatively short time frame to meet the existing growth opportunities. Dowell Research and Development interesults-oriented environment.

An increasing emphasis of the research effort is directed to chemical enhanced recovery of oil and gas. Dowell provides products and services to support the commercial development of various en-hanced recovery systems. Laboratory success now be a major contributor to the commercial implementation of enhanced recovery in the 1980s.

Dowell's discoveries and improvements in energy service technology are recorded in more than 650 patents which have been issued to Dowell since the early 1930s. Of these patents, 425 still are in force. Since 1974, when Dowell accelerated its efforts in the Gulf Coast offshore market, Dowell sales for

service offshore have tripled. Dowell also services exploration and production

from the West Coast and in the Alaska Cook Inlet. Since 1938, Dow has been the leader in providing professional chemical cleaning to all segments of industry. Utility plants, refineries and chemical "FRACTURING" INVOLVES the high pressure manufacturers are principal customers of Dowell's a priority operating goal of manufacturing installa-

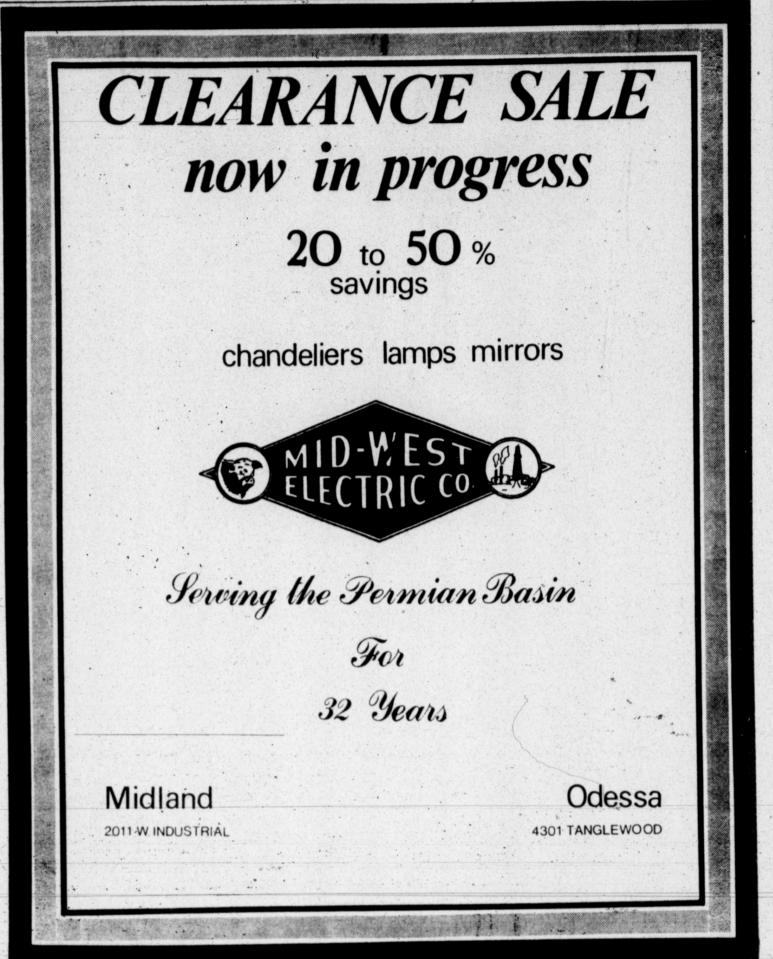

> **ENERGY CONSERVATION** and recovery are also the backbone of Dowell's service to the mining industry. Mining services, which employ some of the making mining operations more efficient and safer for miners. The methane recovered may become, in itself, a valuable energy source.

Dowell's Mining Services market a variety of chemical products for use in coal processing operations. A new Dowell product called Freeze Conditioning Agent facilitates shipment and unloading of are among the modifying chemicals, which, with the frozen coal, while a sealant product is employed year shipment.

The Dowell Division in the U.S. manufactures equipment, and serves as the technology base, for generating fractured extending over a half mile percent, jointly-owned company. Dowell of Canada operates from 25 locations, while Dowell Schlumberger provides services from 75 facilities in 38

hole to prevent unwanted fluids from entering the derived from the sale of the chemical products well or migrating from zone to zone.

### Haystack Apartments complete Phase Three of building plan

News Staff

In 1975, Phase One of Mid. land's Haystack Apartments was completed. Now, a mere four years later, Phase Three has been finished. Each phase has 200 units, making it the largest sin igle Haystack complex in the approximately 40 compilexes spread across the south from Florida to Tennes: see to Arizona.

It also makes it the larges t of approximately 50 apartment complexes in the c ity of Midland.

And construction is current ly under way for approximately 90 luxury units a cross from the Haystack rental office. The apartments will have a different name but will be managed by Haystack. These units will be one- to thre e-bedroom, one story

Due to its large and rapid growth, Haystack has been compared to a small city, but Manager Wes Johnston doesn't agree. 'It's kir id of an independent community, in a way. We do try to promote some

community feeling and neighborliness," he said, "but there aren't any commercial businesses out here that we manage or promote.' Johnston and his wife, Barbara, attribute Hays

tack's rapid growth to several reasons. "I thinks it's the fastest growing apartment com-

plex in Midland," he said, "because of the style they build, their philosophy, training of their manage ment and service they give. "We're also in a high growth area, and I think their

prices are a little more reasonable in that they give better value for total square footage. Anything that good continues to grow and increase in size.' Johnston, however, says there are no present plans

for extending Midland's Haystack complex. "They might consider something in the Odessa area, but there are no definite plans. When they began Hays tack four years ago, even the luxury units now being built were planned.

"At this time, any more units probably would be overbuilding," Johnston said.

## New theory: Asteroid struck earth causing giant dust storm that blotted out sun for years

By GEORGE ALEXANDIER The Los Angeles Time's

65 million years ago and kicked up so I nuch dust in the atmosphere that the sun's light effectively went out all over the world for several years - and dinosaurs and many other creatures consequently did not live to see it come back on again

This theory was advanced here Friday at the annual meeting of the American Association for the Advancement of Science (AAAS) by a team of University of California at Berkeley so ientists to explain the sudden and mysterious mass extinction of dinosaurs and other living things 65 m illiion years

The large amount of asteroidcreated dust would have remained suspended in the air for anywhere from 3 to 10 years, acting as a lid to prevent siunlight from falling on the surface of the earth.

According to Luis W. Alvarez, the Nobelist physicist from Berkeley's Lawrence Berkeley La boratory, his geologist son, Walter Alvarez, and che mists Frank Asaro and Helen V. Michel, an asteroid a bout 6 miles in diameter would have crashed in to the earth and gouged out a crater 95 to 125 milles in

The matter and the crater would have been pulverized by the impact and thrown high, far and wilde. Dust-size particles would have been injected into the atmosphere and spread by winds entirely around the globe. This would have been similar to the dust that was fired into the atmosphere by the extremely violent eruption of the Krakatoa Volcano in 1883.

The large amount of asteroid-created dust would have remained suspended in the air for anywher e from 3 to 10 years, said Alvarez, acting as a lid top prevent sunlight from falling on the surface of the planet. Without that solar energy, photosynthesis — the conversion of carbon dioxide into edible sugars by both water and land plants - would have come to

The stopping of photosynthesis would have effectively snipped the food chain at its first and most important link. All the creatures that set upon plankton and plants would have starved to death in a fairly short time span, followed soon thereafter by the larger animals that dined upon the smaller

Dinosaurs - both of the plant and flesh-eating varieties — were at the top of the food chain 65 million years ago, just as humans are today. When the first rung of their nutritional ladder broke, the whole ladder collapsed and so did the reign of these

animals, the theory goes.

And when the dust finally settled, the returning SAN FRANCISCO - An asteroid stirtick the earth sunlight revived dormant plants that had managed to survive the dark, or at best, gloomy, years. Life struck out along a new tangent with those creatures that had proved themselves to be adaptable.

The evidence for the hypothesis, according to the 'Alvarezes, Asaro and Michel, is to be found in the concentrations of a relatively rare metal — iridium — in clay layers discovered in Italian and Danish geological rock formations.

Iridium, a member of the platinum family of metals, is a scarce commodity in the earth's crust when compared to its concentrations in meteorites.

But at a site near Gubbio, Italy, the younger Alvarez found a thin layer of pure clay between two limestone strata - a clay layer that had been deposited at the time of the Cretaceous-Teritariy transition, when the death of the dinosaurs oc-

This pure clay layer was more abundant in iridium than most earthly samples by a factor of 25.

The elevated level of iridium suggested that some major event took place at that time, an event that may have been causally connected to the extinction of the dinosaurs and their contemporaries.

In Friday's presentation, Berkeley scientists advanced the idea of the asteroid as an explanation for

When the first rung of the dinosaurs' nutritional ladder broke, the whole ladder collapsed and so did the reign of these animals, the theory goes.

their findings. The meteorite would have contained enough iridium to explain the enrichment seen in those clay layers. And the size would have allowed it to dig a crater big enough to throw sufficient quantities of dust into the atmosphere to screen out the sun for several years.

The senior Alvarez noted that this is only a hypothesis. "Nevertheless," he said, "this hypothesis does explain much of what is known about the extinctions, including our new observations. And we know of no other hypothesis which does so.'

#### Midland County's 4-H Clubbers: They're 'making the best better'

Youngsters in Midland County 4-H Clubs "Learn by Doing" in living up to the slogan of the interna-tional organization that was formed in the early 1900s mainly for youngsters on farms and ranches and in rural communities.

Today, 4-H has expanded its scope and has projects geared to city as well as country living.
"We still have cooking, showing and sewing," said Charles W. Green, the Midland County agricultural

extension agent since 1949. 4-H helps young people to learn and develop useful skills, to serve their community, and to expand their knowledge of the world about them.

The raising, grooming and showing of livestock rojects, such as calves, steers, heifers, lambs and hogs, is a major undertaking for many of the boys and girls and young men and women in 4-H. And there's far more.

"We're not trying to teach the kids to make money," said Travis Harney, Midland County extension agent who is in charge of the 4-H program

"Rather, we're teaching them responsibility, leadership and sportsmanship and things they'll use later on in life." That principle permeates other 4-H programs. And 4-H youngsters are mindful of the club motto: "Make the best better."

Harney also works with Midland County Agent Green on agricultural programs and projects. Each of approximately 580,000 volunteer leaders Sharon A. Hillis is the county agent for home devotes an average of 20 eight-hour days annually to

Approximately 300 boys and girls ages 9 through 19 are in 10 4-H clubs in the county.

Green Acres, Greenwood, High Sky, Sunshine organization with offices in Chicago and Washing-Makers, Valley View and the Midland County 4-H ton, D.C.

ing livestock to sewing, canning and other home-making projects to horsemanship and crafts and

"The majority of them (4-H'ers) live in a type of country, rural setting," said Harney, "but we've got lots of kids that live here in town.

Individual projects may include conservation, horsemanship, cooking, home improvements, photography, sewing, cooking, woodworking, community service, gardening, marketing, budgeting, horse-manship, wildlife, livestock and crop projects, other farm- and ranch-related projects, and more, depending on interest in the community.

Youngsters and parents interested in getting involved in 4-H may contact the Midland County Extension Office at 682-9481, Extension 433, drop by the office in the county courthouse annex building at 208 W. Illinois Ave. in downtown Midland or call on a

The 4-H organization operates through a partnership of government, land grant universities, such as Texas A&M University, volunteer leaders and the private sector.

The program is administered through the universities in cooperation with the U.S. Department of Agriculture. The cooperative extension service is

responsible for program leadership. County and area leadership is provided by about 10,000 extension agents specializing in agriculture, ome economics and 4-H.

4-H. Parents also are involved in 4-H.

Businesses, residences and other structures are popping up along Midland's North Loop road at a rapid rate. The highway, also

known as Farm to Market 868, eventually will connect with a new state highway linking Midland to Odessa. (Staff Photo)

#### Dawson adds new shothole drilling unit

Dawson Geophysical Co. of Midland has added an additional seismograph shot hole drilling unit to its fleet, bringing the total to nine. The new Badger Model 1250 was fabricated in Midland by Roy

Thacker Fabrication, Inc.
"This is the very latest and most modern piece of equipment," according to L. Decker Dawson, com-pany president. He added that it is extremely fast,

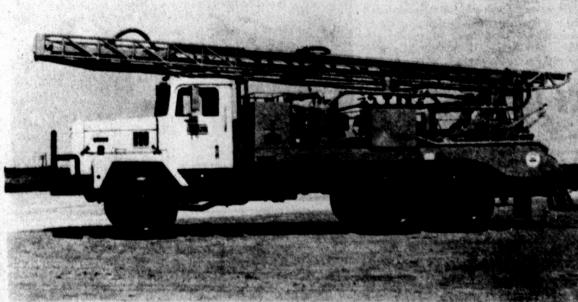

capable of drilling up to 6,000 feet per day.

The unit weighs 42,000 pounds, including the International Harvester Paystar 5000 truck and bed. It is equipped with a Model 100S-1 Leroy air compressor, Wojtek said.

5½ to 6-inch Failing mud pump, and a Model 2000 Gardner-Denver rotary table. It also has a hydraulic pull down system.

Dawson's new Badger unit is a combination rig, using either water or air. It can drill to depths of

Presently it is based in the Sierra Blanca, Texas area, where, according to drilling superintendent V.V. Wojtek, it is getting its initial shakdown. "The Badger 1250 is performing exceptionally well,"

**Dawson Geophysical Company recently** added this seismograph shot hole to its

Stanton City Manager Mike Rhea looks back on 1979 and sees "a pretty eventful year." For Stanton and Martin County, the main events were a twister and downpours of rain which brought flooding and a bumper cotton crop. (Staff Photo by Ed Todd)

#### Ozarka Water Co. nearing 45th anniversary of business in Midland

In March of this year, Ozarka Water Co., 605 S. Marienfeld St., will celebrate its 45th year of operation in this area.

"In those 45 years, the people of the Permian Basin have been good to us," Jay Schlicting, owner, said. "We have watched the business grow from one pickup truck to a fleet of 26

Schlicting said he has had the priviledge of observing the growth first hand and has at one time or other worked at every job at Ozarka, including bottling line, route salesman and general manager.

"I am very enthusiast about the business and extremely optimistic about the future," he said.

Ozarka Water Co. not only serves Midland and Odessa, but a large part of West Texas and New Mexico, in-cluding Roswell, N.M., Lamesa, Snyder, San Angelo, Fort Stockton, Kermit, Seminole and the many smaller cities in between.

"In addition to the 26 trucks that serve the huge area, Ozarka Water has 60 employees.

Ozarka water is scientifically prepared. "We remove all harsh, badtasting minerals and chemicals from the water and add 70 ppm minerals for health and taste," Schlichting

"A majority of our 20,000 customers are home delivery, but many prefer to pick Ozarka water up at the store. Ninety-five percent of all grocery stores, big and small, in Midland and Odessa sell Ozarka water. In many stores, Ozarka is the only bottled water sold," Schlichting pointed out.

Ozarka water comes in three packages — one gallon, 10 quart and five

"A big part of our business is cooler leasing. Most of the coolers we have out are Oasis coolers. Oasis is the largest manufacturer of water coolers in the world.

'Ozarka has become so well know in the Permian Basin that as one store owner put it 'people don't ask for bottled water, they say I want a bottle of Ozarka, proving that Ozarka has become synomymus with bottled-

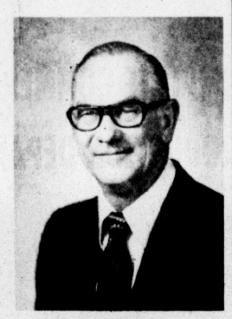

Schlichting said there is a great deal of company loyalty at Ozarka. 'When you see an Ozarka man you will most probably find a man that genuinely loves his company and is enthusiastic about his product."

Jay Schlichting says he is very concerned about having a quality

product and the best in service, but he also is very concerned about the well-being of his employees.

#### Conoco Inc. employs 218 in production division here

Conoco Inc., formerly Continental Oil Co., has been in the oil and gas business more than 100 years. The company's Midland Production Division headquarters are located at 200 N. Loraine St.

D. W. "Pete" Matthews is division manager of Production in the com-pany's West Texas headquarters here, and Frank Balke is assistant division manager

Matthews, a native of Mabank, was manager at Oklahoma City from 1967 to 1978 and earlier had served as assistant manager and division su-

perintendent there.

He is a graduate of Texas A&M University with a degree in Petroleum Engineering. He started with Conoco's production department with field crews in South Texas in 1946, and later served as a district petroleum engineer in Louisiana and Texas.

Balke came to Midland as produc-

tion superintendent in 1976. Previously, he was automation section supervisor in Conoco's production head-

quarters in Houston, and had been a production superintendent for the company in Wyoming.

Balke is a native of Amarillo and a Petroleum Engineering graduate of Texas A&M. He started his career with Conoco at Casper, Wyo., in

Conoco Inc. employs 218 persons in its Midland Production Division with an annual payroll exceeding \$4 mil-

Conoco had an average of 50,000 net barrels of oil per day production during 1978 in the Midland Division.

The division plans capital outlays of approximately \$50 million in 1980.

Midland is headquarters for Conoco's West Texas operations, including more than 2,800 oil, gas and service

## Rains bring Stanton mixed joy, woes

By ED TODD Staff Writer

STANTON — The good and the bad news in Martin County in 1979 was

The rains which effectively produced the bumper cotton crop also flooded much of the southside of

"We're thankful for the rain," said Stanton City Manager Mike Rhea, "...if it would just spread out some."

Well, actually, it did. But from Rhea's stand-point, the lower heavens back in June and July became as a busted dam and inundated the southwest sector of this town of 2,500 peo-

The good news interpreted into approximately 150,000 bales of cotton off 165,000 acres of cotton land. That's very good.

"ESSENTIALLY, this is an agricultural county," which also has a considerable stock in minerals — oil and gas. "Agriculture is a rise-andfall proposition," noted Rhea, "and this (1979) has been a good year.

The bad news was in the loss of property from the flooding, which was "set up" when Lake Pauline was filled up by rains and run-off on May 31 and June 1.

About six weeks later, another downpour hit Stanton and Martin

County. And water simply backed up over much of town. Water-injection pumps designed in the late 1960s topump water from the lake into

aquifers were inoperable. And in the spring of the year, a West Texas twister — a toronado — bar-reled through the relatively "poor" south side of town, uprooted trees, damaged and destroyed houses and cars, but caused no major injuries. "We're lucky there was no more

damage," noted Rhea. "As far as the weather is concerned, it's been a pretty eventful year, and we got through everything all right."

OVERALL, THE community and county fared well from the timely rains, including the 1978 fall rains and the "planting rains" of last spring.

"The farmers needed the rain, which had its bad points: the hard-ships it caused people," noted Rhea. Later, a hail storm swept through a strip of Martin, Midland and Dawson counties and inflicted damage on the young cotton.

The damage in Martin County alone was estimated about \$5 million over some 15,000 acres. But the resilient farmers surveyed the damage and considered the best course in the wake of the hail: plant again. Many farmers sowed sunflower seeds,

which turned out to be a marginal city and county in other ways: cash crop; others planted winter peas to enrich the soil via taking nitrogen from the atmosphere and putting it into the soil as a fertilizer.

WHILE THE CROPLANDS yield might be considered extraordinary, overall growth of the farming community was not.

"(It's) slow but sure," reflected Rhea. "It's nothing spectacular; it's just steady." He estimated the intown population to be around 2,500; the 1970 U.S. census count was 2,117.

Part of Stanton's growth has been attributed to "commuters" - those working people who use Stanton as a "bedroom city." They reside in Stanton because they prefer the smalltown atmosphere and work in larger cities such as Midland and Big

"The problem Stanton has had as far as attracting people is housing," Rhea said. "There's nothing avail-

However, some new-house construction is going on, and mobile homes (manufactured housing) are being moved into town. "That's the option a lot of people in town are going to." Rhea said.

OUTSIDE OF A bumper cotton erop yield, progress has marked the the Stanton Jaycess.

midland chamber of commerce:

# Our Progress Is Your Future!

Ten years ago the citizens of Midland established a set of Objectives which they felt would help Midland become a better place in which to live and work.

#### These Objectives included:

- Midland Regional Airport renovation and improved air service
- Midland College
- Air-conditioning of the schools
- Civic Center
- · Golf course improvements Hogan Park expansion (Midland will also soon have 3 18-hole private country clubs).
- North Loop Road
- Economic diversification
- Improved medical facilities

With the help of the Midland Chamber of Commerce, most of these goals have been reached (some are in progress, and others are on the drawing board) during the past 10 years. By providing the leadership and direction for Midland's future, your Chamber of Commerce has played, and will continue to play, a major role in this progress in the 80's.

SUPPORT YOUR CHAMBER. THEY HELP SUPPORT MIDLAND

#### Midland College expands curriculum to meet almost all community needs

record student population, Midland College has become the center for many activities designed for local residents.

"Serving the academic, vocational, and cultural needs of the community is our purpose for existance," pointed out Dr. Al G. Langford, president, 'All our programs are geared for the Midland area, including universityparallel academic courses, the many vocational and technical programs, the adult and continuing education short courses, the seminars and workshops, even the athletic programs and the concerts."

During the past year, Midland College has instituted several new programs in response to local needs and demands. An eletronics program is now in its second year, training students to fulfill a variety of technical areas for local businesses and indus-

Heating, refrigeration, and air conditioning specialists are trained in a program that was begun last fall. The course includes training in solar energy technology, so that such systems can be installed, maintained and repaired locally by skilled personnal.

Respiratory Therapy, a health care specialty, is a one-year program of study in cooperation with Midland Memorial Hospital. Started in January, 1979, the first class has just finished its training that leads to certification as Registered Respiratory Therapists.

Midland College now offers the first two years of training in the five-year study program of Architecture. The program was instituted last fall and demand ha exceeded expectations. Midland College administrators worked closely with the Architecture departments at Texas Tech University, Texas A&M University, and the University of Houston in planning its curriculum.

Two programs initiated last fall by the Mid-Management Department, in response to locl needs, have drawn good first-year enrollments. One course is in small Business Management and the other in Industrial Supervision.

Journalism, while not a new program, has been expanded this school year with the addition of another fulltime instructor. Selection of a person for the Allison Chair of Journalism, made possible by a \$750,000 endow-ment last year by Helon H. Allison, is expected to increase instructional capabilities in writing, editing, photography and layout courses.

A shortage of automotive repair people is being offset by the Apprentice Automotive Technician Training Program that began last fall. The program offers fulltime employment

Bustling with new programs and a with a new car dealer in Midland or Odessa, classes at Midland College two evenings a week, a chance for periodic salary increases, and an associate degree in applied science at

the end of three years.

And even Physical Education, the bane of many college students, now offers interesting ways to physical fitness. Some of the more popular courses include disco dance, defensive tactics, and belly dancing. Tennis, bowling, golf, archery, and vollyball classes teach skills that can by utilized for a lifetime.

Many students find that the classes in officiating lead to profitable spare time incomes while in college...and for many years after graduation.

Map drafting is a specialized class whose graduates are in great demand among petroleum companies and related fields.

Students who seek engineering degrees are discovering that basic courses at Midland College in physics, mechanics, and engineering drawing get them off to a fast start toward their advanced college work. But for many, Midland College isn't

the credit courses but the great variety of continuing education or "short courses" which are offered yeararound. Ranging in length from one evening to 13 weeks, they provide education, entertainment, recreation, and new skills. More than 300 such courses are

offered each year and more than 90 percent of them are actually conducted by instructors recruited from business, industry, etired, executives, and housewives.

Usually offered during the evening,

the short courses provide real estate computer programming, typing and shorthand brush-up for those wanting to enter or re-enter the job market; woodworking, welding, concrete ma-sonry and interior decorating to help people around their homes; breadmaking, microwave cooking, house plants, quilting, and cake decorating for the homemaker; powderpuff me-chanics and automotive tune-up for the auto enthusiast; drawing, cermics, watercolor, painting, crochet, macrame, and woodcarving for the artistically-inclined; belly dancing, karate and cardiopulmonary resusci-tation for those interested in their

And some - such as driver education, defensive driving, ham radio, dog obedience, poodle grooming, pri-vate pilot's ground course, stock market, and speed reading — don't fit into any particular pattern except personal improvement. Travelers, or those who dream about traveling, can take French or Spanish classes, plus a camera course for the mandatory picture-taking during the trip.

In short, the short courses provide unique opportunities for learning for those of any age or educational background. And new courses are constantly being offered, such as those in hand-weaving methods, transactional analysis, mountain combing tech-niques (taught in the gym, then pra-ticed in the Davis Mountains), or making stained glass creations.

Always changing, Midland Collebe has become a comprehensive community college...with the emphasis always on the needs of the community it

# Banks exhibit 'edifice complex'

#### By KAY HORD Staff Writer

Midland financial institutions kept pace with the city's mood of growth and change in 1979. Two new banks were built and four other firms underwent or are undergoing remodeling, expansion and new construction.

#### Gibraltar Savings and Loan

Gibraltar Savings and Loan is located on the first floor of a new 15-story, multi-tenant com-plex at the intersection of Texas, Avenue and Loraine Street

The building has an approximate square footage of 187,000 and is on a 300- by 140-foot lot. Architects were Skidmore, Owings and Merrill

The Gibraltar Building is located within a three-minute walk of most of the major business and civic facilities of downtown Midland.

Clad in brick and glazed with a highly efficient glass, the building provides energy savings for its tenants. Views from the unique curved corner offices are enhanced by floor to ceiling

Glass at the ground floor is clear for good visibility of the lobby and of Gibraltar Savings and Loan. The plaza is landscaped with trees and

The building occupies half of the block bound by West Texas Avenue, North Loraine Street and West Illinois Avenue. The parking facility to the north of the building accomodates 321 cars and operates on a self-service basis 24 hours a day. The garage is a continuous ramp with wide two-way driving lanes and 90-degree angle parking. The garage elevator is directly adjacent to the plaza.

Entry to the building is from the landscaped plaza facing on North Loraine Street. During banking hours the lobby will be the entire ground floor. Due to the mezzanine configuration both the banking room and the building lobby wil be a full two-story space with the mezzanine suspended above.

The drive-in bank facility is located in the rear of the main building entry

The unusual shape of the building provides the maximum number of perimeter offices around a compact core which includes elevators, fire stairs, toilets and fan room. The distance between the core and the exterior wall has been carefully organized to accommodate circulation, interior clerical space and exterior offices.

The ceiling height on each typical floor is nine

At present, the building is 100 percent leased. Tenants include American Public Energy Co., American Royalty Co. Anadarko, Banner Petroleum, Border Exploration Co., Braniff International, Conoco, Delta Drilling, Ford Chapman, Gibraltar Savings Association expansion, Houston Oil and Minerals, HNG Oil Corp., Hughes Tool Co., William Jowell, Kobe, Inc., Koch Exploration, David A. Metts, Mitchell Energy, Natural Gas Pipeline, Natomas North America, Inc., Natural Gas Pipeline, New York Life Insurance Co., N L Baroid, Northern Natural Gas Co., Parker Drilling, Pennzoil, Petroleum Information, Saber, Dan Secker, Texas Universal Petroleum Co., John M. Wilson, and Woods

Conoco is the biggest leasor, occupying three floors.

#### Western State Bank.

The Western State Bank building is part of a new complex called Western Park Plaza located at 1030 Andrews Highway. The complex is situated in the heart of Midland's retail district as well as at the demographic population cen-

The Western State Bank Building combines a modern exterior with an impressive atrium. Insulated, double-pane glass windows around the exterior are accented by the building's smooth stucco finish. The special tinted glass has an extremely high "R-value" for much greater heat retention during brisk winter

An inset plaza area at the building's entrance is offset by a striking two-story pylon, and accented by ground-to-roof silver reflective

In a dramatic departure from the usual architectural mode, the Western State has been designed as an inward-oriented office complex. Interior offices overlook a central atrium,

which is a continuation of the plaza motif. The elevator and stairwell are hidden from view in a rounded enclosed structure, and as a unique "extra" the elevator pylon rises out of a cascading pool of sparkling water.

Sunlight, entering through skylights, highlights the interior.

Slate-style floored walkways in the atrium area, as well as fully accessible atrium balconies on all second-level offices, offer opportunities for closer study of the atrium.

Office suites feature carpet, nine-foot doors with lever hardware and bronze mini-blinds on interior and exterior windows.

Western State Bank has been built to provide

maximum energy efficiency. Recessed, energy-conserving light fixtures are one means. The fixtures feature low energy ballasts and energy-efficient fluorescent tubes which are combined with special parabolic lenses to produce as much light in a three-tube configuration as in the standard four-tube outlet. Heat buildup is reduced by approximately 50 percent, and the lighting results in less strain on

the eyes. Heating and air conditioning also contribute to energy conservation through use of a Variable Air-Volume zone controlled system.

Western State Bank also has a free parking area for its customers.

Architect for the approximately 57,000-squarefoot building was Richard Fitzgerald and Associates of Houston.

In addition to the new construction, Western State recently opened its 11,000-square-foot drive-in bank facility north of the main building on Whitney Drive. The new facility, which opened in October, has six customer drivethrough windows with room to expand to 11 when the need arises.

#### Commercial Bank and Trust Co.

Commercial Bank, at 2301 W. Wall Ave., is adding approximately 19,000 square feet of space

to its present building, almost doubling the operational area of the bank, as well as remodeling its lobby area.

And, in September of 1979, the drive-in banking facilities were expanded to 14 lanes, including two commercial tellers.

Architects for the 19,000-square-foot addition are Frank Welch and Associates. Area Builders are the contractors, and Highland Interiors of Lubbock is handling the interior decoration.

The new construction is a two-story building with basement. A spokesman for the bank said the installment loan department, operations and expanding operation departments, such as collections and bookkeeping, will be moved into the new building when it's finished. Construction should be completed by April.

Energy-saving devices include a smaller, more efficient air conditioning unit to be used in

the summer, and insulation in the walls. The remodeling calls for a complete reworking of the lobby area, including inside teller lines and offices for the president and installment loan and marketing officers. The lobby also will be completely refurnished, the spokesman said. Final square footage for the bank, after the addition is completed, should be about 42,000.

#### **Texas National Bank**

Texas National Bank is one of Midland's new

Its \$550,000-dollar building was constructed at 4309 N. Garfield. The building has approximately 7,000 square feet. Original plans provide for possible expansion, although none is planned in the building itself.

The bank has three drive-in positions, which may be expanded to as many as eight during the

latter part of 1980. Architect for the building was Jimmy Leath of

#### First National Bank

The First National Bank, 303 W. Wall Ave., has almost completed a \$4 million project including a 52,500-square-foot addition to the 24 floors and remodeling of the first floor, west side. A second-floor west side expansion also is under

The first-floor expansion will include executive offices and commercial lending offices. The second-floor expansion will make additional room for the trust department, employeelounge and remodeling for clerical departments.

Upon completion of construction, the 24th floor will include space for tenants, a board of directors meeting room and space for the directors' and officers' dining and lounge area.

Work on this began in March of 1979 and should be completed around September. Interior focal points will include a multi-floor atrium, which will penetrate the roof. Special reflective, energy-conserving glass, similar to that used in the

previous expansion program, will be used. One of the primary entrances to the bank, following remodeling, will be through the plaza, which is also getting a little polish. New grass and flower beds are being planted for spring.

Architects for the work at First National are Wood and Associates of Dallas.

#### .... Metro Bank

Metro Bank is Midland's other new bank. Located near Midland Regional Airport, the bank is at 3701 LaForce Boulevard. It opened its doors Dec. 1, 1978. The bank facility is situated on three acres of land and features 4,500 square feet of space, customer parking and three drive-in windows

The one-story building was contructed with an open-air design for the interior.

Cost for the building was approximately \$300,-000. Architects were Covington, Shelton and Taylor of Odessa.

The Gibraltar Building, with its unique construction, symbolizes 1979's year of physical

changes for Midland's financial institutions. (Staff Photo by Brian Hendershot)

## Building permits break record

#### By LANA CUNNINGHAM Staff Writer

After an unsurpassed year in building during 1978, Midland economic officials expected things to slow down somewhat in 1979. To their surprise, building picked up even more.

Building permits topped out at \$94,353,-133, setting another record for the second consecutive year. The previous year saw building permits issued for \$86,935,-762 of construction. This is about \$7.4 million less than the 1979 mark.

However, to reach that record mark, fewer permits were issued in 1979 -1,510 permits compared to 1,589 the pre-

New single family residence and new commercial ventures were almost equal last year. Permits for 482 new residences valued at \$29,488,901 were issued while 114 permits totaling \$29,899,337 went for new commercial structures.

MAJORITY OF THE commerical permits were issued in the first half of the year, 69, compared to 45 in the latter

New single family homes went down last year in number and total valuation. In 1978 there were 561 permits totaling \$33,553,210 for an average cost of \$59,809 per house. In '79, there were 79 fewer permits for \$4 million less. However, new homes in Midland last year cost an average of \$62,032, more than \$2,000 more per house.

Permits for multiple family dwellings increased in 1979.

Duplexes increased by 14 in Midland at a cost of \$797,000. In 1978, the number was six permits and \$449,000 in construction costs.

Apartments and quadraplexes increased by 1,064 units — more than twice the 545 units added in 1978. Nine permits

were issued in 1979 for multiple family structures that should cost \$17,024,000. For the previous year the figure was eight permits for units costing \$6,095,-

MOBILE HOMES - one of the substitutes to fast-rising housing costs - increased by 27 in the city limits last year. ant space in new office buildings. Fifteen permits for projects costing \$1 million or more were issued in 1979. This is three more than in 1978.

THOSE PROJECTS include: —A parking garage for the Gibraltar Savings Building, 200 N. Loraine St., \$1,-

## permorama

'progress in the permian basin'

The homes cost an average of \$10,060.

As new office buildings were added to the skyline last year, altering the insides of those structures to suit the tenants added \$13,607,276 to the building total.

Repairs and additions to homes last year totaled \$3,559,119, about the same as 1978's figure of \$3,503,939.

The number of permits issued for structures costing \$100,000 or more to construct was about the same for 1979 as for the previous year — 78 last year over 75 in 1978. These permits weren't limited to new structures, but also included remodeling projects, especially for ten-

—Three office buildings, 4506 W. Illi-

nois Ave., \$1,200,000. SOME OF THE other major projects costing over \$100,000 were:

Monterrey Cocina Mexicana, 1501 N. Big Spring St., \$243,315; hangars for Rich-Air Co. at Midland Regional Airport, \$629,000; Salvation Army chapel, 3500 Park Lane, \$374,000; Petroleum Information, remodeling building at 500 N. Baird St., \$250,000; Metro Bank, Mid-

land Regional Airport, \$274,726.
Also, addition to Southwestern Bell
Telephone building at Midland Regional Airport, \$408,000; new Midland Regional Airport, \$408,000; new Midland Chamber of Commerce building, 109 N. Main St., \$591,900; Education Service Center construction, \$210,000; general maintenance building for State Department of Public Safety, 5100 W. Interstate 20, \$320,095; Kettle Restaurant, 4206 W.

Wall St., \$150,000. Other construction was for Plaza Shopping Center, furniture store, \$400,-000; office building, 720 W. Dengar Ave., \$190,000; flight service station for Federal Aviation Administration, Midland Regional Airport, \$585,000; insurance building, 901 W. Indiana Ave., \$260,000.

Midland High School was scheduled for a \$5 million facelift and expansion in the \$10.2 million bond election defeated by voters in October. The school - parts of it 50 years old - houses grades 10, 11 and 12 for just over half of the high school students in the city. (Staff Photo)

# MISD dedicates itself to improve education

Staff Writer

As part of a five-year accreditation plan, the Midland Independent School District has dedicated itself to individualizing instruction as much as possible for all students in the district.

One major goal of the five-year plan is to improve significantly the standardized test scores in both reading and math for ethnic minorities, low achievers and the gifted students in the district.

A standardized test given last year showed 48 percent of the sixth-grade students in the Midland schools are achieving below the national average on total reading tests. The test showed only 19 percent of Midland sixth graders were in the lowest quarter while 27 percent scored in the top quarter on the national test.

The goal of the five-year plan for continued accreditation with the Southern Association of Schools is to improve elementary reading to have less than 43 percent of sixth graders scoring below the national average on the total reading test. Moreover, district officials hope to have fewer than 14 percent in the lowest quarter and more than 32 percent in the top quarter on the national rankings.

SIMILAR TEST performances and specific goals have been set for reading in the secondary grades and for both elementary and secondary math

The district has mapped out a careful timetable to meet each goal, with major emphasis on individualizing instruction throughout the district.

Instead of one teacher lecturing a classful of 30 students on one topic, smaller roups within the class and a variety of teaching skills will be used

to reach each student at his own level. The new emphasis on working with each student at his own level for a good, back-to-basics education is

far from inexpensive. Diagnosing the particular skills that need improving is the initial task set for themselves by Midland's public school officials. A customed-designed reading and math skills test — the Midland Assessment Program, or MAP for short - fills that need quite

starting point and progress made during the year. The tests measure the students' ability to do specific skills, such as add prefixes or suffixes to words or to find the sum of two numbers. Each student's performance is charted on a com-

puter readout. A copy of the readout is given to both the teacher and the parent. The specific nature of the skills measured on the test serves serveral pur-

Teachers can get a better idea of the types of skills each student needs to improve his math or reading. This allows the teacher to group students with similar problems to work with them more efficiently. The teacher and parents also can talk specifically about things that can be done at home to improve test scores and academic performance.

Moreover, the test gives the student himself specific goals to improve particular skills rather than just an overall impression that he doesn't read well, school officials point out.

THE SCHOOL BOARD approved spending more than \$50,000 for Hoffman reading machines for this school year for all fourth-grade campuses and three Title I schools. Title I is a federal program to put extra help into schools with large numbers of economically deprived students or low achievers.

The machines use a self-paced, self-correcting series of slides and recorded tapes to teach students reading concepts.

Each set of slides corresponds to a workbook and other materials to reinforce the skills being learn-

The Hoffman machines allow some students to work on their own on already-diagnosed problem areas while the classroom teacher works with other students on different skills

School officials also are expanding the "Right to rogram to new elementary schools. More ar attitude than a special program, Right to Read varies from school to school, but each is alike in putting the emphasis directly on reading with special activities such as book fairs and "reading recesses" to get students more interested in reading for both learning and recreation.

THE PARTNERS IN Reading program will be expanded to include all first and second graders and more students in the third and fourth grades. The program consists of take-home packets of books and worksheets geared for low-, average- and high-THE MAP TEST is given to students from the achievers that the student and his partner, usually a second grade up twice each school year to measure a parent or an older student, read and work on to-

> Another reading program for low-achievers, Distar, a highly-structured reading plan, will be added for kindergarten through the third grade in all Title I schools as part of the five-year plan.

## Midland school district can be compared to massive business

Hill house

By SUSAN TOTH Staff Writer

The Midland Independent School District can be compared to a massive business.

This one has an annual budget of more than \$28.4 million, 1,538 employees and better than 15,600 daily

Run by a seven-member board of elected trustees, the Midland school district has an annual payroll of more than \$21 million.

Officers of the board are Marshall S. McCrea Jr., president; Edward E. Runyan, vice president, and that money was for the renovation and expansion at James H. Ramsoure, secretary. Other members Midland High School, while the rest was spread president; Edward E. Runyan, vice president, and include Johnny R. Warren, Parker Humes, Joyce Sherrod and Joe H. Dominey.

Mrs. Sherrod and Humes, the newest members of the board, were elected in the April 1979 school board elections when Runyan was re-elected to another

Mrs. Sherrod defeated incumbent Ann Page, while Humes took the place of David Grimes, who chose not to run for re-election last year.

Current terms for Ramsoure, Warren, McCrea and Dominey will end this year. The past year has been one of problems and

progress for the board of trustees and the district as Last year began with a controversy when Schools Superintendent Dr. James Mailey recommended the

board implement Plan O, a proposal to consolidate the city's two high schools to save money and prevent frequent boundary changes. The flurry of emotion that proposal stirred up

lasted well into the April school elections when a non-binding referendum on the issue was defeated by a nearly 5-to-1 margin.

The school board didn't get much of a rest, however. At the same meeting they accepted the defeat of Plan O, they drew battlelines on a new controversy - the condemnation suit against the estate of J.E. and Irene Hill.

The Hill house, a rambling, classic-style home on a little more than four acres at the corner of Illinois Avenue and F Street, was the key to a planned expansion of the Midland High School campus. According to the district's master plan, several houses in the area would be torn down to make room for new playing and practice fields, a baseball diamond and

football area for the severely overcrowded MHS. The opposition to the district's use of its eminent domain powers centered on the efforts to save the

The controversy ended with almost everyone happy when the house was sold separately to Mr. and Mrs. Ralph Viney, who plan to restore the home on property they own just outside Midland, and the land was purchased by the school district.

The feelings involved, however, certainly helped defeat the \$10.2 million bond election trustees put before the voters in October. More than half throughout the district in a something-for-everyone effort to get the issue passed.

School trustees not only have to try to please the constituents who elect them to their non-paying jobs, they also have to deal with federal and state regula-

One major sign of the federal regulation is the desegregation plan in its third year in Midland.

The plan, worked out after long hours of meetings with community leaders, parents, school officials and U.S. Justice Department workers, basically is centered in the elementary schools.

All elementary schools are grouped into clusters of three. Students in kindergarten through third grade remain in their neighborhood schools.

From the fourth through sixth grades, students attend a different school in their cluster each year. Buses are provided to take students from their neighborhood schools to the cluster school daily.

To fill some of the time spent on buses every day, the PTAs have sponsored the "Bus Plus" program, a series of tapes played during the bus rides with stories, music and other items of interest to help cut

bus boredom. The three junior high schools, two freshman schools and two high schools have boundaries that keep racial balances in roughly equal proportions.

down on any discipline problems arising from

Other state and federal programs mandated for the schools include bi-lingual education for anyone from 4-year-old children of migrant workers to high school students, special education for children with physical, mental or emotional handicaps, and special help for students from economically deprived households.

#### NAR's Midland office firm's oldest, largest

North American Royalties, Inc., which is headquartered in Chattanooga, Tenn., has two divisions: the Oil and Gas Division, which carries on exploration activities in the Continental United States through its four district offices, and the Wheland Foundry Division, which manufactures grey iron casting, principally for the automotive industry.

NAR's oldest and largest district office is located in Midland. W.A. "Bill" Glover is Midland district manager. The Midland office is actively involved in exploration, development and production in the Permian Basin and the Rocky Mountains.

With a total staff of nine people, NAR's Midland operation is seeking participation in development ventures and is involved in producing properties in many producing areas scattered throughout the Permian Basin. "We are involved and we want to be more so," says Glover, a 21-year vet-

eran of Enserch Exploration, Inc., before he joined NAR in 1977. North American Royalties' other district offices are located in Houston, Tex.; Lafayette, La., and Oklahoma City, Okla. G. Jack Fischer, who had 22 years experience with Texaco before joining NAR in 1977, is division general manager.

NAR's Oil and Gas Division is engaged in an active exploration program in South Louisiana, The Texas Gulf Coast and Oklahoma, in addition to its Midland operations, which are carried out in West Texas, New Mexico and the Rocky Mountains.

NAR is continuing its development of Wasson Field in Yoakum County by completing its sixth well on the Sullivan lease in the San Andres section. NAR has 1,500 acres under lease in the area and a 50 percent working

NAR has successfully offset its No. 1 Isaac Williams discovery well in the Isaac Field, located in Howard County and completed in the Pennsylvanian section. The confirmation well to the new field, the A.R. Williams, was completed in the Pennsylvanian section in October 1979. NAR has 4,500

acres under lease in the area and a 90 percent working interest.

NAR's Oil nd Gas Division drilled and participated in the drilling of 50 wells in fiscal 1979, which ended April 30. Twenty-four of these wells were exploratory wells, and 26, development. The success ratio was 37.5 percent for exploratorty wells and 77 percent for development wells.

NAR property interests are located in Arkansas, Colorado, Louisiana, Mississippi, Montana, Oklahoma, Nebraska, New Mexico, North and South

Dakota, Texas, Utah, Wyoming and Canada.

Increased acreage acquisition during 1979 was in direct proportion to the company's planned exploratory program and added to the company's high quality prospects for drilling in 1980 and years ahead. Fifty percent of the division's budget is allocated for exploratory spending in fiscal 1980

and 50 percent for development of existing fields. The company was started in 1866 as a general foundry by George W. Wheland. Ownership passed into the hands of Gordon P. Street, its persent board chairman, in 1945. In 1938 the company added well drilling equipment to its line of products. Petroleum interests of Street were combined with the foundry and manufacturing enterprises in the early 1960's

In 1969 Gordon Street Inc., purchased majority interest in North American Royalties, Inc., whose founder was Thomas Leach. The two firms merged, and NAR, a publically held company with its stock traded on the American and Pacific Coast Exchanges, became the survivor corporation.

Street is the principal stockholder. His son, Gordon P. Street, Jr., is

Glover, a native of San Angelo, was graduated from the University of Texas at Austin with a B.S. degree in Geology.

Other professionals in NAR's Midland office include Paul C. Raymond Jr., district geologist, who has 23 years experience as a geologist in West Texas and New Mexico; Ken Scott, district engineer, who has been with NAR since 1976; B.F. Yocham Jr., petroleum engineer, who joined NAR in 1977, and Richard W. Stone Jr., exploration geologist, who joined the company in October 1979.

# FNB ready to celebrate 90th year as Midland's financial leader

By LANA CUNNINGHAM

Midland opened its doors to handle business from officers dining and lounge areas. area cattle and sheep ranchers.

business as the leading financial institution in the excess of \$139 million. area, its business still includes ranching with the added bonus of the petroleum industry.

out of this private venture that need for a national bank was generated.

The First National Bank was organized June 16, 1890. The office opened in July at the corner of West Wall and South Main streets with a capital of \$60,000. Ten shareholders held the 100 shares of stock valued

Elected to the first board of directors were John Scharbauer, W.H. Cowden, W.E. Connell, G.W. Elliott, A.W. Hilliard, W.P. Mudgett, R.W. Johnston and John R. Hoxie.

Picked as officers from that group were Hilliard, president; Cowden, vice president, and Connell,

Records from that period show that five persons were employed at the bank. But the records don't man. reveal whether or not the president and vice

president were on the pay rolls. The first bank building was a two-story brick, but it burned in 1907. Business moved to a building on North Main Street until the structure was rebuilt. Another two-story brick building was completed at

the same location in 1909. As the Permian Basin became more populated and Midland grew, the bank prospered. The building was remodeled several times between 1909 to 1959 to

accommodate the growth.

During one of the remodeling periods, the bank moved its operations to a location at the corner of Wall and Loraine streets. In September 1959 a new banking facility was completed at the corner of man. West Wall and South Colorado streets, where The First National Bank still is located today.

The bank installed the first auto-bank, drive-in teller windows in Midland and opened them in July

In following banking laws at that time, the drive-in windows were connected by a tunnel — seven feet high and five feet wide - underneath South Main Street. It ran east to the corner of East Wall Street and South Baird Street where the drive-in windows were located. The tunnel is 220 feet long. It no longer

Another construction phase is almost completed. This \$4 million project includes a 52,500 square foot addition to the 24 floors and remodeling. Still being worked on is the first floor west side expansion for executive offices and commercial lending officers, a second floor west side expansion for the Trust Department and employee lounge and remodeling the nation.

for clerical departments.

Upon completion of construction, the 24th floor will include space for tenants, a board of directors Almost 90 years ago, The First National Bank of meeting room and space for the directors and

# Midland skyline gets addition

By JANINE GREEN **News Staff** 

One of several new office buildings going up on the Midland skyline is 601 Loraine, a project of Midland Southwest Corp., located at Loraine and Louisiana streets.

'We anticipate being fully leased before the building is completed," said G. Arthur Donnelly III, president of the firm. Among the expected tenants are Xerox Corp. and Continental

Midland Southwest, a publicly held real estate development and management operation, was formed ten years ago as FNB Development Corp., an affiliate of First National Bank of Midland. Corporate headquarters are at 1200 Petroleum Building and the firm recently shifted a portion of its interest into the energy field, including gas gathering and lease inven-

Begun as a bank-affiliated company engaging in business investments benefitting Midland and the Permian Basin, the firm's first venture was the purchase of 85 percent of the outstanding capital stock in Western United Life Insurance Co. The Midland-based firm was operated as a principal subsidiary until its sale in

sition of finance and oilfield equipment companies. However, most of the company's

Other early endeavors were acqui-

activity has been in the realm of real estate. In 1973, the company acquired Shell Oil's leasehold in the historic 12-story

land. The building was later remodeled and now boasts 100 percent occupance. Another major move in the real estate field-came in May 1973, when FNB and its wholly owned subsidiary,

Petroluem Building in downtown Mid-

Basin Headquarters Inc., acquired a half-block of land in downtown Midland and launched the Hilton hotel

Completion of the Midland Hilton's first 119-room building in mid-1976

was followed in 1979 by the construction of a twin tower expanding the hotel to 260 rooms.

Other commercial property which is now held by Midland Southwest is a half-block adjacent to the Petroleum Building and a downtown quarterblock parking facility. Donnelly and the firm's vice president, Richard Lowder, say future projects may include a mid-rise condominium complex and an office building near Midand Memorial Hospital.

Residential real estate development, through an alliance with Epoch Properties of Denton, is another fertile field for the company.

"We're the financial partner, and they're the operational partner," Donnelly said. Together, they have been responsible for the construction of the 600-unit Haystack apartment complex, a \$10 million Midland investment.

In the planning stages are 90 luxury apartment units and Haystack complexes in Amarillo and the Tyler-

# Fast-growing HBF Corp. active among realty firms

By ED TODD Staff Writer

HBF Corp., one of the fastest growing enterprises in the Midland area, is heavily involved in the construction, leasing and management of commercial real estate projects.

The company was incorporated almost 20 years ago, but has been active in real-estate development since

The family-owned business was started by the late Bill Faudree, a Midland County rancher. After his death in July 1976, Larry Bell be-came president and chief executive officer of HBF and assumed responsibility for financial management of Faudree-Parks Interests, a partnership with real-estate holdings in Texas, New Mexico and Australia.

Bell, a certified public accountant (CPA) who had worked for Main Lafrentz & Co., a CPA firm, prior to joining HBF as vice president in 1975, directed the organization of HBF Construction Co. in January 1977 and HBF Property Management Inc. in

During the past four years, HBF has grown from a company with two employees to a multi-million dollar organization with more than 120 employees. The HBF companies develop, lease and manage properties for HBF's own account and outside par-

Among the major projects of HBF Construction, headed by David T. Leonard, are One Marienfeld Place, Marathon Oil Co. building, the expansion of The First National Bank building, RK Petroleum building, the Petroleum Club of Midland, 600 N. Loraine Building, San Miquel Square and the Midland Chamber of Com-

With the start of two new projects, Empire Plaza and Oak Tree medical office building, HBF Constrution Co. will have more than 500,000 square feet of commercial buildings in

Larry Bell

Loan Association of Midland. The building, to be located at the corner of Wall Avenue and Pecos Street, will add 180,000 square feet of downtown office space.

Oak Tree will be a new medical office complex at 2401 W. Louisiana St. and will be within a few blocks of Midland Memorial Hospital.

HBF Property Management Inc. will have more than 800,000 square feet of office space under leasing management with the addition of Empire Plaza and Oak Tree. Among other properties under its management are the Blanks Building, HBF Building, One Marienfeld Place, Western United Life Building and San Miguel Square.

Charles Martin is president of HBF Property Management Inc.

HBF also has joint ventures with other developers and coordinates the construction, leasing and management package.

"We can offer a more rounded approach to developers," Bell said. Our company understands the needs Empire Plaza, a 12-story office of the developer because of our expebuilding to be built by 1981, is a joint rience. We understand the efficiences venture of HBF and First Savings & and the economic realities necessary to make a financially sound development project," he said.

Bell unveiled some long-range plans for the companies' involvement in the future development of a large tract of land west of Midland Regional Airport.

"In the spring of 1979, we repre-sented Mrs. Harriett P. Faudree in the preparation of a master plan for the future development of more than 8,000 acres between Air Terminal and the east city limit of Odessa," he

The master plan, which includes marketing survey and a comprehensive 30-year plan, was prepared by 3-D International of Houston. It pro-vides for phased development of residential, commercial and industrial tracts in the area through the year 2010. Included in the plans are singlefamily residences, ranchettes, townhouses, apartment sites, mobile home parks and retail, industrial and recreational developments.

HBF Corp. is also involved in developing other commercial and industrial properties in Midland and the Permian Basin.

### Chromalloy firm has plans for '80

Chromalloy Delta Mud, located at 3000 W. Kentucky St. in Midland, has operated in the Permian Basin of West Texas and southeast New Mexico six years.

The firm has 25 employees. Civic activities include membership in the Rebel Booster Club, chamber of commerce, Midland Soccer Association and Midland Junior Base-

ball Association. The company plans to update its warehousing and its engineering and research, and development departments during 1980. Recent company expansion includes improvement of its liquid mud facilities.

### Adobe Oil & Gas publicly-owned corporation

poration is a publicly owned corporation listed on the American Stock Exchange, and, with its predesessors, has been in opera-tion since 1960 when the first Adobe company was organized.

The company maintains in excess of 1.2 million net acres of exploratory leases onshore U.S.; operates some 800 oil and gas wells and participates in approximately 2,400 wells operated

Adobe owns a majority interest in two natural gas processing plants and one 8,000 barrel oil per day refinery located in West

The company is very active in strip coal mining operations in northwest Pennsylvania where it mined in excess of a million

tons of coal last year. Foreign interests include a 7.5 percent interest in a gas discovery in the Dutch North Sea where production from the field should commence sales within the next

Adobe also has an 18 percent interest in an oil and gas discovery in the Persian Gulf. Adobe's 1980 oil and gas drilling budget is expected to be expanded over its 1979 budget of \$27 million for oil and gas exploration and development.

### **OUR HISTORY**

The First United Methodist Church in Midland was organized August 23, 1885. It was the first

church organized in Midland. The first building was a frame structure erected in 1889 in the 100 block of North Main.

The second structure that housed the congregation was a red brick building located at the corner of Main and Illinois. The cornerstone was laid on Thanksgiving Day, November 28, 1907. (One of the memorial windows that was placed in that building is now in the Glass Memorial Chapel as a memorial The third sanctuary structure that served the congregation was completed and dedicated May

2, 1943. This structure was of mission-style. Portions remaining are the Scharbauer Education and the Fellowship hall wings.

In the early 1950's one portion of the educational buildings was erected. The other section, the area related to the offices and library, was completed in 1960.

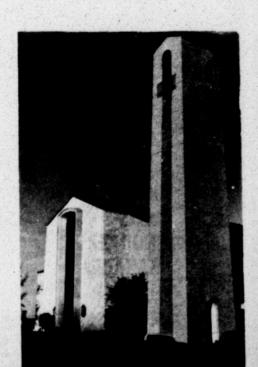

The present sanctuary, parlor and classrooms were completed for the official open house on May 5, 1968. The 90th Anniversary Celebration was observed August 24, 1975. The Glass Memorial Chapel was completed and the first service conducted in it February 29,

All church properties were dedicated May 28, 1978.

Construction work nearing completion will probanking space to Commercial Bank facilites on

West Wall Street. This artist's sketch provides a vide a face-lift and add 19,000 square feet of preview of the finished product. The bank will celebrate its 25th anniversary in May.

# Commercial Bank and Trust adding 19,000 square feet

By JANINE GREEN

For Midland's Commercial Bank and Trust Co., 1979 was a landmark year. And 1980 holds much the same

Visible to everyone who drives past the bank building, located at the corner of Andrews Highway and West Wall Street, is the current expansion program, said bank president Robert D. Southerland.

"We are adding 19,000 square feet to the present facility, almost doubling the operational area of the bank, Southerland said. The bank complex also houses offices and businesses. With completion of the construction and landscaping work early this year, we will be able to open a new oil and gas department and make provisions for more expansion later in 1980."

Planned are new commercial and installment loan offices, Southerland

complete with two commercial tellers, were opened. In 1978, only eight lanes were functional.

Also in 1979, Commercial Bank contributed deposits totaling \$79,240,013, up from \$66,362,417 in 1978 and \$68,-259,174 last Sept. 30, to Midland's record total bank deposits of more than \$1 billion.

Loans and discounts totaled \$49,797,-653, compared with \$42,248,932 in 1978 and \$46,999,101 in September.

In 1980, the bank hopes to establish new lending limits of over \$1,000,000 to any individual or business," Southerland said. "And, as the bank continues to grow, we intend to increase that limit to \$1,300,000.

Deposits grew almost 20 percent and loans increased 11 percent.

"We anticipate continued growth west on Wall Street," he said. That is the "logical pattern of business Early in 1979, the expansion of in by railroad tracks and residential

drive-in banking facilities was completed. In February, 14 drive-in lanes, streets."

Southerland also compared the competitive nature of Midland businesses to larger Texas cities. "The money available within our community is keeping pace with the economy," he said, providing a business atmo-sphere much like that found in Amarillo or Lubbock.

Also "new" to Commercial Bank in 1979 is Southerland.

An 11-year employee of the bank, Southerland was named president following the death of Robert L. Pendle-

# Former Midland Savings Association, now Gibralter, celebrates 45th year

Just over 45 years ago on December 12, 1934, 11 men met to organize a new savings and loan association in Midland. Long-time residents of the area will recognize most of their names, though many of these men passed away years ago: Clint Myrick, J.S. Nolan, D.L. Swain, T.R. Wilson, John P. Butler, D.H. Roettger, J.R. Martin, Addison Wadley, F.F. Elkins, I.E. Daniels, W.J. Sparks.

Martin became Midland Savings Association's first president. Sparks and Attorney Frank Stubbeman were the other officers at the beginning.

While the association grew rapidly with Midland from assets of \$6,-197.50 at the time of organization to nearly \$80 million dollars by the mid 1970's, the leadership was remarkably stable. Martin, Butler, Daniel, Roettger, Wadley, Wilson and Sparks were the first directors. P.F. Bridgewater, later replaced Sparks, and two new directors were elected in 1953, G.R. Greathouse and A.A. "Jack" Bradford.

Clarence Scharbauer Jr., Murray Faskin and Frank Cowden joined the board in 1956.

In the late 1950's Midland Savings became affilated with four other savings and loan associations across Texas: Gibralter Savings of Houston; Equitable Savings of Dallas and Fort Worth; First Savings of Corpus. Christi; and Imperial Savings of Amarillo.

Although the affilation offered greater flexibility in the operation of each association, it eventually became evident that a merger would be of tremendous benefit to the combined business interests of, and to the customers served by, these five associations in Texas.

The question that had to be answered by management was which of the five associations, if any, should provide a name for the group involved in the merger.

Gibralter Savings had a unique history. Having been chartered in 1921, it was somewhat older than Midland Savings. Isreal Friedlander, president of Gibralter during the early 1930's, worked closely with various federal bodies in the development of the Federal Savings and Lean Insur-ance Corp. (FSLIC). When Franklin Roosevelt signed into law the act providing for the FSLIC, Gibralter became the first savings association in America to offer this insurance coverage to its depositors. To this

WANT ADS

Dial 682-6222

day, Gibralter proudly boasts that it is "America First Insured".

Other historical milestones were the first home repair loan in Houston under Title II of the Federal Housing Administration, the first home loan in Houston to veterns of World War II under terms of the G.I. Bill of Rights, Grantee Certificate Number One for the Houston area, and the first combination GI-FHA loan in Houston.

Having this rich history in the savings and loan business, Gibralter Savings Association was selected by management as the logical member of the group to provide the name for the combined state wide associa-

The merger took place in January, gion also has an office in near-

1978. Gibralter Savings immediately became a \$2 billion association, the largest in Texas. Today, that financial strength stands at more than \$2.5 billion.

Gibralter serves 6 major cities be-sides Midland; Amarillo, Lubbock, Dallas, Fort Worth, Houston and Corpus Christi. More than 65 offices are serving a total of 29 Texas cities, including the major markets.

In Midland, the Association operates three offices: the Midland Savings Building at the corner of Wall and Colorado; the corner of Midkiff and Cuthbert Street; and the Plaza Center branch at the corner of Garfield and Wadley. The Midland Re-

# FUTURISTIC DMMUNICAT

### When your phone is far more than something to talk on.

Basic to man's nature is the need to com- and other laser systems will be installed television pictures will be possible municate — to' reach out and touch in various U.S. cities in coming years. prairie, by towering mountains, by teeming waters, man used his ingenuity to stretch beyond the barriers of nature. By drum, by smoke and fire, by horse and sailing ship and railroad and telegraph, man communicated. And soon he reached out and touched ... by telephone

By today's standards, the first telephones were crude ... but they opened the doors of imagination and innovation leading to current sophisticated systems. Today you can communicate with someone in Midland, Milwaukee or Malaysia in seconds. And don't forget the moon. It was telecommunications that allowed our president to talk to astronauts prowling the lunar surface.

But what of the future? Poised at the brink of a shining new decade, how will man reach out in the '80s and beyond, as the need for instant communications doubles and then doubles again? The answer is almost science fantasy.

Light, for instance. Laser technology. Tiny laser beams will carry signals over pathways of hair-thin glass fibers connected to transmitters the size of a grain of salt. In cables only half an inch around, these fibers can carry 50,000 simultaneous telephone calls at the speed of light. Fantasy? No. A test laser transmission system already is at work in Chicago,

to be connected by wires. People will wear telephones on their wrists ... Dick Tracy-style. Or they'll carry a portable phone designed to fit easily into pocket or purse. Telephone jacks in convenient public places will be available so you can plug in your portable phone. No coins needed; billing will be handled automatically The well-equipped home will feature a

communications console offering both verbal and visual communication. With such a console, a sick child could see and hear the school classroom ... or men and women could conduct business from

Doctors will be able to dial up X-rays and other medical data from distant locations. By touching a few buttons on the console, a student will be able to turn pages in books at a faraway library.

Even inanimate objects likely will "communicate." For example, the communications console could automatically alert emergency agencies in case of fire or burglary at the home. An automobile could "phone" for help in the event of a breakdown, or when fuel ran low.

By the end of the century, 360-degree

through holography, the use of a laser to could have the Cowboys and Oilers going at it right in the middle of your living

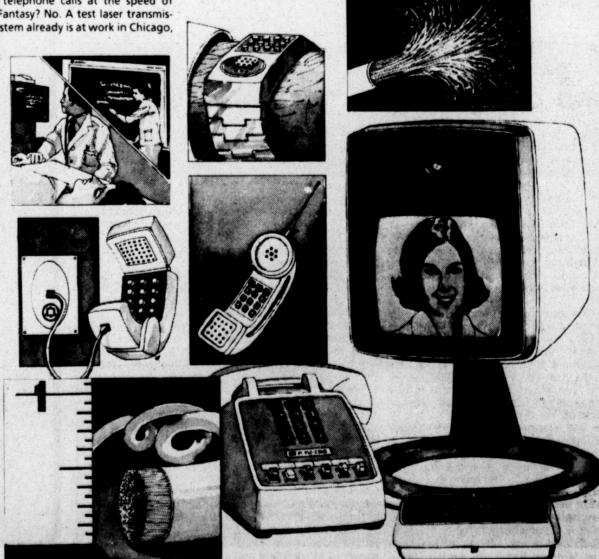

Too far out, you say? How about some once-only-dreamed-of communications items that are in service right now. The electronic blackboard, for instance. On a specially-designed chalkboard, chalk strokes are converted to digital data for transmission over regular telephone lines to another electronic blackboard at a remote location.

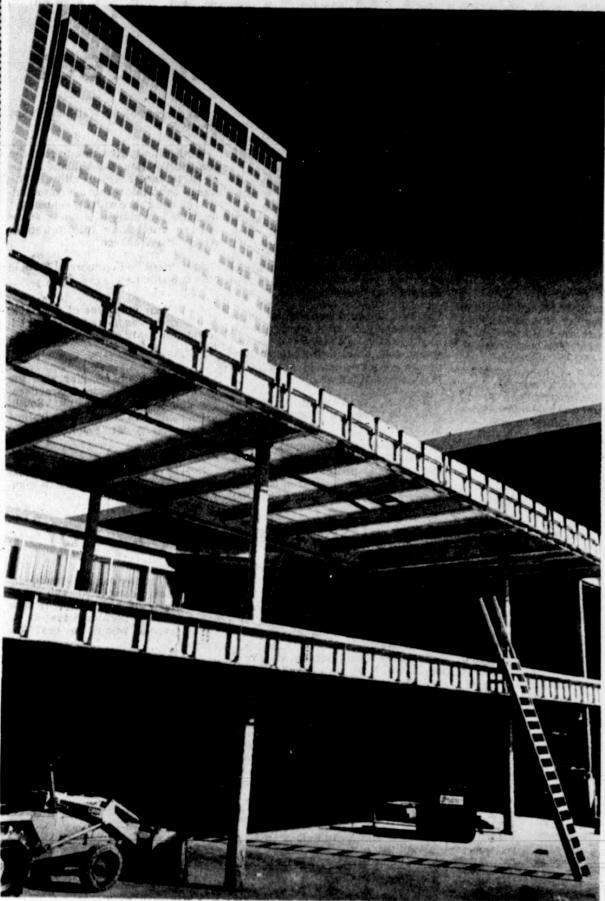

Or Picturephone' service. It provides long distance face-to-face communication. You can participate in conferences with colleagues miles away - or see and talk with relatives in a distant city.

Time races by, and our world becomes more complex. And telecommunications brings us closer together - giving us a sense of community.

With modern telecommunications, mountains are not so high, prairies are not so wide, and miles are not so long. And the moon is only a phone call away.

# PIC says U.S. oil, gas wells drilled during '79 very high

oil and gas in the United States during 1979 totaled 49,101, according to Petroleum Information Corpora-

The total was 392 wells, or .8 percent, above the 1978 figure of 48,709 wells. The 1979 total was the

Drilling dramatized the continuing trend toward increased exploration and development of petroleum resources within the United States, a trend which began in 1974.

A modern record for the number of active drilling rigs and a continuing trend towards deeper drilling were also noted during 1979. The Hughes Tool Company rig count climbed to 2,577 active rigs in early December of 1979. That figure is the highest since 1957, when the domestic count reached 2,652.

The total footage drilled increased by 4.83 million feet to 237.14 million feet during 1979. The average total depth for all wells drilled during the year was 4,830 feet, or 61 feet deeper than in 1978.

Drilling through 1979 started slowly, but picked up markedly during the last six months to surpass the 1978 pace. The 1979 figures included 18,856 wells completed as oil producers, 14,394 new gas wells and 15,851 dry holes. Oil wells were down 4.5 percent ary of A.C. Neilson Co., Northbrook, Ill., offers from 1978, but gas wells completed increased by 15 reporting services, data and data analysis serpercent, continuing recent emphasis on drilling gas prospects.

The number of exploratory wells seeking new

DENVER, Colo. — The number of wells drilled for fields (new field wildcats) dropped by 344 in 1979 to 6,777. This is a decrease of about 4.8 percent. Of these wells, 587 found oil, 683 found gas and 5,507 were dry, for a success ratio of 18.7 percent. The 1978 success ratio was 17.7 percent.

> By comparison, wildcat drilling in 1979 turned up 29 fewer new oil field discoveries, but 38 more gas field discoveries than in 1978. Wildcat drilling was deeper in 1979. The average depth was 6,109 feet, compared to 5,985 feet in 1978.

U.S. drilling activity was centered in Texas, Oklahoma and Kansas, according to Petroleum Information. Texas, with 16,514 well completions, again was the leading drilling state. Texas overcame a very poor first quarter record, caused by bad weather conditions, to surpass its 1978 completion total of 16 090 wells

Oklahoma retained its second position with 6,524 completions, followed by Kansas, with 4,205 wells completed during the year. Louisiana, with 4,089 well completions, remained in fourth place. Ohio, with 2,997, ranked fifth among the states. Of the top five, only Kansas failed to show an increase in the total number of wells drilled in 1979.

# League of Women Voters set for upsurge in activities

As a presidential election year dawns with 1980, the Midland League of Women Voters already is prepared for an upsurge in

Under the leadership of Charleen Rosebery, the alliance of women and men is gearing up by printing pamphlets on voter registration, how to write government officials and listings on who those officials are.

Mrs. Rosebery, elected last year for a two-year term, said the league has two basic aims - voter information and programs. League members hear programs at each meeting dealing with an area of interest to the voters. Meanwhile, those members push for increased voter registration and urge voters to be informed

on all issues involved in an election. Each May a programs calendar is set up for the next year's meetings which start in September and end in May.

"We try to keep in contact with the issues and keep up with them," Mrs. Rosebery said. "We're trying to look ahead to see what major issues will be coming up next year.

Early last year, the league studied human resources and focused on schools at a time when a school bond issue was before the voters. Another program dealt with state issues The issue of initiative and referendum - advocated by Gov.

Bill Clements — will be another topic for a program this year. 'We want to look at this (initiative and referendum) from all aspects," said Mrs. Rosebery. "It's not just a measure to cut taxes. We must understand the consequences of the issue.

School financing will be reviewed on a state and local basis this spring, she added Second function of the league is voter service. This doesn't mean strictly voter registration. Under this category, the league

'We can't take a stand on an issue until we study it and take a consensus," Mrs. Rosebery explained.

On local issues, the league often remains neutral unless there is consensus among the members to take a stand, she said. Locally, the group supports housing, revenue sharing funds, egal aid and school integration.

"We've taken programs that have been unpopular and cost us," she said. "When we do support something, at least the people know we have looked at it, and it's (support) not coming off the top of our heads.'

Midland's league has about 60 members. More usually sign up during a major election year, such as 1980, according to Mrs.

Dues are \$20 per person a year. Of this amount, \$10 goes to the national organization, \$7.50 to the state group and \$2.50 to the local chapter.

This money, though, isn't enough to pay for having various pamphlets printed, she said.

To raise funds, various people and businesses in the community are sent a letter asking for support.

None of this is tax-deductible," Mrs. Rosebery noted. "We are a lobbying organization. But there is one tax deductible outlet and that is for money to be donated for the League of Women Voters Education Fund.

Through that fund, in 1976, the national league sponsored the three presidential debates, according to Mrs. Rosebery The local league compiles pamphlets on the city and county governments to include explanations of how each operates, she

Members receive publications from the national, state and local chapters, she noted.

Local newsletters are exchanged with other groups throughout the state so other leagues can be kept up-to-date about what's

Midland's league is a potpourri of women from all age categories and descriptions, ranging from young and working to senior citizen to homemaker.

Because of this, two meetings are held on the second and fourth Thursdays of each month, she said

One group meets in the mornings at Mrs. Rosebery's home, No. 14 Saddle Club Drive. The other group meets at 7:30 p.m. at 3002-B N. Pecos St.

A mini-membership drive will be conducted in January. Persons interested in joining may telephone Mrs. Rosebery,

Other officers include Mickie Waters, first vice president; Shirley Watts, second vice president; Nancy Cassin, secretary; Bonnie Waibel, treasurer; Barbara Greene, membership; Diana Olien, publications; Mary Dunn, voter editor, and Pat Stanley, public relations.

The president got her start in 1973 when she lived in Phoenix, Ariz., and a neighbor told her about the group

When Mrs. Rosebery moved to Midland she immediately became involved in the local group.

"I have found the league to be an interesting, compatible group of women. They manage to look outward at the city, state, nation and the world," she reflected.

But the league doesn't disriminate by restricting itself to

women, she noted. They do accept male members. The League of Women Voters defines itself as "a non-partisan organization open to all persons of voting age who believe in

representative government. The purpose of the League of Women Voters is to promote political responsibility through informed and active participation of citizens in government.

# Western State Bank reflects much change

By SUSAN TOTH Staff Writer

Things are changing on Western State Bank's corner of the Andrews

The bank began construction on the 62,500-square-foot Western State Bank Office Building adjacent to the bank structure in December 1978. Already 75 percent leased, the facility is scheduled to be completed by

While some banking offices will be located in the new facility, customer services will remain in the main bank building where they always have been, according to bank officials.

The modern, energy-efficient new office building is built around an atrium core with insulated, double pane glass windows on the exterior accented by the smooth stucco finish of the building.

The inset plaza area at the building's entrance is set off by a striking two-story pylon accented by ground-to-roof silver reflective glass.

In addition to the new office building, Western State Bank has a new expanded 11,000-square-foot drive-in bank facility north of the main building on Whitney Drive which opened in October.

The new facility has six customer drive-through windows with room to expand to 11 when the need warrants it, bank officials said. More than just construction has been going on at Western State Bank,

End of the year figures showed deposits up substatially in 1979, with total deposits listed at \$22,034,554 at the end of last year, compared with

The bank's loans and discounts totaled \$11,953,709 at the end of the year. At the end of 1978, that figure totaled \$14,024,898 and was \$13,174,-411 at the end of September 1979.

\$17,815,519 a year earlier and \$18,768,850 just three months ago.

### More wood use seen in future

AUSTIN - As non-renewable fossil fuel sources are exhausted, "it's inevitable that no matter how we slice it, we'll be using more wood," according to Dr. Stephen H. Spurr, professor of public affairs and of botany at The University of Texas at Austin.

"After all, coal is nothing but fossil wood," he continues. "We can do anything with wood that we can do with coal.

"We can provide almost any product from wood that we can provide from petroleum and sooner or later we'll have to depand more upon our renewable resources," Dr. Spurr, president-elect of the Society of American Foresters, adds. Although wood is no longer the major source of fule

in the industrialized nations that it was a century ago, "half of the wood cut in the world is used for fuel," observes Dr. R. Keith Arnold, former UT Austin professor of public affairs and former deputy chief of the U.S. Forest Service.

As energy costs increase, "the use of wood (for

U.S. home heating) is very much more attractive than it ever has been previously," says Paul R. Kramer, director of the Texas Forest Service and professor of forest science at Texas A&M Universi-

Various recent estimates of the energy which could be derived from wood in the United States range from a conservative five percent of energy sources consumed to 20 percent, if all the wood growth not now used by the timber industry were utilized, according to Dr. Arnold.

But insuring an available supply of wood for energy and for other competing needs and functions of the nation's forests requires careful forest ry management, the three forestry experts believe.

Dr. Arnold believes that the conflict for forestry comes from within, and he indentifies important functions of the forests as those of social value recreation and wilderness preservation - in compe tition with the use of wooded lands for producing timber and supporting wildlife.

One-third of the U.S. is forested, Dr. Spurr states. and on those wooded lands the U.S. Forest Service and the Society of American Foresters have recognized more than 300 major forest types, each quite different in composition, size, density and use.

Those silvicultural systems are of widely varying character, he explains, "from major soft-wood conifer forests in the Pacific Northwest and in the Southern pine belt, to hardwood forests that cover most of the Eastern United States, with all sorts of mixtures in between.'

Each forest system requires a management program specific to the given forest type and conditions, Dr. Arnold says, noting that there are no generalized methods of managing such a variety of forests in the U.S. as there are in Europe, where only five to 10 forest ecosystems exist.

Yet, since 1970, the net annual growth of forests in the U.S. has increased about 18 percent, he adds. and well over half of the nation's forests now are carefully managed by the U.S. Forest Service, the Department of Agriculture and state forest services through extension programs or by industry

Mr. Kramer describes the pattern established on those lands as one representing "good growth stands, good stocking and a proper species assortment, a proper assortment of diameters.

The problems challenging foresters, Dr. Arnold says, are found in the remaining wooded lands small tracts of timber held by private owners where inadequate or no forestry management is practiced, a condition recognized as early as 1933 in the first national study of forestry in the United

Many people hold small areas of woodlands, he believes, for "their own amenity values" of wanting to preserve the timber, to look at it and live in it, "and tley are not aware that eventually it will unravel, and parts of it will be killed by insects or

Often those private forest lands are under-stocked, Mr. Kramer explains;

"They have a poor species composition, they exhibit relatively low growth rates, and they are the ones that need attention."

Because there is no public regulation of private forests in much of the U.S., the lack of effective management is a problem of economics of scale for many small forest land owners, says Dr. Spurr, for the spasmodic and only periodic income from a forest often cannot support the management need-

Adding to that the problem of logistics of numbers - reaching thousands of owners often enough to provide good management services - only compounds the difficulty, says Mr. Kramer.

Dr. Spurr believes that forestry in the small private woodlands can be improved only through financial or other incentives, developing economic conditions that make managing the forests profit-

# AT YOUR SERVICE

#### Gibraltar Savings' new downtown skyscraper will soon open for business.

Picture this. Rising above Midland's historical skyline, a shining 15 stories of brick and glass. The new home of Gibraltar Savings.

You'll find plenty of parking within easy walking distance, a convenient drive-in window for savings transactions when you are in a hurry, and ground-floor full service facilities to meet your savings or mortgage needs.

This new building is our way of saying thanks to the citizens and businesses of Midland. After all, we have worked together for 45 years.

### Gibraltar Savings is America's first insured.

# Discoveries show slight gain

Producing wells, like this one east of Midland, could mean the difference between domestic

independence and foreign control of America's supply of oil. (Staff Photo by Bruce Partain)

By JOE SALMAN Oil Editor

Stepped up drilling in the West Texas area during 1979 resulted in a slight increase in the number of oil and gas discoveries over 1978.

Oil and gas operators working the West Texas and southeast New Mexico Permian Basin reported 353 discoveries last year, eight more than were recorded in the Basin in 1978.

Gas zones continued to be a major target of the operators as they kept almost 300 rigs busy throughout the year. The rig count in the Basin for the final week of 1979 was 307.

In addition to the rotary rigs included in the weekly survey of Basin drilling activity, there were many cable tool operations on new projects and re-entry tests.

In all, drilling activity throughout most of 1979 was the highest in 22 years.

THE STEPPED UP DRILLING accounted for 221 oil discoveries and 132 gas strikes.

Eddy County, N.M., was the champion in discoveries with 32, including 27 gas strikes and five in oil zones. Eddy also was the champion in 1978 with 43 discoveries. Thirty-six of those wells were from gas pays.

On Texas side of the Permian Basin, Runnels County in the Railroad Commission of Texas' District 7-C, was at the top of the discovery list with 29, although nine of those strikes were in re-entry operations and nine were reopeners of previously discovered fields.

Operators reported 17 oil strikes and 12 gas openers in Runnels County. The same county accounted for 122 strikes in 1978, including 63 for oil and 59 for gas.

DISTRICT 7-C, WITH headquarters in San Angelo, handled more discovery completion reports than any of the other RRC West Texas districts. That area was the scene of 120 discoveries, 74 for oil and 46 for gas.

District discoveries in District 7-C by counties in 1979 were, with oil listed first: Coke, 2-1; Concho, 0-1; Crockett, 10-13; Irion, 13-0; McCulloch, 1-5; Reagan, 3-0; Runnels, 17-12; Schleicher, 9-7; Terrell, 2-3; Tom Green, 10-4; and Upton, 7-0.

Crockett County's 23 discoveries tied the area with Pecos County as the fourth most productive area from a discovery standpoint in the Basin.

Three other New Mexico counties — Chaves, Lea and Roosevelt — join Eddy in the discovery parade to give the southeast New Mexico area 67 of 1979's 353 new oil and gas field.

Lea County was in third place Basin-wide with 24 strikes. Thirteen were from oil pays and 11 were from gas zones.

Chaves County reported five oil strikes and a like number of gas openers, while Roosevelt County came up with one discovery, an oil

RAILROAD COMMISSION District 8, with headquarters in Midland, handled completion forms on 92 discoveries. Fifty-four of those openers were from oil pays, and 38 were gas

Pecos County led the district with its 23 discoveries. In second spot was Ward with 15 — six for oil and nine for gas.

The other District 8 counties and their discovery totals, with oil listed first, included: Andrews, 6-1; Crane, 1-2; Culberson, 0-1; Ector, 2-0; Glasscock 6-0; Howard, 2-0; Loving, 1-3; Martin, 2-0; Midland, 2-0; Mitchell, 2-0; Reeves, 4-9; Sterling, 5-1; Winkler, 4-2

4-9; Sterling, 5-1; Winkler, 4-2.
District 8-A, headquartered in Abilene, report ed 49 discoveries — 45 oil and four gas.

The district's county total included, with oil first: Borden, 5-0; Cochran, 1-0; Cottle, 2-1; Dawson, 2-0; Gaines, 5-0; Garza, 12-0; Hockley, 4-0; Kent, 1-0; King, 4-1; Lubbock, 1-0; Motley,

0-1; Scurry, 3-0; Terry, 2-1; Yoakum, 3-0.
The three counties of District 7-B included in the Permian Basin 1979 total included Fisher,

Nolan and Stonewall. Fisher reported seven oil and one gas; Nolan had 10 oil strikes and one gas discovery, and Stonewall County reported six oil strikes.

AMOCO PRODUCTION CO. and Gulf Oil Corp. were the champion discovery operators in the Basin last year. Each of the operators reported seven oil discoveries and three gas discoveries. Gulf was the 1978 champion with 11, while Amoco was runnerup with 9.

Yates Petroleum Corp. was the champion independent operator, filing potential tests on nine gas discoveries. Yates and HNG tied for the honor in 1978 with nine each. In 1979, HNG reported two oil strikes and one gas opener.

The independent oil and gas operators bettered the normal independent-major ratio by completing 86 percent of the Basin's 1979 new field or pay discoveries. The independents completed 302 of the discoveries and the majors completed 51.

The major tally, other than Amoco and Gulf, included Getty Oil Co., 7; Union Oil Co. of California and Monsanto Co., 4 each; Exxon Co., U.S.A., 3; Mobil Oil Corp., Texaco Inc., The Superior Oil Co., and Phillips Petroleum Company, 2 each, and Chevron USA, Shell Oil Co., Sun Co., Cities Service Co., Arco Oil & Gas and Conoco one each.

The independents with five or more, other than Yates Petroleum, included: C. F. Lawrence, 5; Mesa Petroleum, 5, Florida Gas, 6; Texas Oil & Gas, 5; Tucker Drilling Co., 5 and Fisher-Webb,

THE PENNSYLVANIAN ZONE led all other geological horizons in new discoveries. Operators finaled 100 oil strikes and 74 field openers in the various Pennsylvanian pays for a total of

The Permian, the Permian Basin's most productive zone from the standpoint of number of wells and oil recovered, was second in 1979 with 92 oil openers and 43 gas strikes for a total of 135.

Operators completed 19 openers in the Ellenburger, 14 as oil wells and 5 as gassers.

Other zones included, with oil listed first:
Devonian 9-4; Fusselman, 2-0; Connell, 0-1; Mis-

sissippian 3-1; Silurian 2-1; and Castile, 0-1.
Deep drilling, a trade mark in the the Delaware Basin area, continued during 1979.

The oil and gas explorers completed 13 discoveries below 14,000 feet, the deepest being C&K Petroleum No. 1-45 Meeker which opened the Worsham, North (Ellenburger gas) field in Reeves County. The hole is bottomed at 20,250 feet. The completion was through perforations from 19,690 to 20,210 feet. Operator reported a calculated, absolute open flow potential of 1,622,-000 cubic feet of gas per day.

GULF OIL CORP. No. 2-1 Emma Lou Unit, although still in the process of testing, was the deepest hole drilled in Texas in 1979. In fact, it is the deepest hole ever drilled in Texas.

Located 25 miles southeast of Fort Stockton, it is bottomed at 29,622 feet in dolomite and plugged back to 23,865 feet.

The biggest gas potential reported on a discovery well in 1979 was at Adobe Oil & Gas Corp. No. 3 Barstow in Ward County. It finaled for a calculated, absolute open flow potential of 70,000,000 cubic feet of gas per day, through perforations from 19,690 to 19,717.5 feet. Total depth is

The biggest oil potential was 726 barrels, reported by Regal Development No. 3-A T. K. Jones in Schleicher County. It opened the Regal (Wolfcamp) pool through perforations from 3,-

744 to 3,771 feet.

More discoveries, 47, were drilled to the 5,000foot level than to any other depth. Forty-four
completed with the top of the perforations in at

the 6,000-foot level.

Forty-two of the strikes were finaled at the 3,000-foot level, and 40 were potentialed at 4,000

# Energy: America's demise?

By Charles Dibona American Petroleum Institute President

WASHINGTON — When historians look back to the 1970s, they may well decide that the rapid decline in United States energy self-sufficiency was the most significant change of the decade for this country.

In the long run, our loss of control over energy may be perceived as more important than the nation's disengagement from Vietnam, more important than establishing relations with Communist China, more important than Watergate and more important than U.S. involvement in Mideast peace negotiations.

A few key numbers tell the story of how we've become heavily dependent on an uncertain energy lifeline from abroad:

—In 1970, the U.S. consumed more than 14 million barrels of oil a day. In 1979, the U.S. has been consuming more than 18 million barrels a day.

—In 1970, imports provided 23 percent of our oil. In 1979, imports are providing 44 percent.
—In 1970, the U.S. bought 71 percent

of its foreign oil from neighborly Can-

IN 1979, SAUDI ARABIA and Nigeria are our leading suppliers of foreign crude, followed by Libya and Algeria. The share of our crude im-

has risen from less than 11 percent in 1970 to 60 percent today.
U.S. oil consumption has grown considerably in this decade, and that

ports supplied by these four nations

growth has come almost entirely from imports. Imports provide what economists call the "incremental barrel" of oil consumed in the U.S.

This means that when the U.S. has wanted an additional barrel of oil above and beyond what was already being used, the additional oil came from a foreign country.

When federal controls on oil prices encouraged the nation to consume more energy during the 1970s, Americans bought more foreign oil.

When environmental restrictions made it more difficult to produce and use U.S. oil, gas and coal, Americans again bought more foreign oil.

When the government closed off

When the government closed off millions of acres of public lands from energy resource exploration, Americans turned again to foreign oil.

WHEN REGULATIONS STOPPED

the growth of nuclear power in this

country, Americans - as usual -

As long as artifically low energy prices encouraged consumption and as long as foreign oil was available to help the U.S. avoid hard choices at home, Americans reached out for more imports. By now, the nation's

addiction to foreign oil has hooked us

up to breakdown-prone life-support

machine half a world away.

Price has been the only effective restraint on this dependence.

When OPEC prices began to climb in 1973, people began to learn to save money by conserving energy. Forecasts of future energy consumption have been dropping rapidly in the last few years.

The most recent studies indicate that the U.S. will be using one-third less additional energy in 1990 than was predicted four years ago.

AND THE RECENT RECORD is bearing out the finding of these studies. In November, oil companies delivered nearly 10 percent less gasoline than last year. The evidence is clear—now that fuel costs are up, we are using our cars more efficiently.

Energy savings will make a big difference in the 1980's. But conservation won't save enough energy to avoid shortages — unless the nation lowers its standard of living. Even with stringent conservation, the latest energy studies predict, the U.S. will need over one-fourth more energy in 1990 than we're using now.

As the 1970s turn into the 1980's, the willingness of the U.S. to get that additional oil from abroad rather than from American oil or American natural gas or American coal or American nuclear power is helping the foreign producing countries to keep control over world energy prices

During the first part of the decade, OPEC maintained high prices by setting price floors.

NOW, AS A RESULT of the turmoil in Iran, OPEC has learned how to keep prices up by keeping production down and letting the oil addicts bid for their daily fix.

The cutback in Iranian oil output in late 1978 and early 1979 led to a loss of 2 million barrels a day of worldwide oil production. These 2 million barrels a day amounted to a mere 4 percent of Free World production. But the turmoil created by this reduction in world markets has allowed foreign producers to double crude oil prices this year.

One year ago at this time, the price of benchmark crude stood at about \$14 a barrel. This year, contract prices ranged from \$24 to more than \$30 a barrel. During this time, spot market prices for this oil have moved from about \$14 a barrel to as much as \$45 a barrel.

And still the United States continues to help OPEC keep its leverage over world crude prices. It has been estimated that the windfall profits tax which Congress is now considering will reduce U.S. oil production by about 2 million barrels a day in the late 1980s.

THAT'S THE SAME size reduction in worldwide output that led to a doubling of oil prices this year.

During the 1970s, the United States fueled the growth of its economy with imported oil. The challenge of the 80s will be to replace those imports with increased production of U.S. energy from all sources: conservation, oil, natural gas, coal and nuclear power.

For the next ten years, the nation has two choices:

We can save more energy and also produce all the U.S. energy that can be obtained safely and economically from available sources.

Or we can continue to entrust our nation's health and well-being to foreign oil producers.

We can write our own history — or

we can leave the pen in their hands.

# Missouri Pacific Railroad nation's sixth ranked railway

Missouri Pacific Railroad, which provides rail transportation services for industries in the Midland-Odessa area, ranks sixth among railroads in

With its nearly 12,000 miles of track in twelve states in the midwest, MoPac ranks comfortably among the top ten railroads by any other standard of measurement: ton-miles, gross revenue, net income, or equip-

MoPac has gateways to and from the west at Pueblo, Kansas City, Sweetwater and El Paso, and to the east at St. Louis, Chicago, Memphis and New Orleans, providing a wide choice of routes for overhead east-

### Compressor service for oil industry

I-R Compression Services, a division of Ingersoll-Rand Co., maintains an office in Midland to service the oil industry with compression services.

The firm sells air and/or gas compressors, complete with their servicing. The same equipment is provided on a rental basis.

I-R Compression provides compressors on a rental basis to meet customer's needs. The compressors are furnished complete with personnel to operate and maintain them, as well as with all required repair parts.

The company operates worldwide, but is most active in the United States, Canada, Europe; North Africa and the Middle East.

The company has been in business since 1963. The parent company, Ingersoll-Rand Co., was founded in

I-R Compression Services has more than 200 employees.

The company has added new sizes and types of equipment to its compression services, including fuel-injected small horsepower units, trailer mounted units and others.

Robert L. Kuenz, product manager here for I-R Compression Services, says an alternative to compressor ownership, contract compression, is normally more feasible economic-

I-RCS district office are locted throughout the United States and Canada, including Fort Smith, Ark.; Denver, Colo.; New Orleans, La.; Cincinnati, Ohio; Chicago, Ill.; Pittsburgh, Pa.; Calgary, Canada; Midland and Houston. The firm also has facilities in Holland.

### Tommy White Supply opened here in 1968

Tommy White Supply Co., Inc., an oil field supply firm, is headquartered at 2000 Garden City Highway in Midland.

Tommy White is owner of the company which sells general oil field fittings and valves and well heads.

We have a complete stock of oil field supplies for hooking up oil wells, and we maintain a large inventory of new and used well heads," White

The company, which now employs 10 persons, was founded in September 1968.

White said his company is well stocked and that he anticipates a fantastic sales year in 1980.

Tommy White Supply Co. is a regular exhibitor at the Permian Basin Oil Show held every two years in Odes-

Handling substantial volumes of export-import traffic through 12 Gulf ports and through the Brownsville, Laredo and El Paso gateways to Mexico as well as through Chicago to Canada, it is an important link in foreign commerce as well as one of the nation's major domestic car-

To handle the demands for its transporation services, MoPac maintains a large inventory of diesel-electric locomotives and relies heavily on its electronic communications system to speed up the movements of freight cars to and from its customers.

On any given day, Missouri Pacific Railroad may be handling more than 96,000 freight cars on 756 trains throughout the system in the conduct

of its transporation services.

Through its sophisticated transportation control system, MoPac has been able to meet the challenging demands of modern industry. Missouri Pacific's management believes that it is essential for the railroad to maintain its plant, roadbed and rolling stock in good operat-

ing condition. For that reason, the railroad has invested heavily in recent years to acquire new fright cars and locomotives, improve its roadbed through the installation of heavier rail and new cross ties, and to modernize its

shops, yards, signals, communications and other facilities. Today, Missouri Pacific is regarded as one of the nation's best equipped, best maintained, and most technologically advanced railroad.

### Kent Oil has own gasoline stations

Kent Oil Co. of Midland, distributer of gasoline and retailer of gasoline, has its own full-service retail stations and self-service convenience centers.

The full-line convenience stores, open 24 hours a day, feature soft drinks, beer, wine, ice, hot sandwiches and coffee in addition to automotive products, oil, all grades of gasoline and diesel fuel.

The convenience stores also have on hand dairy products, pastry and breads, plus ice cream, chips, dips, nuts, candy and health and beauty aids.

The Kent facilities, located in Midland, Odessa, El Paso, Balmorhea and Colorado City, also feature lubrication centers for cars, trucks and recreation vehicles. Each offers major brand motor oils and filters, and each vehicle is given a multipoint safety check, including fluid levels, lights, battery and tire pressure. A floor board vacuum service also is offered.

At some Kent facilities there are automatic and self-service cash wash facilities, including fully automatic wash and dry

Kent Oil Co. was founded by E. L. "Buck" Kent. William Kent is the company president, and Arthur

Sparks is operations manager. Jerry Bardon is manager of the convenience store division, and Ric Valinis is in charge of merchandizing and advertising. Bo Bloemhard is the personnel

Kent Oil has its own two-plane aviation depart-

### TAOC explores for oil

Texas American Oil Corp., founded in Midland 25 years ago, boasts of 180 employees who draw an annual payroll exceeding \$2,800,000.

Located at 300 West Wall St., Suite 1012, the firm is a public corporation. It explores for oil and gas, develops and produces oil and natural gas onshore in the continental United States, refines and markets gasoline, distillates and residual oils, and engages in the wholesale brokerage of gasoline.

The states covered by Texas American operations include Texas, New Mexico, Michigan, Illinois, Oklahoma and states in the Rocky Mountain area. Texas American revenues have grown from \$5.5

million in 1974 to almost \$100 million in 1979. A \$25 million debenture offering, along with the sale of 825,000 shares of common stock, was successfully completed in 1979.

We salute the Oil Industries of the Permian Basin and enjoy serving you.

1937-1980

801 W. WALL

We look forward to serving you!

W. SCHARBAUER & N. "A" 682-8876

Charles Blue serves as judge of Crane County, wherein the economic mainstay is petroleum production and ranching. Crane, the county seat of some 5,500 people, is an independent, thriving community. "We don't owe a dime...," says former Mayor Don Chaney. "We're proud of that." (Staff Photo)

# Crane is more than 'little ol' oil patch'

CRANE - Crane is more than just "little ol' oil patch" town that was born in the throes of an oil boom which helped signal the start of the Petroleum Age in West Texas.

It's a proud, independent town that pays its debts, looks after its people, has good drinking water, a sound bank and plenty of jobs

"The city paid off its bonded indeb-tedness (in 1979)," said Don Chaney who served as mayor for 10 years. "We don't owe a dime. We're proud

of that .... All cities don't do that,' Chaney said of bailing out of debt. We also have the best water in Texas, according to the Texas Water Control Board," he said. The water

Chaney, a retired grocer, served on the Crane City Council for 19 years nine years as a councilman and 10 years as mayor — and left public service in the mid-1970s. Doug Damrod succeeded him as mayor.

"He's a young fellow, and he's a

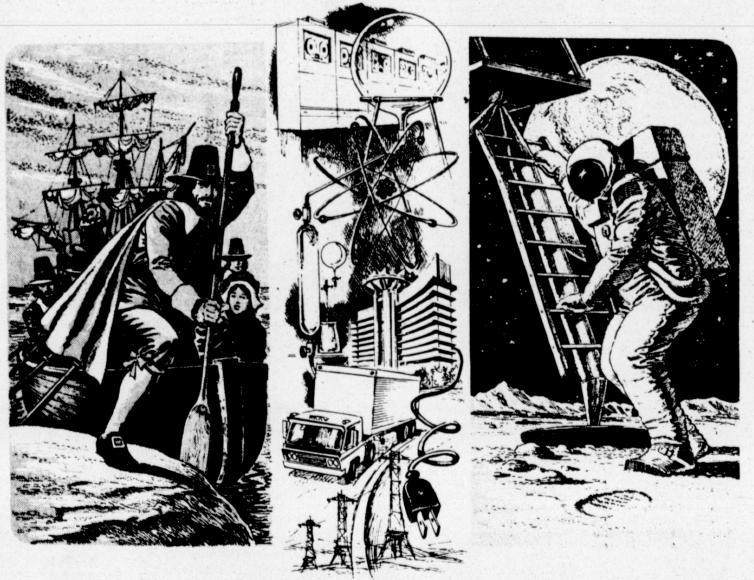

good one," Chaney said of Damrod. Crane, a city of 5,500 people, is the first and only town in Crane County, a rolling prairie land covering some 795-square miles. The town came into being in 1926 when oil production came to the fore. As oil boomed, so did

"People think Crane is a shack town, but if you go out and drive around, you'll find some beautiful homes," said Chaney.

Among the more salient changes which helped dissipate the shack town image in Crane in 1979 include: Continued work to make U.S.

Highway 385 four-lane the 32 miles from here to Odessa. All but about eight or nine miles are four-lane. Improvements on the runway of comes from wells reaching into the Crane County Airport. "Everybody's for it (airport improvements); no-body's against it." The main runway was re-surfaced, "making it safe for Sandhills in the northern part of the

large airplanes.' Peak in work availability. "There's no unemployment (in Crane). If anybody wants to work, all they've got to do W chirp."

# Lignite changes Dow's operation

The Texas Division of Dow Chemical U.S.A. which maintains an oil and gas division in Midland; is scratching around in the dirt of East Central Texas, marking a major change in the companies operations.

The dirt scratching was brought about by predicted future popularity of lignite

The following story is reprinted from The Dow Texan, explaining Dow's new role in the lignite picture. "History repeats itself. And the role of the historian is to see that the mistakes of the first go-round are not repeated during the second.

'Dow Texas Division is currently involved in a project in East Texas with historic impoications and the mistakes of history are being addressed first.

"At the beginning of this century, the minimal energy needs of Texas were filed through the burning of a form of coal found near the surface in a formation running from Texarkana southwest almost to the U.S.-Mexico border.

"That coal - lignite - lost its appeal as a fuel as Texas discovered that natural gas was cheaper and easier to transport and recover.

"It was a relief to both energy users and producers - the state outlawed the practice of using convict labor to mine lignite. Natural gas was so chap and plentiful that oil producers were burning it when it appeared as a marginally useful by-product emerging from their wells when they were hoping for oil.

'The lignite mines were abandoned and Texans forgot it. Coal, in fact, lost its appeal around the country for a number of reasons - hazards of mining it, the frustrations of transporting it and the environmental problems of burning it. But other regions not blessed with the oil and natural gas of Texas stuck with coal, disadvantages and all.

'Texas, of course, became the energy-producing capitol of the nation - refining, converting, using and selling its massive reserves of oil and

"As far back as 1967, however, The Dow Chemical Co. began to recognize signs of weakness in planning its entire energy future around the use of oil and gas. The result was the launching of Dow's now famous 'War on Btu's' - a concentrated effort by the company not only to conserve the energy it was using but to develop new alternative sources as well. The 'War on Btu's' was declared by then general manager of the Texas Division, Levi Leathers.

'The foresightedness of the 'War on Btu's' became depressingly apparent to Americans in 1973, when an an embargo of foreign oil supplies demonstrated the inadequacy of American energy policy.

"As a result of that effort begun in 1967, Dow today is repeating history, scratching around in the dirt of East Central Texas, seeking to recover and use not oil and gas, but lignite.

"As one of the largest producers, converters and users of energy in the country, Dow is engaged in a massive effort in and around Freestone County southeast of Dallas to recover lignite through surface mining.

"History has repeated itself - lignite is once again an economically feasible fuel.

"But having learned from history, the new era of lignite in Texas we are now seeing will not present the social and technolical problems associated with lignite in the past.

"Dow has no facilities to burn lignite or utilize it as a feedstock in its present form. Existing state and federal law requires very complicated and expensive pollution control devices to protect the area in which lignite is burned.

"The puzzle is solved, however, when economics and advanced technology enter the picture.

"Texas Division supplies a majority of its energy needs with oil, gas and its own waste products. The rest of the energy consumed is purchased from the electric utility servicing the upper Gulf Coast. For reasons which are becoming increasngly apparent, the cost of generating electricity is continually rising, both for Dow and for electric utilities.

"In addition, the demand for energy is increasing in the Freeport area, and in pite of the massive off-set that conservation has given the division, more fuel and new plants to produce electrical energy are considerations for the future.

"Also, both state and federal energy policies are requiring utilities and indusry to convert oil and gas boilers to "alternative fuels" to reduce U.S. dependence on foreign energy sources.

"Hence, rising costs and reliability of supply have combined to make lignite once again an economically advantageous fuel, not only for power production but also as a basic hydrocarbon which can be converted into feedstocks.

"As for advanced technology, new strides in surface mining and land reclamation have virtually eliminated the negative issues of mining and Dow is committed to leaving the land it is leasing to recover lignite in as good a condition as we found it. Sometimes, in fact, even better.

"Even the issue of transportation is being addressed. Should it become desirable to transport the lignite to the Freeport complex, a 'purification' process could be utilized which would make the cost benefit ratio of transporting it a positive factor in its use. In other words, a process of 'benification' would purify the lignite, leaving behind the usuable components and moving only the usable portion to Freeport.

"Dow's Lignite Department, managed by John Montgomery, is located in Fairfield - county seat of Freestone County. Although no mining has begun, the work being done there is impressive - locating potential mining locations, acquiring leases and coordinating the timing of future mining operations with the needs of

"The care with which Dow is approaching its future mining operations is among the most extensive environmental stewardship orograms to be found anywhere.

"Before a decision is made to acquire a site, a number of tests are done to satisfy Dow's environmental requirements.

### Beals heads Saxon Oil Co.

Saxon Oil Co. has been operating from its Midland headquarters at 1000 Wall Towers West the last 5 years.

The production and drilling company, which also is engaged in property management, is owned by Bill D. Saxon. Robert Beals, vice president, is in charge of the Midland office.

The company is active in West Texas, New Mexico, Oklahoma, Louisiana and in the Rocky Mountain region.

Saxon Oil Co., an 11-year-old firm, now has 43 employees assigned to Midland, and their pay roll is \$620,000 annually.

One of its civic activities is sponsorship of the American Junior Rodeo Association.

Beals said Saxon's public investment increased by 25 percent during 1979 due to the company's excellent completion-dry hole record.

Recent expansion by the company included the openeing of an office in Dallas. That facility includes the accounting office.

Saxon plans to increase its public offering for drilling funds this year.

Beals reports that Saxon's staff here included only 12 persons four years ago.

Bill Saxon and Beals believe that the Midland area is a great place to operate because of the excellent services and professional assistance available in Midland.

"When it is determined that a site has potential deposits, an archaelogist is brought in to determine whether there are significant historical locations or artificats and sites which would be disturbed. Then an inventory is made of existing wildlife, expecially endangered species. Dow monitors the water and airquality of the site to determine whether deterioration of existing standards might result.

'In addition to the great care taken of the natural surroundings, Dow carefully studies the socioeconomic impact of mining on the people who live in the area.

"After all of these concerns are satisified, a core sample is taken at the site, the sample is mixed to approximate the soil mixture which will exist after the land is restored following mining

"Lignite recovery involves removing the surface land above the lignite. deposit, removing the layer of lignite and then replacing the surface land. Hence, the mixed core sample will approximate the soil which will exist afterwards

The mixed soil sample is submitted to 'greenhouse testing' in which Dow's Environmental Section actually raises various types of plants to insure that the soil will be capable of supporting the same type of vegetation it supported prior to mining. Thus far, tests have shown that in some cases the mixed soil will support vegetation much more abundatly than before and, in fact, will survive drought periods better since water retion will be improved.

'When Dow finds that 'barriers' exist — sound reasons not to pursue mining such as cemeteries, historic sites or ecological sensitivity - the Lignite Department begins looking elsewhere for potential sites.

"Dan Trigg, senior environmental engineer for the Lignite Department at Fairfield, is proud of Dow's approach to lignite recory and land reclamation: 'The Dow philosophy is geared toward protecting the environment. There is no question in my mind that we can restore and improve the land here after mining. In fact, we'll benefit the land in the long

"Dow's long range plans for utilization of lignite in the future are a prime example of successful planning -Dow will have an assured energy supply, energy will be conserved, dependence on foreign energy sources will be reduced and the environment in which Dow opertes will be preserved and perhaps even en-

'And the historic Texas Nickname for oil - 'black gold' - will have to take on an expanded new meaning to include lignite.

# 1979 cotton crop omen for Lamesa

By ED TODD Staff Writer

LAMESA - Cotton - Dawson County's economic mainstay - in the 1979 harvest season produced a bumper crop, an omen to a prosperous year for Lamesa and the county in 1980.

The 1979 crop, expected to be Dawson County's second best, may net between 250,000 and 275,000 bales

off 300,000 acres of cotton land.
"We're very pleased..., excited,
with the possibilities of the 1980s," said Lloyd Cline, a banker, farmer and for 11 years mayor of this City of Agriculture of 12,000 persons. He has retired from the latter.

The yield would have been higher but for hail which heavily damaged thousands of acres in the northern and western parts of the county.

The county's recording-breaking crop year was 1973, when 323,094 bales were ginned by the county's 25 or so gins at Lamesa and at such communities as Ten Mile, Welch, Klondike, Punkin Center, Patricia, Sparenberg, Friendship and Ackerly.

UNBELIEVEABLE. of the '73 yfeld.

Runner-up year was 1977, when 246,900 bales were ginned.

But despite the short crop years, such as 1974 when 35,090 bales were produced and 1978, when 87,600 bales were turned out, the county has average more than 200,000 bales per year in the decade of the 1970s

Drought - lack of rainfall

The 1970s

the short crop yields. Yields in the 1970s were:

#### -1970: 169,300 bales. -1971: 116,800 bales

- -1972: 210,000 bales.
- -1973: 323,094 DIG, Inc.,

# specializes in drilling

Directional Investment Guidance, Inc., (DIG, Inc.) has been a Midland firm four years. The headquarters are at 3919 W. Wall St.

Owners of the firm are Glen Harbert, president; Joe Thompson, vice president; Jerry Holt, secretary-treasurer; Loyd Jones and Glen Jones and Cothrum.

The company specializes in directional drilling, providing rental and surveying services.

DIG serves West Texas, Oklahoma and the Rocky Mountain

Its 24 employees have an annual payroll of more than \$1 million.

The firm's employees participate in various civic activities, and the company is a member of the American Petroleum Institute, the Permian Basin Petroleum Asso-Contractors and the Engineers.

Harbert said DIG's rapid pace over the last Midland. two years, and in 1980 the company plans to start operations on the Texas Street and Louisiana Gulf coasts.

"Midland is a good place to raise a family." Thompson said.

- -1975: 145,000 -1976: 244,200
- -1977: 246,900 -1978: 87,600

Though cotton is the chief revenuegenerating commodity, the product is getting a little "competition" from increased oil activity, including oil

production and leases "We've had a good year for leasing and good prices," said Cline. "That helped out tremendously.

The year-end bank deposits reflect a wholesome economy

The two banks - Lamesa National and First National - totaled \$126.5 million in total deposits at the end of 1979. The tally represents better than a 20 percent increase over the \$99.4 million in deposits in 1978, which was a poor crop year,

Lamesa National Bank deposits totaled \$66.9 million, a \$15.1 million gain over 1978's end-of-year deposits. Deposits at the First National Bank was \$59.5 million, which is up \$12.2 million over that of 1978.

LAMESA'S ECONOMIC scene also took'a bow at the end of last year when building permits totaled \$3.2

A major share of that figure was due to Pioneer Square, Lamesa's first shopping center being constructed off the Lubbock Highway.

Other new features coming to Lamesa include the world's first all-mechanical cotton classing office, which will be located in Lamesa Industrial Park. The facility is to be operational for the 1980 harvest, noted Richard Gentry, 19791 president of the Lamesa Area Chamber of Commerce.

In addition, Prophecy Inc., a Dallas-based maker of quality women's

apparel, located its multi-million-dollar sewing plant here.

The Lamesa Cotton Oil Mill under went a major upgrading last year, and work was completed in time to process the 1979 cottonseed. 'They've got more seed to crush than they ever had in history," Gentry

Like banker-farmer Cline, Gentry was quite pleased with last year's cotton crop

"It (1979) was an above-average year - not a banner year by any means," commented Gentry. He's predicting that 250,000 to 275,000 bales from the 1979 harvest will be ginned.

be one of the better crop years. He viewed Lamesa's acquiring of

By ED TODD Staff Writer

Agriculture, particularly dirt farming, in Midland County is no small matter despite the imposing images of oil and ranching.

It's overshadowed, perhaps, but it's growing.

"This oil and cattle...(they) are romantic," said Hoot Leonard, a cotton farmer who manages the Midland Farmers Co-operative store and cotton gin. "But there's nothing romantic about cotton.'

Even so, farming is the mainstay of agriculture in Midland County.

Agriculture production in 1978 grossed \$12.5 million in Midland County, and "I'm hoping we'll beat that" in the 1979 season, said Charles W. Green, the Midland County agricultural extension agent.

Of the \$15 million projected agricultural income for 1979, about \$9 million is coming via the cotton patch and gin. Total agriculture income won't be ascertained until later in 1980.

"We ought to have a \$9 million cotton crop and \$2½ to \$3 million income from other crops — (alfalfa) 320 acres.

hay, pecans and a few things," including milk, eggs, dairy cattle, chickens, grapes, honey, wool, fish and forages, in addition to alfalfa.

"It's hard to say until it's over," Green said of the total agricultural In 1978, Midland County recorded

about 6,000 head of cows calving. And egg production reached 378,000

And more than 40,000 head of cattle were auctioned in 1979 at the Southwestern Livestock Auction Co. Milkyield was 8.7 million pounds, and wool production totaled 50,000 pounds.

Ranching revenue from the 50 big ranches in Midland County ought to be around \$4 million for 1979. In 1978, Midland County had about 6,000 cows calving. And, as Green pointed out, those ranchers operate out of Midland County, but their holdings carry over into adjoining and outlying counties and, in instances, into New

Green's agriculture revenue estimates are only for Midland County, which covers 928 square miles or 600.

minor in comparison with dry seasons "The ranches are spread over into in the 1950s.

- Farming, which is both business and toiling, demands good management for success. That was the case, too, in the 1979 season, when prices were good and production was up.

"Even so," said Green, "it's hard to make profits; the costs are up, too. When you look at the investment they (farmers) have in equipment, it's staggering.

In West Texas, the weather is as much, if not more, critical than the soil in crop production.

Green. "That's one gamble of farming; you cope with nature. She's ca-The bulk of Midland County is ran-

### Helon Y. Allison Bridge Center opened

The Tall City is getting taller, businesses are changing daily, and more places to go for entertainment are cropping up all

And the Permian Basin Duplicate Bridge Club is keeping up. The club, open to anyone with a desire to play bridge, provides an assortment of games each week at the brand-spanking new Helon Y. Allison Bridge Center just off Wadley Road near A

The new facility, built through the efforts of Midland's many bridge players and other persons who are interested in things that make Midland a better place to live, is immediately west of the City of Midland Swim Team's Mabee Memorial Swim Center and immediately north of the Girl's Scout House and the Junior League of Midland headquarters.

Regular games are played Tuesday, Wednesday and Sunday, leaving some time for special games on on the other days of the week. Private bridge groups are invited to rent the bridge hall for their regular or special games, Jack LaVigne, president of the Permian Basin Duplicate Bridge Club said.

The spacious bridge hall is large enough that more than one game can be played at the same time. The regular game schedule includes an open club (anyone

wanting to play) from 10 a.m. to approximately 1:30 p.m.

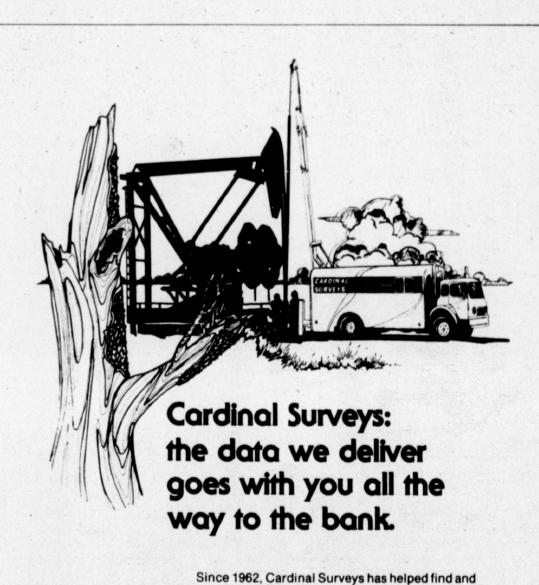

Tuesdays, with Mrs. V. V. McGrew the director; the PBDC weekly game, from 7:30 p.m. to approximately 11:30 p.m. Wednesdays, and a closed game (by invitation only) Thursday. Mrs. McGrew also directs the Wednesday game and the Thursday game. The Greater Permian Basin Unit 209 game is held each Suncay from 1:30 to approximately 4:30 p.m. It also is directed by Mrs. McGrew.

The Permian Basin Duplicate Club has started holding classes for persons who have completed the intermediate (or advanced) bridge course and Midland College and for persons who have had actual playing experience in rubber or duplicate bridge.

The classes are held from 7 to 9 p.m. each Monday for eight weeks. The current sessions will end March 3. Another eightweek series will start soon thereafter. These advanced classes are taught by two of Midland's lifemaster bridge players -Mrs. J. T. Dickerson and Mrs. Jack LaVigne.

Persons wanting to take the lessons should contact Mrs. Dickerson, Mrs. LaVigne or G. A. Buehler, PBDC secretary-trea-

The Permian Basin Duplicate Bridge Club sponsors an annual tournament, played the last two years in the Midland Hilton, that attracts many of the Southwest's outstanding players.

# Industrial Park now housing 27 firms, 33 buildings

By SUSAN TOTH Staff Writer

Midland Industrial Park is a 194-acre tract of land developed by the Industrial Foundation of Midland, Inc.

The manufacturing area, designed 10 years ago to bring new industry to Midland, has been an unprecedented success, now housing 27 firms with 33 buildings. And new businesses already are trying to locate near the

In fact, a major problem facing the Industrial Foundation now is the lack of space in the once-empty area. Officials are considering building another industrial park, but the problem is where to locate it.

The current facility is fully developed with underground utilities provided at each site. A rail spur through the tract, located west of Holiday Hill Road between U.S. Highway 80 and 1-20, served to attract firms needing a

Businesses at the park range from small, two-employee companies to large plants providing jobs for 300 or more.

Plans were announced in early 1979 for two major new industries to locate at the park. Michelin Inc. plans to build on a 232-acre site with the plant to face I-20. The rubber mixing plant should employ about 700 people, foundation officials noted.

PITTSBURGH PLATE GLASS will be on 420 acres next to Michelin. The fiberglass thread manufacturing plant will employ 350 to 400 persons when it begins operations, but plans call for expanding the 400,000-square-foot initial plant to 700,000 square feet.

French Tool & Supply Co. of Odessa announced late in 1979 it would locate a new manufacturing subsidiary in the park. The new business will produce oil field supplies and employ about 65 persons when it opens for business on its 22-acre tract. But plans call for future expansion up-

pingtotal employment to 125. Firms already in business at the park include Levi Strauss & Co., which employs some 300 workers in two buildings. The jeans manufacturer came to the park in 1969 and is located on two tracts of land, one 2.6 acres and the other 1.4 acres.

The main building is 38,000 square feet while the cutting plant, which was added in March 1972, is 22,000 square feet.

Applied Mechanics is a machine shop and sub-contractor for oil and mining tool repairs. Its 10 employees are housed in a 10,000-square-foot building located on 1.3 acres. Construction of a new 2,500-square-foot building on the south end of the property for marketing operations is expected to up employment to 30 by February or March.

SCHLUMBERGER EMPLOYS 24 people in the first building constructed in the park in September 1969. The 6,000-square-foot building houses the maintenance shop for Schlumberger's open hole logging division based in

B-J Hughes, Inc., a well servicing company, located in the park on a 1.4-acre center lot in January 1972. Employment is 15, and owners expect expansion since they purchased the adjoining south 1.4 acres in October

The West Texas headquarters for the Department of Public Safety also has been located in the park since February 1972. The office is on 4.1 acres of land, and 75 troopers are stationed there.

Sta-Rite Pump located a factory branch and warehouse for the company's water well pumps and related oil field equipment in the park in July 1976 on .9 acre of land. Five employees work in the 7,000-square-foot

The University Land System purchased a .9 acre site in October 1976 for a 2,580-square-foot warehouse and maintenance facility for their field

Three people work at the Chaparral Pipeline office on a .75 acre site purchased from the foundation in August 1970.

End Devices, Inc. manufactures oil production automation systems, primarily an on-off pump controller. Thirty-one people work in the 10,000square- foot building on 1.23 acres of land purchased in March 1973.

ENERGY SYSTEMS, INC. is a division of End Devices and is also involved with production of automations along with TV Services, a television repair operation. The firm located on half an acre in the park in

Teraco, Inc. makes plastic advertising specialty items and emery boards. They moved to Midland in 1970 from Minnesota and are now part of Magnatex Industries. Teraco occupies a total of 45,000 square feet on a 2.07-acre tract and

WPC, Inc. is a Midland-based holding company for several oil industry service and product suppliers. The company, which employs 44 people, moved to the park in March 1974 on a 5.08-acre site and has a 15,000-square-

The company also has a new service facility for all WPC companies to service logging trucks and make electronic repairs. It was located in the

park in September 1979 and employs 20 people Dyna Drill is a division of Smith International, Inc. and performs major repairs on downhole mud motors used in directional drilling.

The company employs six people. One of the newest tenants in the industrial park, American Coldset

Corp. makes diamond drilling and coring equipment and diamond drill

The company is building a 5,000-square-foot building on 1.28 acres purchased in September 1979 and plans to have six people working when the facility opens.

CORE LABORATORIES, INC. is a long-time Midland firm that purchased 5.2 acres in December 1978 for a major expansion program. The company conducts conventional and pressure core analysis as well as hydro carbon well logging services and general maintenance. The 25,000square-foot facility will house 70 employees initially and officials hope to be in the new building by March.

Woodman Distributing Co. previously was located in a warehouse in West Midland County, but is building an 18,000-square-foot facility on a 2.13 acre site acquired in August 1979. The beer distributor will employ 15

International Harvester located a composite technology research center in Midland in late 1977. Until September 1979, IH occupied 40,000 square feet of the former Tidwell Mobile Home Manufacturing Plant. The company recently signed a one-year lease on the entire 10-acre complex that includes some 62,000 square feet of office and plant space. IH employs 12 people.

Fabricated Industrial Systems, a division of Ortloff Corp., located in the park in February 1974 on a 2.72-acre site and employs 23 people. The company makes pipe and other materials for use in building refin-

UNITED PARCEL SERVICE located its Midland base for small-parcel shipping in the park in March 1974 on a 2.5-acre tract. The company employs 35 people.

Bancroft Paper Co. built its distributing center and warehouse for paper goods and related products at the park in November 1977 on 2.87 acres. Nine people work in the 15,000-square-foot building.

Knorr Furniture Co. in January 1975 purchased 2.75 acres for a furniture warehouse that was to be rail served. Ten people work in the 20,000square-foot building.

Nabla, Inc. purchased an acre from Knorr Furniture in September 1976 for office facilities. The company employs five people and performs pumping well analysis in their 6,200-square-foot building.

Centerlift, Inc. is a subsidiary of Borg-Warner, Corp. and is involved in the manufacture of submersible pumps used in the oil and gas industry. The Centerlift site includes a 15,000-square-foot building on a total of five acres. A 3,000-square-foot office addition is anticipated within the next year, and 61 people are employed there now.

The old Glasscock County jailhouse, at right, doesn't rock and is about as sound as a stone mountain. The vacant jail, which predates the

1909-built courthouse in the background, will be preserved. But it will be joined by a \$610,000 brick viail at Garden City in 1980. (Staff Photo)

#### By ED TODD Staff Writer

GARDEN CITY - The folks who ranch, farm and pump oil in Glasscock County like to hold onto tradition and substantial things from the

That's just one reason why the voters in this county of 1,500 or so people decided to keep their 1909-built stone courthouse instead of razing it like Martin and Baylor County did some years back. They simply lowered the ceilings; air conditioned the courtroom, chambers and offices: did some refurnishing and repairs; and the old courthouse remains as solid as ever.

Keeping in line with that conservation-slant toward their courthouse, Glasscock residents also voted in a \$610,000 bond issue last year for a new iail house

The old stone jailhouse, a veritable landmark which pre-dates the courthouse, is a relic which hasn't been used for years but is being preserved for history's sake.

"We're going to leave it (the jail) as a landmark," noted Mary Lou Overton, district-county clerk

The new jail will be made of brick to match the hue of the courthouse and old jail. Cost of building the jail out of stone similar to the older edifices would be prohibitive. Stone for the old courthouse and jail was quarried in the county.

"It's going to be the Glasscock County hotel," quipped Ms. Overton about the new jail. Currently, Sheriff Royce Pruit is

lent space in the Howard County Jail at Big Spring and the Martin County Jail in Stanton to room and board prisoners The old jail, though virtually break-

out proof, is too small and lacks certain conveniences to conform with state jail standards.

Garden City, county seat of this 863-square mile country, is unincorporated and has "one thing of everything," except churches, of which there are three (Methodist, Baptist and Church of Christ), and cafes (there are two).

"We're coming up in this world," quipped Ms. Overton, who commutes to work from Drumright, a community and one-time "almost" oil field boom town about 15 miles north of

Garden City also has a school, grocery store, filling station, garage, one sheriff, one deputy and several vacant buildings. The people in town, like those in the rural areas, get their water from water wells.

The Glasscock County judge is D.W. Parker, and the state district court judge is Jim Gregg of Big Spring.

Glasscock County holds to tradition

Garden City arose out of a land company, which set up offices here in the late 1800s to promote settlement of the county. A post office was established here.

The site was abandoned for a higher location 21/2 miles away. It retained the Garden City name, although the site had been named New California.

which is about 15 miles southwest of here. St. Lawrence, a German Catholic settlement, was established in the late 1940s.

# Estoril working for new discoveries of oil, gas

As demands increase for oil and gas and the knowledge that continued discoveries must be made to keep up with America's needs, one company, Estoril Producing Corp., with offices in Midland and Abilene, is working towards the discovery, or futher development, of oil and gas fields. Estoril has both exploratory and de-

velopmental fields in Texas, New Mexico, Oklahoma and Kansas, and is continually seeking new areas for oil and gas exploration

The history of Estoril began in 1894 when the first well west of the Mississippi to produce in commercial quantities was drilled in Navarro County,

A young boy of 14 was working for a water well contractor when they unexpectedly struck oil. Because water, not oil, was the contractor's aim. many of the townspeople were angry at this discovery. The young boy, Fred M. Allison Sr., showed foresight and began his own oil and gas exploration enterprise with other

From this early beginning, the foundation of Estoril was formed.

Allison and three other men were instrumental in building the first rotary rig, many of which are still in operation today.

As the years passed, Fred M. Allison Jr. followed in his father's footsteps in the oil and gas industry, and after serving in the armed forces during World War II, he returned to Texas and the oil business.

He began oil and gas operations under the name Fred M. Allison Oil Co. He drilled his first well in the Yellow House field of Hockley County and had the good fortune to drill 14

wells in that area without a single dry

farming community, St. Lawrence,

waned, and the bank closed in 1922.

He, too, had many oil firsts to his credit. He developed the idea for a pressure maintenance program in the great Wasson field in Yoakum County, and in 1963, became the first person to reinject casinghead gas into the field's producing formation.

In 1964, he drilled the deepest producing well in Ector County at a depth of 14,700 feet. He also completed the first successful water flood program in Coleman County.

Continuing his search for new techniques to use in the oil and gas inudstry, he traveled extensively throughout the world, and it was on one such trip to Europe in 1970 that the idea of Estoril Producing Corp. was born.

Several German businessmen approached Allison with the idea of investing in American oil and gas exploration, and to meet the needs of these businessmen, Estoril was formed as a joint venture basis.

In 1975, Fred M. Allison Jr. retired from the oil business, and his son, Fred M. "Freddy" Allison III, a graduate of Texas Tech University with a degree in Business Administration, assumed the leadership of the corporation.

One of the latest joint venture projects of Estoril is the Garden City (Fusselman) field in Glasscock County. To date, 19 wells have been completed in connection with this opera-

# Mayor Marcus Price says '79 prosperous, good year for Rankin

By ED TODD Staff Writer

RANKIN - Marcus Price looks back through time at Rankin and sees 1979 as a very good year.

"I think all in all we had a pretty prosperous year," said Price, mayor pro tem for this town of about 1,100. "Oil activity was good; oil service

Petroleum, ranching and farming fuels the city's and county's econ-

omy.
"That oil is just about what keeps this county going as far as the schools are concerned," said Price. "That's what keeps Rankin and McCamey going. Cattle and sheep are the primary products of ranching. Cotton, pecans and some grains are the main agricultural products. Rankin is the county seat of Upton County.

RANKIN, LIKE neighboring Big Lake in Reagan County, got its beginning in 1911. That year, A.E. Stillwell's Orient Land Co. bought land from F.E. Rankin to create a townsite for continuing the westward movement of his Kansas City, Mexico and Orient Railroad lines. The line began at Kansas City, Mo., and was destined for Topolobampoa, Mexico.

Perhaps it was the railroad, more than anything else, which gave rise to the decline of Rankin's chief competitor: Upland, the county seat just 10

Upland was founded in ranching country, but was beset by drought, poor soil, blizzard, the "wayward" railroad and denizens of Rankin.

"THE TOWN OF UPLAND had not developed as its promoters had hoped," wrote historian N. Ethie Eagleton. "The poor soil, the excessive summer heat, the recurring drouths and the inability of the residents to obtain water for irrigation caused them to drift elsewhere.

"The final blow came when the Orient Railway Co., instead of running its line up the Centralia Draw, ran it up Spring Creek Draw. Those who remained in Upland found employment by building the railroad. By 1914, every family except the postmaster's had moved out of Upland," the Upton County historian wrote.

Rankin, though never a boom town, has maintained a wholesome economy, particularly since petroleum was first wildcatted here in the 1920s.

Looking after the city's affairs are Mayor J.B. Pettit, Mayor Pro Tem Marcus Price and Councilmen Phillip West, Ruben "Cat" Peterson, Jack Garner and W.R. Stafford. Pat Wrinkles is city secretary.

AMONG COMMUNITY facilities in Rankin are the volunteer fire department, Rankin Museum, Rankin-County Hospital District, Parks Building and cable television service.

Among community concerns is the search for more potable water for Rankin and its neighboring city, McCamey, 18 miles to the west. The Texas Legislature two years ago created the Upton County Water District, a taxing entity which has power of eminent domain with condemnation powers to serve the public good.

But a vocal group, represented in the Upton County Landowners Assocation headed by Linda Dusek of Midkiff, has filed suit against the water district. The landowners contend they would not benefit from the district and fear that their underwater rights might be taken over by

The water district, however, says it has options on getting potable water south of the two cities and outside the county.

THE SEARCH for good water is causing a rift between the two factions — city people who need the water and country folks who say there must be a better way.

But there doesn't seem to be any real contention over the need for public school improvements here.

Last year, voters by a 3-to-1 margin passed a \$3.5 million bond issue to upgrade public education facilities, noted A.C. Copeland, superintendent

Improvements under way this year include: Construction of and equipping a junior high school to accommodate
 students in 14 classrooms and a library. Cost: \$1.9 million.

Improve lighting and carpet for classrooms in elementary school

building. Cost: \$34,000. Addition to industrial art department, carpet for high school class-

rooms, hall lighting and air conditioning the auditorium. Cost: \$170,000. - Construction of a new high-school gymnasium. Cost: \$1.016 million.

- Renovate band hall. Cost: \$20,000.

- Furnishing classroom equipment for junior high school. Cost: \$85,000. Demolition of old junior high school building, paving for car parking and marching-band practice area over a 150-by-300-foot area. Cost: \$39,-

Architects for the new building is Huckabee & Donham of Andrews. J.W. Cooper Construction Co. of Midland is the general contractor. Construction should be completed in early 1981. Enrollment here is 450.
"We have an excellent school," Copeland said, "and we want to fur-

nish our kids with anything we can to enhance the learning experience." The First State Bank was relocated across the way, and a new post

office is under-construction.

# He makes more money than half the people on earth.

This is an independent businessman.

He makes his own deliveries. Does his own selling. Keeps his own books. To us, he's just a paperboy.

But 50% of the people in a system that's on earth make lower incomes than he does.

That's right.

With a part-time job, he earns more money than half the people on earth.

# Marathon building has energy-saving devices

By DAVID CAMPBELL Staff Writer

One of the newer buildings gracing the Tall City's skyline cannot be seen from afar. But once downtown, one can see the new energy-saving building for the Marathon Oil Company at 125 W. Missouri Ave.

The four-story building is one of the few buildings which incorporates new energy-saving devices, according to Jack Stevens, senior project engineer for Marathon. Inside building temperatures are controlled by a sophisticated system called an economiser cooler which uses outside air to cool the building when inside tempera-

tures have reached a certain level,

Stevens said.
Insulated glass paneling and blinds control the amount of sunlight enter-

offices in the new building will utilize a new lighting concept called "task" lighting. Certain work areas such as desks or drafting tables in each office would receive maximium lighting. Other areas not utilized, such as office corners, would get

very little light, he explained.

The top three stories of the Marathon building house the Midland District of Marathon's Houston Division. The first story is being leased to other businesses, Stevens said.

# Salvation Army has moved to new quarters

The Salvation Army has recently constructed a new building at 3500 Park Lane to house its family development programs.

Opening ceromonies were held Oct.

1, 1979, which also initiated the Salvation Army's family development programs, according to Mrs. Gloria Vincent, cental in The Salvation Army

cent, captain in The Salvation Army.
Family development programs include educational projects such as

how to be a better parent, planning the family budget, home repairs and recreational programs for the entire

family, she said.

The old building at 300 S. Baird St. will continue to house administrative offices, emergency housing and the

Thrift Store, Mrs. Vincent added.

Most services provided by the Salvation are offered to the general public free of charge or at an extremely.

The West Texas sun silhouettes a rig drilling a deep exploratory well near Midland in the heart of the oil rich Permian Basin.

### Carter Industries growing

J.E. Carter Industries, Inc., is involved in the oil, gas and real estate development business.

The agressive firm reports that the growth of its companies has been "very excellent."

"Our companies have had a cash flow growth of 600 percent per year, and an asset growth of 1,000 percent per year during our three-year history," Carter said.

Jeffrey E. Carter is the founder and majority stock holder in all of the Carter Industries companies. He is acting president in most of the firms.

Brian Carter is vice president of Carter Homes in West Texas and Wichita Falls. He is starting a 100=- home package in the West Texas area.

Lewis Way is in charger of J. E. Carter Construction, the commercial constrition division of J. E. Carter Industries.

"He has tremendous experience in commercial construction, having handled all sizes of jobs in the commercial field," J. E. Carter said.

Tina Zande is executive secretary and office manager of J. E. Carter Industries.

The latest addition to the company's staff is Paul Thomas. He is regional manager in Wichita Falls for Carter Homes.

Carter Homes.
J. E. Carter Industries currently is involved in four areas — West Texas, Austin, Wichita Falls and Dallas.

### The Permian Corp. purchases oil

The Permian Corp., a major purchaser of Permian Basin crude oil, also is active in other areas of Texas, Louisiana, New Mexico and the Rocky Mountain area.

Rocky Mountain area.

In business more than 20 years, the firm employs 600 persons in the West Texas area. Its employees are active

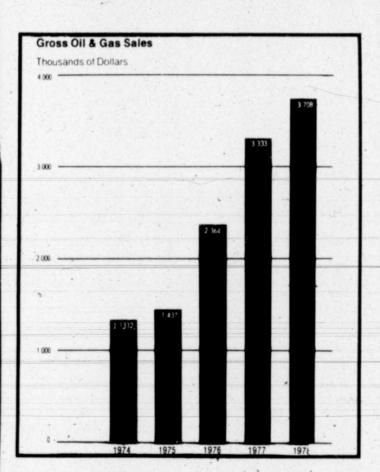

in almost all civic clubs and charita-

ble organizations.

The Permian Corp. purchases and sells crude oil, with purchases made at the lease. Sales are made from various storage points. The company also markets well completion fluids and trucks disposal water.
