Flames Destroy Small Trailer House Thursday

Loss of several hundred dollars resulted from a fire which destroyed a trailer house at the George Tatum home on East South 1st Street late Thursday afternoon.

The small structure was being used as a storeroom, and one section had been converted into a brooder house where 50 baby chicks were being cared for. Heat and smoke killed the chicks, and a number of articles of furniture stored in the small building burned.

Fire Marshal R. A. Lane said the fire apparently started from defective wiring, as electric bulbs were being used to heat the improvised brooder house.

Independence Day, Wednesday, July 4th.

Voting strength in each box in the county, based on poll tax receipts and exemption certificates issued:

No. 2, Haskell 398

Two New Members Elected to Fire Dept. Vacancies

Two new members, Ray Overton, Jr., and Hugh Watson, were elected as active members of the Haskell Fire Department Monday night, to fill vacancies created by recent resignations of Walter Gresham and John B. Martin.

Delegates and alternates were also appointed to attend the State Firemen and Fire Marshal's Convention in Edinburg in June. Attending as delegates will be Chief Ray Lusk, Fire Marshal R. A. Lane, Frank Reynolds and Jim Alvis. Alternates are George Tyler, E. R. Starr, Jack Speer and Brooks Middleton.

Covell Adkins, captain of the department's racing team, announced that regular practices would be held twice weekly until the district convention April 14 in Snyder.

A large delegation from the local department will attend the Snyder convention. The affair is the semi-annual meeting of the Mid-West Texas Firemen's Association. Chief Ray Lusk of the Haskell department is currently serving as president of the district association.

Courthouse Offices Will Be Closed Saturday

With the exception of the Sheriff's department, all offices in the courthouse will be closed Saturday, insofar as transaction of official business is concerned.

This will be necessary in order to avoid conflict with the special tax reallocation election being held on that date.

Automobile owners are reminded that the Collector's office will be closed, and no automobiles can be registered Saturday.

Polling places for Haskell's four voting boxes will be in the court house. Voters in Box No. 1 will ballot in the Welfare Office; those in No. 2 in the Assessor-Collector's office; No. 3 in the County Clerk's office; and No. 4 in the County Superintendent's office.

Qualified voters of Haskell County will ballot Saturday on reallocation of county tax funds, and on a proposed 30-cent county ad valorem levy which would not apply on homesteads.

Also, voters will be afforded an opportunity to register a "straw vote" on the proposition of predatory animal control in Haskell County.

The latter proposition is to determine whether a majority of taxpaying voters favor the County paying part of the salary of a Government trapper.

The reallocation proposal will not change the county tax rate. It merely means that the Commissioners Court will be authorized to allot the tax levies for operating expenses on an equitable basis to the operating funds. The revision would not change the combined total of the four funds, which would remain at 80 cents.

The 30-cent county ad valorem levy would be used for improvement and maintenance of lateral roads, purchase of right-of-way for Farm to Market roads, repair and building of bridges, etc. If the 30-cent tax is voted, all homesteaded property up to \$3,000 will be exempt from this tax.

Also, a 25-cent tax now being levied on all taxable property in the county, including homesteads, will be discontinued if the 30-cent ad valorem tax is approved, county officials have announced.

The 25-cent levy now being collected goes into the road bond interest and sinking fund and cannot be used for any other purpose, it was explained.

Saturday's election was called solely for balloting on the two tax propositions, county officials explained.

The "straw vote" on the proposition of employing a full-time trapper is being submitted as a means of determining the wishes of a majority of the taxpayers in the county on the question.

Every voter in the special election will have an opportunity, if they desire, to mark an unofficial ballot on the predatory animal control program.

Voting will be at each of the 20 voting boxes in the county, at the regular polling places in the various towns and communities.

State Officer of Farm Bureau to Speak Here

An important meeting for Farm Bureau members and all others interested in agriculture will be held at the Elementary School auditorium Monday evening, March 19.

Other prominent speakers who have been invited are State Senator George (Cotton) Moffett of Chillicothe, and L. A. Barbour, district Farm Bureau director.

Shelly Royall, president of the Haskell County Farm Bureau, urges all members to attend, and to invite their neighbors and others interested in farm problems.

Refreshments will be served, and prizes will be awarded during a quiz period. Royall reminded Farm Bureau members they should be posted on information concerning the organization in order to participate for the awards.

Harold D. Purdy Resigns as Junior High Principal

Resignation of Harold D. Purdy as principal of Haskell Junior High School was announced this week. He terminated his work with the school last week, after advising the school board that he intended to resign. His letter of resignation was received Tuesday, Supt. C. D. Allen said.

Until a successor to Mr. Purdy is named, his duties will be assigned to various members of the school faculty.

Mr. Purdy, who joined the faculty of Haskell schools in September, 1955, previously was with a Fort Worth insurance company. In tendering his resignation, he advised the board that he planned to go to Dallas, where he had accepted a position with Employees Mutual of Wausau, in the insurance company's Dallas branch.

OUT ON A LIMB

By CHARLENE WHITE

If you happen see a very small bat flying about anywhere, don't be afraid. It's just the baby bat. He was, briefly, a part of our town as he got out of his box and started sailing around the house. We were out of our box at the time, sailing around town. We went to see Ma and a girl friend in the most delightful group seen in these parts since HBS Minister. Ma had a scarf tied over her hair and was swinging a broom. Friend wore a low-cut, slightly draped over her head and was brandishing a dustpan. "What is the blue-eyed world are these things on your heads for?" we inquired of so politely figuring they had slipped completely. "Because of a hat pin in your hair it would come out if it tumbled," they answered. "Ha, ha," we replied. "Thank you, I'll be sure to get it out of here. What they thought of? "Thank you they had me! In this past but a few days we've got vacuum cleaners, automatic dishwashers, and hi-fi, but no buttons to push to get rid of a hat. After brooding over it for a while, we finally just opened the window. The poor animal flew out, doubtless thinking, "And they call me baby!"

Walter Winchell says Father Williams will have the most important job at the Orange Kelly-Prince Summer theater. "Try to get to the homecoming party!"

Wall Street financiers might get some pointers from our neighboring town of Austin, where the City Council has come up with a plan to make millions without raising a penny. They propose to vote \$10-million revenue bonds, build an electric plant, get set back and take it easy. The plant supposedly will return a net profit of \$200,000 per year after paying for minor items like operating expenses, maintenance, taxes and interest payments. They are paid in 40 years, but everything's "revenue" bonds, so the words of a jurist named Haltem are: "and what do you get?"

Talk about sillies. Pa was working on a well near Aspermont recently and wanted to talk Wichita Falls. The only way they could make contact was to talk a drilling barge, the La Florida, off the coast of Haiti. They in turn would radio Wichita and relay the messages. That's what we call being in the same way.

Guess it shows a lack of breeding or culture or something, but Shakespeare and Oliver aside, the presentation of Richard the III on Twelve Sunday was quite dull. After the eighth or ninth murder, we're inclined to get pretty bored about the whole thing.

Just about the two busiest people in town last weekend were Rev. Ed Moore and Mrs. Fred Brown. It was the business of counting money collected from the booklets for the International Center. The side job was to do a service for collecting cash, but should be commended for their concern.

Shades of Brother Murphy! With the homecoming group, the members of HBS certainly looked an odd lot. They were speaking of head, we understood that David Josselyn will play Lancelot from the "lower regions." Type casting, do you suppose? Name of the play is "East Annapolis" and it features hearts and such. Guaranteed to make you collapse with joy.

Mrs. Irene Ballou's name figured the key speech at the TCA's district convention by running a little late service of her own. She volunteered to take a fellow delegate to a home in the residential district. She promised to come back for her and was quite confident she could find the proper street because she knew she had turned on the corner where the merry-go-round was located. Later that evening she drove up and down the boulevard but in vain. Finally a taxi carried her out and her delegate friend slipped, jumped into the car, and expounded that the carrousel had mysteriously pulled up stakes and moved away!

Colorful History of Texas Is Basis For Harmony Club Program Thursday

A varied and interesting program on "Texas," with its colorful history and rich tradition, which is a compound of the cosmopolitan and the frontier spirit was presented by the Harmony Club Thursday evening, March 8, when members met at the home-making cottage for the annual Texas Day program.

Mrs. Tommie B. Hawkins was hostess. Mrs. V. W. Meadors, vice president, was director, and also presided during the business meeting in the absence of the president, Mrs. James F. Cadenhead.

The program was opened by group singing of the state song, "Texas, Our Texas," composed by William J. Marsh of Fort Worth. Roll call was answered with Texas brags and jokes which revealed Texans' uninhibited devotion to their outsized state and incredible homeland.

Mrs. Hawkins gave the story of the three million-acre XI Ranch which acquired its vast holdings in exchange for the building of the beautiful state capitol in Austin in 1875.

Miss Martha Meadors gave an interesting report on Texas Facts, listing many "Texas Firsts" in industries, agriculture, oil and cattle.

Mrs. Meadors gave a report on "Touring Texas." "Texas though young in spirit could trace its history back over the centuries to the Spanish Conquest." She told of Texas under the six flags, the French, Spanish, Mexican, Confederate, Republic of Texas and Old Glory. She pointed out that the natural geographical outline of Texas divides the state into four parts.

The western, or Trans-Pecos where the first Mission was built at Iteleta. This area includes Big Bend National Park and MacDonald Observatory. The Eastern, where Dallas is known as the fashion center of the South and the fabulous Rose Festival is held at Tyler. The Hill Country, that includes historical San Antonio with its Alamo and other Missions, Brackenridge Park and the State Capitol. The Gulf Coast, including Houston, metropolis of the South, the Cradle of Texas Liberty at Washington on the Brazos; Galveston and Corpus Christi and the Magic Rio Grande Valley, known as the playground of the world. The speaker concluded with "Though Texas has been low in education and culture, she is making great progress in these fields."

A musical program was presented featuring Western music. A whistling trio composed by Mrs. Cadenhead, Tanny Squires and Mrs. Floyd Cook presented "Gold Mine in the Sky" and two vocal numbers, "The Singing Hills" and "Home on the Range" with Mrs. M. E. Heiber, piano accompanist.

Mrs. A. C. Foster played a piano solo "The Sheep and Goats" which was a medley of fiddler tunes by the Texas composer, David Guion. Mrs. Lela Harris, dressed in cowboy regalia gave "Back in the Saddle Again."

The hostess assisted by members of the social committee, Mrs. Heiber and Miss Beryle Boone served coffee and cake. Plate favors were key rings of miniature boots fashioned in black leather with gold lettering, compliments of the nationally known Nacona Boot Co. of Nacona, Texas.

Most FHA Real Estate Loans Made For Developing Family Type Farms

Most of the Farmers Home Administration's real estate loans made in Texas last year were for improvement and development on family type farms such as constructing and repairing farm buildings, adding more acres, fencing, improving soil fertility, and establishing permanent pastures, the agency's local county supervisor, William E. Lawson said this week. Loans are also available through the agency to purchase family-type farms.

Mr. Lawson also reported that most of the funds for farm ownership loans in the state were supplied by banks and other private lenders under the agency's insured farm loan program rather than through direct loans from appropriated funds.

In Haskell and Stonewall Counties, which comprise Mr. Lawson's unit, farm ownership loans totaled \$77,520 in the 1955 fiscal year, and 74 percent of the funds were supplied by private lenders. Mr. Lawson said he looks for more private sources to advance additional farm ownership

loan funds this year. Already we have five of these insured loans in process. Local banks are the lenders, and the Government insures the loans.

The total amount of a farm ownership loan cannot be more than the fair and reasonable value of the farm as decided by the local county committee. They base this value on the farm's long - time earning capacity as determined by an appraiser. Also, a loan cannot be for more than the average value of the efficient family-type farms in the county. An average value has been established for each agricultural county in the nation. The value for Haskell County is \$20,000; for Stonewall County, \$30,000.

The farmer pays an interest charge of 4 1/2 per cent on farm ownership or soil and water conservation loans. If the loan is from insured funds, the lender

receives a net of 3 1/2 per cent and the Government receives 1 per cent as an insurance charge. The agency makes, services, and collects the loans.

Farm ownership loans run for a 40-year period, with opportunity to repay ahead of time. The time limit on individual soil and water conservation loans is 4 years.

Economical performance is the big reason why Ford's the V-8 leader!

It takes a FORD to squeeze maximum power out of today's gasoline

Only Ford gives you modern Short Stroke power—V-8 or Six—in every truck! Short Stroke design means up to 53% more power with no increase in engine size

Just one kind of engine can give you all the mileage built into today's gas. And that's a modern Short Stroke engine—the new kind of truck power pioneered by Ford.

Short Stroke engines develop the kind of power that used to be possible only with much bigger engines. And Short Stroke engines do it on less gas! The shorter stroke means less piston travel, which means less friction to waste power and gas, and less wear, too. You get more usable power also—power that works for you at the rear wheels!

Weinert Sets Example of Community Cooperation In Building Civic Center

By CHARLENE WHITE

The new Weinert Community Center building is a "community project" the truest sense of the word. This little city of 288 inhabitants has thrown open its doors to a community center valued at \$2,000. It was used Thursday night for the first time when the local Lions Club, only recently organized, met there for a regular meeting.

The brick building, formerly a bank, before that a post office, and more recently occupied by a cafe, was bought by the Weinert City Council for \$900, for use as a community center. And then the community went to work. Services and time were donated by men and women alike. In fact it was the women who started the whole thing.

The Weinert Matrons Club, a women's civic organization chartered in 1923, pushed the project as their entry in a current civic improvement contest sponsored jointly by the Sears Roebuck Foundation and the General Federation of Women's Clubs.

Mrs. C. T. Jones is president of the Weinert club, with Mrs. W. A. King and Mrs. W. B. Guess first and second vice presidents. Mrs.

E. F. Rainey secretary, Mrs. H. W. Liles treasurer, and Mrs. P. F. Weinert parliamentary. Chairman of the Community Achievement project is Mrs. Fred Monke. The steering committee, for repairing the building into a center, is Mrs. Fred Monke, Mrs. P. F. Weinert and Mrs. Bill King.

Actually, the club was supposed to ask other organizations in the community to take part in the project, but there being none, they asked instead the local ministers, city council, and school board. And the response was immediate and enthusiastic. However, many who assisted belonged to none of these select groups.

In the early fall of last year, the Matrons Club sponsored community-wide programs to stimulate interest in a community building. To raise money, they set the first example by donating \$100 from their treasury. They promoted game nights and pie suppers, raising over \$400 in one night.

During the winter the Weinert Lions Club was organized and they backed the project solidly. They donated the paint and much of the labor for decorating the interior. The walls were painted a soft pink shade while the women sewed brown cafe curtains. Present plans call for chandelier type lighting fixtures. Thus far the cost, including the amount paid for the building, is estimated at \$1,400.

The auditorium will seat 200, and office space for the City Council is located in the rear of the building. A small kitchenette adjoins the auditorium, which measures 24x36 feet. The entire building measures 24x60 feet. It will be used for club meetings, banquets, game nights, and as an entertainment center for the youth of the area.

The members of the Matrons Club don't really think they will win the contest, but they don't care. They've got bigger plans in mind for beautifying the city, putting up street markers and highway markers.

Weinert is having its biggest boom since the railroad arrived in 1907, they declared.

Methodists Organize Church Here In 1885; First School Started Same Year

No. 6 in a series of articles on early days in this section, based on material in the late R. E. Sherrill's "History of Haskell County."

By CHARLENE WHITE

No American community could long live without its churches and in Haskell County the Methodist people had organized in 1885. As the town continued to grow, other denominations naturally wanted their own organizations. The Presbyterians with eight members made a partial organization, July 30, 1886. After holding out for a couple of years it ceased to operate till it was re-organized in 1890. The Baptist organized Sept. 8, 1885 with nineteen members and began services which they have kept up ever since.

During the summer of 1889, a subscription was taken up for the building of a Methodist Church. Everybody cooperated in the building of the first church in the county. The contract was let to J. W. Evans in August, 1889. People of the community generally attended church and the various denominations cheerfully cooperated with each other. Outsiders when called on for a donation willingly responded. For years the only Sunday School was a union school, all parties participating with Judge Sanders as superintendent. Time was divided between Baptists and Presbyterians till a short time later each erected its own church.

In the spring and summer of 1885 Miss Mollie Holms conducted a little private school in a shed room on the side of a building belonging to Mike Tucker, and the front end of it was used for a feed store and the family lived in a room in the back end. There were seven children enrolled. Phinton Smith, Ernest Smith, Will Hills, Clyde Hills, Jim Tucker, Earl Standefer, and Cue Standefer. The desks consisted of goods boxes and the school ran from three to four months. This was the first school in Haskell County.

About this time a little school house was erected in the south part of town where the south ward school building now stands.

In this little school house the first school was taught by Jas. A. Ruble for four or five months in the fall of 1885.

Ruble was followed in the spring of 1886 by Tom Jones for a few months. Following Jones was D. James with Miss Mollie Martin taught a public school till April 8, 1887. The board with Lamar announced the text books to be used, the rules to be observed. Rule 6 was thus: "Each pupil shall have equal rights and privileges, and no pupil will be allowed to impose on one another." And Lamar was teaching grammar too!

In the winter of 1886-1887 Haskell was a cosy little village claiming a population of 300. In the summer of 1888 the town claimed a population of 500 with 100 pupils ready for school, and the little house in the south part of town was too small, and was torn down. The lumber was used in building a two room building in the north part of town.

In September, 1892 the school under Prof. J. W. Merchant was thoroughly graded, the primary, grammar and high school departments established, which was quite a credit to the school, and drew considerable patronage to the town.

February 11, 1904 the school building burned. The building was valued at \$3,000 and there was only \$750 insurance on it. All were at sea. The life of the town was threatened with uncertainty of railroad building, and no one was willing to invest in every substantial improvements. After much investigation by prominent men of the community an election was held Oct. 1, 1904, in corporation five miles square, the largest then to be had, into an independent school district. November 5 a 50 cent tax rate and a \$15,000, 40 year 5% bond issue was voted in the district without a single opposing vote being cast. The new school building was finished and school opened October 9, 1905, with F. L. Morrow superintendent.

Southwestern Life Sets New High Marks in 1956

Safety Check of Cars Behind Schedule

Safety inspection of the nearly 4,000,000 vehicles registered in Texas is "falling seriously behind schedule" with the official deadline only six weeks away.

TAKES OFF LIKE YOU'RE WEARING SPURS

Come try it — and you're in **BUICK'S THRILL-A-MINUTE CLUB**

THE THRILLS begin in the first sixty seconds — and from then on they come in clusters.

Right off, you feel the stepped-up getaway in Buick's new Variable Pitch Dynaflo* — a blazing new take-off even before you switch the pitch.

Because now — right in the topmost inch of pedal travel — right where you do most of your driving — right in the fuel-saving economy range — you're moving with a solid new "take-hold" getaway that's brisk and blessedly smooth.

Then you double the thrill.

For when you want to pass — or climb — or get out of a tight spot fast — you floor the pedal and switch the pitch. That brings you an absolutely smooth burst of full-power go-ahead on the split second — and it's the nearest thing to soaring flight yet.

It's a double-barreled package of excitement — and it's teamed with the most powerful V8 engine in Buick history — a 322-cubic-inch engine with no less than 9.5 to 1 compression in every CENTURY, SUPER and ROADMASTER.

All that would seem like thrill enough — but you'll find you've hardly scratched the surface.

You'll find yourself glowing all over from the sweet and level buoyancy of Buick's great new ride.

You'll feel a serene satisfaction from the way this trim beauty handles and corners and tracks to the road with the trust sense of direction yet.

And certainly you'll have to feel the good feeling that's yours just from bossing this big and brawny and beautifully sculptured automobile that's like a thing alive, and impeccably obedient.

We'd like you to know and feel all this firsthand — just by trying out a new Buick. That's all you do to join Buick's Thrill-A-Minute Club.

Why not become a member in good sitting today? And when you do, we have some big-thrill news on prices, too.

*New Advanced Variable Pitch Dynaflo is the only Dynaflo Buick builds today. It is standard on Roadmaster, Super and Century — optional at modest extra cost on the Special.

 The 14th anniversary of the Atlantic Fleet Amphibious Force will be commemorated March 14 by 15,000 "amphibians" aboard the more than 80 Amphibious Force ships and shore stations. Parent's Magazine Reveals

SAYS "REBEL WITHOUT A CAUSE" IS AN EXPLOSIVE AND FRIGHTENING

The turbulent emotions of the adolescent for adult guidance while trying to "beat the crowd," are EXPLOSIVELY DEMONSTRATED in this frightening film. The late James Dean's performance that bemoans his tragic acting honors with Natalie Wood and two equally troubled young people from the side of the tracks, who are desperately approval and starved for understanding parents. True, the film stacks the parents who cannot cope with the needs of their children because they are having to prove to bullies of their own "re-dare-devils", and to face harsh judgment as a result, is convincingly as a mascope and color.

Adults—Excellent. Young People—Mature but safe. Children—No.

DEAR PATRONS: We must frankly admit that "Rebel Without A Cause" will jolt everyone of us with its message, but its implications are for ADULTS, too, as well as teenagers. The compelling force behind juvenile delinquency is a solution to the problem lies far more with our kids, many of whom are adorably swept into violence without knowing why.

If "Rebel Without A Cause" jars you into a new realization of RESPONSIBILITY toward the guidance and standing of our YOUTH, then this picture has been made in vain.

Mattson Teachers Attend TSTA Meet; Schedule Busy Round of Activities

Supt. Elvin T. Mathis and all members of the faculty of Mattson rural high school attended the annual convention of District VII, Texas State Teachers Association, in Sweetwater Friday and Saturday.

This week, the teachers and students headed into a busy schedule of activities that will continue well into spring.

Scheduled today was the visit of two inspectors from the State Education Agency who will make the annual accreditation check of Mattson school. Making the inspection will be J. B. Golden of the textbook division, and Miss Ruby Bennett.

Scheduled this week were mental maturity and achievement tests for the grades below high school level.

Volley Ball Tournament
Mattson school has developed an active program of high school athletics during the current school year, and this week is sponsoring the first invitation girls volleyball tournament held at Mattson since 1946.

The tourney begins today and will continue through Friday and Saturday. Girls volleyball teams entered include O'Brien, Rochester, Munday, Peacock, Weinert, Old Glory and Mattson, Supt. Mathis reported.

In a four-game volley ball series with Weinert last week, Mattson girls tied 2-2, while Mattson boys team won three and dropped one contest.

In addition to the volley ball tournament this week, Mattson is planning for two or three practice track meets in preparation for the spring track meet events.

Slide Rule Meet

As the first event of its kind in this section, Mattson is sponsoring a Slide Rule Meet and number sense contest Monday, March 19, in which teams from Rule, Old Glory, Weinert and Mattson will compete. Three freshman girls, Dorinda Kretschmer, Janice Campbell and Rose Petrich compose the Mattson team. Incidentally, each of the freshman girls rated at senior level or above in mathematic achievement tests.

An attractive trophy will be presented to the winning school, with individual medals to first, second and third place winners in slide rule and number sense contests.

Mattson will take part in the District 13B Interscholastic League One-Act Play contests at Aspermont Friday, March 23. Rehearsals for the play, "Nobody Sleeps" are being conducted under the supervision of Supt. Mathis as director. The cast includes Lloyd Kloze, Sandra Peiser, Barbara Peiser, Mary Sue Bird and Sue Sorenson.

Kite Flying Near Electric Lines Risky Pastime

March winds are a boon to kite flyers and kites are in the air. Now comes a word of caution from a farm safety expert, "don't fly kites near electric power lines."

The safety expert, W. L. Ulich, agricultural engineer for the Texas Agricultural Extension Service and secretary of Texas Farm and Ranch Safety committee, says reports are already coming in from over the state on accidents or near accidents involving kites.

One of the greatest dangers, says Ulich, comes from flying kites near power lines. Should a kite become tangled in a line, don't try to get it down. Leave it there and call the power company for assistance. A damp string will conduct electricity and shock could prove fatal. Above all, he warns against using metal such as Christmas wrapping string for flying kites.

Should such a combination come in contact with an electric power line, there'll be trouble and it could be serious.

Ulich says it is fun to fly a properly constructed kite. He suggests taking the kite to an open field or pasture for flying. There the danger from power lines and traffic hazards are no problem and kites can be flown by even the youngest member of the family.

6s-V8's
CRUISING AXLE

GMC brings you the most impressive improvements of a 1956 trucks

Now we can show you these great new GMC's that are further than ever ahead of all others. Their advances not only clinch power supremacy—but reach into fields still unexplored by other truck-makers.

For example, GMC's Road Shock Damper Suspension*—plus a unique new stabilizer—produces in half-ton models a ride comparable to the finest passenger car.

An optional new fast-ratio cruising axle in light-duty GMC's gives you an overdrive's pace and economy without its cost.

Sharply increased engine displacement in both sixes and V8's gives you a power family unsurpassed in the light-duty field. Specifically, we offer GREATER displacement on 6-cylinder models—16.2% on V8's than our nearest competitors. GMC V8's, mind you, match the shortest ratios in the truck industry.

Styling is well into the future—panoramic windshield to sand-tight tail gate. Tubelless tires, of course. And a 12-volt electrical system is standard.

These are some of the strides presented in 1956 Blue Chip trucks we now have on view. The values are even more notable. Come in and get the facts!
