Iowa victories to Carter, Bush

DES MOINES, Iowa (AP) — George Bush led Ronald Reagan in returns from the Iowa precinct caucuses and claimed an upset victory that gave a solid boost to his campaign for the 1980 Republican presidential nomination.

Meanwhile, Jimmy Carter renewed his political love affair with Iowa Monday night and thrashed Sen. Edward M. Kennedy in their first official confrontation.

With results from a non-binding straw poll of Republicans showing him leading Reagan, Bush said he would leave today for New Hampshire "and we'll do better there."

The New Hampshire primary on Feb. 26, is the next major test of the campaign.

With 72.5 percent of the Republican precincts reporting, Bush held a 27,926 to 22,724 lead over Reagan in the straw poll.

Sen. Howard H. Baker was third with 11,590; John B. Connally, 8,425; Rep. Philip Crane, 5,749; Rep. John Anderson, 3,355; Sen. Bob Dole, 1,569.

The Republican caucuses chose delegates to represent their precincts at county conventions but the delegates were not bound to candidates by Monday's outcome.

Results from 2,442 of the 2,531 Democratic precincts gave Carter 59 percent, Kennedy 31 percent, uncommitted 10 percent.

Based on those figures, Iowa's 50 delegates to the Democratic National Convention in August would be divided 29 for Carter, 15 for Kennedy and 5 uncommitted. One is yet to be awarded.

From the earliest Monday night returns, Carter jumped to a two-to-one lead over Kennedy and held it throughout the night.

It was Iowa that gave Carter his boost out of obscurity in the 1976 race and as soon as his 1980 victory was assured, the president issued a statement at the White House saying, "I deeply appreciate the vote of confidence from Iowa Democrats. Their expression of support is particularly welcome in these difficult times."

Kennedy met with supporters at his campaign headquarters in Washington and vowed to remain in the race.

"The reasons I run for president still remain," said the Massachusetts senator, who once led Carter two to one in public opinion polls, a margin that reversed in recent weeks.

"Tonight, according to my count," Kennedy told supporters, "President Carter needs 1,643 (delegates) more

to win the nomination. We need 1,657 and we're going to get it."

Reagan was in California and had no immediate comment on the Iowa results.

But John Sears, his national campaign manager, said, "George Bush has done something right. Hel has spent a lot of time in Iowa."

Reagan made few campaign appearances in Iowa and refused to participate in a debate with other Republican candidates.

A poll taken for the Des Moines Register immediately after the debate, showed a sharp drop in Reagan's standing though he still led other candidates.

By contrast, Bush campaigned hard in Iowa and built a strong organization.

As the results rolled in, Bush said, "I'm ecstatic. I've won even if I finish close to these numbers."

The former U.S. ambassador to the United Nations and one-time director of the CIA, Bush recalled that he began his Iowa campaign as one of the candidates often grouped at the bottom of opinion polls as "others."

"I was a little star and an asterisk," said Bush. His showing in Iowa inevitably will be compared with Carter's in 1976, when the former Georgia governor was declared the winner in Iowa after he received 29 percent of the caucus vote. The largest bloc, 38.5 percent, was uncommitted.

This year, Carter was no longer unknown, but as the campaign got under way the president was running far behind Kennedy in the public opinion polls.

But Kennedy's entry into the race nearly coincided with the takeover of the U.S. Embassy in Iran and in the ensuing weeks, the polls began to turn around. Kennedy's campaign got off to a rocky start and the nation rallied behind the president and his efforts to free the American hostages in Tehran.

Citing the crisis in Iran and later the Soviet intervention of Afghanistan, Carter remained in Washington, canceling all plans to campaign outside the capital. He also pulled out of a debate with Kennedy and Gov. Edmund G. Brown Jr. of California.

Then, two weeks before the caucuses, Des Moines Register poll showed Carter favored by 57 percent of Iowa Democrats while Kennedy had the backing of only 25 percent.

The senator, finding himself in an underdog role, began saying that anything less than 50 percent would be a severe setback for Carter. When the final returns were reported, Carter had 59 percent.

A jubilant George Bush emerged from the Iowa precinct caucuses as Ronald Reagan's strongest challenger for the Republican presidential nomination. "It is clear we are going to come out of here

with momentum," said Bush, a former Midlander. He held a substantial lead over Reagan as officials tallied the last of the GOP straw vote today. (AP Laserphoto)

Carter says Americans 'must pay price'

WASHINGTON (AP) — President Carter says Americans "must pay whatever price is required to remain the strongest nation in the world."

In a written State of the Union message delivered to Congress Monday, the president took a hard line toward the Soviets and placed a U.S. military buildup first among American goals for the 1980s.

"The Soviet Union has built a war machine far beyond any reasonable requirements for their own defense and security," Carter said.

To counter it, he said, defense spending will be boosted 3 percent, after accounting for inflation, and alliances will be strengthened. Plans for an increase of that size had been announced previously. More measures will be outlined by Carter in his State of the Union speech Wednesday night.

In another part of his speech, Carter appeared to be willing to extend an olive branch to Iran if the Americans hostages being held there are freed unharmed.

He said the administration was prepared to develop "a new and mutually beneficial relationship" with the regime of Ayatollah Ruhollah Khomeini if the hostages are released.

"We have no basic quarrel with the nation, the revolution or the people of Iran," the president said. "The threat to them comes not from American policy but from Soviet actions in the region."

At the same time, Carter reaffirmed his abhorrence at the Nov. 4 seizure of the U.S. Embassy in Tehran and insisted that "our patience is not unlimited and our concern for the well-being of our fellow citizens grows every day."

Condemning the Soviets in Cold War terms, the president accused the Kremlin of "ruthless extermination" of the last government in Afghanistan and said they were now within striking distance of the Indian Ocean and the Persian Gulf.

In response, Carter said, the United States is prepared to "confront the

threats they may pose to our security."

The president did not directly mention the prospect of going to war, but a senior administration official told reporters at the White House that "when we say we are prepared to use force to defend our interests in that part of the world, we mean it."

The official said U.S.-Soviet relations were in "a period of intensified tensions" and the American public "has got to understand this is a long-haul effort."

At the same time, he said, the administration and the news media "should avoid an impression we are on the brink of some military confrontation."

Although more than 100 reporters — including some from China, West Germany, Great Britain and other countries — attended the briefing, the official insisted he not be named.

Soviets reported tightening grip

Russian bureaucrats taking over government

By The Associated Press

The Soviet Union is reported tightening its grip on Afghanistan, with thousands of administrators taking over the government and troops transferred from Eastern Europe replacing Afghan army deserters.

The Times of London reported from Kabul that almost 5,000 Soviet bureaucrats have been flown to the Afghan capital to clean up the mess resulting from three communist coups in 20 months.

The Times correspondent said a senior Afghan official told him the Russians ordered him "not to show

my face in the office unless it is to collect my pay."

The correspondent for the Indian Statesman wrote Monday after arriving in New Delhi from Kabul that the Soviet hold on the Afghan government is "complete and irreversible."

He said Afghan sources told him each minister in the cabinet has two Russian advisers. "No decision at any level of government... is taken without approval of the Russian advisers," the sources said.

Sources in Islamabad, Pakistan, said Soviet troops being flown to Afghanistan from Eastern Europe were replacing deserting Afghans and not Soviet reservists as Pentagon sources in Washington reported last week.

One Western diplomat in the Pakistani capital said his embassy was receiving a large number of reliable reports that "the Afghan army is just evaporating — disappearing like so many soda bubbles."

"What's happening is that the Afghan army is suffering such rapid desertions that the Soviets are reach-

ing the point where there will be no indigenous forces to rely on," he said.

The Afghan army at one time numbered about 100,000 men, but intelligence sources estimate the strength nearer to 50,000 now as a result of defections and casualties in the 21-month-old war with the Moslem rebels. The Soviet occupation army is estimated now at 76,000 to 80,000.

U.S. intelligence sources in Washington estimate as many as 2,000 So-

viets have been killed, wounded or captured since the Russians poured into Afghanistan last month to crush the rebellion and replace President Hafizullah Amin with Babrak Karmal.

Meanwhile, President Carter in his State of the Union message to Congress called for greater defense spending and increased aid for Pakistan because of the Soviet army in Afghanistan, on Pakistan's northwest border.

Early morning sleet, snow pelt Midlanders

"Button up your overcoat...take good care of yourself" is very good advice for Midlanders who think they can brave today's weather.

At 3 a.m. today, freezing rain pelted many windows in the Tall City. The sleet turned to snow at 5:30 a.m. and continued through much of the morning, although most of the white stuff melted as it hit the ground. Driving conditions, although a bit slippery due to the moisture, were not considered hazardous.

The National Weather Service at Midland Regional Airport was predicting a 70 percent chance of continued snow, sleet or rain through today and a 30 percent chance tonight.

However, on Wednesday it should be partly cloudy and a bit warmer with a high in the 40s.

Midlanders are not the only folks experiencing the snowy conditions.

Lamesa residents reported about two inches of snow on the ground, although it was melting fast. Andrews reported a little snow and rain.

It rained all night in Rankin. Big Spring was reporting less than an inch of snow, with rain also reported

in the last 24 hours.

Today's high was only supposed to be in the upper 30s, making it hard to believe that the record high for today is 84 degrees, recorded in 1974.

Tonight's low should fall into the mid-20s. The record low for today, recorded in 1966, was a very cold 2 degrees.

Winds should be northerly 10-15 mph tonight.

Odessa wreck kills three

ODESSA — Three persons were killed sometime this morning when a car crashed into an Odessa residence, according to a spokesman for the Odessa Police Department.

Police officers this morning still were investigating the accident and details at that time were sketchy, but they said a car had crashed into a residence sometime during the morning, killing three occupants of the house.

State of the Union highlights

WASHINGTON (AP) — Here, at a glance, are highlights of President Carter's State of the Union message made public Monday:

Foreign

—On Iran, Carter said, "We have no basic quarrel with the nation, the revolution or the people of Iran. The threat to them comes not from American policy but from Soviet actions in the region." He said that if the Americans held hostage in Tehran are released unharmed, the administration is ready to develop "a new and mutually beneficial relationship" with Iran. But he warned that "our patience is not unlimited and our concern for the well-being of our fellow citizens grows every day."

—On U.S. global goals, Carter said the first priority is to build the military strength of the United States and its allies and friends. He said neither the Soviet Union nor any other nation should "have reason to question our will to sustain the strongest and most flexible defense forces."

—He called for a diplomacy bent on resolving disputes by peaceful means "and to make any aggressor pay a heavy price."

—Carter said energy, inflation and other economic problems should be resolved through expanded trade and development assistance. And democratic institutions should be supported because "we are deeply convinced that the future lies not with dictatorship but democracy."

—On the SALT II treaty, Carter expressed a commitment to arms control, saying his decision to postpone Senate action on the SALT II treaty with the Soviet Union does not mean he has abandoned the proposal. He called the arms limitation treaty "the single most important bilateral accord of the decade."

Domestic

—Carter promised a "responsible, restrained budget" and said he would "be limiting my major new proposals to a critical few."

—He termed inflation "our most serious economic problem" but said he saw "hope for a gradual reduction in the inflation rate." He said "inflation will slow this year. In 1981 it should be even lower."

"Restraining inflation remains my highest domestic priority," Carter said.

—The president said he would press for more federal funds for education and put an "unprecedented emphasis on disease prevention."

"The challenge of the 80s in education is to see that quantity education becomes quality education," he said. The biggest increase will be for his recently announced \$2 billion program to attack youth unemployment by teaching poor youth both basic education skills and job skills.

—Carter said action on his new initiatives, along with enactment of past proposals, "can help to ensure stable prices and economic growth, a return to energy security, an efficient, responsible, government...."

—On taxes, he said he is not proposing a tax cut this year because "our top priority must be reduction of the deficit."

—Concerned about the low reserves in the Social Security account that pays retirement benefits, Carter said he will ask Congress to permit borrowing among the system's three trust funds. He said the 35 million Americans who get Social Security checks "can rely on doing so without fear of interruption."

—Other legislative initiatives included reorganization of the Nuclear Regulatory Commission, approval of a standby gasoline rationing plan, a program to encourage conversion of oil-burning utilities to coal and other fuels, and renewal of the general revenue sharing program.

Carter warns U.S. patience 'not unlimited'

By The Associated Press
President Carter extended an olive branch to Iran's revolutionary regime despite the continued captivity of the American hostages in Tehran.

Tempers seem cooler following Sunday riot in Oklahoma town

IDABEL, Okla. (AP) — Light fog, intermittent rain and meetings between black and white leaders seemed to cool tempers as police reinforcements patrolled this southeastern Oklahoma community after rioting that left two persons dead.

An Oklahoma National Guardsman kicks debris from a rain-drenched, Idabel, Okla., street during a dawn search that uncovered the body of a black man shot during the night. More than 100 lawmen barricaded a section of town and exchanged gunfire with about 50 armed rioters. (AP Laserphoto)

"The threat to them comes not from American foreign policy but from Soviet actions in the region," the president declared. Carter said his government is "prepared to work with the government of Iran to develop a new and mutually beneficial relationship."

However, he gave no hint of any specific action. Ghotbzadeh was one of eight men on the final list of candidates, broadcast by Tehran Radio, for the presidential election Friday.

Stewart running for Peace Justice

Leroy Stewart, Midland Realtor and former circulation manager of The Midland Reporter-Telegram, announced Monday he will seek the Democratic nomination for the office of Justice of the Peace, place 1, precinct 1 in the May Democratic primary.

Americans support Carter, want harder line against Iran

NEW YORK (AP) — Americans support President Carter on the crises in Iran and Afghanistan but want him to take a harder line to try to resolve them, an Associated Press-NBC News poll says.

DEATHS

V. M. Valgamore

Vernon M. (Val) Valgamore, 70, of Wickenburg, Ariz., died Sunday in a Midland hospital.

Allie Tuckness

LAMESA — Services for Allie Tuckness, 89, of Lamesa are pending with Branon Funeral Home.

Merle B. Rogers

Graveside services for Merle B. Rogers, 57, 2221 Cimmaron St., were to be at 3 p.m. today in Resthaven Memorial Park with Dr. Ray Riddle of the First Presbyterian Church officiating.

Aaron Mayo

LUBBOCK — Services for Aaron Mayo, 74, father of Jane Mayo of Lamesa, were to be at 2 p.m. here today in the First Church of the Nazarene with the Rev. Eugene Sanders officiating.

Robert Higgins

BIG SPRING — Services for Robert W. Higgins, 90, of Big Spring, will be at 3 p.m. Wednesday in Moran Baptist Church with burial in Moran Cemetery directed by Nalley-Pickle Funeral Home.

C.A. Castleberry

VERNON — Services for Clifford A. Castleberry, 75, of Vernon, stepfather of Martha Holton of Midland, were Monday in Sullivan Funeral Home chapel here. Burial was in Eastview Cemetery.

Merle B. Rogers

Debra Furlow

LAMESA — Services for Debra Fuqua Furlow, 28, of Slaton and formerly of Lamesa, were to be at 2 p.m. today in the Harrell Funeral Home chapel in Dublin. Burial was to be in Gentry Mills Cemetery directed by Harrell Funeral Home.

Canada orders Soviet out for spying

OTTAWA (AP) — The Canadian Government has ordered the Soviet Embassy's military attaché, his deputy and a chauffeur out of the country for spying on the United States.

Foreign Secretary Flora McDonald said Monday the Soviets met secretly with an American in the Ottawa area for 16 months and paid

him more than \$100,000 for information.

She said the American was not in the U.S. government or military service but was "in the kind of establishment that would have been used by government."

She said the Royal Canadian Mounted Police completed its investigation last week in cooperation with the U.S. Federal

Bureau of Investigation, and that the FBI had been helped by the Russians' American informant.

The American was not identified. Nor was it clear whether he had acted as a double agent from the beginning of his contacts with the Russians or changed sides when the espionage was discovered.

Soviet Embassy spokesman Victor Mikheev denied the three Russians were spies and charged that their expulsion was in retaliation for the Soviet intervention in Afghanistan. Miss McDonald said there was no connection.

The foreign secretary said although the Russians used Canada "as a base from which to conduct espionage operations against one of our allies," the Soviet government could send three replacements and keep the embassy staff at 64 persons.

The three officials were navy Capt. Igor A. Bardeev, the embassy's military attaché, his assistant, Col. Eduard Aleksanjan, and chauffeur V. I. Sokolov.

They were the first alleged Soviet spies expelled in two years, since 13 were ordered out in February 1978 for trying to recruit a Mounted Police official as a spy.

Meanwhile, a telephone caller Monday night threatened "dramatic action up to and including assassinating certain diplomatic people and the ambassador of the Soviet Union within 45 hours" unless the Soviet government closes its embassy.

The man, on a tape recording played over the phone, said he represented Canadian Freedom Rights, a previously unknown group. He said his group was threatening action because of the Soviet intervention in Afghanistan.

A Mounted Police officer said several newspapers and broadcasting stations got the same message. He said the police were taking the threat "mildly seriously," and protection for the embassy would be increased.

The officer said the force receives many threats against various embassies and officials. But he said assassination threats are unusual and this was the first time a tape recording was used.

Soviets strip Sakharov of state awards

MOSCOW (AP) — The Soviet government today stripped dissident leader and Nobel Peace Prize winner Andrei Sakharov of a series of state awards. Dissidents said Sakharov had been arrested.

The Tass news agency said Sakharov had been deprived of the awards and titles because of years of "subversive work against the Soviet state."

Shortly before the Tass announcement, an anonymous caller telephoned The Associated Press to say Sakharov had been arrested.

building on Moscow's busy Ring road.

Moscow residents walked swiftly past the big yellow apartment building and glanced curiously at the uniformed police guarding the door.

Sakharov, 58, won the Peace Prize in 1975, but was not allowed to go to Oslo to collect it. His wife, then an eye patient in Italy, went and received the prize for him.

Amnesty International, the London-based human rights organization which won the Nobel Peace Prize in 1976, said recently it had counted more than 40 Soviet dissidents arrested by Kremlin officials since last September.

Dear Dr. Solomon: Do the materials out of which a home is constructed make any difference in the amount of natural radiation to which residents are exposed? For example, is a brick house safer than one of wood? — Mr. J.J.

Sakharov has said he and his wife have often been subjected to anonymous threats, house searches, obscene and cruel mail campaigns and other harassment.

A year ago, Sakharov announced he had received a series of threats that a "terrorist attack" would be carried out against him. Earlier he reported his house had

been searched while he was away.

In an interview with The Associated Press last year, Sakharov said he had become discouraged after his years of battling the Soviet security police.

Sakharov said his work as a physicist probably had suffered most because of his dissident work.

Later the uniformed police barred the entrance to the Sakharov building and explained that the authorities were searching an apartment, but that it was not Sakharov's. They would say nothing more.

Police had put up temporary no parking signs in front of the Sakharov

building on Moscow's busy Ring road.

Moscow residents walked swiftly past the big yellow apartment building and glanced curiously at the uniformed police guarding the door.

Sakharov, 58, won the Peace Prize in 1975, but was not allowed to go to Oslo to collect it. His wife, then an eye patient in Italy, went and received the prize for him.

LEE YOUTH CENTER CHATTER

Get ready to celebrate love; Valentine's Day soon, Rebs

Say Rebs, it's that time of the year again when you get to choose a sweetheart for Valentine's Day, so keep dreaming until your heart is so full that it bursts with candy and love.

If you didn't come see our might Rebel roundballers take on those puny pansey Panthers from Permian, you missed a good game. That's OK Rebs, next time it'll be our gym in our territory, and they won't stand a chance! Tonight our sure-shooters take on the task of egging the Eagles from Abilene, and then EVERYBODY come to Chapparral Center to see our Rebs take the powerless pups from Midland High. Action gets under way at 8:00. See ya then.

Dear Dr. Solomon: Do the materials out of which a home is constructed make any difference in the amount of natural radiation to which residents are exposed? For example, is a brick house safer than one of wood? — Mr. J.J.

Dear Mr. J.: A house constructed of brick is no safer than one made of wood in protecting against natural radiation. In fact, brick itself contains small amounts of natural radioactive materials that emit low-level radiation.

Dear Dr. Solomon: What are the so-called "pep pills?" Are they known by any other name? — Fred

Dear Fred: Pep pills — also called uppers — are drugs that stimulate the central nervous system, producing a temporary feeling of alertness and well-being. The stimulants include cocaine and amphetamines, among others. They are used to fight fatigue and to combat mild cases of depression, as well as to curb the appetite. Unfortunately, they are also subject to widespread abuse.

Dear Dr. Solomon: My husband has been on medication for several months because he is seriously depressed. It seemed to help him at the beginning, but lately he has been getting worse. His doctor is recommending shock treatment, and the idea frightens me. How does it work? Isn't it dangerous? — Mrs. T.M.M.

Dear Mrs. M.: I assume that your husband's physician is recommending electroconvulsive therapy, or ECT. The procedure involves attaching electrodes to the patient's head and inducing a grand mal seizure by electrical stimulation of the brain.

Our fighting female roundballers continued their winning streak by knocking off Permian to capture the first half title of the basketball race. Way to go, girls! Thursday night, they will keep up their winning ways and take on Midland High at Chap Center. Everybody come and watch your chumps stomp the Bulldogs!

Dear Dr. Solomon: My husband has been on medication for several months because he is seriously depressed. It seemed to help him at the beginning, but lately he has been getting worse. His doctor is recommending shock treatment, and the idea frightens me. How does it work? Isn't it dangerous? — Mrs. T.M.M.

Dear Mrs. M.: I assume that your husband's physician is recommending electroconvulsive therapy, or ECT. The procedure involves attaching electrodes to the patient's head and inducing a grand mal seizure by electrical stimulation of the brain.

Dear Mrs. M.: I assume that your husband's physician is recommending electroconvulsive therapy, or ECT. The procedure involves attaching electrodes to the patient's head and inducing a grand mal seizure by electrical stimulation of the brain.

The dance Friday night after the game was so much fun. Too bad if you missed it! Everybody rocked and rolled until 12:00 and then had to say

Dear Dr. Solomon: My husband has been on medication for several months because he is seriously depressed. It seemed to help him at the beginning, but lately he has been getting worse. His doctor is recommending shock treatment, and the idea frightens me. How does it work? Isn't it dangerous? — Mrs. T.M.M.

Dear Mrs. M.: I assume that your husband's physician is recommending electroconvulsive therapy, or ECT. The procedure involves attaching electrodes to the patient's head and inducing a grand mal seizure by electrical stimulation of the brain.

Dear Dr. Solomon: My husband has been on medication for several months because he is seriously depressed. It seemed to help him at the beginning, but lately he has been getting worse. His doctor is recommending shock treatment, and the idea frightens me. How does it work? Isn't it dangerous? — Mrs. T.M.M.

Jaycees will honor outstanding youngster

Midland's "Outstanding Young Man" will be honored Wednesday evening during the Midland Jaycees' annual Distinguished Service Awards banquet in the Petroleum Club.

The banquet is scheduled to get under way at 7:30 p.m. and featured speaker will be Gerald E. Mann, a nationally known minister, syndicated columnist and author from Austin.

Dear Dr. Solomon: My husband has been on medication for several months because he is seriously depressed. It seemed to help him at the beginning, but lately he has been getting worse. His doctor is recommending shock treatment, and the idea frightens me. How does it work? Isn't it dangerous? — Mrs. T.M.M.

Dear Mrs. M.: I assume that your husband's physician is recommending electroconvulsive therapy, or ECT. The procedure involves attaching electrodes to the patient's head and inducing a grand mal seizure by electrical stimulation of the brain.

DR. NEIL SOLOMON

How do materials differ in radiation?

Dear Dr. Solomon: Do the materials out of which a home is constructed make any difference in the amount of natural radiation to which residents are exposed? For example, is a brick house safer than one of wood? — Mr. J.J.

Dear Mr. J.: A house constructed of brick is no safer than one made of wood in protecting against natural radiation. In fact, brick itself contains small amounts of natural radioactive materials that emit low-level radiation.

Dear Dr. Solomon: My husband has been on medication for several months because he is seriously depressed. It seemed to help him at the beginning, but lately he has been getting worse. His doctor is recommending shock treatment, and the idea frightens me. How does it work? Isn't it dangerous? — Mrs. T.M.M.

Getty Oil opens deep gas area

Getty Oil Co. of Midland No. 1 Glenn Brunson has opened an ultra-deep gas area in Loving County, 24 northeast of Mentone.

The discovery, completed through perforations opposite the Fusselman from 21,958 to 22,242 feet, potential for a calculated absolute open flow of 12,300,000 cubic feet of gas per day.

The pay was acidized with 15,000 gallons. Getty drilled the project to 22,500 feet and plugged back to 22,325 feet for completion. Five-inch casing is cemented at 11,497 feet.

Getty is drilling a 5/8-mile northeast stepout to the discovery. The project, No. 1-12-26 Glenn Brunson, also is scheduled to 22,500 feet. It was making hole below 10,960 feet on last report.

Another 22,500-foot project, Getty No. 1-25-76 Tom Lineberry, has been staked 5/8 mile west of the deep strike.

The following tops were picked on ground elevation of 3,249.9 feet; Cherry Canyon marker, 6,524 feet; Atoka lime, 15,470 feet; Mississippian lime, 18,514 feet and Fusselman, 20,030 feet.

Location is 1,047.5 feet from north and 3,505.2 feet from east lines of section 13, block C-26, PSL survey, 24 miles northeast of Mentone.

PECOS TESTER

Furry Operating Account of Monahan staked a 2,500-foot wildcat in Pecos County, 3/8 mile south of a recently staked 2,500-foot wildcat by the same firm, 5/8 mile north of production in the Massey (1000) field, eight miles south of Grandfalls.

The No. 2 Bonebreak Estate is located 2,173 feet from north and 1,915 feet from east lines of section 111, block 8, H&GN survey. Ground elevation is 2,525 feet.

HOWARD STRIKE FINALS

Marshall R. Young Oil Co. of Midland has finalized a Strawn oil discovery in Howard County, surrounded by production in the Moore field, four miles southwest of Big Spring.

The firm's No. 1 Willcox and others finalized for a 24-hour pumping potential of 39 barrels of 39-gravity oil and two barrels of water, through perforations from 8,507 to 9,375 feet, which was acidized with 8,500 gallons. Gas-liquid ratio is 990-1.

Scheduled to 10,500 feet, operator drilled to 10,446 feet and set 4.5-inch casing at 9,665 feet. Plugged back depth is 9,410 feet.

On ground elevation of 2,507 feet, operator picked the

following tops; Dean, 7,130 feet; Wolfcamp, 7,295 feet; Strawn, 9,460 feet; Atoka, 9,645 feet; Mississippian, 9,822 feet; Fusselman, 10,170 feet and Ellenburger, 10,368 feet.

Location is 475 from south and 2,186 from west lines of section 20, block 33, T-1-S, T&P survey.

ANDREWS GAS WELL

The Superior Oil Co. of Midland has finalized the No. 3-12 F University, 1/2 mile northeast of production in the Block 12 (Yates) field of Andrews County, 20 miles west of Andrews.

Operator reported a calculated absolute open flow of 65,000 cubic feet of gas per day, through perforations from 2,829 to 3,005 feet, which was acidized with 1,000 gallons.

Drilled to 10,265 feet, it was plugged back to 4,233 feet.

Location is 590 from north and 1,775 from west lines of section 26, block 12, University Land survey.

RUNNELS WILDCATS

Cambrian Oil Inc. of Odessa will drill two 4,900-foot wildcats, four miles northeast of Winters.

The No. 1 Lucy is 1/2 mile northeast of the depleted Capps lime opener, 3/4 mile north of the Gardner opener of the Beth field in Runnels County.

Location is 4,319 from south and 1,087 from east lines of James B. Shaw survey No. 540.

The No. 2 Lucy is 1,200 feet southeast of the No. 1 Lucy, 3,291 from south and 467 from east lines of James B. Shaw survey No. 540.

Lynn Gillespie of Abilene will attempt to re-open Caddo oil production in the Winters field, with the scheduling of two 4,600-foot wildcats in the vicinity of the Capps lime re-opener of the same field, three miles southeast of Winters.

The No. 2 Gerstenberg is 983 feet from the Capps opener, 5,474 from south and 350 from west lines of Elish Mather No. 535.

The No. 1 Hasse is 1,550 feet northeast of the Capps opener, 6,408 from south and 400 from second most easterly west line of Elish Mather survey No. 535.

Jack Carson of Austin will drill the No. 1 Halfmann as a 4,600-foot wildcat, one location southwest of depleted oil production in the Ballinger field, 2.5 miles southwest of Hatcher.

Wellsite is 467 from south and 1,172 from west lines of ETRR survey No. 164. Ground elevation is 1,734 feet.

Journal predicts continued increases in oil, gas work

TULSA, Okla. — U.S. operators set a modern-day drilling mark in 1979, and they will improve on that performance still further in 1980, according to a forecast to be published in the Oil & Gas Journal Jan. 28.

Industry plans to complete 53,782 wells this year, the magazine will say in its annual Forecast/Review special issue. That will be the largest number since 1957 and only 4,378 short of the all-time record set in 1956.

The 1980 project is for an increase of 3,800 wells or 7.6 percent above last year.

Total completions for 1979 are estimated at 49,982, an increase of 3

should be greater encouragement to drill for natural gas — with deep gas (below 15,000 feet) at free-market prices, controls on other categories under gradual phaseout, and with the gas-price certification process now settled down to something near routine. Furthermore, the gas surplus "bubble" has just about disappeared, giving producers a ready market for any new gas developed.

Other main points in the OGI drilling forecast are:

—Record footage of 264,289,000 feet, surpassing the 243,383,000 feet drilled in 1979. Last year's effort broke the old record of 233,087,055 feet set in 1956.

—A sharp upturn in wildcatting to 11,690 exploratory holes. That is an increase of 1,145 wildcats or 10.86 percent from the 10,545 estimated for 1979.

—An increase in average well depth to 4,914 feet compared to 4,869 feet last year, signaling the fifth consecutive year of deeper drilling.

—A boom drilling year by the top 20 U.S. majors, whose increased activity will account for most of the increase in completions and footage. The majors plan to drill 12,051 wells, up 3,052 from 1979, accounting for 22.4 percent of all wells programmed by the industry this year.

—Another active year for independents — especially the larger ones. Independents as a whole drilled 82 percent of U.S. wells last year, in line with the trend in modern times. The

larger independents, according to the Journal survey, will step up their drilling pace 47 percent — planning 2,649 wells this year compared with 1,804 in 1979 for this operator group composed of firms which will drill 50 or more wells this year.

—Another record for Canadian drilling, with completions up 3.4 percent to 7,966 wells and footage up 3.8 percent to 29,955 million feet.

Nearly every state and district on the map can expect drilling increases in 1980, the journal says.

Industry plans to drill 17,209 wells in Texas, an increase of 1,007. Oklahoma, the second most active state, plans 6,306, up 439 wells. Louisiana plans 4,621 wells, up 497, to rank third.

Spurred by decontrol of heavy-oil prices, drilling in California will surge from 2,096 in 1979 to 2,647 wells this year. Old fields like Belridge will see sharply stepped up development.

Alaska also is targeted for a major drilling gain, most of it in the form of development drilling in Prudhoe Bay and Kuparuk fields. Industry plans 170 wells in Alaska this year, more than double the 80 completed in 1979.

The Rocky Mountain province continues to expand exploratory development drilling. Most of the important wildcats will be sunk along the Overthrust Belt and Williston Basin.

In the Southeast, a surge of drilling in the Black Warrior Basin will boost completions in northwest Alabama and northeast Mississippi.

ENERGY OIL & GAS

percent over 1978 and just 603 wells higher than the Journal's year-ago prediction. This sixth consecutive annual increase in completions was achieved in spite of a 3.6 percent decline in rotary rig activity.

The figures include successful oil and gas wells, dry holes and service wells.

Rotary rig activity, based on the Hughes Tool Co. tabulation, averaged 2,177 units in 1979, down 82 rigs from the 1978 average of 2,259.

However, increased efficiency enabled contractors to drill more wells with fewer rigs last year. Hughes expects rotary rig activity to average at least 2,310 and perhaps as high as 2,428 rigs this year, depending on the level of crude oil excise tax finally adopted by Congress.

After a deep first-half slump in 1979, the rig count surged to 2,506 by year-end, 12.9 percent above the previous year. As 1980 began, there was strong demand for rigs of every depth rating, and this condition is expected to persist throughout the year.

The pending excise tax, now being debated by a conference committee considering differing versions passed by the House and Senate, will take away a large part of the higher price incentive as price controls are removed from crude oil. But the remaining incentive will still support expanded drilling for oil, the Journal says.

Also, the magazine adds, there

MGF reports good oil flow

MGF Oil Corp. announced it has successfully tested an exploratory well located in Chambers County.

The well, No. 1 M.D. Mayes, was drilled to 11,353 feet and plugged back to 10,985 feet. Perforations were made between 9,229 and 9,238 feet in the Frio No. 2 sands.

On an eight-hour test through a 16/64-inch choke, the well flowed at 43 barrels of oil per day and 115,000 cubic feet of gas per day. The well made no water and had a shut-in pressure of 900 pounds per square inch. The flowing tubing pressure was 715 pounds per square inch.

R.O. "Jack" Major, president of MGF, said the company's 1979 public limited partnership owns a 50 percent working interest in the well. MGF Oil Corp. has an approximate 21.2 percent net revenue interest through the partnership before payout and a 14.1 percent revenue interest after payout. The prospect is located on 707 acre lease block.

Other working interest owners are The Boston Co. of Texas, Moore Oil & Gas Ventures, J.G. Heid and L.A. Keubler.

Terrell gets wildcat test

Sioux Natural Gas Corp. of Houston will drill the No. 1 Ingham Farms as a 10,500-foot gas wildcat in Terrell County, 7/8 mile southeast of a 10,700-foot failure and two and five-eighths miles northeast of production in the Mesa Grande (Leonard) field, 9.5 miles southeast of Sheffield.

Location is 467 from south and 3,575 from most westerly west lines of section 21, block 1, H&GN survey, abstract 614.

Imports can be halted

CHICAGO, Ill. — The United States is capable of expanding domestic energy production to the point where it could eliminate oil imports from the Eastern Hemisphere within 20 years, the chief economist of Standard Oil Co. said last week.

This goal, said Theodore R. Eck in a presentation to the Investment Analysts Society of Chicago, "presumes that the U.S. Congress will cease pointless debates on how oil revenues should be divided and, instead, allows the private sector to make a maximum commitment of money and manpower to boosting domestic energy production."

The recent Soviet invasion of Afghanistan "has accomplished in a few days what the oil industry has been unable to achieve in many years: to focus American public opinion on the insecurity of oil supplies originating in Persian Gulf area," he said. "Hopefully, when Congress returns to Washington, its actions will reflect this shift in focus."
