

Commander's Comments . . .

By COL. DUDLEY E. FAVER
Wing Commander

Recently we had our Annual General Inspection by the ATC IG Team. The results were acceptable, but somewhat short of the excellent rating we strived to attain. Once again we are to be visited by ATC Inspection Teams who cover the operations of our Stan/Eval and the Hospital.

These inspections will provide the Commander of Air Training Command with a complete observation, examination and evaluation of the efficiency of our management in these areas. Moreover, it will indicate the effectiveness and economy of these operations, the readiness of our units to perform their missions, the adequacy of our facilities, and our compliance with pertinent directives and procedures.

As with all such inspections, there are definite advantages to be accrued. One of the most important is the opportunity for us to obtain a status report in these areas from a group of professional, unbiased experts. Because we can be satisfied with nothing less than an "excellent" rating in both categories, our preparations must be geared to that attainment. Everyone of us must keep in mind that daily attention is necessary to be prepared for any inspection to show that we are accomplishing our mission with the utmost efficiency, economy and professionalism.

We have a good team here at Reese so let's prove it with excellent ratings.

ON THE LINE

By Chaplain Asa E. Hunt III
Howdy! This is a new column through which your chaplains hope to speak to you each week. We have decided to call this column "On the Line," because it conveys three ideas we want to get across.

It conveys the idea of straight forwardness. We will keep this column free from sugar coating and verbal frosting. We plan in every column to "lay it on the line."

Secondly the title conveys the idea of being closely identified

with the mission. We want to be known as chaplains who are with the program "down on the line." We don't want to be known as desk bound philosophers who are "too heavenly minded to be any earthly good." Through this column we hope to speak to real people about real life.

The third idea the title should convey is communication. We want to be "on the same line" or on the same frequency. Plan to tune us in each week. We invite your response and feedback so we will know if we are "on the line."

"Military airpower has outgrown its supporting role. It has become a principal factor in dealing with any kind of conflict, now and in the future." — Gen. John P. McConnell, Air Force chief of staff.

Officers Earn Higher Ranks

Four Reese officers advance in rank during February, two to captain and two to first lieutenant.

Moving to captain Monday is 1st Lt. Eric C. Doten, instructor pilot of Flight A, 3500th Pilot Training Squadron. Assuming the same rank on Feb. 23 will be 1st Lt. Charles J. Siegel, also a 3500th PTS instructor pilot.

Moving from second lieutenant to first lieutenant are John L. Kreideweis, assistant procurement officer, and John J. Moynihan, 3501st PTS instructor pilot.

Lieutenant Doten, from Falls Church, Va., came to Reese almost two years ago from Williams AFB. He is a graduate of Princeton University and came into service in 1961. He was commissioned through Air Force ROTC.

Lieutenant Siegel, from Lake Forest, Ill., entered service in 1961, also, and was assigned to Reese in March 1963. He is a graduate of California Institute of Technology and formerly worked for Douglas Aircraft Corp. He formerly served at Williams AFB.

Promoted Wednesday, Lieutenant Kreideweis, from Union, N.J., was assigned to Reese shortly after entering service in August 1964. He is a graduate of Colby College in Maine and was commissioned through Air Force ROTC.

Lieutenant Moynihan, graduate of the University of New Hampshire, is from Belmont, N.H. He came to Reese last October from Moody AFB.

NOT LIKE MOM'S—Two brothers, Ralph (left) and William Martin, U.S. Marine Corps, share a meal of field rations in the Republic of Vietnam. The brothers met for the first time in five years after a letter from home showed they were stationed only half a mile apart.

Personal Appearance Emphasized

By Col. Don M. Goodfleisch
Director, Personnel Services, Hq. ATC

Although most members of Air Training Command exhibit good qualities of sharpness in dress, there have been some recent practices noted that detract from the over-all appearance of ATC personnel.

Desirous of having command personnel particularly exemplary in this respect, Lt. Gen. William W. Momyer, ATC commander, has written local commanders encouraging a command-wide effort to elevate the standards of dress and personal appearance.

In effect, General Momyer launched an "Operation Look Sharp" program, saying: "Because training is our profession, the appearance of our officer and enlisted personnel, both permanent party and students, must meet the highest standards."

Officers and NCOs should have acquired the habit of good grooming but might well ask themselves this simple question: "Do I look sharp?" If the answer is "no," then what must be done should be readily apparent.

For the airmen who recently entered the Air Force there is a no-cost way to bring badly fitting clothing back to acceptable standards.

Such airmen were meticulously fitted at Lackland AFB, which operates the largest clothing sales store in the Air Force. However, some of these airmen gain or lose several pounds in the course of a few weeks. When this happens, the uniforms can be altered at government expense within the first six months of service. Local clothing sales stores will make the necessary arrangements.

After then the airman is on his own along with officers and NCOs and good grooming should remain a part of his everyday habits.

The clothing allowance is sufficient to keep uniforms in good repair and to replace excessively worn items. Use it to this effect and wear the uniform with the pride it deserves. (ATCPS)

"Cost reduction is a permanent way of life, made even more important by the acceleration of operations in Vietnam. It should be thoroughly understood, however, that in all the Air Force's money-saving efforts there is never any sacrifice of reliability and safety. Nothing can be permitted to decrease the effectiveness of our support to the combat units."—Gen. Kenneth B. Hobson, commander, Air Force Logistics Command.

By Base Housing Committee

STAND-BY AIRLINE FARES—
The following is quoted from the Transportation Brief Number 77: "Military travelers on leave or delay enroute should be aware that all reduced 'stand-by fares' offered by US airlines are not equal even though travel may originate and terminate at the same point. Significant cost and time savings are possible by arranging routing via a single carrier rather than a combination of carriers for the same journey. For example, if a member routes himself from Washington to Austin, Tex., via a carrier routing, the fare is \$47.27. If the member had used only one carrier, the fare would be only \$43.94."

Thor Hits Perfect Launch Reliability

The Air Force Thor launch vehicle, already known as the "work-horse of the space age" has acquired another name — "The C-47 of The Space Age". Maj. Gen. Ben I. Funk, commander, Space Systems Division, announced that the Thor space booster in 1965 had completed its second straight year of 100 per cent reliability in space launches.

Thor has launched more than 70 space payloads in the 1964-65 period with 100 per cent reliability. Since August, 1958, the Thor space launch vehicle has performed with 96 per cent reliability in more than 200 launches.

Junior Officers Plan Trip To ATC

Discussion and plans for a trip to Air Training Command Headquarters at Randolph and a visit to Brooks Aerospace Medical Center highlighted the January meeting of the Reese Junior Officer's Council last Monday.

Objectives of the JOC are identifying and discussing local base situations involved the officer career motivation program. Constructive recommendations are forwarded to the commander concerning problem areas. Local and Air Force career advantages which should be stressed in the officer career motivation program and discussed along with developing means of exploiting existing career advantages.

The council accepts all comments, suggestions and questions with regard to Junior officers on the base. Current members of the council are Lt. Col. Don E. Simmons, career motivation advisor; Capt. John P. Flannery, chairman; 2nd Lt. Edward R. Barker, recorder; 1st Lt. Jan B. Andre; 1st Lt. Richard T. Estes; 1st Lt. Arlene B. Greish; 1st Lt. Gerald M. Libsack; 1st Lt. Patrick W. Pylate; 2nd Lt. David Bradley.

Student liaison officers are 1st Lt. James N. Sue, 2nd Lt. Carl E. Franklin, 1st Lt. Donald G. Allen, 1st Lt. Marvin A. Lillie, 1st Lt. Gordon L. Hansen, 1st Lt. James M. May, 2nd Lt. Roy N. Suzuki, and 2nd Lt. Richard S. Kenney.

Court Cuts Out Tax Liabilities

WASHINGTON (AFNS) —The U.S. Supreme Court has handed down two decisions absolving thousands of military personnel of liability for certain state taxes.

Both cases involved attempts by the states concerned to collect what amounted to a tax on personal property from Air Force personnel—whose legal residences were in other states.

The court reaffirmed the provisions of the Soldiers' and Sailors' Civil Relief Act of 1940 which protects a serviceman from personal property and income taxation by a state where he is residing solely because of military orders.

NEW STRIPES—Placing of new stripes on Air Force uniforms was a popular activity in Reese homes this week as 136 airmen moved to higher rank in the Feb. 1 cycle. This homemaker's hands turned to attaching stripes for one of the 91 airmen who were elevated to airman second class.

NCO Wives Club Officers Installed

New officers of the Reese NCO Wives Club were installed Saturday night at the semi-annual installation dinner in the NCO open mess.

Installed were Sara Raines, president; Trudi Koscielney, vice president; Jean Hoover, secretary; Hazel Sanders, treasurer; Sherri Patterson, assistant treasurer; Carol Scarborough, parliamentarian; Arleen Corbett, ways and means chairman; and Wanda Rennick, Eve Strauss, Donna Ankrom, Judy Cruise and Connie Mistohe, board of governors.

Committee chairladies are Nancy Rosson, publicity; Grace McCloud, decorations; Delores Pope, welfare; Vera Connery, historian; and Betty Morris, assistant, ways and means.

Hostesses for the dinner meeting were Hazel Sanders, Nancy Rosson, Betty Morris, Eve Strauss and Cecelia Kurshinske. Guests of honor were Col. and Mrs. Richard A. Steele.

The installation followed a re-

freshment hour and dinner featuring Cornish hen.

A business session will be at 7:30 p.m. Tuesday.

The NCO Wives Club will hold a welcoming coffee at 7:30 p.m., Feb. 25, for newly arrived NCO wives.

Aeromedical Wing Sets Safety Record

SCOTT AFB, AFNS) — The 1405th Aeromedical Transport Wing has become the second unit in the Air Force to achieve 500,000 accident-free flying hours.

A Douglas C-118 Liftmaster reached the mark Jan. 3 on an aeromedical evacuation flight from Travis AFB, Calif., to Scott. Among the 30 patients on board were 15 casualties from Southeast Asia.

The only other Air Force unit to pass the 500,000 hour safe flying mark is the 1502nd Air Transport Wing, Hickam AFB, Hawaii.

★★ **USAF VIETNAM BATTLE REPORT** ★★

WASHINGTON (AFNS) — U.S. Air Force Boeing B-52 Stratofortresses struck Viet Cong targets shortly after midnight Jan. 24 as normal operations were resumed in Southeast Asia following the Vietnamese New Year cease-fire.

One group of the big bombers blasted a target in the Phouc Tuy Province while the second mission hit the Viet Cong in Tay Ninh Province.

Meanwhile, troop and cargo movements highlighted Air Force activities in the Republic of Vietnam during the week ending Jan. 21.

Testing a new, rapid cargo delivery system under combat conditions, a Lockheed C-130 Hercules crew moved 574,000 pounds of cargo and 68 passengers in one day from the Tan Son Nhut AB to Phuoc Vinh, about 35 miles north of Saigon. Air Force officials said the airlift broke previous records for cargo moved by one aircraft in a single day.

In the test, ground crews used a forklift and a flat-bed truck equipped with rollers for pallet-mounted loads to put about 36,000 pounds of cargo aboard the Hercules in five minutes. A roller-equipped ramp kit, hooked to the tailgate of the aircraft, enabled ground crews to unload the cargo in three minutes.

GOONEY STILL WORKING

The world-famed Gooney Bird C-47, used for years at Reese and throughout the Air Force, has been assigned a direct combat role in Vietnam. Re-designated as AC-47s — the A stands for attack — a squadron of the venerable Douglas-built aircraft has been armed with three side-firing Miniguns and sent to Vietnam to support friendly ground forces in all four military corps areas there. The 7.62mm Miniguns are capable of firing 6,000 rounds per minute.

Additional roles for the AC-47s include supplementing strike aircraft and flying long-endurance escort of convoys. The aircraft carry sufficient fuel to loiter for extended periods in the target area. They are equipped with flares to allow them to provide support on a 24-hour basis.

The aircraft belong to the 4th Air Commando Squadron (Fire Support). A prototype AC-47 air-

craft has undergone tests in Vietnam for the past year, where it became known to ground forces as "Puff, the Magic Dragon." The nickname comes from the roar of the Miniguns and flames from tracer bullets which often form a solid stream of fire from the aircraft to the ground.

BEEF TEAM HELPS

HQ. ATC (ATCPS) — A team of Air Training Command personnel on temporary duty in South Vietnam is bringing joy to the hearts of the "tent dwellers" at DaNang.

The good Samaritans are members of an Operation Prime Beef (Base Engineer Emergency Force) team which is erecting semi-permanent buildings of wood on concrete bases to replace the "tent cities."

The buildings are specially de-

signed for tropical climate. They offer maximum ventilation during the hot season and have extended eaves to keep out the monsoon rains.

FIRST COMBAT DROP

An Air Force Lockheed C-130 Hercules was used for a combat cargo drop for the first time since the turbo-prop aircraft began operating in Vietnam five months ago.

The 16,700 pounds of supplies were dropped by parachute to a Special Forces Camp west of Dalat by the 345th Troop Carrier Squadron.

1,000 SORTIES

The 510th Tactical Fighter Squadron, equipped with North American F-100 Supersabres, has flown 1,000 combat sorties in the Republic of Vietnam.

THE AIR FORCE IN ACTION

VIETNAM-BOUND—A bomb-laden Boeing B-52 Stratofortress takes off from its home base at Guam for a strike against Viet Cong targets in South Vietnam.

Special Promotion Programs Wiped Out

WASHINGTON (AFNS) — The Air Force has decided to eliminate special promotion programs whereby some organizations are permitted to promote its members without regard to normal promotion cycles, quotas, and eligibility criteria.

Affected are "spot" promotions for SAC combat crews, Air Force Security Service personnel who serve two consecutive overseas tours, and special electronics technicians of the Air Force Tactical Applications Center.

At The Movies

TODAY — "The Spy with My Face," Robert Vaughn, mature. ..
SATURDAY — "Mister Moses," Carroll Baker, family. Matinee—"Godzilla vs. the Thing," family.
SUNDAY — Walt Disney's "Old Yeller," family.
TUESDAY — "The Collector," Terence Stamp, mature.
WEDNESDAY — "Fort Courageous," Donald Berry, mature.
THURSDAY — "The Rare Breed," James Stewart, family.

WINS RIBBON
 Maj. Theodore Cline Jr. has been awarded the Small Arms Expert Marksmanship Ribbon following qualification.

5th Air Force Headquarters, Osan, Korea.

The colonel for four years was in Washington as legislative liaison officer in the office of the secretary of the Air Force, executive secretary of the weapons systems evaluation group for the assistant secretary of defense, and chief of the professional, education branch for the deputy chief of staff for procurement and training.

Colonel Miller served a year and a half as executive officer of the Air Research Development Command and deputy chief of staff, Headquarters Air Materiel Command. He was executive officer to the air deputy at Supreme Headquarters Allied Power in Europe until he went to Amarillo.

Colonel Miller holds the Legion of Merit with one cluster, the Bronze Star, Army Commendation Medal and Air Force Commendation Medal with cluster.

COLONEL MILLER

EQUIPMENT RECEIVED

Twenty-five swing sets and six slides for Vietnamese orphans have been sent to the Air Force chaplain's office at Tan Son Nhut AB by a Bossier City, La., playground equipment manufacturer. The equipment will go to orphanages in the Saigon and Nha Trang areas.

WINNERS—Winners in the annual Pinewood derby of the Reese Cub Scouts line-up with their cars and trophies. Left to right, front row, are Michael Vosefski, Billy Humphrey, Gary Kurshinske, and Steve Goldfein. Back row, Karl Mulder, Mark Henry, Michael Skinner and Robert Smith.

No. 28

It's A Fact that each Air Force B-58 Hustler crewmember sits in an escape capsule which can be ejected independently from the aircraft in an emergency. Each capsule has its own oxygen supply, pressurization system, floatation cells, radio and survival gear, including a 14-day food supply.

Guild Election Scheduled Today

New officers to serve six months will be selected by the Catholic Ladies Guild at its luncheon meeting in the NCO open mess today following the noon Mass. Free nursery service is available for the Mass and meeting. All Catholic women are invited to the luncheon.

Did You Know?

The "T" and "P" prefixes to the numbers of Reese buildings are holdovers from the days of World War II. When the base was opened in 1941, all of the buildings were expected to be temporary, hence the "T." When brick and metal structures such as the wing dining hall and some of the hangars were added later, they became the "P" buildings.

Writers Must Give Right Identification

The Air Force Accounting and Finance Center at Denver is asked to do something it just can't do—to properly answer letters on allotments from unidentified writers.

The center gets about 2,000 letters a month in unidentified mail. All letters addressed to the center, it was stated, must contain complete identification of the service member and his service number. Servicemen are being asked to advise dependents of the rules.

Actors Offer Famed 'Teahouse' Nightly

Oriental charm and color are promised by the Lubbock Theatre Center in presentation of "Teahouse of the August Moon," presented nightly at 8:15 p.m. at 2508 Avenue P. A 2:30 p.m. matinee also is scheduled for Sunday, with the final performance Tuesday night.

A large cast is taking part.

Dining-In Speaker Records Service In Numerous Posts

Col. James E. Miller, native Texan who has served in many important Air Force assignments, will be speaker at the second semi-annual NCO dining-in tonight at the Reese NCO open mess.

Colonel Miller, executive officer at Amarillo Technical Training Center, was born in Sinton, Tex., and holds bachelor and master degrees in sociology from Texas A&M College. He has 22 years of active service.

Commissioned in the U.S. Army Cavalry Reserve in 1934, he served two years at Fort Bliss, Tex., left service for two years and returned in 1940 with the Army Air Corps at Daniel Field, Ga. He was personnel officer and chief of staff with the 9th Air Force and 9th Bomb Division in the Middle East European Theater from 1942 to 1945 and was separated from service in 1946.

Returning to active duty in 1951, Colonel Miller has served in the United States, Far East and Europe.

He was director of personnel, then chief of staff, for two years with the 8th Air Force Headquarters at Carswell AFB, Fort Worth, then was executive officer to the command and chief of staff in the

Management Engineering Plays Important Role In Proper Functioning Of Command

HQ. ATC, (ATCPS) — The man in manpower and management is the concern of a vital program now in operation throughout Air Training Command: the Management Engineering Program (MEP).

MEP is designed to meet a threefold objective: (1) to systematically increase work center effectiveness, (2) to determine the number of personnel required to satisfactorily operate a function at various levels of workload volume and (3) to recommend solutions to management problems.

The process of identifying and defining the job to be done requires the coordinated efforts of several activities: The Standards Branch in Management Engineering Division, DCS Plans, Headquarters ATC; a "lead team" of management engineering specialists from the Management Engineering Detachment at a given base; the Headquarters ATC staff agency concerned with the function to be studied; and the manager of the individual function.

When a function has been scheduled to be studied, the Standards Branch assigns a lead team (Management Engineering Specialists from a detachment at one of the 14 ATC bases, maybe from Reese AFB) to control standard policies relative to the studying that particular function and to make the final computation of that function's manpower standard.

The lead team, in conjunction with the Standards Branch, the Headquarters ATC staff agency involved, and the functional manager of the base then defines the function to be studied.

Other teams of management engineering specialists enter the picture at this point. Each of the "input teams" receives the definitive package and prepares a detailed analysis and comparison to the activity at its base. This is forwarded to the lead team, which prepares a preliminary phase report and submits it to the Standards Branch for coordination with the ATC staff agency.

Then the lead team and input teams begin the measurement phase.

An analysis of the completed measurement provides a model — or the manning equation — for that particular function; it indicates the relationship between manning and workload volume.

The resultant work center standard is then coordinated with the Headquarters ATC staff agency involved and forwarded to Headquarters USAF for approval.

Three basic measurement techniques are used in the development of work center standards: Work sampling, time study and operation audit.

In work sampling, each operation of the function is visited at random and the status of each individual (working, delay, idle, etc.) is recorded. The distribution of these observation represents the distribution of the total time — productive and non-productive — used in accomplishing the operations of the function.

Time study — the actual timing by stop watch of specific tasks — is used infrequently in ATC since the nature of work performed by the command does not often lend itself to use of the technique.

The operational audit method of measurement is a combina-

tion of techniques.

After the work to be measured by operational audit is defined, a list of the items or units of work is prepared; a time value for each item and the frequency of occurrence or production is determined by use of historical records, interviews with workers and review of prescribing directives.

After the productive time required to perform a given amount of work is measured under operational audit, the time must be converted to manpower. This is done by analyzing the demands placed on a worker's assigned time (140 hours per month). The productive time is measured, allowances for rest and delays are added and that total time is converted to manpower — in normal duty work centers — at the rate of one man for each 140 monthly manhours.

In studying the worker's expended time — using any of the three methods of measurement — manpower engineering specialists can determine the ratio of productive direct time to indirect or idle time. The functional manager may use this information to make necessary changes in meth-

ods, procedures, or equipment. Thus, the worker's time becomes more than just a road to the manpower standard — it becomes a tool for management decision making.

BILLET PROOF...

"DID YOU WHISTLE?"

ATTACK—An "agitator," protected by an attack sleeve, is assaulted by a German Shepherd dog under command of his handler during a routine training exercise at the Air Force Sentry Dog School at Lackland AFB. The armed forces are in dire need of more dogs for use in Vietnam and elsewhere.

Staff Judge Advocate Brings Varied Background To Legal Duty At Reese

Capt. Anthony F. Farina, born in England, raised in Italy and educated in the United States, has assumed duty as staff judge advocate at Reese. He came to Reese from Aviano Air Base, Italy, where he was assistant staff judge advocate from May 1, 1964 to Dec. 28, 1965.

Captain Farina then moved to Aviano AB, Italy. He is married to the former Cosimima Franchini of Troon, Scotland. They have a daughter, 15-month-old Paola. The captain is making the Air Force his career.

The captain, son of Italian parents, was born in England and when a boy moved to Italy. When 17 years old, he immigrated to America. After two years in the U.S. Army as an enlisted man, he entered Defiance College in Ohio and secured his bachelor of arts degree in 1957. Two years later he obtained his law degree from Ohio Northern University at Ada, Ohio.

He practiced law in Springfield, Ohio, and in June 1960 entered the Air Force, securing his commission through Officer Training School. He spent a year and a half as assistant staff judge advocate with an Airborne Early Warning Command wing at Otis AFB, Mass., and an equal time in the same capacity with the 47th Support Group, later the 7375th Combat Support Group, at the Royal Air Force station, Sculthorpe, England.

CAPTAIN FARINA

MacTorchy Sez . . .

"When in doubt, don't punt — submit that Cost Reduction suggestion anyway!"

Lessened Vacancies Bring Savings

A savings of \$22,700 per year through adjustment of the housing vacancy rate has been recorded by Reese in its Cost Reduction Program.

Through joint action of Civil Engineering, housing, personnel, housing supply and transportation, a savings of \$9,456 was made for effective use of family quarters for the period July 1 to Nov. 30, 1965. The saving was figured by using fiscal year 1963 as a base period to establish the vacancy rate prior to the imposed management effort.

The average quarters allowance it was determined is \$120 per month. The vacancy rate during the base period was 20.60 per cent, while the average for the July-November period in 1965 was 4.85 per cent.

The estimated savings from November to the end of the fiscal year is \$13,238, to give the \$22,700 total for the fiscal year. The same savings in the next two fiscal years is claimed.

Hal Green Leaves Reese Youth Post

Harold R. Green, Reese director of youth activities, left the base this week to join a Lubbock insurance firm.

He was presented with a letter of commendation by Lt. Col. W. R. Atterbury, chief, personnel division, which lauded him for his program here.

The letter cited contributions Green made to the Reese community and his programs which interested boys and girls of all ages.

Stating that the youth program was aimed at maintaining sound bodies and total fitness for all, the colonel said "Each activity that you have offered the children of Reese has been worthwhile and has contributed directly to his or her educational, physical, social or spiritual development."

TOP AIRMAN—A2C Richard A. Farina, medical material specialist, is awarded a certificate as airman of the month for January by Col. Dudley E. Faver, wing commander. Looking on is Lt. Col. David W. Davis, director of medical services. The airman, in service a year and a half, is from Milwaukee and was promoted to his present rank in October.

Chief Praises Safety Achievement

WASHINGTON (AFNS) —Air Force Chief of Staff Gen. John P. McConnell has complimented commanders for the overall safety record achieved by the Air Force last year.

In a message for commanders of major air commands, General McConnell said:

"The Air Force accident prevention record in calendar year 1965 reflected significant accomplishment in some areas, only fair results in others, but an excellent record in general.

"Ground accident losses reached record lows in spite of rising national trends."

"Especially commendable are outstanding reductions achieved in private motor vehicle accidents as a result of comprehensive, well organized, traffic safety programs in all commands."

Pinewood Derby Winners Crowned

Karl Mulder won top honors among 36 contestants in the annual Pinewood Derby of Cub Scout Pack 148 Friday night in the base gymnasium. Mark Henry finished second and Steve Goldfein third. About 150 spectators were on hand.

Den winners were: Michael Vosefski, Den 1; Billy Humphrey, Den 2; Gary Kurschinske, Den 4; Steve Goldfein, Den 5; Mark Henry, Den 7; Michael Skinner, Webeles; and George Roberts, den chiefs.

Slowest car honors went to Robert Smith, Den 2.

Trophies to winners were presented by Cubmaster F. W. Vosefski.

USAF Will Train Germany's Pilots

WASHINGTON (AFNS) —The U.S. Air Force will train a greater number of German Air Force student pilots in the United States beginning next year.

Training contracts signed recently by the United States and the Federal Republic of Germany call for establishing an undergraduate pilot training school at Sheppard AFB, Tex. The basic contract covers the first year of a minimum five-year program.

Officials Of ATC Attend Workshop

HQ. ATC (ATCPS) — Air Training Command officials are joining with representatives from other major commands in a high-level series of Zero Defects seminars and workshops at the Lockheed-Georgia Co. in Marietta, Ga.

The management-oriented program calls for two one-day seminars — the first of which was held Jan. 11—to be followed by eight three-day workshops jointly conducted by Air Force Systems Command and the Lockheed-Georgia Co.

Top officials stress that both the seminars and workshops emphasize support areas of operation with special emphasis on administrative, management, personnel, comptroller, engineering, materiel, procurement and research and development areas.

The first task of tactical airpower is to help secure friendly forces from air attack.

Consecutive Tour To SEA Possible

WASHINGTON (AFNS) — Some personnel completing overseas assignments in other parts of the world may be tapped for consecutive tours in Southeast Asia.

Art Exhibition Opened At Tech

Forty-five pieces of original art appearing in recent issues of Boys' Life magazine are being exhibited in the rotunda gallery of West Texas Museum until Feb. 14.

The works include many kinds of art from full color oils to pen and ink illustrations. Thirty of the nation's top artists and illustrators are represented in the show, including Norman Rockwell, who began his career with Boys' Life. Robert McCall, Charles Saxon, Norman Adams and Bernard D'Andrea.

The exhibit is open free to the public weekdays from 9 a.m. to 5 p.m. and Sundays from 2 to 5 p.m.

The Air Force said its goal is to not require anyone to serve a second permanent change of station tour in Southeast Asia until other similarly qualified persons have completed a tour there. To meet this objective, it said, it may become necessary to "increase the available resource of personnel in certain specialties critical to the Southeast Asia mission."

If this happens, the Air Force continued, married men serving in overseas areas with their dependents and bachelors on tours of 18 months or more will be considered as available for direct assignment to Southeast Asia.

Coming, Going

DEPARTING:
Capt. Samuel T. Burns III and Capt. Donald J. Karpen, to Randolph.
MSGT. Francis C. Wynne, SSgt. James W. Milliner and A2C Joseph F. Almazan, to PACAF.
Capt. Leo P. Swatloski, SSgt. Frankie E. Branscum, SSgt. Thayer E. Nolte, SSgt. John E. Main, A1C Travis B. Perrenot, A1C Thomas J. Harman, A2C Robert R. Rohling, A2C Billy C. Lambert and A3C Gregory J. Stringin, to PACAF.
A3C Gary L. Johns, to AAC.

New Financial Info System Given Tests

WASHINGTON (AFNS) — A new financial information system to provide more efficient use of resources and accurate measurement of the cost of operating an air base will be tested at Laughlin AFB, beginning July 1.

Called Project FIRM (Financial Information for Resource Management), the system is the first major attempt by the Air Force to formally align its base-level financial management system to cost-based budgets and accrued expense information.

BOARD TO MEET
WASHINGTON (AFNS) —The Air Force Institute of Technology Selection Board will meet here Feb. 7 to consider the first group of applicants for school attendance in fiscal year 1967.
