U.S. will withdraw mission from Kiev

MOSCOW (AP) - The U.S. Consular mission in Kiev, the capital of the Soviet Ukraine, will be withdrawn and the Soviets have been asked to remove their consular employees from New York to protest the Soviet intervention in Afghanistan, a Western diplomatic source said today.

Embassy officials confirmed that construction work on the Kiev facility had stopped and that the Soviets would be expected to leave New York within "a month or two."

The seven-member Kiev staff, and dependents, will be reassigned within the next "couple of months," the Western diplomatic source said.

The source said the withdrawal of diplomats from Kiev probably would be announced in Washington and not in Moscow.

President Carter, in a speech on Friday denouncing Soviet intervention in Afghanistan said his administration would delay opening of apy new American or Soviet consular facilities. The Kiev and New York facilities apparently fall under that category.

The Kiev group was described as an advance party that

has been working for two years to prepare for possible creation of a full-fledged consulate general's office.

The Kiev*mission does not grant visas for Soviet citizens as it would have when the consulate general's office would have been in full operation.

The Soviet mission in New York, not to be confused with the Soviet delegation to the United Nations, also is listed as an advance party, preparing for the opening of a Soviet consulate general's office. It has been operating in New York for several years, but does not have visa granting authority

The source said no decision has been made about recalling U.S. Embassy employees from Moscow, but said the State Department had recently "inventoried" the number of workers there.

The State Department says there are 158 U.S. diplomatic officials here. There also are 30 non-diplomatic employees and nine school and medical personnel, making a total of 197

The Soviet Embassy in Washington has a total of 333 workers, 170 of them diplomats.

Russian soldiers direct tank traffic outside Kabul as fighting continues between Soviet troops and Afghani rebels. The United States plans to make

some cuts in its dimplomatic staff in Russia as a result of the Soviet incursion. (AP Laserphoto)

Refinery workers say they're ready for long strike

DENVER (AP) - Spokesmen for 60,000 refinery workers say they are ready for a long, "hard-fought" strike because they cannot reach an agreement in a wage and benefits dispute with the 100 oil companies they call "the richest and most powerful industry in the world."

But oil companies across the nation say supervisors can keep the highly automated refineries going indefinitely, with no noticeable impact on U.S. fuel supplies.

The strike, set to begin at the

end of today's day shifts, was the first nationwide walkout called by the Oil, Chemical and Atomic Workers Union since 1969

OCAW president Robert Goss said Monday his 411 locals were settling in for a "hard-fought confrontation" that could last for months. The 1969 strike lasted up to three months for some companies.

Meanwhile, in Washington, Labor Secretary Ray Marshall said the federal government was watching the talks closely

and the Federal Mediation and Conciliation Service "will be available to help the parties if they need it."

Neither side had asked for mediation Monday, the last day to reach agreement under a wage-benefits reopener clause contained in the current contract.

The union, whose members currently receive an average \$9.55 per hour, last week rejected a 9 percent offer from Gulf Oil Corp. - traditionally the industry's pace-setter.

Waldheim, Laingen met

Secret meeting arranged by Iranians

NEW YORK (AP) - Secretary-General Kurt Waldheim met secretly last week with L. Bruce Laingen, the top American diplomat in Iran, during the U.N. chief's mediation mission in Tehran, ABC-TV reported today.

U.S. Charge d'Affaires Laingen and two embassy aides - political officer Victor Tomseh and security chief Michael Holland - have been in protective custody at the Iranian Foreign Ministry since Moslem militants seized the U.S. Embassy and dozens

liaison between the U.S. government and Iranian officials throughout the crisis.

In Tehran, Ayatollah Ruhollah Khomeini decided to go into seclusion at the end of the week, closing his doors to all visitors for 15 days amid mounting communal violence. He asked that demonstrations be cancelled Wednesday in Qom, and revolutionary guardsmen there were stopping and searching suspicious cars.

The office of the 79-year-old leader

of the Iranian revolution said he was very tired and beginning Saturday would rest at his home in Qom, the Shiite Moslem holy city 100 miles south of Tehran.

The announcement came after a day of demonstrations and bloody clashes between religious and ethnic factions in nearly half a dozen cities. There were demonstrations by tens of thousands of Turkish-speaking Azerbaijanis in Tabriz,

By LANA CUNNINGHAM Staff Writer

A planned strike by members of the Oil, Chemical and Atomic Workers International should have little effect on the Permian Basin.

Members of the OCAW Local 4-586 based in Goldsmith have been notified to go on strike at 8 a.m. Wednesday if a settlement isn't reached by then, said Bill Cowen, secretary-treasurer of the local group.

He explained there are 118 members in the Atlantic Richfield Co. group, and their striking wouldn't have "too much of an effect" upon ARCO's operations.

AMOCO has members of OCAW who are planning to

strike also, according to Cowen.

Strike should have little effect here

OCAW members are asking for a "substantial wage increase to cover the cost of living," full medical premium paid, full coverage on dental and medical care and improvements in some of the vacation times, according to Cowen.

The last offer Cowen knew about came from Gulf Oil and was for a 9 percent cost of living increase and \$10 more paid on medical premiums.

"We need something to bargain with," he said of the offer. Acceptance of an offer will depend upon the medical coverage included, he added.

The last major strike of OCAW workers was in 1969, although there have been smaller strikes since then. If the strike

occurs and lingers, Cowen said it makes it hard for the workers.

To ease the situation, they find other jobs, he said, until the strike is resolved. When there was first talk

about a strike the deadline had been today, he said. But it was delayed until Wednesday, giving mediators more time to negotiate, Cowen said.

"I hope they can come to an agreement" before having to strike, he added

The ARCO group to which Cowen belongs stretches west into eastern New Mexico and includes South Permian and North Permian districts.

Cosden Oil and Chemical Co. in Big Spring won't be affected by the strike, a spokesman reported, since there are no OCAW members employed.

of American hostages Nov. 4. The three were not in the embassy at the time of the takeover.

ABC reporter John Scali, who cited unnamed sources in Washington for the information, said the meeting between Waldheim and Laingen was arranged by Iranian Foreign Minister Sadegh Ghotbzadeh to demonstrate that Laingen was being treated properly.

Ghotbzadeh kept the meeting secret from the embassy militants, who have demanded that the Foreign Ministry hand Laingen over to them for questioning, ABC said.

The report said Waldheim found the 57-year-old Laingen and his two colleagues to be in good physical condition but increasingly concerned about the eventual fate of the embassy hostages.

The secretary-general's 3½-day mission to Iran ended with no signs of major concrete progress toward resolution of the crisis.

Laingen, in touch with Washington by telephone, has been an important

Spike Dykes new Lee grid coach

By TERRY WILLIAMSON **Sports Writer**

Gil Bartosh, athletic director of the Midland Independent School District, has raided the college coaching ranks for the second time in less than a week - this time to fill the head football coaching vacancy at Midland Lee.

Spike Dykes, 41, accepted the Lee assignment late Monday after a brief stay in Midland, according to Bartosh. Dykes comes to Midland from Starkville, Miss., where he has been an assistant football coach at Mississippi State University under Emory Bellard, former San Angelo and Texas A&M University head coach.

Bartosh filled the Midland High vacancy Saturday by naming former Northern Illinois University head coach and 1962 University of Texas All-America selection Pat Culpepper as the head man of the Bulldogs.

Dykes, who is no stranger to District 5-4A football warfare after coaching stints at both San Angelo and Big Spring, will officially become the head coach after today's formal meeting of the Midland school board. Dykes told Bartosh that he would be ready to assume his duties at Lee Jan. 15. Culpepper is expected to arrive in Midland within the next 10 to 12 days.

"Spike is an outstanding football coach with a great coaching record," Bartosh noted Monday night. "He is a great on-field general and possesses a great deal of football knowledge. He is also a great coach of fundamentals and he is a disciplinarian. I think the kids will like him. And I believe that both local schools have fine coaches that they can be proud of and that was our major objective when we started looking.

"Dykes comes to the district highly

recommended," said Dr. James Mailey, superintendent of the MISD. "We are indeed fortunate in securing a man of Dykes' experience in both coaching and administration."

Dykes will be given a three-year contract at around \$30,000 a year, the same as Culpepper.

In effect, Bartosh has replaced himself with the appointment of Dykes to the Lee position. Bartosh was the head coach at Lee for the past two years before being elevated to the athletic director's job in December.

Dykes has racked up an impressive 58-28 high school head coaching record at four Texas schools - Coahoma. Belton, Big Spring and Alice. He was also athletic direct - at each of the schools.

Dykes also brings with him a great deal of college coaching experience after serving as an assistant at Texas. University of New Mexico and last year at Mississippi State. He also has been an assistant coach in the high school ranks at Eastland, Ballinger and San Angelo.

Dykes graduated from high school in Ballinger in 1955 where he was a three sport letterman in football, basketball and track. He earned his bachelor's degree in social studies at Stepehen F. Austin State University in 1959 where he also played football.

Dykes entered the coaching ranks 1959 as an assistant football coach at Eastland and then moved to Ballinger in 1960 as an assistant under Bob Wright, who is presently an administrative assistant at Texas A&M.

In 1962, Dykes became an assistant for the first time under Bellard at San Angelo, and it was there that he got

Congress eyeing grain program

WASHINGTON (AP) — The Carter administration's \$2.25 billion program to buy up American grain once destined for the Soviet Union will be closely scrutinized by Congress, perhaps before the program gets off the ground.

Some industry experts say the program is the best available option at this point, but express concern about the long-term impact vastly increased government reserves will have on the grain market.

The House Agriculture Committee will open hearings on the program Jan. 29, said Rep. Thomas S. Foley, D-Wash., the committee chairman.

He said his panel will conduct a "full, detailed review" of the program, announced Monday by Vice President Walter F. Mondale to help protect farmers from the severe declines in market prices that could come with having so much grain go unsold.

Even with the purchase program and other steps, "my guess is that there will still be a loss of \$300 million to persons engaged in the business all the way from the export facilities back to the (farm) country," Agriculture Secretary Bob Bergland said today.

President Carter announced Friday that he was suspending the sale of about 14 million metric tons of grain the Soviet Union had contracted to buy. The move is part of the administration's retaliation against the Russians for their military intervention in Afghanistan.

Bergland, interviewed on NBC-TV's "Today" show, acknowledged that Carter's action could harm the president's renomination chances in Iowa, a major grain-producing state. "It makes matters more complicated." he said. "But we're going to appeal to the basic decency of the Iowa voter, and I think they're going to see that what the president has done is in the national interest."

massive purchase program was ordered by the president to help protect farmers from price drops if the grains were suddenly dumped on the market.

Mondale told a news conference the

That represents the difference between the roughly 21.6 million metric tons the Soviet Union has contracted to buy and 8 million metric tons officials say will be allowed to go to Russia under a long-term agreement. A metric ton equals about 2,205 pounds.

The purchase program, Mondale said, "is not without cost to ourselves.

"American farmers are just as willing as other Americans to carry their share of the burden - but they must not be forced to carry an extra share just because they are farmers.

Morton I. Sosland, editor and pub-lisher of the trade journal "Milling & Baking News" in Kansas City, said the government's action was "the best dawn Band-aid they could have."

'Mondale said the government's

Agriculture Department will buy about 10 million metric tons of corn and 3.7 million metric tons of wheat plus lesser amounts of other grains from 22 exporting companies in-

volved in sales to the Soviets.

DEATHS Gertrude Ranne

Gertrude Ranne, 81, 106 W. New York St., died Sunday in a Midland hospital following an illness.

Services were to be at 2 p.m. today in the Calvary Baptist Church with the Rev. Glenn Shoemake, pastor, and the Rev.' Bob Manning of Westbrook officiating. Burial was to be in Resthaven Memorial Park directed by Newnie W. Ellis Funeral Home.

Mrs. Ranne was born July 23, 1898, in Madison County. She spent her early life in Bell County. She was married to G.C. Ranne in Georgetown in 1919. They lived in Killeen and later moved to Wichita Falls. They moved to Midland from Wichita Falls in 1927 Her husband preceded her in death in 1974. She was a member of the Baptist Church

Survivors include a son, Charles Ranne of Westbrook: a daughter. Mrs. Leeman Jones of Midland; a brother, Rubin Fain of Gatesville; six grandchildren, and nine great-grand-

RANKIN - Services for Grace T. Bain, 68, of Rankin will be at 2: 30 p.m. Wednesday in Rankin Church of Christ with Owen Crogrose, minister, officiating.

Grace T. Bain

Burial will be in Rankin Cemetery directed by Dennis-Gregg Funcral Home of McCamey

She died Monday in a Rankin hospital following a lengthy illness.

Mrs. Bain was born Aug. 23, 1911, in Arkansas. She was married to Hiram Bain Feb. 18, 1939, in Stillwater, Okla. She had lived in Rankin 28 years and was a member of the Church of Christ.

Survivors include her husband; a son, Todd Bain of Odessa; four sisters, Fredda McElory of Oscola, Mich., Juanita Barnado of Natchez, Miss., Florene Clauson of Russellville, Ark., and Jackie Hallsworth of San Leandro, Calif.; two brothers, L.H. Todd of California and Freed E. Todd of Oplin, Ark .; and three grand-

children.

ness.

ROTAN - Graveside services for Henry Ogden Van Liew, 84, of Rotan, father of Norman Van Liew of Midland, were to be at 10 a.m. today at Sylvester Cemetery in Sylvester directed by Weathersbee Funeral Home of Rotan.

H.O. Van Liew

He died Sunday in a Rotan nursing home following a lengthy illness.

Van Liew was born Oct. 29, 1895, in Coryell County. He was married to Edna Rogers in January 1915, in O'Brian. They moved to Sylvester in 1922. She died in 1945. A retired farmer, he moved to Rotan in 1972.

Other survivors include a son, two daughters, a brother and eight grandchildren

A daughter, Delora Gordon, died April 2, 1975.

Clois W. Ashley

PLAINVIEW - Services for Clois W. Ashley, 65, of Plainview, brother of Leonard Ashley of Hobbs, N.M., will be at 2 p.m. Wednesday in Parkview Baptist Church here with Stanley Nixon, pastor, officiating, Burial will be in Plainview Cemetery directed by Lemons Funeral Home

Ashley died Monday following a lengthy illness

The retired farmer had lived in Ralls, Crosbyton and Happy Union. He moved to Plainview in 1961. He was a member of the Parkview Baptist Church.

Other survivors include his wife, a daughter, a son, a brother and his mother.

his first taste of District 5-4A football

In 1964, Dykes got his first head coaching job at Coahoma and then became head coach at Belton in 1966.

Dykes then returned to the 5-4A scene in 1967 when he became the head man at Big Spring. Dykes never had a losing season at Big Spring, and

1980 re-election bid announced

WASHINGTON (AP) - Rep. Sam Hall, D-Texas, has issued a formal announcement of his candidacy for re-election in 1980

The congressman from Marshall said he would base his run for a third complete term in the House on his support for taxpayer relief, strong national defense and energy self sufficiency.

In a statement released Monday by his Washington office, Hall said he based his philosophy on "balancing the federal budget, getting government off the back of the American people and providing a national defense second to none.

Service Award.

of Commerce.

leaders.

that hasn't happened since he left. In fact, Big Spring is currently on a 36-game losing streak in District 5-4A. Dykes had two 6-4 records while coaching the Steers.

From Big Spring, Dykes moved to Alice as head coach in 1970 before beginning a seven-year run as an assistant coach in the college ranks.

He joined Darrell Royal at Texas in 1972 as an assistant coach. During his five-year stint at Texas, Dykes helped develop such stars as Heisman Trophy winner Earl Campbell, Outland Trophy recipient Brad Shearer and All-America kicker Russell Erxleben.

In 1977, Dykes moved to the University of New Mexico as an assistant coach and worked with Bartosh, who was also there at the time as an assistant. While at New Mexico, he worked with former Midland Lee quarterback Brad Wright and recruited in the West Texas area.

Dykes then rejoined Bellard for the second time in his career in 1979 at Mississippi State

It has been less than a month since Bartosh was given the go-ahead to recruit head football coaches at both Lee and Midland High. The two vacancies opened on Dec. 11 when the Midland school board elevated Bartosh to athletic director and decided not to renew the contract of Dennie Hays, who was head football coach at Midland High for the past two years.

children

Rosa Belle James Ophia A. Wyatt Ophia A. Wyatt, 84, 1605 N. Midkiff,

No. 128, died early Sunday in a Midland hospital following a lengthy illness

Graveside services were to be at 3 p.m. today in Resthaven Memorial Park with the Rev. James Holman, pastor of St. Paul's United Methodist Church officiating. Services were to be directed by Newnie W. Eliis Funeral Home

Mrs. Wyatt was born July 5, 1895, in Culman, Ala. She was reared in Sipe Spring. She was married to Otto W. Wyatt in Sipe Spring July 6, 1916. They moved to Dublin in 1956 and resided there until 1973 when they moved to Midland. Her husband preceded her in death Jan. 26, 1974. She was a member of the Dublin Garden Club and First Methodist Church in Dublin

Survivors include a son, Donald R. Wyatt of Gunnison, Colo.; a daughter, Mrs. James A Brown Jr. of Midland; a brother, Henry B. Allgood of Dublin; seven grandchildren, and six great-grandchildren.

'Buster' Hapgood

WICHITA FALLS - Services for Lauren "Buster" Hapgood, 76, of Wichita Falls, father of Ann Howard of Midland, were Monday in Hampton-Vaughan Funeral Home chapel with the Rev. James A. Rogers, rector of Trinity Episcopal Church, and the Rev. Neal Hess, rector of St. John the Divine Episcopal Church in Burkburnett, officiating.

Masonic graveside rites were in **Crestview Memorial Park.**

He died Saturday in a Wichita Falls hospital.

Hapgood was born Aug. 30, 1903, in Summit, S.D. He was a resident of Wichita Falls for four years. He was a retired rancher in Henrietta, a member of Trinity Episcopal Church and Hella Temple Shrine in Dallas, a 33rd degree Mason and past president of Clay County Pioneer Association: Other survivors include his wife, a daughter, four grandchildren and

Frances Cupps

seven great-grandchildren.

SAN ANGELO - Frances Marie Cupps, 61, of San Angelo, sister of Jane Williams of Andrews, died Sunday at her residence.

Services will be at 2 p.m. Wednesday in the Day-Loveless Chapel here with burial in Eden Cemetery.

Mrs. Cupps was born July 24, 1918, in San Saba County and was married to Elmer Sol Cupps in Eden. She was a housewife and Baptist. She moved to San Angelo in 1971 after living in Concho County.

Other survivors include two sons, her mother, three brothers, a sister and three grandchildren.

SEAGRAVES - Services for Rosa Belle James, 73, of Seagraves, mother of Billy James of Midland, are pending with Connally Funeral Home

Mrs. James died Monday in a Seminole hospital following a brief ill-She was born in Comanche County.

She was married to M.O. James Dec. 1922, in Brownwood, She moved to Seagraves in 1957 from Plains. Other survivors include two daughters, three sons, a sister, three broth-

ers, 25 grandchildren and 15 greatgrandchildren.

Shirley Nelson

HOUSTON - Services for Shirley Parks Nelson of Houston, a former Midland school teacher, were Monday in Carl Barnes Funeral Home chapel here. Burial was in Paradise Cemetery

She died recently after a lengthy illness.

Mrs. Nelson had taught at Carver Elementary, Alamo Junior High and Midland Freshman schools. She was employed by Houston Independent School District.

Survivors include two sisters, Jean Park and Mrs. Thomas Nelson, both of Houston; and a brother, Papa Parks of Houston.

Midlanders will be in for cool, but not too cold, temperatures tonight. when the ol' mercury drops only to the mid-30s following a Monday night low in the 20s.

Mid-30s

low due

tonight

And the high Wednesday will be in the low 60s, which will be a radical change from the high of 42 degrees on Monday said the weatherman at the National Weather Service at Midland Regional Airport.

The overnight low was 29 degrees, which was far from the record low of 10 degrees on the date in 1967. Record high for the date was 75 degrees in 1965.

Winds tonight are to be south to southwesterly at 5-10 mph.

Sunset today is to be at 6:01 p.m. Sunrise Wednesday will come at 7:50 a.m.

Mostly clear skies and slightly warmer temperatures dominated the Texas weather scene

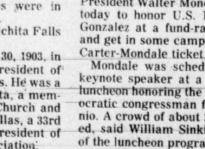

There were some clouds over South Texas and the Panhandle, but most of Texas had clear

694-6649

Highs were expected to range from the upper 40s in the Panhandle to the 70s along the gulf coast.

DR. NEIL SOLOMON Advances winning battle with cancer

By NEIL SOLOMON, M.D.

Dear Dr. Solomon: I know a cure for cancer has not been discovered yet, but I wonder whether the survival rate for cancer patients has improved over the years. Do you have information on this? - Vicki

Dear Vicki: Fifty years ago, fewer than one out of every five patients with cancer was alive five years from the time treatment was started; today, almost one of every three patients is alive five years after the diagnosis. The five-year survival period is considered a measure of cure. This progress is attributed largely to major advances in diagnostic and treatment techniques, as well as greater awareness on the part of the public.

Dear Dr. Solomon: My gynecologist performs Pap test routinely at my annual examination. Is this necessary when I have no symptoms or problems of any kind? - Mrs. K.L.

Dear Mrs. L.: Early detection of cancer is essential for successful treatmement. There are no symptoms in early stage cancers, and by the time symptoms appear, valuable treatment time has been lost. That is why the Pap test is so valuable.

The Pap test will detect signs of early cervical cancer with an accuracy of 95 percent, and it can also reveal pre-cancerous conditions. It is a simple and completely painless procedure, and one of medicine's major

little over a year. For the past few months, her menstrual periods have been accompanied by severe cramps and diarrhea. I never had this problem and wonder if it indicates some abnormality in her reproductive system. - Mrs. D.H.N.

Dear Mrs. N.: It has been estimated that painful menstruation (or dysmenorrhea) is experienced by about half of all adult women. Of these, 10 percent are believed to be incapacitated for at least several hours each month

Dysmenorrhea may be either primary or secondary. A diagnosis of primary dysmenorrhea means the condition is not related to any underlying disease. Many girls first experience the pain and discomfort associated with the condition from six to 12 months after they start menstruating, about the time ovulation first takes place.

Primary dysmenorrhea may be associated with bloating, backache, nausea, vomiting, diarrhea, nervous tension and fainting episodes. The length of time pain is experienced generally varies from several hours to two days.

Dysmenorrhea is said to be secondary when it is related to some underlying problem, such as an infection or fibroids.

ter's discomfort.

THE MIDLAND REPORTER-TELEGRAM, TUES., JAN. 8, 1980

Free Khmer guerrillas fight among selves, trap seven reporters in temple 20 minutes

NONG SAMET, Thailand (AP) -Men with their faces painted green -'for fun," they said - and dressed in fatigues, black shirts and scarves bought on the black market, were firing at each other from behind the walls of an ancient, ruined temple.

Some wore lipstick and had aluminum barrettes in their hair. Others held small ivory Buddhas between their teeth for good luck.

It was not clear, even to them apparently, just whose side they were on or what they were fighting for, but they knew that the men they were shooting at, most of them, were their comrades in arms.

The scene took place at the edge of an eerily deserted refugee settlement that only four days before was home to nearly 200,000 people, an area that some people say is inside Thailand, some say Cambodia.

The battle involved factions whose fighting inside the crowded settlement last Friday had dispersed its population into the jungles and fields of Thailand and Cambodia. But so far observers in Thailand had not been able to agree on who was doing the fighting.

Seven reporters, waving a white flag, were trapped for 20 minutes inside the temple during the crossfire

stone Buddha draped with a saffron cloth. Bullets hit the thick stone walls and rockets exploded behind them, until they made a 100-yard dash for safety.

In an open field, with the sound of battle all around him, a man was calmly taking a bath, ladling water over his head.

Here the reporters found themselves among the tough, black-shirted guerrillas who back ousted former Premier Pol Pot and who are fighting against the Vietnamese and the troops of the Heng Samrin government the Vietnamese installed a year ago.

And now, it became clear, these guerrillas had joined forces with a faction of the non-communist Free Khmer fighters - the men with scarves and lipstick - who control the huge refugee settlmements along the Thai border.

The Pol Pot men, heavily armed and carrying field telephones with long antennae, strolled calmly toward the fighting.

The men inside the temple, as they explained just before Monday's fighting broke out, were both Pol Pot troops and members of the Free Khmer splinter group, who had con-

Monday, along with a weathered trolled the deserted camp together for the past two days.

The men who were shooting at them were the Free Khmer fighters who had controlled the camp until the

population scattered, along with another Free Khmer faction from another camp, who apparently had tried to disarm them just before Friday's battle broke out.

Neither side appeared quite sure

why Monday's battle was taking place, except that former comrades had now become enemies, and former enemies had now joined forces.

PAGE 3A

Meanwhile, their common enemy, the Vietnamese and the Heng Samrin Cambodians, were camped just a lit-tle farther inside Cambodia, perhaps within earshot of the fighting, waiting until their own time comes to attack.

17 children, four adults die as dump truck's brakes fail

MEXICO CITY (AP) - The brakes failed on a dump truck loaded with gravel and it rolled backward down a hill, plunging into a large group of elementary school children on an outing, police reported. They said 17 children and four adults were killed and 21 other persons were seriously injured.

Of those injured, "14 children have been hospitalized with serious injuries, and from what doctors tell us we fear the death toll will go up. Six of the children, aged between six and seven, are in critical condition," a police spokeswoman said.

She said the children killed were between 6 and 10 years of age and the four adult victims were three teachers and a mother. The accident occurred near, Xochimilco, a southern suburb of the Mexican capital.

The children were going on an excursion to a nearby park to celebrate Epiphany, or Three Kings," the spokeswoman said. They were students from Margarita Magon de Lores school.

Salute to Joe Kloesel

Midland and Midlanders owe a sincere vote of thanks to Joe Kloesel who has just rounded out his term as president of the Midland Chamber of Commerce.

Joe Kloesel, an energetic, determined and most effective civic leader, seldom if ever says no when asked to accept a community service assignment. He has an uncanny way of getting things done, and it was in this effective, productive manner that he led the 55-year-old Midland Chamber through one of its greatest years of achievement.

Its projects, activities and accomplishments were many and varied in 1979, but one of the achievements of which it and Midlanders generally are most proud was the erection of the fine, new Midland Chamber of Commerce Building at the corner of Main and Texas streets.

There has been no let up, however, in other areas of chamber activities, such as industrial development, public transportation, energy matters, housing, retail trade and regional shopping center expansion, air transportation, highway matters, agriculture, legislative affairs and conventions. If any area of public service has been neglected, we are not

aware of it. Joe Kloesel is a master when it

comes to organization, and when this is matched with his superb leadership qualities, achievement is unlimited.

Kloesel, however, hasn't limited his civic activities to the Midland Chamber. He is a past chairman of the Midland Area Sales Team, a member of the executive committee of the Industrial Foundation of Midland, Inc., district vice president of the West Texas Chamber of Commerce, vice president of the Texas State Chamber of Commerce, and immediate past president of Junior Achievement of Midland, Inc., among other things.

And on top of all that, and holding top priority, of course, is his position as president of Drilco Industrial Division of Smith International Inc.

The Tall City is fortunate indeed in having men of Joe Kloesel's caliber who are willing to serve in such positions of responsibility and leadership in community affairs.

Congratulations to Mr. Kloesel on a banner year as president of the Midland Chamber of Commerce, and all best wishes in the future.

sponsored by Major Ira Dees,

A marvelous gesture

A news story out of Austin says that a \$250,000 foundation to honor former Texas Department of Public Safety Director Wilson E. The main fund-raising event for

commander of the Midland Region, and other DPS personnel. "Pat" Speir is being put together the Wilson E. Speir Foundation

WASHINGTON MERRY-GO-ROUND Some chains that bind are costly

By JACK ANDERSON

WASHINGTON - No one whose memory is reasonably intact needs to be told that the prices of certain food staples went zooming last year.

Coffee drinkers have been roasted by a 28 percent price rise since last May. Shoppers paying more than \$2 for a gallon of milk or a pound of butter at year's end remember that milk was \$1.80 and butter \$1.50 at the beginning of 1979. And beef prices jumped over the moon, from an aver-

rado Inc., Denver; Hy-Vee Food Stores Inc., Chariton Iowa and Liggett Group Inc., Montvale, N.J.

Not surprisingly, the grocery chains' profits jumped in the nine months between October 1978, and July 1979. An internal Agriculture Department report calculated that the net earnings of the 14 biggest chains were 28 percent higher than for the same period a year earlier.

"Even the financially troubled. Great Atlantic and Pacific Tea Co. (A & P) experienced relatively good performance during the first three-quarters of the (voluntary guidelines) program year," the report noted, while

doubled. The rest becomes profit. "The percent gross margin stan-

dard has apparently not served as a constraining influence on food chain earnings," the report concluded with bureaucratic understatement. What it means in plain English is excessive prices on supermarket shelves.

Footnote: The firms named weren't officially cited for violations because they made a successful effort to comply after being warned, a White House official told our associate Tony

CHARLEY REESE The 1980s will be logical consequences of the 1970s

ORLANDO, Fla. - It is a tradition among those of us who are lucky enough to get paid for doing what most people do for free on street corners and at water fountains to prophesy on the future and to reflect on the past at the turning of a year.

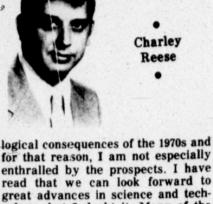

At such times, I'm reminded of an angry reader who once asked, "What qualifies you to write a column?" I replied, honestly, that what qualifies me is the fact that my boss told me to do it. Indeed, that and luck are the chief qualifications of most of our tribe.

I don't like prophesying because it is a no-win proposition. I once prophesied that a certain now-forgotten politician would run second and he ran fifth. Being wrong hurts. On the other hand, I also prophesied that Jimmy Carter would be the worst president in American history. Being right can hurt, too, if you love your country.

Next to prophesy and reflection, newspaper people love labels. The only institution which loves labels more is the army. The army labels tangible things like buildings, doors and latrines while the press labels intangible things like the passing of time and generations. It's a practice I try to avoid.

The 1970s were nothing more than the logical consequences of the 1960s. There is a lead time in the affairs of people that is long but inexorable. Effects follow causes as surely as sunsets follow sunrises.

For that reason, the 1980s will be the

EDITORIAL

read that we can look forward to great advances in science and technology, but I doubt it. Many of the people who will be in science and technology in the 1980s are the same ones who achieved the great decline in SAT scores. The lousy education of the 1960s and 1970s will begin to tell in the 1980s. I don't expect many breakthroughs from cum laude graduates

who can't spell cum laude. We have spent the 1960s and 1970s disarming while the Soviet Union has spent the same time expanding its military power to the maximum of its ability and resources. Therefore, the 1980s will be, to say the least, not dull

We can't overcome 20 years of wrong decisions overnight and so at least through 1985, assuming our politicians make the right decisons now, we will live in an excessively dangerous world.

We shall also live in an inflationary world. The pols have accumulated three-quarters of a trillion dollars in public debt and they will clip the coin to pay it off. That scenario, to use a fashionable word, has usually ended disastrously, but it's not easy to predict when the collapse will come.

I believe, too, that before the 1980s are over either the Soviet Union or the United States will no longer be a world power. Perhaps neither. A common mistake of government planners is to project the future as a straight-line continuation of the present. I suppose that is because they took statistics instead of history.

What our timid politicians choose to call competition between the Soviet Union and the United States cannot, however, continue indefinitely since neither one has that kind of staying power. The clock has about run out on this game which has already lasted over 60 years and there will soon be a resolution.

I am not, as you might think, a pessimist, but I don't believe in dis-

by some of the state's wealthiest and most politically involved persons.

The foundation will provide funds for scholarships for needy and educationally qualified children of DPS personnel.

This is a marvelous gesture and a wonderful, far-reaching manner of honoring one of the state's and nation's best and most favorably known and most competent law enforcement officials, who retired his DPS post at the end of December.

Pat Speir, who headed the 49county Midland Region of the **Texas DPS for a number of years** before assuming his state director role, has many friends here and throughout this section of West Texas. He was a member of the Midland Rotary Club and was active in other civic affairs while residing in the Tall City. He and Mrs. Speir were honored at a reception held here recently,

saw a generous person

Austin's municipal auditorium. Tickets are priced at \$10. It is reported that thousands of invita-

Col. Speir now is a part-time teacher at Southwest Texas State

age of \$1.48 a pound to \$2.31. After a richly deserved tongue

lashing from President Carter last summer, most of the nation's food retailers scaled down their assault on the American family's budget, and the overall cost of food rose only 2.5 percent over the past six months.

But this easing off followed a ninemonth period when the nation's big grocery chains raked in money hand over fist - a reaction, ironically, to the president's voluntary price guidelines. While most were simply taking advantage of the generous guidelines, some weren't satisfied with even that officially approved bonanza.

According to confidential documents of the White House Council on Wage and Price Stability, a variety of food firms across the country temporarily exceeded the liberal voluntary guidelines either deliberately or from carelessness.

Here's a list of food firms that were fighting on the wrong side in the war on inflation: International Multifoods Corp. of Minneapolis; Bluebird Inc., Philadelphia; Alexander and Baldwin, Honolulu; Affiliated Food Stores Inc., Dallas; Giant Foods, Washington, D.C.; Associated Grocers of Colo-

the net earnings for the huge Safeway chain were up 15 percent. "These findings lead us to conclude," the agriculture analysts reported, "that the financial position of the 14 firms, taken as a group, have improved significantly during the period covered by the anti-inflation ef-

fort. The basic problem is centered in what the food industry calls "gross margin standard" — a percentile markup by the food chains on the price they pay for their products. This system, approved by the federal guideline writers, allows a grocer to add on the same percentage of overhead margin every time the cost of a particular item goes up - even though his overhead may go up only a little or not at all.

Thus, a \$25 markup on a \$100 case, say, of canned soup, sets the rate -25 percent - at which he can mark up future orders of that canned soup. If the price to the grocer subsequently goes to \$200, he can add on \$50 in markup, even though it's highly unlikely his handling costs will have

PURLOINED PIPELINE: A corruption-riddled program that was supposed to guarantee the United States a billion barrels of oil in safe storage by December 1982, has already cost the taxpayers millions of dollars. But the goal of a ready reserve of oil, to be used in case of the kind of cutoff we now face in the Middle East, has been a good idea gone bad from the beginning.

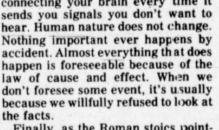

The Strategic Petroleum Reserve, a program set up by Congress in the wake of the 1974 Arab oil embargo, was supposed to cost about \$7 billion. Now, however, congressional sources tell me the tab is more likely to approach an astronomical \$40 billion. a good deal of the overcharge caused by unbelievable bungling.

The skyrocketing cost of the oil-reserve program echoes the runaway bill for another federal oil project the Trans-Alaskan pipeline. The original estimate for that exercise in government profligacy was \$863 million. The final bill ran to \$13.7 billion.

Interestingly, both projects involved the same two free-spending private firms, Banister Continental of Edmonton, Canada, and Ralph M. Parsons Co. of Pasadena, Calif. I exposed some of the shameful waste in the Alaska pipeline project more than three years ago. Massive quality-control problems cost millions to correct, but it didn't stop the government from hiring Banister and Parsons for the oil-reserve boondoggle in Louisiana a few years later.

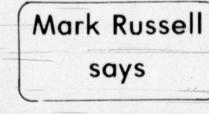

The Louisiana scandal involves a 62-mile, 36-inch pipeline to transfer federal oil reserves from Weeks Island to St. James, La. The price was to be \$27 million - \$85.50 a foot - with completion set for January 1979. Parsons and the Gilbane Construction Co. of Providence, R.I., got the contract, and brought in Banister as a subcontractor.

By December 1978, the government terminated Banister's contract after paying the company \$16 million for 13 miles of pipeline. An internal memo from the House subcommittee on Energy and Power listed a number of flagrant violations during the eight months of Banister's boondoggle. Some of the violations - like buying unneeded equipment - were just like those the company had committed in Alaska.

Finally, as the Roman stoics pointed out, both past and future exist only in memory and imagination. We exist in the eternal present and it's in the present that we construct both the past and the future. What we will one day remember and what we may reasonably expect depends on what we do and are now.

That's why I think the 1980s will hold no surprises.

Public television has funded a survey which concluded that the favorite form of relaxation in this country is watching television. Gee, and I thought it was bullfighting.

Paying for this startling revelation is comparable to giving someone money to tell you that human beings derive a certain pleasure from sex.

It seems a waste of money if you spend it on a survey which tells you what you already knew. Better to discover that when it comes to relaxation, most folks prefer collecting antique Tasmanian collar buttons than watching the tube.

The only solution is to integrate public television with commercial television. For example, on "Diff'rent Strokes," little Arnold could explain the windfall profits tax to MacNeil and Lehrer.

BIBLE VERSE

Bless the Lord, O my soul: and all that is within me, bless his holy name. - Psalm 103:1.

WASHINGTON - The Iranian crisis and the Soviet invasion of Afghanistan should push us to a reassessment of what role the United States should play in the world.

NICK THIMMESCH

An election year is a good time to make such a decision. The citizenry could stand some rousing arguments over our defense budget, how we define who are friends and enemies (and how we should treat them) and how aggressive our intelligence forces should be.

Operating a democracy is not easy. A chicken farm is probably much simpler. There is jingoism and hawkishness in the air. Suddenly, as if we were in the throes of the Fifties' cold war again, strategists fuss over regional maps, consult scholarly works on Islam and ponder the balance of forces between the U.S. and the U.S.S.R.

But then there is also the Rev. William Sloane Coffin telling us to be kinder to the Iranian revolutionaries so that they will release the hostages and go back to producing more petroleum for our insatiable cars. President Jimmy Carter admits that he is only now understanding the Soviets. And there are some folks who think that all those greeting cards and vigils are going to move the Iranian terrorist-students into releasing our

people. The holidays are behind us, so now come the bills of January. So, too, come Republican presidential aspirants and an assortment of hawks in both parties, informing Mr. Carter that the people are becoming impatient over Iran, and that something better be done soon. John B. Connally demands that the United States set a deadline for release of the hostages. Sen. Henry A. Jackson is undoubtedly pleased that the SALT treaty has been put aside.

Alas, it is time for the clear-eyed to take a look. Nuclear war is out, but what to do about the gathering brutal, irrational forces in the developing world? Do we hold their hands, as Rev. Coffin recommends, sing solidarity songs with them as Andy Young would like, or client them as **Jim Abourezk does?**

Without killing so much as a flea we should decide who our friends and enemiees are. Now a friend and ally is a nation which is on our side. It might not measure up to the human rights standards of the Americans for Democratic Action or the early Carter Presidency, but neither will it burn our Flag, smash our embassies or

hold our people hostage. We might hope that South Korea, Pakistan or Saudi Arabia might one day become as democratic as other such friends as, say, Israel, Luxembourg or Japan, but we needn't go nuts if they don't. We must learn the difference between authoritarian states who aren't. Lately, we've been too hard on our allies and too easy on our enemies. Among the latter are the Soviet Union, Vietnam, North Korea, Cuba and, for the moment, Iran.

Enemies take advantage of democracies. Way back in 1922, Secretary of Commerce Herbert Hoover protested that while the United States

made enormous grain shipments to the U.S.S.R. to relieve starvation, the Bolsheviks exported their own food in order to buy machinery.

The ways haven't changed. The Soviets love to borrow production circuits from our innocent pocket calculators for use as guidance computers in missiles. During detente, Soviet missions learned a great deal about U.S. technology and are using it now. We learn little from them.

According to a paper read at a recent conference of the Institute for Contemporary Studies, American exchange students in the Soviet Union typically pursue such matters as 'Marriage Patterns in Russia and U.S.S.R., 1897-1975," "The State and Economy in Catherinian Russia" and Professionalization of Russian Psychiatry, 1860-1911." Their Soviet counterparts in the United States got "Photoelectric Phenomena in Semi-Conductors," "Solid State Electrochemical Thermodynamics" and "Research in Digital Automatic Control and Diagnosis."

More? The United States builds an amazing, portable "Red-eye" missile. The Soviets acquire it through a Scandinavian nation. Its technology was used in the very SAM missiles which destroyed U.S. aircraft in Vietnam and Israeli planes in the 1973 war. The Soviets don't need spies, only easily duped nations and willing U.S. companies.

The United States is democratic and soft enough to allow its citizens, like Rev. Coffin and Jane Fonda, to work on behalf of the enemy during enough to scream against Iranians, but never question where our gasoline comes from. Should we blame NBC for paying the Soviets upwards of \$100 million for rights to cover the 1980 Olympics or U.S. farmers for selling wheat to the strapped Soviets? Probably not

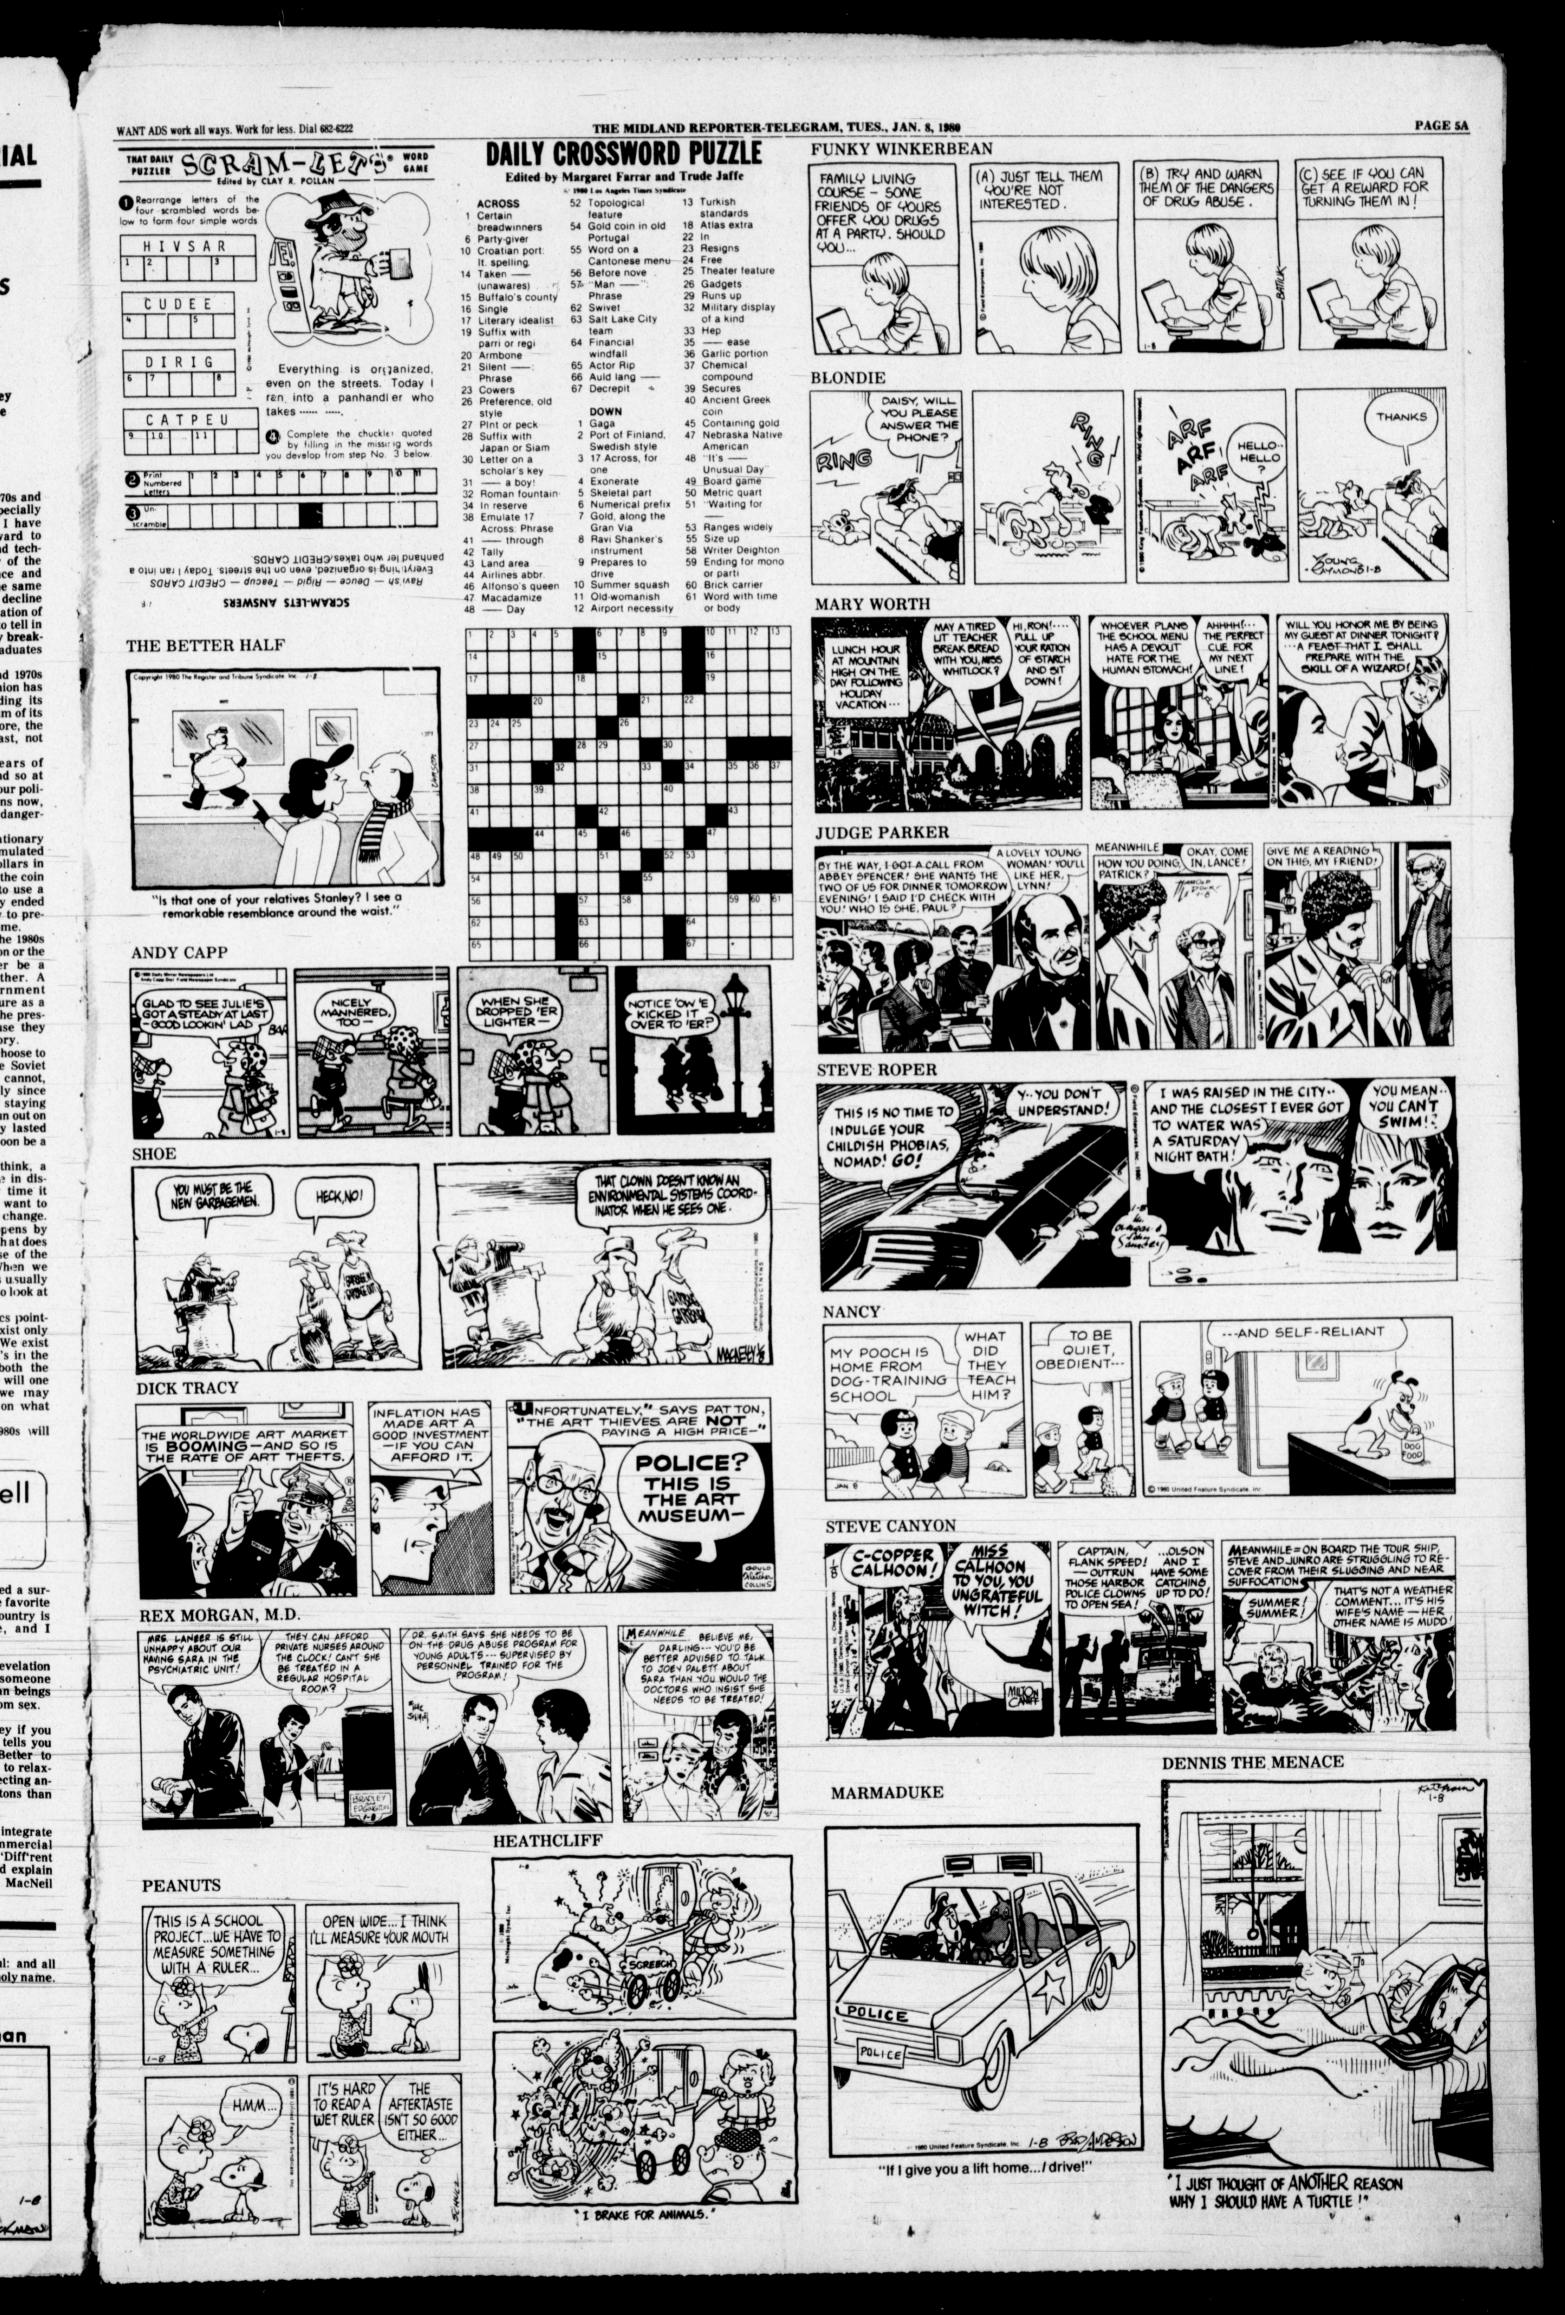

Is it hopeless for a fat democracy like ours to survive in a world where nice-guy nations are becoming quite scarce? No, our democratic system allows a great flow of creative energy, and also the free will to make decisions about which Americans are honorable, in terms of the national interest, and which aren't. We must sensibly determine how to protect ourselves, and how to let the bad actors in the world know in advance that we will tolerate only so much. It is a good year for such debate.

sion to the Sugg (Ellenburger) field of

Irion County, 11 miles north of Barn-

gauge of 67.2 barrels of 48.5-gravity

oil and a trace of water, through

perforations between 8,842 and 8,871

feet, which was acidized with 3,000

Originally scheduled as a 9,500-foot

wildcat, it drilled to 8,949 feet, where

5.5-inch casing was landed. Plugged back depth is 8,905 feet.

Location spots 1,980 from north and

west lines of section 114, block 14,

described the find as "encouraging"

but not very surprising, because both

oil and gas have been found on shore

in the Eureka area. The two areas are

part of the same general geological formation known as the Eel River

The sample was taken not far from

one region nominated by the Depart-

ment of the Interior for a proposed

offshore oil lease sale in May 1981.

Other regions selected for further

study for inclusion in the lease sale

range from Point Conception in Santa

Barbara County to the Oregon border

The sale, which would open North-

ern California to offshore oil drilling

for the first time, has drawn criticism

and opposition from environmental

study, the Interior Department will decide which of the tracts nominated

for leasing will actually be included in

Survey officials said they expected

their announcement to heighten oil

company interest in the area.

After an environmental impact

groups and the state of California.

not far noth of Eureka.

Operator reported a final flowing

Scientists say decade to open doors

By ROBERT LOCKE

SAN FRANCISCO (AP) - The new decade should see proof that science can finally duplicate the inferno inside the sun and tap the limitless energy of nuclear fusion, scientists say.

And now they must also learn whether the almosttamed force of the hydrogen bomb can generate electricity cheap enough and reliable enough to power America in the 21st century.

"Most people feel that a laboratory demonstration of the scientific feasibility (of nuclear fusion) will occur in this decade," said Andrew M. Sessler of the University of California's Lawrence Berkeley Laboratory.

He said at a meeting of the American Association for the Advancement of Science that fusion fuel - a type of hydrogen called deuterium -- "would come from seawater, so we are talking about a potential source of energy that is really inexhaustible.'

Fusion is the opposite of the nuclear fission - the splitting of atoms - that runs existing nuclear power plants.

A fusion plant would produce energy by forcing the nuclei of light atoms to combine, or fuse together, in a process that releases tremendous amounts of energy. But the process only works at the incredible extremes of temperatures and pressures inside the sun.

Sessler and others said Monday it's a long way probably 20 years or more -- from laboratory to power plant, and success is not a foregone conclusion.

"Determining whether a practical fusion power plant can be built is a matter over and above" the question of proving that the complex process will work in the laboratory, said David Paul of the Electric Power Research Institute, a center sponsored by the nation's electric utilities.

He said that because of rapid scientific progress in the past few years, "we have now gotten to the point where we have to start asking these practical questions.

"This sort of thinking is just starting to phase into the program because prior to this, it wasn't justified to do that ...," he said. "Now we are on the verge of doing momentous things."

Two major approaches are being tried, with encouraging results, to achieve the conditions needed for fusion, scientists say. In magnetic confinement, energy is fed into superhot fuel that's bottled up inside magnetic fields. Inertial confinement uses such things as laser beams to compress pellets of fuel so violently that tiny thermonuclear explosions take place.

Magnetic confinement is leading the race, with proof of feasibility expected about 1985. But Sessler said, "I think both of these techniques are going to work."

He said the United States currently is spending about \$500 million a year to develop fusion energy and about \$15 billion might be needed before it becomes commercially available.

But when compared with the \$70 billion a year Americans spend on imported oil, he said, "the investment in fusion energy is not unreasonable.'

Flag-Redfern finals opener in Howard Fusselman zone

The Los Angeles Times

WASHINGTON - The chance of finding oil in the sea bed off the Northern California coast has been enhanced by the first discovery of hydrocarbon concentrations there by the U.S. Geological Survey, it was announced Monday.

A core sample taken from the sea floor 25 miles off the coast from Eureka "contained high concentrations of hydrocarbons," the survey said in a statement. The findings "are an indication of possible offshore hydrocarbon resources in Northern California, probably natural gas and possibly oil," the announcement said.

Both the Geological Survey and oil company geologists were cautious in trying to assess the significance of the discovery.

"It's a positive clue," said Michael E. Field, one of the government scientists who participated in the discovery more than 1,500 feet below the surface of the ocean. "I guess it is a note of optimism."

A geologist for a major oil company

Major gasohol producers don't agree on converting Red grain to gasohol

By DEBRA WHITEFIELD The Los Angeles Times

The nation's major gasohol producers Monday disputed an administration official's claim that 5 million tons of corn embargoed for shipment to the Soviet Union could be converted to gasohol this year under a new government program.

"I'd just like to know where the heck are they going to make the alcohol" from 5 million tons of corn, said Howard Hinton, manager of the industrial alcohol division of Midwest Solvents Co., diversified grain processor based in Atchison, Kan.

Hinton's doubts about the feasibility of such large-scale production of gasohol were shared by Richard Burket, a vice president of Archer-Daniels-Midland Co., of Decatur, Ill., the nation's principal producer of ethanol for gasohol.

"I don't think there's the capacity" even if expansion by several alcohol distilleries began immediately, Burket said. A more reasonable estimate is 1½ million tons; not 5 million, he

ADM and Midwest Solvents are

America's two leading producers of

alcohol from corn for use in gasohol.

producers operating at capacity un-

crease (in) gasohol production."

tute for unleaded premium fuel.

derwent major expansions, and if a number of other U.S. alcohol distilleries began producing ethanol earmarked for gasohol.

A distillery with a 35 million-gallona-year capacity, for example, would require a \$50 million capital investment, he noted, and a producer considering such a large investment would insist on a guaranteed market. If such guarantees were secured, he said, it would take at least 18 months to build an alcohol distillery.

Burket said ADM is producing about 54 million gallons of ethanol per vear - its capacity - and that ADM would consider expanding its plant if the government could make such expansion attractive enough.

Promoting gasohol is "good for the country," he said, but "you can only go so far before you need (financial) encouragement.

For the Midwest Solvents, the financial encouragement needed to prompt expansion of its ethanol plant would be loan guarantees provided for in energy legislation now before House-Senate negotiators. 'If we are guaranteed loans to build

and (there are) no strings on what

that alcohol can be used for, yes, we'd

But Hinton expressed concern that the administration's new program would lead to overbuilding of plants whose ethanol is earmarked for gasohol. "We don't want to be left with a white elephant," he said, as many non-beverage-alcohol distillers were after World War I when government market guarantees suddenly evaporated.

Midwest Solvents produces about 50,000 gallons of alcohol a day, of which about 10,000 gallons are combined with gasoline for gasohol, Hinton said.

Like ADM and Midwest Solvents, Publicker Industries Inc., of Philadelphia, said any expansion of its gasohol operation would hinge upon "a clear indication that the market is a real market" in which production is spoken for and ethanol producers are not "left to pure competition" with gasoline dealers.

Without such a guarantee, said Executive Vice President Joseph Minio, Publicker would be hard-pressed to manufacture the 60 million gallons per year of ethanol it is capable of

County grand jury indicts man in 'hijacking' of bus

Midland County grand jurors have returned two indictments against a 23-year-old Los Angeles, Calif., man who allegedly drove off with a Greyhound bus and 35 passengers after the bus driver exited the vehicle in Midland.

Jerry Allen Wilkerson was indicted last Wednesday on charges of false imprisonment and unauthorized use of a motor vehicle. He remains in Midland County Jail in lieu of bonds totaling \$25,000.

Wilkerson was arrested by city police the night of Dec. 20, 1979, after he allegedly drove away with a bus and 35 passengers when the bus driver exited the vehicle at the bus depot in Midland.

He was stopped and arrested by police at the intersection of Williams Street and Wall Avenue.

Grand jurors also returned indictments against 16 other individuals on 16 charges.

Willie Albert Ross, 1401 E. Chestnut Ave., was indicted on a charge of possession of cocaine. He remains in jail in lieu of posting a \$10,000 bond.

Indicted on charges of burglary of a building were Richard Lonnie Sulli-

Dawson County

residents voting

LAMESA -- Voters in the southeast sector of **Dawson** County today were making their third attempt since 1976 to legalize the sale of beer for off-premise consumption in the Ackerly-Sparenberg-Ten Mile areas of the county.

Similar drives "to go wet" were defeated by 61 votes in each of two 1976 elections.

The election today was called by the Dawson County Commissioner's Court for Justice of the Peace Precinct 2 after the court was presented a petition by Israel Ybanez. The petition bore 90 names, including 70 names which were valid according to the voter registration list.

Elections to vote the area "wet" died twice in 1976, when, on April 3, 118 voted pro-wet and 179 voted against the issue. and on Dec. 1, the vote was 101 for the issue and 163 against.

Twenty-three absentee votes were recorded. **Election** returns will van, 708 Mogford St.; Robert Anthony Sullivan, 708 Mogford St.; Herald Andrew Almon II, 2205 Culver St.; James Ray Bates, 24, 1400 S. Main St.; Luther Curtis Smith, 22, 105 E. Estes Ave.; Michael Charles Kozlowski of Stanton and Clifford Carl Mitchell, 25, 1619 E. Magnolia Ave.

Street Address 1101 South Marienfeld

Richard Sullivan and Robert Sullivan are free after posting a \$3,500 bond each. Almon is in the city jail in lieu of posting a \$10,000 bond. Bates, Smith and Mitchell are in jail pending posting a \$5,000 bond each.

Kozlowski is free on \$5,000 bond.

Michael Edward Bizzell, 3329 W. Wadley Ave., was indicted on a charge of possession of marijuana in excess of four ounces. He is free on \$3,500 bond.

Phillip Lynn Westerman of Odessa was indicted on a charge of driving while intoxicated, subsequent offense. He is free on \$2,500 bond.

Emory Lloyd Gay of Monahans was indicted on a charge of possession of tetrahydrocannabinal. He is free on \$5,000 bond.

The names of five others indicted by the grand jury were not immedi-ately released pending their arrests.
