A Florida guardsman, above, watches as a young girl and a little boy are escorted by an older man in the racially troubled area of Miami Tuesday, while another guardsman, right, is the subject of joking by youngsters in the same area. A feeling of relative calm pervaded the area which had been under intense violence for four days. The death toll resulting from the disturbance stands at 16. (AP Laserphotos)

Inmates charge jail bias

Single cells, smoking among the issues

By KAY HORD-CRITES

Five women inmates in the Midland County Jail claim they are the victims of discrimination at that fa-

In a letter to The Reporter-Telegram signed by the women, they complained of being kept in single cells where there isn't a television and of having no one with whom to play cards.

"We're currently in the single cells, which are also considered to be solitary confinement," they said in the

"I would like to say it has always been my understanding that people were placed in solitary confinement because they were ill, behavior problems, escape risks ... not because

THEY ALSO CHARGED they have less time to use the telephone per week as opposed to prisoners in the

they are females."

And lastly, they protested the nosmoking rule, saying trustees were allowed to smoke in a certain area. and contended that profits from the commissary went to buy cigarettes

Director picked for cancer center

By DAVID CAMPBELL

Midland Memorial Hospital trustees and directors approved Tuesday the selection of a director for the Allison Permain Basin Cancer Therapy Center.

Dr. Alvin Lee Schlichtemeier, a radiation oncologist from Dallas, was the unanimous choice by the two medical governing boards as director of the Midland cancer treatment facili-

Mickey Cappadonna, chairman of the trustees search committee, noted about 15 applicants were interviewed

before the final selection was made. Schlichtemeier, a 36-year-old physician, his wife and two children will not locate in Midland for several months. But he will be closely involved with the center's progress through periodic visits to the center, said Edwin H. Magruder Jr., president of the hospital directors.

on the medical staffs of St. Paul Hospital, Medical City Dallas Hospital and numerous other hospitals in Texas. He is a clinical assistant professor in the Department of Radiology at The University of Texas Southwestern Medical School in Dallas.

He has held other teaching positions at The University of Texas Health Sciences Center in San Antonio and the University of Arizona Health Sciences

The new medical director holds a bachelor of science degree from the University of Nebraska-Lincoln and a medical degree from the University of Nebraska College of Medicine in

After an internal medicine intership at the University of Miami School of Medicine in Miami, Schlichtemeier completed a residency with the University of Florida School of

(See HOSPITAL, Page 4A)

"Money which is profited from (the) inmate commissary is used to

purchase cigarettes for the trustees - I feel this is a gross inequity. If in fact it is so hazardous to smoke on the fifth floor of the Midland County Courthouse — several questions must come to light.

Why is anyone confined in such a hazardous place? Why is any smoking permitted at all? Does Sheriff (Dallas) Smith feel that anyone in jail is so infantile that they are totally incapable of proper behavior?

In replying to the charges Monday, the sheriff said, "The smoking thing is always the big deal. If they just say we're not being allowed to smoke, they know somehow that just won't quite fly. So they usually find some-thing else to start with and the smoking deal is usually mixed in on down a bit.

The no-smoking rule is part of the Texas Commission on Jail Standards regulations, he explained.

"It's a fire hazard — period," said Smith. "There's no smoking."

SMITH ALSO explained about the women being kept in single cells.

Currently, the women, now numbering about seven, have been moved into a tank. They had been in the single cells because the County Jail only averages one or two women prisoners per month.

"The single cells are not solitary confinement," he stressed. "In fact, we have no cells designed as solitary confinement. The single cells are used a great deal simply so that prisoners are not bothered by other prisoners. "They have their own toilets, show-

ers, beds, drinking fountains and table," he said.

According to the inmates' letter, there was a tank for women, but the it was the trustees who were being housed there.

According to Smith, there are no (See WOMEN INMATES, Page 4A)

McDuffie case eyed by U.S. grand jury as rioting subsides MIAMI (AP) — A federal grand jury opens an investigation today into the beating death that triggered Miami's deadliest race riots as President Carter considers a request for funds to heal the city's wounds. Citing three days of "violence, vandalism, arson, may-

hem and wholesale property destruction," Gov. Bob Graham asked the president late Tuesday to declare Dade County a disaster area and send federal recovery funds. Miami authorities reported that relative calm prevailed overnight as more than 50 square miles of the city remained under curfew. There were scattered reports of fires and gunshots early today. More than 3,500 National

Guardsmen continued to patrol troubled neighborhoods. In Tampa, police sealed off an eight-block black neighborhood late Tuesday after a Salvation Army bus carrying children — mostly whites — was pelted by rocks and bottles thrown by roaming youths. There were no serious injuries. Authorities termed the incident, which occurred where sporadic rock-throwing by gangs of blacks was reported Monday night, "nothing disas-

The Miami riot has claimed 15 lives and left 2,500 persons jobless. Property damage was estimated at up to \$100 million. The County Commission designated firehouses as food and clothing collection points for riot

"There's real hunger in the neighborhood," said Ruth Shack, a member of the county governing board. She urged local residents to chip in as they have for the thousands of Cuban refugees who have flooded South

Florida in recent weeks. "You poured your hearts out once and we need you

Rioting erupted Saturday after an all-white jury in Tampa acquitted four white ex-policemen on charges ranging from second-degree murder to evidence tampering in the death of Arthur McDuffie, a black Miami busi-

The U.S. attorney's office ordered the grand jury

investigation to determine whether police violated McDuffie's civil rights when he was fatally beaten Dec. 17. Officers said they used only necessary force to subdue the struggling 33-year-old ex-Marine.

U.S. Attorney General Benjamin Civiletti promised that "all serious allegations involving violations of civil rights and brutality" in South Florida would be investigated.

There is a "feeling of a double standard of justice," Civiletti said after meeting with local officials Tuesday.

There is a need for concrete action to be taken now. Besides the grand jury probe, Civiletti announced the Justice Department would review 14 other cases of alleged police brutality in South Florida for possible civil rights violations. He said extra lawyers and FBI agents will be sent to Miami to help with the investigations.

Meanwhile, Benjamin L. Hooks, executive director of the NAACP, said rising inflation and unemployment could spawn racial disturbances throughout the country. "I would pray and hope and work that there would be no more violence in our cities this summer," Hooks said.

"But when you have these kinds of depressed conditions, you create the classic symptoms for a riot." In Tampa, a Salvation Army bus carrying between 10 and 15 children was pelted with rocks and bottles during the second night of disturbances in a black neighporhood on Tampa's east side, police say.

Three children suffered minor scrapes and bumps when the flying objects smashed through the windows as the bus returned from church services at about 10 p.m. Tuesday,

authorities said. The children were treated and released from a local hospital.

Police sealed off the area for the second straight night, setting up a command post and deploying 20 twoman units around an eight-square-block perimeter.

Most of the units were pulled out early today, however,

as the neighborhood streets turned quiet. "All I saw was a large group of people that came out from behind a building," recounted the bus driver,

the interim

VANCOUVER, Wash. (AP) — An estimated 5,000 travelers stranded by the shutdown of ash-clogged highways and airports jammed shelters across Washington as the death toll from the devastating eruption of Mount St. Helens climbed to 10.

Gov. Dixy Lee Ray asked President Carter to declare the state a disaster area and officials kept wary eyes on a dam of mud and debris that stood between the waters of Spirit Lake and the residents of cities below the

Officials listed 98 people were missing following the blast that a scientist described as a "unique event" in the history of Mount St. Helens. And the cloud of ash that blanketed much of the West and Midwest with a layer of grit moved today across the eastern third of the country

"I feel as though I have just come back from a trip to the moon," Miss Ray said after a helicopter tour over dozens of miles of flattened trees and mud-devastated homes.

About 1,000 people had been evacuated from homes near the volcano, while untold numbers of others found temporary lodging without assistance and never checked with authorities, said Ben Dew of the state Department

of Emergency Services.

The number of known victims of the blast and mudslides rose late Tuesday to 10 and Cowlitz County Sheriff Les Nelson said the toll from the Sunday eruption would climb much higher. He said he expected a party of eight campers to be declared dead. since their campsite was obliterated.

As eruptions subsided to a column of steam rising to an altitude of about 11,000 feet, U.S. Geological Survey volcano hazards expert Dwight R. Crandell said the waters of Spirit Lake were likely to remain impounded behind mud and debris piled as high as 200 feet along the first 17 miles of the North Fork of the Toutle

Officials had feared that the blockage might give way, causing floods in Longview, Kelso and Castle Rock, 40 miles to the west. About 50,000 people live in the area below the lake, which shrank to about a third of its six-mile area under torrents of mud and debris.

"I do not believe a sudden flow down the valley is a credible event. I

bluff near Pole Patch, Washcomplete with a small steam vent, upper left, and saw instead a full-blown eruption. They saw the mountain burst smoke and ash about 20 miles wide billow skyward (bottom). In Sunday's eruption, six persons were killed and thousands fled red-hot mud. (AP Laserphotos)

'Stroke of luck' nets couple pictures of volcano eruption

SEATTLE (AP) — Vern Hodgson and Bernadette Chaussee were in the right place at the right time, and their luck got them one of nature's most spectacular and dramatic moments

It was a photographic "stroke of luck," Hodgson said Tuesday.
On Sunday, with clear, beautiful weather, they decided to take a picture of Mount St. Helens, using his 35mm camera.

The two Lynnwood, Wash., residents stopped on a bluff near Pole Patch, about 15 miles northeast of the mountain.

Hodgson, 36, an amateur photogra-pher, said he was setting up his tripod and camera and checking his light meter and Ms. Chaussee was looking at the top of the mountain with binoc-

"Look, there's a little steam coming out now," Hodgson said she told him. It was 8:30 a.m.

As Hodgson began to shoot, the bulge on the side of the mountain started to slide. Smoke boiled across

the horizon. As the eruption grew, he changed from his 75-150mm telephoto zoom lens to a normal 50mm lens for more photos, but the display outgrew that one. He put on a wide-angle 25mm lens to shoot the rest of his roll of 400

ASA color print film. His series of 16 pictures took "four minutes, at most," he said.

The huge black cloud in his last

photos of the volcano was approxi-mately 20 miles across, he said. There was a "dull, low, ominous roar," Hodgson said. "It was awe-

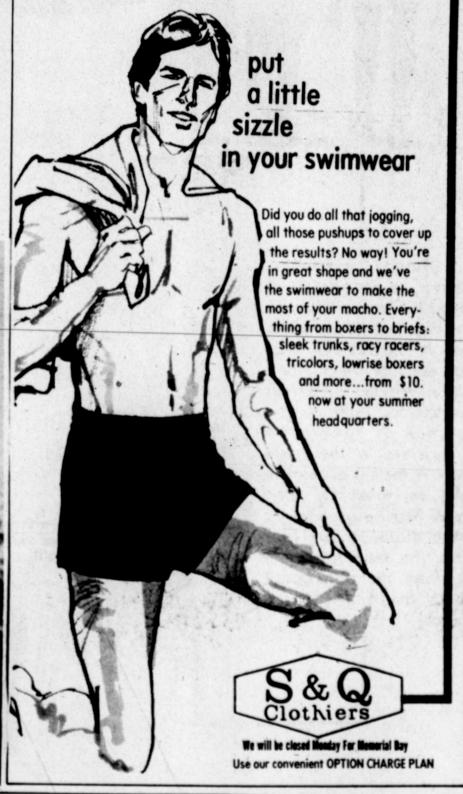

some."

If he had been "younger and more foolish," he said, "I probably would have stayed up there."

Hodgson and Ms. Chaussee jumped in their van and were only three minutes down a winding mountain road when dense black ash and gobs of mud three-quarters of an inch across closed in on them.

across closed in on them. They covered their mouths and noses with towels but the ash fell so heavily they couldn't see. Hodgson said he drove at 5 mph but couldn't see the side of the road.

Every five minutes, Hodgson had to stop to scrape another inch of mud off the windshield. He said he "kept thinking about Pompeil," the Italian city buried in ash in 79 A.D. Finally, two hours and 15 minutes later, they reached Randle, 20 miles from Pole Patch Patch.

By Franchelle Moore

P.O. Box 1650, Midland 79702

Is it illegal for the candidates who are running for office to drive around and put their brochures in our mail boxes, without going through the post office and stamping them? — Mrs. T.

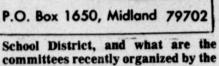

ANSWER: A spokesman for the Carriers' Department of the main U.S. Post Office, 684-5801, reports this situation is illegal. Notify the Post

I noticed just recently that there are several large cracks in floors at the new Midland Center.

Since this building was paid for by taxpayers' money, I was wondering if there is a serious defect in the construction of the building, and why the building was allowed to be constructed this way? — H.C.T.

ANSWER: Frank Welch, architect for Midland Center, says there is no structural defect in the building. His explanation for the presence of cracks in the floor is that when the building was being constructed, floors were "poured" on new foundations over old foundations. Future plans call for carpeting of the floors.

Who is president of the board of trustees of the Midland Independent

ANSWER: Ed Runyan is president

trustees? - F.M.

of the board of trustees. The new committees, as reported in a recent article in The Reporter-Telegram, are designated to address 'certain needs and some educational goals established by the Objectives

for the 80s Committee." The committees are Objectives for Midland, Administration Organization, Personnel, Facilities, Discipline, Organization, Future Planning and Educational Supervisory Personnel.

I want to purchase a car for myself.

Can I get a loan without my husband as a co-signer? — Mrs. T.W.

ANSWER: Yes, if you satisfy the lender that you are financially responsible, says the State Bar of

In Texas, most lenders will base their decision on whether you own sufficient separate propery or earn enough money yourself to make you a satisfactory credit risk.

Recent federal legislation provides that a woman cannot be denied a loan solely on the basis of sex.

Victim's family sues Oklahoma over escapees

OKLAHOMA CITY (AP) - A \$250,-000 lawsuit has been filed in Oklahoma County district court by the parents of a man killed by two state prison escapees during a multi-state shooting spree which also claimed the lives of three Oklahoma Highway Patrol troopers.

Hubert and Alice Gene Bobo are suing the state Corrections Department, Gov. George Nigh and former Oklahoma State Penetentiary Warden Norman Hess.

The suit contends the department knew inmates Michael Lancaster, 25. and Claude Eugene Dennis, 35, were prone to violent crimes, but was negligent in allowing their escape.

Lancaster and Dennis escaped on April 23, 1978, through a tunnel used for a 1976 escape by Rex Brinlee and

Gov. David Boren had ordered installation of electronic sensing devices prior to the 1978 escape, but the devices were never installed.

North Texas: Decreasing cloudiness tonight. Mostly fair and warm Thursday. Lows tonight 58 to 63. Highs Thursday 52 to 87.

Border states forecasts

the single cells could not watch televi-

sion, while those in the tanks could. Televisions, purchased with money from the prisoners' commissary, were hung outside the tanks. Prison-

> sion through the bars. "But we're not going to change it," he said, explaining it would mean purchasing and hanging a television

> ers in the tanks can watch the televi-

outside each single cell. The sheriff also admitted that prisoners in the tanks probably get to use the telephone for longer periods of

Once a week, prisoners in the single cells are taken out for 15 minutes to use the telephone. And once a week the telephone is put inside the tank from 7 a.m. to 10 p.m. With an average of 10 prisoners in the tank, they probably use the telephone for longer periods of time, Smith said.

HOWEVER, HE ALSO warned he could stop the telephone calls altogether if the prisoners wanted it.

'There's nothing that says we have to let them make any (of these) phone calls at all. If they prefer, I can stop all phone calls out of the jail. In fact there are some people who would probably like that. Some prisoners try to use someone else's phone number

to charge long distance calls." Continuing, Smith said that "Originally, we let them make these calls because we can not hold them incognito. We have to let them let people know where they are and contact

their attorneys. That's law. "But the calls they are talking about are just personal calls."

Smith also admitted that, to a certain extent, the women's last com-plaint was justified — that some trustees have cigarettes bought for them. "I don't like to call them trustees.

Anyone (who qualifies) can work if they want to," said the sheriff. According to a spokesman at the Midland County Jail who works with the commissary, smoking is a privi-lege given to those who do work. And for those trustees who don't have money, there is a fund in the budget

that is used to purchase cigarettes for them, the spokesman said. Smith added the commissary funds went for such things as buying toothbrushes and providing stamps for those who didn't have them.

KEY WEST, Fla. (AP) — Cuban-American exiles, outraged over the overloading of "Freedom Flotilla" boats by Cuban authorities and at President Carter's efforts to end the boatlift, are threatening demonstrations unless the federal government lifts its ban against boats going to Cuba.

Two representatives of Miamibased "United Cubans" plan to fly to Washington today to meet with congressmen and State Department offi-

Miami businessman Wilfredo Navarro, and Frank Sturgis, a former Cuban security chief later arrested in the Watergate burglary, have chartered 20 shrimp boats capable of carrying 150 passengers each and want permission to send them to Mariel

Since Carter called for an end to the "Freedom Flotilla" a week ago, Coast Guard cutters have intercepted and turned back vessels attempting to leave Florida for Cuba.

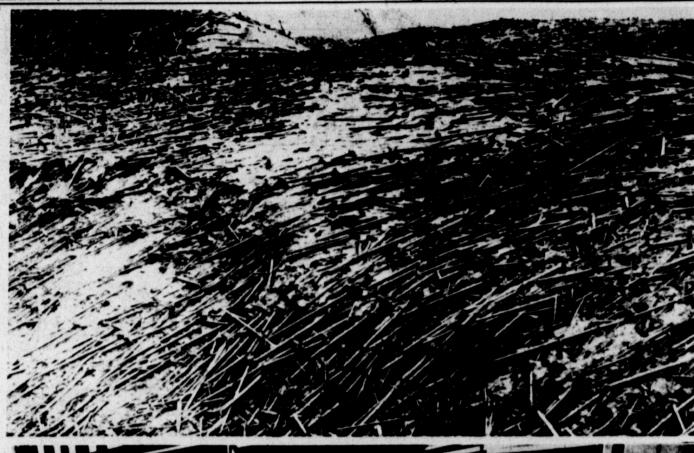

Cuban-Americans are worried that the boatlift will end before all refugees who want to leave have been picked up, Navarro said. He noted if some are left behind, they might face retaliation from the Cuban people, who have been told by Fidel Castro that those wanting to leave are worms, unworthy of the revolu-

"It's not us (Cuban-Americans) who told the people to go to Mariel. Carter said three weeks ago: 'I open my arms to you.' Now he says: 'Go to hell,' " Navarro said.

A steady stream of refugee-packed boats continue to arrive here, pushing the 32-day total past 65,000. Many small boats have been overloaded with passengers that include women, children and the elderly.

"An adult can swim for a while, but what can these little kids do if their boat capsizes?" asked Coast Guard spokesman Dan Dewell

Emotional funeral services were held Tuesday for ten refugees who died in the Saturday sinking of the "Olo Yumi." Four more bodies were never recovered after the 36-foot vessel capsized. The ship's captain said he was forced to take 52 passengers and then was misled about rough seas

Trees, top, lie like matchsticks near the base of Mount St. Helens Tuesday after they were flattened by a blast from the volcano. Mud and ash cover the trees. Mike Clinton, above, of Yakima, Wash.,

shovels Mount St. Helens ash off a business district sidewalk early Tuesday. A thick volcanic ash coating remains on the ground today. (AP Laser-

Half-dozen states cleaning up ash

By The Associated Press

loud of volcanic ash from Wash ington's Mount St. Helens moved over the eastern third of the nation early today as thousands of stranded motorists sought shelter in the West and residents of a half-dozen states used plows and hoses to clear away inches of the fine powder.

Water rationing was imposed in Spokane, Wash., as residents tried to wash off cars, streets and buildings. School districts in Idaho postponed trustee elections after the governor declared a state of emergency. Businesses and schools remained closed in six Montana counties under emergency orders.

The ash began pouring into the atmosphere Sunday with the eruption of the volcano and by Tuesday cities across the West were trying to cope with grit up to 7 inches deep.

For parts of the Midwest, the ash meant a light dusting and some disruption of travel. The cloud of ash rose higher in the atmosphere as it moved east and weather officials in New York City predicted the cloud would be above rain clouds that were

forecast for the area today. The ash was expected to cover every state east of the Rockies except

Texas, Louisiana and Florida. Scientists say that as the ash spreads it takes the form of a powdery but gritty dust containing microscopic dagger-like particles of silicon that will turn sunsets into brilliant displays of scarlet and are abrasive enough to take the paint off airplanes

flying through the cloud. The ash is not poisonous and poses no immediate health threat to most people, but scientists say those with severe respiratory problems might be more comfortable staying indoors while the cloud is overhead. But as to

longer term effects on atmosphere and Grand Forks, N.D. and environment, scientists say they have no idea yet what the ash might

"People exposed to this type of thing over a period of many years develop lung problems," said Robert Clark, a Lewiston, Idaho, pathologist. "I don't think anybody knows what the effects of a broad exposure to a

single dose will be." Meanwhile, dozens of commercial flights were canceled Tuesday as the Federal Aviation Administration warned that the ash could pock plane windows and clog engines. The Strategic Air Command canceled routine flying operations at its bases in Minot

Mail service ground to a standstill in some areas of the Northwest, and postal officials in Pasco, Wash., said that if residents want to mail the ash to friends and relatives, they should do so in plastic bags. Envelopes stuffed with the stuff had burst open and damaged machinery.

In other developments:

-Officials in Cascade County, Mont., site of Malmstrom Air Force Base, said they would have to revise their nuclear fallout planning. Civil Defense Director Bill Murray said the volcanic ash had moved into the area twice as fast as planners expected would occur with fallout from a nucle-

-More than half a million disposable face masks were being shipped by plane and truck to the Northwest by Minnesota Mining and Manufacturing Co., a spokesman for the company said Tuesday. The emergency shipments were designed to help prevent persons from breathing the ash

-State troopers in eastern Washington found that the only way to rescue stranded motorists was to bring out the vacuum cleaners and clean their patrol car engines after short intervals.

Another action which would have permitted the adoption of by-laws for the hospital's medical staff and the creation of the cancer therapy department was delayed for approval by the hospital's medical staff and the Midland Memorial Board of Governors, respectively.

Assistant Administrator of Finance, Robert Abernethy, reported to the directors and trustees that the hospital made a profit of \$4,619 during April. The profit resulted from the increase of 136 patients per day compared to the budgeted figure of 114 patients per day.

Trustee Roy Campbell questioned Abernethy as to why the hospital did not make any more money as a result of the patient increase. The finance administrator replied that the costs of supplies among other items budgeted

Midland area, although the weather bureau recorded only .07 inch of moisture.

The heaviest rain was reported east of Midland, where 1.9 inches fell five miles outside of town.

About 11/2 miles east of Midland, 1.5 inches of rain was recorded along with pea-sized hail that accumulated to three inches deep in places.

Inside the city a small amount of rain was recorded. Midland College reported a light shower accompanied by light hail, and the Permian Basin Petroleum Museum, located off Interstate 20, received a trace of rain

and some high wind, but no hail.

Greenwood reportedly received .20 inch of rain and high wind while Greenview Estates had a little rain and pea-sized hail. Elsewhere in the Permian Basin,

Big Spring received rain ranging

from .60 to .84 inch along with pea-sized to baseball-sized hall. The lar-

gest hail was reported in the Midway area northwest of Big Spring.

Lightning also apparently struck a tower at KBYG radio in Big Spring Tuesday evening, knocking the sta-tion off the air for the remainder of the evening.

The National Weather Service office at San Angelo reported a twister touched down six miles west of Big Lake Tuesday evening, but sheriff's department officials there could not confirm that report. Big Lake received rain for about 45 minutes, accompanied by small hail.

Stanton reported receiving about an inch of rain along with high wind and lightning. Lamesa and Odessa reported some rain, and Gardendale, north of Odessa, received rain and hail. Lightning may have been responsi-

ble for a tank battery fire that occurred about 10: 15 p.m. Tuesday near Midland. Cause of the fire was not immediately known, but was thought

to have been lightning.

Honorary pallbearers will be Randy Blanscett and Rusty Blanscett, both of Midland, and Kenny Curry of Big Spring.

France to support U.S. in crunch, but clings to independent diplomacy

PARIS (AP) - President Valery Giscard d'Estaing's meeting with Soviet President Leonid Brezhnev served notice that France still clings to the independent diplomacy with which President Charles de Gaulle annoyed his allies.

The French message is that they will stand by the United States in a crunch as they did during the Cuban missile crisis, but otherwise they will go their own way rather than become an American "province," as Giscard d'Estaing put it.

The French president says he be-lieves in keeping a dialogue going with the Soviets even though he disapproves of the Kremlin's intervention in Afghanistan. His aides ask why, if Secretary of State Edmund Muskie meets with Soviet Foreign Minister Andrei Gromyko, Giscard d'Estaing shouldn't meet with Brezh-

Muskie's criticism of the Warsaw summit was shared by many French politicians and newspaper columnists who considered it damaging to Western efforts to cold-shoulder the Soviets out of Afghanistan. But an independent posture is always good presidential politics in France. It is a matter of "la gloire," the glory of France, that mystical concept that de Gaulle revived after the ignominy of the Nazi occupation.

Refusing to fall meekly in step behind the American superpower, de Gaulle acted like a superpower him-

He recognized Communist China at a time when America still had nightmares about the Red Peril in Pek-

Long before detente became fashionable, he withdrew French troops from NATO's command, expelled the other allies' troops from France and amassed his own nuclear arsenal.

He fostered the image of France as a father-figure to the emerging nations of the Third World. He shook Canada with his shout of "Vive Quebec Libre" in that ally's French province. He turned against Israel at a time when the Jewish state was the West's only reliable friend in the Mid-

At the same time, an anti-American spirit had taken root among French intellectuals nursed on the leftist philosophy of Jean-Paul Sartre and fueled by the Vietnam War. They still think they see America's Trojan Horses at every turn — Le Drugstore on the Boulevard St. Germain, hamburger stands on the Champs Ely-

sees, Kojak on television. But some critics wonder whether France's independent posturing has been worth the trouble. As early as 1964, commentator Raymond Aron asked: "What good do some of these decisions do for France, aside from their undeniable merit in irritating both allies and adversaries at the same time?

His words are echoed today by a U.S. diplomat who complains: France seems to make decisions on the basis of how far it can distance iself from the United States, sometimes to the detriment of its own self-interest."

Indians open court battle against book, ABC officials

PINE RIDGE, S.D. (AP) - An Oglala Sioux tribal judge opened hearings Tuesday in a \$2 million lawsuit against the author of "Hanta Yo" and officials of the ABC television

The best-selling book and a proposed television mini-series based on it defame Indians and destroy their heritage, contends Associate Tribal Judge Hildegarde Red War Bonnet Woman, who filed the suit in tribal court on the Pine Ridge Indian Reser-

"This book portrays Indians as subhuman," attorney Jerry Matthews, of Pine Ridge, told the court. "It portrays the Indian as people who ate the afterbirth of their children — as people who engaged in sexual perversi-

Chief Tribal Judge Deloris Whitehead recessed Tuesday's hearing when Ruth Beebe Hill, author of the book about Sioux Indians in the last century, ABC officials and their attorneys did not appear.

Attorneys for producer David Wolper and other ABC officials moved for dismissal of the suit in a request filed by mail Monday, saying they are not residents of South Dakota or the Pine Ridge Indian Reservation and are outside the jurisdiction of the tribal court.

The judge said she would order the defendants to give the court more documents explaining why they feel the court has no jurisdiction in the case. She said she hoped the case would be settled in 4-6 weeks

The tribal court handles all cases on the reservation except felony cases, which are handled by the federal government.

Ms. Red War Bonnet Woman, of Pine Ridge, seeks \$2 million on her own behalf for what she calls defamatory statements in the book.

'I'm just a very concerned member of the tribe," Ms. Red War Bonnet Woman said. "I felt I had to do something about it — it's my culture, my heritage they are destroying." She charged the book was filled with inaccuracies.

Grayson Enlow, 'The Shadow's' radio voice, dies

MISSION, Kan. (AP) - Grayson Maynard Enlow, the voice of "The Shadow" on network radio during the late 1940s and early 1950s, has died at

Enlow, who died Sunday, was a Broadway actor and radio announcer for more than 40 years.

His Broadway credits included "My Sister Eileen," "Of Thee I Sing," "Time of Your Life" and "The Big

Born in Lamar, Colo., Enlow was in the Army Air Corps in World War II and lived in Leavenworth, Kan., and New York before moving to the Kansas City area in 1960.

Texas shrimpers need federal aid

WASHINGTON (AP) - Texas shrimpers are telling Congress they may not be afloat much longer unless the federal government quickly develops an effec-

ing companies in Port Lavaca, told a H and wildlife subcommittee that he may have to

dismiss his on-shore employees and cease operations by August unless the situation improves.

He said that his shrimp fleet already is idle, tied to the docks since the end of February. The crews have found other jobs or turned to unemployment com-pensation and food stamps, Clegg said.

The major culprits, according to industry repre-sentatives and Texas coastal congressmen, are the soaring costs of fuel and competition from foreign fleets paying much less for their diesel. Rep. Bob Eckhardt, D-Texas, testified Tuesday

that U.S. shrimpers pay 90 cents per gallon for their diesel fuel compared to the 20 cents per gallon that Mexican shrimpers pay and the nine cents per gallon for Venezuelans.

These foreign fishermen can bring their catch into American ports at a much lower price than our domestic fishermen can, thus making it unprofitable for our shrimpers to ever take their vessels from the

for our shrimpers to ever take their vessels from the slips," the Houston congressman said.

The subcommittee held a two-day hearing on a comprehensive bill by Rep. John Breaux, D-La., designed to aid fishermen and seafood processors.

Among other provisions, the bill would provide low interest loans to fishermen about to default on their

vessel mortgages. Rep. E. "Kika" de la Garza, D-Texas, said the bill should go farther to aid shrimpers with their operating costs through a difficult period.

"Along with helping those who are about to default on their loans, we should be helping others so that they don't default," the congressman from Mission said. "We provide assistance to farmers in obtaining R.E. Clegg, owner of shrimp fishing and process- operating funds. Why can't we do the same for the

De la Garza, whose district includes the southernmost stretch of the Texas coast, said the bill would
not prevent shrimpers from going out of business
before the programs could take effect.

He pointed to bad weather, the Ixtoc I oil spill and
the expulsion of U.S. shrimpers from Mexican
waters as reasons for the industry's hard times.

Eckhardt said the increased fuel costs may be
hitting shrimpers particularly hard because fuel hitting shrimpers particularly hard because fuel makes up the major portion of the budget for

"The shrimp boat's engines run incessantly, from the time it leaves port until it returns," he said. "The shrimper's income depends in large part upon how much he spends for fuel."

Eckhardt's district borders Galveston Bay.

Clegg, who testified Monday, suggested that Con-gress should make low interest "survival" loans available to all shrimpers and start a national advertising campaign, financed by a duty on imported seafood, to promote consumption.

He said the program also should include a fuel rebate plan and require that Mexico open its waters to U.S. fishing vessels in exchange for access to U.S.

"In other words, tell Mexico and these other countries, if you sell here, we fish there," Clegg

Bush, Reagan trade primary victories Tuesday

GOP presidential nominee seems assured—but what about vice president?

By WALTER R. MEARS **AP Special Correspondent**

Slowed but virtually unstoppable, Ronald Reagan is preparing for a victory rally on June 3, the day he expects to lock up the Republican presidential nomination - while George Bush is demonstrating he could help the GOP ticket as its vice presidential candidate.

Bush and Reagan traded primary victories Tuesday, the challenger in a Michigan landslide, the frontrunner inning easily in Oregon.

Bush won 57 percent to 31 percent in Michigan; Reagan got 55 percent of the Oregon GOP vote, Bush 34 per-

President Carter took another stride toward renomination by defeating Sen. Edward M. Kennedy in Oregon's Democratic election. It was Carter 58 percent, Kennedy 32 per-

Kennedy said he hadn't expected to win, but thinks he can prevail in "the real superbowl of the Democratic primaries," the eight elections on June

THE PRESIDENT ALSO held a 2-to-1 lead over Kennedy in Utah's Democratic caucuses, conducted two days ago, with the official count due

Carter's spokesman called Oregon "a significant victory" in a state the president couldn't carry four years ago. It widened Carter's commanding delegate lead, but Kennedy said in

advance nothing would deter him should help him in the final round of from a non-stop campaign through GOP primaries, three next Tuesday from a non-stop campaign through the primaries to the Democratic con-

Carter gained 26 delegates in Oregon, and now has 1,391 of the 1,666 he needs for the nomination. Kennedy over and over again."

It was a major will, Bush said.

I've been trying to make that point over and over again."

Bush, the Republican challenger who has gained upset victories each time he's been pushed to the brink of elimination, demonstrated in Michigan that he can run strong where Reagan is weakest. And it wasn't the first time.

THE FORMER United Nations ambassador has said repeatedly that he would not accept the vice presidential nomination, but that is an obligatory disclaimer for a presidential candidate. To say anything else would be to concede the nomination to Reagan.

Bush wasn't about to do that, certainly not with a runaway to his credit in a major industrial state like Michigan. He gained it with the help of Gov. William G. Milliken, a moderate Republican who said Bush is the party's best hope for victory in the fall. He wooed and won Democratic voters who cast Republican ballots because their own primary was a meaningless exercise.

Bush won 53 delegates in Michigan, 11 in Oregon. Reagan picked up 29 nominating votes in losing Michigan and gained 18 with his Oregon vic-

Bush called the outcome "a very big shot in the arm," and said it and nine the week after that.

"It was a major win," Bush said.
"It means I shouldn't be written off. over and over again."

But he faces tough going in the next set of contests, in Kentucky, Idaho and Nevada. And the odds get tougher June 3 in California, the state that twice elected Reagan governor and now will award all its 158 GOP delegates to the candidate who can win the popular vote.

REAGAN AIDES SAID they are planning a giant victory party in Los Angeles that night. After Tuesday's split, Reagan said "today's results make us more certain than ever that we will achieve the nomination of the

ABC and CBS both said their projections of delegate commitments showed Reagan had already captured a nominating majority with the delegates he gained in losing Michigan and winning Oregon.

The Associated Press count of Re-

publican delegates put Reagan at 888 of the 998 he needs. Bush had 256. The AP count includes only delegates who are legally bound or publicly de-

MICHIGAN WAS the sixth Republican primary Bush has captured, and his other credits include Massachusetts, Connecticut and Pennsylvania,

pears most vulnerable.

Rivals have become running mates before, but Reagan avoided a response Tuesday night when asked whether Bush had enhanced his credentials as a possible running mate. Instead, he credited Milliken with boosting Bush's showing in Michigan. He added that Bush has targeted selected states for heavy investments of campaign time and money, while he has spread his resources among all the contests.

Reagan said it is time for him to start thinking about vice presidential nominees. "I have consistently said that I haven't ruled anyone out or anyone in," he said.

Campaign aides said rival candidates, past and present, are on the prospect list. That would include Bush, whose insistence that he would not take the No. 2 nomination might not be so firm if the presidential competition was finally and totally

THE NAMES THAT have floated out of the Reagan camp as prospects include Sen. Howard H. Baker Jr. of Tennesse, who has said he would run if asked to do so, Sen. Richard Lugar of Indiana, Rep. Jack Kemp of New York and former Secretary of the Treasury William Simoant in a Reagan campaign, since the former California governor is 69 years old now and, if nominated and elected, might serve only a single term.

In that situation, his 1980 running

mate could well be the dominant Re- percent of the vote. publican in 1984.

These were the results of the Tuesday primaries:

With 88 percent of the vote counted, Democrats: Carter 175,553 or 58 percent, for 26

Kennedy 95,572 or 32 percent, for 13 delegates.

California Gov. Edmund G. Brown Jr. had 10 percent. Republicans:

Reagan 151,495 or 55 percent for 18 delegates. Bush 94,055 or 34 percent for 11

Rep. John B. Anderson, now an independent candidate but still on the Republican primary ballot, got 10

Michigan With 91 percent of the vote counted, Republicans:

Bush 327,403 or 57 percent, for 53 delegates.

Reagan 181,715 or 31 percent, for 29

Anderson gained 9 percent of the vote; the rest was scattered. The major Democratic contestants skipped their party's Michigan primary because the state's delegates

already had been allotted, 71 to Kennedy, 70 to Carter, by party caucus. So the primary ballot was left to Brown, who has quit the campaign, and minor candidate Lyndon LaRouche. Fifty-two percent of the vote was uncommitted. Brown got 34 percent and LaRouche 14.

have June 3 to go with eight primaries on that day and I just hope people won't say nothing needs to be done

But Reagan smiled broadly at a news conference when reporters questioned him about television network projections of delegates who have not yet been formally selected.

"When three networks say you are over the top, I'm inclined to go along with them," he said. "I know that we're well over the 900

mark, so whether or not the networks are right, either way I think we'd better start planning for Detroit and beyond.

"I have to feel pretty good...there is the smell of roses in the air," Reagan said. "No matter what figure one chooses, today's results make us more certain than ever that we will

Tuesday to those who must write about a Carterless Carter campaign. On Tuesday of this week, Oregon Democrats were holding a primary Bush calls his victory

a big shot in the arm CANTON, Ohio (AP) — George Bush says his decisive victory in Michigan's Republican presidential primary is "a big shot in the arm" that revives his hopes of upsetting front-runner Ronald Reagan. "I'm elated," Bush said as the returns came in. "It

was a major win. It means I shouldn't be written

Bush's staff immediately began mapping plans to raise money in hopes of duplicating the Michigan victory in California, Ohio and New Jersey, three

key states in the final June 3 primaries. James A. Baker Jr., Bush's campaign manager, said the former United Nations ambassador's appeal for Democrats and independents to cross party lines and vote for Reagan's challenger obviously paid off

He predicted the victory would bring a flood of new contributions, volunteers and momentum in the final days of the primary campaign.

"There is a popular song called "The Gambler' that says 'you've got to know when to hold them and know when to fold them' and I think that the voters of Michigan today have told everybody that regardless of what we've been hearing and reading to the effect that its all over, they don't think the game is over," said Baker.

"They don't think the game should be over and what George Bush got in Michigan today is to keep holding them for awhile and that's what he intends to do," Baker added.

He was asked whether Michigan was an abbera-

would say it's the eighth state we've won and there are still 10 states left out there, maybe 13," Baker replied.

Kennedy anticipating 'superbowl' of primaries

CINCINNATI (AP) — To hear Sen. Edward M. Kennedy say it, all of the numerous election defeats of the past four months pale in importance be-side the anticipated thrill of victory in the "superbowl of the Democratic primaries" on June 3.

The Massachusetts senator absorbed a landslide defeat Tuesday at the hands of President Carter in the Oregon primary. But he shrugged it off, like he has similar lopsided losses before, declaring, "We continue the course of this campaign" until June

We've heard early results from Oregon," Kennedy told reporters shortly before midnight Tuesday at the end of an exhaustive day of campaigning in New Jersey and Ohio. "We didn't expect to win

Kennedy added, "The real superbowl of the Democratic primaries are here in Ohio and New Jersey and in California, also South Dakota, Montana and West Virginia. And that will be the day I think that we're looking forward to and we're very hopeful

about."
The six states Kennedy mentioned, plus New
Mexico and Rhode Island, elect 696 national convention delegates on the final day of the 1980 primary season. The senator arranged to campaign today in Ohio before leaving for California for a four-day

Kennedy is far behind Carter in delegates, and the president is within hailing distance of the 1,666 delegates he needs for nomination. But the Massachusetts challenger insists that a string of victories on June 3, on top of early triumphs in traditionally Democratic states such as New York, Connecticut, Permaylvania, Massachusetts and Michigan, will entitle him to the nomination, delegate counts

MEETING YOU

Becoming acquainted with YOU here today in this column is a unique and exciting opportunity for me. Although I have written other columns in the past, I am honored to have the privilege of writing "Living Today" here with you and The Midland Reporter-Telegram. A special note of appreciation and thanks to Jim Servatius, Leland Barnes and all the other Reporter-Telegram staff members for their assistance, enthusiasm and cooperation in this new venture.

In honor of the late Mr. Lou Lindsey, this "first edition" is dedicated to his memory. Although I had only a brief opportunity to enjoy the privi-lege of working with Mr. Lindsey, I am both honored and grateful. He, too, had looked forward to this moment, filled with enthusiasm and creativity to help make "Living Today" meaningful to your life. My underlying enthusiasm will be constantly regenerated by his creative thoughts and enthusiasm he so generously shared with me as I attempt to ad-dress the home economics related issues relevant to your life in today's world.

INSIGHTS

By way of introduction, I am a home economist employed through the cooperative efforts of the U.S. Department of Agriculture, Texas Agricultural Extension Service and Midland County Commissioners' Court, and known as a County Extension Agent — Home Economics.

Over 78 years ago, a need was identified for bringing research based information being conducted through land-grant universities to the grass roots level — the people at home in the counties located hundreds of miles away from the campuses across the nation. Some years later, our governing representatives realized the need for a delivery system that would en-able all people to avail themselves of continuing education extended to them through this system to enable them to solve everyday living problems with proven research and reliable information related to agriculture and home economics.

With the passage of the Smith-Lever Act in 1914, extension was for-mally established throughout the nation, and in Texas, became known as the Texas Agricultural Extension Service, operated under the termas of

DALLAS (AP) — About 25 couples camped out in front of Hope Cot-

tage this weekend, putting up with hot

standing between the Texas A&M University System (land-grant university established by the Morrill Act of 1862), and the U.S. Department of Agriculture. The Texas Agriculture Extension Service is designed to take knowledge directly to the people via county extension agents and is the connecting link between research and is practical application in the lives and concerns of Texans.

The land-grant university system, of which the Extension Service is an integral part, has had much to do with making this nation's agriculture the most productive and efficient in the world. In Midland County, most of you can identify productive agriculture and its related areas with Charlie Green, my co-worker counterpart.

Education efforts of the Extension Service are expanded across the nation by thousands of local citizens who volunteer to serve as leaders in adult and youth programs. They work with individuals or with youth and/or adult groups. Many of you who have served in the past and/or are currently acting in this capacity here in Midland County can identify with the term 'volunteer leader" and with another of my agricultural and youth co-workers, Travis Harney. Extension homemaker groups, and youth and adult leaders identify with "volunteer leader roles" through me in both adult and youth work.

THE TEXAS AGRICULTURAL EXTENSION SERVICE-HELPING PEOPLE TO **HELP THEMSELVES**

Throughout the 1980's, you will note a special logo of an extending "E" moving across a silhouette of Texas with a slogan: "The Extension Way -People Helping People" that will easily identify extension related educational efforts.

TEXANS' ISSUES

An extensive survey conducted in 1979 revealed six major isues of the people in Texas: (1) energy; (2) economic conditions (3) social conditions (4) land and water resource management (5) marketing and policy, and (6) leadership development.

Programs in more than 70 subject matter areas through the Texas Agricultural Extension Service will be "thrusting" toward the six identified issues to meet the concerns and needs of Texas people. Specifically, I will be adapting these issues to our individualized Midland County concerns asyou relate them to me through numerous communication routes.

Challenge and opportunity! That is "creative living in today's world." I have never found a Texas history book that told me Texans failed to rise to a challenge or an opportunity!

Rushing said it will be the first time

the agency has accepted applications

for the adoption of white infants

Couples camped outside for chance to adopt

Although Texas producers, processors, distributors, suppliers and con-sumers are faced with erratic price movements in inputs, and consumer goods which are influenced by public policies, regulations, inefficiencies and uncertainty of general economic conditions, I believe we can, and will, continue to rise to this challenge with even greater enthusiasm and determination in the 1980's than was evidenced in the 1970's. You have often heard it said that the learning, or lack of, takes place during the process of an education is 10 percent the teacher and 90 per cent the student's effort. Meeting this creative living opportuniy in the 1980's is 10 per cent the conditions and 90 per cent the parts of our attitude called enthusiasm, cooperation and effort. From where I sit, 100 per cent participation from each of us in positive actions of the attitude department-irregardless of the economic role we fill in our economy-

yields 100 per cent positive results. Most of us have been acquainted with a "computer error" at some point in our lives in recent years and understand that the real interpretation means "a human error", because the computer can only compute the information received-not determine it. The same is true of a computer we carry arund in that mass called our brain-it only computes what it re-

Positive, creative thoughts and actions continuously fed into our computers can only produce positive results. Activating a continuous and repetitive positive pattern, your life can only create a positive individual in all thought and action! And, on the other side of the coin, of course, is the negative theory that can only produce a negative individual. Research has proven that it requires more than twice as much human energy to be a self-made negative individual as it takes to be a self-developed positive creative being. In this great era of energy conservation in "the sagacious '80's," as I choose to call them, where will YOU place your energy efforts in terms of you, the individual? Conservation with positive living results or "fuel yourself away in waste" with negativism that, also, produces major health problems? A point to ponder and worth taking a second look into when you consider the possible results of You.

If you are into conservation living ideas or thinking about it, a good place to begin checking is the part of the attitude of the individual behind the eyes reading these ideas. Where does your enthusiasm, cooperation and effort attitude-parts rate on a scale of 1 to 10? For an objective rating, where does your family, irlends and co-workers rate you, and you, them? A "check up" and "tune up" in this conservation department allows us to move into other areas, prepared for ... living today ... creatively! Welcome aboard! Next week...join us and see.

"Some of the people were sleeping outside last night when the sprin-

they could get a chance to adopt a Couples whose applications are ac-cepted probably will be able to adopt In a small newspaper ad last week, within a year, she said. Gynecologist campaigning women to have babies in squatting position

RIO DE JANEIRO, Brazil (AP) -A Brazilian gynecologist and obstetrics professor is gaining attention through a campaign to persuade women to have babies while squatting on the floor - like native South American Indians - rather than lying on a delivery table.

Dr. Moyses Paciornik, who has written and lectured extensively on the subject both in Brazil and in other countries, contends this method of giving birth results in less danger to the baby plus reduced delivery stress and better overall gynecological health for the mother.

When a woman is lying down, the birth canal becomes a violent uphill curve pointed straight at the ceiling, along which she must force out a 7-to 10-pound baby," the 66-year-old doctor explained to the Associated Press. "But when a woman assumes the squatting position, she transforms the birth canal into a relaxed downhill passage, taking advantage of gravity instead of fighting against it."

Although Paciornik discovered Indian-style childbearing in remote tribal villages in Brazil, the place where he's trying to put his theories into practice is his modern obstetrical clinic in Curitiba, a prosperous, skyscraper-filled city of 600,000 in the southern part of the country. And the women he's talking to are not illiterate Indians, but rather sophtisticated mothers-to-be from the urban middle and upper classes.

The campaign is succeeding. "As recently as 1978, 90 percent of the pregnant women at our clinic said they'd rather give birth the 'usual' way - lying down," the doctor said.
"They considered squatting ridiculous and degrading. But now, the immense majority of our patients favor the Indian method."

Paciornik's clinic currently delivers some 200 babies a month.

Paciornik blames hospitals and doctors themselves for many of the birth complications that now occur in "standard" baby deliveries. He says attempts to "modernize" childbearing in fact wound up defying the laws of physics and biology and creating unnecessary risks for mothers and

Brazilian Indian women who have babies while squatting report far fewer birth complications and almost rarely need the aid of forceps or last-minute Cesarians, the doctor says, in sharp contrast to delivery difficulties frequently observed in standard big-city Brazilian hospitals.

fewer routine gynecological ailments Also, according to Paciornik, Inthan their non-Indian urban counterdian mothers have comparatively parts.

CULTURAL BRIEFS

JAMIE WYETH

PHILADEPHIA (AP) - A comprehensive exhibition of more than 100 oils, watercolors and drawings by Jamie Wyeth is planned for public showing at the Pennsylvania Academy of the Fine Arts Sept. 19 through Dec. 14.

Many of the works, as well as a special suite of five etchings, will be exhibited for the first time. Etching is a new medium for Wyeth, described by the academy as "one of America's foremost contemporary artists."

INDIAN MINIATURES

LOS ANGELES (AP) - Eighty-three Indian miniature paintings continue on display at the Los Angeles County Museum of Art through June 15.

Called "The Classical Tradition in Rajput Painting," the exhibition was organized by the Pierpont Morgan Library and the Gallery Association of New York State. It focuses on the art of a period from the 16th to the 18th century, when Northern India came under the influence of Islamic culture, after falling to the Mughal emperor Akbar.

Woman benefits from new state program

ALBANY, N.Y. (AP) - After nearly 20 years as a clerk at the State Department of Taxation and Finance here, Shirley F. Cohen is moving into management.

years," Mrs. Henry said.

available.

She is one of the first to benefit from a new state program that opens up middle-management posts to civil servants who were once trapped in "dead-end" clerical jobs. It lets rank-and-file workers bypass rules which normally limit management jobs to those with college degrees or other advanced training.

"I've worked very hard for this," says Mrs. Cohen, 56, newly appointed as a personnel administration trainee in the taxation department. She says she had reached the point where "the pyramid narrows" for advancement opportunity, but now will have a chance for better pay, more responsibility and

OR

more promotions. There are about 38,000 state employees — about 85 percent of them women — in clerical po-sitions governed by civil service regulations. For many, the rules keep them in what a union spokesman calls a "clerical ghetto."

The new program will directly affect only a tiny portion of those workers perhaps 150 each year. But those 150 workers would account for half of the expected 300 or so middle-management openings each year. And those involved say

the opening of the door. however slim, is an important step. "The people I've worked with look on it as. 'If she can do it, so can

I." Mrs. Cohen said. A clerical worker who now earns about \$10,000 per year could earn about \$16,420 per year at the end of a two-year public administration

traineeship. Under a six-point Clerical and Secretarial Employees Advancement program, Mrs. Cohen and others can translate experience and scores on specialized aptitude tests into 'bridges" to managerial jobs. The first 62 appointments to a training

program were made in recent months. The clerical workers.

used to taking instead of giving orders, will be given training in assertiveness, self-development and stress management, as well as more formal course work.

The program is similar to some in the private sector, but is believed to be the first of its kind among state govern-It was set up last year

under the state's latest contract with the Civil Service Employees Association. But state officials, from Gov. Hugh Carey on down, say they are confident the estimated \$150,000 annual cost will be a good investment in morale and

"In every operation cal unit has that effect.

there are outstanding secretarial and clerical people who haven't been able to advance," said James Gutowski, who is administering the new program as head of the employee advancement section of the Civil Service Department.

"The reason this was embraced by the state is it makes sense," Gutowski said. "Most of these programs really provide for improved efficiency, productivity and employee morale."

The program is not specifically labeled as a program to advance women within state government, although its concentration on the predominately-female cleri-

Brunson leads Poker Series

LAS VEGAS, Nev. (AP) — Poker room manager and author Doyle "Texas Dolly" Brunson, bidding for an unprecedented third World Series of Poker championship, has jumped into the lead in the \$730,000 event.

Brunson, who won the Hold 'Em games in 1976 and 1977, had amassed more than \$120,000 late Tuesday in the second day of poker competition that saw only 24 of the original 73 players still turning cards.

A resident of Las Vegas, the 46-year-old Brunson held a lead over Robert Bone, who had \$90,000, and gin rummy whiz Stuart Ungar, with \$60,000, Gabe Kaplan of TV's "Welcome Back Kotter," held fourth place with about \$50,000.

On Tuesday, Bobby Baldwin, a Tulsa, Okla., gambler who looks more like a computer programmer, lost his chance to repeat his 1978 victory when his two queens came out second best to Kaplan's two kings.

In a little less than two days - 16 hours of play - 49 players had lost their \$10,000 stakes in what has become the annual highlight of the month-long tournament at Binion's Horseshoe Club.

The game began Monday and won't end until one

player holds all the chips. Half of the \$730,000 goes to the last surviving player; the rest is divided among the next four finishers.

Hal Fowler, who won last year's game and \$270,000, was out in the first hour of the second day's play.

Brunson won in 1976 and 1977, pocketing \$560,000. In the interim, he wrote a 605-page book on poker that has become a part of the game for serious players. He now manages the poker room at a Strip hotel.

Hold 'Em, a game popular in Texas and the rest of the Southwest, is a seven-card test of nerves. Each player is dealt two cards face down, and, on the strength of their hole cards, players make initial bets and raises. The dealer then deals three cards - face-up - on the center of the table to be used in combination with each player's hole cards. Following more bets, a fourth card is turned face-up on the table and additional bets are made:

The fifth and final card is dealt face up as well, with the final bets being made at that time. The player who can make the best hand with his hole cards and the five

on the table takes the pot.

TOWSON, Md. (AP) - Jury selection has begun in the murder trial of Roman G. Welzant, an elderly Baltimore County man charged with killing one teen-ager and wounding another after they allegedly threw

snowballs at his home. The 68-year-old man is charged with second-degree murder, assault with intent to murder, assault and two related handgun violations in connection with the Jan. 4 incident. The two latter charges each carry a mandatory five-year prison term.

Since his case gained national publicity, a defense fund has been started and so far, totals \$3,285.

Jury selection began Tuesday and to continue today. Assistant State's Attorney Dana O. Williams predicted the jury would not be completed before Thursday.

Welzant jury selection continues

The prosecution and defense have both said publicity surrounding the case should not hamper jury selection, but Judge Austin Brizendine indicated Tuesday that this might be an

At one point during the judge's questioning of the group of 165 potential jurors, he asked how many of them had heard or read of the Welzant case. Most raised their hands and Brizendine deferred further specific questioning.

Later in the day, Brizendine began individual questioning of prospective

jurors in his chambers.

Welzant, a retired salesman, and his wife, Genevieve, 64, claim they were the victims of constant harassment by young people in their neigh-borhood in Eastwood, a blue-collar suburb of Baltimore.

The night of the incident, Welzant confronted a group of about eight teen-agers with a handgun after they allegedly bombarded his home with

Albert Kahl, 18, was killed in the shooting and James K. Willey, 16, was

Welzant's attorney, Russell J. White, reiterated Tuesday that the shooting occurred in self defense and that his client was assaulted.

Paratrooper's trial testimony very graphic

FORT BRAGG, N.C. (AP) - A veteran paratrooper's testimony on the Capt. Lawrene D. Hill's fatal parachute jump was so graphic that a pathologist needn't take the stand, a udge has ruled. Command Sgt. Maj. Frank R. Creed testified Tuesday in the court-martial of Pfc. Alvin Williams, 20, who is accused of sabotaging the parachute Hill was wearing March 26 by cutting the static line.

Creed testified that he watched Hill from the time he jumped from the aircraft until the body hit the ground, head-first. Hill's body bounced up about six feet, Creed said, and came to rest about eight feet from the original point of impact.

Creed's testimony was so graphic that the trial judge, Col. Pedar Wold, ruled that testimony by the patholo-gist who performed an autopsy on Hill's body was unnecessary.

Wold agreed, however, to allow the introduction of the written conclusion from the autopsy.

According to the autopsy, Hill died of cardio-respiratory arrest after receiving "multiple and extensive" skull and brain damage as well as damage to the lungs and heart and "multiple breaks to multiple bones."

Testimony in the murder trial was scheduled to resume at 1 p.m. today. Before Creed testified Tuesday. Wold denied defense motions to move the trial from Ft. Bragg and to disqualify the jury.

The defense argued that Williams could not get a fair trial at the post, which consists primarily of airborne

In addition, the jury was reduced from 10 members to eight members Tuesday morning when the defense and prosecution each excused one

Defense attorneys excused Maj. John Lawrence, a veteran jumper, who said he had previously determined that Williams was probably guilty of the charge but changed his opinion when called for jury duty. Wold had allowed Lawrence to be seated.

Prosecution attorneys excused Sgt. 1st Class James Chillers who was not airborne qualified. Chillers was the only black on the panel. Williams is black, as was Hill.

The challenges left five officers and three non-commissioned officers on the jury. Five jurors are qualified

paratroopers.

For Williams to be convicted, six jurors must vote for conviction. Otherwise, he will be automatically acquitted.

Love Canal residents waiting for encouraging word from Washington

NIAGARA FALLS, N.Y. (AP) -Rebuffed at the county level and boosted at the last second by the state, Love Canal homeowners awaited word from Washington today on their plea that government buy their homes near a former chemical

In a stormy session Tuesday night, the Niagara County Legislature voted 16-15 not to participate in a proposed Love Canal Revitalization Authority.

Then Gov. Hugh Carey early today asked President Carter for an emergency declaration that would make federal funds available to buy the more than 700 homes and relocate the

"I didn't think he was supporting it, but it's definitely a step in the right direction," said Lois Gibbs, president of the Love Canal Homeowners Association, said of Carey's move.

The events were preceded by a statement from Richard J. Arcara, the regional U.S. attorney, that he was still investigating the homeowners' locking two Environmental Protection Agency officials in an office for more than five hours Monday. His decision to file federal charges might depend on future conduct of the homeowners, Arcara

In his telegram to Carter, the governor said the families are "experiencing serious concern and tension as to their current and future health" following the weekend re-lease of an EPA study showing chromosomal abnormalities in 11 of 36 area residents tested.

Noting that the state had already spent \$40 million on purchase of 239 homes and cleaning up the former dumpsite, he said the situation in the Love Canal neighborhood "is beyond the capabilities of state and local

But Carey's request came amid mounting uncertainty over the chromosomal damage study. Its author, Dr. Dante Picciano of Houston, refused Tuesday to let a federal team picked by the EPA review his data but said he would submit his findings to EPA officials in Washington.

The five-member panel had been sent to Houston to review the study by Picciano and his Biogenics Corp., which did not include a random sampling but was taken instead from persons who thought their health or body makeup might have been damaged by canal chemicals.

A State University of Buffalo Medical School director called the study insignificant.

"There certainly aren't any reasons, for these people to go into a panic," said Dr. Robin M. Bannerman, head of the Human and Medical Genetics Division Division of the medical school.

The study looked at 7,102 cells - a small sample — and found "no severely damaged cells," he said. Minor cell abnormalities identified in 29 of the 36 persons sampled can be found in all persons, Bannerman

New York state declared a health emergency in the area in August 1978 after long-buried chemicals began oozing to the surface.

WEDNESDAY, MAY 21, 1980

By The Associated Press

Three more Middle East oil producers, following the lead set last week by the United States' largest foreign oil supplier, have raised the prices of their crude oil by \$2 a barrel — and higher gasoline prices could

The United Arab Emirates, Iraq and Kuwait raised their prices Tuesday, according to reports in the Middle East and London.

The price increase by U.A.E. raised the price of that nation's crude to \$31.65 a barrel, the country's official news agency reported. The agency quoted U.A.E. Oil Minister Mana Saeed Otaiba as saying the increase, retroactive to May 1, was in line with increases an-nounced recently by Saudi Arabia, three other members of the Organization of Petroleum Exporting Countries and Mexico.

Shortly afterward, Sheik Ali Khalifah al-Sabah, Kuwait's oil minister, announced a boost in crude oil prices to \$29.50 a barrel. Both countries generally folpow the price moves of Saudi Arabia, which set off the latest round of increases when it raised its prices last week. Saudi Arabia is the non-Communist world's largest producer.

The increase, also retroactive, was the second by

Kuwait since February, when the price was raised from \$25.50 to \$27.50 a barrel.

Iraq's price increase pushed the cost of its light crude to \$29.96 a barrel, according to London's Financial Times. Indonesia announced a \$2-a-barrel increase in crude oil prices Monday and industry sources reported that Algeria and Libya also raised prices.

A \$2-per-barrel increase by all OPEC producers could raise U.S. retail gasoline and heating oil prices about 3 cents per gallon, and the increases already imposed are likely to add about 2 cents to the price of a gallon of gas, industry analysts said.

Indonesia's best North Sumatran crude - Arun condensate — now costs \$34.75 per barrel. Japanese and French oil industry sources said Monday they had been notified by Algeria that its benchmark Sahara blend now cost an extra \$1 a barrel. Including a \$3 'exploration fee," the Algerian oil now costs \$38.21 per

Oil industry officials also said Libya had notified customers of a \$2-a-barrel increase, bringing the price of its benchmark export crude to \$36.12 a barrel.

Mexico last week raised the price of about half of its crude-oil output by \$1.50, to \$33.50 a barrel. Mexico is not a member of OPEC, but usually follows the cartel's price changes.

Texaco believes in Atlantic region

ATLANTIC CITY, N.J. (AP) -Texaco Inc. says there's "significant accumulations" of natural gas off the mid-Atlantic coast even though an important exploratory hole is dry.

A Texaco-led group of oil companies announced Tuesday its leased semi-submersible rig Odeco Ocean Victory had tested a 16,104-foot well about 106 miles east of Atlantic City 'without encountering oil or gas in producible quantities."

Oil industry and government officials had said that the Texaco well, if successful, could have proven the existence of the first commerical gas field off the East Coast.

The well was drilled in a small, but very promising area of the Baltimore Canyon Trough where Texaco and Tenneco had reported seven natural gas strikes and one oil strike at different levels of three exploratory wells.

The dry hole was the second for Texaco and the 18th off the mid-At-

lantic coast in 27 months of exploratory drilling. All of the successful wells are located within about four miles of each other and in about 450 feet of

"There is little doubt that a significant accumulation of natural gas lies under parts of this block," Texaco said through spokeswoman Janis Golon. "However, the amount of gas that would be ultimately recoverable from the reservoir sands is not yet

Four counties gain strikes, reopeners

Howard, Reeves, Runnels and Nolan counties have gained oil or gas

Blanks Energy Corp. of Midland No. 1 Blassingame, a former oil producer in the Luther, Southeast (Siluro-Devonian) field of Howard County has been re-entered and recompleted as a Pennsylvanian reef gas

discovery. The operator reported a calculated absolute open flow potential of 4,153,-000 cubic feet of gas per day, through perforations from 8,647 to 8,650 feet after a 300-gallon mud-acid wash.

The gas-liquid ratio is 9,516-1, with gravity of the liquid 59 degrees. Total depth is 9,925 feet, the plugged back depth is 9,238 feet and 5.5-inch casing is cemented at 9,898 feet. The pay was topped at 8,610 feet on ground

elevation of 2.661 feet. Location is 1,980 feet from north and 1,320 feet from east lines of section 28, block 32, T-2-N, T&P survey and 11 miles north of Big Spring.

REEVES OPENER

Deck Oil Co. of Tulsa, Okla., No. 1 Perservere has been completed as a small pumping discovery from an unidentified zone in Reeves County, 2.5 miles northwest of Pecos.

The well finaled for a daily potential of 15 barrels of oil, gravity and gas-oil ratio unreported, and 102 barrels of water.

Completion was through perforations from 5,378 to 5,385 feet after 5,700 gallons of acid and 6,700 gallons of fracture solution.

Hole is bottomed at 6,541 feet, 4.5inch casing is set at an unreported The pay was topped at 5,378 feet on

ground elevation of 2,625 feet. Wellsite is 467 feet from northeast and southeast lines of section 44.

block 4, H&GN survey.

The wellsite is one location west of Standard Drilling Co., Inc., No. 1 Frank Sharp which was completed as

WTG Exploration, Inc. of Midland

announced locatons for a pair of

projects in the WTG (Glorieta) pool of

Garza County, 10 miles north of Post.

Each will be drilled to 3,400 feet.

a cherry Canyon oil discovery in 1967. That well now is abandoned.

RUNNELS STRIKES A pair of discoveries were complet-

ed in Runnels County. E. B. Fletch of Dallas No. 2-A W. H. Dismore was completed to open Capps oil production in the Pearl Valley (Fry and Gardner oil) pool six miles northeast of Bronte.

It finaled for a daily pumping po-tential of 25 barrels of 39.4-gravity oil and 65 barrels of water, through perforations from 4,610 to 4,614 feet after a 750-gallon mud-acid wash. The gas-oil ratio is 140-1.

The following tops were called on derrick floor elevation of 1,868 feet: Home Creek lime, 3,904 feet; Palo Pinto lime, 4,302 feet, and sand, 4,512 feet.

Total depth is 5,250 feet and 4.5-inch pipe is set at plugged back depth of

Wellsite is 1,200 feet east of the most northerly southeast corner of L. N. Taylor survey No. 2, then 2,000 feet north to location in L. N. Taylor survey No. 3.

D&J Operating Inc. of Abilene No. 2-A M. S. Hale was completed as an unidentified discovery in the Bernard (lower Gardner oil) pool of Runnels County, 14 miles southeast of Win-

It completed for a daily pumping potential of 9.34 barrels of 41.6-gravity oil, no water, through perforations from 3,684 to 3,691 feet after 250 gallons of mud acid and 10,000 gallons of

fracture fluid. The gas-oil ratio is 429-1.

Total depth is 3,851 feet and 4.5-inch casing is cemented at 3,841 feet. Location is 4,286 feet from south and 2,636 feet from east lines of Isaac

Wallace survey No. 139. The following tops were called on ground elevation of 1,984 feet: Dog Bend lime, 3,361 feet; upper Caps

lime, 3,470 feet; lower Caps lime, 3,554 feet; Jennings lime, 3,786 feet; Jennings sand, 3,778 feet and Gardner sand, 3,794 feet.

NOLAN REOPENER

W. H. Price of Granbury reported potential test on his No. 2-C Elmer Jordan to reopen the Price-Jordan (Canyon reef) field of Nolan County, four miles northwest of Blackwell.

On 24-hour potential test it pumped 126 barrels of 39.2-gravity oil and no water, through perforations from 3,-888 to 3,900 feet after 500 gallons of mud acd.

Total depth is 4,037 feet, 4.5-inch pipe is set at 4,000 feet and hole is plugged back to 3,950 feet.

Wellsite is 1,285 feet from north and east lines of section 34, block 1-A, H&TC survey. The well is a southeast twin to the

pool's original opener.

WINKLER OILER

Rial Oil Co. of Midland No. 3-72 Sealy & Smith has been completed in the Darmer, Northeast (Pennsylvanian) field of Winkler County, 16.5 miles southeast of Kermit. A re-entry project, it finaled for a

24-hour flowing potential of 102 barrels of 39-gravity oil, with a trace of water, through a 1/4-inch choke and perforations from 89,747 to 8,776 feet. The gas-oil ratio is 850-1 and the pay

was acidized with 15,000 gallons. Total depth is 8,999 feet, 4.5-inch pipe is set at total depth and pay was topped at 8,747 feet on ground elevation of 2,731 feet.

Location is 2,173 feet from south and 1,980 feet from west lines of section 72, block A, G&MMB&A survey. The hole originally was drilled by Texas Pacific Oil Co., Inc., as No. 2-B Sealy Smith and abandoned in 1970 at total depth of 11,535 feet.

No. 3072 Sealy & Smith is 5.8 mile northwest of the closest Pennsylvanian producer.

Six counties in West Texas gain seven wildcat projects

Wildcat operations have been reported in Mitchell, Garza, Crockett, Schleicher, Nolan, and Runnels coun-

The Mitchell wildcat operation is Sun Oil Co. No. 30 V. T. McCabe which originally was scheduled in the Jameson, North (Strawn and Ellenburger)

The operator filed an amended application with the Railroad Commission of Texas making the project a wildcat. The wildcat completion will be at 6,800 feet. The project has been drilled to 7,300 feet.

Location is 1,300 feet from north and 15 feet east of section 225, block 1-A, H&TC survey and four miles north of Silver.

GARZA EXPLORER

The Wil-Mc Corp. of Dallas an-nounced lcoation for an 8,200-foot wildcat in Garza County, three miles south of Justiceburg.

It is No. 2 Mrs. Ray Smith, 810 feet from north and 660 feet from east lines of section 26, block 6, H&GN survey. Ground elevation is 2,360.4

Drillsite is 3/4 mile north of the depleted Tobe, South (Mississippian) field which produced at 7,805 feet, 3/8 mile northeast of an 8,044-foot dry hole and 1/4 mile southwest of an 8,080-foot failure.

CROCKETT WILDCATS

Chevron U.S.A. Inc., operating from Midland, staked No. 1 Scull Estate as a 9,000-foot wildcat 11 miles northeast of Sheffield in Crockett County.

The prospector is 1,888 feet fromnorth and 1,430 feet from east lines of section 7, block 1, GC&SF survey and 1 5/8 miles northeast of the Ponlaw (Soma gas and Queen oil) pool.

J. Cleo Thompson of Dallas No. 1-33 University is to be drilled as a 9,500foot wildcat 10 miles west of Ozona in Crockett County. It is 1,916 feet from north and 1,320

feet from west lines of section 33, block 31, University Lands survey. The drillsite is 1 3/4 miles southeast of the Massie (San Angelo) field and three miles southeast of the Ozona,

SCHLEICHER TEST

Wet (Strawn gas) pool.

Simpson-Mann Oil Producers of San Angelo will attempt to reopen the Cox-Brown (Strawn oil) pool of Cox-Brown (Strawn oil) pool oil pool Schleicher County, nine miles south of Christoval.

The scheduled 6,000-foot project is 1,180 feet from north and 330 feet from east lines of section 80, block M, GH&SA survey. Ground elevation is 2,164 feet.

The project will be drilled as No. 1-80 Byers, 1,500 feet southwest of the pool's original discovery.

NOLAN EXPLORER

Fisher-Webb Inc. of Abilene No. 1 Johnson has been staked as a 6,000foot wildcat 15 miles south of Sweetwater in Nolan County.

It is 1/2 mile south of the Canyon reef reopener of the EVB, Southwest field which produces at 5,783 feet. Location is 660 feet from south and 1,980 feet from east lines of section 67,

block X, T&P survey. The project also is 5/8 mile east of the field's lone Canyon sand producer.

RUNNELS WILDCAT

Fisher-Webb Inc. of Abilene No. 1 Fiveash is to be dug as a 4,350-foot wildcat in Runnels County, five miles northwest of Ballinger.

It is 3,502 feet from north and 1,320 feet from east lines of William Howell survey No. 821, abstract 255. It is 1 5/8 miles west of 3,459-foot

production in the Ballinger mulitpay

GARZA WELL

D. A. Metts of Midland No. 1 Aldridge has been completed in in the Rocker A, Sothwest (Ellenburger) field of Garza County, six miles west of Justiceburg.

The operator reported a calculted 24-hour flowing potential of 288 barrels of oil, gravity and gas-oil ratio not reported, through a 15/64-inch choke and perforations from 8,192 to Total depth is 8,228 feet, and 4.5-

inch casing is cemented on bottom. Location is 467 feet from north and 1,980 feet from east lines of sectio 58. block 6, H&GN survey.

MIDLAND RECOMPLETION Mobil Producing Texas & New

Mexico Inc. has recompleted its No. 15 Roy Parks in the Parks (Pennsylvanian) field of Midland County, 14 miles southwest of Midland.

Operator reported a new potential of 14 barrels of oil, gravity not reported, and 22 barrels of water. The gasoil ratio is 71-1. Completion was through perforations from 10,410 to 10,519 feet after a

5,000-gallon acid treatment. The original perforations are from 10,782 to 10.827 feet. Total depth is 11,025 feet, plugged backdepth is 10,891 feet and 5.5-inch pipe is set on bottom. The pay was topped at 10,410 feet on derrick floor

elevation of 2.841 feet. Locaton is 660 feet from north and

east lines of section 3, block 40, T-23-S, T&P survey.

WINKLER WELL

Gifford, Mitchell & Wisenbaker of Midland No. 3 Comanche Unit has tan) field of Winkler County, 12 miles northwest of Kermit. The well, in the north edge of the

been completed in the Cheyene (Capi-

pool, finaled for a daily flowing potential of 166.5 barrels of oil, calculated from a 16-hour flow through a 14/64inch choke. The well also flowed 28.5 barrels of water during the 16 hours. Gravity of the oil is 32 degrees and the gas-oil ratio is 1,234-1.

Completion was through perforations from 3,126 to 3,152 feet and from open hole 3,178 feet, where 5.5-inch casing is cemented, and total depth of 3,214 feet.

The pay was topped at 3,126 feet on ground elevation of 2,878 feet. Location is 467 feet from south and west lines of section 13, block C-23, psl

Enrich Oil Corp. of Abilene No. 1-82

Double M Ranch has been completed as the second well in the Double M (Cook) pool of Nolan County, six

PAGE 1D

miles southwest of Maryneal. The second well in the field, it finaled for a daily flow of 55 barrels of 44-gravity oil and 26 barrels of water, through a 20/64-inch choke and perforations from 5,667 to 5,713 feet.

The gas-oil ratio is 1,363-1 and completion followed a 750-gallon mud-acid wash and a 40,000-gallon fracture

The Cook sand was topped at 5,665 feet on derrick floor elevation of 2,587 feet. The Odom lime was topped at

Total depth is 7,113 feet, 4.5-inch casing is set at 5,747 feet and plugged back depth is 5,739 feet.

The well, one mile east of the other producer, is 660 feet from south and 990 fet from west lines of section 82, block 1-A, H&TC survey.

Adobe wildcat flows gas

Adobe Oil & Gas Corp. of Midland has reported big gas flows from the Bone Springs at its No. 1-31 Barstow, wildcat operation in Ward County, one miles south of Barstow.

The assured discovery flowed the following rates through perforations from 8,903 to 8,935 feet:

On 3/4 choke, estimated rate 6,700,-000 cubic feet per day. On 1/2 choke on one-hour test at rate of 10,400,000.

On 3/4 choke on three-hour test at rate of 16,700,000 cubic feet per day; On one-inch choke on one-hour test at rate of 21,000,000 cubic feet per day.

The project is 8,580 feet fromnoth-east and 660 feet from southeast lines of section 38, block 33, H&TC survey and 1.2 mile south of Scott (Cherry Canyon gas) production and one mile west of Scott (Cherry Canyon oil) production.

Stock market mixed

NEW YORK (AP) - Stock prices were mixed in a list-less session Tuesday as the market's spring rally showed signs of fading.

The Dow Jones average of 30 industrials scored its sixth consecutive gain with a 1.62 advance to 832.51. But most other indicators finished on the minus side.

New York Stock Exchange volume totaled 31.80 million shares, up from 30.97 million

City Investing led the active list, up 3½ at 25% on turnover of nearly 1.2 million shares as of the 4 p.m. close in New York. Diamond Shamrock also

active, picked up % at 28 in trading that included an 827,-400-share block at 27%.

The daily tally on the NYSE showed losers out-

stripping gainers by a small margin, and the exchange's composite index of all its listed common stocks eased .04 to 61.35. Standard & Poor's index of

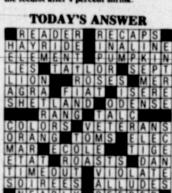

400 industrials managed a .03 gain to 120.80, but S&P's 500-stock composite index was off .05 at 107.62. On the American Stock

Exchange, the market value index rose .49 to 259.73. The NASDAQ composite index for the over-the-counter market closed at 146.93, off

Livestock

AMARILLO, Texas (AP) — Texas Panhandle and western Oklahoma feedlot roundup. Confirmed: 1100.

Trade very slow throughout the panhandle area through mid-afternoon tuesday, not enough slaughter steers or heifers sold to fully test trends. aithough few loads both classes sold steady to 1.00 lower. Feedlots reported light inquiry. Sales on 500 slaughter steers, 600 slaughter heifers. Note: all live cattle prices based on net weight fob the feedlot after 4 percent shrink.

New courses set at Grad Center

Basin Graduate Center, 105 W. Illinois Ave. Joyce Sherrod will be the instructor for an in-depth course in business writing and engineering writing, which will teach participants to write clearly, ac-

curately and fast. Ms. Sherrod has 17 years teaching experience and received her master's degree from The University of Texas of the Permian Basin.

There will be six sessions of the course and classes will be held Mondays and Thursday from 7-9: 30 p.m. starting July 14 at the graduate center. Fee is \$85 and includes participant's manual.

Oil and Gas Accounting, Level 1, will begin June 18 and will meet at the graduate center Wednesday and Thursday from 9 am. to 4 p.m. Fee is \$260, including

Robert J. Koester, associate professor of accounting at Texas Tech Universty, will be the instructor. He holds a Ph.D. in accounting and is a Certified Public Accounting. He teaches oil and gas accouning and courses in managerial accounting.

Woman prisoner released on parole

AUSTIN - Diana Perez, convicted of theft over \$200 in Midland County March 31, 1978, has been paroled by Gov. Bill Clements on a recommenda-tion of the Texas Board of Pardons and Paroles.

Perez was paroled to Midland County after serving and earning three years and eight months of

five-year sentence. Gary W. Alley, convicted of burglary in Ector County in 1977, also had his parole revoked because

Alley had been on parole since Dec. 20, 1978.

of a new conviction.

Livestock auction report

Southwestern Livestock Auction ran 977 head of cattle through the auction Tuesday.

The market was \$3 to \$4 higher on all feeder cattle, \$1 to \$2 higher on packer cows and bulls. Cow and calf pairs were \$75 to \$125 higher. Bred cows were \$4

Here is a rundown on the market: Steers — 600 to 700 pounds, \$66 to \$70; 500 to 600 pounds, \$72.50 to \$75; 400 to 500, \$75 to \$82; 300 to 400, \$82 to \$92; and under 300, \$92 to \$104.

Heifers — 600 to 700 pounds, \$57.50 to \$62; 500 to 600, \$62 to \$65; 400 to 500, \$67.50 to \$70; 300 to 400, \$72.50 to \$78.50; under 300, \$78.50 to \$85. Cows utility sold for \$44 to \$48 per hundredweight.

Canners and cutters went for \$41.50 to \$43.50 per

Bulls yield Grades 1 and 2 went for \$55 to \$61.25 per hundredweight. Breed cows were sold for \$48 to \$52 per head.

Cow and calf pairs were sold for \$625 to \$800 per
