Mexican Gov. Enrique Cardenas Gonzales, sec ond from left, and his wife, Berta, left, of the Mexican border state of Tamulipas with Texas

Gov. Bill Clements and his wife, Rita, during ceremonies in the Texas Senate Chamber in Austin Wednesday (AP Laserphoto)

Gov. Clements announces Mexican vegetable deal

AUSTIN (AP) - Gov. Bill Clements has topped off a state visit with the governor of Tamaulipas by announcing exchange agreements that will allow Mexican vegetables to come into Texas

Gov. Enrique Cardenas Gonzalez was at Clements' side. as he made the announcement. Cardenas Gonzalez was the third governor of a Mexican state bordering Texas to get the red carpet treatment from Clements

Clements said he did not expect the vegetable agree ment to precipitate a repeat of a 1978 riot at the international bridge by farmers protesting imports of Mexican

'Most of that rumpus (on the bridge) was caused by farmers (from northern states) who were down here to get out of the cold," Clements said

He predicted there would be no "dumping" of produce at low prices by Mexican farmers. Dumping undermines United States farm prices while giving consumers cheaper groceries

I would rather let the free market place work. Clements said

Clements also announced that exchanges of students teachers and technical information between Tamaulipas

and Texas would begin immediatel: Clements and Cardenas Gonzales also talked of the value of "twin plants" in border cities. Many firms have set up operations in adjacent cities along the Rio-

The Texas governor said labor organizations should not object to twin plants because they "provide jobs and well being and prosperity on both sides of the river." He said he did not care if those jobs in the Mexican cities resulted from plant closings elsewhere in the United

I'm not really concerned about what some of these cities in other states have problems about. That's their

problem." he said. "My decisions are based on what's right for Texas Cardenas Gonzalez presented Clements a large drop of oil encased in plastic - from the runaway Ixtoc I well in the Guif of Campeche. The blowout, capped only this week, has been a source of some political embarassment

to Clements because the well was drilled from an offshore

platform leased from SEDCO. Inc., which he founded A House committee has refused to blame anyone for the worst oil spill in history but recommends roughnecks sign up for special college courses in how to avoid blow outs

At a luncheon, Cardenas Gonzalez was given 19th entury city documents from the Mexican border town of Camargo. The documents "were taken by unknown elements and only recently came into the hands of Texas. state archives officials," according to a release.

Cardenas Gonzalez praised Clements for his support of Mexico during the Ixtoc oil spill and said the runaway well has been 'totally controlled

Iranian runoff election delayed

By The Associated Press

Iran's foreign minister says the runoff elections for the new Parliament have been postponed as expected, indicating delay until the summer at least in the legislature's decision on whether the American hostages should be released.

Meanwhile, a member of the B.N. panel probing Iran's charges against the shah, Adib Daoudi of Syria, told the Beirut newspaper Al Sharq the shah's "escape" to Egypt "will doubtless have adverse effects on the case of the American hostages.

He suggested that Iranian leaders may fear that the United States is conspiring with the shah and his followers to overthrow the revolutionary regime in an Egypt-based plot.

Famed American surgeon Dr. Mi chael DeBakey was in Cairo examining the exiled Shah Mohammad Reza Pahlavi preliminary to an operation for removal of his cancerous spleen.

Iranian Foreign Minister Sadegh Ghotbzadeh announced after a meet ing of the ruling Revolutionary Council Wednesday night that it delayed the second-round election, originally scheduled for April 4, to permit investigation of charges of vote fraud in the first round of balloting March 14. He said the investigating commission began work Tuesday apd had a month, until April 25, to finish.

With this timetable, the voting for legislators not elected on the first ballot probably would not be held until some time in May. And this could be delayed more if the results of the first round were thrown out in some districts and new elections

In view of the slow counting of votes that followed the March election, the results of a May ballot are not likely to be known before June. Leaders of the revolutionary regime said earlier that it would take some weeks for the Majlis, or Parliament, to get organized and dispose of pressing domestic matters before it got around to the hostages

Expectations that the Mailis will determine what happens to the Americans are based on a statement by Ayatollah Ruhollah Khomeini, the leader of the revolutionary regime, that it should decide their fate. But there is no assurance that Khomeini will not change his mind. And at last report, about half the seats were being won by the hard-line Islamic Republican Party, which opposes releasing the Americans unless the

shah and his fortune are returned to

U.N. commission member Daoudi told the Beirut newspaper he believes any decision on the hostages will have to await the convening of the Parliament. But he said the five-man U.N. panel "will return to Tehran to complete its mission, when circumstances permit."

The leader of the IRP, Ayatollah Mohammad Beheshti, who is justice minister and first secretary of the Revolutionary Council, said on Wednesday the majority of the council feels if the shah is not returned, the hostages should be tried. But Ghotbzadeh told reporters "no trial will be held." He said the same thing on Monday after another revolutionary leader, Ayatollah Sadegh Khalkhali, said some of the captive Americans should be tried as spies because the shah was allowed to leave Panama

and escape extradition proceedings.

Today was the 145th day of confinement for the 50 Americans held by militants in the U.S. Embassy and three in the Iranian Foreign Min-

DeBakey, who was to have operated on the shah in Panama until Panamanian doctors objected, arrived in Cairo Wednesday night with a full surgical team, seven boxes labeled human blood and several larger boxes believed to contain surgical equipment.

He examined the 60-year-old Pahlavi at the Maadi Military Hospital overlooking the Nile, where he has been since arriving in Cairo Monday, and a brief medical bulletin was issued afterward saying the shah's 104degree fever had dropped slightly. No date for surgery for announced, although it is expected to take place

Big banks tighten consumer credit

NEW YORK (AP) — The squeeze on consumer borrowing has tightened once again with actions by Bank of America and Citibank — the nation's two biggest banks - to make credit card use more expensive and loans harder to get.

Finance companies, retailers and other banks also are instituting stricter credit policies to meet new Federal Reserve requirements to hold down loan growth and President Carter's program to cool inflation by reducing consumer spending.

Beneficial Corp., the nation's largest finance company with \$4.3 billion in loans outstanding, plans to reduce its loans by 5 percent this year. Sears, Roebuck and Co., with 23 million charge customers, has boosted its minimum monthly payment on charge accounts from \$8 to \$10.

As the largest bank issuer of credit cards with 8.3 million cardholders, the San Francisco-based Bank of America said Wednesday it will boost its minimum monthly payment requirements on Visa and MasterCard accounts and stiffen criteria for new card applicants.

Credit card customers with the country's largest bank will have to pay 6 percent of each month's unpaid balance or \$25 — whichever is greater instead of the current minimum of

4 percent or \$10. Meanwhile, Citicorp announced plans to move its credit card operations from New York to Sioux Falls, S.D., so it can charge a higher interest rate on its 5.8 million credit

Citicorp, whose chief subsidiary Citibank is one of the country's biggest consumer lenders, said it is losing money under a New York usury limit

ROUSTIN

prohibiting interest rates of greater than 18 percent on credit card balances of less than \$500 and 12 percent on greater balances. Starting May 1, South Dakota's usury limits will be 18 percent on the first \$500 charge balance and 24 percent on greater amounts.

The company has no specific target date for the move, although it could occur as soon as July, a spokesman said. He added the company still is hoping the New York usury limit will be lifted soon.

Two seeking school board seat

Former school principal faces non-educator

Worthy Gilbert Jr.

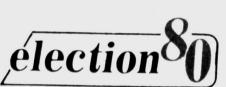

Bill Jackson

EDITOR'S NOTE: This is the last other side of the fence.' of a two-part series examining four candidates' views of the issues in the April 5 election for Places 1 and 2 on the Midland Independent School District Board of Trustees.

> By DAVID CAMPBELL Staff Writer

The race for Place 2 on the Midland Independent School District Board of Trustees is between a former school

principal and a self-proclaimed 'grass roots' person.

Bill Jackson, a Midland Realtor, says his experience as a school principal has provided him with an insight to the school system which is needed on the school board.

Also, he explained, as a businessman, he is able to see "what is on the

Worthy Gilbert Jr., a Texaco employee, explains his greatest asset is that he "is not an educator, not a businessman, not a politician.

I consider myself a grass roots person who can appeal to the wishes of the people," he said

The school district's highest priority, according to Jackson, is the curriculum The school board needs to "evalu-

ate where we are in some programs, where we need to go and how we are going to get there," Jackson said.

Look at the basics - reading, math, science — and let's evaluate and see how we are doing in comparison to other school districts," the former principal said.

If there is nothing wrong with the program, then "let's pat ourselves on the back," he said.

However, should a program have some faults, then they should be corrected, Jackson added.

His opponent contended a major emphasis should be placed on equa-

Midlanders are urged to complete and return census questionnaires

By BILL MODISETT Staff Writer

Noting that Census Day 1980 is rapidly approaching, Mayor Ernest Angelo Jr. this Wednesday urged all Midland residents to complete and return census questionnaires. He also issued a plea for help from the city's residents in this year's decennial enumeration.

During a news conference in the Chamber of Commerce office, the mayor appealed to residents for help in this year's census because of their "civic responsibility." Even those residents who do not need the work should participate in this year's enuimportance in getting an accurate

According to Jerry Butler of Lubbock, field operations assistant for employment of the Lubbock regional census office, only about 25 census workers from the Midland-Odessa area have been found. About 52 workers will be needed for the census in

Midland, she said. Ms. Butler said she needs a pool of 200 census workers for the Midland-Odessa area. But with the census follow-up beginning in about two weeks, she will be satisfied with about

100 workers 'The turnover rate is unbeliev-

meration, he said, because of the able," Ms. Butler said, and noted that a census worker's job often is "mentally frustrating.

She blamed Midland's low unemployment rate for the difficulty in finding census workers here. Ms. Butler particularly urged hou-

sewives in Midland to take the required test for becoming a census worker and to help with this year's enumeration. Women's organizations also might

want to get involved in the census as a group project, she added. According to Ms. Butler, a similar

problem was encountered in Midland during the 1970 census. Training for census workers is

scheduled to get under way here April 6 and the workers will begin on April 14 to contact households that have not returned their census forms.

Census forms will be mailed Friday to Midland residents. The questionnaires will include postage-paid envelopes so they may be returned. The basic questionnaire will include 19 questions dealing with items such as age, sex, number in family and edu-

households will receive a longer census version containing about 65 ques-

About one in five randomly selected

The completed census questionnaires should be mailed back to the census office by April 1 or as soon as possible, Ms. Butler said.

Federal law requires that all persons answer the census. All information gathered through the census is confidential and used only by the Census Bureau.

Any Midlander who does not receive a census form in the mail should contact the Lubbock regional census office, Ms. Butler said.

In the meantime, the Census Bureau will start testing for census workers every other day in Midland until enough workers are found, Ms. Butler said.

"This is an extremely important day to all of us," Angelo said, referring to Census Day April 1.

Many people do not realize the importance of attaining an accurate count in the census. Voter districts at all levels are established on the basis of the census as are many state and federal grants, both of which can play a vital role in the future growth

of the community," Angelo said.

The mayor said that understanding the census-taking process is helpful in realizing the need for Midlanders to answer the census and to become

census workers. 'This is the first time the bureau has used the mail-out question-

Budget amendment limit sought

Democratic leaders, concerned that debate over a balanced 1981 federal budget could degenerate into an endless battle to restore money, want to restrict the number of amendments that can be offered

House Speaker Thomas P. O'Neill Jr said Wednesday he hoped the House Rules Committee would limit amendments to several key issues and to major package proposals from Republicans and leading liberal Dem-

The House Budget Committee has proposed a budget for the 12 months starting Oct. 1 that calls for \$611.8 billion in spending and a \$2 billion surplus If approved by Congress, it would be the first balanced federal budget in 12 years

The budget proposal was to go before the Rules Committee today.

When considering the budget in the past, the House has faced dozens of amendments aimed at increasing or decreasing spending for a wide array of programs. The debate sometimes has raged for weeks

House leaders are concerned that with deeper spending cuts being proposed this year, the debate could be even more protracted unless restrictions on amendments are imposed.

The Budget Committee is recommending \$16.5 billion in spending cuts below the 1981 budget President Carter submitted in January That

Unemployment figures show slight drop during February

and auditors

Unemployment in Midland dropped slightly during February, according to figures released by the Texas Employment Commission.

Midland reported a 4 percent unemployment rate for February, as compared to 4.3 percent in January. While 2,050 persons reported they were unable to find a job in January, the figure dropped to 1,860 in February.

Despite the drop, there are fewer people reported working in the county, according to a TEC spokesman. While 45,180 had jobs in January. only 44,860 were employed in Febru-

The 1980 figure for February is higher at 4 percent than what was reported for the same month a year ago — 3.5 percent unemployment. However, there were fewer people

employed a year ago — 45,101. Midland's unemployment figure ties for sixth place with Lubbock. Other cities ranking higher were Abilene and Austin, 3.3 percent; San Angelo, 3.4 percent; Wichita Falls and Bryan-College Station, 3.3 percent; Houston, 3.9 percent; and Odes-

sa, 3.7 percent. For the same period, the unemployment rate for Texas was 5.2 percent, and the national level remained at 6.8

The Midland TEC office reported openings for drafting technicians, building maintenance engineers,

grammers, lathe operators, oil field sales representatives, secretaries

Other current job openings are for oil-gas drafter, registered nurse, secretary, auto mechanic, machinist and combination welder

The largest gain in jobs came in the petroleum area as workers were added in the increasing search for energy, said a TEC spokesman.

The Employment Commission reported it is sponsoring the Workarama program this summer for students aged 14-21. Employers are being asked to list their summer openings with TEC as soon as possi-

Gilbert noted discipline depends on how the public defines the issue.

In relation to improvements at Midland High School, Gilbert suggested keeping Midland High School where it is presently located and acquiring the land around it.

Jackson's reaction to improved facilities at MHS is "if it is for the improvement of learning, I would be

TRC closes Hemphill, Texas, schools

HEMPHILL, Texas (AP) - Students at Hemphill schools got a threeday early start on their spring vacation this year when the Texas Railroad Commission found excessive gas leaks on the campus and ordered classes closed.

A TRC investigator ordered the shut-down Wednesday afternoon after his inspection found a "significant" gas leak less than 100 feet from a band building. Students were evacuated from that building and schools closed

the next day. 'All of our schools are on one campus and all of them have been closed." said Hemphill school Superintendent Douglas Butler. He said spring vacations were scheduled to begin Monday, and the gas line should be repaired by the time classes re-

sume April 7. "I would certainly say it (the closing) was not anticipated," Butler said. "They still do not feel as if there are any dangerous situations in any of our schools."

He said there was no odor of gas on the campus Wednesday.

The city has battled a continuing leak problem for about five years, when the TRC began corresponding with city officials on the need to comply with certain state regulations, according to Mayor Carl Foster.

City officials have said about 70 percent of Hemphill's recent gas output is unaccounted for.

Foster said he now has asked the Railroad Commission to send someone to "evaluate our system for us." You hate to hear bad news like this," Foster said, "But if we had waited, the news may have been much worse."

Midlanders are urged to return census forms

(Continued from Page 1A)

naire."With a shortage of census workers in Midland, it is most important that people fill out and return the questionnaire to avoid requiring an enumerator visit the residence in person," Angelo said.

Ms. Butler noted that census employees work 40 hours per week and are paid a rate exceeding the minimum wage. They also are being reimbursed for all mileage traveled to get the census.

Both Ms. Butler and Angelo urged anyone interested in helping with the census in Midland to call or go by the Texas Employment Commission office, 501 N. Loraine St., or to contact Patsy Phillips at 697-3368. They also may contact the Lubbock District Census Office by telephoning (806) 762-7511.

Prospective census workers must pass a timed written test and participate in a short training course.

Primary voting shows public's patience wearing thin

By BARRY SCHWEID **Associated Press Writer**

WASHINGTON (AP) - President Carter's twin setbacks in New York and Connecticut seem to signal growing voter frustration with his foreign policy, particularly his handling of the hostage crisis in Iran.

Although there likely was no single, overriding factor behind Sen. Edward M. Kennedy's upset of Carter in the New York and Connecticut primaries, a perception of Carter as a president confounded by foreign affairs may have hurt him badly in the two, generally liberal eastern states.

Inflation must have been a factor as

Nonetheless, it has been nearly five months since U.S. Embassy personnel were taken hostage by militant Islamic students in Tehran, and no

An analysis

breakthrough was imminent as

voters went to the polls. Carter has counseled patience, but the electoral reverses evidently demonstrate that patience is wearing thin. The president had counted on mediation of the crisis by the United Nations, but that strategy failed.

Even now, his hopes rest largely on election of a new Iranian parliament. But there's no certainty that will mean the Tehran government could - or would -- crack down on the

militants holding the Americans. What also must be factored into any reading of New York and Connecticut is the ill-fated Carter administration vote in the United Nations Security Council in favor of a resolution condemning Israeli settlements in occupied Arab territories

The vote angered Jews. Carter's subsequent disavowal of the March 1 vote did not cool the fires of resentment in heavily Jewish New

Even if the rush to Kennedy by

Jews were discounted, Carter would very likely have lost both states. Carter campaign manager Robert Strauss called the double loss "a dip in the road" toward the Democratic

presidential nomination. Strauss' expressed view didn't seem to conceal concerns within the Carter administration that the long stalemate in Iran and other soft foreign spots, including Afghanistan, could cost the president dearly at the

Hardly a word was uttered on the New York campaign trail about Carter's inability to pressure the Soviets into removing their occupation forces from Afghanistan. The controversy over the United Nations vote on the Israeli resolution dominated the headlines.

But over the long haul, the nagging crisis in Iran may prove most trouble-

some for the president.
In the World Court, for instance, State Department legal adviser Roberts Owen observed gloomily last week that "no one in this courtroom has any way of knowing whether the Avatollah Khomeini will continue to hold the hostages in captivity for a month, or for a year or for a dec-

Extension of the Iranian crisis by several more weeks could spell political trouble for Carter in the remaining primaries ahead.

In fact, an Associated Press-NBC News poll said that for the first time since the Americans were seized last Nov. 4, less than half of the public approves of Carter's handling of the

Increasingly frustrated with the failure of the president's efforts, how-ever, the public also is divided on whether Carter has taken every step possible to free the hostages, the poll

Stocks in the spotlight

Stock market loses

NEW YORK (AP) - The Dow Jones industrial average fell to a new two-year low Wednesday after the stock market staged an unsuccessful attempt to rally. Precious metals stocks

lost ground as gold and silver prices resumed their recent slide. The Dow Jones average of 30 blue chips, up more than 10 points at mid-afternoon,

closed with a 5.71 loss at 762.12. The marked the average's lowest close since it stood at 755.37 on April 4, 1978. In the past six weeks it has plunged 141.72 points, in its sharpest sustained decline since the

bear-market and recession era of 1973-74. Gold prices, which have also been skidding as recession worries have mounted, fell more than \$30 an ounce to just beneath the \$500 level in New York. Silver tumbled more than \$4 to less than \$16

an ounce. Among precious-metals stocks, Homestake Mining was down 11/4 to 421/4 as of the p.m. close in New York; ASA lost 11/2 to 40%; Dome Mines 1 to 58, and Hecla Mining 31/4 to 25 1/4

Investors' generally gloomy mood was evident in the performance of Boeing stock, which fell 5 to 51% even though the company was chosen Tuesday as the prime contractor for the cruise missile program.

TODAY'S ANSWER

Now she likes letters

those qualities are difficult to rouse these days.

employ their bargaining skills.

MADISON, Wis. (AP) — Lori Monk never liked reading anyone else's mail. But that was before she was hired to answer the thousands of letters from all over the world for Olympic speed skaters Eric and Beth Heiden.

She says about 15,000 letters, hand-made gifts and news clippings have arrived here for the brother and sister since the Winter Games ended last month. The mail is running about even for Eric and Beth, even though she won one bronze medal while he captured an unprecedented five golds. "After reading these letters, it makes me really

proud of Americans and the way they responded, Ms. Monk said in her office, known as "The Heide Room" of the Madison Chamber of Commerce.

Many of the letters are simply addressed "Eric Heiden, Madison, Wisconsin," and a half dozen or so were delivered with only the words "Eric" or "Beth" scrawled on them.

"No address, no city, no nothing," Ms. Monk marveled. Ms. Monk said Eric and Beth eventually will ge

every piece of mail. "If it was me, I'd save it all and go through it

slowly, over the years. That's probably what they'll do," Ms. Monk said.

Canada's Western provinces revive separatism talk

CALGARY, Alberta (AP) - As in separatism, but a study he did in French-speaking Quebec in the East prepares a referendum on the separatism issue, some Western Canadians are beginning to talk again of going their own way too.

The talk of separation by Canada's Western provinces comes as a result of the loss of last month's elections by the Conservative Party of Joe Clark, a Westerner who had served as prime minister for nine months.

Many people here in oil-rich Alberta said "the West" had lost the election. The Liberals won a majority with 146 seats, but not one west of Winnipeg in Manitoba.

It was not the first time that Albertans had turned their minds to independence. There were rumblings of separation in the mid-1970s, with suggestions of linking with the United States, but the idea drew little sup-

"In the past it has been a knee-jerk reaction." Warren Blackman, an economics professor at the University of Calgary, said in an interview recently. "I think this time it has a greater significance. Never in Alberta history has the province been in this position. It is one of the wealthier provinces. The population has grown. It has all the necessary qualifications for an independent state.

Blackman says he doesn't believe

1974 on the costs of continued confederation with Canada convinced him it would be economically feasible for Alberta to go it alone or form an alliance with the other three Western provinces, Manitoba, Saskatchewan and British Columbia.

Canada is too large and would work better, economically, divided into regions with some sort of regional federation or common-market association, he says.

Western independence caught the interest of many Albertans in 1974, when the Liberal Party of Prime Minister Pierre Elliott Trudeau formed a minority government with only 13 Western seats, mostly from British

A group of Calgarians, upset over the Liberals' oil export tax that subsidized imported oil for Quebec and the Atlantic provinces, formed a looseknit group called the Independent Alberta Association.

The association was momentarily buoyed by the election of separatist Rene Levesque as premier in Quebec, but never did form a political party. Some in Calgary who talk of separation express the belief that Trudeau.

who was re-elected in February, will continue his hard federalist stand and this will mean unfavorable changes for the provinces and the West.

Others, such as Glen Morrison. president of Renn Industries Inc., reject separatism, but agree the time for a strong central government in Ottawa is gone and the West needs more autonomy.

James Richardson, a former Liberal defense minister who quit the party over a disagreement on language policies, says most Western Canadians don't want to separate, "but most people want to express their frustration. They want some strong voice in Ottawa to represent them.'

Central to the separatist argument is the feeling that Westerners pay billions of dollars in taxes to Ottawa, but without representation in the government they have little say in how

the money is spent.

While the Quebec independence movement is based largely on cultural and linguistic matters, the basis of Western discontent seems mainly economic.

Long-standing grievances persist: tariffs and freight rates that appear to encourage manufacturing in central Canada (chiefly Ontario) at the expense of manufacturing in the

Blackman's 1974 study concluded that federal programs for all prov-inces and territories and the oil and gas export taxes that subsidize imported oil cost Alberta \$2 billion a year. The figure today would be much

The study says the West has become a provider of raw materials and energy for central Canada and such a 'colony" system is no longer effi-

A common complaint is that railways charge more for shipping manufactured goods eastward than westward. That and the higher wages paid in Alberta's resource-based economy mean manufacturing here will be non-competitive, says Blackman. And the federal tariff structure forces Westerners to buy goods from central Canada at high prices.

Another Western economist, Kenneth Norrie, says the study was a snowjob."

The University of Alberta econom-

ics professor says it is difficult to prove consistent discrimination by the federal government against the West, but he agrees with most economists that the price of Western oil for sale within Canada is too low at \$14.50 a barrel. The world price of oil now is more than \$30 a barrel.

Tariffs, Norrie says, are meant to protect all Canadian industry and there is nothing to prevent a Western manufacturer, if all other conditions

were favorable, from setting up shop

to compete with central Canada. There is no federal legislation compelling railways to favor central Canada, he says, but adds the West faces the disadvantage of being far from the large central Canadian market.

\$220,000 bequeathed to suspect

WHITE PLAINS, N.Y. (AP) - The developer of the Scarsdale diet left the woman charged in his shooting death \$220, 000 and willed another \$200,000 to a nurse who was reportedly the third member of a love trian-

Dr. Herman Tarnower, 69, was slain March 10, and Jean Harris, former headmistress of a posh girls' school, was indicted Tuesday on a charge of second-degree murder in his death.

Tarnower's will, filed Wednesday in Westchester County Surrogate Court, disposed of about \$1 million to family and friends, including \$220, 000 to Mrs. Harris and \$200,000 to Lynne Tryforos.

The doctor, who never married, was a long-time companion of Mrs. Harris. Recently, he had been seeing Mrs. Try-

The 13-page will also set aside \$190,000 for the college educations of Mrs. Tryforos' two children. She is divorced.

Committee organized

SECTION]

By TOM RAUM

WASHINGTON (AP) - The Senate ended its jurisdictional disputes on energy issues by creating a new committee, but the House is trying to do the same thing by giving an old committee a new name.

The House voted 300-111 Tuesday against forming a panel similar to the Energy Committee the Senate established five years ago.

Instead, House members decided to keep sending energy bills to the Commerce Committee, where most of them have been going since 1946, and to rename it the Energy and Commerce Committee.

Tuesday's vote was a stinging defeat for activists in the House who have sought for years to consolidate widely scattered energy jurisdiction in a separate, central committee.

"It was self-serving and damaging to the nation's energy future," said Rep. Jerry Patterson, D-Calif., who chaired the six-month, \$700,000 House study that produced the legislation calling for the energy committee.

Chairmen of the committees and subcommittees who would have lost jurisdiction under the reorganization led the battle against the plan.

The reorganization would "waste lots of money and accomplish nothing," said Rep. John Dingell, D-Mich., chairman of the Commerce Committee's energy and power sub-

Field work announced

Fisher-Webb, Inc., of Abilene staked No. 1-35-B Wallace in the IPCO (Strawn lime) field of Kent County, three miles east of Clairemont

Location for the 6,900foot test is 1,980 feet from north and west lines of section 35, block 98, H&TC survey.

The field has three producers, and the new test is a diagonal southeast offset to the southmost well.

Midland line work talked

TULSA, Okla. - Pacific Coast Pipeline Co. of Houston is making preliminary plans to build a 36-inch artery to move 500,000 to 800,000 barrel of crude oil from California to Midland, Texas, according to Jim West, news editor of the "Oil & Gas Journal."

"It's merely a proposal; they're just looking at it," West told The

Reporter-Telegram this morning.

West said the system would be "somewhat similar" to the scrapped Pactex line, which Sohio Petroleum Co. had planned to use to pipe Alaskan crude oil from Long Beach, Calif., to Midland. From Midland, the oil would piped to refineries elsewhere in the nation.

But Sohio, which gained the bulk of environmental clearance to build links in an exisiting line, was blocked in its effort by Long Beach environmentalists, who were apprehensive of potential oil spills polluting the ocean and land.

All Sohio lacked for the go-ahead on the Long Beach-to-Midland project was a permit to built a receiving terminal at the seaport city in Southern

Pacific Coast Pipeline's proposal calls for piping crude oil from a terminal at Bakersfield, which is about 100 miles inland, and moving it via the proposed 36-inch line to Midland.

Senate ready for final ballot in 'windfall' bill

By JIM LUTHER

WASHINGTON (AP) - The Senate is ready for a final vote on a compromise "windfall" tax on the oil industry, a \$227.7 billion measure designed as a cornerstone of President Carter's

energy policy. Senate leaders predicted the bill would pass its last test in Congress today - 11 months after Carter recommended it. That would send it to the president for his signature.

But opponents were assured two final chances of stopping the mea-

-Sen. Henry Bellmon, R-Okla., asked the Senate to send the bill to the Appropriations Committee, which would study how the suggested allocation of the tax revenues - including 60 percent for income tax reductions would affect efforts to hold down federal spending

that the bill be sent to the Finance said. Committee for hearings on how the tax would affect U.S. oil production, especially independent producers.

Passage of either motion would delay final action on the tax, which is due to take effect retroactively to March 1. Defeat of both would bring a final vote immediately.

The bill is a compromise version of the \$294 billion tax Carter recommended last April after deciding to phase out federal price controls on an effort to spur domestic oil production and reduce reliance on imports.

Decontrol will allow U.S. prices to rise to world market levels and cost consumers an estimated \$1 trillion in the 1980s. The tax will take \$227.7 billion of that "windfall" and, after other federal and state taxes are subtracted, will leave the oil industry \$221 billion it would not have had

under continued controls. Opponents of the bill said the tax would cripple the drive for energy independence by taking money the oil

industry could invest in the search for

more energy. Dole, who represents an oil-producing state, told the Senate, "I do believe the oil industry can live with what we've done with this tax."

The Carter administration insisted that without the tax, the public and Congress would demand a return to price controls. Many economists say controls have held U.S. prices so much below world levels that there has been little incentive for Americans to conserve energy.

The tax would be paid by 12,000 oil producers and by hundreds of thousands of people who own lands from which oil is pumped.

Sen. Harry F. Byrd Jr., I-Va., said the \$227.7 billion tax will stimulate additional government spending, rather than additional energy production. "Funneling this money to the government is like giving a spend--Sen. Robert Dole, R-Kan., asked thrift a new set of credit cards," he

> The Senate-House conference committee that worked out the compromise version of the tax recommended that 60 percent of the \$227.7 billion -\$137 billion - be set aside for income tax reductions. But that is not binding. Any tax cut would have to be approved by Congress in separate

An additional 25 percent - \$57 billion — would help lower-income families pay rising energy costs. The re-U.S. crude oil. He began decontrol in maining \$34 billion would be earmarked for energy development and improvements in the transportation

The bill authorizes spending \$3.1 billion next year for energy aid to the poor. It includes \$8.3 billion in business tax incentives for energy conservation and development, and \$600 million for individual incentives, most of which would pay for raising an existing tax credit for home windmills and solar heating systems to

Attached to the bill are two tax changes that have nothing to do with energy. One would allow an income tax exemption of \$200 a year in 1981 and 1982 (\$400 for a couple) for interest and dividends. The other would repeal a 1976 change in inheritance taxes, resulting in lower taxes for heirs who sell inherited property.

Pecos County gains 27 field projects, one wildcat project

27 new field operations from south, 1,320 from last week, 24 of them east, section 2, block 44, scheduled by Marathon Oil Co. in the Yates field of Pecos County, as operators announced intention to drill 198 oil or gas tests in the Permian Basin of West Texas and southeast New Mexico.

The Pecos total helped push Midland District 8's applications last week to 62, including three wild-

Glasscock, Howard drews, 4,400. and Pecos each gained a wildcat test.

District 8-A, headquartered in Abilene, processed applications requesting permission to drill nine wildcats and 32

District 7-C, headquartered in San Angelo, announced 29 wildcat locations and 26 projects in proven field areas. Runnels County gained eight of the wildcats and Crockett and Tom Green each gained 2.
