### **Defiant Buchanan**

Just the mention of Bob Dole's name stokes rage in Pat Buchanan. To most Republicans, Dole is the party's presumptive presidential nominee. But to rival Buchanan, Dole is hollow, duplicitous, clueless. In an interview, Buchanan voices bitterness at the turns of his campaign, relishes his role as a pariah within his own party and leaves no doubt peace with Dole is not at hand./58

'Good night, Gracie': Wry **comic Burns** dies at 100

### **Associated Press**

BEVERLY HILLS, Calif. George Burns, the wry, cigarsmoking comic who played straight man to Gracie Allen for 35 years, then found new popularity when he won an Academy Award at age 80, died Saturday just weeks after turning 100.

Burns, whose health had been declining in recent years, died at 10 a.m. at his home, said his man-

He was with his son. Ronald Burns, a nurse and a housekeeper,

### Evolution, schools

NASHVILLE, Tenn. - Seventy years after John Scopes was convicted of teaching evolution in Dayton, Tenn., the state Legislature here is considering permitting school boards to dismiss teachers who present evolution as fact rather than a theory of human origin. And around the country, the issues that Clarence Darrow and William Jennings Bryan fought out are being replayed in classrooms, school-board meetings and state legislatures as religious fundamentalists become increasingly assertive./11A

### No lottery winner

AUSTIN - No tickets correctly matched all six numbers drawn Saturday night for the twice-weekly Lotto Texas game, state lottery officials said. The jackpot was worth \$18 million. The numbers drawn from a field of 50 were: 14, 19, 25, 29, 44 and 49. Lottery officials estimate the jackpot for Wednesday night's game will be \$25 million.

### TV's forecasters try to 'de-mist-ify' weather surprises By Tonie Miller-Uzzel

### Staff Writer

ure is a pretty day. Nice weather, huh? Can you believe this dry spell?

That's more than just small talk for television's weather forecasters whether they are a meteorologist, a weatherman or an environmental scientist

These guys attract many viewers who tune in for nothing more than to check on what the weather will be like.

While each weatherman has similar reasons for ending up where they are, they bring diverse backgrounds to their jobs.

Some of the many weather forecasters on the local television stations are Sam Madison, KMID Channel 2 weekend weather forecaster; KWES Channel 9 meteorologist Tom Tefertiller; and Craig Stewart, KOSA Channel 7 evening weather forecaster.

Madison works seven days a week. Weekdays he is an engineering specialist working for the state government. He tests smoke stacks to make sure their emissions comply with what they are permitted to emit.

Weather and the environment go hand in hand," he said.

He has experience with the Environmental Protection Agency studying acid rain. He has degrees in chemistry and math

Those things help in his work informing the public about the weather. But, it was his interest in flying and his training as a pilot that got him started as a weather watcher.

A Corsicana native, he was training

for his pilot's license at age 17. He was going to fly to Dallas and back when he asked his instructor about checking the weather.

The teacher told him it was a gorgeous day and just go for it. So he did. Then, he ran into a big thunderstorm with 40 mph winds, rain and hail. He landed safely, but not without damaging the plane.

That's when I realized how important weather was. You can't do anything by the seat of your pants. You have to have the information," Madison said.

Madison has worked in radio and was a weekend weather forecaster while living in Corpus Christi.

Each Saturday and Sunday, Madison compiles National Weather Service

'All can say is that I've lost one of my dearest, closest friends who I've known for over 75-years," said Milton Berle. "I'm going to miss him terribly. I think the world is going to miss him because he gave us so much happiness.

President Clinton, traveling in Northern California said in a statement that Burns "enabled us to see humor in the toughest of times and laugh together as a nation.

There will never be another era like Burns', Carol Channing said. "What he stands for is the dignity and the aristocracy of show business." she said. It won't ever be gone. Everybody who knew it is going to carry it on as hard as we can.

Burns' career lasted more than 90 years, spanning vaudeville, radio, movies, television, nightclubs, best-selling books, recordings and video. He was the oldest actor ever to receive an Oscar.

This is a January 1994 photo of George Burns during preparations for his 98th birthday celebration.

At age 98, he was still delighting audiences with his perfectly timed quips, many of them at his own expense. ("I'm doing better with 18-year-old women now than when I was 18.") Fans eagerly awaited his long-promised 100th birthday shows in Las Vegas, with the \$100 tickets selling out long in advance.

"Age to me means nothing." he once said. "I can't get old: I'm working.... When I'm out in front of an audience, all that love and vitality sweeps over me and I forget my age.

But declining health ended his

## MISD schedules forums to gain public opinion on bond election

### By Gary Shanks

Staff Writer

Two forums have been scheduled to get public input on Midland Independent School District's proposed bond election, tentatively set for June 1.

The meetings are set for 7 p.m. March 28 at Midland High School auditorium and 7 p.m. April 2 at Lee High School auditorium, according to Wilson Heidelberg, executive director of auxiliary services for MISD.

At the meetings, school officials want "input on what the community feels about the size of the bond and what the community feels about what is included," said

Susan Webb, communications specialist for MISD.

"If a **bond election** is called and if it is called within a certain time frame — June 1 is what they discussed," Ms. Webb said.

MISD has not been putting money into building renovation at the rate of most other districts in the state, according to a recent survey.

Paying for everything that needs renovation would require a bond of considerably more than \$100 million, according to figures presented at recent board meetings. MISD officials determined. however, that taxpayers would never accept such an amount.

Board officials are trying to pri-

## Contested races should spark good primary turnout, officials say By Michael Kashgarian

Staff Writer

### Grab a pencil: Here's where to vote

### From Staff Reports

The following are the polling places for Tuesday's Republican and Democratic primaries. Polls are open from 7 a.m. until 7 p.m.

### **Republican Primary**

101, 101A, 108 — Airline Mobile Home Park, 7100 Airline Drive 102 - Alamo Junior High, 3800 W.

Storey Ave. 103 - Bonham Elementary, 909 Bonham St.

104, 104A - Midland Christian

Fellowship, 200 Baldwin St. 105, 105A - Burnet Elementary, 900 Raymond Road

106, 106A - Henderson Elementary, 4800 Graceland Drive

107 - Manor Park, 5212 Sinclair Ave.

201, 201A - Cottonflat Baptist Church, 6409 S. Highway 349

202, 202A — Greenwood school administration building, 2700 Farm to Market Road 1379

204, 204A — Polo Park Retirement, 2100 Castleford Road

### Please see WHERE/4A

### Tuesday is primary election day. Polls will be open from 7 a.m. to 7 p.m. in Midland.

A good turnout is expected for the primary because of several contested local races among the Republicans (who won't be contested by a Democrat in November) and the bid for the party nomination for presi dent.

Registered voters - despite any party affiliation -- can vote in either the Repub-lican primary or the Democrat primary, but not both.

Election officials encourage — although don't require — voters to bring their regis-tration certificates to polling places.

## Bleetion

There are more than 60,000 Midlanders registered to vote. In 1992, 40 percent of registered voters in Midland voted in the Republican primary, while 6 percent voted in the Democratic primary.

During early voting, which concluded Friday, more than 8,200 Midlanders cast votes, according to Elections Administrator Pat Eastup.

A runoff election, if needed, will be April 9. Those who vote in the primary are only eligible to vote in a runoff for the same par-

ty

## NATO officials offer no guarantee of protection to Serbs in Sarajevo

Commander of ground forces in Bosnia tells group at town hall meeting that troops can do little to curb lawlessness that has overwhelmed llidza.

### **Associated Press**

ILIDZA, Bosnia-Herzegovina -While arson flames burned in a Sarajevo suburb soon to come under government control, NATO officials tried Saturday to reassure Serb residents. But a different message came across: No one can protect you.

Thousands of Serbs have abandoned Ilidza, which is to be handed over to the Muslim-Croat federation on Tuesday. A town hall meeting with senior NATO and U.N. officials attracted only about 100 Serbs, most of them elderly.

The NATO commander of ground forces in Bosnia told the Serbs the troops could do little to curb the lawlessness that has overwhelmed Ilidza.

"What we are not is a police force, and what we cannot guarantee is to offer individual security," Lt. Gen. Sir Michael Walker told reporters.

Tension is rising in Ilidza, the most populous of the five Serb suburbs being handed to the Muslim-Croat federation. Residents are fleeing with all they can cram into cars and horse-drawn wagons.

Serb intimidation gangs have been blamed for numerous arson attacks and at least one murder in the security vacuum that has developed in Ilidza and in Grbavica, a Sarajevo neighborhood that becomes federation territory on March 19.

of Muslim-Croat Reports harassment in the three Serb suburbs already in federation hands NATO troops escorted Bosnian

have also increased anxiety U.N. and NATO officials say

Serb gangs apparently are being directed by the hard-line leader-ship in the Serb stronghold of Pale, which wants to create ethnically segregated areas as proof that Serbs, Muslims and Croats cannot live together.

Most Serb police already have left Ilidza and Grbavica, U.N. officials said, but federation police are not allowed to enter until the handover dates.

U.N. international police monitors say they have no power to intervene, and the NATO-led peace force has refused police duties. It fears being dragged into a civilian conflict with consequences similar to the U.N. debacle in Somalia.

Most of those who attended Saturday's meeting in Ilidza were dissatisfied and befuddled by what they heard.

One woman said she thought international police should have the authority to detain criminals. She suggested NATO impose an early evening curfew, since most of the attacks occur after dark.

"The function of enforcing the law is a matter for the local police," replied Peter Fitzgerald, head of the U.N. police monitoring force. "Despite what you may wish, we simply do not have the authority to arrest people.

Fitzgerald said the number of international police monitors was being increased, and NATO said it had sent more troops to Ilidza and Grbavica to bolster confidence.

But while they spoke, Ilidza's bicycle factory blazed, sending plumes of black smoke into the sky while international police monitors and several NATO troops stood and watched.

By Saturday night, six buildings were aflame in Ilidza, and French

A French IFOR armoured car on patrol passes a burning bicycle factory in Ilidza, Saturday. The Serbs are burning public factories and private houses before fleeing llidza, which is being turned over to the Muslim-Croat federation Tuesday under the Bosnian peace agreement.

firefighters into Ilidza to battle the fires, said spokesman Maj. Peter

At the meeting earlier in the day, Dusan Sehovac, a leader of the Serbian Democratic Initiative of Sarajevo Serbs formed to stop an exodus of Serbs, shouted at NATO and U.N. officials that the international community was doing too lit-

Bulloch.

The building housing his group, which has enraged Serb hard-liners, was set ablaze Friday afternoon, he said. When they asked international police for help, they were told it wasn't in the U.N. mandate.

'The international community is driving us out of here instead of helping us to stay," Sehovac shouted. "We have no support from anywhere.

Kris Janowski of the U.N. High Commissioner for Refugees said:

"The situation in Grbavica and partially in Ilidza is out of control. There's no law and order.

Walker said the town-hall meeting was to give Serbs "the facts: We can't guarantee your security, but we are here, and we in the international community believe that it is safe for you to stay in the suburbs.

He acknowledged it probably did little to persuade people to stay and said the ideal of a multiethnic Bosnia "has taken something of a body blow.

Goran, an Ilidza resident who refused to give his last name, said he decided to leave Friday when he went to the international police station to report a burning building and was told they could do nothing.

"The international organizations can give no guarantee that we can live in safety," he said. "This is Sarajevo's funeral.

### Team of inspectors enters building in Baghdad following 18-hour delay

BAGHDAD, Iraq (AP) — After waiting 18 hours for Iraqi approval, U.N. inspectors entered a government building Saturday to look for information on banned weapons but feared Iragis used the delay to prepare for the search.

Iraq said the U.N. had deliberately provoked an artificial crisis to tarnish Baghdad's image just before talks are held on resuming limited Iragi oil sales.

A team of 28 U.N. weapons experts entered the Irrigation Ministry, where they suspected weapons-related documents had been stored.

Iraq is required to dismantle all of its programs to develop and build weapons of mass destruction under terms of a U.N. cease-fire that ended the 1991 Persian Gulf War. It has been under tough U.N. economic sanctions since invading Kuwait in August 1990.

The U.N. Special Commission, which is charged with seeing that Iraq dismantle its weapons program, said it "has reason to believe that material related to banned weapons were at the site."

In a statement from New York, the commission said inspectors were examining documents and computer disks and that once they entered the building, the search went "peacefully." There was no immediate word on whether they found any weapons-related documents.

Charles Duelfer, deputy chairman of the U.N. Special Commis-sion, called the 18-hour delay "a serious incident.

"It was a contradiction of our right to conduct the work which was assigned to us by the Security Council," he said in an interview.

Duelfer earlier told CNN that, 'If there had been any prohibited items - which we believe that there were - they would have been removed in the interim time.

The Iraqis had refused to allow the inspectors in the central Baghdad building, arguing that government ministries are not subject to inspection under terms of the **U.N. Security Council resolution** that ended the war.

## Yeltsin personifies country's woes for many Russians of all ages

### **By Julia Rubin Associated Press**

MOSCOW - Viktor and Larisa Tkachev are young, educated Muscovites, the kind of people long considered the backbone of Boris Yeltsin's support. They say there is no way in the world they will vote for him in June.

Not when they can't afford to send their daughter to a good school. Not when they haven't been to a restaurant in 10 years, except for one trip to McDonald's. And not so long as Viktor has to travel "abroad" just to visit his parents back home in the former Soviet republic of Belarus.

Yeltsin has let the entire country collapse. Russia should be a great power," says Viktor, a computer programmer who lives in a cramped 20th-floor apartment in north Moscow.

He will probably vote for the Communist candidate in the presidential race. "The changes have been for the worse, and we need a new president," he says.

Yeltsin's hopes of winning a second term as president are clearly in trouble in small-town Russia, where factories have closed and workers often don't get paid. But even in the capital's apartment towers, shops and university classrooms, the president is widely cursed

Having wielded vast power for five years, Yeltsin is now the lightning rod for Russians' anxieties and disappointments.

People whose lives have been turned upside down by the transition from communism to a raw democracy blame Yeltsin for sky-high prices, endemic corruption, measly pensions, beggars in the subway, crime, dirt, the flood of Western imports and the war in Chechnya.

He is too weak, or too authoritarian, depending on the critic. A crude provincial, or a wily manipulator.

Yeltsin could still do well if he succeeds in convincing voters he is the lesser of evils, the only choice against the resurgent Communists. Many Russians are still undecided.

"I HAVE THE sense he's up there and doesn't see what's going on with ordinary people," scoffs Andrei Borisov, a slight, 31-year-old Afghan war veteran who just got laid off as a driver with an armoredcar company

"He's a kind of czar, and we're

the serfs."

Borisov doesn't want to go back to communism. But he says the new system has no place for a worker like himself, and no effective laws or even Soviet-style bureaucrats to whom he could appeal with a prob-

'By nature, I'm a simple work-'' he says, standing out in a blowing snow in industrial southeast Moscow, where he came to try to talk his former employer into rehiring him. No luck.

"I think I can't go out and do busi-ness," he says. "I don't know how. I don't have the education.'

Yeltsin has let the entire country collapse. The changes have been for the worse, and we need a new president.'

- Viktor Tkachev, who will probably vote for the **Communist candidate** 

Borisov's family of three lives on the equivalent of about \$60 a month, his wife's salary as a hairdresser. ·He prefers reformist candidates. But if it's Yeltsin vs. the Communists, the Communists get his vote.

THE STUDENT LOUNGE at Moscow State University's sociology department swirls with smoke and anger.

"I can't bear seeing people who have no money to buy bread - our grandmothers and grandfathers," says Lena Kochetkova, 17, who is too young to vote, but supports the Communists.

"And I can't bear seeing the young men who have to take part in the war - and their mothers when

**DESERT RAIN** SPRINKLERS The New "Old" Kid On The Block 10% off any new installation 10% off service call Expires 4/30/96 **33 YEARS EXPERIENCE** 570-6888 **RESIDENTIAL-COMMERCIAL** 

they see them dead."

Students sitting around a table drinking Coke feel Yeltsin has allowed Russian culture to be suffocated by Western influences, and say it's hard to find Russian products in stores. They blame Jews for most of the country's problems.

Yeltsin is hindering Russian sol-diers in Chechnya, keeping them from victory, the students say. At the same time, they condemn him for using force to crush an uprising by hard-liners at the parliament in 1993.

"This isn't democracy," says Rodion Sokolov, 20. "This is a super-presidential republic. When people don't agree with him, he shoots. It's the most ordinary totalitarianism.'

SERGEI ZAITSEV, A 44-year-old retired military man who lives in one room of a shabby communal apartment, says Yeltsin has been too weak - all talk and a bit too much drink.

Yeltsin should have pushed through more of his decrees, punished the leaders of the failed Soviet coup, crushed the Chechen rebels, gone after criminals and not allowed the press to insult him, Zait-

sev says. "People should respect the leader and not call him an idiot," says Zaitsev, who has an old portrait of Josef Stalin on his wall along with the Beatles and assorted poets.

He'll probably vote for Yeltsin because he doesn't see a better option.

He doesn't like to complain, but he believes life was better in Soviet times

As for being able to travel or buy better goods, Zaitsev rubs his fingers in the air and smiles: "What freedoms? Now I can see things, but I still can't afford them. ... Give me a separate apartment, or a car, and I'll care about different things.

IN THE DANK passageway underneath Pushkin Square, a couple of Yeltsin supporters collect signatures to put his name on the ballot. Beside them people hold similar petitions for Mikhail Gorbachev's presidential campaign and for Chechen independence.

All three groups manage to attract a steady trickle of people from the river of commuters hurrying past.

Signing for Yeltsin, a 72-year-old pensioner identifies herself to a reporter only as Tatyana. She predicts others will come around to

data and figures out the forecasts from the weather wire services.

Looking at different reports - from wind velocity to the humidity to checking for rain he compiles all the pertinent information for the local forecast.

"People really don't care about what is going on in Antarctica, unless that weather is heading this way," Madison said.

Then he structures the forecast into the time frame he is allotted, so everything will fit in a logical manner.

He said the weather wall he stands in front of is blank, so he looks off to the side to a monitor that shows the map.

Weather is a lot of ad-lib," he said. "People can tell if you're just reading it and I want to come across, well, to let people know I care. I want to tell them what is important and to let them know they have a friend, not just a stiff shirt

Stewart, too, brings a diverse background with him. He said he always knew he wanted to be involved in the entertainment industry and always had a fascination for weather.

Being a surfer, everything revolves around the weather from the waves and storms coming in," Stewart said.

A Southern California native, he came to Texas in the 1980s. While taking classes at Mid-

land College he had the opportunity to work as a disc jockey for KCRS, where he worked for eight years.

Stewart wanted to work in broadcast media so badly that he worked for KOSA for free as an intern learning the trade before joining the staff on a contract basis as a photographer and then weekend weather forecaster

He's not a meteorologist, mainly because he considers the study of the science to be almost as difficult as medicine.

"Plus, I feel like most people just want to know what the temperatures and conditions are going to be like," Stewart said.

Most of his weather knowledge was gained through self-teaching from books and a few courses he has taken.

Daily, he checks his computers and various printouts to determine what the weather is going to be. From there he begins planning how he will present his weather forecast for the three evening news shows.

He works with basic maps and can add information to them such as high and low temperatures, wind direction and speed. Stewart arranges the maps to provide a smooth flow to the forecast.

Tefertiller brings his extensive education in meteorology to the weather forecast.

He not only has a degree in broadcast journalism, but also bachelor's and master's degrees in meteorology.

Meteorology is the science of weather and

includes the study of physics and a lot of math, Tefertiller said.

Being a meteorologist gives him an understanding of what is happening with the weather, he said.

"I was always interested in weather," he said. Growing up in Corpus Christi he has lived through three hurricanes. (Which he seems strangely proud of.)

"During grade school the teachers would sometimes let me teach the class when we covered the weather unit in science.

"I also called TV weathermen to come to the school to give talks. That was unheard of back in the late '70s. I think I was the one to start that trend," he said.

Tefertiller said he spends about an hour or more analyzing data in preparation for the evening weather forecasts. On stormy days he spends even more time on analysis, he said.

Then, he spends a couple of hours drawing maps and simplifying them for a weather cast people can understand, he said.

It is also important to have consistency such as warm fronts being the same color, making sure logos are the same each day so nothing distracts the viewer from the weather forecast itself," he said.

He said his forecast is a weather-oriented cast showing what is driving the weather and what will continue to drive the weather for the next few days.

### (From 1A)

oritize renovation projects. One of them is Midland High and San Jacinto Junior High schools.

A recent feasibility study indicated that these two schools have grown beyond the capacity of the physical structures and no space is available for expansion, Ms. Webb said.

The firm that performed the study does "not recommend renovation for current or projected usage," she said.

There are many options for dealing with the problems at San Jacinto, including moving that school said.

to the Midland High School build-

For Midland High, there are fewer options, with the most likely course of action being the construction of a new school at another location - for a cost of about \$20 million, according to statements at recent board meetings.

The school has about 2,200 students in a building designed for 1,400 or 1,500 and land is not available for expansion of the existing building.

"They will more than likely build a new high school," Ms. Webb

## BURNS: Cigar-puffing, ageless wit dies weeks after celebrating his 100th

### (From 1A)

performing career after he was injured in a fall in July 1994. The 100th birthday shows were canceled. More recently, ailing with the flu, Burns was unable even to be a spectator at a gala in his honor a few days before he turned 100.

He did put out a statement, saying, "What do you give a man who's been so blessed? Another 100 years? A night with Sharon Stone?'

Burns' career was at a crossroads after Gracie - the ultimate ditzy comedian and the love of Burns' life — retired in 1958. She died in 1964 and he never remarried.

He developed his own act as a single, starring in TV specials and playing Las Vegas with such discoveries as Ann-Margret and Bobby Darin.

His popularity soared in the 1970s, with his Oscar for the aging vaudevillian in "The Sunshine Boys" touching off a string of movies, books and sold-out nightclub appearances.

He said he accepted the role in the Neil Simon comedy, his first movie in more than 35 years, for the same reason he continued performing after Gracie retired: You can't quit show business not at my age." The role was to have gone to his close friend Jack Benny, who died in 1974.

**Only actress Jessica Tandy was** lder than Burns, by a few months, when she won an Oscar in 1990 for 'Driving Miss Daisy.'

my life and I've loved every minute of it," Burns said when he accepted the award. "It proves one thing - if you stay in the business long enough, and if you get to be old enough, you get to be new again.' That movie role was followed by

starring parts in the "Oh, God" "Just You and Me, Babe," series. "Going in Style," "Sgt. Pepper's Lonely Hearts Club Band" and "18 Again!

As the Supreme Being in the "Oh, God" movies, Burns wore baggy pants, sneakers and a golf cap. He said he was a bit nervous at first about taking the role "because I didn't know what kind of makeup he uses. Besides, he's bigger than Milton Berle, you know." But he decided, "Why shouldn't I play God? Anything I do at my age is a miracle.

In January 1994, at his 98th birthday party in Las Vegas, Burns remarked: "It's nice to be here. At 98, it's nice to be anywhere.

Burns and Miss Allen were already vaudeville partners when they married in 1926. They continued working together for more than three decades, becoming one of the most popular couples in show business through a string of movie appearances, 19 years on radio and eight more years as stars of their own television series, The Burns and Allen Show."

Burns frequently said Gracie had the hardest part in the act, which changed little over the years. He would feed her simple

"I've been in show business all .questions, such as "How's your brother?", and she would have to respond with convoluted, nonsensical answers.

He did two more television series after Gracie retired in 1958. 'The George Burns Show'' in 1959-60, featured his son, Ronald, and the other in 1964-65, "Wendy and Me," co-starred Connie Stevens.

After Gracie's death, Burns adopted the role of raconteur, telling funny stories that he said began in truth and were embellished over the years. Using his cigar for punctuation, alternately taking a puff and flicking off the ashes with taps of his little finger, Burns was a master of timing and one-liners.

On acting: "Acting is easy. If the director wants me to cry, I think of my sex life. If the director wants me to laugh, I think of my sex life."

On age: "I've reached the point where I get a standing ovation for just standing."

But it wasn't true; his output was amazing.

In 1980 he recorded an album for Mercury-Polygram, "I Wish I Was 18 Again," and the title song became a hit single. He followed with the albums "George Burns in Nashville" and "Young at Heart."

His books, some written with gag writer Hal Goldman, included "Dear George," "How to Live to be 100 or More: The Ultimate Diet, Sex and Exercise Book" and "Gra-cie: A Love Story." His last book, "A Hundred Years, a Hundred Stories," was published at his 100th birthday.

A recording of him reading ville act and asked her to join him excerpts from "Gracie: A Love in a new one. Story" won a Grammy award for best spoken-word record in 1991.

He celebrated his 95th birthday in January 1991 with a television special and a performance in Las egas. "You can't help getting older, but you don't have to get old," he told the standing-room-only crowd. "I'm going to stay in show business until I'm the only one left.'

Burns was born Nathan Birnbaum on Jan. 20, 1896, one of 12 children. He was raised on New York's Lower East Side, and was vears old when he began singing with the Peewee Quartet in saloons and tenements.

He left school in the fourth grade, selling newspapers to help support his family. In his teens, Burns began song and comedy routines in "lousy little theaters that played lousy little acts - and I was one of them.

He said he was a bad performer for more than a decade. "Then I met Gracie.

That was in New Jersey in 1922. She was a part-time secretary and daughter of a song-and-dance man; he was breaking up a vaude-

Their first booking was for \$15 for three days in Brooklyn, Burns recalled. He said he was the funnyman for a total of one performance.

"The audience laughed at her straight lines and didn't laugh at my jokes. So I became the straight man," he explained.

Burns said he thought of Gracie constantly and visited her grave once a month.

'With no one else around, George just talks to Gracie, telling her what has happened to him and his career in the past month," Fein once said. "George says, 'I don't know if Gracie can hear me, but it certainly does me a lot of good.'

There were other memories of the past at one of his favorite spots, the Hillcrest Country Club, where he once shared a round table with some of the biggest stars in comedy.

"They're all upstairs. All of them gone — Al Jolson, Eddie Can-tor, Jack Benny, George Jessel, ou Holtz, Groucho Marx, Harpo Marx," he said.

The moment of reflection ended in a standard Burns quip:

### Lotto Texas

## China to conduct live war games near shipping routes of Taiwan

TAIPEI, Taiwan (AP) - Tightening the pressure on Taiwan, China plans to follow up its missile tests with menacing war games using live ammunition near the island's busy shipping routes. Taiwan's military said Saturday

it was on alert, and its president accused Beijing of destabilizing prosperous east Asia.

Beijing is trying to wipe out what it sees as a Taiwanese drive to dump the doctrine of reunification with China and declare itself an independent state. China claims sovereignty over Taiwan, seat of the Nationalists who were driven off the mainland by Mao Tse-tung's Communists in 1949.

The eight days of war games set to start Tuesday and using live ammunition potentially are more menacing to Taiwan than the three missiles that landed on its doorstep Friday, and which were thought to carry dummy warheads

The 6,600-square-mile rectangle designated for the air and sea exercise lies north of Taiwan's shipping routes to Hong Kong, the port that handles much of Taiwan's trade with China in the absence of direct trading links between the two rivals.

The map was issued by the Taiwanese military based on coordinates given by China. It was not immediately known whether ships would have to divert to avoid the mock battles, but the Chinese government asked foreign governments to warn their ships and aircraft away from the area

The rectangle lies off the southeast Chinese coast and is 30 to 45 miles from two Taiwanese islands, Quemoy and the Pescadores.

The war games overlap with the eight days of missile tests scheduled to end March 15, and some analysts see the Chinese moves as a rehearsal for a blockade of Taiwan's booming trade.

Taiwanese industry has made it the world's 14th largest trading power with the world's second biggest foreign currency reserves. A commentary in the People's Daily, an official Chinese newspaper, seemed to buttress the blockade theory Saturday by saying that if it courted independence, "there would be no future for Taiwan to

speak of, since the Taiwan econo-my is characterized by a lack of raw materials, and a small market within the island.

Taiwan's stock market has plunged repeatedly in the eight months since China started mak-

A woman counts foreign banknotes she received at the Bank of Taiwan, Saturday, in Taipei. Many Taiwanese have been purchasing U.S. dollars and other foreign currencies because of concern over tensions linked to China's missile tests and planned war games off of the island.

ing menacing military moves.

professor at Taiwan's Soochow University, said China's moves had escalated from hitting the Taiwanese stock market to hammering at its overall economy.

If such exercises were repeated indefinitely, deliveries of goods would become less reliable and import and export costs would rise, along with insurance premiums for ships and airliners, he said in an interview.

'No one will want to place (export) orders with Taiwan because they won't want to get into the mess and undertake the rising costs," Hou said.

But China would suffer too. Taiwan's multibillion dollar investment in its southern provinces, which grew 9 percent even as the latest crisis was building up, is a major force in transforming China into free-market economy.

China also risks upsetting its Hou Chia-chu, an economics Asian neighbors and inviting more friction with the United States if it comes to be seen as a regional bul-

> In a sharp response to China's actions Saturday night, Taiwan's President LeeTeng-hui said they will only cause instability in the Asia-Pacific.

Lee is running for another term in presidential elections March 23. Taiwan's first by universal suffrage in its almost complete transformation from dictatorship to democracy.

Taiwan would continue to "stand up bravely and let the voice of the 21 million people here be heard by the international community." he said in a televised forum of presidential candidates. He was alluding to the policy that sparked China's rage - the drive to raise Taiwan's separate diplomatic profile.

## Hijacker releases all 109 hostages, surrenders

MUNICH, Germany (AP) - A 12-hour hijacking Munich and the hijacker demanded a Turkish inter-ordeal ended peacefully Saturday with the release of preter, a human rights lawyer and a reporter be all 109 hostages and the surrender of their captor a Turkish man with a toy pistol intent on drawing attention to Chechen rebels in Russia.

None of the 101 passengers and eight crew members on the commercial airliner was harmed.

The hijacker was identified as Ramazan Aydin, a waiter from Duzce, Turkey, who turns 21 today and whose ancestors were from Chechnya. A judge

ordered him jailed pending an investigation. Police say Aydin entered the cockpit of the Boeing 727 shortly after it took off Friday evening from Nicosia, Cyprus, bound for Istanbul, Turkey.

Armed with what turned out to be a toy pistol, he forced the pilot to fly first to Sofia, Bulgaria, and then Germany. Although he told the pilot there were four other hijackers on the plane with him, Aydin told police afterward he had acted alone...

The plane landed shortly before midnight in ger before being taken to jail.

preter, a human rights lawyer and a reporter be called

Police spokesman Karl-Heinz Spoerl said the man repeatedly insisted he was not a terrorist, but only wanted to draw attention to "Russia's bloody war in Chechnya.

Moscow sent troops to Chechnya 15 months ago to crush the region's bid for independence. An estimated 30,000 people, mostly civilians, have been killed in the fighting.

After three hours of negotiations by phone, the hijacker released six hostages, including a woman who was recently operated on and a child. An hour

later, the pilot and a flight attendant were released. But the hijacker didn't surrender until about 5 a.m. after police promised to meet his demands.

The man was allowed to speak to a reporter for Bavarian radio and meet with attorney Hartmut Fin-

# Refinancing makes sense...

### and could save you hundreds of dollars!

Next time you're making your mortgage payment, wouldn't it be nice to write that check for a hundred dollars less! That's what some folks do after refinancing with First American Bank. And others even save thousands by shortening their loan term.

It doesn't matter whether you bought your home ten years ago or just a year ago, if your mortgage rate is 1% higher than today's low rate, it's time to call First American and talk about refinancing.

> If you missed the opportunity to refinance when mortgage rates were low before, don't pass up this second chance. And, if you have an adjustable rate, now is the time to lock into a low fixed rate mortgage. In some instances, you can even include your closing costs in your loan amount.

EXAMPLE								
Loan Amount	\$100,000	\$100,000	\$100,000	\$100,000				
Interest Rate	9.5%	8.5%	7.5%	6.5%				
Loan Term	30 Years	30 Years	30 Years	30 Years				
Principal & Interest	\$840.86	\$768.92	\$699.22	\$632.07				

Call the mortgage specialists at First American today. In just a few minutes, they can compare your rate to the current low rate and see if refinancing makes sense for you.

## Palestinian police extend crackdown on Hamas

Forces raid militant Islamic organization's mosques, clubs, welfare offices to confiscate equipment.

### **N.Y. Times News Service**

GAZA CITY, Gaza Strip - The Palestinian security forces extended their crackdown on Hamas Saturday, raiding the militant Islamic organization's mosques, clubs and welfare offices to confiscate equipment and detaining anyone they could find.

branches sped through Gaza City to each target. But with the police announcing more than 600 arrests this week in the Gaza Strip alone, dissent emerged over the efficacy

of such sweeps. Yasser Arafat, the Palestinian leader, reportedly threatened to dismiss Col. Jibril Rajoub, his West Bank security chief, although officials reported a series of meetings among top officials from the Palestine Liberation Organization to try to repair the rift.

The Gaza representatives in the Palestinian Legislative Council, the Parliament sworn in on Thurs-Sirens echoed through the day, began consultations on streets as jeeps crammed with rep- whether to call an emergency ses-

resentatives of the various police sion of all 88 members to discuss the crackdown.

> The latest Israeli closure of the West Bank and Gaza, now two weeks old, was also beginning to sting. With flour hard to find, long lines formed at bakeries and demonstrators gathered at Arafat's office to protest the shortages

> **But Israel and the United States** bore down on the Palestinian leader for a more focused approach. Palestinian security sources said a CIA delegation headed by George J. Tenet, the deputy director, met Arafat near the Erez border crossing between Israel and Gaza Strip.

The delegation demanded that five figures be arrested from the Hamas military cells believed responsible for four bombings in the last two weeks that have killed, 60 people. Arafat, in turn, asked for counterterrorism training for his men as well as equipment and dogs

to assist in finding explosives. Palestinian officials said Saturday that they had jailed two more leaders from Hamas - Dr. Ibrahim Yazouri, a pharmacist who helped found the movement but is no longer in the central leadership, and Ahmed Bahar, another founder and a professor of religion at the Islamic University of Gaza.

## Anti-abortion passion in GOP threatens to pull Dole off-center

### By Robin Toner

### N.Y. Times News Service

WASHINGTON - As Sen. Bob Dole turns his attention to unifying the Republican Party, few issues will be more sensitive than abortion, in the view of strategists on both sides of the issue. It could complicate his choice of a running mate, his construction of a party platform and his ability to handle Pat Buchanan.

In state after state, primaries have underscored how divided Republicans are on this issue.

Since 1976, the party's platform has been committed to a constitutional amendment, in one version or another, intended to outlaw abortion. But surveys of Republican voters leaving the polls in several states this year showed majorities opposing a such consti-tutional ban in the party platform.

That was true not only in states in the Northeast — including New Hampshire (67 percent opposed to a constitutional ban), Massachu-setts (66 percent) and Connecticut (72 percent) — but also, to a less-er degree, in Georgia (52 percent) and South Carolina (54 percent.)

Still, strategists on both sides of the issue say those polls are only part of the story. Opponents of abortion in the Republican Party are exceedingly well organized, have powerful feelings on the issue and frequently make it a top priority when deciding how to vote.

Republicans who support abor-tion rights tend to be far less single-minded, which helps explain why Sen. Arlen Specter's candidacy did not become the crusade for abortion rights he had hoped for, party strategists say.

Susan Cullman, chairman of the **Republican Coalition for Choice,** said, "The problem with the prochoice movement is pro-choice people don't vote on choice alone.'

In contrast, said Ralph Reed, executive director of the Christian Coalition, "For the evangelical and Roman Catholic voters who have poured into the Republican Party in recent years, this is an issue on which a signal of compromise or accommodation would lose their enthusiasm and probably their votes.'

These were the voters Buchanan was going after as he campaigned across the South in recent weeks, presenting himself as their truest and staunchest defender. At one point, for example, he warned against any tinkering with the abortion plank of the party's platform.

"I'm going to San Diego," he said, "and if you think you're going to take that plank out of there, I'll tell some of those liberals up in Washington, you're going to have to come over me and my

abortion with exceptions for rape or incest, or when the life of the mother was in danger.

And a spokeswoman said that he "will fight for a pro-life plank in the 1996 Republican platform that will reflect the Republican Party's historic commitment to protecting the rights of the unborn.

But Dole still comes under intense scrutiny by the anti-abortion movement when he speaks on the issue. His occasional clumsi-

clarificatio s.

He has suggested that he would not make the issue a "litmus test" for his choice of a running mate; for example, he is clearly interested in Gen. Colin Powell, who supports abortion rights.

And if many centrists in the party have their way, his list of potential running mates will include not only Powell, but also New Jersey

But that would be anathema to many social conservatives. think it has to be a pro-life running mate," said Phyllis Schlafly, a longtime conservative activist who is supporting Buchanan and who heads the Republican National Coalition for Life.

Carol Long, political action director of the National Right to Life Committee, said, "The pres-

ness on abortion in debates and Gov. Christie Whitman, another idential nominee needs to have a abortion rights supporter. idential nominee needs to have a pro-life running mate if they want the full enthusiasm of the pro-life community.

Reed said the party's vice presidential nominee should support the party's core principles: including lower taxes, a balanced budget, term limits and a strong pro-life stance.

'I want to make it clear that what I'm proposing is not a litmus test, but rather sound political principle.

advice about the need to hold the grass-roots coalition together that made the 1994 landslide possible," Reed said.

Dole, in short, could be caught in a vise on this issue — pushed in one direction by Republican centrists hoping for the broadest possible appeal for their ticket this fall, and pushed in the other by Buchanan and the other social conservatives who fear the diminution of a core

No 2014 AVERAL CONTRACTOR OF C

Later, he warned another audience that the Washington insiders would "sell out the right-to-life movement in the flicker of an eyelash.

Dole has competed successfully with Buchanan for the support of anti-abortion voters, offering himself as a mainstream conservative with "a strong pro-life record." He supports a constitutional ban on

### Army investigators search for answers in helicopter crash

OLMSTEAD, Ky. (AP) - Ateam of Army investigators con-tinued to comb through the wreck-age Saturday of a helicopter that crashed in western Kentucky with five soldiers aboard.

Also Saturday, the Army released the names of the five soldiers who died when their helicopter went down late Thursday night in a snowy wheat field near the Tennessee line.

A statement from Fort Campbell said Chief Warrant Officer 5 Walter M. Fox, 43, of Barnesville, Pa., was the pilot and Chief War-rant Officer 3 Pierre R. Desroches, 44, of Palm Desert, Calif., was copilot.

Also aboard were two crew chiefs, Staff Sgt. Tracy A. Tidwell, 34, of Texarkana, Texas; and Sgt. Bradley C. Beem, 29, of Shell Rock, Iowa. The helicopter also carried Chief Warrant Officer 2 William R. Monty Jr., 35, of St. Petersburg, Fla.

All except Monty, who was iden-tified as a student assigned to a detachment at Fort Jackson, S.C. were members of the 160th Special **Operations Air Regiment.** 

The 160th is a Special Forces unit dubbed the "Night Stalkers" because its members often fly in darkness using night-vision equip-ment. Special Forces has its headquarters at Fort Bragg, but some of its members are stationed at Fort Campbell, about 25 miles from the crash site.

"From the very beginning, he wanted to be a helicopter pilot," Fox's great aunt, Lydia R. Fritz of Locust Valley, Pa., said Saturday.

Fox, known as Wally, joined the military right after high school and served in the Persian Gulf War, said Fritz.

His parents, Marie and Walter Fox, learned of the crash Friday morning and left to be with their son's wife, Nancy, and their two children in Cunningham, Tenn., near Fort Campbell, she said.

Another reason for Kent's growth is his business banker. Norwest Bank Midland. At Norwest, we understand the uniqueness of every business, and we take the time to learn how we can best be of service to meet your business banking needs. That's why entrepreneurs like Bill Kent keep coming back to Norwest. For all your banking needs, come see us at Norwest Bank Midland.

### Girl's torture reveals need for special care of sexually abused children

### By Christopher McDougall Associated Press

PHILADELPHIA - At age 8, the little girl has no real name, no home, no parents and no defense against more of the sexual abuse that left her scarred and screaming in a hospital bed.

And that, the city says, is the best it has to offer.

The foster child was beaten, scalded and sexually abused last week by her most recent guardians in a sadistic attempt to discipline her, police said.

As the brutal details emerged, child advocates were jolted to learn that the victim was "Tara M," the pseudonym used in court papers for a girl given different names by her biological mother and foster parents.

Two years ago, the city Department of Human Services promised to give exceptional care to Tara M. and 16 other children as a result of an American Civil Liberties Union lawsuit charging the agency with gross neglect.

"If a child like Tara can't be protected under this system, what child can?" asked Stefan Presser, the

ACLU legal director in Philadelphia. But the broader lesson from Tara's plight, say child care experts, is that a city must ensure special care for sexually abused children.

'A molested child can tax parents in a way that no other child can," said Dr. Alberto Serrano, psychiatry chief at Children's Hospital. They may mimic their abuse by fondling themselves, or an adult. That can be quite a jolt to a foster parent

"Foster parents who accept these

children into their homes need to be prepared for extraordinary behavior - so they must receive very special training.

But no amount of sexual actingout can explain what happened to Tara, said Nancy Kanter, the child's legal advocate.

"There were red flags up all over the place — for both the little girl and the prospective parents. How come nobody saw them?" asked Kanter. Elman and Anna Gradiz were chosen as pre-adoptive parents in November by Asociacion Puertor-riquenos en Marcha Inc. of Philadelphia (APM), a private agency that provides foster care.

"And they wanted to adopt her!" said Kanter. "She came that close that close! - to disappearing from any supervision whatsoever. DHS spokeswoman Patricia Bathurst said the department followed procedure, placing Tara last November with APM, a state-registered agency with an unblem-ished record. A DHS caseworker accompanied an APM counselor on an investigation of the Gradiz home and signed an approval form, said Bathurst.

On Tuesday, Tara appeared in a New Jersey emergency room with her foster parents. Doctors found she had been scalded over half her body, had two black eyes, puncture wounds in her back and inflamed genitals.

The emergency room staff called the police, who arrested Elman Gradiz, 36, and his wife Anna, 42, on charges including aggravated, inde-cent assault and involuntary deviate sexual intercourse. The assult charge is a felony that carries a seven-year minimum prison term.

They are being held on \$250,000

bail each and will have their first chance to enter pleas in court this week. Their attorney, Edward Morris, said he was not yet able to comment on their guilt or innocence.

According to police, the foster par-ents found Tara fondling herself on Monday. To punish the girl, they stripped her, forced her into the bathtub, and doused her with buckets of scalding water.

Then, police said, Anna Gradiz concocted a mixture of chili pepper and Vick's Vapo Rub and smeared it into the girl's genitals.

Tara described her four months in the Gradiz home in a police interview read in court Wednesday at her foster parents' bail hearing.

"I was touching my private parts, but I wasn't. ... They think it's me and they put chili in there ... a pep-per stuff. It stings a lot. They mix it up with vinegar and they put in Vick-'s and salt and they mix it up," Assistant District Attorney Mimi Rose read from the transcript.

"I kept on bleeding. It wouldn't stop. It hurt a lot."

On other occasions, Tara told police, her foster mother disciplined her by stuffing a sock in her mouth or a pillow over her face. Sometimes they beat her with a belt, raising welts and injuring her so badly she had to stay home from school.

After they were arrested, Anna Gradiz revealed she had previous-

**OF SAVINGS** 

ly been institutionalized for psychological problems and takes antidepressants.

The placement agency also didn't know that Elman Gradiz is a Nicaraguan citizen, suggesting it didn't thoroughly check out his background and search for a criminal record.

APM program director Myriam Matos said the agency had followed every state requirement, including receiving a medical clearance that said Anna Gradiz had no disabilities.

Matos, choking back tears, said a counselor had spent four hours with Tara outside the house just two days before she was hospitalized. Neither the girl, who was impeccably groomed and dressed, nor the Gradizes, whom the agency had thought were "miracle parents," gave any clue of potential abuse.

Bathurst said that despite diligent screening, home studies and training for adoptive parents, it is impossible to predict all human behavior.

But in the meantime, Tara, once her wounds heal, is scheduled to return to the same foster care system, said Bathurst.

Before that happens, child care advocates want the state to tighten up supervision by setting up a sexabuse task force and requiring all foster parents to sign a waiver allowing their psychological and medical histories to be searched.

WASHINGTON (AP) - James and Susan McDougal tried more than once to cut Bill Clinton free of his ties to an embarrassing Arkansas land deal gone sour, but Hillary Rodham Clinton refused each time, according to a new book on Whitewater.

After an Arkansas newspaper mentioned the Whitewater Development Co. in a list of delinquent taxpayers in 1985, Mrs. Clinton hotly refused to sign a blank stock transfer certificate Whitewater partner Susan McDougal set before her, according to excerpts of author James B. Stewart's "Blood Sport: The President and His Adversaries.

"No! Jim told me this was going to pay for college for Chelsea," the Clintons' daughter, Stewart quotes Mrs. Clinton as saying in excerpts appearing in Time magazine's March 18 issue. "I still expect to do that.

Blood Sport exposes no "smok-ing gun" in the Whitewater affair, but attempts to make sense of a series of arcane and confusing issues that have been reported in the press.

In the book, scheduled for release March 15, Stewart lays out the Clintons' tangled Arkansas business dealings, their moneyeating investment in Whitewater and their dogged attempts to keep details away from the public eye.

In an introduction to the excerpts, Stewart writes that Mrs. Clinton's friend Susan Thomases. a Manhattan lawyer, approached him about doing a book in order to clear the president's and the first lady's names.

He met with Mrs. Clinton, who initially agreed to cooperate, for about an hour and a half in April 1994.

"As time passed and vague promises of meetings never led to anything, I realized that the Clintons were most likely not going to cooperate," he said, although he doesn't know why.

Mark Fabiani, the White House-'s spokesman on Whitewater matters, said he had not read the book.

'But based on all the reports that we have heard it appears that the book, while adding some new detail, doesn't add many basic facts to what is already known about Whitewater," Fabiani said Saturday.

No investigation so far has turned up any evidence of wrong-doing on the part of the Clintons, he said.

The book also reveals personal information about the Clintons, including Mrs. Clinton's early doubts about her marriage.

"According to friends of the couple, ... Hillary expressed doubts about the future of her marriage, and as a result, whether she could count on Bill to support her and a child," Stewart writes in the book. "Their marriage, now in its third year, was by the Clintons' subsequent admission, at a low point. If Gennifer Flowers can be believed, she and Bill were in the passionate, early stages of their

passionate, early stages of their affair during the summer of 1978." People close to the Clintons were aware of other women in Clinton's life, Stewart said in the book. "They believed that Bill had been unfaithful to Hillary even during their engagement"

their engagement." Clinton told Susan McDougal that he loved being governor that he loved being governor

## Halted in capital, welfare reform takes hold on state level

### By Kenneth B. Noble N.Y. Times News Service

LOS ANGELES - Although Congress and President Clinton remain deadlocked on landmark legislation overhauling the nation's welfare system, states around the country, with conservative governors and legislators in the lead, have already cut billions of dollars from welfare programs and have won waivers from Washington enabling them to experiment with ways of cutting billions more.

As a result of these initiatives, some of the most significant welfare changes contemplated by Congress - limiting the length of time in which a beneficiary can receive assistance, for instance, and imposing work requirements on most recipients — are already being tested at the state level.

The net effect of the various efforts, either adopted or pending, will have been to remove millions of people from the welfare rolls and slash the benefits of those remain-

ing. "Even though Washington has not been able to produce a new welfare system, 'welfare as we know it is already disappearing,'' said Steven Gold, a senior fellow at the Urban Institute, a nonpartisan research organization in Washington.

Nowhere are the changes more evident than in California, where even a county government has been led to undertake welfare-cutting: Last week Los Angeles County made a 25 percent reduction in general assistance, a program of cash payments that aids able-bodied adults without children and has 90,000 local beneficiaries.

In Sacramento, meanwhile, the Republican majority in the state Assembly recently won passage of a measure that would impose a statewide two-year limit on benefits to a general-assistance recipient.

Among a number of other Assembly-passed provisions is one that would eliminate welfare entirely for people who are disabled because of alcoholism or drug abuse. And Gov. Pete Wilson is trying to nudge welfare recipients into the job market with his proposals not only for time limits but also for a reduction in the size of benefits.

If California's efforts at changing welfare have been aggressive, they are by no means uniquely so. In the last year alone, half a dozen states, including Ohio, Pennsylvania and Wisconsin, have followed an example set by Michigan and eliminated general assistance altogether.

In the same period, 11 states have asked the government for waivers from federal law so that they can limit the duration of the assistance that they dispense under the main \$23-billion-a-year federal welfare program, Aid to Families With Dependent Children.

Even though Washington has not been able to produce a new welfare system, welfare as we know it is already disappearing."

Steven Gold, a senior fellow at the Urban Institute, a nonpartisan research organization

tional benefits to women who have more children while on welfare.

These drives, and others, coincide with continuing efforts by the Republican congressional majority to write a vast transformation of welfare policy into federal law.

Legislation passed by Congress late last year would have ended the government's six-decade-old guarantee of cash assistance to poor children, instead giving states block grants to use for relief programs, with relatively few federal strings attached.

Clinton, who had initially supported a Senate version of the bill, vetoed the measure that emerged from Congress, declaring that it could impoverish hundreds of thou-sands of children.

Despite the current stalemate in Washington, few state officials doubt the inevitability of a huge shift

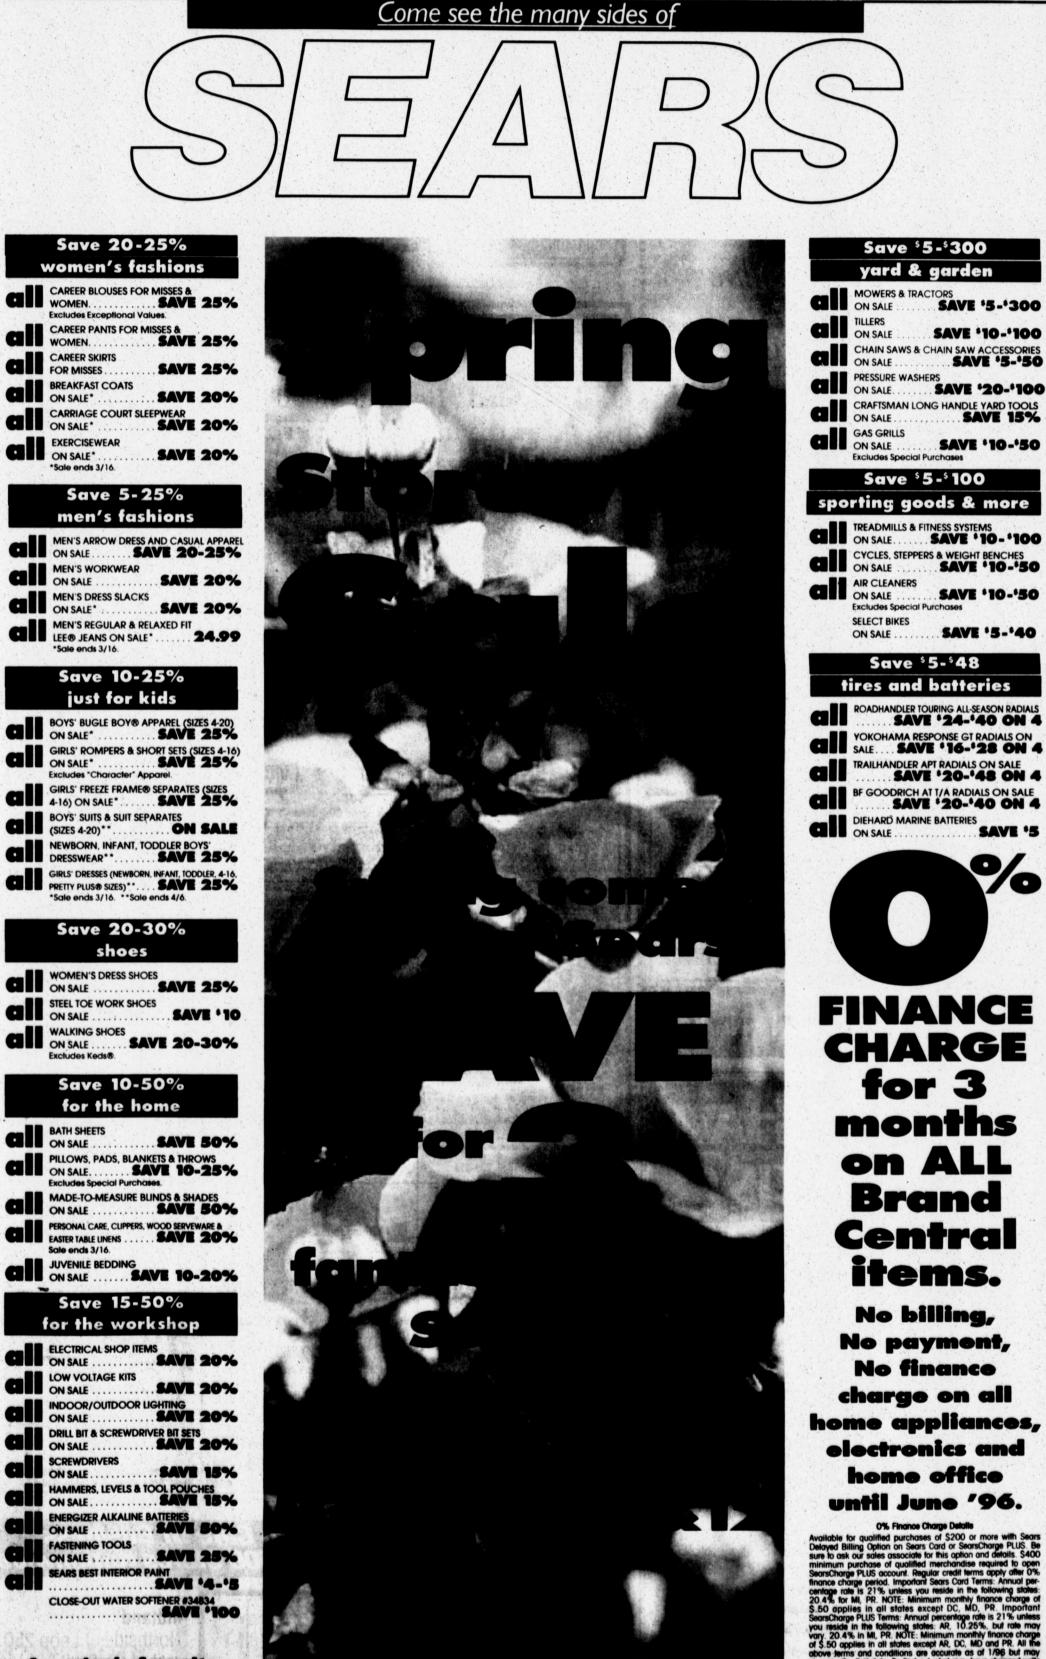

in responsibilty for welfare, from the federal government to the states, an approach that has the backing of the nation's governors. Given that prospect, state officeholders say, what better time than now to design their own, less expensive welfare operations?

That sentiment has only added to an impetus for changes that stems from a variety of factors: Clinton's own 1992 campaign promise to revamp welfare thoroughly, a shift to the right not only in Congress but also in statehouses around the country, popular support for the concept of government downsizing and general acceptance of the notion that welfare as it has existed since the New Deal has done more to promote a cycle of dependency than anything else

### Crews from Texas attempt to burn siphoned fuel from derailed propane tankers in Wisconsin town

WEYAUWEGA, Wis. (AP) -Crews from Texas clambered amid the volatile wreckage of derailed propane tankers Saturday, painstakingly building an earthen pit to burn siphoned fuel that has raised fears of an explosion

The 1,700 residents evacuated from this central Wisconsin town Monday were told it might not be safe to return home for three weeks because the propane, left in a blazing train wreck, would have to burn off by itself.

There was no word Saturday on prospects for ending the evacuation. But the National Guard said 132 residents dressed in flak jackets and Army helmets had been allowed to dash in and retrieve about 125 dogs, more than 150 cats and 56 other assorted pets Friday.

Reconnaissance teams also examined the wreckage and found enough propane had burned off to allow workers near the scene. Flames no longer appeared to be under as much pressure -a "lazy burn" rather than a blowtorch, said Terry Corson, operations officer for Wisconsin Central railroad

But the operation to upright and drain the tankers was not without great risk, Wisconsin National Fox said.

"This is going to be not unlike a game of giant Pick up Sticks," Fox said. "On a 1-to-10 scale this is an absolute 10 in terms of danger to the technical crew out there now. I am told this is like fighting a wildcat fire.

The railroad had hired experts from Texas who were standing by for an opportunity to enter the site. On Saturday, 17 men went in and attached safety valves to most of the tankers to lessen the chance of an explosion, Corson said. They planned to drain fuel with hoses running into burn pits constructed with bulldozers and dump trucks. Fox said.

"It will flare off much like a butane lighter," he said.

There would be no attempt to fight fires in five other tankers that had been burning since 35 cars of the train derailed about 6 a.m. Monday, he said. The train carried 14 propane tankers.

Unlike the residents who rode into the abandoned town in armored personnel carriers in the military-style pet rescue, the Texans wore only light protective clothing, observers said.

They worked in the middle of an area called the hot zone. At the height of the explosion threat,

anyone within 800 feet and cause damage within a mile-and-a-half radius

Regional administrators of the Federal Emergency Management Agency, the Federal Railroad Administration and the Environmental Protection Agency on Saturday praised the state and local response to the disaster.

## Fight over teaching of creationism returns to nation's classrooms

### By Peter Applebome

N.Y. Times News Service

NASHVILLE, Tenn. - Seventy years after John Scopes was con-victed of teaching evolution in Dayton, Tenn., the state Legislature here is considering permitting school boards to dismiss teachers who present evolution as fact rather than a theory of human origin.

And around the country, the issues that Clarence Darrow and William Jennings Bryan fought out in a Dayton courtroom are being replayed in classrooms, school board meetings and state legislatures as religious fundamentalists become increasingly assertive.

The most concerted activity has been in the South. In addition to Tennessee, a district in Georgia recently endorsed the teaching of creationism, which holds that all life forms, including humans, were fully formed by a Creator and did not evolve, and Alabama has approved

a disclaimer, to be inserted in biol- It's everywhere." ogy textbooks, calling evolution only "a controversial theory."

But teaching creationism, rejected by the U.S. Supreme Court a decade ago, has re-emerged as a contentious issue recently in places as far flung as Friendly, Nev.; Paradise, Calif.; Moon, Pa., and Merrimack, N.H.

And teaching evolution has become so politicized that many high school teachers around the country report they skip the subject rather than risk confrontations with conservative parents or fundamentalist religious groups, educators say

"It's frightening how widespread this is," said Wayne Carley, head of the National Association of Biology Teachers. "Even here in Fairfax County, Va., one of the richest counties in the country, over half the candidates for the school board were creationist fundamentalists. This is not just limited to the South.

Proponents of creationism say the disputes, rather than being "frightening," reflect a widespread belief that educators do their students a disservice by teaching only one theory about the evolution of life.

Proponents of what is usually called either "creation science" or 'intelligent design" say there are so many anomalies and mysteries of the origin of the universe and the development of life that theories other than evolution must be considered.

"If evolution is true, then it has nothing to fear from some other theory being taught; the truth will prevail," state Sen. David Fowler, a Republican from Chattanooga, argued on the Tennessee Senate

we should not teach it to our children.

The vast majority of the nation's scientists, including many devoutly religious ones, believe life on earth is the result of billions of years of evolution — an unsupervised, impersonal, unpredictable process of natural development.

Creationists, however, believe that life on earth is not the result of the evolution of species over time but the result of a transcendent personal Creator. Most also believe the earth is not billions of years old, but thousands, as inferred from the Bible.

A series of court decisions in recent years have held that "cre-

floor last week. "But if intelligent design is the truth, then God forbid of science." is religion in the guise the Ten Commandments.

A 1987 ruling was viewed at the time as a definitive defeat for the teaching of creationism in the schools. But spurred by the rise of the Christian right, the issue is percolating with renewed intensity.

The Tennessee Senate on Monday sent back to committee what is

being called its "Monkey Bill," harkening back to the 1925 Scopes trial. States Attorney General Charles W. Burson delivered an opinion that the bill was unconstitutional.

Despite a similar opinion by Burson, the Senate last month passed by a 27-1 vote a resolution urging homes, businesses, places of worship and schools to post and observe

In Georgia, one school district, Hall County north of Atlanta, this year adopted a policy calling for the teaching of creationism along with evolution. A bill in the state Legislature to give state approval for teaching creationism has stalled in committee.

Alabama has approved a disclaimer to be inserted in biology textbooks calling evolution "a controversial theory some scientists present as a scientific explanation for the origin of living things." It goes on: "No one was present when life first appeared on earth. Therefore, any statement about life's origins should be considered as' theory, not fact.

## Columbia crew expresses joy to be back on ground after troubled mission

& DE

(Many Soft Spots)

Over 2,000 pairs of ladies name brand shoes with minor scratches, blemishes,

CAPE CANAVERAL, Fla. (AP) - The Columbia astronauts' joy to be home was loud and clear Saturday when the space shuttle landed safely, ending a 16-day mission fraught with anxiety and disap-

pointment. "Yeah!" "All right!" they shouted after Columbia rolled to a stop. 'We copy your elation," Mission

Control said. "Welcome back." The seven crewmen had to leave behind a satellite-on-a-cord and had to land with one less data-relay channel than desired.

'It is as if I had left some part of myself there in space," Italian astronaut Maurizio Cheli said of his country's tethered satellite. "It's a very disappointing feeling, this for sure.

NASA's oldest shuttle, carrying one of the most seasoned crews ever, glided through high, wispy clouds before touching down on the concrete runway at Kennedy Space

Center just before 9 a.m.

Columbia was supposed to land Friday, but thick clouds scuttled those plans. Clouds rolled back in early Saturday, forcing Mission Control to pass up the first landing opportunity, but the sky cleared.

Shuttle pilot Scott Horowitz explained the crew's exuberance at being back this way: "The last couple days have been kind of trying. I mean, we've been trying to come home ... and the weather just wasn't cooperating.

Complicating NASA's landing plans was the surprise failure last week of one of four computer circuits that control the wing flaps, rudder and brakes.

Even though only one of four identical channels is needed for a safe landing, National Aeronautics and Space Administration flight rules require that a mission end as soon as possible after such a failure. Shuttle

and overstocked shoes mean huge savings for you!

lion-plus experiment, and the satel-lite drifted off. Fortunately for the astronauts, the thin, copper and nylon cord snapped near Columbia, otherwise the shuttle may have become entangled.

Shuttle manager Tommy Holloway described the mission - in particular the tether experiment as "a roller coaster of emotions."

If nothing else, scientists proved tethered satellites could generate significant electricity while sweeping through Earth's magnetic field. Until the break, the satellite and cord had produced a satisfactory 3,500

volts of electricity and 1,000 watts of power.

"Our purpose is, really, to gain new knowledge about those things that we don't understand and don't know ... so perhaps there will be a silver lining in the cloud of the tether break," Holloway said.

A NASA investigation board will study the remains of the tether and its reel. The satellite and its 12-mile tail, meanwhile, are expected to burn up in Earth's atmosphere in less than two weeks.

Besides the tether debacle, Columbia's mission was vexed by false engine alarms and singed Orings

During the Feb. 22 launch, a gauge and caution light indicated one of the three main engines was not working right. It turned out to be a false alarm.

### NURSING HOME NEGLECT

WE ARE CURRENTLY ACCEPTING CASES INVOLVING NURSING HOME NEGLECT. IF A FAMILY MEMBER OR SOMEONE YOU KNOW SUFFERS OR HAS SUFFERED FROM BEDSORES, OR HAS BEEN INJURED IN A NURSING HOME, THEY MAY HAVE A CLAIM FOR NEGLIGENCE. BEDSORES ARE PREVENTABLE, BUT THEIR RESULTS CAN BE CATASTROPHIC. IF YOU SUSPECT ABUSE OR NEGLECT, CONTACT R. MIKE BORLAND AT THE LAW OFFICE OF BORLAND AND BORLAND, 213 N. MAIN, MIDLAND, TEXAS, AT (915) 684-5290, OR (800) 648-5290. AD PAID FOR IN PART BY CLAY DUGAS, 712 W. DIVISION, ORANGE, TEXAS. CASES TAKEN WILL BE HANDLED JOINTLY BY THE LAW FIRM OF R. ### Deaths/2B

### Native awareness

**ODESSA** — The Permian Basin Group of the National Native American Organization will hold a community awareness program 5 p.m.-7 p.m. Saturday at Sherwood Park for organizations — such as Boys & Girls Club, Big Brothers/Big Sisters and the scouts — that work with youth. Members of the group will teach Native American games. Refreshments will be served.

### Pre-school art

Registration is under way for preschool art classes that begin March 19 at the Museum of the Southwest. There are three sessions of four classes each. The sessions are 10 a.m.-noon on Tuesdays or Thursdays or 12:45-2:45 p.m. Wednesdays. Classes, which will focus on basic art priciples of color, texture, shape and form, are limited to 20 children a session. Fees are \$35 for museum members and \$40 for non-members. To register call the museum at 683-2882 or 570-7770 or Stephanie Fender, who will be teaching the class, at 685-3649.

### **Guest speaker**

The former press secretary for Nancy Reagan, Kathleen White, will be the guest speaker at Wednes-day's meeting of Midland County Republican Women. The meeting is set for 11:30 a.m. at the Hilton. Ms. White will talk about the 10th Amendment and how it protects states' rights.

### **Planetarium show**

The Marian Blakemore Planetarium will host Spring Break Sky-Shows, Tuesday through Friday. "Space Bus," set for 11 a.m., features a group of children on a field trip to outer space. It is for youth 12 and under. "Family Astronomy," set for 1 p.m., is a guided tour of the night sky and answers questions such as "why is the moon visible some nights and not others" or "why do my kids know so much about astronomy." It is for ages 7 and older. Both shows are 45 minutes long. Admission is \$2 for adults and \$1 for childrern 12 and under; Museum of the Southwest members are admitted free.

## Party caucuses set for Tuesday

### By Ed Todd Staff Writer

Precinct caucuses are scheduled for Tuesday night after the primaries so party members can select delegates to the county conventions and to discuss platform issues, resolutions and presidential nominees

"This is how the state and national platforms are written," said Rick Strange, chairman of the Midland County Repub-lican Party. "The grass-roots process starts at the grass-roots level in precincts all across the country. And if people want to participate in the drafting of the platform, the way to do it is to show up at the precinct conventions Tuesday night."

Republican precinct conventions are to begin at 8 p.m. in the party's 27 polling places.

Democratic precinct conventions are to

begin at 7: 15 p.m. in 21 polling places. "The primary focus is on electing del-

egates based on presidential prefer-ence," said Chris McCormack, chairman of the Midland County Democratic Party. "The vote itself is really just a popularity contest based on presidential preference.

McCormack said that the "people who attend the conventions are going to be submitting their own resolutions - what they feel are really important issues for the Democratic Party to resolve or to include in their platform.

The Republican county convention is to begin at 10 a.m. March 30 at Midland Center. The state convention is set for June 20-22 in San Antonio, Strange said. The GOP's national convention to select the presidential candidate is to be August in San Diego.

The Democratic county convention is

to be gin at 10 a.m. March 30 at the Vet-erans of Foreign Wars Hall near Midland Air Park, McCormack said. The state convention is to be June 7-8 in Dallas. And the national convention is to be August in Chicago.

The Libertarian Party precinct caucus is to begin 7 p.m. Tuesday at 3105 Barkley Ave., said David G. Roberts, chairman of the Midland County Libertarian Party.

"This year, we didn't run local candi-dates," Roberts said. "We're planning on doing it two years from now. We are going to shoot for having a whole slate of local candidates.

The Libertarian Party's county convention is to be held immediately following the precinct caucus. The party's state convention is to be in Lubbock in June, Roberts said.

At GOP precinct conventions, party

members will work on their platform and 'I assume they will have their typical prolife-type planks," Strange said. "With the (Pat) Buchanan candidacy, I think there will be people pushing his platform on immigration and trade.

Strange thinks that Buchanan's pro-life people will show up at the precinct conventions:

Proponents for a balanced national budget are to be represented in the precinct conventions, too, Strange said. Bruce W. Blake, chairman of Republican Precinct 402 - which is in central Midland - said that people who attend precinct conventions "are often highly motivated, one-issue voters.

'Special-interest groups have, through he convention process, taken control of the Republican Party. I hope this year will be different

Art and politics are two passions that former Midlander Denny Pickett has pursued throughout his life.

It's just like writing, if you've got a gift and you think you can communicate with people, that's part of it," Pickett said of art. "It's a way for me to express my own inner life. It's like writing. That's how I'm asking questions about myself and the universe. Politics he learned at home from his father, Perry Pickett, former judge of the 142nd Texas District Court. "My father was in politics. I learned to love

Pickett, who is mayor of Granger, was in Midland recently to judge entries in the upcoming Celebration of the Arts, set for Midland Center and Centennial Plaza May 17-19.

doing something like this always is," Pickett said. "There was a lot of really diverse and interesting material in all mediums from carving to clothing to painting."

The Arts Assembly of Midland, sponsor of the annual event, had to narrow its entries down to 70 because of booth space.

"It was a tough job having to fill a certain number of slots. I think we selected a real nice, high-quality show. So many people in Midland are doing really wonderful work.'

Pickett, a former member of the Episcopal Church of the Holy Trinity, was also in town to celebrate his father's 80th birthday

High School in 1967 and received his versity, where he received his master bachelor of fine arts in political science from Southwestern University in 1971.

school," Pickett recalled. "I don't know back then if we considered art as a career. So when I was going to Southwestern in Georgetown, my senior year, I had some electives. I took a couple of drawing classes. It sort of planted a seed.

Pickett found himself questioning if he wanted to spend his life working in a career that didn't include art.

"I really wanted to be an artist. My grandfather was an artist. I was taking lessons from Mrs. (Naomi) Lancaster when I was a kid. I've always loved art. And it was my senior year in college that I said, 'Hey, I'm going to pursue this.

He worked for a year, then enrolled Pickett graduated from Midland in graduate school at Texas Tech Uniof fine arts in painting in 1975. He did

## Animator dazzles children with art

### By Tonie Miller-Uzzel

### Staff Writer

Little children watching how the characters of "Pocahontas" move across the screen seldom think about how those images come to life.

But, on Saturday they were treated to a behind-the-scenes look at how the lively little raccoon, Meeko, was brought to life in "Pocahontas.

Meeko's supervising animator. Nik Ranieri, 34, spoke to groups and answered questions as a special promotion for Target's grand opening.

Walt Disney's 33rd animated film, "Pocahontas" was released on video Feb. 28.

Ranieri got his start in animation in the film "Who Framed Roger Rabbit" working on Roger Rabbit, Jessica and the

weasels. From there he moved on to Disnev

Ranieri served as an animator for other Disney characters including Lumiere the candlestick in "Beauty and the Beast", Ursula the sea witch in "The Little Mermaid" and Wilbur in "Rescuers Down Under.

Unlike previous animals in Disney films, Meeko and his hummingbird friend, Flit, do not speak but must express themselves with body language.

Ranieri designed Meeko from the ground up," creating his personality and ppearance.

Because Meeko doesn't speak, Ranieri employed the use of pantomime and exaggerated his movements and expressions

Originally Meeko was supposed to be

Spending a week in the Swiss Alps would be cheaper. There was a time when an unmarri

Ott

There was a time when an unmarried person could purchase three or four boxes of Girl Scouts cookies and

Now you have walk-a-thons, read-a-thons, jump-athons and any other "a-thon" some imaginative group leader can come up with. Then the kid, who has absolutely no interest in raising money, goes home and tells his parents he needs to come up with x-number of dollars so he can remain in good standing in his particular organization.

The parents say "no problem." And you know what happens next. That's right, they start lurking around the office with those dreadful forms that will commit you, the unsuspecting co-worker, to a month's salary so that their kid can be considered a success. And these parents are tricky, too.

They act like they are really embarrassed to be doing this. But don't be fooled. They have a purpose and they have a game plan. They also are prepared.

The conversation usually goes something like this: Parent (with eyes staring at floor): "Gary, I hate to do this, but my kid is trying to raise money so he can ttend camp next summer. Can you contribute a few dollars? This box of candy, for example, (which con-

tains all of three pieces of the actual candy) is only \$25. You: "Gee, how can I pass on such a great deal? Got change for a fifty?

Parent (with hideous "gotcha" grin on face): "Yeah, as a matter of fact, I do.

NOTE: That's why these individuals are so tricky. They always have change for any amount of money you come up with. That's because they are prepared. They know the rest of us carry at least one large bill in our wallet, hoping it will allow us a graceful escape clause from these requests.

But the parents won't cooperate.

If just once they would say, "no, I can't break a fifty

post-graduate studies in painting and drawing at the University of Wisconsin at Madison

Pickett returned to Midland and taught painting, drawing, twodimensional design and art history at Midland College until 1979, when he and his wife, Jan Swallow also a former Midlander moved to New York City.

"It was great - we lived and worked and had a good time, Pickett said of their four years in Greenwich Village. "It was great for my career." He owned a gallery

Although they loved New York, the Picketts felt compelled to return to Texas after their son was born. Tyrone "Ty" Pickett is a member of the rock 'n' roll band band Gouge, which plays throughout central Texas.

Pickett's life also includes his 16year-old nephew, Nathan, the son of his younger brother, Jody, who is now deceased.

In 1983, when the Picketts returned to Texas, they chose to settle in an area close to Georgetown. "I like the area. We moved back to Georgetown first, but we were looking for a loft.

"In New York, we had a loft. We found an old building in the little town of Granger. We bought an old building and made it a home.'

It was touch and go," he said of the remodeling project, "but we're veterans of buildings and moving projects. We started out early and had figured out how to do it.

We had so much fun with that (building), we bought one next to it, and I put my studio in it.'

rectly to his being mayor. "This new guy comes into town. It's kind of depressed. He's remodeling old buildings. It's a small town. The mayor who I finally defeated said 'would you be willing to serve on the council?' So it started out as a volunteer project that stuck with me.

The building projects led indi-

Pickett served on the City Council for several terms. He is now serving his second term as mayor.

Still, he considers himself primarily an artist. "I'm a painter, painting on paper or canvas. I do different things. I do work from nature. I'm very contemporary. Some of it is non-objective, totally abstract. But then I go out and do a landscape.

Pickett, who also teaches painting, photography and art history at Co. Mary Harden Baylor University, said what has remained constant about his work is its underlying theme.

'My work has always remained about deep space - vast space. It is about living out here in West Texas — the vastness. ... So my work, my landscapes and everything I do, is about space. Not outer space. Vastness.

'And very much about the desert. I even use desert colors the way the sun hits that limestone in West Texas, it bleaches everything. Sun- bleached and white.

"Midland and growing up'out there in West Texas has become a real important part of my work. It's always been a thread. As I'm getting older, I'm gravitating to it more.

### MIDLAND REPORTER-TELEGRAM, SUNDAY, MARCH 10, 1996

### DEATHS

### George S. Snowden

**BIG SPRING** — Services for George S. Snowden, 82, of Lake Thomas, are to be at 4 p.m. Monday, March 11, at Trinity Memorial Park in Big Spring with Roy C. Tolcher officiating. Arrangements are under the direction of Nalley-Pickle & Welch Funeral Home in Big Spring.

Snowden died Friday, March 8, at his residence.

He was born Dec. 6, 1913, in Colorado City.

He was a mechanic for Howard County for 28 years before retiring in 1981. He moved to Lake Thomas 17 years ago.

He was a member of the Elks Lodge.

He was preceded in death by two brothers and one son, Paul Wesley Snowden.

Survivors include one son, Gary Snowden of Big Spring; one sister, Claudia Short of Winfield, Iowa; and six grandchildren.

Memorials can be made to the American Cancer Society, c/o Lucy Bonner, P.O. Box 2121, Big Spring 79721-2121.

### Leslie I. Gordin

DIMMITT - Services for Leslie I. Gordin, 78, of Dimmitt, father of Midlander Mary Evans, are to be at 10 a.m. Monday, March 11, at Ivey Chapel in Dimmitt with the Rev. Lee Roark officiating. Burial will be at 3 p.m. at McLean Cemetery in McLean under the direction of Foskey-Lilley-McGill Funeral Home in Dimmitt.

Gordin died Friday, March 8, in Dimmitt after a brief illness.

He was born Sept. 8, 1917, in Nowata, Okla. He is a veteran of the U.S. Army.

He retired in 1982 after working 34 years for El Paso Natural Gas children.

### He moved to Dimmitt in 1977 from Shamrock

He was preceded in death by his first wife, Maxine Gordin, in 1978. He married Jo Nita Smith on July 22, 1978, in Dimmitt.

He was also preceded in death by two brothers.

Other survivors include his wife Jo Nita Smith Gordin of Dimmitt; one son, Gary Gordin of Dumas; one stepson, Michael Sparks of Amarillo; one stepdaughter Nita Ware of El Paso; six grandchildren and nine great-grandchildren.

Pallbearers are to be George Newell, Carl Askins, Coy Kidd, Harlis Logan, James Burnan and Dan McInroe.

Memorials can be made to the American Heart Association.

### Melvin O. Lofton

Services for Midlander Melvin ). Lofton, 92, are to be at 1 p.m. (MST) Monday, March 11, at Griffin Funeral Home Chapel in Hobbs, N.M. Burial will follow at **Prairie Haven Cemetery in Hobbs** under the direction of Griffin Funeral Home. Visitation will be at 1 p.m. (MST) today, March 10, and 8 a.m. (MST) Monday, March 11, at the funeral home.

Lofton died Friday, March 8, in Midland.

He was born Nov. 15, 1903, in Ardmore, Okla.

He lived in Hobbs, N.M., from the late 1930s until 1987 when he moved to Midland. He was a member of Calvary Baptist Church in Hobbs, N.M.

He ws preceded in death by his wife, Juanita Nettie Lofton and by one son, Roy Sanchez.

Survivors include two sons, Mario Sanchez and Tony Sanchez, both of Midland; and many grand-

Celebration of the Arts entry list announced

From Staff Reports

Artists whose works have been accepted in the 13th annual Celebration of the Arts include:

Midland: Max Perry, Mary R. Griffith, Mary Rasmussen, Ann Elise McCoy, Monroe Jackson, William Hagerman, Helen Pogue, Doris Spires, Tanya C. Godfrey, Betsy Haney, Tom White, Nancy Tubb, Rejeana Diers, Charles N. Pruitt, Liz W. Chancellor, Anita Goudeau, Mary Lou King, Char-lotte Seay, Tommy Watts, Dan L. Haller, Don Parks, Jeanne Smith & Pat Brooks, Larry D. Griffin, Randy Bryant, Vicki R. Donnell, Paige Innerarity, Virginia Rachal, Nancy Klingler, Jo DuFo, and

Herb Cooper. Texas: Nancy Dye, Odessa; Fred & Rose Knapp, Fredricksburg; Joyce Jones, Lamesa; Theresa Hollister, Natalee S. Morse and Sharon Johnston, Dallas; Robert Huckaby, Fort Stockton: Fred Stockbauer, Daniel Maldonado, Jerry Seagle and John

Fleming, Ingram; Randi S. Levinson and Cristina Robbins, El Paso; Clo Greer, Mount Calm; Dick McGown, McKinney; Chris Stender, San Antonio; Kenneth Grey Wilson and F.B. Harris, Buda; Curtis Laudermilk, Bryan; Debbie Little, Helotes; Bernice Landrum and Martin Pothier, Abilene; Janice O. Clark, Garland; Hugh Campbell and Sandra Schwaighofer, San Angelo; Beth Gilliam, Lubbock; Barry Arthur and Monty & Barbara Jones, Sweetwater: Pat Zappe Billmeier, Ballinger; and Doyle Curtis, Amarillo.

New Mexico: Randall S. Wilson, Tami Sioux and Will and Johanna DeMay, Albuquerque; Donna Spray, Alto; Roy & Joy Brown, Tularosa; Kate Brown, San Lorenzo: Randall Brooks, Antho-

Elsewhere: Wendy Morrison, Denver: Shirley M. Hiner, Fort Wayne, Ind.; Frank Bateman, Bisbee, Ariz.; and Dick Reynolds,

He is eating a biscuit, munching away, and raccoons are fastidious. OK, he brushes away the crumbs and then he looks down and it's like 'I can't leave the good things to waste,' so he picks them up. It shows he is sort of hungry. It shows the personality trait of a lot of human beings, so they can relate to it and it shows the cleanliness of raccoons. You get a wellrounded character with animal tendencies with human expressions and attitudes," Ranieri said. He said he enjoyed working on

this movie because of the amount of input he was to put into the film. The directors welcomed the

input of the animal animators and looked to us for ideas, gags and personality bits for our characters.

3,000 drawings for Meeko's character.

The animator said of all the characters he has worked on, picking a favorite is like "comparing apples and oranges.

Of his talking characters, he said Wilbur the albatross is his pick because of John Candy.

"It was a great voice to work with. It was a lot of fun to animate to John's voice," he said. When he animated Wilbur, the character was already designed

because of the first movie "The Rescuers. But, with "Pocahontas" he designed Meeko. So, he had to

work with the character designing him in such a way that he fit in with rest of characters in film. Then the directors OK'd it and he worked with other supervising animators to make sure all the characters fit together.

With the voice talents in the Disney films, Ranieri said the voices come first, then the animation.

"If you watch the films, you'll see characters inhaling and breathing. On Disney films, especially, the expressions are bang on, it is very hard for somebody to put the little side stuff and match it directly. If you want to see something that is done after the ani-mation, look at the old black-andwhite Popeye cartoons and you

don't see the mouth moving. "It is all broken down to the frame. A sound strip runs at the same speed as the film; it is like regular live action. We just break down what sounds happen on what frames," he said.

"The best part of the job has nothing to do with working. I'm kind of an anonymous person. I like to go into the theaters and actually hear. I favor toward humorous characters and I like to

So as soon as Co-Worker No. 1

walks away, Co-Worker No. 2

"Gary," she says, "my daughter is raising money to fight cancer. Can I put you down for \$20?"

about the role. But, I figure, he is evil and he does fail at the end," he said.

**Ranieri discovered his interest** in art while he was a child. When he went to college he originally wanted to be a cartoonist, but the cartooning class was dropped, so he took animating.

"I had a real knack and a liking for it and it grew from there. When you draw, that's it. There is nothing else. But, when you ani-mate there is all this work and all these drawings and it goes up on the screen and there is added life. They talk, people laugh at what it says and what it does. It is an extra payoff you don't get with regular flat artwork," Ranieri said.

Considering his job, does Ranieri like kids?

"I'd better. We're expecting one in August!" he said with a laugh.

## TO THE CITIZENS OF MIDLAND COUNTY

### OATH TO OFFICE:

I, Gary Painter, do solemnly swear (or affirm), that I will faithfully execute the duties of the office of Sheriff of Midland County, State of Texas, and will to the best of my ability to preserve, protect, and defend the Constitution and laws of the United States and of this State; and I furthermore solemnly swear (or affirm), that I have not directly nor indirectly paid, offered, or promised to pay, contributed, nor promised to contribute any money, or valuable thing, or promised any public office or employment, as a reward for the giving or withholding a vote at the election at which I

was elected. So help me God.

This is my oath of office and my pledge to the citizens of Midland County when I was elected to the sheriff's office. We've seen many changes in Midland in the 11 years I've been in office, but one thing has not changed: my pledge to the people of Midland County. We have one of the finest sheriff's departments in the State of Texas and we are very

dedicated to our commitments to the people.

I will continue using every available resource within my authority to provide unprejudiced, honest law enforcement and public protection to all the citizens of Midland County, regardless of race, color or social status.

I will also continue supporting our volunteer programs such as:

- Crisis Intervention Unit
- Drug Education in our Schools (D.A.R.E.)
- Reserve Deputy Program Neighborhood Watch Programs (Crime Prevention) C.
- D Crime Stoppers
- E.

I wish I could sit down with each of you and encourage you to vote. Vote for the candidates who will stand by their My door is always open at the sheriff's office; and if you would like to stop by, you will always be welcome because commitments and work for the best interest of everyone.

you are who we work for and we do care.

## LET'S KEEP LAW ENFORCEMENT CLEAN AND HONEST

I sincerely ask for your support and vote in the March 12 primary election.

report

P

TYLER, Texas (AP) — A state district judge in Tyler has ordered a Louisiana man with AIDS to obtain written, informed consent from all future sex partners as part of his probation in a car theft conviction.

State District Judge Louis Gohmert has sentenced Thomas Paul McDevitt, 33, of Metairie, La., to five years' probation. The informed consent is a condition of the probation.

"Thomas Paul McDevitt has advised me that he-she has been diagnosed as positive for the HIV virus in his-her body and may be symptomatic for the disease of acquired immune deficiency syndrome," the informed consent form states.

"Although I realize I am poten-tially risking my own life, 1 nonetheless desire to engage in sexual relations with the above named individual." the consent statement concludes.

The sentence was handed down **Tuesday** after McDevitt pleaded guilty to unauthorized use of a vehicle. He could have been sen-

**LEND A HAND TO HUMANITY!** 

### Midland Law Enforcement Officers Against Gary Painter

Officers of the city and county of Midland have formed a coalition to hopefully bring about needed changes in the Sheriff's department. Collectively and unnamed, we strongly encourage Midland County citizens to vote against Gary Painter on March 12th. Unfortunately, if named individually, we believe we could be faced with an even greater lack of cooperation from Painter and some of his staff. While Gary Painter is a likable individual, he has apparently allowed some of his upper management staff to run his department. He often appears not aware of the actions of some personnel, who are costing each and every taxpayer money.

We are dedicated officers who want to see Midland the way it used to be, relatively crime free with a "tough on crime" attitude which was partly due to cooperation and camaraderie among local law enforcement agencies and their staff. We all worked together for the common good. We do not mind working long hours and taking risks; we're too busy for useless investigations of Gary Painter's political opponents and for frivolous law suits that are time consuming, cost the taxpayers money, and take us away from our objective, which is, and should be, making Midland a better place to live for our future generations.

We are strongly motivated to speak out now due to Painter's continuous declarations of cooperation between agencies. In our opinion his office does not cooperate with other agencies. Lack of cooperation has put some officers' lives on the line. Therefore, we sincerely believe it is time for a change. We believe it is time for competence and commitment to again become the focus of the Midland County Sheriff's department.

The current state of the Sheriff's department and the overall lack of cooperation from Painter's department has forced a group of us to band together in an effort to get good management, accountability and cooperation back in the Sheriff's office. We need good leadership; leadership that provides fair and responsible service to all of the people of Midland County. This coalition of law enforcement officers is committed to good police work and getting the job done rather than talking about it. We are going to continue to work together to monitor the activities of the Sheriff's department and report inappropriate activities objectively to the citizens of Midland County. We urge all Midland County citizens to vote AGAINST GARY PAINTER on March 12th.

## Buchanan discusses animosity toward Dole

said Saturday he was not certain he would back Bob Dole in the fall, derisively referring to the likely GOP presidential nominee as a hollow, duplicitous candidate who has no ideas and had sold out the middle class.

During an interview with The Associated Press, just the mention of Dole's name stoked anger in Buchanan, who vowed to stay in the Republican race and selectively target a few states even if Dole mathematically clinches the nomination in the next few weeks

"What does Bob Dole stand for that we all ought to get behind?" Buchanan asked. "The answer is: nothing.

Buchanan conceded Dole was most likely to win the nomination but, at a time most other Republicans are rallying around the presumptive nominee, left no doubt that peace with him was nowhere near at hand.

'Next question," he said bluntly when asked if he would pledge to enthusiastically back Dole if he were the nominee.

Recalling his general election support of President Bush in 1992 after his bruising primary challenge, Buchanan said: "I thought Bush, for all his mistakes on taxes and the other things, was simply a better man and a better president and was more representative of what I believed than Bill Clinton.

Asked if he could make the same judgment

DALLAS (AP) - A defiant Pat Buchanan honestly don't know what Bob Dole believes do anything about it."

Buchanan traced his anger to Dole's decision in New Hampshire to launch a television ad labeling Buchanan "too extreme" to be president.

"Dole and I used to be very, very friendly, Buchanan said. He said he had been rejecting staff advice to be tougher on Dole because, "I wanted to win on ideas and if I didn't win I didn't want to do anything that damaged Bob Dole's last chance to be president of the United States."

The Dole strategist who advocated the "too extreme" ad was pushed out of his job, and Dole aides who opposed the strategy are urging rapprochement with Buchanan. But he dismissed the idea, complaining that the ad aired for at least a week after Dole said it was being pulled.

"The nastiness and the duplicity of the Dole campaign and what he was doing really angered me and enraged me and disgusted me." Buchanan said. "And those feelings don't change.'

Dole seems intent on avoiding a direct confrontation with Buchanan.

"He can say anything he wants ... But I don't want to get into a fight with Pat Buchanan, Dole said Saturday. "My target is President Clinton and if Buchanan wants to make it easabout Dole, Buchanan said: "I don't know. I ier for Clinton by cutting Bob Dole up, I can't

. .

Buchanan's tone bordered on bitter as he discussed how his prospects for the nomination rose after his New Hampshire primary victory, but then dimmed after losses in Arizona and South Carolina that he blamed on Dole attack ads and a revolt of the GOP establishment against him.

We almost got to the top of that hill and got over it," he said.

Before heading out on a bus tour, Buchanan said he had little hope of winning here in Texas or any of the seven states with GOP contests Tuesday

But he hoped against the odds for "a big jolt" that could topple Dole. He said he was raising more than \$600,000 a week and promised major efforts in primaries in Michigan on March 19, California on March 26 and Pennsylvania on April 23 - although Dole could have the nomination in hand by then.

Buchanan won 82 delegates four years ago and has 62 so far this year, compared to 392 for Dole.

Regardless of his ultimate delegate total, Buchanan vowed to be a force at the GOP's August convention and defend the party's anti-abortion platform plank. He promised to push tough platform language encompassing his call for a moratorium on immigration, and ending foreign aid as well.

less than half the licenses that have been applied for sent out," Mark Seale said Saturday. "You're still looking at the first set of applications that were sent in - and that is from a pretty involved gun supporter who, when he realized he had the immediate right to apply for this license, he ran down and applied.

Nina Butts, a spokeswoman and board of directors member for **Texans Against Gun Violence, said** the figures aren't going to change for high-crime areas because those people weren't interested in putting more guns on the streets.

**'Texans Against Gun Violence** has never seen the concealed gun

law as a way to prevent crime," she said. "The law is a narrowly written piece of special interest to sell guns. It's not about public safe-

'It was sold as something that would help older people, single mothers, and people who live in high-crime areas. But we are not seeing those people getting the permits.

Seale said that if in two years the number of permits outside highcrime counties is greater, he would be concerned. But for now, he says an analysis is too early.

As of Monday, 23,615 permits had been issued under the new law, which allows permitted Texans to carry concealed weapons, the DPS said Friday. Information on additional permits won't be available sis shows. The county had 158

until April from the department, which released the statistics by ZIP code only.

The AP used database and computer analysis to place the ZIP codes into each of the state's 254 counties to determine the rate of permits.

Lawmakers who pushed the right-to-carry law said people should be able to protect themselves from crime. But many of the Texans with permits to carry concealed guns don't live in highcrime counties.

The highest rate for any of the 237 counties where permit holders live was in South Texas' McMullen County, where nearly one concealed gun permit has been issued for every two residents, the analy-

serious crimes, or index crimes, for every 100,000 people in 1994, among the lowest rates in Texas

based on the latest available data. By comparison, the permit rate in Harris County was slightly more than 78 per 100,000, while it had 186,833 index crimes — murder. rape, robbery, aggravated assault, theft and motor vehicle theft - per 100,000 residents in 1994

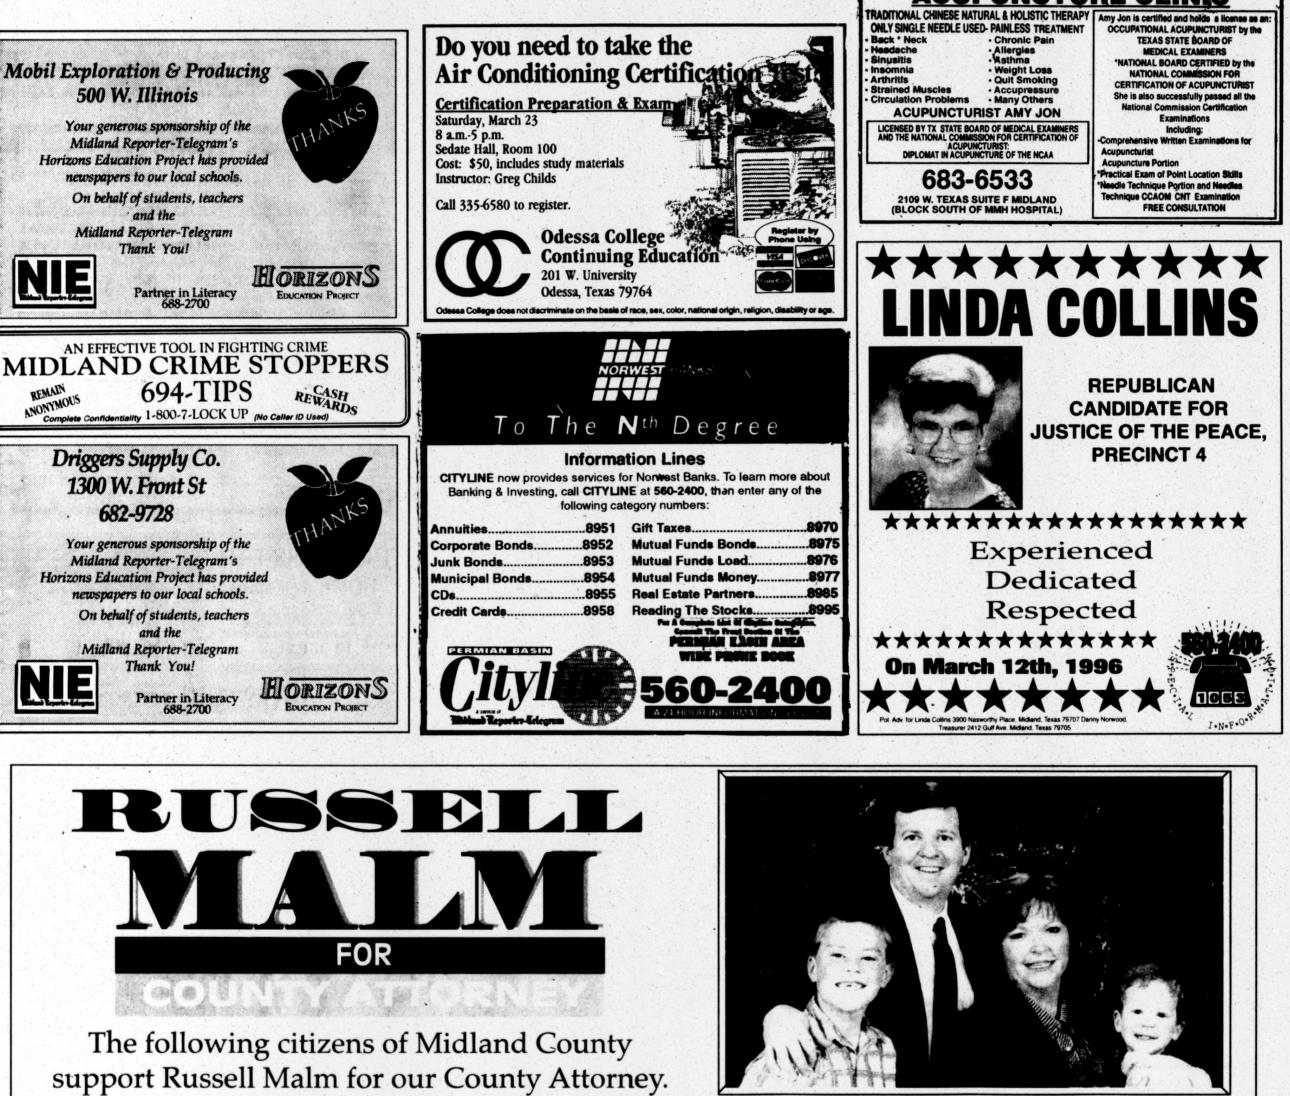

In Dallas and Bexar counties, the permit rates were just over 145 and 137 per 100,000, respectively. The former's crime rate was 159,657 per 100,000, while the lat-

**ACUPUNCTURE CLINIC** 

ter's was 101,074 per 100,000

The lowest permit rate was in West Texas' Presidio County, where just more than 13 permits per 100,000 people have been issued. In 1994, the county recorded 54 index crimes per 100,000 people.

Rates studied by the AP were based on 1994 Census Bureau population estimates and 1994 Index Crime Rates. The county's permit rate could be slightly effected by 1995 population estimates released last week. However, those estimates for every Texas county were not immediately available.

### Teacher denies making racial remarks

ROSENBERG, Texas (AP) -One of two teachers accused of making racist statements about their students has told KHOU-TV she never made the comments attributed to her.

Lamar Consolidated High School officials placed the teacher whose identity has not been released - on administrative leave with pay this week after a Texas Education Agency report said she referred to Hispanics as 'animals.

"I totally deny those quotes," said the teacher, whose face was shielded in the interview carried by KHOU-TV on Friday.

The quoted racial slurs, including "They're just animals," and "For Hispanics, it's better to be dumb," appeared in a preliminary TEA report.

An agency spokeswoman has said more than one teacher made disparaging statements to the TEA's peer review accreditation team and local reports have said that two teachers made the disparaging comments.

However, only the one teacher has been placed on administrative leave. She insisted Friday that she was never named in the TEA report and that the school district's accusations had put her life in jeopardy.

"My whole life has been turned topsy-turvy inside a week," she said. She was forced to leave her home because of threats of violence against her, she said.

The school declined to comment on the matter.

Several Rosenberg police officers were on patrol at the school because of threats of retaliatory violence against white students by disgruntled minority students.

More than half of the school's 1.300 students were absent on Friday. However, Friday was also the last full day of school before Spring Break - usually a poor attendance day for the school. It was also the unofficial "Senior Skip Day" designated by the senior class.

No acts of violence were reported.

## Economic espionage costs America jobs

candidate Patrick J. Buchanan, you get the sense that American industry has seen its best days.

**JACK ANDERSON** 

But foreign countries envy our industries so much that an alarming number of nations are stealing our economic secrets. This phenome-'economic espionage'' - is emerging non -

as a major issue for the United States as competition heats up in the global economy

Intelligence sources estimate that at least 6 million American jobs have been lost this decade due to economic espionage. It's hard to quantify the amount of money American companies have lost by having their secrets stolen.

but the total surely falls in the multi-billion dollar range

High-technology and defense-related industries are the primary targets of foreign espionage. Other major targets include: biotechnology, aerospace, telecommunications and computer software.

The laxity of laws governing industrial espionage came as a surprise to Senate Intelligence Committee Chairman Arlen Specter, R-Pa., a former Philadelphia prosecutor. "I did not know that you can be prosecuted for stealing a car, but not for stealing a patent," Specter told our associate Ed Henry.

FBI Director Louis Freeh recently told a Senate panel that Fortune 500 companies like Mobil, IBM and McDonnell Douglas have been victimized by such espionage. In the Mobil case, two foreign companies hired an "information broker" who stole information about the oil company's bid on a nuclear reactor project worth millions of dollars. To Freeh's frustration, the FBI could not prosecute the brokers because there are no American laws covering such behavior.

Specter and Sen. Herb Kohl, D-Wis., have introduced legislation that would make it a federal crime to steal proprietary economic information from an American company. "Foreign governments look at America and see a onestop shopping mall for all their business and information needs," says Kohl. "And what they cannot buy, they will shoplift."

CIA sources say at least 51 countries have spies in America whose primary goal is to gather economic intelligence. FBI officials, meanwhile, say that ongoing investigations of eco-nomic espionage have doubled — from 400 to 800 cases — in the past year.

This economic war is being waged against us by some of our own allies, France, Germany

ASHINGTON — If you listen closely and Japan among them. In some cases, said that as an alternative to compulsory military one FBI official, our allies "take advantage of service, one foreign government has an orgaone FBI official, our allies "take advantage of their considerable legitimate access to U.S. information and collect sensitive information more easily than our traditional adversaries."

Testimony given to Congress, and interviews with public officials, suggest that the problem could get worse before it gets better:

- Russian President Boris Yeltsin recently ordered his top aides to close the technology gap with the West. To accomplish this mission, Yeltsin said, Russia must make better use of industrial intelligence.

- The increased use of computers as a business tool have heightened the threat of espi-onage. A group of CEOs from 13 major computer companies recently estimated that cumulative financial losses resulting from computer break-ins could hit \$80 billion by the year 2000

According to congressional sources, one American firm recently lost a major procurement in a Middle Eastern country to a European competitor. The sources say the American firm's computer system was clearly breached. Its unique approach and financial structure appeared verbatim in their competitor's proposal for a \$350 million contract worth over 3,000 jobs.

In some cases, countries recruit students before they come to the United States to study, asking them to send back any technological information they come across. Freeh revealed service, one foreign government has an organized program to send interns abroad - often with the specific task of collecting technological information.

Last year, a former employee of two American computer companies admitted stealing vital information on the manufacture of microchips and selling it to China, Cuba and Iran. For nearly a decade, the man had copied manufacturing specifications worth millions of dollars.

He was arrested and charged with violating federal stolen property and mail fraud laws. But he's likely to escape punishment because the things he stole were not "tangible properbut merely "ideas.

- Perhaps the worst industrial parasites can be found in France, where intelligence agencies routinely share proprietary financial information with state-owned companies. Such information can be invaluable when nationalized French industries bid for foreign contracts against American firms.

As one CIA source put it recently: "Take it as a given that the first-class seats on Air France have frequently been bugged for the last 15 years at least," in reference to the seats that U.S. businessmen occupy on their way to Paris.

Jack Anderson's and Michael Binstein's column is distributed by United Feature Syndicate.

Anderson

are areas of the Sheriff Department's operation where improvements are needed, notably in what Mike Kaufman, who is opposing Painter for the nomination, calls budgetary mismanagement and poor cooperation/coordination with other law-enforcement agencies. There also is concern about a relatively high number of case dismissals because of insufficient evidence and Perkins reports that Painter does not have complete control over all aspects of the department as he should.

We agree that change

### **TODAY IN HISTORY**

70th day of 1996. There are 296 days left in the year. Today's Highlight in History:

On March 10, 1876, Alexander Graham Bell made what was, in effect, the first telephone call. His assistant, in an adjoining room in Boston, heard Bell over the experimental device say, "Mr. Watson, come here. I want you.'

On this date: In 1496, 500 years ago, Christo-

pher Columbus concluded his second visit to the Western Hemisphere as he left Hispaniola for Spain.

In 1629, England's King Charles I dissolved Parliament; he did not call it back for 11 years.

In 1785, Thomas Jefferson was appointed minister to France, succeeding Benjamin Franklin.

In 1848, the Senate ratified the Treaty of Guadalupe Hidalgo, ending the war with Mexico.

Grant In 1864, Ulysses S. became commander of the Union armies in the Civil War.

In 1880, the Salvation Army arrived in the United States from England.

In 1948, the body of the anti-Communist foreign minister of Czechoslovakia, Jan Masaryk, was found in the garden of Czernin

Palace in Prague. In 1949, Mildred E. Gillars, who had made wartime broadcasts for the Nazis as "Axis Sally," was con-victed in Washington, D.C., of treason. She served 12 years in

In 1969, James Earl Ray plead-ed guilty in Memphis, Tenn., to the assassination of Martin Luther

C

Today is Sunday, March 10, the King Jr. Ray later repudiated that plea

In 1985, Soviet leader Konstantin U. Chernenko, at the Kremlin helm for just 13 months, died at age

Ten years ago: President Reagan lobbied members of Congress as he intensified his quest for \$100 million in aid to the Nicaraguan Contra rebels. Death claimed actor Ray Milland in Torrance, Calif., at age 78 and comedian Myron Cohen in Nyack, N.Y., at age 83.

Five years ago: Eight Arab gov-ernments endorsed President Bush's Middle East peace proposal calling for Israel to relinquish territory, and reiterated their desire for a peace conference. Hundreds of thousands of people demonstrated in Moscow, demanding that President Mikhail S. Gorbachev resign.

One year ago: The Labor Department reported the nation's unemployment rate for February dropped to 5.4 percent, down 0.3 from the month before. The Clin-ton administration released \$3 billion to support Mexico's faltering economy. Former Mexican Pres-ident Carlos Salinas de Gortari fled to the United States.

Today's Birthdays: Playwright David Rabe is 56. Newspaper columnist Bob Greene is 49. Former Canadian Prime Minister Kim Campbell is 49. Actress Sharon Stone is 38. Britain's Prince Edward is 32.

Thought for Today: "We must not waste life in devising means. It is better to plan less and do more." William Ellery Channing,

## LETTERS

### Let's elect someone who never sold out

As a member of the law enforcement community and holder of a bachelor's degree in criminal justice, I have closely followed the race for county attorney. How can you have the courage to stand up to crime when you have made your living off of defending criminals? Let's elect someone who never sold out to money. Vote Janice Hinshaw. **C. Jarvis Jenkins** 

Midland '

### Statement made by opponent's sister is untrue

I am responding to the letter published in the March 8 edition of the Reporter-Telegram stating that Midland County Tax Assessor-Collector Kathy Reeves spends more than she says which was from Mrs. Jeff J. Durham, sister of Reeves' opponent. Durham states that Reeves "pays a law firm a flat fee of \$45,000 . . . " This statement is untrue and typical of many distortions of fact generated by Reeves' opponent. I know the statement is untrue because I am the lawyer that is alleged to receive this flat fee and our firm has never received a flat fee of any amount for our services to Midland County. Anyone interested in the truth could easily read our contract with Midland County that is a matter of public record, that states our only compensation will be a percentage of what we collect for Midland County, which is paid entirely by the delinquent taxpayers. This results in a substantial savings to those of us who pay our taxes on time.

**Russell N. McInturff** Midland

### **Hinshaw works** for the people

I am a seven-year law enforcement veteran, and am well acquainted with the role of county attorney. It is not just a ques-tion of qualifications and experi-ence, but a question of character and integrity. How can Russell Malm say he should be county attorney when he has spent his career keeping criminals out of jail? Janice Wolff Hinshaw has spent her career working for the people, putting criminals behind bars where they belong. Make the right choice.

**Raymond Miller** Midland

### Painter deserves thanks for his commitment

As a Texas Board of Legal Specialization certified criminal lawyer, and having been in practice in Midland County since September of 1973. I regularly come into professional contact with members of the Midland County Sheriff's Office and their work. That contact includes pretrial and trial situations.

I have had occasion in the "discovery process" to review large numbers of reports and papers prepared by Midland County sheriff's deputies. Since Gary Painter became sheriff, there has been a significant improve-ment in both the quantity and quality of the work done by the Midland County Sheriff's Office. The reports and documents prepared by Midland County sheriff's deputies and their performance in court in the cases in which I have participated com-pare favorably with the written material and testimony offered by other Texas law enforcement agencies in our Midland district, county and municipal courts. Sheriff Painter deserves our thanks for his commitment to continually improving his department and overseeing an organization that both fields competent criminal investigators and constantly attempts to improve the effectiveness of its preparation for trial.

J. K. "Rusty" Wall Midland

### Painter is only qualified candidate

I admire Mike Kaufman. I admire Mike Kaufman. I admire anyone who has enough grit and determination to run for, and actually expect to be elected to a public office for which he is clearly not trained for, and has absolutely no experi-ence. Not one to be deterred by this fact, he "flies" ahead with

unparalleled bravado into the face of common sense. The slogan 'Time for a Change' clearly sums up his entire philosophy. Another philosophy much the same elected President Clinton for four years. When March 12th rolls around, be assured that I will proudly cast my vote for the only qualified choice for sheriff of Midland County, Gary Painter.

**Pat Hallmark** Midland

### We need proven experience for office

The race for county attorney has been clouded by such issues as volunteer work and family. It's time to look at the facts. Russell Malm's supporters claim his criminal law experience will qualify him as a prosecutor. Folks, defending drunk drivers, thieves and narcotics offenders does not teach one how to prosecute. We need proven experience in the County Attorneys Office.

Elect Janice Hinshaw. **Elias Gonzalez** Midland

### GOP first must win, then squabble

The purpose, the sole purpose, of a political party is to win elections. In order to do so, the party needs to concentrate on the common interests of its members, not their differences. After the election is won, then the intraparty fighting over the differences can be settled. But the election first must be won.

Unless the current leadership of the Republican Party can awaken to these facts of life, they are dooming themselves to losing the upcoming elections. And they and the country will be forced to endure and suffer four more years of the libertine Clinton and his socialistic administration.

Hugh G. White Midland

### **Our policy on letters**

**The Reporter-Telegram** recognizes the "Letters to the Editor" format as an important forum for citizen opinion and encourages participation of all readers. To that end, we have set as few rules as possible. However, we must have some, and they are:

Letters must be signed and include a street address and daytime phone number for verification. Letters not including this information will not be considered for publication.

They should be no more than 350 words in length. While some lengthy letters are published, we reserve the right to edit when necessary due to space limitations. The briefer the letter, the better its chance of publication. Only one letter per ment here writer can be

month per writer can be published.

Letters will be edited for length, taste and legal reasons and are accepted only on that basis. Letters which are difficult to reduce in length will be returned to the writer to be edited before being re-submitted

We do not publish 'open' letters, copies of letters sent to others or multiple signatures.

Because we cannot research and verify all information in letters, by publishing them we neither imply nor guarantee the accuracy of information stated by writers.

Letters should be sent to: The Editor, Midland Reporter-Telegram, P.O. Box 1650, Midland, TX 79702

P

D

The race for sheriff of Midland County has two Baptists as candidates. So, whoever wins will be a Christian. Religion should not be the only issue anyway.

Sheriff Painter has been an embarrassment with his sighting of Communists in Mexico, his

bogus sting of the Portuguese "gun runner," his drug busts out-side the state of Texas, his close friendship with the now-convicted ex-sheriff of Presidio and his likely participation in the "sting

operation" on a Midland County commissioner. He has had a chronic problem of overruns in

his huge county budget while the other county offices live within their budget.

It is time for integrity in office. Vote for a new Midland County sheriff, Mike Kaufman! Robert E. Vanderpool Midland

### Sheriff harasses law-abiding citizen

This is in response to the article in the Reporter-Telegram on March 6, where Mike Kaufman held a press conference on the complaint of using the picture of the sheriff's badge on his campaign literature.

Sheriff Painter made a statement about a Permian Basin **Drug Task Force sting operation** on me, Commissioner Louisa Valencia. Painter said, and I quote, "The investigation on her showed that she was not doing anything wrong. And she's crying and hollering about it. I don't understand why she is still yelling.

Let me advise the sheriff that he again is trying to harass me. I was not present at that press conference and if this incident was brought up it was brought up by Mike Kaufman or his supporters that were present.

Kaufman had my permission to use this incident as an example of "abuse of power" and as an example of wasted time and money, trying to make criminals out of law-abiding citizens and officials.

Louisa Valencia, commissioner, Precinct 3 **Midland County** 

### Sheriff's overruns could increase taxes

As a Republican, I have

Kathy also is stating she is the "Checks and Balance" for the taxpayers. The Texas Comptroller of Public Accounts, Property Tax Division was contacted, (512) 305-9999, and their response is that she has no power or authority to challenge any prop-erty tax value established by the Midland Central Appraisal District (MCAD) or the Appraisal **Review Board** 

My last question is on the statement in her brochure that she is economically using our tax dollars. She is costing the taxpayers over \$100,000 per year (based on her 1996 budget) by insisting on collecting the taxes for the county.

Diana Huntington Midland

### Reeves is grasping at straws with excuse

Talk about "grasping at straws" (letter March 4 regarding which candidate for the office of tax assessor is better qualified), I have never heard of a more obvious case of "straw grasping" than when Kathy Reeves put forth her reason for opposing consolidation of tax collection.

When asked why she opposes consolidation, she said, and I quote, "any transfer of collections would lose the 'checks and balances' between the county and the appraisal district."

That is the flimsiest excuse I ever have heard. As the old saying goes, "That dog won't hunt.

The "checking" and "balancing" is done by reputable outside auditors and Ms. Reeves knows this.

### **Jay Stewart** Midland

### Malm comes with strings attached

I first met Janice Wolff Hinshaw in 1993 when she was an assistant district attorney in Lubbock. I was impressed with her intelligence, dedication and gutsiness. As both a felony and misdemeanor prosecutor she had one of the highest conviction rates in Lubbock County, and as an attorney with the Texas **Department of Public Safety is** among leaders in affirmative findings in the entire state of Texas. Her opponent's supporters emphasize his service as an associate Municipal Court judge, but I don't think listening to traffic ticket cases approximately once a month gives him the experience necessary to effectively prosecute Midland County's misdemeanors. If Malm is elected, how will he respond when the defendant sitting across the courtroom is a former client of his or is represented by a defense attorney who supported him? We need to stop electing public officials who have strings attached. I encourage your readers to vote for Janice Hinshaw.

thing I will do if elected sheriff is clean up the gangs and etc." If Kaufman has a magic cure why hasn't he presented it before now so that all the citizens of Midland County could benefit from it. Wish I had the magic cure; I'd tell everyone about it

As far as Gary Painter attacking someone's character, I'd suggest doing a bit more checking on the ones attacked.

For anyone interested when Sheriff Painter was doing sting operations out of town, this was to prevent the drugs from mak-ing their way to Midland and when he got shut down, drugs, gangs and all the rest took over. As for the control over the helicopter, only the commissioners can give permission to take it out. Not Gary Painter. Better think about walking a mile in that sheriff's shoes before you judge him out of office.

**Geneva Giles** Midland

### Office of sheriff needs frequent change

"He was sheriff at Midland from 1908 to 1912, and then went back to work as a cowboy for the Cowdens, handling great herds of steers from their JAL Ranch. He served as a brand inspector catching cow thieves for the **Texas and Southwestern Cattle** Raisers Association, and in 1930 was drafted again as sheriff to clean up the oil boom town of Hobbs, New Mexico.

So wrote my father, J. Evetts Haley, about pioneer sheriff Bob Beverly and an almost forgotten era of Midland County history The above quote is from the biographical essay, "Bob Beverly -Cowboy — Sheriff" appearing in a little book *Men of Fiber* and published in 1963. My grandfather, John A. Haley, served some of those same years as mayor of Midland. When Bob Beverly declined re-election in 1912, he told my grandfather that service in the Sheriff's Office was corrupting and should be limited.

Years later after interviewing the old cowboy/sheriff, my father described the experience and convictions of Bob Beverly as follows

"In order to be a really effective sheriff . . . a man must get much of his information from the shady, if not outlaw fringe of human nature. Thus the officer. consciously or unconsciously, gradually becomes obligated to or compromised by (emphasis mine) the very element he is out to bring to justice. The only way to prevent this, Bob Beverly firmly believed, was frequent rotation by good men and true in the Sheriff's Office. ..." There are always people in a community "who are blind because they refuse to see." But, those in Midland County currenty not so affected realize that the occupant of the Sheriff's Office, the "big man" in the big hat, has been compromised, but unlike his pioneer predecessor, lacks the character to relinquish the office voluntarily. Even though it is doubtful he could get a job on any surrounding ranches, the voters should remove him and afford him the opportunity of finding honest work. It is time for a change!

shaw. I will vote for Malm in this election, not out of fear but because his election will be of benefit to the county in which I have lived for 40 years. J. Michael Cunningham

Midland

### Sheriff's Office is no longer run by people

There he goes again. In the words of our beloved former president (Ronald Reagan) we see the Midland County sheriff continue his vilification of anyone who opposes him.

Is it the times or are all the elected officials inclined to abuse their office until people see through their indiscretions? Is demagoguery expected from this ilk of people?

How many times can Sheriff Painter go to the well and assassinate the character of someone? How long will we the people of Midland County put up with it?

It has become apparent that the Sheriff's Office is not run by the people for the benefit of the people. Yet Painter relates that he works for the people. It also is evident that some people can and will be sacrificed when it is opportune and politically expedient to do so. Mike Kaufman found out it's dangerous to his character to have opinions contrary to Painter's. Frankly, some people, unless they are handpicked by Painter, are unwilling to consider county employment. Lucky that Kaufman is not intimidated by the latest (and hopefully the last) attempt of character assassination by our current sheriff. Mary Wilson

Midland

### Malm possesses right qualities for job

Although often a completely thankless job, the position of Midland County attorney is a critical and essential part of many of the county's operations I feel that a good candidate should possess qualities that will lead to the success of the office as well as lend assistance, both direct and indirect to the success of Midland County as a whole.

Having worked extensively with one of the candidates for this position over the past several years, my choice in this primary and later in the election is as clear as it could be. Russell Malm has labored beside myself and others countless times as a tions throughout the community. He also has performed legal work for my interests and. I am pleased to say, always to my satisfaction. His leadership qualities are equaled by few. He has, without a doubt, the track record and desire to successfully lead the Midland County Attorney's Office into the coming years. Please join me in supporting Malm in his candidacy.

teers during that time, but one of the most dedicated has been **Russell Malm. His infectious** humor with the Olympians and his dedicated volunteer work with them has been a real pleasure to observe.

I have since gotten to know Russell quite well in recent years in his capacity as a fellow attorney, and I can wholeheartedly recommend him to be our county attorney. He is an extraordinary and special person

John R. Kirwan Midland

### Hinshaw will deal with juvenile crime

I have been reading in your paper about the recent rash of uvenile crime and vandalism in Midland. It is my understanding that the county attorney (who we are about to elect) handles the county's juvenile prosecutions. There are two candidates for this office and one of them has said nothing about how we will handle juvenile offenders. The other, Janice Hinshaw, has made prosecuting these offenders one of her priorities if elected. As a mother, I worry about the world my daughter is growing up in. It comforts me somewhat to know that Hinshaw recognizes the juvenile problem and will help find solutions to it. Let's elect someone who will deal with our juvenile crime problem. Mary Kumer

Malm is reasonable choice for position

Midland

Midland

I am writing to express my support for Russell Malm as a candidate for Midland County attorney. It's evident that Malm has far more experience than his opponent. He has tried both civil and criminal cases, while Janice Hinshaw's only apparent experience is a brief tenure as a prosecutor and as a hearing examiner for the Department of Public Safety. If the offices of the district and county attorneys are merged, as seems likely, the county attorney will practice only civil law. Midland County will need an official who has actively practiced civil law, something that Hinshaw has not done. Malm is the only reasonable choice for county attorney. Nancy L. Hart

### Smith would do best

Force Academy and a graduate of pilot training make this statement when he has no education, training or experience in any type of law enforcement? I am sure the Air Force did not graduate him until he had proved he had the training and qualifications to be a pilot. Electing Kaufman, or any other person without any previous experience or training in law enforcement as sheriff would be the equivalent to hiring an accountant with no construction experience to supervise a crew of 150-plus workers and coordinate all the subcontractors, suppliers and venders necessary to build a multimillion dollar building. How can anyone know when a workman in any field is doing a good job if that person is not qualified in that field? We do not need a puppet of the Commissioners' Court to run the Sheriff's Office of Midland County.

**Howard Smith** Midland

### Sheriff demonstrates lack of regard for law

The fickleness or indecisiveness of many members of the American public never ceases to amaze me. Over the last decade we have had a sheriff in Midland County who has continually and consistently demonstrated his lack of regard and/or knowledge of the law. He has continually and consistently demonstrated his lack of regard and/or respect for the public he has sworn to serve

When faced with a challenge he, without fail, insults our intelligence with absurd responses. His public appearances including his political commercials are tragically comical. He has become the typical cartoon politician who apparently has lost sight of not only who he is and what his duties are, but of who we are and what role we the voters and citizens must play if this society is to continue as envisioned by our forefathers.

As an ex-lawman who understands the law, my oath and my duty, I do not rest very well when I know that the senior law enforcement official in my county apparently does not understand the law, his oath, or his duty. To me it is not a question of soldier or lawman. It is simply a question of do we want "a man of the law" or another four years of a man who labels himself as a "lawman," but bears a remarkable resemblance to the Holly wood version of a political boss? C. W. Lauderdale Midland

ciple to operate in elected office as efficiently as possible. Our railroad commissioner has boasted (rightly so) of cutting expenses and personnel. However, the sheriff can boast of tripling his budget and doubling his personnel in his terms (12 years) of office. During this time our county has experienced an ever-increasing gang activity and vandalism as this county's expenses continue to rise. County commissioners may have to seriously consider a large tax increase to cover the budget overruns by the sheriff's office. Mrs. Otice Helmer

Midland

### Painter's jail uses inhumane treatment

On Dec. 9, 1995, while I was visiting a friend in Midland, I was accidentally locked out of my friend's house. The neighbors called the police because they thought we were breaking into her house. The police came and charged us with public intoxication and took us to the county , jail.

I requested several times that <sup>1.</sup> I be allowed to make a phone call and was refused. Around 4 a.m., a female jailer made me remove all my clothing and I was strip searched and searched internally. They ordered me to take a shower and left me naked and wet with no towel. At 9 a.m. after posting \$120 bail I was released. My boyfriend was not strip searched or searched internally. As a matter of fact he did not suffer any of the humiliation that I was forced to endure.

I am outraged at the inhumane treatment I received in Sheriff Painter's jail. Incidentally, my charges were dropped. **Susan Annette Noland** 

Houston

### **Reeves'** campaign statements are false

I would like to respond to state-ments being made by Kathy Reeves in her campaign for Midland County tax assessor-collec-

In her campaign brochure and on radio she has stated she is a "Certified Registered Tax-Assessor" by the Board of Tax Professional Examiners. The BTPE was contacted, (512) 305-7300, and the BTPE says she is not certified. Either Kathy doesn't understand the certification process of the office she holds or she understands it and is misleading the voters. Either way, she is not "certified."

**Ernie DeAragao** Midland

### Public should protest outrage against Keyes

Last Sunday in Atlanta, Alan Keyes, Republican candidate for president of the United States. was handcuffed and thrown into a police car. All for protesting against being left out of a presidential debate with three other candidates on a TV panel.

There would have been a national uproar if Dole, Buchanan. Alexander or Forbes had been so treated.

Alan Keyes is a black American. I am dismayed that the public, especially the black community has not protested. The press has ignored this outrage.

Alan Keyes is not a stranger to the national scene. He has been a member of the State Department Policy Planning Staff, ambassador to the United Nations Economic and Social Council, Assistant Secretary of State in International Organizations, and U.S. vice consul to India. He is a Harvard graduate with a Ph.D., appeared on national TV talk shows many times, has a nationally syndicated newspaper column, and was declared "best speaker" at the 1992 Republican Convention.

I think the violation of freedom of speech he endured in Atlanta is an insult to his integrity and patriotism.

He should be cheered, not handcuffed.

Mrs. W. H. Thams Midland

### Why hasn't Kaufman shared his cure?

I've seen some signs around Midland that say "We need a change." I remember hearing these same words about four years ago when Bill Clinton was running for president. Well, we all got that big change whether we wanted it or not. I believe this would be the same type of change we got four years ago Mike Kaufman says, "The first

Evetts Haley Jr. Midland

### Attorney supports Malm's integrity

I write this in response to a let-ter from Jesus Robledo Jr., of Midland, printed in your March 4 edition in which Robledo asks the question, "Isn't it strange that several criminal defense attorneys are endorsing Russell Malm, a candidate for Midland County attorney?" The answer is a resounding "No." As an attorney who has observed Russell Malm at his profession for the last several years, I would suggest to Robledo that any attorney who has supported him via ad, contribution or other endorsement supports Malm first, because he has great integrity; second, he is a young man who has worked hard to establish himself in the Midland legal community; and third, he is highly qualified for the position of county attorney. Ms. Hinshaw, on the other hand, is virtually unknown, has only been in Midland for approximately one and one-half years and has not established herself through her practice of law in such a manner that most attorneys could reasonably judge her competence or qualifi-

cations for the position. I am not a "criminal defense attorney" but Robledo's suggestion in his letter that attorneys are "afraid" of Ms. Hinshaw is absolutely absurd. When Roble-do writes letters to support a candidate he should talk about the benefits and attributes of his candidate and not try to smear, through some scare tactic, the credibility and integrity of his candidate's opponent. Malm is highly qualified and that is why the attorneys that I know support him. There is no secret, hidden agenda involved, and no one I know of is "afraid" of Ms. Hin**Rod Slaton** Midland

### Kaufman is doing all the politicking

We have sat by and listened to Mike Kaufman and his backers bad-mouth and sling mud at Sheriff Gary Painter and his employees long enough. We would like to know where Kaufman gets the idea that the sheriff does nothing but politick and run useless investigations. It sounds to us, that from the very beginning it has been Kaufman and his followers that have been doing all the politicking. It is apparent that Kaufman does not have the qualifications it takes to be sheriff or he wouldn't have to be digging up old and/or incorrect information on the sheriff. What's wrong with running for an office on your own good quali-

### Reeves needs to explain position

ties?

Based on the article in your newspaper last week, I have these questions:

(1) Does Kathy Reeves actually not know how much money she spends collecting Midland County taxes? or (2) Is Reeves trying to deceive the voters? or (3) None of the above

If the answer is (1), Reeves is incompetent; (2) indicates she can't be trusted, and if the answer is (3), Ms. Reeves owes it to the voter to explain why she is opposed to consolidation of the two agencies when she admits it will save money, although she describes the savings as "very little."

**Christy D. Bourh** Odessa

### Malm is dedicated volunteer, attorney

### service at lowest cost

Since the flap about the consolidation has entered the public's awareness, I have done some checking on this issue. Here is what I've learned:

The tax assessor-collector of Dawson County, which has a population approximately 10 percent of the Midland County population, voluntarily agreed to consolidate taxing agencies because she had to save money. Unlike Midland County's tax base that is presently expanding, Dawson County has a declining tax base - they had to make every effort to operate all county offices

"lean and mean," just like privately owned businesses must operate in order to survive. Her experience after consolidation is 100 percent positive! And the taxpayers have benefited greatly in money saved by having all taxes collected by one agency.

The county tax assessor refuses to consolidate, even though she knows she is wasting money by hanging onto her outdated system. Vote for Marsha Smith - she understands that a public servant is obligated to give the public the best service possible at the lowest cost.

**Earl Caraway** Midland

### Kaufman would bring achievement to office

Mike Kaufman is a man of achievement. He has proven his abilities throughout his military career, and will bring that same degree of competence and professionalism to the Sheriff's Office. In his military record Kaufman was praised for his performance not only as a fighter pilot, but as a manager and administrator. Those skills are desperately needed in our Sheriff's Office.

Gary Painter's campaign has been based on how long he has run the Sheriff's Office rather than how well he has run it. Currently the Sheriff's Office is in a state of disarray. The conviction rate is only 42 percent and Painter is still ignoring our gang problem.

### Malm has experience to perform job

Over the past few years I have had the pleasure and honor to get to know Russell Malm. For this reason, I, along with over 90 fellow attorneys and hundreds of fellow Midlanders, am supporting Malm for Midland County attorney. Malm is the only candidate who has the professional experience necessary to perform the job skillfully. He practices both civil law and criminal law in all state and federal courts in Midland County, has served as an associate Municipal Court judge since 1992. He also has the community leadership necessary to perform the job responsibly. His commitment to the Midland community is evident, based upon his community service, which includes volunteering for Big Brothers/Big Sisters, Midland Jaycees, Casa de Amigos' free legal clinic, Special Olympics, YMCA youth basketball and the Midland County Young Lawyers Association. I encourage all Midlanders to join me in supporting the county attorney candidate with the best professional and community experience — Malm.

Patrick H. Cordero Midland

### Malm understands job's responsibilities

As a longtime resident of Midland, I am deeply concerned with the actions of our local government. I have attended the county commissioners' meetings for the past year and a half. In my time spent observing the county operations, I have come to know Russell Malm, who is now a candidate for county attorney. I have found that he is respected by his clients and colleagues alike, both personally and professionally. He understands the responsibilities of the county attorney and is well qualified to hold this office. I am impressed with his sincerity and desire to do the job and do it well. We Midlanders have an opportunity to elect an excellent candidate for county attorney who can help solve the county's growing challenges. Please join me in voting for Malm in the **Republican primary on March**

## Prescription drugs cross border for black market sales

HARLINGEN (AP) — Large quantities of addictive prescription drugs are being imported legally across the Texas-Mexico border but most are likely destined for illegal markets around the country, according to a study released Friday.

The findings come on the heels of the government's ban earlier this week on the importation of Rohypnol, a sedative popular among teen-agers and young adults that has been associated with date rape.

'Mexico provides easy access to controlled substances that are being diverted into the streets," said Dr. Marvin Shepherd, a professor at the University of Texas College of Pharmacy and author of the study.

Federal law allows individuals to import prescription drugs, including those classified as controlled substances, if they are for personal use and declared with the U.S. Customs Service, agency spokeswoman Judy Turner said.

have addictive properties and require close supervision by a physician.

To import controlled substances from Mexico, Customs requires a Mexican or U.S. prescription and limits individuals to a "reasonable supply," usually considered a 90-day supply per drug, Ms. Turner said. But Shepherd's study found quantities

being declared far exceeded that amount. The study examined prescription drug

declarations by U.S. residents at the port of entry linking Laredo with its sister city in Mexico, Nuevo Laredo. Researchers randomly selected 84 days over a 12-month period in which to inspect the declarations. Of the top 15 prescriptions drugs that

were declared, all but one were controlled substances, the study found.

The most common drug coming back into the country was Valium, an anti-anxiety drug and muscle relaxant declared by

Controlled substances are drugs that 70 percent of the people. Rohypnol was the ave addictive properties and require second-most popular drug, declared 42.6 percent of the time.

On average, 11,000 Valium tablets and ,000 Rohypnol tablets were declared per day, the study found. In one instance an individual declared 540 Rohypnol tablets, three times as many as Customs usually allows

"I believe in allowing people to go across and get the drugs for legitimate personal use, but my belief is that many of the people are not using them for personal use when they're bringing drugs back in those types of quantities," Shepherd said.

The study also appears to dispute the assumption that the majority of people who purchase pharmaceutical products in Mexico are elderly people looking for bargains.

People 51 and older represented just 9.4

percent of the sample, while people under 40 represented more than half of those declaring drug products. The median age was 24 for males and 35 for females.

The sample included individuals from 39 states, but 64 percent indicated they lived in Texas.

John Moseman, a Drug Enforcement Administration investigator specializing in legal drugs, said the study's findings probably are conservative compared with the true scope of the problem.

He estimates that even more controlled substances are finding their way across the border and that 95 percent of them end up on the streets.

'We have a problem, and there's no doubt that we have a problem," he said. 'Right now the law is written in such a way that it's vague. The only way to stop it is to change the federal law.

Moseman said DEA officials have pro-

posed revising the law. Suggestions range from reducing the quantity of controlled substances allowed back into the country to prohibiting U.S. residents from bring-ing back any such drugs.

Another idea would be to accept pre-scriptions only from U.S. doctors rather than Mexican doctors, who often write prescriptions without examining the individuals, Moseman said.

In the meantime, Customs officials said they are doing what they can to be more vigilant in addressing the problem. They noted the government's ban earlier this week on importing Rohypnol.

Leticia Moran, Customs port director in Laredo, said inspectors there have begun stamping prescriptions so that people can't use the same prescription in one day.

"This way it at least costs them because they have to go back to another doctor and get the prescription again," she said.

## Helicopter accident kills Special Forces unit

OLMSTEAD, Ky. (AP) – Only scrap amounts of wreckage and a crater were visible where an Army transport helicopter flown by an elite Special Forces unit crashed in a windy snowstorm, killing all five crew members

The large olive-drab helicopter swept low over a family barn Thursday night and crashed into a southwestern Kentucky wheat field, exploding in a huge fireball about one mile away, Vicki Miller Caswell said.

Vicki Miller Caswell, whose family lives directly in the flight path for helicopters training out of Fort Campbell, said she could tell the helicopter was having engine trouble.

'We hear the choppers every night, and this one was having difficulties," said Caswell, who rushed out in her pajamas but found no sur-

vivors. "The engine pitch was wrong." The military released the names of the victims today. The pilot was Chief Warrant Officer 5 Walter M. Fox, 43, of Barnesville, Pa. Chief Warrant Officer 3 Pierre R. Desroches,

Chief Warrant Officer 2 William R. Monty Jr., 35, of Petersburg, Fla.; Staff Sgt. Tracy A. Tidwell, 34, of Texarkana, Texas; and Sgt. Bradley C. Beem, 29, of Shell Rock, Iowa.

All except Monty were members of the 160th Special Operations Air Regiment. Monty was assigned to a student detachment at Fort Jackson, S.C.

Their remains were still in the debris Friday. Maj. Joe Howell, Fort Campbell spokesman, said investigators wanted the wreckage untouched until after they studied the crumpled remains of the fuselage. That was expected to take days.

The 160th is a Special Forces unit dubbed the "Night Stalkers" because they often fly in darkness using night-vision equipment. Special Forces has its headquarters at Fort Bragg, but some of its members train at Fort Campbell, about 25 miles from this small farming community near the Tennessee line.

The helicopter, identified as an MH-47E Chinook, is designed to carry soldiers far behind 44, of Depond, Calif. The others aboard were enemy lines during secret missions, at low alti-

tudes and in poor weather, said Lt. Col. Ken McGraw, public affairs officer for the Army Special Operations Command at Fort Bragg,

Tammi Harvey, Caswell's 25-year-old daughter, said she was warming up her car in the bitter cold when she first heard the helicopter approaching. She watched the pilot try to land in a nearby field, but apparently aborted the attempt before cresting a nearby rise.

"He hovered over the field out here for about half a minute," she said. "It looked like he was trying to set it down, but the wind was so strong. For some reason, he picked it back up some and went over the hill.

Moments later, they heard the explosion and saw a huge fireball.

Boeing spokeswoman Madelyn Bush said the crash was the first ever involving an MH-47E. Only 26 of the helicopters were built by Boeing Defense & Space Group Helicopters Division in Philadelphia.

## Grand jury indicts teens for sexual assualt on a minor

students who admitted to having sex with a 13-year-old girl at a Dallas school were indicted on charges of aggravated sexual assault.

The cases have prompted debate about the state's age-ofconsent law, which makes it illegal for anyone 17 or older to have sex with someone who is under age 14. Authorities have said the girl went along with sex at Seagoville High School and provided a condom to one of the students

One of the indicted men, Antrone Johnson, 19, already is in prison serving a life sentence on an unrelated rape case involving a minor. The other men, Quincy Burns and Reginald Harper, both 18, are free on bail. The cases now have been heard by a grand jury three times. In October, grand jurors declined to indict the men. In December, the same grand jury indicted them on misdemeanor charges of public lewdness. A different grand jury heard the case

Wednesday. The public lewdness charges were dropped at the request of the girl's parents, who said they were outraged that the men were not charged with a felony. Aggravated sexual assault is a first-degree felony that carries a

DALLAS (AP) — Three male maximum punishment of life in prison. Public lewdness is a class A misdemeanor punishable

by up to a year in jail. Kalen Donnelly, Burns' attor-ney, said that submitting the same charges to the grand jury three times was "demeaning to the system.'

Ms. Donnelly submitted a letter to grand jurors urging them not to return an indictment against her client. In it, she says her client comes from a loving home and suggests that the girl's father is pursuing the case because he hopes to pressure Dallas school officials into paying to educate his daughter in a private school.

The incident occurred Sept. 15, 1995. According to prosecution reports released Friday, Johnson admitted to having sex with the girl during the morning in a school bathroom. The girl at first told him she didn't want to have sex, but he said he talked her into it, the records state.

Later that morning, the girl had sex with Burns, Harper and a juvenile student behind a set of bleachers in the school gym, according to the records. She provided a condom to Harper, the records state. The juvenile faces a delinquency charge stemming from the incident.

## Denton judge reduces bail for couple arrested in kidnapping

DALLAS (AP) — A judge in Denton reduced bail Friday for Mark and Pat Hall, the international fugitives recently returned to Texas on child-custody interference charges

They had been jailed on \$100,000 bail each, but state District Judge John Narsutis reduced his bail to \$3,500 and hers to \$35,000.

Hall, a former Carrollton City Council member, posted bond and went free after a hearing in the judge's court; Mrs. Hall remained behind bars overnight but will get out soon, said her lawyer, Bill Trantham.

Judge Narsutis also ordered Mrs. Hall to wear an electronic monitoring device and scheduled father, Pete Connell, who has sole her trial for April 3. No trial date custody of the 10-year-old.

Denton County District Attorney he was not concerned about Hall's promise. Bruce Isaacks had asked for \$500,000 bail each for the Halls when they were extradited from the Dominican Republic last month.

"I can't imagine why her bond was reduced," he said in an interview early Saturday. "I'm concerned about the little girl'' Mrs. Hall's 10-year-old daughter,

Alicia, was spirited away in 1993.

"If this lady's not a flight risk, I've never seen one," he said. "It took the FBI 2 1/2 years to track her down.

The Halls are accused of fleeing to the Caribbean island in violation of a custody order won by her Connell said Friday evening that

release but would take extra precautions if Mrs. Hall is set free.

"It's just being smart about how I handle Alicia and not having her in a position where they can readily put their hands on her," he said. Mrs. Hall, who also fled with the child in 1990, testified Friday that she had promised attorneys representing Connell not to flee with Alicia again if she is released on bond. She testified that she fled in 1993 because Connell had not been taking the child to court-ordered therapy sessions.

The Halls have accused the girl's father of sexually abusing her, a charge Connell and courts have rejected.

much confidence in Mrs. Hall's napped by their mothers.

On Feb. 23, an apparent paperwork delay led to the Halls' accidental release four hours after they were booked into the Denton County jail. After being free about eight hours, they were rearrested following a clothes-shopping spree. FBI agents, armed with federal

Republic. The Halls had been operating a Christian school and living under assumed identities with Alicia and

Federal agents located the Halls after Connell appeared on a television talk show featuring fathers Mr. Connell said he didn't have whose daughters had- been kid-

## Review says campaign finance narrows field of electables

WASHINGTON (AP) - A healthy checking account or a willingness to absorb debt increasingly are the hallmarks for candidates eager to walk the halls of Congress

A check of campaign filings for Texas' 114 House candidates shows that nearly half of them — 50 — were carrying debts on their balance sheet as of late February. Most of the liabilities result from inflows of cash the candidates themselves are injecting into their campaigns, according to a review of Federal Election Commission records.

Nowhere are the twin trends of

indebtedness and self-financing wealthy hospital owner Gene more prevalent than in races for open House seats. And, with seven of Texas' 30 House members retiring at the end of the year, Texas has a bonanza of open seats.

In East Texas' open 1st District, five Democrats and Republicans had racked up nearly \$825,000 in collective debt as of late February, FEC records show. The overwhelming majority of that money, \$750,000, either came out of the candidates' pockets or in bank loans they have taken out.

In the open 8th District, which stretches from Humble to Sealy, debt has done little to deter

Fontenot. Still carrying \$2.1 million in self-financed debt from his unsuccessful 1994 congressional campaign, Fontenot in January poured another \$150,000 into his current race.

The tendencies toward deficit spending and self-financing are doing much to squeeze the middle class out of the political system, says a Washington-based group that monitors congressional fund raising.

"In essence, most Americans, the vast majority of us, have been shut out of the system because big money dominates it so much," said

tor for the Center for Responsive Politics.

"You either have a Congress made up of the super rich or you have a Congress made up of career politicians," Goldstein said Friday. "Those are basically your two choices."

Since the mid-1980s, there has been an explosion in self-financed campaigns and what Goldstein terms deficit campaigning. "The bottom line is this: Money

POLO

PARK

ESTATE

Castleford Rd.

Joshua Goldstein, research direc- an incumbent, you have to be wealthy in order to have the mony to compete. Given the incredibly high cost of elections, that is

what we are down to," Goldstein said. In 1994, the average cost of win-

ning a House seat was \$516,000 - up substantially from the \$325,000 average eight years earlier. That's a bargain compared to what's necessary to capture a Senate seat an average \$4.6 million in 1994.

candidates Congressional wins elections and so if you are not nationwide emerged from their

1994 races owing nearly \$95 mil lion, according to figures provided by the Center for Responsive Politics

"Ironically enough, given how much new members of Congress. tend to emphasize cutting the budget deficit, folks are developing huge debts to get themselves to Congress," Goldstein commented. It's indisputable that incumbents have a significant fund-raising advantage over challengers, having access to a network of . donors and special-interest money

## Court rules in favor of manufacturer

AUSTIN (AP) - A state law meant to protect consumers from deceptive trade practices has been made weaker by the Texas Supreme Court, a consumer advocate said Friday.

Reggie James, an attorney with the Southwest office of Consumers Union, said a Supreme Court decision this week undermines the intent of the Texas **Deceptive Trade Practices Act.** 

The Supreme Court ruled that a group of homeowners in La Porte could not sue the manufacturers of plastic plumbing that went bad in their homes after five years.

The manufacturers - U.S. Brass Corp., Shell Oil Co. and Hoechst Celanese Corp. — told the home-builders who purchased the plumbing that the piping would last at least 25 years.

The court, in a 6-2 opinion delivered Thursday, said homeowners could not sue the manufacturers because "these manufacturers' alleged DTPA violations did not occur in connection with the homeowners' purchase of their homes.

James said that means it's OK by the court if a manufacturer lies to consumers, as long as it is

through a third party. "The Supreme Court said the relationship is between the manufacturer and the builder, not between the manufacturer and the consumer, and that's just bogus," James said.

'That is just the kind of legalese and deception that keep people from having faith in the judiciary," he said

James said the DTPA has been attacked and watered down by the court and lawmakers several times since it first passed more than 20 years ago. But he added that consumers will catch on, and will insist that the act be shored up.

hat is just the kind of legalese and deception that keep people from having faith in the judiciary.

> Reggie James, attorney, Consumers Union

The court sided with some of the homeowners who sued under negligence laws, allowing judgements in their favor to stand.

James said negligence laws and product liability laws could protect many consumers. But he said under the court's DTPA decision, many consumers will have no place to turn when they are misled or lied to in business deals.

**Russell Serafin, president of the Texas Association** of Defense Council and a partner in a Houston firm that represented one of the defendants, said no one with a legitimate claim will be denied protection.

"The original intent was to protect smaller con-sumers. It still does," Serafin said Friday. "(The opinion) only eliminates the DPTA claim in this circumstance. That opinion runs to a certain set of facts.

Serafin said the difference between the DTPA and other consumer protection laws is that the act allows consumers to recover attorney fees and up to three times the amount of their damages. He said that has created a boon for plaintiffs' attorneys

The intent was not to create a windfall for attorneys," he said. "(Under the DTPA) a consumer must be aware of whatever the alleged misrepresentation may be. That is the critical thing.

### San Angelo, Childress pray for rain

### **Associated Press**

Prayers will be going up in San Angelo and Childress this Sunday in the hopes that they will make the rains come down

After four months without significant rainfall, the mayors of two Texas cities separated by hundreds of miles - yet linked by lingering dry spells — have signed proclamations asking residents to pray for rain.

'The Bible says that if we pray, our prayers are heard," said Chilcity's "Prayers for Rain Day." San Angelo is 230 miles west of Dallas; Childress is 225 miles northwest of Dallas, in the south-

east corner of the Texas Panhandle. As of Friday, neither has rain in its weekend forecast.

The last significant rainfall in the San Angelo area was an inch on Nov. 17, less than a week before Thanksgiving. Area rain gauges have recorded less than half an inch since.

Winter is normally the driest season in the Concho valley, 1996 has been exceptionally so. The city is 1.75 inches behind normal rainfall levels in 1996. 'The problem is we've got a lot of ranchers and farmers who really need rain, particularly west of us," Funk said. Ranchers are threatened with rock-bottom cattle prices, the result of ranchers flooding the market with cattle that can't be supported by dry rangeland.

A Legacy Video A Personal Video Biography

Now for the first ever, a video biography for a family who honors heritage. Honor the one you love with a heritage video that you can pass down for centuries. You could hand down a fortune, hand down a castle, or even hand down diamonds, but will your family heirs know your accomplishments, your character, or about the fun times in your life. A Legacy Video is produced by FOX Commercial Producer Ion Lindgren, voice of Jay Hendricks, News Anchor for News West 9. and free-lance writer Jeff Lightfoot of Midland. A Legacy Video Package is offered at \$1,600, and is a professional broadcast quality production. For an informational package please call Jon Lindgren Production 550-5815

### Toddler, parents sued for sitter abuse

who says she was popped in the throat by a rambunctious 4-yearld has sued the boy and his parnts over the alleged incident.

Erica Bailey, 21, claims she was hit in the throat by Connor Schaars while she was squatting to talk to the boy's older brother. She alleges that she suffered a crushed larynx in the April 1994 incident. The boy's parents, Theo and Mackie Schaars of Carrollton, are flabbergasted by the lawsuit.

"I thought it was too bizarre to be true," said Theo Schaars, a Dallas diamond broker. "It just keeps going and doesn't want to end.' One of Ms. Bailey's lawyers,

Steve Muncey, told the Fort Worth Star-Telegram that his client lost

DALLAS (AP) - A babysitter her voice for four months, enrolled in sign language classes and had to drop out of college.

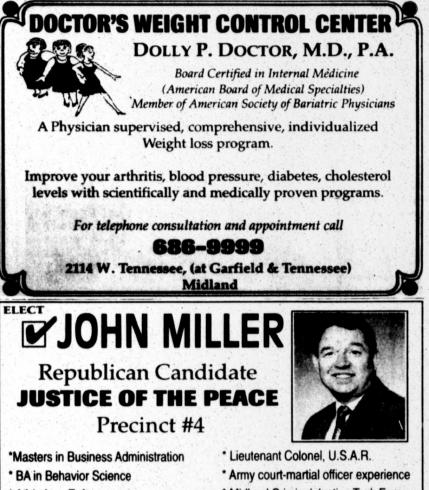

She has regained "some kind of voice, but it's not the same," he said.

The case went largely unnoticed until syndicated columnist Mike Royko wrote about it two weeks

Mackie Schaars wrote to Royko after an earlier column on bizarre lawsuits against children.

Ms. Bailey lowered her request for damages from \$2.3 million to \$177,000 after Royko's column.

Muncey said that the boy hit Ms. Bailey in the throat in anger when she did not immediately join him in a game of checkers he demanded

## One up, one down for Raiders Tech men take final SWC title

### By Denne H. Freeman **AP Sports Writer**

DALLAS — Texas Tech won the first Southwest Conference tournament 20 years ago. On Saturday, it claimed the very last.

Cory Carr scored 18 of his 21 points in the second half and Jason Sasser had 24 as No. 7 Texas Tech rallied to defeat Texas 75-73 in the championship game as the SWC celebrated its last hurrah.

"It's sad to see the league end," said Tech coach James Dickey. "But I'm glad we were the ones to

win the last one." The Red Raiders won their 21st consecutive game and earned an automatic bid to the NCAA tournament. Kentucky has the longest streak in the country at 27. Tech's

## Rangers lose lead, March Classic title to Kermit, 6-5

### By Terry Williamson Sports Editor

The old saying goes, "It's better late than never." And the Kermit Yellowjackets are living proof that the adage still is a saying of substance.

Kermit scored four runs with one out in the bottom of the seventh inning against the Greenwood Rangers Saturday night at Christensen Stadium to take a 6-5 victory and the title in the third annual West Texas Classic baseball tournament.

A two-run, bases loaded double by Kermit's Eric Gallardo started the Greenwood slide and then No. 8 hitter Damian Martinez won it with a two-run single off of **Ranger reliever Chad Barry.**

## Lee's Smith hurls perfect softball game

### Staff Report

SAN ANGELO - Midland Lee pitcher Chrystal Smith was not only good enough to get her 13th win by defeating San Angelo 11-0 in five innings in District 4-5A action on Saturday.

Smith was not only that good but she was perfect.

The junior righthander did not allow a base runner by a walk, hit or error and faced the minimum 15 batters to achieve the one of the rarest feats in sports today, the perfect game. Smith struck out batters and didn't have a ball leave the infield in the game, leaving no doubts that she was on top of her game.

"She was hitting her targets," said Midland

LOCAL SPORTS

Lee coach Perry Young. "She was on fire. You don't ever expect one to be pitched but she pitched very well.

The outing is Smith's first of her UIL career and is the first no-hitter of any kind for Lee this season. Last season, Emily Hayes had five nohitters for the Lady Rebels.

The performance also overshadowed what was an impressive display of hitting by Lee, who had seven hits in the five innings. The Lady Rebels won their eighth straight game with big performances by Susanna Reed (2-for-3 with two runs scored and a double), Patricia Carrasco (2-for-3 with two RBI and one run

scored) and Adrian Nobles (2-for-4 with two RBI, one run scored and a triple).

Lee now moves to 15-3 for the season and 3-1 in district while Central falls to 8-9 and 1-2. Young likes how his team is playing now and thinks the lull the team faced a few weeks ago is in the past. But with games against Odessa Permian and Abilene Cooper this week, Lee will find out how good they are.

We won't know anything until this week," said Young. "We have Permian and Cooper back-to-back. We have to play the games. "If we play the, Permian can't play with us."

### Princeton coach says he'll retire

DOUBLE SALE SUNDAY, MAR.17

BETHLEHEM, Pa. (AP) -Just moments after coaching Princeton to his 11th Ivy League title, Pete Carril said it will be his last.

"I've had a pretty good run and it's time to turn over the reins to someone else," Carril said Saturday night after the Tigers beat Penn 63-56 in over-

time in a one-game playoff. "It would be nice to go out with a win in the NCAAs," Carril added.

During his 29 seasons at Princeton, the Tigers have had 10 seasons with 20 or more wins and 13 postseason tournament berths. They won the NIT in 1975 and the Ivy League in 1969, 1976, 1977, 1981, 1983, 1984, 1989, 1990, 1991 and 1996.

Carril has coached 13 players who were drafted by NBA or the ABA, including two rookies of the year: Geoff Petrie with **Portland and Brian Taylor with** New Jersey.

His announcement came in Bethlehem, where he was born and where he coached at Lehigh for the 1966-67 season, going 11-12 before he was hired at Princeton. He has a 524-272 career record as a head coach.

Despite Saturday's win. Carril made it clear he feels his coaching is not up to his own tough standards.

### **Stallings makes** NCAA finals

**INDIANAPOLIS** - Stanton's Jeremy Stallings ran a personal best and picked up fourth place in the 800-meter run at the NCAA Indoor Championships Saturday.

Stallings, who runs for the University of Florida, picked up all-American honors with the run and finished second among Americaborn runners. The top two runners were foreign. The time of 1:48.06 was a personal best either indoor or outdoor.

Stallings ran a 1: 49.5 in the preliminaries

Stallings also picked up all-American honors as a member of the of Gator distance medley relay. Stallings ran the 800-meter leg on the relay that ran 9:43.

### **MHS track** sprints to 2nd

**SNYDER** — The Midland High track team finished second at the Canyon Reef Relays in Snyder with 99 points.

Craig Noland got the lone firstplace finish in the boys 300-meter hurdles with a time of 40.64.

### Lee golfers tie for fifth

ANDREWS - Andrews blasted the field by 37 strokes here Saturday to win the Andrews Invitational high school girls golf tournament.

The Lady Mustangs had a tworound total of 684 while Lubbock Coronado and Alamogordo, N.M., tied for second at 721. Midland Lee tied for fifth place with Snyder at 727, both trailing fourth place Fort Stockton, which posted a 723. Midland High finished back in

the pack at 765. MHS and Lee will now enter District 4-5A competition where Region I berths can be earned in two weeks at Midland Country Club on Friday, March 22.

Midland Lee scored a two-day had 2 RBI and a double. Mays had a double and one RBI. Underwood and Gilkey also had two RBI.

SAC

The Rebels did have 13 hits on the night while Snyder was held to three. Lee also forced a basesloaded double play. The Lady Rebels will play Monday at Bill Williams Softball Complex versus Big Spring.

### MHS JV softball downs Greenwood

**GREENWOOD** — The Midland High junior varsity softball team defeated Greenwood 5-1 Saturday.

MHS. 5-1 for the season, got multiple hit performances from Sarah Callender (3) and Melissa Dobbs and Alicia Kirk, who had two each. The Lady Bulldogs scattered their 12 team hits to score in the second, third and fourth innings.

Kirk pitched for MHS and struck out 11 while allowing five hits. MHS will travel to Abilene High at 4 p.m. next Saturday.

MHS JV falls

The Midland High junior varsity baseball team fell to the Lubbock Cooper 10-6 Saturday in its third game of the Fresnhip/Cooper JV Tournament and placed third in the tournament

Cooper scored seven runs in the bottom of the sixth inning to go ahead in the game 10-4. Midland High's Jeff Lawson took the loss. Justin Stumbaugh started the game, pitching four innings and allowing six hits.

MHS got is six runs on six hits including doubles by Rafael Romero, Lee Dunn and Ross Nobles, who had two RBI. Clay Zachery also had a RBI. Midland High will play at Midland Lee Monday at 4 p.m.

100 dash — 1: Hickey, MHS 11.42; 2. Craig John-son, Lee 11.44.

### MHS baseball captures third

LUBBOCK - The Midland High baseball team captured third place in the Lubbock Tournament Saturday with a 5-4 win over San Angelo Central.

Midland High, 11-4, came back from 4-0 down to get three runs in the bottom of the fifth and two in the seventh to defeated its district foes

Joson Rogers hit a sacrifice fly in the seventh to center field, scoring Russell Dunlavy to break the 4-4 tie. Hector Morales drew a walk earlier in the inning with the bases loaded to tie the game.

In the fifth inning, Mike Carrasco and Chad Villarreal had RBI doubles to left and Clay Johnston had a RBI single to left.

Rogers picked up the win after working 2/3 of an inning. Clyde Tedrick went 6 1/3 on the mound allowing four runs and six hits while striking out three.

Midland High will open District 4-5A play against Midland Lee Tuesday at 4 p.m at Christensen Stadium.

SA Central 102 100 0 -- 4 6 3 MHS 000 030 2 -- 5 6 3 Jay Walling, Julio Guerrero (5) and David Rodrigbez; Chyde Tedrick, Jason Rogers (7) and Jeff Perez. 28 - Mike Carrasco, Chad Villarreal. Midland High 5, San Angelo 4

### Lee JV softball upends Snyder

**SNYDER** — The Midland Lee junior varsity softball team defeated Snyder 8-7 in eight innings on Saturday. Stacy Allen knocked in Heather

Gilkey in the top of the eight inning to put the Lady Rebels, 7-5 for the season, up for good.

Also for Lee, Ashley Carlson went 2-for-4 as did Ceresa Mays, Marissa Underwood. Carlson, who was the winning pitcher for Lee,

SAN ANGELO — Raji Hickey scored 35 points with wins in three individual events and in the 400meter relay as the Midland High freshmen scored 158 points Saturday in the San Angelo Junior Relays at Angelo State University. Hickey won the high jump, 100meter dash and 200-meter dash, and then teamed with Josh Eaton, Jerome Lightfoot and Weldon Cooks to win the 400 relay.

Other first-place finishers for Midland High included Jordan Iglehart in the 300-meter dash. Johnny Rodriguez in the shot put, Wes Solansky in the pole vault and the 1,600-meter relay team of Jordan Iglehart, Donald White, Tim Hernandez and Chris Moore.

In the 8th-grade division, San Jacinto scored 154 points to easily outdistance second-place Alamo by 69 1/2 points while San Angelo Edison was third. Greenwood was 10th with five points.

In the 7th-grade division on Friday, the Alamo boys scored 163 points to win the event. San Jacinto was second with 92 points and Edison was third with 66.

Billy Jo Bill took home two firstplace finishes in the 1,200- and 2,400-meter runs. Other first-place winners included Alan Griffith in the shot put, Pauol Green in the high jump; J.R. Brown in the 600meter run, Wendall Smith in the 100-meter dash, T.J. Mansell in the 252-yard hurdles and the 1,200meter relay team of Michael Lenz,

Matt Ratliff, Smith and Brown. Top three results of local and area runners in the San Angelo Junior Relays, Friday and Saturday at Angelo State University (all distances meters unless

where noted): Freshman Division 1600 relay — 1. Midland High (Jordan Iglehar, Don-ald White, Tim Hemandez, Chris Moore), 3:56.22, 2. Mid-land Lee (Rattiff, Heary, Valles, Dangerfield), 4:03.88. 400-meter relay — 1. Midland High (Josh Eaton, Raji Hickey, Jerome Lightfoot, Weldon Cooks), 46.46; 3. Mid-land Lee (Scranton, Trevino, McConald, Orrres), 52.37. Pole Vault — 1. Wes Solansky, MHS 10-6; 3. McMor-ries, Lee 9-0. Shot Put — 1. Johnny Rodriguez, MHS 43-2 1/2; 2. Raiston, Lee 42-8.

the plate by going 3-3 with a dou ble and drove in all four runs.

The Lady Mustangs return to action Monday at the Bill Williams Complex with a 2 p.m. game against the Snyder JV, then a 5 p.m. game on Tuesday against the Midland Lee JV.

### **Greenwood girls** win Rankin Relays

**RANKIN** — The Greewood girls team scored 147 points Saturday to easily win the Rankin Red Devil Relays track and field meet.

Kermit took second in the event while Stanton was third.

Cara Bruton won two individual events — the long jump and 100 hurdles - and teamed with Courtney Dickson, Kaci Nix and Cassie Hinkel to win the 400-meter relay in a tome of 52.9 seconds.

The Rangerettes also got firstplace performances from Kaci Nix in the discus, Jill Stanley in the 800-meter run and Hinkel in the 400

Greenwood's next meet is March 23 in Sweetwater.

## MARCH: Keller has shutout through four innings

### (From 1C)

from a Ranger hitter as Kermit made six errors in the first three frames of play.

Meanwhile, Ranger sophomore hurler, Frankie Keller, making only his second varsity start, was tossing a nifty shutout through four innings before being touched by two runs in the Kermit fifth.

But Keller tired in the seventh But Keller tired in the seventh after hurling 6 1/3 innings. He got the leadoff hitter to ground out, but then gave up two walks and a sin-gle before the Rangers called on Barry. Barry was touched by both Gallardo's double and Martinez' game winning single to take the

Greenwood, the host of the tour-

nament and seeking its first West Texas title, out-hit Kermit 9-8 and bet that the Rangers will rememlooked like they had the game in the bag. That's when one usually learns that three outs are required to end an inning and that just didn't happen at the end.

Ranger Andy Smith led all hitters with three hits in the game. Greenwood's Michael Otho had two hits, including a double which was the only extra base hit of the night for the Rangers. Martinez was the only Kermit batter to col-lect two hits, but one of them was the biggest of the game the biggest of the game.

What made the game even more interesting was the fact that both finalists toil in District 8-3A. This could be a preview of how that dis-trict will fare down the road when

ber this one.

Alpine, which won the tourna-ment the first two years, failed to get into the championship match this year, but did take third place honors, much like Kermit took the championship.

Alpine's Kevin Losoya drove in Jason Valenzuela with a two-out, bottom of the seventh single to defeat Class 4A Pecos, 10-9. Pecos left runners on base in the top of the seventh to keep the score at 9-9, giving Alpine the chance to win it late. That seemed to be the

order of the day. Consolation honors went to the Seminole Indians. Seminole defeated Abilene Wylie, 8-6, in the

In the championship game, Greenwood looked to have a lock on the title most of the game, but the Rangers left the bases loaded in the fourth inning without scor-ing in what proved to be a huge downfall. At the time, however, that didn't seem like too big a deal while the Rangers held a firm 5-0

this year, once in Greenwood and once in Kermit. This meeting could fuel some fires down the road in what should be a competitive district race.

consolation finals.

lead. Kermit and Greenwood will face ach other at least two more times

Crane took the seventh place contest, blasting Van Horn 16-5.

Top three Greenwood finishers at the Rankin Red evil Relays: Discus — 1. Kaci Nix 98-3 1/2. 400 relay — 1. Corurtney Dickerson, Nix, Cara Bru-on, Cassie Angkel, 52.9. 800 run — 1. Jill Stanley, 2:32.6 Without — 1. Bruton, 16.4.2. Dickerson, 17.2. 800, relay — 2. Courtney Dickerson, Nix, Angelica Webarra, Carrie Hillis), 1:55.8. 400 dash — 1. Hinkel, 63.7 1900 run — 3. Stanley, 6:02.7 1800 ruley — 2. Nix, Stanley, Bruton, Hinkel, 4:27. Triple Jump — 2. Hinkel 30-5 1/2. Long Jump — 1. Bruton, 15-10.

and tournament participants." Nobody gets drafted to serve on the committee. The ambitious thread their way through the NCAA's entangled politics for appointment to a four-year term on what's become one of the most prestigious bodies in sports.

'They view themselves not so much as committee members, but as trustees," Delany said. "And they know what an extraordinary effect their decisions can have on programs and on people.

Once on the committee, members hew to tradition.

'We think the committee has a great tradition, and there is a strong commitment to maintaining that," said Tom Jernstedt, the NCAA's deputy executive director and the tournament chairman since 1972. "At the same time, we're constantly reviewing and refining and trying to improve what we do in any possible way.

As usual, there will be plenty of points for the committee to ponder this weekend.

The bigger conferences - the - will Ten, ACC and Big East

### **Selection Committee**

KANSAS CITY, Mo. — Thumbnail sketches of the nine members of the NCAA's Division I men's basketball selection committee: — Bob Frederick, 56, a former basketball play-er at Kansas. is in his second year as committee chairman. He became his alma mater's athletic direc-tor in 1987 and was one of two finalists for com-missioner of the newly created Big 12 Conference. — Jake Crouthamel, 56, was named Syracuse athletic director in March 1978. He won letters in football, track and rugby at Dartmouth, where he was 41-20-2 as a football coach. — Deces Dodds, 58, was an assistant com-

- DeLoss Dodds, 58, was an assistant com

— DeLoss Dodds, 58, was an assistant commissioner of the Big Eight and athletic director at Kanass State before becoming Texas athletic director in 1981. As one of the main behind-the-scenes architects of the Big 12, he opposed Frederick's candidacy and backed Southwest Conference commissioner Steve Hatchell, who won the job. — C.M. Newton, 66, became Kentucky athletic director in 1989; coached Vanderbilt to the NIT championship in the mid-80s. He also coached at Alabama and Transylvania College, compiling a lifetime record of 509-375 in 32 years. He was a letterman on Kentucky's 1951 NCAA championship team.

team. — McKinley Boston Jr. 50, became athletic director at Minnesota-Twin Cities in 1992 and was AD at Rhode Island before that. He was a football player at Minnesota. — Rudy Davalos, 56, became AD at New Mex-ico in 1992. Prior to that, he was athletic director at Houston. He played basketball at Southwest Texas State, helping win an NAIA championship — Charles S. Harris was athletic director at An-zona State from 1985-1995. He has since done con-sulting work for vanous universities.

## Undefeated Indiana perfect from wire to wire

Twenty years ago the Hoosiers go 32-0 and win win the national championship.

### By Hal Bock

**AP Sports Writer** 

Winning is one thing. Never losing is quite another.

Kentucky and Kansas, UMass and UConn. Each goes into the NCAA tournament as a heavyweight contender, each with a blemish here or there accumulated over five long months of games, each anxious to cut down the nets and celebrate a season to remember

One spring, 20 years ago, that crowning achievement celebrated two seasons to remember.

In 1976, Indiana went wire-towire without a loss, Big Ten champions, NCAA tournament champions and the first of coach Bob Knight's three national championship teams.

Those Hoosiers finished 32-0, the last team to accomplish a perfect season. It was, though, payback for the imperfect season of the year before.

In 1975, Indiana won 31 consecutive games and seemed headed for the title. Then in the NCAA Regional finals at Dayton - one step from the Final Four - the Hoosiers lost 92-90 to Kentucky. And in one game, 40 minutes of basketball decided by two points, the perfect season had evaporated. Scott May, one of the team's top scorers, still remembers that last

game and the empty feeling it left in the locker room. 'I remember how the team and coach were at the end of the Kentucky game, the atmosphere and

how quiet it was," said May, who

had missed a month with a broken arm and was ineffective against the Wildcats.

'We had lost a basketball game and it was like the world had ended. I said to (teammate) Bobby Wilkerson. 'I never want to see this team like this again.' I didn't want to ever see that again. And I didn't

Point guard Quinn Buckner still insists that team was better than the next year's championship squad.

The year before, we were a better team," he said. "It's not close. We had four seniors, Knight's original recruits. We were deep-

With Indiana out of the way, John Wooden's last UCLA team won the NCAA tournament for the 10th time in 12 years, beating Kentucky for the 1975 championship. In Bloomington, Ind., it was tough to convince the Hoosiers that the best team had won the title.

Instead of feeling sorry for themselves, though, Knight's players set out to correct the oversight.

'That loss to Kentucky set in concrete for the returning players that we had to do whatever it took to prepare for 1976 and win it all,' center Kent Benson said. "The only way we'd be satisfied would be to go undefeated. We were so close in '75. We made a commitment to each other to do whatever we had to do.

summer. That Knight approached May and Buckner with a proposition.

"Coach called us in and said we had a chance to play UCLA in the first game the next season," Buck-ner said. "Scott and I said, 'Let's go!

Opening the season against the defending national champions would give Indiana an opportunity to make a statement.

"It was time to let everybody know about this team," Buckner said. "There was nobody we didn't think we could beat.

Indiana hammered UCLA 84-64 in the opener.

'The attitude was, 'Let's play anybody who's any good. Let's play them all,' " May said. "We didn't let anybody slip by. When we beat UCLA by 20 in the opener, that made a statement. That told everybody IU was for real.'

After wins over Florida State and Notre Dame, Indiana girded for a rematch with Kentucky at Louisville. Trailing by two points in the closing seconds, Indiana went for the tying basket. Tom Abernethy's shot was swatted away by Rick Robey. Under the basket, Benson stabbed at the rebound. The ball went straight up and came straight down through the net for the tying points.

"It was not intended to be a tipin," Benson said. "All I could do was get a hand on it and throw it on the boards for another opportunity at a rebound.

The overtime was all Hoosiers. Final score: Indiana 77, Kentucky

For the next two months, Indiana was on cruise control. There were occasional close calls - a two-point win at Ohio State, a four-point win over Purdue - but mostly there were blowouts like a 101-74 victory over Virginia Tech, an 83-55 romp at Illinois and a 114-61 thumping against Wisconsin.

It wasn't always smooth sailing. There were times when Knight clashed with his players.

'Sometimes, if I knew I made the play that had to be made and he disagreed I might stare at him," Buckner said. "He'd say, 'Don't look at me in that tone of voice

Through it all, the Hoosiers thrived.

'Everybody came at us and gave us their best shot," Benson said. "They all wanted a piece of

Michigan nearly got one. Indiana had won the first meeting against the Wolverines by six points at Ann Arbor. The rematch at Bloomington would be more memorable, especially for Benson.

Trailing by two with 10 seconds to play, the Hoosiers came out of a timeout. Sixth man Jim Crews threw the ball in and Buckner wound up taking the shot for the tie with three seconds left. He was offtarget, but Crews recovered the loose ball and heaved it toward the. hoop.

Once again, there was Benson, waiting under the basket for another buzzer-beater to force overtime.

Was it a shot or a tip? The difference is vital because the rules then required a tip to be through the rim before the buzzer to be good while a shot could still be en route at the buzzer and count.

Benson says there is no question. "I've got a picture that proves it was a shot," he said. "The clock shows one second. I had control of it and I knew what I had to do. If your definition of a shot is going up, coming down and going up again, no way it was a shot. I was in control of the ball in midair, and my intention was to put it in."

There was some spirited dis-cussion before the officials ruled the basket good. Again, the Hoosiers ruled the overtime. Final score: Indiana 72, Michigan 67.

Except for another close game against Purdue which Indiana won 74-71, the Hoosiers rolled through the rest of the season, reaching the NCAA tournament at 27-0, a replay of 1975.

## All-Southwest Conference team names Olajuwon MVP

### By Denne H. Freeman

**AP Sports Writer** 

asked to pick an All-Time Southwest Confer-

the soon to be departed league. Complaints will range from not enough oldtimers to such and such from such and such school should be there

Since picking just five players would automatically leave out some schools, the attempt here will be to select the top 15 all-time players, or three good teams filled with guys who loved the game.

Even then there will be a perceived miscarriage of justice or two. Remember, this is of talented men who "team players." Pick your own team should this one miss your tastes. No letters please.

juwon, who once blocked 16 shots against Arkansas? Drexler, who still has the SWC record for 11 steals in one game, may have been the most athletic of all the league players. And was there a better shooter than Otis Birdsong? Not before these eyes.

Arkansas - Although the traitorous Razorbacks defected to the SEC, they still left a great SWC legacy. Could you have a team without Sidney Moncrief? No way. Remember the duel between him and Larry Bird?

Baylor - Vinnie Johnson, who tied an SWC record with 21 field goals in a game, certainy makes my list along with oldtime Jack Robinson, who played on a team that almost won the NCAA title

TCU - Dick O'Neal, who once scored 49 points in a game with his sweeping hook shot, makes my team even if he did play in the 1950s.

Texas A&M - Bennie Lennox, who still has e SWC record with 53 points in a game, makes

mons.

**Rice** — Ricky Pierce, a scoring machine, can't be ignored. He's still going strong in the NBA SMU - Gene Phillips of the late 1960s is all

over the SWC record book which has just become a collector's keepsake. Jim Krebs was a great one from that era.

Some honorable mentions include (personal favorites), John Moore and Joey Wright of Texas, Alvin Robertson of Arkansas, Sonny Parker and Carroll Broussard of Texas A&M Terry Teagle of Baylor, Bubba Jennings of Texas Tech, Ira Terrell of SMU and Clyde Littlefield of the Longhorns. Littlefield? Yeh, he made the first two All-SWC teams in 1915 and 1916 and became one of the best track coaches in the nation.

Coach - The late E.O. (Doc) Hayes of SMU. You would want your son to have played for him from the 1940s to the 1960s. Won six out of every 10 games his teams played and had eight SWC titles.

## DALLAS - By popular demand, we've been

Any such list will be automatically nitpicked to

death by fans of

ence basketball team. Freeman File

110000000000 0.00.00

PAGE 4C

be looking for at least five and probably six bids. The smaller leagues - the Midwestern Collegiate, Southern and Trans America — hope their regular-season champions who fell in conference tournaments will be given a chance, as first-round winner Manhattan was last year.

The controversy will come, as it did last year, if power conference schools are passed over in favor of smaller-name schools with better records.

The committee's long weekend began precisely at 1 p.m. Thursday when Frederick, the athletic director at Kansas, convened Jake Crouthamel, Syracuse; C.M. Newton, Kentucky, DeLoss Dodds, Texas: McKinley Boston Jr., Minnesota-Twin Cities, Rudy Davalos, New Mexico; Charles S. Harris, Arizona State; Terry Holland, Virginia, and Craig Thompson of the Sun Belt Conference. Thompson is a commissioner, all the others athletic directors, except for Harris, who is now a consultant.

After reviewing procedures and assigning each member as an onsite representative at eight subregionals, the committee and a few key staff people go to dinner Thursday night, always at the same undisclosed restaurant.

'That's one of the little things we've changed and improved,' Jernstedt said. "Until five or six years ago, we had Thursday night dinner at my house.

The Hyatt blocks off the top two floors, the 39th and 40th, for exclusive use by the committee. Besides the committee, only NCAA staffers Dave Cawood, Dan Calandro. Bill Hancock and Bernard Muir have access to those floors.

When the committee sets to work early Friday morning to select the 34 at-large teams and seed and bracket the field, they are

surrounded by volumes of regional reports and computer-generated statistics.

Once they set up "the board," a huge bracket in the middle of the room, only Hancock and Cawood can touch it. Not even the chairman messes with the board, lest things become disorderly.

Dress is casual. Attitude, formal. Concentration, intense.

"It has the appearance of a very relaxed atmosphere, people sitting around eating a banana, with their shoes off." Hancock said. "But there is a quiet intensity, almost a reverence for what they're doing.'

When a school comes up for discussion that a committee member has a direct interest in, such as whether Frederick's Kansas deserves a No. 1 seed, the member leaves the room and doesn't return until someone fetches him.

"That rule is never violated. Never," Jernstedt said.

Rest and dinner breaks are taken at appointed times. By tradition, the committee usually takes an ice cream break late Friday afternoon. They sometimes do not complete the bracket until 30 minutes or so before CBS-TV goes on the air to announce the pairings.

The committee follows tradition even as the tournament winds down. Every year on the morning of the championship game, current and former members get together for breakfast and a round-table discussion

We talk about our procedures and how they might be improved,' Jernstedt said. "Former members still take an active interest in the tournament.'

So here goes: Houston — Two near national champions for Guy V. Lewis and what team would be complete without Clyde Drexler and Hakeem Ola-

the roster as does John Beasley who averaged 22 points per game. Texas - Slater Martin, the great guard of the

1940s, makes the team. Like Johnson, he once hit 21 field goals in a game. Texas Tech - Rick Bullock, a tireless competitor, plays for me any day as does Will Fle-

MVP - Olajuwon. Plays both offense and defense, a specialty lost by many selfish players in this day and time.

Defensive MVP - Olajuwon. Has there ever been any better?

## WOMEN: NIT experience helps Texas A&M

### (From 1C)

### ed an at-large bid.

Texas A&M, which won the women's NIT title last year after failing to receive an NCAA bid, built a 63-46 lead on a basket by Marianne Miller-Sevin.

That NIT experience helped us," Harvey said. "It showed we could win big games under pressure. We're just overwhelmed to beat a great team like Tech. They set the standard.

In a late rally, Tech cut the deficit to two points on a basket by Rene Hanebutt with a minute left. Tech's Michi Atkins missed a

layup with 21 seconds left and

Tucker hit two free throws to put the game away

"I've made that shot a million times in practice," Atkins said. "It just spun in and came out."

Tech coach Marsha Sharp said. 'I could tell starting last Wednesday that A&M was going to have a strong tournament. They were set to go and we didn't do what we had to do. It was a hard lesson to learn but maybe it will help us later in

the NCAAs."

Melissa Rollerson led Texas A&M with 16 points, Miller-Sevin had 14, and Tucker added 13. Lisa Branch had 12 assists to become the SWC's career assist leader with 788.

"I tried not to even think on the free throws I made," Tucker said. I knew they were critical. We had to have them.

Second-seeded Texas Tech was paced by tournament MVP Alicia Thompson, who had 25 points, and Atkins added 23 with 10 rebounds.

The fourth-seeded Lady Aggies, who got into the finals with a 75-61 victory over top-seeded Texas, took a 34-31 halftime lead as Tucker hit a 3-point shot just before intermission of A&M's first SWC tournament final.

The last SWC basketball game was played before 8,384 in Reunion Arena.

"This was a historic game," Harvey said. "It kind of gives you goose bumps knowing it was the last one. It's an honor to be the last champs.

## MEN: Freeman's shot an all-around heart-breaker

### (From 1C)

rebound if he missed that free throw and we did.

Freeman, who shot 73.4 percent from the free throw line, couldn't believe the ball didn't drop.

'It just rolled around the rim and I thought it was going to go, Freeman said. "I've always been a good free throw shooter.

**Texas coach Tom Penders was** miffed at the referees in this final SWC game.

"Just look at the stat sheet," Penders said. "But Tech has a great team. You can't take anything away from them.

Tech got 45 free throws to 13 for the Longhorns.

Freeman hit a 3-pointer and

put Texas within two points. Then Freeman made his big miss.

Tech's Jason Martin missed four free throws in the final 39.8 seconds to put the Raiders in a precarious

"Jason usually shoots his free throws good," said Dickey. "Then I got to thinking how we blew a 5point lead with 1:10 left last year and lost in overtime to Texas. I thought the foul called on Sasser on Freeman was a definite no-call. We called timeout and Freeman missed.

Tech didn't lead until Martin hit two free throws to give the Raiders a 61-59 lead with 7:41 to go. After Freeman's bucket tied it 61-61,

Sonny Alvarado scored a bucket to Carr hit a 3-pointer and followed with another basket.

> Martin was the only other Tech player in double figures with 10 while Kris Clack made 11 for the Longhorns.

> Tech only shot 35 percent from the field to 43 percent for Texas. The Raiders were only 2 of 18 from 3-point distance.

> "We had trouble getting open looks against their defense," Carr said. "But I finally hit a 3-pointer and that gave me confidence. We pulled it out. That's all that matters.

> Freeman opened the first half with a 3-pointer and closed it with another 3-pointer at the buzzer as Texas claimed a 34-28 halftime

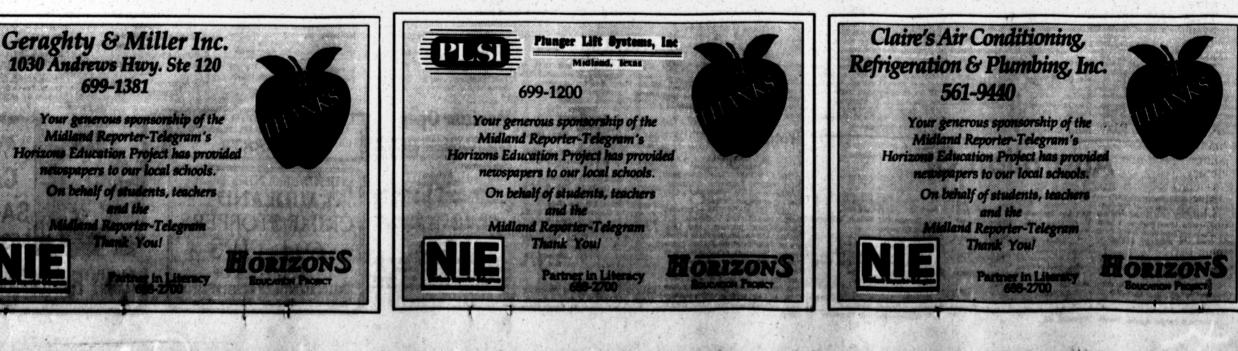

lead. The Red Raiders shot only 25.9 percent from the field (7-of-27). It was only the fourth time all season Tech had trailed at halftime.

Freeman hit four 3-pointers in the half and scored 20 points to lead the Longhorns. Carr had only three points at halftime but was Tech's go-to man in the second half as the Raiders struggled from the field.

Tech swept Texas in two regular season games.

Tech's only loss this season was 93-77 to Eastern Michigan on Dec. 27 in the Sun Bowl tournament.

Tech was 14-0 in the regular season against SWC teams and 3-0 in the tournament.

predicament.

# Huskies top Hoyas in Big East thriller

### **The Associated Press**

NEW YORK -Ray Allen's drive with 13 seconds to play, his only field goal of the second half, capped a game-closing 12-0 run and gave No. 3 Connecticut a 75-**TOP 25** 74 victory over No. MEN

onship.

6 Georgetown on Saturday night, the Huskies' second Big East tournament champi-

Allen, the league's player of the year, had managed just three free throws in the second half and missed all eight of his shots before his winning drive over Georgetown guard Allen Iverson.

Iverson came back downcourt, missed a driving shot of his own and Jerome Williams couldn't convert the tip as the Hoyas missed their last five shots of the game.

The Huskies (29-2) had won their third straight regular-season title with a league-record 17 wins, but this was their first tournament victory since 1990 when they lost to Duke in the regional final.

Kirk King led the Huskies with 20 points and Allen had 17, 12 in the first half.

### No. 1 Kentucky 95, Arkansas 75

**NEW ORLEANS** — Top-ranked Kentucky, getting 21 points and 14 rebounds from Antoine Walker, continued its roll through the Southeastern Conference by beating Arkansas in the semifinals of the league tournament.

Kentucky (28-1), the four-time defending tournament champion, beat every school in the conference during the regular season - the first time that's been done in 40 years. The Wildcats haven't lost since a 92-82 setback against former No. 1 Massachusetts on Nov. 28

Kentucky's 27-game winning streak is the longest in the nation. Arkansas (18-11), which won the national title in 1994 and lost the championship game last year against UCLA, is in danger of missing the NCAA tournament this season.

No. 25 Miss. St. 86, Georgia 68 NEW ORLEANS —Mississippi State advanced to the Southeastern Conference tournament championship game for the first time since 1933 with an victory over Georgia.

Darryl Wilson scored 21 points to lead four players in double figures for Mississippi State (21-9), which never trailed in the semifinal game.

No. 2 UMass 75, Temple 61 PHILADELPHI

### **Tickets Punched**

Schools that have received automatic bids to the NCAA bas ketball tournament. All bids are by virtue of conference tournament championships with the exception of Big Ten, Ivy League and Pacific-10 conferences, which do not conduct postseason tournaments (the American West and Conference USA do not receive a tomatic bids):

### **Ohio State 70**

STATE COLLEGE, Pa. -Glenn Sekunda scored 21 points as No. 16 Penn State – playing before its largest home crowd ever - finished unbeaten on its own court with an victory over Ohio State.

The victory gives Penn State, which ended a two-game losing streak, some momentum going into the NCAA tournament. The Nittany Lions (21-6, 12-6 Big Ten) are a half-game ahead of Indiana which plays Michigan State on Sunday — for second place in the conference.

Jason Singleton led the Buckeyes with 15 points, and Shaun Stonerook and Scott Gradney had 10 each. Matt Gaudio scored 13 for Penn State, and Calvin Booth had 10 points and four blocks.

Wake Forest forward Tim Duncan unleashes a monster dunk over Clemson's Greg Buckner Saturday during their ACC Tournament semifinal in Greensboro, N.C. Duncan had 22 points and 19 rebounds in the win.

nati edged Marquette to win the first Conference USA title.

Burton's jumper put Cincinnati up 83-81, and the Bearcats (25-4) went on to their fifth straight conference tournament title.

No. 5 Kansas 61, Kansas St. 55 KANSAS CITY, Mo. - Kansas scored only two points in the last 3:42, but the Jayhawks held on to beat Kansas State in the Big 8 semifinals.

Raef LaFrentz had 16 points and 13 rebounds for Kansas (26-3), which beat Kansas State (17-11) for the eighth straight time while avoiding its sixth Big Eight semifinal loss in seven years.

Freshman Ryan Robertson had 13 points for Kansas, the regularseason Big Eight champion. Young had 16 points for Kansas State, and Paco May and Rhodes added 11 each.

### No. 12 Wake Forest 68, Clemson 60

GREENSBORO, N.C. - No. 12 Wake Forest took aim at its first consecutive Atlantic Coast Conference championships in 14 years Saturday as Tim Duncan's 22

## Sasser leads Kimball to Class 5A win over Euless Trinity, state title

### **By Mark Babineck** Associated Press Writer

AUSTIN - Jeryl Sasser scored 20 points and Dallas Kimball made six straight free throws down the stretch Saturday night to beat Euless Trinity 72-64 in the Class 5A championship game.

### Boys UIL Roundup

Kimball (38-2) and Trinity battled through 10 lead changes and four ties in a fast-paced second half in which both teams spread their scoring around evenly.

Trinity chose to go outside for the fourth quarter, however, and the shots stopped falling. Kimball scored three consecutive layups off of 3-point misses by Leon Hester to take a 62-56 lead.

Trinity (31-4) inched back to within two in its first championship appearance, but Brandon Burney returned fire by knifing through the lane with a crowdpleasing fake pass and sinking a lavup at the 1:19 mark.

After the teams traded foul shots and Calvin Williams made two more for a 68-64 lead, Trinity point guard Matt Lucero lost the ball and committed his fifth foul trying to retrieve it

Richard Evans sank two last foul shots to ice the victory, then stuffed a furious dunk for emphasis as time ran out.

Brandon Burney and Eric Tatum each scored 15 for Kimball and Patrick Gusters and Richards Evans had 10.

Dylan Osean led Trinity with 18 points, followed by Landry Kosmalski with 15 and J.T. Thompson with 14. Kosmalski pulled down a game-high 16 rebounds

### **Class 4A Championship**

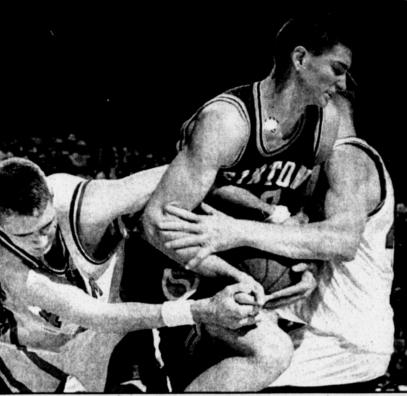

Pampa 82, Dallas Madison 68 AUSTIN - Rayford Young wanted to enjoy this one.

The Pampa star guard scored 33. points Saturday with a nearly perfect state championship shooting exhibition to pace an 82-68 victory over Dallas Madison for the Class 4A title.

"I was getting tired of those close games," said Young, who made all 11 of his field goal attempts inside the 3-point arc, sank 11 of 12 foul shots and had five assists for good measure to earn championship game MVP honors.

Pampa (33-3) held a second half grip on the school's first championship since 1959 and fifth overall even when Young rested on the bench for about five minutes toward the end of the third quarter.

As a team, Pampa shot a sizzling son (26 7) by double digits all but a few seconds after the intermission. Madison held a 50-33 rebounding edge, but that was largely on attempted putbacks of its 47 missed shots.

Sinton's Michael Mayo, center, battles Graham's Tom Labbe and Denne Berand for the ball in the Class 3A final Saturday in Austin. Sinton won 66-59.

had 15-foot shots that weren't going in.

Pampa center Devin Lemons added 20 points.

### **Class 3A Championship**

Sinton 66, Graham 59 AUSTIN - Sinton and Graham proved why committing fouls isn't

always a bad thing. Sinton's six-man rotation used every foul it had to give in clamping down on a Class 3A championship win over Graham.

Sempionship MVP Michael Mayo scored 21 points and blocked three shots to help Sinton win a title in its first finals appearance. He did it against fellow 6-foot-7 center Kolin Weaver, who finished with 16 points

Graham's Ryan Dollar led all scorers with 30, including 14-for-16 shooting from the foul line.

Sinton (33-5) led throughout the second half, but a Weaver baseline shot with 2:40 remaining closed the deficit to 59-56. Mayo spent much of the fourth quarter on the bench in foul trouble

'I knew I still had to play good defense," Mayo said of his attitude after returning to the game. "I couldn't be scared to get a sixth foul

In fact, Sinton's frenetic, attacking defense resulted in five players with four fouls and another with three with nearly three minutes left to go.

Arledge proved to be a consistent thorn in East Chambers' side all day. The 6-foot-3 sophomore center sank layup after layup and even spotted up for a wide-open 3pointer in the fourth quarter as Krum pushed ahead.

Krum's 37-1 final record is the state's best this season at any level. East Chambers (25-9), which won games this season with scores of 126, 124 and 120 points, tied the record for fewest points in 2A championship history

Krum seized control in the third quarter with a 14-2 period, giving up a lone putback on an East Chambers missed shot. Ryan Peterson, Arledge's partner at the post, scored eight of his 11 points in the quarter.

Class 1A Championship

Avinger 51, Anderson-Shiro 48 AUSTIN - Lee Hopkins blocked what appeared to be a sure layup with 20 seconds remaining, then converted two free throws to cinch Avinger's victory over Anderson-Shiro for the Class 1A state championship.

After Avinger's Treston Dowell sank a layup with 39 seconds remaining to retake the lead at 49-48, Anderson-Shiro's Jeff Foy took the ball in the low post and looked to have an easy bank shot before Hopkins sailed in from behind to knock it away.

## LSU, George Mason win track titles

INDIANAPOLIS (AP) - The longest streak in the history of NCAA Division I athletics is over for Arkansas.

The Razorbacks, winners of 12 consecutive men's titles at the NCAA Indoor Track and Field Championships, did not go out with a whimper Sat-urday night as George Mason's internationally laden team rode victories by Greg Haughton in the 400 and Julius Achon in the mile to win for the first time

Not since 1983, when Arkansas finished third behind Southern Methodist and Villanova, had the perenially powerful Razorbacks been beaten at the indoor championships.

Arkansas had so dominated the collegiate track and field scene that it also won five outdoor titles, including the last four, and eight cross country titles - a total of 25 in the past 12 years. Four times, it swept the Triple Crown - indoors, outdoors and cross country — in the same school year. But this was a rebuilding season for the Razor-

backs, after losing several of their top perform-ers from last year, and George Mason took advantage

The Patriots, foreign-dominated like the Texas-El Paso teams that won 19 NCAA titles in track and field and cross country between 1974 and 1983, compiled 39 points in the two-day championships at the RCA Dome. It was the lowest winning score since Washington State had 25 1/2 in 1977.

Arkansas finished third with 29 points, behind Nebraska, the runner-up with 31 1/2.

Louisiana State, the only woman's team to win more than two titles in a row indoors, won its fourth straight and seventh in 10 years, with 52

### NCAA Indoor Championships

points, 18 ahead of runer-up Georgia George Mason was scoreless after Friday's six finals, accumulating all its points with a series of sharp performances Saturday.

The Patriots' most impressive winner was Haughton, a senior from St. Andrew, Jamaica. Last year's NCAA outdoor champion and the bronze medalist behind Americans Michael Johnson and Butch Reynolds at the World Championships, Haughton took control early and held off a fast-closing Marlon Ramsey of Baylor in 45.87 seconds.

Achon, the world's fastest miler this year, was George Mason's other individual winner. The sophomore from Kampala, Uganda, who clocked 3: 57.66 last month on his school's track at Fairfax Va., ran a carefully controlled race and won in 4:02.83

Following his usual style, Achon remained near the back of the pack early, then stepped up the pace and challenged Jonah Kiptarus of Nebraska for the lead with about 600 meters left. Kiptarus held him off briefly, before the resilient Achon charged in front with 400 meters to go.

He then went on to beat Kiptarus by about 7 meters

"At the beginning, everyone is strong, so when you go with them, you waste a lot of energy, Achon said in explaining his strategy. "So I need to reserve mine, so that at the end I am strong. While Achon collected 10 team points for the victory, teammate Ibrahim Adenl failed to finish.

## WEST: Lee hurdler credits competitor

### (From 1C)

He topped that off with a record performance of 37.03 in the 300s, also beating Gibson, improving on the 13-year-old record of 37.6 set by El Paso Andress' Dale Laverty. McAfee credited Gibson's strong

race for pushing him to the record in the 110s.

'I thought I was going to lose at first because Andrae was right on top of me," McAfee said. "He killed me coming out of the blocks. It seemed like I was dead last to the first hurdle. But Andrae Gibson pressured me. I don't think I could have run that without him pressuring me.

McAfee was one of two double gold medal winners from Midland as Midland High's Tami Zachery anchored the 400 relay to a firstplace finish in the Lady Bulldogs' best performance of the season at 48.80 and then won the 100 in a season-best 12.07.

But this was easily one of the most successful WT Relays in recent memory for Midland teams as the Lee boys got another first-place finish from Dreyfuss Andrews in the triple jump and finished with 64 points for fourth place behind Odessa Permian, Odessa High and El Paso Irvin.

The Lee girls were also fourth

Tami Zachery and Amarillo Highs Jamie Moore in the 100. It was a Lee-MHS event as MHS' Toya Zachery was fourth, Lee's Amanda Douglas was fifth and MHS' Ogonna Merritt was sixth. Midlanders took five of the six places

in that event. Lee's Dreyfuss Andrews surprised himself and Lee coach Kelvin Ratliff with his winning jump in the triple jump of 45-6 1/4. Andrews, a senior, was competing in his first meet of the season after

sitting out to get in condition. "Oh yeah, I'm real surprised," Andrews said. "I've only been jumping 41 feet in practice but coach said I could do better if I keep my focus and that's what I did

Stanton's Todd Davis was also a double winner, taking both the 100 and 200 titles in the 3A boys division. The senior, a running back from Stanton's football team. cruised to the 100 title in a time of 10.95 and then took the 200 in a time of 22.68. Although they are 2A, the Buffaloes were competing in the 3A division.

"I had a good start and I felt like could win it because I had the fastest qualifying time," Davis said

**Davis played football for Stanton** as a junior but then moved to Arlington where he attended 5A football powerhouse Arlington Lamar before moving back to Stanton for his senior year.

Madison missed all 13 of its 3point attempts and made only 8 of 18 free throw tries

Archie Beason almost matched Young's scoring with 31 and hauled in 15 rebounds for Madison. Doneric Rivers, whose late errant pass in the semifinal accidentally dropped in the basket to propel Madison to a 64-63 victory over Santa Fe, scored 20.

Tyrone Palmer blocked four shots for Madison, which drops to 3A next year after competing as one of the state's smallest 4A schools.

"Last night he had a 55-foot ally-oop that went in," Madison coach Ellis Kidd said. "Today we

"We did have a bunch (of fouls). because every time I looked up they were on the free-throw line, Sinton coach Brian Young said. 'But that's kind of our style.

### **Class 2A Championship** Krum 53, East Chambers 39

AUSTIN - Krum set out to make a defensive statement after it could manage just three points in its coldest first quarter of the vear

By holding East Chambers' high octane offense to just two points in the third on 1-for-11 shooting, Krum did exactly that in its victory for its second Class 2A championship in three years.

Championship game MVP Chris Arledge scored 24 and manned the inside defense for Krum, which had a decided height advantage at virtually every position.

Hopkins then was fouled on the other end and calmly converted both free throws with 13.5 seconds left

Anderson-Shiro (35-4) had one last gasp as Dedrick Calhoun missed a 3-pointer under pressure with about three seconds remaining. Teammate Jared Schroeder got the ball back and launched a longer attempt just ahead of the buzzer, but it clanged off the rim. Dowell, whose fourth quarter field goal accounted for his only points of the half, led Avinger with 17 points and 13 rebounds. Calhoun scored 18 and Foy had 15 points, 12 rebounds and six blocked shots.

Prior to the season, Avinger (27-6) retired the number of Courtney Dowell who died last summer of a heart attack.

## **GIRLS:** MHS outshoots Lady Rebs 16-8

### (From 1C)

ference she would have made against a MHS attack that was running at full throttle.

They played aggressively, passed the ball and put the ball in the net." said Midland Lee coach Van Gravitt. "We were flat and not prepared to play."

MHS outshot Lee 16-8 and scored its first goal in the 30th minute when senior Anna Laengberg gave Mitchell a lead pass to the top of the penalty box. Mitchell, then took ball forward to the top of the box, escaping a Lee defender in the process, and unleashed a shot into the upper left portion of the goal.

It was Mitchell's third goal in as many games since joining the varsity where she has fit in well.

I know where she is going to be," said Laengberg. "I feel we are working well together.

"Everybody on the team is moving well and this was big win was big because it was in the real game. The other times were shootouts.

Even Gravitt figures that Mitchell has helped MHS play at another level.

"She is a big factor for them," said Gravitt. "She gives them a big boost.

The team play has risen in the past three games and that stood out in the second half.

In the 62nd minute, Jacque Ket-ter connected with Laengberg streaking down the left side of the field. From the left side of the box, Laengberg took the pass and rock-eted a shot into the right side of the goal. It was a reward for the Laengberg who has set up many players in the past.

"It was obvious in the second half that Anna is talented at distributing the ball," said Hodkinson. "I was happy to see her score. She deserved it

Midland High controlled the game by winning the midfield battles and shutting down what had been a potent Lee attack, which had been scoring four goals a game in the second half of district play

Christi Johnson, Ritha Belizaire and company were marked up tight in the game not allowed to get clear looks on goal. In fact, they didn't get a shot on goal in the second half.

'Our midfield dominated them today," said Hodkinson. "Sonva (Lackey) and Heidi (Moore) do such a good job of there and stopping their chances."

For Lee it is time to move on and get ready for the playoffs, and

Gravitt knows that the team play will turn around.

"It is probably a wake-up call," said Gravitt. "We can play better than we did today. It makes the first round tougher. We will have to play our best to win.

For Hodkinson, the win sets up another meeting with Cooper and despite the advantages that come with playing as the district's sec-ond seed. MHS will settle for nothing less than a win on Tuesday.

We are going to play to win, said Hodkinson. "Cooper will be tough."

berg), 30th minute. Second Half - 1. MHS, Laengberg (8) (Jacque Ket-ter), 62nd minute. Shots: Lee 8, MHS 16. Corner Kicks: Lee 1, MHS 4. Offsides: Lee 1, MHS 3. Saves: Lee 4 (Connell 3, Nobles 1), MHS 4 (Richardson 4). Fouls: Lee 13, MHS 16. Cards: None. Penalty Kicks: None.

with 61 points while the Midland High girls, missing a possible 20 points from the 800 relay in which they were disqualified in Friday's preliminaries, finished sixth with

50 points The Lady Bulldogs, however, did win the 400 relay which in a small way made up for their absence in the 800 relay final.

"We redeemed ourselves a little bit from yesterday," said 'relay member Toya Zachery —Tami's older sister - who also ran with Shelly Ray and Talitha Belcher. Our time improved a lot (in the 400 relay) but we still would have like to run the 800 relay.

Ray, who was also on the DQ'd 800 relay, said they tried not to think about Friday's flubbed handoff.

"We just went out there with a lot of confidence," Ray said. "We knew we had to.

Lee's Toya Clater, a sophomore who came away from her first WT Relays with a silver medal and two bronzes, said she was happy with the way she and her teammates performed.

"I'm so proud of the way I did," said Clater without a hint of cockiness but instead with the awe of a sophomore attending her first really big meet. "Especially being a sophomore. And we did really good on both of our relays."

Clater, coming off a secondplace performance Friday in jumping a personal-best 17 feet, 7 1/4 inches in the long jump, anchored the Lady Rebels to fourth place in the 400 relay (50.06) and third in the 800 relay (1:47.49).

"Our goal was to break 1:48 so we did good," Clater said. Clater finished third behind

EYE & BAR CARE.

## Jarrett must overcome 36th spot at Purolator

three weeks of nothing but ups, Dale Jarrett needs to overcome some adversity in the Purolator 500 to keep his surprising lead in the Winston Cup points race.

Jarrett, whose previous worst starting spot this season was 13th at Rockingham, will start 36th in the 41-car field Sunday at Atlanta Motor Speedway.

'It's been the weekend from hell right now," said Jarrett, who drives a Ford Thunderbird for Robert Yates Racing. "This hasn't been any good at all. My car drives pretty good, but it's not going anywhere. There's just no speed there.

"This is exactly what I didn't want, but it's here, so now we've got to deal with it.

But at least the second-generation NASCAR driver is in the field.

Jarrett, with a win in the Daytona 500 and runner-up finishes at Rockingham and Richmond, is leading the season standings by 86 points over equally surprising Jeff Burton.

But Burton, who like Jarrett started the season with a newly formed team, failed to qualify for the race. Because he has no carowner points from last season, Burton was not even eligible for a provisional starting spot.

Jarrett faced the same predicament, stood on his qualifying speed of Friday when second-round time test were conducted Saturday and was fortunate not to be bumped.

'That would have been ugly, said the son of two-time NASCAR champion Ned Jarrett. "The last few times qualifying here we just haven't got the job done.'

But he is in the race, and Jarrett is confident his team will give him a car capable of going to the front, just as it has in the first three races.

"Our goals have definitely changed," Jarrett said. "We wanted to finish in the top 10 and win a couple of races this year. We thought that would be pretty respectable.

'Now, realizing the potential, I think we can finish in the top five in the points, and there's no reason we can't win four or five races. We've given ourselves a chance to win every race we've been in so far this season.

Rookie Johnny Benson, who won his first Winston Cup pole in only his fourth race, is just hopeful of gaining experience and respect in the 500-mile race on Atlanta's 1.522-mile oval.

'Getting the pole is great, but if the car is perfect most any driver

HAMPTON, Ga. (AP) - After day's race will determine that "I feel the team (Bahari Racing)

is capable of winning this race. As far as being a rookie on my end, that's going to be the difficult part of it. I need some more experience.

"If we can get through the race and still have a really good finish and try to learn as much as we can, I think that's what's important right now.

'I'd rather be running with the guys up front because they're not going to do anything stupid. I hope don't."

Mark Martin will start alongside Benson in the front row, with Terry Labonte and Jeremy Mayfield in the second, Geoff Bodine and Bobby Hamilton in the third, and John Andretti and Bobby Labonte behind them.

Other top drivers starting farther back include Dale Earnhardt, the runaway winner of the November race at Atlanta, in 18th; Ricky Rudd, third in the points, in 20th; defending series and race winner Jeff Gordon, in 21st, and Ernie Irvan, Jarrett's teammate and off to a hard-luck start, in 37th.

Notes Rod Roderick, a 42-year-old race fan from Pembroke, Maine, lost his shot at a \$1 million prize Saturday when he hit two cones, then spun out during a speed contest with 1988 Winston Cup champion **Bill Elliott.** 

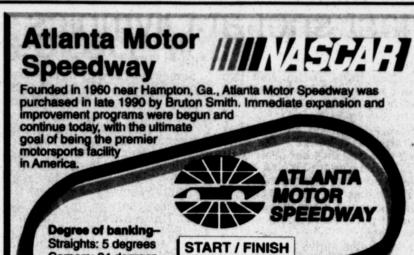

Roderick was drawn at random from more than 250,000 entries in the Reese's-Bill Elliott \$1 Million Driving Challenge. The one-lap timed event was run Saturday on a special course set up on Atlanta Motor Speedway's front straightaway

Driving special mini-Winston Cup cars, the two drivers made separate one-lap runs on the course, laid out with orange cones. Elliott went first, and was clocked in 53: 01 seconds. Roderick, who said he never has driven a race car of any kind, got a good start. But he but clipped two cones before the spin that ended his

hopes of winning the big prize. A one-second penalty was assessed for each cone hit and Roderick's overall time was 1-minute, 74-seconds.

When I saw Rod coming through the last turn as fast as he was going, I knew he'd either end up a millionaire or we'd be seeing some action real soon," said Elliott, who in 1985 became the only driver to win the Winston Million, a \$1 million bonus for winning at least three of NASCAR's Big Four events in the same season.

His consolation prize was a 1996 **Bill Elliott signature Edition Ford** Thunderbird. Reese's also donated \$10,000 to the Children's Miracle Network, a national program benefiting hospitals for children in the U.S. and Canada.

Roderick, who never had attended a Winston Cup race but says he has more than 5,000 collectible racing cards, also was invited to watch Sunday's Purolator 500 from a hospitality suite.

Because Roderick didn't collect the \$1 million, the candy maker said it will repeat the promotion next year.

WIND TUNNEL BOUND: NASCAR is expanding the twice-ayear wind tunnel tests it initiated in 1995 to include Busch Series

The Ford Thunderbird of Mark Martin, the Chevrolet Monte Carlo of Bobby Labonte and the Pontiac Grand Prix of Ward Burton were impounded Saturday following the Busch Light 300 Grand National race at Atlanta Motor Speedway.

Three more cars - again one of each make represented in the race will be impounded Sunday after the Purolator 500 Winston Cup event on the same 1.522-mile oval.

"This will allow us to do some comparison tests," said NASCAR spokesman Kevin Triplett.

The cars will be taken Monday to the Lockheed wind tunnel facility in Marietta, Ga., about 40 miles from the race track.

## Heron could put end to ho-hum Honda play **The Associated Press**

CORAL SPRINGS, Fla. - Tim Herron no longer needs to worry about boring anyone hoping to see an interesting finish to the Honda Classic.

The 26-year-old rookie lost half of the six-stroke lead he started the day with on Saturday, and only three big putts on the closing holes salvaged his three-stroke lead over New Zealand's Michael Campbell.

### Golf Roundup

Herron, seeking to become the first wire-to-wire winner on the PGA Tour since Bob Estes took the Texas Open in 1994, birdied two of the last three holes and made a 12foot par putt on the 18th to shoot an even-par 72, putting him at 202 entering into Sunday's final round.

It was lucky to be that. He got some of the fortuitous breaks that staked him to rounds of 62 and 68. such as a tee shot on No. 2 that missed going out of bounds by 3 feet. And, there was a 5-iron that got caught in the wind on the seventh hole and missed rolling into the water by the length of a shoe.

But the short putts he had been making stopped falling, and Herron looked to be in trouble. He recovered just in time.

"I knew if I started hitting the greens and two-putting I would be all right," he said. "I just had to be patient. It was probably the most patient my dad has seen me on the golf course.'

His patience and his nerve will be tested on Sunday. Along with a forecast that calls for a good chance of rain to go with the cool, windy conditions of the third round, he's got a lot of quality players close behind.

Mark O'Meara, who won the Mercedes Championship to start the year, shot a 7-under 65 to get to 10-under 206. He was tied with Mark McCumber, with Nick Price and Payne Stewart another two strokes back.

"This is a good tournament for Timmy," said Campbell, who met Herron when both played the Australasian tour two years ago. 'He'll get a lot of experience with world-class players around him. Tomorrow will be a tough day. Three shots is nothing.

McCumber, who made it a point of meeting the 26-year-old from Minnesota before Saturday's round, still thinks Herron is in control.

### **Australian Seniors**

CANBERRA, Australia - Lee Trevino fired a 2-under-par 70 in the third round for a four-shot lead in the Australian PGA Seniors. Trevino has a 54-hole total of 5under-par 211 over the Gold Creek off the pace after a 71 left him at Country Club course. Australian 216.

Tim Herron chips in on the 18th hole of Saturday's Honda Classic in Coral Springs, Fla. Herron leads the tournament after three round.

Terry Gale, who double-bogeyed the 18th hole, is Trevino's closest rival after shooting a 73 Saturday. Japan's Kenichi Tsurumoto is in third place at 216 after a 74 Satur-

day. Trevino said it was the worst he had played over the three days.

"I feel great but my ball striking wasn't good," he said. "My putter saved me." He knocked in a 35footer for a birdie at the 13th.

"I'm going to make room on my pillow for my putter tonight - I might even sleep on the floor," said Trevino, who has been battling spasms in his right shoulder and has been stretching between shots. Moroccan Open

RABAT, Morocco - Peter Hedblom of Sweden rolled in a birdie putt on the 18th green to cap a 2over-par 74 and hold onto his fourshot lead in the Moroccan Open with a 209 total.

This is the first European PGA tournament Hedblom has ever led. He has twice finished second in a tour event.

"Tomorrow is my golden chance," Hedblom said. "Hopefully my normal game would be good enough to win.

Tied for second were Raymond Russell of Scotland, Zimbabwe's Tony Johnstone and Eduardo Romero of Argentina, who fired a 67, the best round of the day. Russell and Johnstone both had 70s.

### Labonte wins Grand National race

ry Labonte, taking advantage of a break by making his last pit stop under a yellow flag after Mark Martin stopped under green Saturday, won Busch Light 300 Grand National race.

Labonte, a Winston Cup regular and part-time driver in the Busch Series, beat former Grand National champion David Green to the finish line by 2.2 seconds in a battle of Chevrolets at the Atlanta Motor Speedway.

But Green's second-place finish — about 10 car-lengths back at the 1.522-mile track - was good enough to give him the series points lead by 612-549 over Martin.

Martin, who led four times for 119 laps of the 197 laps, appeared on the way to an easy victory until he was caught in the pitstop situation. He stopped on lap 159, and the caution flew on lap

HAMPTON, Ga. (AP) - Ter- 160 when Tim Bender hit the wall. Martin wound up seventh. 'I know what it's like having the fastest car and not winning," said Labonte, who led only the last 26 laps after passing Green. "We didn't have the fastest car today, but it was good enough and we played the pit stops just right.

"We were going to pit the next lap and I saw two guys behind me spin out. So, I thought, 'Well, good for me.' We stayed out another lap, and came in and pitted under caution. It was a gamble to stay out, but it paid off."

Phil Parsons was third, followed by Steve Grissom and Stanton Barrett.

It was the eighth Busch Series victory for Labonte, whose last win in the series came last August on the road course at Watkins Glen, N.Y.

### King takes Iditarod lead from Buser

er Jeff King of Denali Park has overtaken Martin Buser for the lead in the Iditarod Trail Sled Dog Race

King, who won the race in 1993 entered Nulato a minute ahead of Buser, the 1992 and 1994 champ. Buser, of Big Lake, was 15 minutes ahead of King when they left Galena for the 52-mile run to Nulato.

King reached this Yukon River checkpoint at 10:12 Saturday morning, followed by Buser. The racers are now just 401 miles from Nome

Defending champion Dough Swingley of Simms, Mont., was third into Nulato at 10: 45 and Dee Dee Jonrowe of Willow followed at 10: 54.

About two hours behind the immediate frontrunners was Tim Osmar of Kasilof. Osmar has nine dogs in harness and King has a dozen. The other top mushers are running with 11 dogs each. Mush-ers started the race with up to 16

dogs. It's unlikely for mushers further back at this point to make up the time. No musher in the history of the race has been more than three hours behind the leader at this point and won.

The top racers are two to four hours ahead of Buser's 1994 record pace for the northern race route

NULATO, Alaska (AP) - Mush- being run this year. They're making good time on the hard Yukon River trail, which gets plenty of use by snow machiners commuting from village to village.

Weather is not expected to be a major factor in the remaining days of the race. Partly cloudy skies are forecast along the race route, with highs of 10 to 15 Sunday and lows of zero to 10 below. Assuming no major storm or other factor delays the racers, the winner should reach Nome sometime Tuesday evening.

Amanda Beard of Irvine, Calif., strokes to a win in the women's 200-meter breaststroke preliminaries at Saturday's U.S. Olympic Trials in Indianapolis.

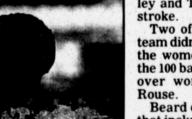

"I'm really with the time right now, and I'm even happier to get another chance to swim in Atlanta.

Beard followed Dolan on deck, and equaled his accomplishment in two ways. The 14-year-old won the 200 breaststroke in 2 minutes, 26.35 seconds — the second-fastest ever by an American - to go with her title in the 100 breaststroke.

Dolan overtook John Piersma at

said.

after his victory in the 200 free, was second in 3:51.41.

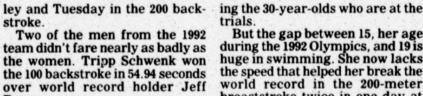

Thompson, Nall come up short in Olympic Swimming Trials

the 250-meter mark, and was on American record pace at 300 meters. He finished in 3: 48.99.

'More than anything else, I want to make the team in as many events as possible, so first or second is all that matters," Dolan

Piersma, also looking to double

Dolan's other opportunities are Monday in the 200 individual med-

Beard dominated a strong field that included former world record holder Nall and Kristine Quance, who overcame a disqualification in the 400 IM on the meet's opening day to finish second in the 100 breaststroke.

Quance took the lead off the blocks with Beard a close behind. Beard made her move coming off the wall after 100 meters and quickly moved out to a bodylength lead over Quance.

Beard, Jilen Siroky and Beth Botsford are the three 14-year-olds on the women's team. Siroky, a daughter of Czech immigrants, is the youngest, at three months, 18 days

Siroky of Charlotte, N.C., came on strong to out-touch Quance for second in 2: 28.23.

Nall is only 19, young consider-

HOSPITAL

### Nall was third going into the first turn, but she rapidly lost ground in her final chance for a trip to the Atlanta Games. "I knew I wasn't going to beat Amanda, but I thought I could get second," she said. "My mistake

was getting a little rushed." Jessica Foschi, the center of a controversy that has split U.S

swimmers since she tested positive for a banned steroid last year, has one more chance to qualify for the U.S. team.

After missing out in the 200 and 400 freestyle events, Foschi will be in the 800 free preliminaries on Sunday, with the finals set for Monday.

The 800 is the event she won in the U.S. Open last year before the anabolic steroid was detected in a drug test in the Summer Nationals.

## Oft-injured Slaney takes last shot at Olympics

### By Bert Rosenthal

### **AP Track Writer**

ATLANTA — One of the lasting images from the 1984 Olympics is that of a runner collapsing in tears after a collision with her bitter rival, Zola Budd, knocked her out of the women's 3,000-meter final.

Nearly 12 years later, Mary Slaney is back and hoping to get one last shot at Olympic competition.

The woman who once held all the American records between 800 and 10,000 meters has been missing from the track and field scene in recent years, but at age 37, she is healthy for the first time in a long time.

There are no more aches and pains," a smiling Slaney said during the Atlanta opening of USA Track & Field's Images of Excellence show, a historical review of track and field dating back to 1863 that is touring the country. "I feel solid. I feel healthy

"I'm very ecstatic that I'm healthy ... feeling just like I used to be.

Now she is gearing for this year's Olympic trials in June at Atlanta, the site of the Games.

"The Olympics are here and I want my chance," Slaney said. "After Los Angeles, I never thought I would get another opportunity to run in an Olympics in this country.

Slaney has not raced on the track since the 1992 Olympic trials, when she failed to make the U.S. team, finishing fourth in the 1,500 meters and sixth in the 3,000. While disappointing, the results

Slaney was competing with an wanted to walk again." iron deficiency. Before that, Slaney had two

When her physical condition allowed, she ran some road races in the past four years, even beating Budd in a road mile in Australia in 1992.

When Slaney was healthy, there was no better women's distance runner in the world.

Bursting on to the scene as a 15year-old in pigtails and braces, she loved competing, going to the lead quickly, establishing her superiority and daring anyone to catch her. Not many did.

Then, after years of overpowering performances that included several world records, Slaney was slowed by a series of debilitating injuries that required between 18 and 20 operations. Even Slaney has lost count of the number.

Throughout the frustration of being unable to compete, Slaney did not lose her desire - except once - to return to the sport that has been her lifeblood and livelihood for more than 20 years.

'That was in the summer of 1994, when I couldn't even get up or stand or lie on the couch without pain," she said. "That was the first and only time I considered giving it up. I just wanted to get healthy.

"I thought I was done trying. I felt out of control."

That pain, caused by a throbbing left Achilles tendon, lasted from May until September. Finally, after doctors diagnosed the injury, surgery was performed.

Twenty-five percent of my Achilles was gone," she said. "It was degenerative. It had been were respectable considering that unbearably painful just to sit. I just

bone operations on her left foot and has had two operations on the same foot since then.

"Everything was weakened — the muscle, the bone," she said. 'My foot was broken. After that, I fractured something else. Then, it happened one more time.'

The cause of all of Slaney's injuries, she said, "is just the way I run. I put a lot of stress on my lower legs.'

Slaney also added to her problems by trying to come back too quickly from injuries. When she did, she would aggravate the existing injury or, by favoring that injury, would hurt something else. Impatience was one of her

biggest enemies. "If I had stayed patient in the past ... " she said. "But I pushed myself too hard.'

Helping Slaney's return to running has been an orthotic that eases her foot pain.

'Now I'm sticking to a program and I hope to be ready when it counts," she said. "I don't want to be impulsive.

As she tries for her third Olympics, she probably will limit herself to one event, concentrating on the 5,000.

That is one of the three events, along with the 1,000 and 10,000, she once held American records in, marks that have since been eclipsed by younger runners. But Slaney still holds records in the 800, 1,500, mile, 2,000 and 3,000.

She also does not have a trials qualifying time in the 5,000 but may try to qualify at the Penn Relays in Philadelphia in late

Slaney has run only three 5,000s, but at this stage of her career, she figures that is her best distance

now. "I'm telling people to watch out for her at the Olympic trials," her coach, former marathoner Alberto Salazar, said. "She'll be ready.

Slaney estimates that she hasn't felt fully ready since the 1988 trials, when she won the 1,500 and 3,000. The iron deficiency kicked in for the first time shortly after the trials, and she wound up eighth in the 1,500 and 10th in the 3,000 at the Seoul Olympics.

Now, because people's expectations of her are not high, the pressure is off, and Slaney is elated.

"Take the pressure away, and it's fun again," she said. Still, there is worry that she

could get hurt again.

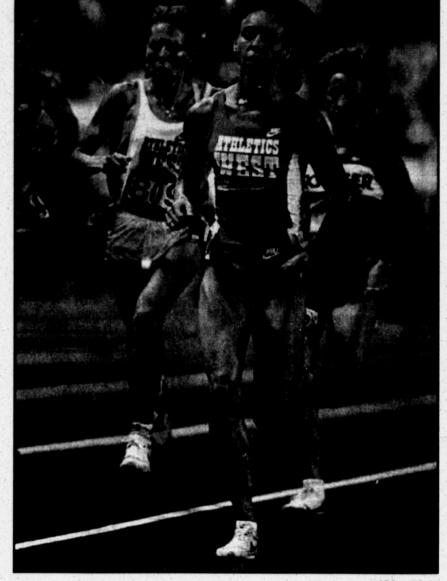

"After a while, you doubt your-self," she said. "You have to get to the point where you believe it. Right now, I'm gun-shy. I'm afraid to push to the point where I used to. "It's not good to think that way,

but I guess maybe it is good because it makes you more careful."

Slaney compares her situation this year to her productive 1983 season, when she won the 1,500meter and 3,000-meter gold medals at the world champi-onships at Helsinki, Finland.

"Nobody expected me to do well then except me," she said. "Nobody expects me to run this year, no less do well.

"I think people are surprised I'm still running."

AP Las

Mary Decker Slaney runs in the 1,500-meter preliminaries at the U.S. Olympic Trials in 1988. Slaney, who has been missing from the American Track and Field scene in recent years, is trying to qualify for the U.S. Olympic team.

## Swiss skier wins final giant slalom of World Cup season

HAFJELL, Norway (AP) -Urs Kaelin of Switzerland, two weeks after losing to Alberto Tomba in the World Championships, got a measure of revenge Saturday by winning the final giant slalom of the World Cup season.

Tomba, the flamboyant Italian, managed only fourth place after making costly errors in both runs in his first showing since capturing gold medals in both giant slalom and slalom at Sierra Nevada, Spain.

Kaelin led by nearly a second after the first run and cruised home to his second victory of the season with an aggregate time of two minutes, 12.44 seconds.

'I attacked just enough. There were two or three holes in the course in the second run.' 1994 Olympic gold here by twohundredths of a second to Markus Wasmeier of Germany. Tomba shrugged off his fourth-place finish.

was to finally win gold at a world championship. He struck twice in Spain to add to his three Olympic golds and two silvers, the most by any skier.

Tomba surrendered his overall World Cup title to Lasse Kjus of Norway. Earlier, he had also lost the giant slalom crown to Michael von Gruenigen of Switzerland.

Only his slalom title remains, but Tomba must overcome a 14point deficit against Sebastien Amiez of France in Sunday's last race of the World Cup sea-

son. Earlier, overall World Cup champion Katja Seizinger won the women's race, while her German teammate and roommate Martina Ertl captured the giant slalom title by finishing Tomba trailed Kaelin by .91 seconds after the 52-gate first run, during which he nearly crashed out and had to regain balance while coming down the **Raaboel Olympic course on one** 

## Franchise moves, not rules, the focus at NFL meetings

### By Dave Goldberg

### AP Football Writer

PALM BEACH, Fla. - The agenda for this week's owners' meeting reflects the state of the NFL.

It's dominated by franchise moves and potential franchise moves, not the usual debate about playing rules. Except, perhaps for a revival of the annual discussions on instant replay.

On Monday, the owners are expected to vote on the Houston

Oilers' proposed move to Tennessee. They would play in Memphis for two years before settling in Nashville.

Then, in quick succession, will come discussions of Cleveland's move to Baltimore, Seattle's proposed move to Southern California, and Tampa Bay's continued search for a stadium

that could lead to another move within a year. This is heavy stuff for meetings most often concerned with arcane rules changes. Sometimes, though, there are surprises at these gath-

erings. Pete Rozelle shocked the owners by stepping

to play another year in Tampa but give no promises beyond that.

And while the league's stated policy is against moves, it has so far approved shifts by the Rams from Southern California to St. Louis, by the Raiders from Los Angeles to Oakland and Art Modell's Cleveland franchise to Balti-

On Monday, owners will probably approve the Houston move and could amend the Cleveland agreement, which leaves the Browns' name and colors in Cleveland and assures a team there in 1999. Then the owners will get to hear from both Seahawks' owner Ken Behring and Seattle officials who want to keep his team there

"We prefer that franchises remain where they are," said Joe Browne, the league's chief spokesman. "But you can never say never. You can't say they'll be there in perpetuity.'

The rules changes are likely to be minimal unless some form of instant replay is reinstated.

The competition committee, which makes the changes, is generally satisfied with the 1994 adjustments, which increased scoring by nearly six points a game between 1993 and 1995.

But most of the coaches favor reinstituting

George Young. Young is co-chairman of the competition committee.

There also is expected to be a modification of the "chop block" rule to make it more difficult for offensive linemen to block defenders

'It gets pretty technical," Browne said. "But defensive players and defensive coaches will be pleased."

### **Cleveland City Council**

approves NFL deal CLEVELAND — The deal that will bring football back to the city does not guarantee a new stadium will be built along the Lake Erie shoreline near downtown.

City Council on Friday grudgingly decided to approve the deal - with some changes - that will result in a new stadium and an NFL team by 1999.

NFL team owners now will have to vote on the amended deal because of the changes. They are expected to vote this week at their meeting in West Palm Beach, Fla.

Mayor Michael R. White said he had been in touch with NFL officials about the council's amendments and he said that no problems are expected.

'Deal killers that jeopardized the agreement were deleted," White said. The two biggest changes in the deal will allow City Council to consider four stadium sites and force the future team owner to pay \$250,000 annually in rent. The deal previously agreed to by White and the NFL said that the new stadium would be built on the lakefront site where Cleveland Stadium now sits.

"I won my most important races in February," he said.

Tomba's goal for the season

down in 1989, and it was two years ago that Jimmy Johnson and Jerry Jones had their infamous falling out, leading to Johnson's departure as coach of the Dallas Cowboys But barring something of that order, the relo-

cation issue is the owners' priority. Since the end of the 1994 season, five franchises have either relocated or have sought to.

Others are restless — the Bucs have promised

replay, which was in effect from 1986 through 1991

There is no consensus, however, on the form replay might take.

To be approved, it needs votes from 23 of the 30 teams. A return to instant replay is opposed by two of the league's most influential executives, Pittsburgh Steelers president Dan **Rooney and New York Giants general manager**

## **Reds' manager makes peace with players**

### By The Associated Press

Cincinnati Reds manager Ray Knight made peace with Reggie Sanders and Eric Anthony on Satur-

Sanders and Eric Anthony on Satur-day after criticizing them for refus-ing to play in an exhibition game. "I was angry, and I said some things I felt honestly about," Knight said at Plant City, Fla. "I'm not going back on any of that stuff, but they understand me." they understand me.'

Knight was upset when he had no right fielder for a game against St. Louis on Thursday.

### Spring Training

Sanders said he couldn't play because of a bruised right calf and Anthony refused to take Sanders' place, Knight said. The manager angrily criticized them after the Reds lost 9-6 in 11 innings.

Knight said he met with general manager Jim Bowden and trainer Greg Lynn to discuss what he called a "communication problem" stemming from Sanders' injury. He said the injury was more serious than he was led to believe.

"I'm just going to try to put it behind me," Anthony said. "It's an unfortunate incident. I know that's not me.

Knight said his emotions can be volatile, but he's never angry at someone for a long time.

'I've never had a problem that's really lasted more than a day," said. "I try to be so upfront, and if I tell you something, it's my heart. It's honest. Sometimes, I may be too honest, but that's the only way I know.' **Phillies**

Darren Daulton continues to have problems learning how to play the outfield.

In Saturday's 15-11 loss to Toronto at Dunedin, Fla., the catcher

turned left fielder was charged with his second error of the spring when he charged Otis Nixon's ground single and the ball got past him.

Daulton is struggling at bat, too. After going 1-for-3 Saturday, he's hitting .150. Athletics

Steve Karsay, coming back from elbow surgery, threw 17 pitches, just seven of them

tables.

**AP Baseball Writer** 

These days, though, there's plenty of room for all. She's even posted a sign.

"Due To The Decline In Ticket Sales, We Are Serving Lunch as Usual," it reads. "There Will Be No Problem With Parking Or Seating.'

Instead, the problem seems to belong to baseball.

Because, despite claims by owners and players that enthusiasm for the sport is back, the fans are not. A year after major of spring training became anoth-

The Blue Jays, a virtual sellout at Dunedin Stadium for five years before strikes skewed the last two seasons, were only half-full, at best. Friday's game against St. Louis — played in chillier-thanusual conditions, attracted 1,710 to the 6,218-seat park.

"The numbers would tell you that the fans are not here yet,' Blue Jays general manager Gord Ash said.

'But I think there are reasons for that. Spring training started a week earlier than usual this year. Is it that we're not as star studded as in the past? Is it the exchange league attendance dropped rate, or that people aren't trav-almost 20 percent, the first week eling as much? It's hard to say." Outside Dunedin Stadium,

10,000 to their new Legends Field in Tampa, Fla. The San Francisco Giants pulled more than 9,000 to Friday's game in Scottsdale, Ariz.

## Cards' Smith fighting for job for first time in career

ST. PETERSBURG, Fla. (AP) - Ozzie Smith always figured that when he was finished, he'd know. No one would have tell the fanciest fielding shortstop ever that it was time to go.

Only these days, he's not so sure anymore. Because this spring, his future is too clear not to see after all, it's peering right over his shoulder every day.

For the first time in his Hall of Fame career, Smith is fighting for his job. The St. Louis Cardinals, fearing that Smith might be too old and too injured, traded for San Francisco hotshot Royce Clayton in December.

"I've been playing for 18 years. You put yourself in my shoes and you answer that. How would you feel?" Smith said. "What. I've done over 18 years speaks for itself. But they seem to have made a decision already.'

Manager Tony La Russa, one of many new faces in St. Louis, insists nothing has been deter-mined. Instead, he studies each afternoon as Smith and Clayton practice together, talking as they take turns picking up routine grounders.

They are friends, these two new competitors, and prefer not to dwell on this odd hop their paths

Smith situation," said free-agent shortstop Greg Gagne, who con-sidered the Cardinals before signing with Los Angeles. "It's pretty messed up over there.

Smith, at 41, is trying to become the oldest shortstop in the majors in 75 years. The 13-time Gold Glove winner and 13-time All-Star wants to show he's recovered from a shoulder problem that limited him to 44 games and a .199 average last season.

Clayton, at 26, is attempting to take away the position from his boyhood idol. A rising star, he needs a place to play every day, even though he may be blamed for shunting aside a local hero.

"I don't think anybody can say they can do the same things at 41 as they did at 26," Smith said. 'But I'm not in a wheelchair, either. When you listen to people talk about me, they talk like they have to wheel me out in a wheel-

chair. That's not the case." He is as much a fixture in St. Louis as the famous arch,

will.

"I've proven what it is I do,"

Smith's 14-year legacy in St. he's committed two errors in his first four exhibition games.

"I got traded here. I had nothing to do with it," Clayton said. "This is an opportunity to learn from one of the best. It's something I'm looking forward to, as much as possible.

## Red Sox rally from four-run deficit to nip Texas, 7-6

### The Associated Press

PORT CHARLOTTE, Fla. - Brent Cookson broke an eighth-inning tie with an RBI dou-ble as the Boston Red Sox rallied from a fourrun deficit and beat the Texas Rangers 7-6.

Tim Wakefield was pounded for six runs and seven hits in three innings, but Joe Crawford, Brad Pennington, Chuck Ricci and Joe Hud-son each pitched an inning of shutout relief.

Texas led 6-2 before Luis Alicea homer's in the fourth. Matt Whiteside blew the lead in the seventh, allowing run-scoring hits to Nomar Gaciaparra, Reggie Jefferson and Jose

Cookson drove in the go-ahead run the fol-

### Texas Preseason Roundup

lowing inning against Ed Vosberg.

Rusty Greer hit a two-run double in the Rangers' four-run first, but Bill Haselman hit an RBI double in the second and Alicea tripled

home a run Mickey Tettleton and Dean Palmer hit RBI singles in the bottom half.

Braves 3, Astros 0 KISSIMMEE, Fla.— Javier Lopez went 3-for-3 and drove in two runs, leading Atlanta to a victory over Houston. John Smoltz combined with three pitchers

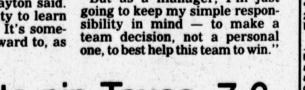

on a four-hitter, allowing two hits in three innings with two strikeouts. Chris Brock got six outs for the save. Greg Swindell was the loser, allowing one

run and five hits in four innings with four strikeouts.

Atlanta went ahead in the first when Chipper Jones tripled and scored as second base-man Craig Biggio's relay bounced into Hous-ton's dugout for an error.

Lopez hit a two-run single in the fifth off Dean Hartgraves scored Brad Woodall and Damon Hollins.

Houston advanced runners into scoring position with less than two outs in four nnings.

affect his decision.

### have taken. Others have noticed, arguably the most popular player in team history and generally regarded as someone who would however. 'I'm kind of glad I didn't go to a matter of timing. St. Louis because of the Ozzie never be replaced against his

So while Smith does not raise his voice or use bad words when discussing his circumstances, his measured speech reflects the sting - or perhaps the slight - he must be feeling.

Smith said. "I can't do any more than that."

Clayton, a good fielder, wants to show he can duplicate his 1993 season when he hit .282 with 70 RBIs. He doesn't seem thrilled, though, about the prospect of trampling on Louis. So far Clayton hasn't made anyone forget about Smith, since PAGE 10C

he open house, which will be held this afternoon, is a perfect opportunity to view this delightful four bedroom house, set in a peaceful section of west Midland.

Chock full of features and interesting design aspects, this home belies its price of \$99,500 by offering characteristics that are usually found in much more expensive properties. The heart of this house is undoubtedly the combination of family den, informal dining room and the galley style kitchen. Dense wood paneling, a vaulted, exposed beam ceiling and a dramatic brick fireplace all add a certain 'je ne sais quoi' to the room's ambience. Built-in bookshelves add to the atmosphere, and help to create the feel of a Victorian parlor.

Compact and bijou, the family room opens out onto a delightful patio which overlooks the garden. Full of mature trees, including Pecans, the yard is a very quiet and relaxing sanctuary. One of the dominant features of the yard is the sizable workshop. An integral part of the landscaping, it offers cabinets gas heating, work bench and a sink, providing the home handyman or woodworker an ideal space in which to create. A flexible space, it could easily be converted into a darkroom or other hobby area.

Exposed woodwork is a theme in this property and continues through into the sequestered master suite which offers a similar ceiling to that in the den. The master bedroom opens out into a glamorous bathroom which contains a step-down bathtub, separate shower and two large closets. An interesting use of longitudinal windows and matching mirrors add a art deco feel to the room.

The galley style kitchen is perfectly positioned as it opens out to the formal dining room at one end, and the breakfast room at the other. Full of intricate woodworking, it offers built-in appliances, a resilient tiled floor and plenty of storage and work space. For more information about this property at 2203

For more information about this property at 2203 Abbey Place, either stop by the open house between two and four p.m., or call the listing agent, Jo Dennis, of Dennis Realty, at 520-9649.

# EDUCATION

#### Education in Brief/2E Making the Grade/2E

Just how many people are in that building anyway?

Newcomers to Midland often stare in awe at the massive seven-story downtown Midland Independent School District administration building, leading them to ask: 'Just how many administrators does it take to run a school district of our size?'

#### By Myra Lee Salcedo Staff Writer

ewcomers to the Tall City are often taken aback when they see Midland Independent School District's seven-story downtown administration building, 615 W. Missouri Ave. "When you see a building that size full of

administrators, it tells me that the school district is top heavy. And as a taxpayer, that concerns me," said retiree Helen Buella, who recently moved to the Tall City. Ms. Buella's concern is often voiced by other callers to the Reporter-Telegram, wanting to know "just how many administrators are in that seven-story building, anyway?

While it's true the 80,000 square-foot building is massive, MISD administrators have plenty of room to spare.

There are 36 administrators in 22 offices scattered among six floors (floors two through six). There are also some receptionists, secretaries and custodial personnel. The first floor of the building is primarily a public area, with a lobby, receptionists' desk, rest rooms, a board meeting room, and a second, smaller public meeting room.

rental fees for space at the Western Building. At the time of the donation about 550 Exxon employees were working in ClayDesta Plaza and the 615 W. Missouri Ave. building had been vacated by Exxon following 75 employees losing their jobs in Midland. (When Exxon created an onshore exploration division in Houston, the Midland exploration jobs were lost).

But Exxon's loss was MISD's gain.

"By moving into the large building we were able to free up space for additional classrooms at two campuses, and to get rid of rental fees," said Wilson Heidelberg, MISD executive director of auxiliary services.

So, the 36 central office administrators oversee a school district of about 23,220 students and 1,396 (as of Oct. 1995) teachers.

One measurement of a district's administration size is through the annual report Bench Marks, compiled by the Texas Research League. According to the 1994-95 Bench Marks report, MISD's costs that year were \$406 per pupil, lower than the 50 largest school districts' average cost of \$512, and lower than the \$537 average cost of districts in the state.

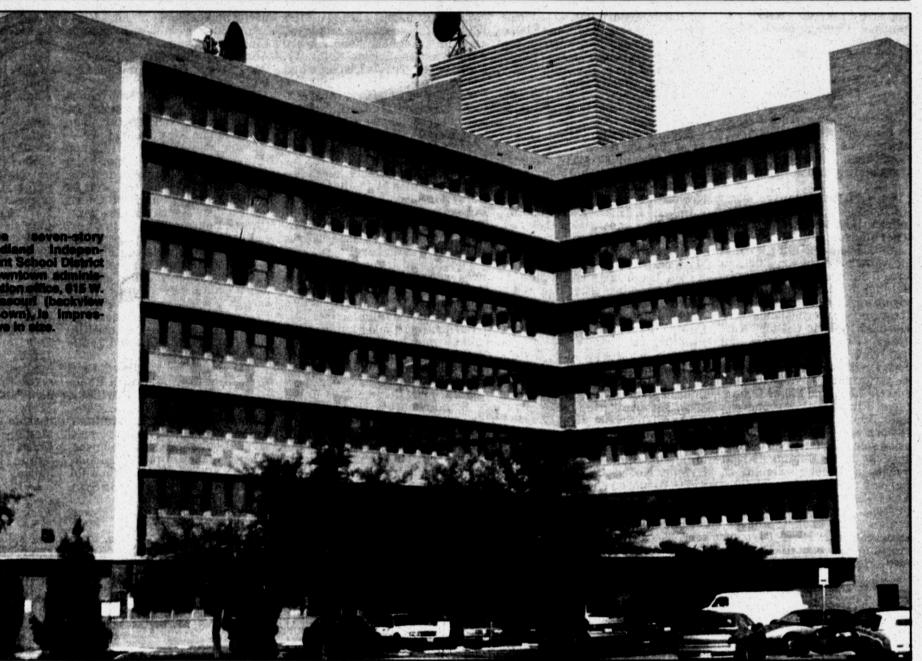

#### **MISD Administrators by building floor**

#### **Seventh Floor:**

Business Office with director and executive director Accounting supervisor Auditing Office with auditor **Benefits** manager Payroll supervisor.

#### Sixth Floor:

Superintendent's Office with superintendent Secondary Operations Office with executive director Elementary Operations Office with executive director Compliance Director Planning & Evaluation executive director Safety and Security chief Auxiliary Services executive director

The fourth floor also contains a conference area, large enough for some meetings and teacher training.

Some days we have a large number of teachers coming in for training. So, it may seem like we have lots of cars in the parking lot, and lots of people coming and going," said Art Martin, MISD executive director of business services.

The MISD building was donated to the school district in 1990 by Exxon. It was estimated, at the time, it was worth approximately \$1.5 million. Before moving into the building, MISD administrators were scattered about town, in a building that has since been renovated as classroom space on the campus of Houston Elementary School, in offices in the Western Building on Andrews Highway and in West Early Childhood Center. The administrators housed in the former location on the Houston campus often joked about "being packed in like academic sardines." Opening filing cab-inets often required some people to move from their desks and traversing the building took some skillful maneuvering.

MISD was spending about \$100,000 a year on office

'And that Bench Marks figure includes campus administration costs, namely principals and secretaries," Martin said. "If we took out our campus administrators, we would really have a low figure."

Martin said the Bench Marks measure of the 50 largest districts in the state is significant because "over half the money spent in public education in Texas is spent in those districts. So, it is comparing MISD to over half the students being educated in Texas and to half of the money spent.'

We just don't hire as many central office staff as other districts," Martin noted.

In a district audit, performed by state comptroller John Sharp, the comptroller said "MISD has kept administrative costs significantly below the statewide and comparable district averages. According to Texas Research League data, Midland taxpayers have been saved more than \$1 million per year (due to low administrative costs).

Upon acceptance of the Exxon building in 1990, MISD Superintendent Joseph Baressi Jr. said, "I think the size and location of the Exxon Building and the parking available will allow us to serve our administration needs for the next 30-40 years." MISD administrators agree, noting, "we have plenty of space yet to fill."

#### Fifth Floor:

Instructional Services Office with nine coordinators and two half-time coordinators Special Education Office with coordinator and supervisor

### ANNUAL Winning words take students to top REGIONAL Upcoming spelling bee to determine regional champion

#### From Staff Reports

he Reporter-Telegram will sponsor the Ninth Annual Regional Spelling Bee March 23 in the Allison Fine Arts Auditorium at Midland College. Thirty-five students from four West Texas

counties have spelled their way through preliminary meets to earn the opportunity to compete in this year's bee. The March 23 bee will determine the regional champion who will

represent the area in the 69th Annual Scripps Howard National Spelling Bee May 27 - June 1 in Washington, D.C.

Registration for the bee will begin at 8:30 a.m. and the bee begins at 9:00 a.m. with a practice round. The

practice round will be followed by a short break and then the actual bee. Students (in grades 4 through 8) from pub-lic, home and private schools in Midland, Glasscock, Upton and Martin counties will compete in this year's bee. The following stu-

dents, who will compete in the March 23 bee, District (1995 Regional Runner-up). are the winners from their respective school campuses

Sarah Alexander, Jane Long Elementary School

Jeff Armstrong, Scharbauer Elementary School

Pauline B. Baquirin, Crockett Elementary School.

Benton Burford, Hillander School.

Joshua Cornal, Lamar Elementary School.

Vanessa Delao, Bonham Elementary School

Ashley Diaz, Bush Elementary School.

Jason Dunton, Bowie Elementary School. Lillian Estes, Greathouse Elementary

School Rachel Gardea, Alamo Jr. High School. Carol Beth Gossett, Sam Houston Ele-

mentary School Andrea Gully, Greenwood Middle School.

Danny Hassing, Pease Elementary

Adam Houk, St. Ann's School.

Cory Jensen, Washington Elementary

Kristin Kahlich - DeZavala Elementary

Chad Kiefgr, Grady Independent School

Graham Keefe, Trinity School. Sophia Kuiper, Quannah Parker Elementary School.

Bradley Lord, Emerson Elementary School.

Stephanie Lucio , Anson Jones Elementary School.

Courtney Major, Rusk Elementary School.

Stacey Moore, Fannin Elementary School.

Katie Noah, South Elementary School. Kristen O'Donnell, Ben Milam Elementary School.

Stephanie Orr, Midland Association of **Christian Home Educators.** 

Richard Ortiz, Travis Elementary School. Vinesh Patel, Abell Jr. High School (1995 **Regional Champion**)

Seleste Ann Rodriquez, Burnett Elementary School. Katie Taylor, Henderson Elementary

Schoo

Trevor Tochterman, Midland Christian

Robyn Webb, Goddard Jr. High School. Katherine Zoller, Santa Rita Elementary

pion will receive a trophy, \$50 cash, two CD-ROM software libraries from Virgin Sound and Vision Inc. (one for the champion and one for the champion's teacher) and Merriam Webster's Third New International Dictionary and its Addenda Section, copyright 1993.

The Regional Runner-up will receive a troohy, \$25 cash and Compton's Interactive Encyclopedia (CD-ROM) from Compton's New Media.

The Bookman advanced Thesaurus (an electronic hand-held device) by Franklin Electronic Publishers, \$10 cash and a trophy go to the third place speller. The fourth place speller will receive Merriam-Webster's Collegiate Dictionary, Tenth Edition and a trophy, and the fifth place speller will receive a gift certificate for Scripps Howard Spelling Bee merchandise and a Trophy.

All participants in the Regional Spelling Bee will get certificates of achievement.

John Deats, director of the Learning Resource Center at Midland College, is the pronouncer for this year's bee

The judges are: Jann Pullig, a retired MISD reading specialist; Marydel Watkins, a retired MISD teacher and Patricia Garcia upervisor of Volunteers in Public In addition to the trip, the regional cham- Schools/Partners in Education at MISD.

### Students strive for Division I rating at UIL Solo and Ensemble contest

#### From Staff Reports

Just try and count all of the public school band students who earned Division I (superior) ratings at the recent University Interscholastic League Solo and Ensemble Contest at Midland High School.

The competition was hosted by **MHS Band Director, Cody Myers** and the MHS band and band boosters. Each performance was judged by a professional musician and given a rating from first to fifth division. First Division students received medals. The Lee High School Band students are under the direction of Randy Sto-

First Division winners from MHS include flute soloists Elisa Hepburn, Rachael Martinez, and Rachel Monroe.

**First Division B-flat Clarinet** solos were earned by Crystal Clelland and Sharon Smead.

Heather Brown earned a First Division on bass clarinet.

**First Division cornet solos were** performed by Eric Gibson, Karl Heimke, Brad McBrayer and Kevin White.

**First Division French horn solos** were performed by Lydia Clausen, Laura Hamblin and Mikee Ochoa.

**Other First Division honorees** include James Webster for baritone horn solo, Matt Hill for percussion solo, and flute trio performance to Janet Bohling, Kristi Forsberg and Rebecca Gould.

Earning the top rating for flute quartet performance were Lisa Johnston, Cindy Luna, Rachel Martinez and Rachel Monroe. **Clarinet** quartet First Division performance went to Heather Brown, Melissa Broyles, Crystal

**Clelland and Becca Hoke. First Division rated saxophone** quartet performers were Jeremy Knous, Shawna Pace, Denise

Price and Steven Sanders. Earning a First Division rating for baritone horn trio were Geoff Stratton, Preston Willis and Elaine Wright. French horn quartet top rated performers were Lydia Clausen, Laura Hamblin, Amy Hicks and Mikee Ochoa.

**MHS students earned 16 Division** II solo awards and two Division II ensemble awards.

**Midland Freshman High School** First Division solo performers are Jessica Forsdick, Mare Monnig, Lora Winters, Josh Nash, Nick Burrow, Julie Chastain, Katie Newsom, Michael Fowler, Devin Edminston, Diana Holstein, Allison Phillips and Jessica Lane.

MFHS First Division ensemble winners are Pam Conry, Josh Nash, Patrick Oden, Celina Flotte, Karen Guenthner, Ana Munoz, Clarissa Leonard, Eric Behrends, Courtney Givhan, Alyson Thomas, Michael Fowler, Diana Holstein, Lewis Franklin and Allison Phillips.

MFHS students also distinguished themselves by earning 11 Division II ratings in solo performances and 14 honorees earned the same rating in ensemble.

Lee High School First Division honorees include Jennifer Cadena on piccolo, and flute soloists Michelle Blake, Jackie Chou, Kylene Norris, Michelle Ray, Susan Robinson and Ameri Stuck-

Other First Division honorees include Lisa Wiggleton on bassoon, and bass clarinet soloists Tara Bidwell and Lindsay Evans. First Division B-flat clarinet

Burkhart, Lauren Ingraham, Lori Langhofer, Lisa Oetting, Elizabeth Rowland, Kelly Singletary and Sean Teng.

Taylor Callaway earned a First Division for soprano saxophone, and alto saxophone honorees are Erin Boomer, Taylor Callaway, Nick Carter, Travis Kleckner and Alex Saenz.

Tenor saxophone first-rated per-former was Matt Glass. First Division cornet solors were performed by Mandy Breithaupt, Joell Glaser, Melissa Marchbanks and

Regina Williamson. **First Division French horn solos** were performed by Cindy Abshire, Betsy Blaylock, Amy Boomer, Deborah Dunn, Rick Kimpel, Jeff Lamar, Jeff Larson, Melanie Martin, Shawn Nishi, Trisha Torres and Amy Wassenberg.

First Division tenor trombone solos were performed by Russell Hulme, Chris Lovett, Landon Luttrell, Chris Walls, Marisa White and Terrance Williams.

**Baritone horn solo First Division** ratings went to Ryan Brashear, Nathan Cooley, Russell Nix, Brian Page and Shannon Whitaker. First Division tuba solos were per-formed by Vic Cunningham, Eddie Laing and Courtney Ratliff. First Division snare drum solo winners are Dondi Pogue and Craig Reynolds.

**First Division keyboard percus**sion solos were performed by Amariz Acosta, Allison Kelly, Jennifer Oliver and Jill Picket.

Four flute trios earned First **Division ratings: Michelle Blake**, Jennifer Cadena, and Jackie Chou; Coni Byars, Brandy Green and Rochelle Johnson: Ashley Ameri Stuckley and Amity Vermillion.

**Earning a-First Division rating** for their mixed clarinet quartet performances were Melissa Baer, **Tara Bidwell**, Melissa Brazil and Lindsay Evans; and Cindy Abshire, Melissa Blase, Lisa Oetting, Susan Robinson and Lisa Wiggleton.

Saxophone quintet performance winners were Erin Boomer, Tay-lor Callaway, Nick Carter, John McDaniel an Alex Saenz.

Two clarinet choirs earning top ratings were the LHS Honor Band clarinet choir of Amy Allen, Melissa Baer, Tara Bidwell, Melissa Brazil, Jennifer Burkhart, Courtney Combs, Lindsay Evans, Matt Glass, Lauren Ingraham, Lori Langhofer, Lisa Oetting, Becky Ott, Elizabeth Rowland, Kelly Singletary and Sean Teng; and LHS Symphonic Band clarinet choir of Erica Cantu, Leisa Coffey, Heidi Dobey, Amy Enriquez, Michael Franco, Stacy Gray, Brandi Grismore, Jo Ann Lara, Iresha Milligan, Danielle Phillips and Jamie Treadway.

Two flute choirs earned First Division ratings: the LHS Honor Band flute choir of Michelle Blake, Jennifer Cadena, Jackie Chou, Ashley Greenwood, Lea Haltom, Amber Lovell, Kylene Norris, Michelle Ray, Susan Robinson, Ameri Stuckley, Amity Vermillion, Shanna Williams and Jennifer Young. Members of the LHS Symphonic Band flute choir of Stephanie Bronaugh, Coni Byars, Brandi Green, Leanne Hall, Roshelle Johnson, Debra Mar-

solos were performed by Melissa Greenwood, Amber Lovell, and doval, Tashmika Shelton, Iris Pharaoh, Jessica Saenz and Baer, Melissa Brazil, Jennifer Kylene Norris; and Michelle Ray, Sifuentes, Michelle Suydam and Andrea Suydam. Carrie Walker.

Earning a top rating for their cornet trio were Aaron Gutierrez, Suzanne Kerr and Michael Pruden. Top French horn quartet went to Deborah Dunn, Rick Kimpel, Shawn Nishi and Amanda Smith. First Division brass sextet went to Mandy Breithaupt, Nathan Cooley, Joelle Glaser, Russell Hulme,

Eddie Laing and Jeff Larson. Two brass choirs earned First **Division ratings: the LHS Honor** Band brass choir of Cindy Abshire, Band brass choir of Cindy Absnire, Tom Beasley, Amy Boomer, Mandy Breithaupt, Brannon Clay-ton, Nathan Cooley, Vic Cunning-ham, Deborah Dunn, Joelle Glaser, Russell Hulme, Suzanne Kerr, Eddie Laing, Jeff Larson, Landon Luttrell, Melissa March-banke, Shawn Nishi, Bussell Niv banks, Shawn Nishi, Russell Nix, Brandon Ofield, Micah Prude, Chris Walls, Amy Wassenberg, Terrance Williams, and Regina Williamson; and LHS Symphonic Band brass choir of Darci Allen, Betsy Blaylock, Ryan Brashear, Tim Bridges, Robert Douglas, Eric Hernandez, Jermaine Jones, **Travis McLane and Janel Mira**montes.

Lee Freshman High School students also went home with honors. First Division flute solos went to Kristen Chambers, Kali Gervais, Megan Hand, Robin Herriage, Kristi King, Meagan Meyer, Jamie Rohn, Erin Slape and Melody Whiddon.

LFHS students earning a First Division rating for bassoon solos were Leslie Reeves and Chris Royce. Top honors for B-flat clarinet solos went to Kristen Barr, tinez, Kelly McCarty, Karen Emily Burnett, Amanda Harri- had 46 Second Division solos an Miller, Crystal Rowe, Jessica San- son, Tamara Pack, Kristen five Second Division ensembles.

MFHS announces 'Top Dawgs'

First Division alto saxophone solos were performed by Aislinn McNeil and Amanda Orosco, and top tenor saxophone solo went to Philip Stanley. Top rated cornet solos were performed by Mark Flores, Ramean Ghassemi, Matthew **Olgin and Brandi Preston.** 

**First Division French horn solos** were performed by Brittany Jordan, Caleb Kimpel, Tiffany Moore, Amanda Newsom and Paige Sloan

Other LFHS honorees include Nathan Puthoff for tenor trombone solo, Flint Weed for baritone horn solo, and tubo solo performers Trent Brough, Jillan Cook, and Jarrod Cooley.

**First Division snare drum went** to Chris Etheredge, Jeff Garcia, Marcus Jackson, Marc Matthews, Caleb Smith and Ronnie Yorkman. First Division for keyboard percussion went to Richard Rodelo, and multiple percussion solo top ratings were earned by Ross Moshell and Jesse Palin.

**Earning a First Division rating** for percussion ensemble performance were Justin Builta, Chris Etheredge, Jeff Garcia, Marcus Jackson, Marc Matthews, Ross Moshell, Nick Pagano, Jesse Palin, Richard Rodelo, Robbie Showalter, Caleb Smith, Kendall Thompson and Ronnie Yorkman.

In addition to the First Division ratings, LFHS had 28 Second Division solo performances and one Second Division ensemble. LHS had 46 Second Division solos and

#### **EDUCATION POLICY**

The Midland Reporter-Telegram publishes information on upcoming school-related events in the Education in Brief section and announces high school and college academic achievements in the Making the Grade section.

All articles are edited to Associated Press style and deadline for any articles is Monday at noon to be published in the following Sunday education section. Items will be published on a first-come-first-serve basis as space allows.

The Making the Grade section honors local students and former area students attending universities. Head-and-shoulder photographs may be submitted with articles for Making the Grade honorees.

Band and cheerleader competition results are published as they are received. Photos are published of All-State students and cheerleaders winning sweepstakes trophies, or state or national awards.

High school end-of-year award night honorees, junior high school honor roll lists, High School National Honor Society inductees, and Duke Talent Identification honorees are provided to the newspaper from local schools. Duke Talent honorees and Who's Who Among American High School students are pub-lished twice a year as a group, and are not published individually.

### Mississippi Bible study case goes to trial

Herdahl says her family no longer has a normal life. They have no friends, they live under bomb threats and receive harassing phone calls.

That's how it has been since she filed a federal lawsuit to end morning devotionals and Bible study classes at the public school her six children attend.

Today, more than two years after she launched her legal battle, the case is finally coming to trial. And she says the harassment has only increased in the weeks lead-ing up to the court date.

"I figured there were going to be me threats, but I had no idea that was going to go this far," Her-ihi said, "My kids have learned

OXFORD, Miss. (AP) - Lisa the hard way of what being the events." minority means."

Herdahl believes her children have a constitutional right not to engage in the student-led prayers over the intercom at the 1,300-stu-dent Ecru school, and should not be taunted for their Lutheran religious beliefs.

The lawsuit, filed against the North Pontotoc School District, has renewed a controversial argu-ment believed to have been settled in 1963 when the U.S. Supreme Court banned prayer in public schools.

dississippi law requires public pools to permit "invocations, dictions and nonsectarian proselytizing student-initiated intary prayer at all school

Herdahl, who moved to Mississippi from Wisconsin, said her children have been ridiculed for choosing not to participate in the devotionals. She said her son Jason was made to wear headphones in his second-grade classroom during the morning rituals. The others have been teased to no end, she said.

"They call them devil worshipers, atheists," Herdahl said.

But officials at the North Pontotoc Attendance Center maintain that the children have never been ridiculed. Superintendent Jerry Horton says there is no basis for the allegations of harassment.

### MIDLAND COLLEGE NEWS

#### **MC Student Honored**

### BRIEFLY

#### Election filing deadline set

March 20 is the deadline for filing for the Midland College Board of Trustees election May 4, 1996.

Positions seven, eight and nine are open. Filing applications are available during the week of spring break, March 11-15, at the switchboard in the MC Scharbauer Student Center between 10 a.m. and 2 p.m.

Applications will be available March 18-20 in room 139 in the Administration Building.

Filing forms should be returned to Doris Muehlbrad, room 139, in the Administration Building by 5 p.m. March 20.

The drawing for Placement of the Ballot will be 10 a.m., March 21 in the Gibson Board Room in the Administration Building.

#### Nonprofit Center offers class

The Nonprofit Center at Midland College will offer "Commitment to Community: Building Better Boards," a course designed to provide prospective and current nonprofit board members with essential information. The class will be 7-9:30 p.m., Thursday, March 21. Course fee is \$29.

Also offered will be "Concepts of Creative Planning," 7-9:30 p.m., Thursday, March 28. This session is designed to help demystify the various planning processes used by nonprofits. Learn how to develop and implement a "plan" that meets the specific needs of your organization. Course fee is \$29. For information about these

classes, call 685-6479.

#### Washington interim trip set

For students who want to travel and earn Government or History credit at the same time, Midland College is offering a trip to Washington, D.C. during the Spring Interim, May 13-30. The cost of the trip is \$655 in addition to normal tuition and fees for the class. The courses are open to courses help users learn new software

Computer

Whether you are keeping up with the latest versions of computer software or learning programs for a new computer, Midland College's Continuing Education department still has openings in a number of computer courses beginning March 20. "MS Excel" will be 11 a.m.-12:50 p.m.,

"MS Excel" will be 11 a.m.-12:50 p.m., Mondays and Wednesdays, March 20-April 24. Course fee is \$74.

"MS Works" will be 7:30-9:20 p.m., Mondays and Wednesdays, March 20-April 24. Course fee is \$74.

"Quicken" will be 1-2:50 p.m., Mondays and Wednesdays, March 20-April 24. Course fee is \$74. "Quicken" will be 7:30-9:20 p.m., Mondays and Wednesdays, March 20-April 24.

Course fee is \$74. "Wordperfect 6.0" will be 7:30-9:20 p.m., Mondays and Wednesdays, March 20-April

24. Course fee is \$74. "MS Excel II" will be 5:30-7:20 p.m., Tues-

days and Thursdays, March 21-April 25. Course fee is \$74. "MS Word" will be 9-10:50 a.m., Tuesdays

and Thursdays, March 21-April 25. Course fee is \$74.

"Computer and You for Grandparents" will be 9-10:50 a.m. Mondays and Wednesdays, March 20-April 24. Course fee is \$74.

"Windows 95" will be 3:30-5:20 p.m. Mondays and Wednesdays, March 20-April 24.

Course fee is \$74. For more information, call 685-4518

#### MC sets spring break; switchboard to remain open

Midland College will be closed March 11-15 for spring break. For persons wishing to file for the upcoming board of trustees election or for persons wishing to pick up information about Midland College, the switchboard in the MC Scharbauer Student Center will be open 10 a.m.-2 p.m. Monday-Friday. Classes will resume March 18.

Health Sciences Continuing Education coordinator Beverly Prichard (left), and MC student Josie Whaley show off the check Whaley received after being awarded a "Case Management Excellence Award."

## Class helps case manager serve community, clients

Commitment to community and clients recently paid off for San Angelo resident and MC student Josie Whaley.

Whaley received a cash award of \$1,000 and recognition as one of two case workers in Texas to receive the "Case Management Excellence Award" from the Texas Department of Housing and Community Affairs in Austin at its state conference in January.

As a case manager for the St. Vincent de Paul Society in San Angelo, Whaley commutes to Midland once a week from San Angelo to attend an MC Health Science Continuing Education course, "Case Management." Whaley previously served as Coordinator for the Comprehensive Energy Assistance Program for the San Angelo and Tom Green County Health Department.

Certification through the 60-hour course demonstrates the student has acquired the necessary knowledge, skills and perspectives through an established curriculum. According to Whaley, this class gives case managers information and training that will help

toring of community-based services provided to citizens. According to Whaley, the goal of case managers is to help families become self-sufficient.

"We make use of the MC course because it is designed to assist case managers in providing the most appropriate resources to their clients," she said.

The goal of the Continuing Education Health Sciences program is to become a resource for health care professionals to obtain professional development for licensure and certification renewal and to provide entry level allied health care training, according to program coordinator Beverly Prichard.

"MC is excited about offering new programming such as this that impacts the lives of the student as well as the lives of their clients," she said.

"As with the case of Ms. Whaley, taking the case management course enables her to better serve her community through important information and upto-date training."

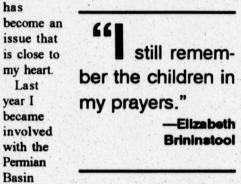

Pritchard also noted the health sciences continuing education courses serve participants from all over the region and their attendance proves their commitment to their clients and community

### Volunteer serves children, women who are victims of domestic violence

Page 3E

■ The following is an excerpt from one of the winning entries in the Abell-Hanger Essay contest about the value of volunteer work for MC students.

One of the few positive effects of the much publicized trial of O.J. Simpson has been a heightened awareness of the tragedy of domestic violence. This tragedy

Center for Battered Women and their Children through the Future Homemakers of America Organization at my high school. I went through a training session to learn about domestic violence, how the Center operates and what my duties as a volunteer would be. Since February I have visited the Center once or twice a month to help the children who are staying there with their homework.

Other than the O.J. Simpson case, one might wonder why I chose to do my Abell-Hanger community service hours at a battered women's shelter. One reason is personal knowledge of such a situation.

The children and families at the Center come and go so that I only get to see each child about three times. I still remember the children in my prayers and think about them when I look at the pictures they drew for me that are hanging in my room.

any college student. The deadline for registration is March 29.

The trip will cover course requirements for Government 2302 or 2304. For more information, call 685-4739 or 685-4640.

#### Art exhibit continues

The MC McCormick Gallery features the work of San Angelo artist Peggy Dooley. The show, Now & Then—A Sampling from 1968-1995, will be exhibited through March 20.

The McCormick Gallery hours are 8 a.m.-10 p.m., Monday-Thursday, 8 a.m.-5 p.m., Friday, 9 a.m.-5 p.m. Saturday and 1-5 p.m. Sunday.

This page is produced by Midland College

them to serve their clients more effectively and efficiently.

Case managers such as Whaley are commension coordination and moni-

The city of Midland is blessed to have such a wonderful organization as the Permian Basin Center for Battered Women and their Children. I have been told that their facility is one of the finest in the nation. The staff is always grateful for what the volunteers do and I am grateful to them for giving me the opportunity to meet and possibly help a few of the most precious children I will ever come in contact with.

As a result of the Abell-Hanger scholarship, I have not only received help with my college education, but a chance to make a difference to a child who has had to live through what no person or child should ever have to endure.

Elizabeth Brininstool is a student at Midland College.

The Midland College Department of Continuing Education will offer 6 short courses beginning the week of March 25. "Abs-solution" will be taught by Becky Speight, 9-10 a.m., Mondays, Wednesdays and Fridays, March 25-May 10.

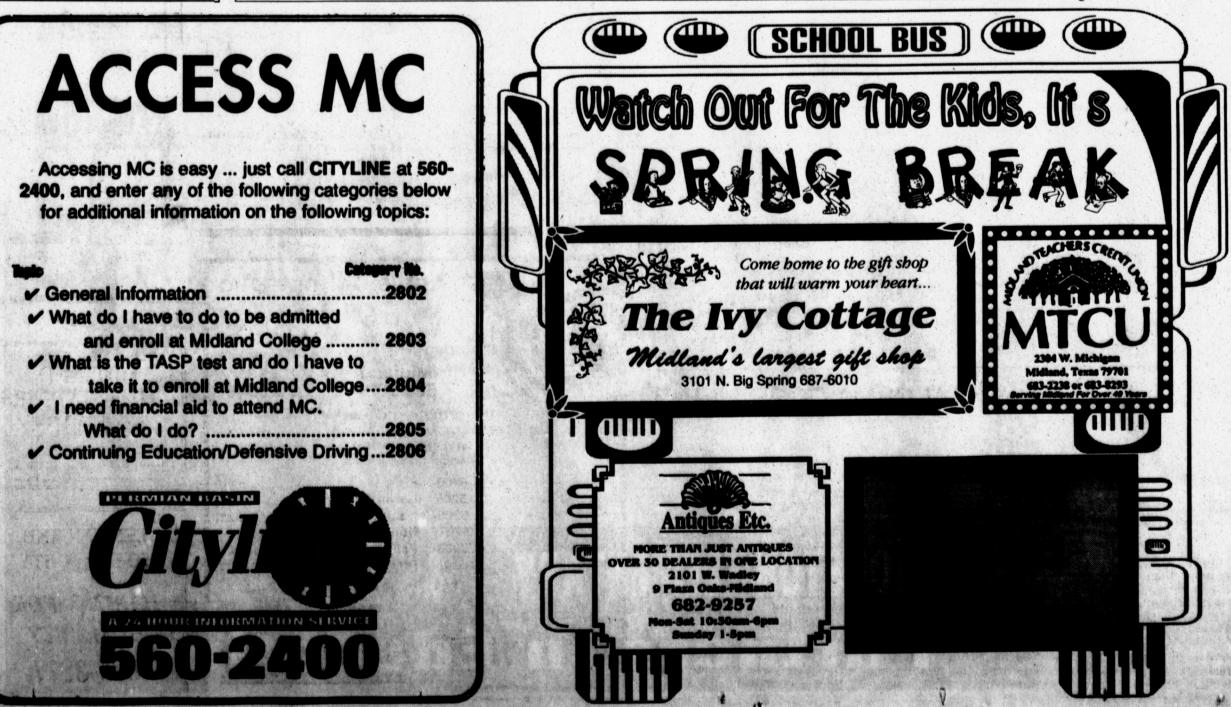

Course fee is \$42. "Nurse Aide Training" will be12-5 p.m.,Monday-Thursday, March 25-April 22. Course fee is \$179. "Woodcarving II" will be taught by John Setzer, 7-9 p.m., Mondays, March 25-April 6. Course fee is \$32.

"TSFSA: Financial Management (IV)" will be taught by Dwayne Cochran, 4:45-8 p.m., Tuesdays and Thursdays, March 28-April 11. Course fee is \$39.

"Concepts of Creative Planning" will be taught by Lauri Barber, 7-9:30 p.m., Thursday, March 28. Course fee is \$29. "Writing for Children" will be taught by Nancy Robinson Masters, 9 a.m.-3:30 p.m., Saturday, March 30. Course fee is \$32.

For information about Defensive Driving courses, call 685-4518 or 560-2400, ext. 2806.

For information about Continuing Education courses, call 685-4518.

### School shootings bring saftey to forefront of most parent's minds

#### **Peter Applebome N.Y. Times Service**

Two years after school districts around the nation scrambled to adopt tough provisions to keep guns out of schools, fatal shootings of students and teachers are again on the rise, renewing concerns about crime and violence in schools.

In the last month alone, a teenager was shot to death on a school bus in St. Louis on Thursday, a teacher in Los Angeles was critically wounded in the head by a stray bullet the week before, and a teacher and two students were shot and killed on Feb. 3 in a juniorhigh classroom in Moses Lake, Wash., by a student with a highpowered rifle.

The violence comes at a time when safety has become an overriding concern about the nation's schools and when President Clinton is advocating the use of school

schools and the nation.

"Crime and violence is down across the country," he said, "but what's up is youth violence, and what we haven't come to grips with is the core of kids who are becoming more violent, more armed and unaffected by the norms of society. It's a real cancer, and we're not addressing it.

The current school year has

Walker

been marked by a stream of chilling instances of violence.

On Thursday, a teen-ager in St. Louis waiting at a school bus stop with a .38 caliber semiautomatic pistol shot and killed a pregnant 15-year-old girl and wounded the bus driver. Police say they do not know the motive and are looking for the gunman.

teacher at a school in South-Central Los Angeles was hit in the head by a stray bullet from a gang dispute outside the building as he and his students studied in the school cafeteria. The teacher, 30-year-old Alfredo Perez, is still in critical condition.

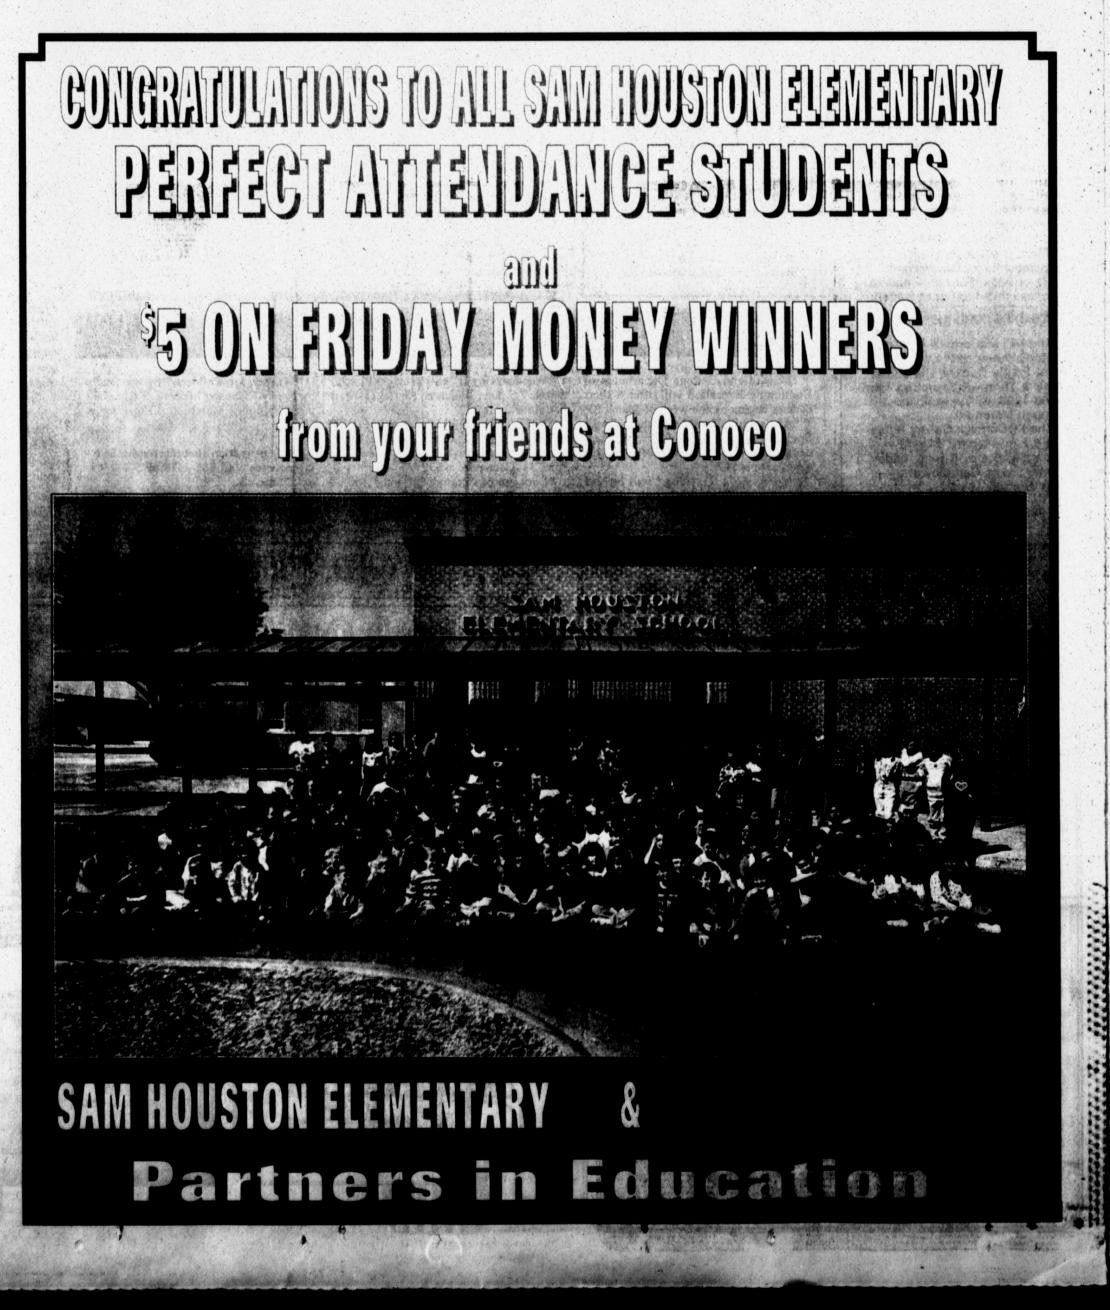

- On Feb. 3, a 14-year-old honors student armed with a high-pow-

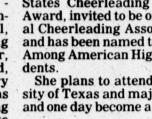

walked into a math classroom in Washington state and opened fire, killing a teacher and two students and critically wounding a 13-yearold girl.

In November, a teen-ager in Lynville, Tenn., who was reported to be angry about a traffic accident, opened fire with a rifle in a crowded school hallway, killing a - On Feb. 22, a fifth-grade ered rifle and two handguns, student and teacher. In October, a

16-year-old high school student in Blackville, S.C., shot two teachers, killing one, and then killed himself.

Teachers' unions and some education experts have said the incidents reflect the need to adopt tough standards that weed out violent, disruptive students and get them out of schools and into specialized centers.

can

tion.

Girls,

Free

leader,

semester.

Rhoades

uniforms "if it means that teenagers will stop killing each other over designer jackets.

A recent national survey by Louis Harris & Associates found that 1 in 8 youths — almost 2 in 5 in high-crime neighborhoods reported having carried a weapon for protection, while 1 in 9 said they had cut class or stayed away from school because of the fear of crime. That figure rose to more than 1 in 3 in high-crime neighborhoods

"We've gone from fistfights to gunfights," said Ronald Stephens, executive director of the National School Safety Center in Westlake Village, Calif., "and it's changed the landscape of the American school. I can't say for sure why the number of incidents is up this year over last year, but there are so many guns out there a lot of them are still finding their way into the schools."

The safety center said 26 violent deaths had already been reported at schools this year, while there were 20 in all the 1994-95 school year.

Those 20 deaths that year represented a decrease from 46 the year before and came after the passage of the Federal Gun-Free School Zone Act in 1994, which forced districts to come up with strict anti-gun policies like suspending for a year students who took guns to school as a condition for receiving federal education monev

The law was eventually over-turned by the Supreme Court as an undue federal intrusion into local matters, but nearly all the local policies remain in effect.

Of the 147 violent deaths in schools tracked by the school safe-ty center since 1992, 119 have been from guns. Officials said that since there was no official reporting of violent deaths in schools, the numbers were almost certainly conservative. They said about three million felony or misdemeanor-level crimes were committed at schools each year.

Experts say that the vast majority of schools remain safe and that school violence remains a problem primarily in neighborhoods where violence is endemic. There are 44 million students in the nation's public and private schools.

"Schools aren't shooting gal-leries," said Frank Newman, pres-ident of the Education Commission of the States. "The chances of anyone getting shot, or particu-larly anyone in a suburban school

district, are very, very small." But, Newman said, violence and particularly a small group of dis-affected, habitually violent stu-dents, remain one of the most pressing problems facing both the

### These critters are...

# The at's eow

#### Text by Linda Anderson

They're moody, unpredictable, opinionated and occasionally rude. They don't always come when they're called, sleep all day and want to play all night. They can be finicky, fussy and aloof.

So why does anybody want to live with a cat? Cat fanciers say it's because they also can be loving, playful and comforting companions there's just something soothing about holding a purring cat on your lap.

They adapt well to life in smaller homes such as apartments; they can be perfectly happy either inside or outside, and best of all, many cat lovers say, they use the litter box to dispose of their personal business.

places where they know they will be fed.

Thus began a partnership, so to speak, between people and cats that continues to this day. While most people don't exactly worship cats anymore, feline fanciers can be fiercely loyal to their favorite animal, and especially to the one who lives with them.

Stacy Aylor and her daughter, Brooke, live with a cat named Sophie. "I love my cat," Ms.

Cats have fascinated people for

millenniums. Although many dog fanciers - and some cat lovers as well - may question the domesticity of even today's feline friends, the "taming" of cats can be traced back at least as far as ancient Egypt, where eventually cats became so useful and necessary that they were even worshiped as gods.

According to R. Roger Breton and Nancy J. Creek, writing in "The Cat In History," (www.best.com/~sirlou/cathistory.html) the domestication process of cats began about 5,000 years ago in Upper Egypt (now the Sudan) when people started growing and harvesting grain. Cats started showing up to harvest the mice and other rodents that were attracted to the grain.

Smaller house cats, like their larger relatives in the wild, are natural hunters. Therefore, they started hanging around the farms to catch and eat the rodents. Farmers, seeing how the mouse population was dropping, thanks to the felines, started encouraging cats to stay by leaving out food for them. This bit of wisdom learned by the ancient Egyptian farmers is still true today: Cats like to hang around

Aylor said, "I really do." Sophie is about 2 years old and has lived with her family since she was a kitten. She has proven to be easy to get along with - kind of a low-key house mate, Ms. Aylor said. "Cats mind their own business. They want to be petted and then go on and do their thing."

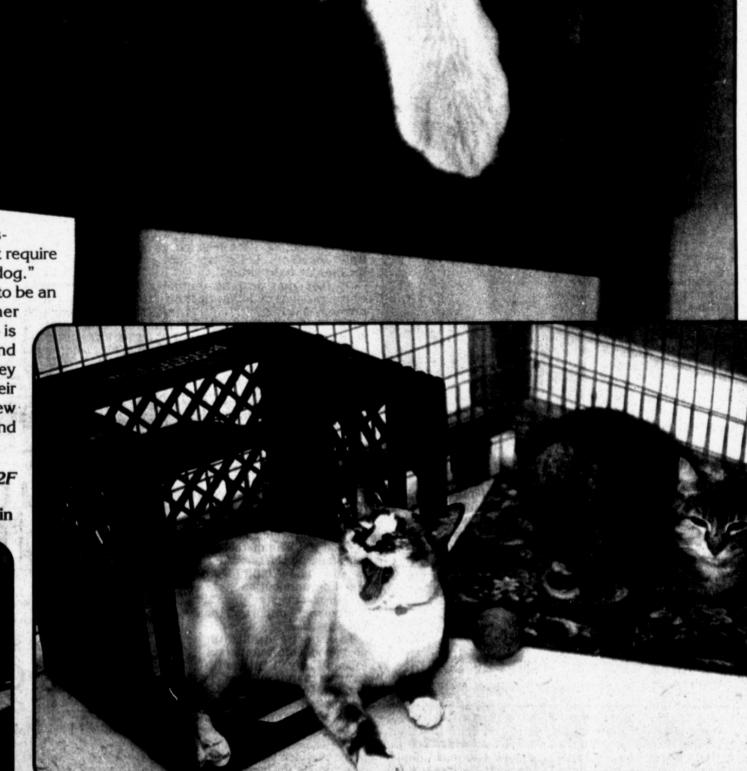

Sophie requires minimal care. During the summer she lives both inside and outside the house, Ms. Aylor said.

In the winter, Sophie "doesn't step outside. She doesn't require as much attention as my dog."

Brooke considers Sophie to be an important playmate, her mother said. In fact, Sophie is a member of the family. And when she had kittens and they grew old enough to leave their mother and go live in new homes, "I cried and cried and cried," Ms. Aylor said.

Please see CATS/2F

Design by Elizabeth Edwin

Cats are creatures with personalities that comfort and amuse human beings. They have long been regarded as self-reliant pets- being able to clean, feed and care for themselves. Not really needed human compainions to existy, felines often are considered to have an attitude, being petting only when they want to be petted. They are referred to as finicky, eating only what and when they want to. But the soft purr of a cat on a lap or the soft rub on a pant leg are reason enough for many people to claim to be "Cat Lovers."

### HAVE YOU HEARD? (From 1F)

# Leap Day marks third anniversary party for Murray's Delicatessen

#### By Marilyn McKnight-Harrison

And how did you spend this ear's extra day, Feb. 29? More than 600 patrons passed through the doors of Murray's Deli-

catessen that evening to join in the deli's Leap Year par-ty to mark its "third anniversary The guests

were treated to an array of delicacies, including escargot, artichoke heart

rumaki, barbecue brisket and sausage, mushroom and leek strudel, coconut fried shrimp, salmon mousse, strawberry butter cream cake and a "to-die-for" chocolate Concorde cake.

McKnight-

Harrison

The party spilled over into the shop's new catering headquarters next door.

Among those seen enjoying the festivities were Patty and Tevis Herd, Karen Thompson, Sandy Landua, Nancy and Chuck Swal-low and Nell Ellis with her houseguest, Pat Sullivan of Houston.

Family and friends pitching in to assist owners Bart and Sharla Hotchkiss with the mega event included their children, Bret and Erin, both of Dallas; Sharla's college friend, Tina Hollingsworth of Houston; former Midlander Heather Logan of Phoenix: Justin Evert of Dallas and Kerry Moorhead of Lubbock.

**JUNE MOTHER-TO-BE** Paige (Mrs. Leo) Grumulaitis of Houston and formerly of Midland was honored here recently with a luncheon and display baby shower at the home of Gail (Mrs. Scott) Matthews:

The other hostesses were Mary Margaret (Mrs. Fred) Byrom, Jan (Mrs. Tom) Cook, Betty (Mrs. Don) Ewan, Penny (Mrs. Jerry) Hudgeons, Gwyn (Mrs. Don) Sparks and Frances (Mrs. Larry) Stapp.

**Decorations** featured antique cradles and high chairs belonging to the hostesses.

Special guests were Paige's mother, Sarilyn (Mrs. Bill) Black and former Midlander Grace (Mrs. Dale) Pryor of Cypress.

**CONGRATULATIONS TO Jes**sica Lee and Raymond Swiney, Aida Dunlap and co-hosted by Em (Mrs. Glenn) Carnett and Jo Fouts, and the rehearsal dinner

hosted by the groom at the Plaza Club. The wedding reception was held in the church's Parish Hall. The celebrating is not yet over. Jessica will be honored at another bridal shower on St. Patrick's Day

at the home of Anita (Mrs. Wilbert) Lintzen. The co-hostesses will be Karen (Mrs. Bobby) Evans, Theresa (Mrs. Ray) Poage and Joyce Brickey.

SUSAN (MRS. DEXTER) HAR-MON of Midland and Beth (Mrs. Mike) Black of Stanton traveled to Dallas last weekend for the 60th annual state convention of Alpha Delta Pi sorority.

Susan was elected to a two-year term as state recording secretary. Beth is currently serving in a national office as an alumnae state director.

Although they spent most of the weekend in meetings, the women enjoyed Sunday brunch at the ADPi house on the Southern Methodist University campus and a visit to Northpark Mall before enplaning for home.

**BENNING GAU, daughter of** Susan and Bill Gau, recently was initiated into Delta Gamma sorority's founding chapter, Alpha Psi, at the University of Mississippi at Oxford. The initiation was attended by her mother and her grandmother, Mrs. Fred E. Cochran of Wewoka, Okla., who are both DG alumnae

Benning also has been selected as an Ambassador, part of a recruiting team for Ole Miss, and as a Diamond Girl, a cheerleader for the University's baseball team.

WHAT A WAY TO GO? Ronald Meyer recently took part in a Continuing Education program for counselors as part of a Caribbean cruise. Accompanied by his wife, Chita, Ron participated in the seminar on shipboard, and then the couple had the opportunity to enjoy ports of call at St. Croix, St. Kitts, Guadalupe, St. Martin and St. Thomas.

Prior to the cruise, the Meyers flew to San Juan, Puerto Rico, and stayed at the beautiful El San Juan Hotel and Casino. They spent a day in the town of Mayaguez, where Chita was born, and in their drive there, saw so much of the beauty of the West Indies island. It was a wonderful winter break for the couple, who left Midland during one of its cold spells (five degrees below zero with the wing chill factor) and arrived in San Juan to encounter 86 degree temperatures.

#### MIDLAND REPORTER-TELEGRAM, SUNDAY, MARCH 10, 1996

### CATS: Felines are suitable pets for some

Living with a cat has made Ms. Aylor and her daughter into clas-sic cat lovers. "If I could have another cat, I would," Ms. Aylor said.

Ms. Aylor isn't alone in this wish - many people feel that some-times one isn't enough. People who live with cats tend to live with more than one, said Dr. Bobby Boyd of Tall City Veterinary Hospital, who estimated that about 40 percent of the pet owners who bring their animals to his clinic have cats. "The majority of people have more than one (cat). It's usually a multiple pet household."

CAT LOVERS are old and young, male and female, married and single, parents and children anyone, in fact, who loves cats is a cat person.

Although cat lovers come from all socioeconomic backgrounds, all races and religions and all educational levels, the one thing they have in common is stories about their pets. The subjects of these stories might be cats who seem to speak in human languages; cats who express their opinions with just a flick of their tails; cats who seem to know who the non-cat person in any crowd is and make a point of rubbing fur all over that person; cats who smile; cats who bring home dead birds, mice or small lizards and place these kills at the feet of their human friends as a gesture of love; cats who always seem to know when their human partners need to be purred to - cats who are loved.

One of the first lessons a new cat owner learns is that cats - even very young ones - are very inde-

pendent and self-reliant. They can feed and shelter themselves if they have to; they really don't need people for anything. If a person chooses to live with a cat, that's one thing; if the cat chooses to live with the person, that's another.

In fact, many cat people say that people don't own cats, cats own people. "They own us, really," said Dr. David Scheele of Medical Veterinary Services, who, in addition to being a veterinarian, is a cat person. He estimates that 45 percent to 50 percent of his patients are cats. And he lives with a couple of cats himself.

He also estimates that over the last six to eight years (the numbers of people living with cats) seems to be increasing. Cats make wonderful pets, Boyd

said, for many reasons. For one, they are smaller than dogs and can "adapt to apartment living and suburbia better than large dogs.

Scheele agrees, adding that cats don't have to be walked, they don't have to be let outside to do their personal business and they can be left alone in the house for a couple of days or a weekend, provided they have food and water and someone to come check on them once in a while until their people return.

CATS ARE "easy to care for," Scheele said. "Easier than a dog." Cats, like dogs, "have their own personalities ... some like attention" more than others do, Boyd said. "They have a reputation of being more aloof (than dogs), but that's the nature of cats.

"Cats are very clean," Scheele said. "They are independent and demand attention on their terms and then they are through for a while.

#### CATS DON'T have to go to the groomer the way dogs do, Boyd said. Cats tend to groom themselves

And as far as veterinary care is concerned, he said, "Cats are excellent patients. They respond to (some) therapies better than dogs do," largely because cats are muscular, light-weight, athletic ani-mals. "They respond to certain types of surgery well.

For cats, veterinarians recommend a checkup and a series of vaccinations at age 6 to 8 weeks, an update at 12 weeks (at which time the kitten will get his or her first rabies vaccination) and then annual checkups and vaccinations.

Cats do have some problems that dogs don't have, including feline leukemia, which is why regular veterinary checkups and vaccinations can help keep the animals in the best physical condition possible

But for regular day-to-day care, cats can be extremely low-main-tenance roommates. "They need to be on a good diet," Scheele said. "Keep them away from dogs and cars, keep their litter box clean (he advises emptying and cleaning it at least twice a week for one cat, and checking the litter box's contents when it is being cleaned to learn what is normal for your cat) ... and make sure they get their annual vaccinations.

"Cats age at least four times as fast as we do," Scheele said, which is why the annual visits to the veterinarian are so important for the animals' health. Healthy cats usually live about 14 years, he added, "although I've seen some go 20 to 21 years."

In any relationship, and certainly for a relationship lasting that long, both parties will expe-rience ups and downs.

No matter how much their love their cats, most people don't appreciate having their furniture clawed or finding cat hair in their food. But, as in any relationship, compromises can be reached to smooth the way, whether by hav-ing the cat surgically de-clawed to save the furniture or encouraging him or her to limit clawing activities to a scratching post, limiting the cat's access to certain rooms in the house or keeping the cat outside. (Scheele doesn't recommend this for cats this live in the city too many cars and dogs, he said.)

**ALTHOUGH veterinarians and** cat owners agree that cats can be wonderful pets, they aren't the best pet for everyone. Some people just aren't as taken with cats as others are. And some people are allergic to cats. "Some people are allergic to dogs too," Boyd pointed out. Certainly people with these kinds of preferences or medical conditions don't need to be living with cats.

But people who do like cats and their numbers are growing find them to be pleasant and entertaining company. They aren't too demanding, are relatively easy to take care of, don't take up too much space and seem to know when their humans need the comfort of a purring cat.

'They are pretty neat animals," said Scheele with a smile.

And that's why people want to live with cats.

Think of marriage as a journey

#### **By Judith Sills**

N.Y. Times News Service

Think of marriage as a journey - a journey meant to last a lifetime. "Packing" for it is like packing for any trip — it's good to know what you'll need.

The basics are easy. You'll need a shared family vision, an economic foundation and a big load of humor

You'll need sexuality, spiritual-ity and morality, though how much of each may vary

And, of course, you'll stuff your bags with as much love as you can carry

But you'll also need a few key items to make both partners strong enough and smart enough to withstand those rocky times that occasionally occur in every marriage.

safely through any storm. ■ The Win-Win Negotiation

Win-win negotiation allows you to state your desires, acknowledge your differences and find a resolution that you both think is fair.

There are several avenues to fair negotiation. You might simply alternate, saying : "I'll pick our vacation spot this year; you can pick it next year.'

Or you could develop a system of 'value added'' in which the person who gives in gets something in return. ("All right, we'll go to the beach if you want to, but I get to choose all the restaurants.")

Negotiating successfully over which movie to rent or who sleeps late on Sundays is practice that will strengthen your marriage for

coping with real crises.\*

hink of marriage as a journey — a journey meant to last a life-time. "Packing" for it is like packing for any trip — it's good to know what you'll need.

The basics are easy. You'll need a shared family vision, an economic foundation and a big load of humor. ... And, of course, as much love as your can carry.

#### every decision.

The key here is not simply the freedom to be individuals, but the ability to exercise that freedom without your partner feeling hurt or angry. With this kind of tolerdifferences that feel important

is the foundation for all the others - the willingness and personal strength to take the high road, even if your partner can't, or won't, ride beside you.

The greatest obstacle to any ance you-have less conflict in your harmony-building attitude or marriage because there are fewer behavior is the feeling that you're contributing more than your share. 'Yes, but he doesn't reciprocate!" is the understandable cry of the woman who respects her husband's individuality, but isn't treated with the same respect. Or of the woman who is careful to communicate tactfully, but whose husband says anything he feels like

who were married recently at St. Nicholas Episcopal Church. After a wedding trip to Ruideso, N.M., they are at home in Midland.

Parents of the couple are Lucy and W.D. "Dub" Lee and Roland Swiney and the late Betty Carol Swiney.

Pre-nuptial festivities included a rice bag party at the home of the bride's mother, a miscellaneous bridal shower given at the home of Telegram.

#### ANNIVERSARIES Barringtons observe golden anniversary

J.E. (Elvis) and Wilma Nell Barrington of Midland were guests of honor at a reception celebrating their 50th wedding anniversary March 9 at Midland Primitive Baptist Church.

Barrington and the former Wilma Nell Cathey were married March 7, 1946, in Midland. They are the parents of James Elvis Barrington Jr., Troy Barrington and Deborah Stephens of Midland; Cathie Barrington of Grand Prairie; and Gary Barrington of Goodlettsville, Tenn. They also have 10 grandchildren.

The couple lived in Midland, New Mexico, Lubbock and Woodsboro before returning to Midland in 1952.

Barrington was pastor of Prim-itive Baptist Church of Midland for 33 years before he retired in 1994.

J.E. (Elvis) and Wilma Nell Barrington

#### Couple observes 25 years together

Kenneth L. and Dene Redmon of Midland celebrated their 25th wedding anniversary with a reception March 9 at Abundant Life Worship Center. Hosts were the couple's children.

Redmon and the former Dene Marley were married March 6, 1971, in Houston. They have two children, Nathan Quinn Redmon of San Marcos and Natalie Brooke Redmon of Midland.

The couple lived in Council Bluffs, Iowa (1971-72); Houston (1973-78 and 1980-84)); Kansas City (1978-80); Wichita, Kan., (1985-86); and Odessa (1986-94), before moving to Midland.

Redmon, a former school principal, is pastor of Abundant Life Wor-ship Center. He served in the National Guard until October 1995.

### Sorority presents Ebony Fashion Fair benefit

#### Staff Reports

LUBBOCK — The 38th Annual Ebony Fashion Fair will be in Lub-bock 8 p.m. March 26 at the Lubbock Memorial Civic Center Theater. This famed traveling fashion show is produced by Ebony Magazine and sponsored by Delta Sigma Theta Sorority, Lubbock Alumnae Chapter - Southwest Region, for the benefit of the Luella Scott Memorial Scholarship Fund.

More than 200 exquisite garments from the exclusive collections of Bill Blass, Christian Dior, Emanual Ungaro, Nina Ricci and others will be featured. There are 10 female and two male models who show everything from swim wear to After 5 and bridal fashions. They also per-form dance routines and skits, all to the background music of a live band led by Broadway pianist Theodis Rodgers. For more information or tickets, call (806) 794-126.

Knowing just that much allows you to pack wisely in two ways: You'll be able to take along both the behaviors your marriage needs to survive conflict, and the attitudes it needs to flourish.

YOUR "TO DO" LIST When conflicts arise, we're apt

to become highly emotional at the time when we need to be rational. Smart packing for marriage means including three behaviors that make dealing with any conflict easier.

■ The Partnership Meeting

First, make it your habit to hold regular problem-solving sessions, at a preset time and place. The point is for you and your husband to be together to discuss your family business without the children, the television or other distractions.

Topics may include anything. Sometimes these talks simply clear the emotional air: "I hate coming home and not having you here." Sometimes they lead to decision-making: "We need more time together. Let's try that Wednesday baby sitter.

Or they may just be mutual worry sessions or follow-ups to a previous meeting.

These routine sessions underscore the fact that you two are running a highly complicated, interdependent enterprise, a reality that's easily overlooked in the

rush of daily events. You have a great deal of mutual business to accomplish, and regular meetings of the partnership not only help you deal with it more efficiently, but also help you to feel your partnership more keenly.

Even when you both feel angry, if you have an established routine for discussing problems, you'll know when, where and how to do it. Soon you'll again feel the bonds you share and be reminded of how much you have built together.

Communication Style

How you discuss marital issues is often more important than what vou sav.

To begin, try to utilize the basics of "good communication." For example, say "I" instead of "you" to avoid blaming ("I worry if you don't call when you'll be late," not "You're so irresponsible"). Wait to talk until your emotions

have cooled by having an agreed-upon "timeout" signal, a neutral place to which you can retreat, or a technique for hearing each other out.

Finally, establish clear physical and verbal limits (no physical or verbal abuse, ever; no angry threats of divorce, no destruction

of property). Practicing these habits during the squalls will prepare you to sail

**YOUR "TO BE" LIST** 

What we do in marriage is often less momentous than the spirit with which we do it. Spirit describes the set of attitudes and beliefs we bring to our marriage, to our entire lives.

It is this elusive difference in spirit that allows one couple to confront a crisis with good-humored resilience, while another becomes fearful or angry. The attitudes that create emo-

tional strength are really quite simple to incorporate into your thinking.

Yours, Mine and Ours

This attitude achieves a positive balance among the three principal players in any marriage - me, you and us - and expresses powerful respect for individual boundaries

Think of marriage as overlap-ping circles. They don't obliterate your individuality, but they do present areas in which you may have to bend a bit to accommodate marriage. They also show areas in which your individual "self" should be left alone.

The question of where to set these boundaries is a tricky one.

Some couples insist on conformity. Others can tolerate a good deal of difference. She does not have to admire his politics, for instance, and he doesn't have to enjoy her friends; neither of them must always approve of the other's

You'll also avoid the "taking-forgranted" trap, because it's harder to see vour partner as just "my wife" or "husband" when you haven't been required to merge

into one undifferentiated blob. Lover and Friend

A friendship between you two is essential.

When you were little, did you have a friend who helped you hide the lima beans so you didn't have to eat them? I bet she didn't tell you they were good for you, either. She was your friend, so she helped you get what you wanted.

Parents, on the other hand, must decide if what you want is good for you. Often we behave less like our husband's friend and more like his parent.

Being a friend to your lover means treating him with a maximum of respect and acceptance and a minimum of judgment, criticism or control. It means having a noninterference clause tucked into your bag, which says that neither of you has the right to control or even to comment — on every

aspect of the other person's life. This isn't easy, because a partner's wants - more than any other friend's - are apt to interfere with yours. But try to remind yourself that the spirit of friendship strengthens a marriage.

I'aking the High Road Finally, there's an attitude that lance writer.

saying if he's angry. These feelings of being shortchanged are understandable, but they rarely lead us in a direction we want to go

'Why shouldn't I call him names when he gets away with it?' Because the satisfaction of retaliation doesn't leave you with anything of value.

Why be his friend if he won't be mine?" If he won't be your friend, you have a problem that being his enemy won't solve.

The essence of the spirit you'll want to carry with you through marriage is being willing to risk the high road. That spirit is at the heart of every happy marriage and of every peaceful individual.

True, the high road is the toughest one because we often travel it alone. But it is the path that leads to love, and that's where you want your marriage to end up, through all the years.

Judith Sills is a clinical psychologist and Philadelphia-based free-

### AROUND TOWN

Hospice of Midland is offering free volunteer training, which is described as a course in living and making the most of life.

Course sessions will be April 2, 4, 9, 11, 16, 18, 23 and 25 at Hospice House, 911 W. Texas St. Morning classes will be 9 a.m.-noon, and evening classes (which repeat the morning classes) will be 7-10 p.m.

Parking will be available at the curb and in the lot east of Hospice House. Persons taking the course are not obligated to become Hospice volunteers. For information or to register call 682-2855...

.MIDLAND WOMAN'S Club will host a Super Play Day fund raiser March 11 at the clubhouse in Hogan Park. Canasta and bridge will begin 9:30 a.m. with luncheon to follow at 11:30 a.m. Tickets are \$10. For reservations call 694-5014 or 697-0980, or contact members of the executive board...

..BLACK IMAGE will host a Spring Break party 9 p.m. March 15 at 1703 E. Wall in Midland. All high school students with student identification are invited to attend Admission will be \$2 per person. For more information write Black Image, 4303 Crenshaw, Midland, Texas 79705..

...FRESH START, a stop smoking program of the American Cancer Society, has classes planned for 7-8 p.m. March 19, 21, 26 and 28; and April 18, 23, 25 and 30 at the ACS office at 2304 W. Wadley. To register or for more information call 683-6374 ...

... MIDLAND FEDERATION of Black Women's Clubs will host its annual Debutante Presentation 8 p.m. April 6 at Midland Center. Tickets are \$10 per person and may be purchased from any club member.

Luncheon for debs, their families and escorts will be March 31. Talent show will be 3 p.m. March 31 ....

...MIDLAND PANHELLENIC Association will host a Sorority Information and Registration Party for all graduating high school senior girls and their parents 2 p.m. March 24 at the Junior League of Midland Inc. headquarters, 902 W. Dengar. The Gazebo will present a fashion show featuring appropriate apparel for rush parties. Each graduating high school student should bring 13 completed rush information forms. For more information and to RSVP, call 687-2120 by

Men-only group offers cancer survivors safe place to talk NEWTON, Mass. - Mark Babich was standing

on a tennis court two years ago, poised to hit a serve, when he collapsed and went into convulsions. Rushed to a hospital, the 38-year-old psycho-therapist was thought to have suffered a heart attack. Doctors discovered a malignant brain tumor instead.

Since then, Babich has been through surgery, radiation and chemotherapy, changed his professional schedule, home and lifestyle - all in an effort to, as he puts it, "make a future again." He has also made a switch in the cancer-support group he goes to, from one made up primarily of women to a group for men only, organized by the Wellness Community of Greater Boston. "One value in a men's group is the relationship to death and dying is different," says Babich, speaking at a pre-meeting session. "In the mixed groups, there was this flood of emotion and tearfulness, of feeling helpless and hopeless. In here, those feelings get talked about."

By Joseph P. Kahn N.Y. Times News Service

Manny Hammelberg, 56, a businessman, was diagnosed with prostate cancer in 1987. Radiation treatment put the disease in remission. Five years later it flared up again, forcing Hammelberg to go through a fresh round of treatment that has left him hopeful yet uncertain of the future.

ONE ISSUE he wrestles with constantly. Hammelberg says, is feeling responsible for his illness and its recurrence. Even his grown children tiptoe around the subject, as if any admission of vulnerability on his part could be construed as a gesture of surrender or culpability. "There's this notion that being a man, we shouldn't get sick," he says. "I must be a weakling, you know, if I allow myself to get cancer. It's part of the macho-ism that's out there. Arnold Schwarzenegger doesn't get cancer.'

Hammelberg makes use of several psychosocial services offered to cancer patients and their families by the Wellness Community. Like Babich, though, Hammelberg finds a quality in the men-only group — a relaxed and supportive camaraderie, a willingness to joke about sensitive issues like sexual dysfunction and incontinence — that he has not found elsewhere. "People ask, why torture yourself? Why be around sick people like that? And the answer is, because I can say anything I want to with these guys and not have to pretend," he says. "Nobody is going to give me a list of guys who've had prostate cancer and who are healthy and running around."

He laughs. "They never give you a list of the ones who've died, you'll notice."

The group, formally titled "Cancer: A Man's Perspective," began meeting last May. Its leader is Tim Cummings, a 45-year-old social worker at New England Medical Center who is also a survivor, having battled testicular cancer 10 years ago. He was recruited by Wellness Community program director Pamela Willsey, who had been hearing from several clients (including Babich) about the need for a forum where participants could literally talk man-

to-man. A group whose emphasis, Willsey observes, is on coping and confiding, not new technologies and treatment alternatives. "We have one group just for prostate cancer, but it's more educational," he says. "This one fills a unique gap. We started with outside speakers, but the men didn't want them. They

wanted to talk to each other.' FREE OF CHARGE and open to anyone, the monthly sessions typically draw a dozen participants for two hours of freewheeling, and sometimes painfully candid, discussion. One night the focus may be on how cancer affects family relationships, another night on the disease's impact on job, finances and self-esteem. Cummings is careful not to set an agenda. He sees himself as group facilitator, not its teacher or spiritual guide. "The power comes from the community, not from me," he says. "They're the experts. I listen and help out."

A natural shorthand emerges, Cummings adds, when men talk to one another without women around. "There are different words you can use, different things you don't have to explain. Men are programmed to be in charge, for instance, but this disase robs you of control. They get at issues like that."

So far, says Cummings, no one attending the group has died from cancer, although one did pass away after a heart attack. "No doubt if that happens, the group will grieve the loss just like an individual would," he says. "They do get to know each other pretty intimately.'

Other regulars talk about the bonding process that keeps them coming back month after month. Jordan Fieldman, 30, a veteran of several support groups, volunteers that his previous experience with mixed groups was both uplifting and alienating.

'It was nice to have the support, but I still felt different," says Fieldman, who like Babich has been through brain cancer and survived what was once a grim prognosis. "The closer someone's experience is to yours, the less alone you feel. Most of the women in the groups were either much older than I am or had breast cancer.

A CHALLENGE for any cancer patient, male or female, Fieldman offers, is having to seem upbeat around friends and relatives. All the time.

'People won't let you have negative feelings, even when they support you," Fieldman says, his soft voice rising sharply. "For crying out loud, I'm a human being. I'm going to have negative feelings. I'm allowed to. And it's important to express them, which is why this group is so wonderful. You can come here and not have everyone else jump into their own fear about you having negative feelings.

"Somehow," Cummings concludes, "men feel from an early age they're responsible for making sure everything is planned for. So we think about death differently. That the insurance is in order, for example. We think about death pragmatically, but the emotion that gets dragged in is something else."

"I don't think we deal with that," says Fieldman, speaking for many in the room. "Except maybe in here.

### DEAR ABBY Sex, violence, profanity as old as human nature

. . . . .

#### By Abigail Van Buren

**DEAR ABBY:** I would like to address the contention that books, and the

movies are corrupting today's citizens --especially its youth. If that is so, please tell me what" books Cain read

before he murdered his brother Abel. What soap opera did Lot's two

daughters watch that influenced them to get their father drunk and commit incest? And what vile movie prompted the woman at the well to take up a life of dissolution?

The media reflect human mores and values, not influence them. When I was a boy of 8 or 9, I knew all the "facts of life," which were given to me crudely, by the "big boys" of the village of perhaps 200 souls, who were churchgoing people almost to a man. There were no daily newspapers, movies only occasionally, no TV, and only one radio in the village.

So where did we hear of sex, violence and profanity? From our peers! It has always been thus. The media do not set the trends they follow them.

If no one bought tobacco, apples or potatoes, no farmer would raise them. If there were no demand for smut, no one would go to the expense of providing it, because without profit, there is no incentive

Much of America has come to expect or demand sex, violence and profanity; thus we have it. Trendsetters are usually friends among us. - HOWARD CHIL-MURFREESBORO, DRESS, TENN.

DEAR MR. CHILDRESS: There is no denying the truth in your observations. Thank you for writing - I appreciate your common sense. You've been contributing to this column almost as long as I have been writing it. Take good care of yourself,

Howard. I need you.

**DEAR ABBY:** When I read the letter in your column from Polly Schrock, asking about couples who had lived 100 years or longer, I had to write.

PAGE 3F

Our friends and neighbors, who lived one mile from us for years, lived longer than that.

W.A. Fullingim lived to be 110 years old. He was born July 7, 1855, in Mount Vernon, Texas, and died Aug. 6, 1965, in Lawton, Okla. On his 100th birthday, I baked him a chiffon cake, and I subsequently baked him 11 more until his death.

His wife, Nancy Ellen Fullingim, lived to be 103 years old. She was born Nov. 1, 1860, in Decatur, Texas, and died on April 25, 1964. (I made four cakes for her, starting when she was 100 years old.)

The Fullingims had celebrated their 84th wedding anniversary in August 1963. They lived on their ranch in western Comanche County from 1917 until their deaths. They are buried in Lawton. They had three children and three grandchildren, but no greatgrandchildren. The immediate family is gone. — DELORES CALLEN, HOBART, OKLA.

**DEAR DELORES:** Thank you for the input. I'll be very surprised if anyone can beat the Fullingims' record for longevity or marriage.

**DEAR ABBY:** I am getting on in years and have been widowed since 1986. I have many nice things and wonder if I should give them to my children now, so they can enjoy them. I have little use for these lovely things, and there is more chance of them being stolen if I keep them.

What should I do? - WON-DERING IN MISSOURI

**DEAR WONDERING:** I once answered that question this way: Do your givin

While you're livin' And you'll be knowin' Where it's goin'.

MIDLAND REPORTER-TELEGRAM, SUNDAY, MARCH 10, 1996

AP Las

Cook Jim Wargo puts together a Primanti's sandwich serves about 700 of the sandwiches, which contain at Primanti's restaurant in Pittsburgh. The restaurant mostly cole slaw and french fries, on a "slow day."

### Western Pennsylvania may be country's capital of weirdness

#### By Alyssa Gabbay

PITTSBURGH (AP) - Forget the women who were taken to court for praying too loudly. Forget the hunters who hire strippers for their hunting camps after a hard day stalking Bambi. Forget the fish-filled lake where ducks waddle across on the backs of their finny friends.

Forget them all, and western Pennsylvania is still pretty weird.

This is a region, after all, where you can travel from Moon to Mars in less than half an hour, eat sandwiches stuffed with french fries and watch grown men consult a rodent about the weather.

"I think we have a very high intrinsic oddness quotient," said Denny Bonavita, managing editor of the Courier-Express in DuBois, about 80 miles northeast of Pittsburgh. "We're kind of a perverse people. We're backward.

Apart from towns named for celestial bodies or personalities -Apollo also orbits near Pittsburgh, along with Moon and Mars western Pennsylvania boasts what may be the smallest town in the world with the longest name: Slovenska Narodna Podporna Jednota, population 12. Panic is close to Desire, as it should be (both are in Jefferson County), though Plum and Nectarine are miles apart. On a smaller scale, Pittsburgh's road system, a crazy-quilt of unexpected twists and turns, and its residents' unusual driving habits are often a source of amusement, if not bewilderment, for newcomers. Possibly the biggest idiosyncrasy is the "Pittsburgh left," the tradition of letting the first car turn left in front of oncoming-traffic after a traffic light turns green. Once very common, the "Pittsburgh left" is now only sporadi-cally practiced, which makes it even more confusing for newcomers. "You don't know whether to go or to wait," said Ellsworth H. Brown, president of The Carnegie, a conglomeration of museums in the city. He moved to Pittsburgh from Chicago in 1993. "I'm always fearful of an accident, so I just wait. Drivers also drive at or below the speed limit and frequently let others cut in - a bit disconcerting for outsiders, particularly those

As for the source of the region's peculiarities, some speculate it's a function of geography. Mountainous and heavily rural, western Pennsylvania is mostly made up of small communities that sprang up in river valleys and often remained — and remain — relatively isolated.

from less well-mannered regions. No one ever honks at you in Pittsburgh or flips the finger at you," said a disbelieving Dawn Keezer, director of the Pittsburgh Film Office and a recent transplant from Santa Cruz, Calif.

That's not the only thing she's found strange about the city, which she nevertheless likes a lot. "The food here is very bizarre," said Keezer.

Pittsburghers love to feast on pierogies, dumplings stuffed with mashed potatoes and cheese and sauteed in onions. (Originally sold by Eastern Orthodox churches for congregants to eat on meatless Fridays, they're now available in the frozen food section of supermarkets.) Mixing french fries with steak and other meats is another common practice. To make steak salad, a popular dish, chefs pile chopped steak on a bed of lettuce and top the whole thing with french fries.

the sense that you do have words which seem to have no basis in what they describe," said Ken Abel, co-author of "The Tongue-In-Cheek Guide To Pittsburgh.

Western Pennsylvanians' attitudes toward animals are a separate category of weirdness. On one hand, animals are often treated with respect that seems beyond their due. Last month, in Punxsutawney, a group of top-hatted, tuxedoed men asked a woodchuck named "Phil" to tell them when spring would arrive.

But in an area where the first day of deer hunting is a school holiday, it's not surprising that animals are frequently the objects of violence. The town of Dubois took heat for exterminating a rash of skunks by drowning them, and little Ridgway made headlines for shooting stray cats. As for the source of the region's peculiarities, some speculate it's a function of geography. Mountainous and heavily rural, western Pennsylvania is mostly made up of small communities that sprang up in river valleys and often remained - and remain - relatively isolated. Thus their peculiarities were preserved as the rest of the country melted into homogeneity. 'Most of us live either in a valley or a hillside, so we think the world begins and ends at the top of that next hill," said the Courier-Express's Bonavita. "In other words, to hell with what's on the other side of that mountain.'

# Bargain hunters head for The Hill Country's Fredericksburg

#### **By Toni Stroud** N.Y. Times News Service

FREDERICKSBURG — The biggest difference between Fredericksburg's Main Street and the Las Vegas Strip is the nature of the wagers.

OK, so there's not a single slot machine in this heart-of-the-Hill-Country hamlet. But what about the metallic clink-clink-clink at the costume-jewelry counters? No smooth green felt of blackjack tables, it's true; no trance-inducing roulette strategy. Ah, but there's the rough homespun of hand-loomed rugs, the catalepsy of deciding just which among a dozen porcelain pillboxes is the prettiest.

Sure, Fredericksburg's historic, hand-hewn limestone storefronts, many dating to the mid-1800s, seem a lot tamer than the Neon Jungle. There are pecan trees instead of palms, cattle trucks instead of limos. But let me tell you, the same lust of the deal that bankrolls Vegas also has Fredericksburg in its grasp

It's just that here, it all works because of this female-bonding narcotic called shopping, which promises its addicts that the hand-blown decorative bottle of whole pickled carrots in tarragon poppy seed vinegar will be found at "the very next" store. Small bets on bread-and-butter gifts and stocking

stuffers and something to bring back for the men so as not to feel guilty - these pass the time between jackpots.

I mean, this is a town of 7,000 that has more than 200 bed and breakfasts, so that it takes three or four agencies just to handle the reservations. Some of these places go for as much as a hotel room in Vegas \$120 a night is not uncommon.

Of course, none of them is in a pyramid. But what about the one that's inside a brewpub? Or the one above the hamburger joint? Some of the others are in what they call Sunday houses, an institution wholly and uniquely Fredericksburgian. These small, one-room townhouses are part of Fredericksburg's German patrimony, built at the turn of the century so that farm families could stay "at home" whenever they came to town to attend church and (I knew I was right about this) to "buy supplies."

See? This has been a shopper's town for a really long time. Too bad they didn't realize it even earlier, back when Fort Martin Scott, the first of the state's frontier Army posts, was in business. Fredericksburg was such a quiet tour of duty that the enlisted men had little to keep them occupied, soldiering-wise.

If the Army had really been planning ahead, it would have set the troops to doing something truly useful, like making horseshoes into picture frames (they go for \$15.95 apiece at some of the stores), or making up the batches of potpourri that are required stock at every gift shop in town.

But because they had time on their hands, the soldiers would from time to time get into a fracas at one of the bars. Which just goes to show that if you're going to have men hanging around in a girl-trip kind of town, they'll get bored without something to do.

Anticipating such a problem, Fredericksburg cleverly circumvented it with its own type of "Men Are From Mars, Women Are From Venus" solution museums scattered the length of Main Street:

At one end is the Admiral Nimitz Museum and Historical Center. This place is named for the same Nimitz who headed the world's largest sea armada ever. (And if that's not manly, then what is?) He was ues overflowing. Nothing exceeds like success.

#### IF YOU GO:

For information about visiting Fredericksburg, contact Fredericksburg Convention & Visitors Bureau, 106 N. Adams, Fredericksburg, Texas 78624; (210) 997-6523.

Reservation services: Bed & Breakfast of Fredericksburg, (210) 997-4712; Be My Guest, (210) 997-7227; Gastehaus Schmidt Reservation Service, (210) 997-5612; Hill Country Lodging & Reservation Service, (210) 990-8455

Shopping: Porcelain pillboxes at Remember Me, Too: \$7.

Hand-woven 100-percent sheep's wool rugs at Haas Custom Hand Weaving: 8-by-12 feet, \$1,100; 30-by-50 inches, \$115.

Wiener Schnitzel: at Plateau Cafe \$8.95; at The Gallery \$8.95; at Der Lindenbaum \$10.95; at Auslander Bier Garten Restaurant, \$9.85.

born just down Main Street in one of the buildingswith-historical-marker they have so many of here.

Yes, the birthplace is a bed and breakfast, too. Anyway, guys like the museum because part of the building is shaped like a steamboat and because they can lose themselves among the indoor, outdoor, upstairs, out-back, down-the-block exhibits, centerpiece of which is a World War II time line of the war in the Pacific. The Pearl Harbor room, for example, displays a hatchway door from the USS Arizona.

In its own way, the Nimitz Museum is as hard to pull away from as the neighboring shops; that's why they'll let you return, after lunch or a night's sleep, as long as you hang onto your \$3 ticket stub.

At about Main Street's halfway point is the reconstructed Vereins Kirche, which houses local memorabilia; \$1 if you want to have a look. Its octagonal, or "coffee mill" design has become the symbol of Fredericksburg; the original version was a church house that used to stand right in the middle of the street

At the other end is the Pioneer Museum, part of it located in a house that's on the National Register of Historic Places. The \$3 admission to the complex includes a one-room schoolhouse, displays of horsedrawn fire engines, a two-room log cabin and a Sunday house. In the main building are displayed many items brought by German immigrants from the old country almost 150 years ago: beer steins, jam jars, dolls and elaborate tobacco pipes figure among the collections

What the museums and the shops have in common, of course, are their hours of operation - count on most of them being open from 10 a.m. to 5:30 p.m. Which leaves the nights wide open for German food. Sure, there are plenty of other things to see around here: the German Gothic script carved in the older headstones at the town's cemetery; the view from the top of Cross Mountain that takes in the entire valley; the modest tasting rooms of the Hill Country's wineries; the walk through the Herb Farm (where there's another bed and breakfast). Problem is, the dice are loaded in Main Street's favor, its attractions. so prolific that they're harder to walk away from than a craps tournament.

They say a wager is a fool's argument. But that depends on which side of the proposition you're on,

At Primanti Bros., a restaurant in the city's produce district, a sandwich comes with french fries and cole slaw tucked inside with the meat. "As far as I know, the restaurant used to be a trucker stop, and the truckers couldn't hold it all so they slapped it togeth-er," said cook Don Valentine. The language, too, is laden with

colorful peculiarities. Many Pitts-burghers drop the infinitive "to be" from sentence constructions, saying that their cars "need washed" (pronounced "need warshed") and their hairdryers "need fixed." Instead of saying "you," some say "yunz." And

### Azalea Trail set to start this month in Tyler

#### **By Toni Stroud** N.Y. Times News Service

**TYLER** — Whoever said pink was a passive color has been missing the Tyler Azalea Trail. Each spring, the flowering shrubs bloom in well-planned profusion in this East Texas town of 75,000.

An advancing palette of pink, hot-pink, hot orange-pink and salmon-pink azaleas is held in check only by tulips, pansies and creeping phlox of other hues.

This, too, is the time of blooming dogwood, the usual white-blos-somed and also a powder-pink variety

The Tyler people have some experience putting on the Azalea Trail; this year, March 22-April 7, marks the 37th season for the event. The circuit winds through seven miles of residential neighborhoods, centering around Bergfeld Park on Broadway, south of downtown.

The trail is meant to be driven, but it's customary, even encouraged, to park every so often and walk to get a closer look. All the old shade trees in this part of town make for a pleasant stroll even on a warm day.

Children set up lemonade stands along the way, charging between a nickel and 20 cents a cup. Robins, squirrels and thumb-sized bumble bees are out in full force. And on first-Monday weekend

(March 30 to April 1 this year) so are the tourists. A lot of people like to combine the Azalea Trail with First Monday Trade Days in Canton, 40 miles west of here. Lodging in both towns books up early.

Of course, Tyler is still the rose capital; its 22-acre Municipal Rose Garden is the nation's largest. But the 38,000 rosebushes there don't start blooming until late April or early May.

Roses aside, the gardens them-selves are nicely landscaped with pines and bald cypress, foot-bridges and fishponds with lilies and cattails. Admission to the gardens is free, through the rose-scented lobby of the visitor center. Details: (800) 235-5712.

MIDLAND REPORTER-TELEGRAM, SUNDAY, MARCH 10, 1996

### WEDDINGS

Marine Corps and is employed with the Holiday Inn in College Station.

### **SEEDS FOR THOUGHT** Timing important in growing tomatoes

#### By Deborah A. Benge Frost

Just around the corner is a window of opportunity to grow the best tomatoes you've ever grown. Timing is everything — well, not every-thing, but it is *critical* for a successful tomato crop. There are some oth-er ingredients that are very important, but if the timing isn't right, nothing else will be either.

Planting time, variety, site selection, soil prepa-ration, planting technique, pest management, water and fertility are a few more of the factors that can make the difference between a bountiful harvest and a tangled mess of bug-infested vines that don't produce anything except frustration. You can avoid that if you know these details.

Windows are very important because they allow you to see, plan, open and take advantage of the best opportunities. Planting your tomatoes at just the right time will allow you a timely harvest. You can harvest early as well as quality and quantity tomatoes. For

maximum fruit set and high yields, tomatoes must bloom before nighttime temperatures exceed 75 degrees and daytime temperatures reach above 92 degrees. As you know, that happens shortly after our last spring freeze, so the window of opportunity is not a wide one. This small window is also the reason why you don't want to sow tomato seeds directly in the garden, but always plant transplants. If you seeded, you would completely miss out on the June harvest that we all look forward to.

While planting too late or from seed can really mess things up for you, so can planting too early. With planting too early, the risk of loss to a late spring freeze is highly probable. Our last average (mean) freeze date is April 1, with a 10 percent chance of freeze occurring on April 11. These dates are averages, so they should be used as guidelines, not absolutes. If you plant based on these dates, the danger of a damaging late spring freeze still exists and you need to be prepared to protect plants.

Plants that are not devastated by a freeze but merely damaged might be better off if they were killed. Tomatoes are warm season plants that are very sensitive to cold temperatures. Young transplants damaged but not killed by cold are usually better off if replaced because they rarely recover to their potential.

There's usually no big advantage to planting way in advance of the recommended time, even if you go to elaborate extremes to keep plants warm and protected from cold. By the time our growing conditions are right for good, vigorous growth, the plant is worn out from struggling with cold soils, low light, high winds and hit and miss weather. Tomato plants don't like to grow in cold soils, so roots tend to be stunted.

which is phosphorus. Phosphorus is important for many processes within the plant, and if unavailable at the time of establishment, can affect plant performance. As soils warm, beneficial microbes become more active and plant nutrients become more available - another reason why planting at the right time is so important.

When is that window of opportunity? April 1-15 is generally a good planting time. Even at this time you'll still need to be prepared to protect plants from low temperatures. There are a variety of ways to do this, such as hot caps, milk jugs, floating row covers and covered cages.

Select your planting site. Tomatoes need no less than six hours of direct sunlight a day, but all-day full-sunlight will produce better yields. Despite their invaluable service to our landscapes, trees can be a big enemy of tomatoes by casting shade and snapping up water and nutrients. Roots go much beyond the dripline of trees, so try to plant as far away from trees as possible.

Soil preparation can take place right now too. Soils need to be improved with about 4 inches of organic matter. Compost, leaves, grass clippings and horse stable manure are some of the sources of organic matter you can till into your garden. If you have a green manure crop, such as Elbon cereal ryegrass, you'll want to till it into the soil two to four weeks before planting. Incorporating nitrogen at the time of tilling in organic matter can speed the breakdown of raw materials so your soil is ready to grow plants

A soil test is always helpful in determining what fertilizer to use. Without soil test results, you may want to add a complete fertilizer with a ratio of 3-1-2 or 4-1-2. Some examples of these ratios include 15-5-10, 12-4-8 or 20-5-10. If you keep your garden well fertilized with complete fertilizers, you may only need nitrogen. Soil testing is the only way you can find out for sure, because without test results you've got to guess and assume.

There's another window of opportunity with tomatoes and that's an educational window. A program on Totally Tomatoes Part I will be pre-sented 7 p.m. March 11 and 12 at the Confederate Air Force. Sponsored by Texas Agricultural Extension Service, the program will be taught by experienced tomato growers and Master Gardeners Sam Phillips and June Russell — and me. Cost of the program is \$5 per household. Pre-register by going to the Ector or Midland County Extension Service, or register at the door on March 11. For more information call 335-3071 or 687-1351

Take advantage for the windows of opportunity by planting at the right time, planting the right varieties and using proper planting methods. The window of information and education can help you have a productive season, full of fresh-from-the-garden, home-grown tomatoes.

Deborah Benge Frost is the extension horticulture agent for the Texas Agri-Cold soils affect the availability of many important nutrients, one of *cultural Extension Service in Midland and Ector Counties*.

#### By Robert W. Stock N.Y. Times News Service

A few years ago, Professor Joan G. Silberman, who teaches English at Rockland Community College in Suffern, N.Y., offered a summer course titled "The Literature of Old Age.

Nobody signed up. The next year, she tried again, but this time she called the course "Let's Talk About Aging." There wasn't an empty chair.

Ms. Silberman was delighted with the result of the name change, but dismayed by the necessity of making it.

"We need to rescue the word 'old,"" she said. "Look, I'm 72. I work out for an hour every day, teach full time and am appropriately compensated. I have loads of friends just like me. If 'old' simply

tologists and other experts admit to considerable confusion over the matter, and no wonder. Finding a single, universally accepted term to encompass all the various ways of being old could never have been easy. The remarkable changes in the longevity and life styles of older people in the last several decades have complicated the task.

INDIVIDUAL DIVERSITY increases with age - the longer you live, the more unique experiences you have, the more different you are from the next person. That makes individual members of today's long-lived older set harder to pigeonhole. Where is the word or phrase that can distinguish those 65 and over from the rest of society at a time when the older group includes so many marathon runners, computer hackers and general gadabouts? In the gerontology trade, the phrases of choice are "older persons" or "older people," which James M. Thompson, a gerontologist at the American Association of Retired Persons, describes as dynamic, by contrast with "old." which he sees as suggesting finality, or "elderly," which implies frailty. What raises Thompson's hackles, and those of many experts and older people, are terms they see as condescending or euphemistic. Senior citizen" conjures up images of pinochle and rocking chairs, they say, and they don't see that much golden about being a golden ager. In fact, when you ask people

reative a

over 65 what they prefer to call with any titles including 'seniors. themselves, their answers have remained fairly constant over the last 20 years.

BACK IN 1975, Louis Harris & Associates gave a list of 10 alternatives to people 65 and over around the country. Asked to choose the label they'd prefer, the No. 1 answer was "mature American," followed by "retired per-son" and then the dreaded "senior citizen." The least popular terms were were "old man" and "old woman.

A decade later, Feezel conducted a similar poll in Ohio, West Virginia and Pennsylvania, and he got pretty much the same answers. Again, "mature American"-was the top choice - if a less familiar one. Next came "retired person" and "senior citizen." Not surpris-"old tolks biddy and 'fogey'' came in last.

We are people, without any embellishments or qualifiers.

Over the years, experts have devised a variety of names. Bernice Neugarten, a leading social scientist at the University of Chicago, proposed using the age 75 as a dividing line between the young old and the old old, and many scientists follow her lead.

In some circles, the years from 50 to 75 are called the third quarter or third stage of life.

Advertisers have also coined a few terms, including "opals," for older people with active life styles, and "rappies," for retired affluent professionals.

**NONE OF THESE** alternatives, including "older people," has won over Silberman of Rockland College.

than what?" she

**RAISED TO** worship youth, Americans are fearful of aging and turned off by everything related to it, says Professor Jerry D. Feezel, who teaches communications at Kent State University. As a result, we're continually devising names for the old that avoid the O-word itself: "senior citizen" and "seasoned citizen," "golden ager" and "silver fox," "mature American" and "retired person" — not to mention forthrightly negative terms like "geezer" and "biddy." What is the best term? Geron-

facilities, fina

of Commerce.

For information

A recent, most unscientific sampling of a few dozen older people on Seniornet, an on-line site, suggested that some euphemisms are still popular.

Pearl127 had a typical response: "'Senior' and/or 'senior citizen' are fine with me. I've been called a lot worse.

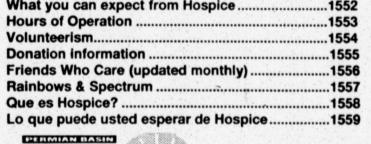

A few alternatives were offered. BetCapulet, for example, wrote: "I'm kind of partial to 'elders.' I guess it's the connotation of 'and betters.'

**ONLY ONE PERSON** reacted with anger. That was ConnieAct, who wrote: "I object to all the terms used to identify us. I think we harm ourselves when we put up

Older demanded. "My 9-year-old granddaughter is older than her 8-yearold friend. It's simply a way of evading the fact that my granddaughter is young and I am old.'

We are brought up, Ms. Silberman said, to see old age as a disease: we distance ourselves from older people rather than accepting them simply as ourselves at a later point in life.

As long as that continues, she said, "it doesn't make much difference what they call us."

#### AGE 8F

### AT WIT'S END Men good for something

#### By Erma Bombeck

There are a lot of good things about being married. Not worry-

ing about a date comes to mind. Give me a little time and I'll think of some things, more but the big reason for sharing a life with a man is that he can open jars with lids that

have been put on by the same

wrenches used to tighten the lug bolts on your tires.

Men can get to bacon that has been hermetically sealed for a future in the Smithsonian Institution.

I know what you're thinking. You're saying to yourself, "This is a sexist thing, and she is suggesting that men are stronger than women.

Wrong.

I am suggesting that a woman, given a package of lunch meat with a handy zip lock for future use, will rip at it with her teeth. stab it to death with a bread knife, beat it senseless with a fork and bludgeon it on the counter edge.

She will be on the verge of insanity when her husband says. "Give me that." He flips his fin-gernail under it, and it opens in seconds. That is because the woman has loosened it up. You could breathe on it at this point and the plastic would give way.

In some marriages, it is the only thing a man does to make him feel good about himself. He may not

MEMORIAL

HOSPITAL

2200 West Illinois

2255

buy the food, make a decision on what to.cook or how to prepare it, but he can get it out of the pack-

I've seen it happen a million times. During the last 50 years, grocery stores have gone from personal little shops where the grocer did everything for you to today's do-it-yourself warehouses.

Changes made it possible for a woman to put her fresh fruits and vegetables in plastic bags - if she could get the bags open.

There's an army of us every day who stand in the aisles rubbing the plastic bags together as though we're trying to make fire from twigs

If there is no man in sight, we do what we have to do - spit. Want to provide comic relief for aisle seven? Try to get two soft drinks out of the plastic carrier.

The strength thing is a rumor started by men and is left over from the days when women were content to feel a man's muscle and quiver. If there is a woman out there who does not admit to using it to her advantage, she is lying.

I figured out a long time ago that no one cares if one of my basic skills is getting a candy bar out of its wrapper. Oh sure, I could try to rip it with my teeth, use my fingernails as hacksaws, struggle to penetrate it with an emery board, or simply give it to my husband and say, "I don't know what I'd do if I weren't married to the strongest man in the world." He will smile and say, "I'll get

my toolbox.'

littering within the golden threads of the 'Net are original works. Some are classics that lie within the public domain; others are not.

There are places on the Internet "where poetry is on-line and texts of copyrighted books that people have just keyed in or scanned in," said Julia Null Smith, director of the multi-media program for the Texas Film Commission in Austin.

The Texas Film Commission was "looking actually to put our data bases on-line," Ms. Smith said. The information would include the film commission's directory, crew personnel suppliers, etc.

"When I went around to ask people how protected the information would be, the answer I got was, 'Once you put it on the Web (a subset of the Internet), it's gone. Anybody can grab it and download it.' That's one issue."

The other issue is the one Ms. Smith and her step-

father, Robert Bertholf — a librarian with the state university system in New York — discussed when he showed her copyrighted works on the Internet (a network of computer networks, often called the 'Net).

"That, I think, is a far more serious copyright infringement," Ms. Smith said.

Jill Ellsworth of San Marcos, an author and leading authority on business uses of the Internet, said of some copyright violations, "It's just sheer stupidity about copyright. 'I love this so I'm going to give it to you."

As an example she cited Dr. Seuss books that a group of admirers put on-line. "They are not out of copyright."

When the U.S. Constitution was written in 1789, the Founding Fathers included a copyright clause — Article 1, Section 8 — that states: "The Congress shall have Power To... promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries."

Additionally, Congress passed the Copyright Act of 1976 (extends protection for the creator's life plus 50 years).

This law governs copyrights in the United States after Jan. 1, 1978, and states copyright protection subsists "in original works of authorship fixed in any tangible medium of expression, now known or later developed, from which they can be perceived, reproduced, or otherwise communicated, either directly or with the aid of a machine or device."

International treaties — the Berne Convention and the Universal Copyright Convention — govern worldwide copyright law. More than 100 countries, including the United States and Canada, have signed these Please see COPY/4G

#### PAGE 2G

#### ENTERTAINMENT IN BRIEF

#### **Recital scheduled**

Midlander Jeff Monette, a lyric baritone, will present his senior voice recital at 3: 30 p.m. today at St. Ann's Catholic Church.

This recital, in addition to a senior recital at Hemmle Hall at **Texas Tech University on Thurs**day will fulfill his graduation requirements from Tech. Monette plans to pursue a career as a professional singer.

The program will include selections from Handel's "Messiah," including "The Trumpet Shall Sound," accompanied by Shari Santorelli on piano. Selections from the Dichter Liebe, composed by Schumann, which consists of 16 separate pieces with piano accompaniment, also will be presented.

During the program, Monette will be joined by fellow Tech students, Brandon Bohannon of Lubbock and Chris Dickerson of Abilene.

Monette will graduate cum laude from Tech, where he had roles in the university's musical theater and opera productions, including "La Boheme," "Don Pasquale" and "Carmen."

He was invited to sing at Opera in the Park, held at Midland Center in 1993, and performed an aria from "Don Giovanni." He has been a featured soloist at St. Ann's

ing as opportunitie's arise.

#### Group to meet

Midland Arts Association will meet 2 p.m. today in the Stables Gallery, Museum of the Southwest, 1705 W. Missouri Ave.

Virginia Rachal will present a demonstration of "Collage\_I and II," a dimensional assemblage of diverse materials. The presentation and the meeting are open to the public.

Also, MAA will open the MAA Art Gallery with a 4 to 6 p.m. reception Sunday, March 17.

The gallery is located in the Executone Building, 112 S. Loraine St. Local artists will exhibit and sell various art mediums from oils and watercolors to sculpture and ceramics.

Gallery hours will be 10 a.m. to 4 p.m. Tuesday and noon to 4 p.m. Thursday through Saturday. call the business office, 685=5050, for more information.

#### Exhibition set

Midland Arts Association and Midland American Bank are exhibiting Mary Tucci's oils and

In addition to her membership May 25 at The Presidential Musein the MAA, she is a member of the Palette Club.

West Texas has been her home since 1957, but she grew up in Oklahoma and Arizona. She and her husband, Jack, have two songs and six grandchildren.

#### Exhibit planned

ODESSA — The Presidential Museum, 622 N. Lee St., brings to West Texas an exhibition called Seven Presidents: The Art of **Oliphant**" Tuesday through April

The exhibition is locally supported by a grant from the Odessa American.

Currently on display through

um, 622 N. Lee, is the exhibition, Black Soldiers of the 19th Century Army

Spanning seven administrations from Lyndon Johnson to Bill Clinton - "Seven Presidents" surveys the course of three eventful decades in the history of this country

No admission is charged. Donations are appreciated. Regular hours are 10 a.m. to 5 p.m. Tuesday through Saturday. For more information call 1-915-332-7123.

PAGE 3G

NEXT YEAR OF YOUR LIFE: You benefit from being in the right place at the right time. Co-workers will be more responsive to your suggestions if you avoid nitpicking. Self-improvement activities give you a new, more polished image. You feel healthier, too. Allow older teens more latitude when making decisions. Their choices could surprise you! Plan on buying a home early in 1997. Invest any extra funds and watch your savings grow.

**CELEBRITIES BORN ON** THIS DAY: actress Sharon Stone, actress Jasmine Guy, abolitionist Harriet Tubman, Olympic gymnast Shannon Miller.

ARIES (March 21-April 19): Impending changes may be worrisome. Take heart! Eventually, they will bring success and happiness. A member of the opposite sex gives you a different point of view.

TAURUS (April 20-May 20): A sermon holds a special message for you. Help mate fulfill a request. Seeing new friends in a familiar setting adds to the day's pleasures. Get creative ideas down on paper before

they evaporate. GEMINI (May 21-June 20): Although children may add to your

**GOREN BRIDGE** 

tremendous fulfiliment. Tem sacrifices will prove worth the inconvenience.

CANCER (June 21-July 22): A long-concealed secret could suddenly be revealed, making a decision more difficult. Refuse to stand in someone's shadow. Your self-confidence increases when your mate or partner agrees to play a supporting role.

LEO (July 23-Aug. 22): Take nothing for granted today. Look for ways to have fun without spending a lot of money. Socializing with close kin proves very enjoyable. Laughter grows when you stroll down memory lane together.

VIRGO (Aug. 23-Sept. 22): Cre-ative and artistic enterprises hold special promise now. Keep in touch with a brother or sister. Parents exert a stabilizing influence. Show appreciation for the sacrifices they have made

LIBRA (Sept. 23-Oct. 22): Family members are willing to follow your lead. Rely on public transportation if driving conditions are haz-ardous. An elderly person's situation may improve. Plan a special outing or get-together. SCORPIO (Oct. 23-Nov. 21):

You benefit from admitting a mis-

**CONTROL YOURSELF!** 

are relying on you. SAGITTARIUS (Nov. 22-Dec. 21): Spend some time unwinding today. If you decide to share a secret with a loved one, choose a confidant who is a positive thinker. Two heads are better than one when looking for solutions

CAPRICORN (Dec. 22-Jan. 19): Close professional and personal relationships enjoy highly favorable influences. Friends prove their loyalty. Devote some time and thought to a new hobby; you may be able to start your own company. Romance receives a helping hand.

AQUARIUS (Jan. 20-Feb. 18): Look forward to a fun-filled day. An exotic newcomer captures your attention. You feel at ease when dealing with the public. Avoid sounding critical of an older relative or friend. Answer letters promptly.

PISCES (Feb. 19-March 20): Be sensible. When taking advantage of weekend sales, leave small children at home. A romantic relationship begins to intensify. You ponder tying the knot. Be sure you know someone well before making a commitment.

McCormick Gallery, Midland Col-lege: EXHIBITION: "Now & Then", artwork by Peggy Dooley, through March 20; 3600 N. Garfield, LRC Room 228, Mon.-Thurs. 8am-10pm, Fri. 8am-5pm, Sat. 9am-5pm, Sun. 1-5pm, call 685-4556, Free.

Museum of the Southwest: EXHIBI-TION: "Under Starry Skies," permanent collection; EXHIBITION: "The Search or Ancient Plainsmen", the Tarry Collection of Casas Grandes Vessels, ongoing; EXHIBITION: Midland Arts Association Spring Show, through March 17, EXHIBITION: Student Art Festival, March 23 through April 21, 1705 W. #### Opening lead: King of $\diamond$

C might be only an average mark at school, but it is a key letter in declarer play. It stands for count and control, two key elements that declarer needs to fulfill any con-

North's raise to two hearts is emi-nently correct. Should North elect to bid one spate instead, there

would be all sorts of problems no matter what rebid South made except a spade raise. South was a whit short of a jump to game, so bid a suit in which help was needed. North's raise showed at least four spades and three hearts, and the heart game was reached in short

order. West cashed the king and ace of diamonds and continued with a third round, ruffed in the closed hand. How should South proceed?

Outside of trumps, declarer can count six fast tricks, so only four trump tricks are needed. Therefore, declarer can afford to lose a trick to the king of trumps. However, to

the king of trumps. However, to keep control declarer must protect against the possibility of a 4-1 split. If declarer plays the ace of hearts followed by the queen, West holds up. Since the fourth spade cannot be cashed before extracting trumps,

holds up. If West wins, dummy's or trump guards against a diamond continuation. If West holds off a

second time, declarer cashes the ace of hearts and starts on spades. West can ruff the fourth spade as declarer discards the club loser, but that is the third and last trick for the defense.

Learn to be a better bridge player! Subscribe now to the Goren Bridge Letter by calling (800)788-1225 for information. Or write to Goren Bridge Letter, P.O. Box 4410, Chicago, IL 60680-4410.

#### PUZZLE ANSWER

he king of trumps. However, teep control declarer must protect against the possibility of a 4-1 split. If declarer plays the ace of hearts followed by the queen, West holds up. Since the fourth spade cannot be cashed before extracting trumps. South must lead another trump. West wins and reverts to diamonds, forcing declarer to ruff, and West's long trump becomes the setting trick. The winning line is for declarer to lead the queen of hearts from hand, and follow with the jack if West holds up. If West wins, dummy's trump guards against a diamond off a

#### ENTERTAINMENT IN BRIEF

#### (From 2G)

Odessa has received a nomination from the Texas Alliance for Arts and Education to be included in the Young Performing Artists Show-case: The Internet 1996 World Exposition.

The Hispanic Heritage of Odessa performers include folklorico dancers and four mariachi singers. The Kennedy Art Center Education Department will be recognizing art educators and showcasing arts education programs.

The purpose is to provide nation-al and global recognition for the role of the arts in education and in the development of artistic achievement among the young. The program will include exam-ples from every state.

Hispanic Heritage of Odessa was a pilot project of the Odessa LULAC Council in 1989 and started training and preparing young

students to participate in cultural events in Odessa. The Boys & Girls Club hosted the first groups, which included an enrollment of more than 186 young performers.

The organization has since grown to include an annual art poster and essay contests for youth, stage performances, cul-tural costume fashion displays, exhibits and heritage displays, that include books, video and arti-

**MIDLAND REPORTER-TELEGRAM, SUNDAY, MARCH 10, 1996** 

### **COPY:** Internet faces copyright infringement problems

#### (From 1G)

#### treaties.

"They give U.S. authors protection in the United States, and some protection in other countries," write Dave Kinnaman and Robin Rowland in their book "Researching on the Internet," a concise, easy-to-read and well-researched guide to finding, evaluating and organizing information effectively through the Internet

"This is known to lawyers as 'national treatment,' meaning that the rights of a foreign author in the United States are the same as those granted to a U.S. citizen and vice versa.

"The nature of the Internet is to make copies," said Kinnaman, who is a systems analyst in Austin. "You can't use the Internet without making copies of things. What used to be in Cincinnati now is suddenly on your computer in Texas. It's what you do with it after you make that copy that is the focus of the problem. It's like a xerox machine on a world-wide scale

"THAT'S HOW the Internet works. I make those copies automatically as part of my work every day. It's not illegal. It's not offensive to the people who wrote that material. If I represent that material as my material, then I have broken the law and offended the original creator

"One of the most powerful uses of the Internet is for people to add value to information by gathering different bits of related information from different parts of the world and putting them together in ways they haven't been seen before. Sometimes it's a great act of creativity to take information and look at it from a different perspective.'

Kinnaman cited as an example a radio disc jockey who recognizes that certain songs have a common thread, perhaps they are all about a highway. He plays them in a row because he sees the connection and it means something to him.

"He's created something new that wasn't there in the individual pieces," Kinnaman said.

Unfortunately, some 'Net users erroneously assume that what they see on the Internet is theirs to use as they choose, including making multiple copies they pass onto others.

THEY IMAGINE, Ms. Ellsworth said, "because it's electronic, it's not copyrighted. The minute I created it, it was copyrighted.

Some materials display the copyright symbol. Others don't.

You don't have to use the copyright symbol to have it protected; but putting it there does mean some-Ms. Ellsworth said

issues and the regulation of electronic expression.

Midland attorney Rick Strange of Cotton, Bledsoe, Tighe and Dawson, calls the future of the Internet "interesting to try to predict. There's going to be more and more access to all kinds of materials on the Internet, and the practical problems are going to increase. I would imagine a law would be hardpressed to keep up. That more likely what will happen is that business concerns will dictate what direction this all takes.

STRANGE CITED as an example a book on training for a marathon that CompuServe users can download. The book, "Marathoning from Start to Finish" by Patti and Warren Finke, is complete and users are asked, if they like the book and use it, to send a check. An address is included.

"The copyright process for that is no different than if I went to a regular publisher and published a book, Strange said. "The problem is more practical. If I bought that book at Dalton's, obviously I've got to pay or I can't take the book. If you put it out on the Internet, it's much more difficult to police. The book is out there, and anyone can access it 24 hours a day, seven days a week. You're forced to rely on the honor system in that instance.

If the author discovers, Strange said, "that lots of people accessed his book but few paid, then the odds of him doing that again are significantly decreased. On the other hand, if he's done better financially by doing this than going through the traditional publishing house, then I think you'll see a lot of this increase.

The advantage to readers of this type of marketing is availability. As Strange said, "The nice thing was I got this book downloaded and read and never left the house. So I didn't have to fight crowds. And if it's something I wanted at three in the morning, then it was something I could access at three in the morning.

A FEW have argued that once the copyrighted material is on the 'Net, it's just sequential numbers with no creativity to it, thus why should it be copyrighted?

Midland optometrist and computer enthusiast Dr. Billy Cook recently read an article espousing the theory of creative works becoming merely sequential numbers on the Net.

"I thought it was a personal insult. Why be creative? Why expand your horizons if you're not going to be compensated for anything at all? The person who wrote it probably received some compensation for his article."

This attitude, Cook said

Another view of the Internet that respects the creative process, sees the 'Net as the middle man between the artist and the public

'The current system makes it virtually impossible for that artist to get paid properly," Kinnaman said. There are 1,000 middle men between that artist and the consumer. Internet can be that middle man. Much smaller communities can be viable. That artist may, in their hometown, only have 15 people interested in their music, but in the whole world?

AN ARTIST could decide to offer his music for a dime a song instead of \$10 a CD, Kinnaman said.

"He cuts out all the middle men; (the music) never makes it into a CD. The song is downloaded from the Internet and played from equipment. That way artists will be paid directly by the consumer. They will see much sooner what's happening with their art.

Kinnaman envisions artists being able to see which songs sell and which don't. "It won't be the same as the feedback you get from a live audience, but better than what you get from the record companies.

'Net users equipped with sound also capture the music used on some Web pages to enhance the presentation. Who is paying the royalties? They are required whenever a song. which is not in the public domain, is reproduced.

The mechanism in current use, Kinnaman said, "encourages theft because it's so unwieldy to pay the artists. There's no easy way to contact the artist who made the CD."

Many first-time users find the technology confusing. Thus, educat-ing people about copyrights and what constitutes a violation is vital, Hartman said. "Ignorance is no excuse, but if people don't know they are committing a crime, then

THE PROGRAM is copyrighted, Hartman said. "If you sell the previous version, that's illegal.

Guidelines do exist for those offering their creations on the Internet. Some are more effective than others

An example with questionable results is a Web site (or home page) - a location that businesses, universities and individuals, among others, have for browsing on the Internet - which limits the number of searches a user may make at one time

"People can only, say, search for five things at a time," said Ms. Smith of the Texas Film Commission. "I've also heard from people who say that's not going to work. There are ways around those systems

Another possible safeguard is only offering a portion of a work.

"There are things I can give away that will increase the value of what I don't give away," said Kinnaman, who along with Rowland, is putting additional workbook chapters of their co-authored book, on the 'Net.

Although some embrace the 'Net and the opportunities its information highway offers for discourse, education and research, others shy away from the electronic medium. The reasons range from no time to learn how to use the 'Net, no money to buy the equipment, no interest in learning about the 'Net to the fear that the 'Net will invade their lives.

**THE INTERNET** is an interactive media," Kinnaman said. "Most everybody is not used to that. If you send out something that somebody doesn't like, they can send you back something. You can't be offensive to people the way advertisers are on TV and radio. Your entire relationship with the public is at risk if you don't handle it properly

"It's not like the VCR. You're gonna have to study on it. If you don't, it will bite you. It can hurt your business. Hurt you personally if you're not careful.

#### gest caution.

"If there's a community bulletin board at the court house, and I write a poem and put it up on the bulletin board, anybody walking by could see that and copy it and do with it as they will," Strange said.

"Don't put anything out you don't expect people to take and use as their own," Kinnaman said.

The roots of today's communica-tion industry stretch back millennia to a time when artists painted on cave walls and tribal or clan history was passed down verbally through stories and song from generation to generation. The oldest known writing is the Mesopotamian cuneiform of 3.500 BC (with the exception of 8,000 year-old inscriptions, thought to be pictographs, found on animal bones and tortoise shells in Henan province, China).

THE WOODCUT is the oldest form of print. The first printing, reproduction of text or illustrative material on paper, used wood blocks, followed by carved wood type or mold. d metal type and hand-operated presses.

By 1456, the 42-line Gutenberg Bible was completed. German printer Johann Gutenberg invented the first printing press using raisedmoveable-metal type, which was based on the Chinese wood-blocktype method and a machine used to press grapes or cheese. His invention, capable of printing 300 pages daily, opened the Western market to widespread printing.

"The need for copyright grew out of the Gutenberg revolution," write Kinnaman and Rowland. "Printing allowed the reproduction of books. The people who created books and whose income depended on those books - needed protection to make sure that someone else would not print their book and make off with the profits."

In today's world, works by artists and authors can be viewed instantaneously by countless thousands of people throughout the world on the Internet. The Gutenberg Project is on-line making accessible works that are in public domain - those that are out of copyright.

Ms. Ellsworth said the Gutenberg Project is great. She also wondered if it had played an unintended role in some users putting copyrighted material onto the 'Net. "It tends to make people think, 'Oh, I like this book, and I think I'll let people have

people,

"The presumption is that it's protected unless there is permission given to make copies," said attorney David McCombs of Haynes and Boone, a Dallas law firm. "I think the biggest problems on the Internet are going to be First Amendment

### ENTERTAINMENT IN BRIEF

#### (From 3G)

facts, and an area-wide folk dance and song competition. The competition is held at the conclusion of the year to highlight the outstanding performers of cultural dance and song.

#### Concert presented

ODESSA - Juan Gabriel presents his 25th anniversary concert at 8 p.m. March 29 at Ector County Coliseum.

Tickets, priced at \$20, \$30 and \$40, may be purchased in Odessa, Lechuga Video, Endless Horizons and Comm West; in Midland, Midland Sound; in Pecos, Dan's Music & Video; and in Big Spring, Sound Decision. They may be charged by credit card by calling 1-800-462-7979.

In 1971, Gabriel recorded his first hit "No Tengo Dinero." During his 25th anniversary Performance, in which he will be accompanied by his popular Mariachi band and 14 piece orchestra and chorus

The Odessa show is produced by Resendez & Associates.

#### Concert planned

**ODESSA** — The Permian Basin **Blues Society** presents Justice recording artist Tab Benoit in a 7: 30 p.m. concert today at Riley's Roadhouse.

**Benoit was born in Baton Rouge** and raised in Houma, a small Gulf Coast oil town in Louisiana. His first two releases have garnered success at retail and radio, enjoying airplay on the Triple A and Album Rock formats.

Special guest for the Odessa show is Blues Stingers. Tickets, priced at \$8 in advance and \$10 at the door, are free to PBBS members

The society will meet at 7 p.m. Wednesday, March 6, at Blues Alley, behind Sams BBQ, 220 N. Grandview. All those interested in blues are invited to attend. For more information call 1-915-332-7881 or 570-7171.

#### Expo to close

The seventh annual Midland Arts & Crafts Expo closes today at Midland Center.

Hours are noon to 5 p.m. No admission is charged. The show is directed by Mel Prather of Big Spring.

#### Series continues

The Lenten Luncheon Series at First Presbyterian Church, 800 W. **Texas Ave.**, continues Wednesday with the Tudor Consort.

The series will continue each Wednesday during Lent with halfhour concerts scheduled from 12:05 to 12:35 p.m. and lunch served in Lynn Hall at half-hour before and after each concert. The concerts are free and open to the public. Lunch is \$4. Child care is available with advance reservations

The Tudor Consort is a recorder

ensemble that utilizes a cello for the bass line. It was founded in 1986 by Tom Laney to provide recorder music for madrigal dinners, which he produced and directed for UTPB and several local churches. Current members are Marjory Jennings, Peter Figert, Dorothy Davis and Laney with the Midland-Odessa Symphony Chorale.

Wednesday's program will include works by Purcell, Erasmus Widmann, David Goldstein and J.S. Bach.

Future concerts in this series include soprano Janet Menzie March 20 and The Chap Singer from Midland College March 27.

#### Quintet to perform

The Lone Star Brass Quintet, resident brass quintet of the Midland-Odessa Symphony Chorale, Inc., is performing the second of its 1995-96 Chamber Series concerts today.

The Quintet will perform at 2 p.m. at the Globe Theatre, Odessa College campus. The program is sponsored by Miether Bearing Co. and Dr. and Mrs. N. Harris.

The members of the Lone Star Brass, Michael Santorelli, Elizabeth Carter, Julia Pack, Jeanie Lee and William Nazzaro, are all residents of Midland and Odessa and work in the Midland, Ector and Greenwood Independent School districts.

Admission is \$10 for adults, \$9 for seniors and \$5 for students and free for music students. Tickets may be purchased through the

symphony by calling 563-0921 or at the door.

#### Concert scheduled

**ODESSA** - Bush and special guests Goo Goo Dolls play Ector **County Coliseum March 26 Beaver Productions brings both** acts to Lubbock's Fair Park Coli-

seum Sunday, March 24. For ticket information or to order by phone call 1-800-462-7979.

Exhibit planned

Charlotte Seay is exhibiting 27 of her watercolor and mixed-media paintings in the Cole Gallery, 2000 W. Wadley Ave., at Midland Community Theatre through March 23. "The main focus of my work concerns the vanishing natural habitats of plants and animals which in turn leads to more and more species becoming extinct in

cerned with preserving tradition-

was selected as the first poster for the annual Cameron Park Zoological and botanical Society Zoobilee in Waco in 1995. The Midland Opera Theatre selected her painting, "Aqua Mirabilis," for its current poster, invitations and programs. In addition, she is one of 20 Southwestern artists invited to exhibit at the Corpus Christi Art **Center for the Corpus Christi** 

Cotillion Club's la Merienda in March.

She is president of Midland Arts Association, a Purple Sage Brush Signature member of the Texas Watercolor Society and will be the 1997 chairman of the National Watercolor Exhibition of the Texas Watercolor Society to be held at the Museum of the Southwest here.

#### Works displayed

The work of Odessa photographer Olivia Hill is on display in an exhibition entitled "Fashion Fascists" through March 21 at Gallery 1114, 1114 N. Big Spring St.

The gallery is open from 1 to 5 p.m. Thursdays through Sundays and by appointment. To schedule a group tour call Ms. Hill, 1-915-368-7400, or Travis Beckham, 682-4969. Gallery 1114 is cooperative for modern and contemporary art.

#### Contest planned

West Texas Storytelling Guild and West Texas Writers are sponsoring a short story contest and invite entries of original stories written for children. Entry deadline is April 1.

Stories need to be for children ages 4 through 13 and be no more than 1,000 words in length. Presentation may be in any form such as fairy tale, fable, ghost, western, in verse or prose, or combined in any form for concert style story telling such as with music or drama, pantomime or puppets. If the story is for a par-ticular age level, the age should be indicated

Prizes including first \$100, second \$75 and third \$25, will be awarded for first, second and honorable mention. The winning stories will be read by members of the Storytelling Guild in concert in April.

The contest is an effort to widen public awareness of creative arts, in particular the age-old tradition of story telling.

Entries need to be mailed to Story Contest, P.O. Box 11161, Midland, Texas 79702. For more information call 699-7820.

#### **Exhibits displayed**

**ODESSA** — The Ellen Noel Art Institute of the Permian Basin, 4909 E. University, is hosting "The Humbler Walks of Art: Land-scape, Still-Life, and Animal Paintings from the Sarah Camp-bell Blaffer Collections," a foun-dation located in University theorem dation located in Houston, through April 30.

Also on display are the exhibitions "Landscape Drawings by **European and American Masters** from the Old Jail Art Center in Albany, Texas, March 1-31 and "Print Types" from the Print Con-sortium, March 1-31.

For more information call, 1-915-368-7222. Hours are 10 a.m. to 5 p.m. Tuesday through saturday and 2 to 5 p.m. Sunday. No admission is charged.

the wild," said the artist. Ms. Seay said she also is con-

al cultures in modern society.

The pipeline will be approximately 31 miles long in its initial phase in Crockett and Val Verde counties. The Texas pipeline trunkline is scheduled for 12-inch diameter and will have an initial capacity of more than 70 million cubic feet of gas per day. The pipeline system is designed to primarily transport wet gas. The

### EVI restructures to focus on manufacturing, overseas

Competition in distribution, increased interest in overseas exploration prompts moves.

#### By Mella McEwen

Staff Writer

10

In order to change corporate focus, **Energy Ventures Inc. has realigned** two divisions and sold a third.

EVI sold its Highland U.S. stores to Continental Emsco Co. for approximately \$7.5 million.

James G. Kiley, vice president of finance and treasurer, said that the sale was in order to exit the U.S. distribution business and focus more on EVI's manufacturing concerns. He noted that Continental Emsco is a pure distribution company.

"It's a very competitive business

and we had few stores in relation to our competitors," Kiley said. The company had fewer than 40 stores in the United States.

As part of the sale, Continental Emsco has been named non-exclusive distributor of Highland products in the United States, including the Fluid Packed Pump, EL Sucker Rods and Rotalift product lines and will be exclusive distributor of the Rotaflex pumping unit.

The Rotaflex is manufactured in Odessa. EVI also has a second unit, Leamco Ruthco, headquartered near Midland International Airport, repairing and servicing pumping units.

As the company focuses on manufacturing, it is also moving to increase its involvement in international markets, according to Robert Stiles, new president of EVI Oil Tools, which was formed by the merger of Highland and **Production Oil Tools**.

EVI will design, manufacture and market the combined line of artificial lift and completion tools. Stiles formerly served as president of Production Oil Tools.

The Rotaflex pumping unit will continue to be manufactured in Odessa, while a few Odessa jobs will be eliminated or moved to the EVI Oil Tools headquarters in Dallas, Stiles said. The company has between 200 and 225 employees based in Midland-Odessa.

Stiles said the purpose of the consolidation was to be more efficient but also "to consolidate and organize our efforts to expand into the international market. A lot of our products are sold in the international market and we had two groups distributing the products outside the U.S. Now we have one group to distribute our products.' He said that, while the company is

seeing an upswing in activity in the United States, "international is where the dollars are being spent.'

.

. .

EVI will spend a lot of attention on South America," he said.

"That is an area that is doing quite well from an activity standpoint and from the privatization process that has occurred or is ongoing.

"Privatization has already occurred in Argentina and Venezuela is moving in a similar mode. Brazil is at the beginning of the process. We are very excited about the South American market; it's where we'll be spending a lot of our resources and attention over the next several months.

West Texas comprises the biggest part of EVI's American market, with overseas business comprising 15 percent. Canada accounts for 35 percent of the company's business, according to Stiles

Low stockpiles

don't translate

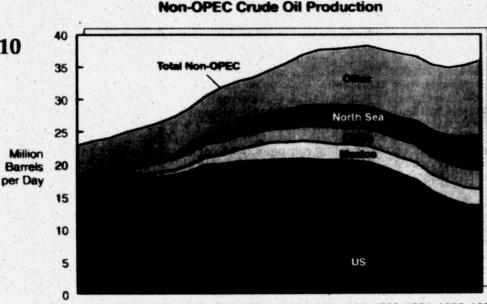

The Organization of Petroleum Exportto energy crisis ing Countries is facing increased com-petition from non-OPEC sources. In 1995, OPEC production rose 1.1 percent while non-OPEC production rose almost **By Sheri Prasso** 2.1 percent. OPEC members, while Associated Press Writer keeping their production virtually flat in 1995, have been counting on non-OPEC NEW YORK - A drop in domestic production to slowdown, giving OPEC a larger market share in meeting rising world demand and firmer prices. Such conventional wisdoms were challenged in 1995, according to the annual World

oil stockpiles to the lowest levels since the tumultuous 1970s has driven prices at gas pumps up an average 3 cents a gallon in the past month, but there is no new oil crisis on the horizon.

Don't envisage a return to gas lines and rationing at service stations, analysts and industry officials say.

"It's not even remotely possible: there's plenty of oil available in the world market," said John Lichtblau, chairman of the Petroleum Industry Research Foundation in New York. "The reason for low inventories is not because the oil isn't available. It's because of decisions by companies to keep inventories low, and because of the exceptionally cold winter.

Over the last year, there has been a new trend among refiners in the Unit-

has brought vitality to industry.

#### By John Paul Pitts

Oil Editor

Technology may be changing the shape of the Permian Basin oil industry, but it is also shaping the global market, according to sources.

According to World Oil Trends technology is a major reason for a new equilibrium in the oil markets. It is an equilibrium that has stiffened competition and produced stable oil prices. The year 1995 marked the turning point for world oil markets, according to the study conducted by Cambridge Energy Associates and Arthur Andersen Consulting.

The report notes that it was a year in which conventional wisdoms used for

"In the past decade, the industry

"At the same time," says Stanislaw, "price differences between varying crudes have narrowed rather than widened.

Victor Burk, Arthur Andersen's managing director of energy industry services, attributes the phenomenon to a new equilibrium between producers and consumers.

Demand is rising while exploration and production costs are falling. Also, end use prices have stabilized at a level customers can accept, and at which

Please see BALANCE/2H

ed States: operate on razor-thin levels of crude oil stocks because it costs less. Stockpiles are at their lowest since 1977

Storage charges, insurance costs and taxes all get saved when refiners cut back the inventories of crude they intend to refine. The money that would otherwise be tied up by buying crude oil stockpiles and the interest earned on it all can be put to other uses.

'They're trying

to cut back on expenditures. Lichtblau said. "It's part of the downsizing." or cutting of staff and spending, being undertaken by U.S. corporations in general. It is difficult to estimate how much is being saved in taxes and market." earned in interest, but nationwide stockpiles at the beginning of this month were 100 million barrels less than at the same time last

t's not even remotely possible; there's plenty of oil available in the world John Licht-

blau, chairman, Petroleum Industry **Research Foun**dation.

year, said Edward Murphy, chief statistician at the American Petroleum Institute in Washington, D.C

The cost of keeping that oil warehoused would have run at least 25 cents a barrel, or \$25 million, a month.

"A lot of costs have been driven out of the system," Murphy said. "Prices are lower than they otherwise would have been

Still, unleaded gasoline prices have gone up nearly 2 cents from last week, to a \$1.15 national retail average, and up nearly 3 cents from last month, according to the Computer Petroleum Corp

The industry miscalculated when estimating U.S. energy needs over the winter, and the demand - particularly for heating oil - was a factor in driving up prices.

"It's an understandable misjudg-ment," said Thomas Petrie, the chair-man of Denver-based Petrie & Parkman oil and gas investment banking firm. "It (weather) is the hardest thing to call.'

Twenty years ago, U.S. refiners had to have bigger stores of oil in order to hedge against changes in a market heavily reliant on the Middle East. But now there are many more sources of oil around the world, and a dry-up of one producer just means another will take up the slack, the analysts said.

"There seems to be ample supplies available," said an executive for a major U.S. refiner who did not want his company identified. The refiner confirmed that he had joined the industry-wide trend of reduced inventories

### Chicago firm makes fuel from used cooking oil

Plan is to recycle used oil, shortening to produce low-polluting 'biodiesel'.

#### By Tara Burghart Associated Press Writer

CHICAGO - For more than 50 years, Michael Gagliardo's family has sold oil and shortening to food manufacturers and restaurants. Now Gagliardo wants that oil back.

Gagliardo is expanding his Columbus Foods Co. to include the production of "biodiesel," a lowpollution alternative fuel that can power conventional diesel engines.

The used cooking oil can be combined with soybean oil to lessen the cost of biodiesel, which sells at about twice the price of conventional diesel

"The logic behind the whole pro-ject is to take it full cycle,"

Gagliardo said. "Since we distrib-ute the fresh oil to the manufac-""It's a real American success turers, to the food distributors, to the grocery stores, then we should take the waste back and recycle

U.S. Secretary of Energy Hazel O'Leary presented Columbus Foods with a \$200,000 grant to help with the project. Funding is also being provided by the state and the city, along with various private associations.

Gagliardo's grandfather started the business 58 years ago out of the trunk of his car. Now it's a multimillion dollar company that employs 65 people and produces more than 50 different types of oil.

Gagliardo plans to use about \$500,000 of his company's money to build a biodiesel plant in an existing building. When completed in four to six months, the plant will join only a few others in existence

story. A family business looking at an opportunity," said Steve How-ell, director of research for the National Biodiesel Board.

Biodiesel, which is biodegradable, is made from agricultural feedstocks, such as animal fat, and oil seeds, such as soybeans. It emits about half the soot particles and carbon monoxide of using conventional diesel.

Often used in a blend with diesel. it has been used in demonstration projects around the country to power public transit buses and boats.

Other potential markets include industrial plants where dieselpowered forklifts or other devices are operated indoors, polluted cities trying to meet more stringent clean-air regulations and

used in outboard motors could

contaminate lakes or streams. Part of the reason the price of biodiesel is so high - its retail price is about \$2.50 per gallon - is high production costs and a limited supply of raw materials such as soybean oil. So officials are excited about adding cheap, reclaimed cooking oil to the mix.

Gagliardo, who will buy back much of his used oil from the customers he sells it to fresh, said he hopes to produce about 200,000

gallons of biodiesel fuel a year. That compares to about 50 billion gallons of diesel fuel used in the nited States every year.

'It's being aimed at the niche markets where use of the cleaner fuel is worth more money," Howell said. "The trick has been to find the markets where the advantages and benefits of the fuel allow where conventional diesel fuel it to recoup its higher costs.

### **CRISIS:** Analysts insist no long gasoline lines loom

Arco tests offshore Indonesia well

#### (From 1H)

and reaped substantial tax savings as a result. "I do not know of any refiners

who feel threatened that lower stockpiles will lead to reduced (refined product)," he said.

Another factor keeping stock-piles low is the likelihood that a limited amount of oil from Iraq will enter the market later this year in a reprieve from United Nations sanctions. That entry of 700,000 barrels a day into the market is expected to drive prices down \$3 a barrel.

Indeed, the futures market

of Atlantic Richfield Co. con-

firmed that the Wiriagar Deep 2 well, drilled in the Berau block of

Bintuni Bay, Irian Jaya, Indonesia

was tested at a combined rate in

excess of 100 million cubic feet of natural gas per day (MMCFD)

reflects the expectation, with crude oil for delivery at the end of the summer about \$2.50 a barrel lower than for the current April contract on the New York Mercantile Exchange. Oil companies prefer to sell off the oil they have at a higher price now and then replace it in the future at a lower price.

"Low stocks cause high prices, and high prices cause low stocks," Lichtblau said. "The fact that futures prices in the autumn months are so much lower is an indication that the present price is not expected to stay.

### Parallel Petroleum posts higher revenues for 1995

MIDLAND - Parallel Petroleum Corp. announced financial results for the year ended December 31, 1995. Oil and gas revenues increased slightly to \$4.71 million from \$4.69 million. Net income was \$137,080, or 1 cent per share, compared to \$444,360, or 3 cents per share, in 1994.

During 1995, the company's production of natural gas increased by 16 percent to 1.6 billion cubic feet from 1.4 billion the prior year; however, average sale prices declined 11 percent to \$1.50 per Mcf from \$1.68 in 1994. Reflecting the company's continuing focus on natural gas exploration and development, oil production decreased by 11 percent to 133,000 barrels from 149,000 in 1994, while average sale prices increased to \$17.26 per barrel from \$15.81 in 1994. Natural gas sales in 1995 accounted for 52 percent of the Company's oil and gas revenues. In terms of equivalent barrels of oil (EBO), with gas converted at the rate of 6 Mcf per barrel, production increased to 402,000 barrels from 381,000 in 1994, while the average sales price per EBO declined to ales price per EBO declined to 11.72 from \$12.31 in 1994. The Company's proved natural trilled to a total depth of 15,216 feet \$11.72 from \$12.31 in 1994.

librium, but if the equilibrium survives it could challenge 20 years of volatility.

as companies of all sizes aggres-sively pursue exploration and production opportunities. "Tech-nological advances and strategic partering are creating new value for producers and stakeholders,' said Burke.

When OPEC dropped prices to pursue market share in 1985-86, low oil prices led to a decline in exploration and production, Burk noted. But since then, new costsaving technology, astute man-agement practices, and the information revolution have increased global exploration and production, having a reverse impact on markets

There has also been a reverse impact on competition. It was initially thought that rising demand would lead to higher **OPEC** production and higher prices, but that has not happened. The same principals of technology and management have made non-OPEC producers stiff competition for OPEC. Moreover, the production of nat-

### **RILEY:** Purchase will expand operations

#### (From 1H)

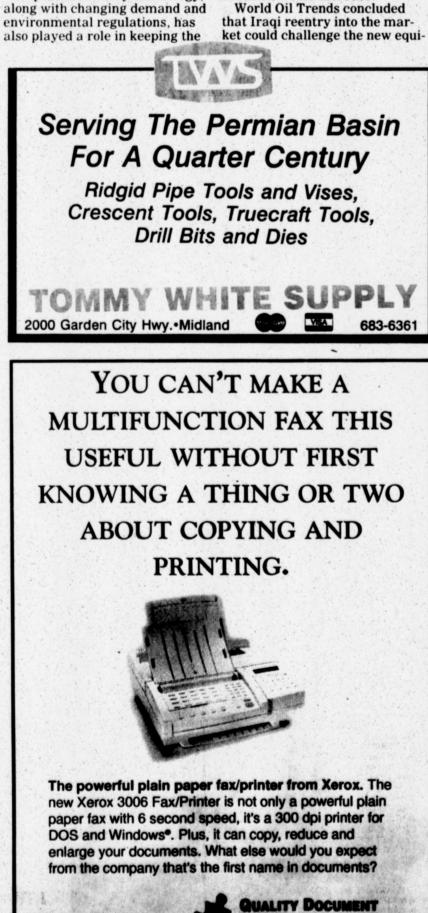

Sojourner had been an Abilene drilling contractor since 1946, when it was started by William C. Sojourner. The drilling company became inactive in 1993, when it decided to focus on its production.

James D. Allen, chairman and CEO of Riley, said the purchase would bring Riley's inventory of shallow rigs to a total of 13 and expand the company's operation from the Permian Basin through North and West Central Texas.

Allen said increasing activity in the regions provide great potential for the expanded drilling company. He also noted that several of the rigs pur-chased fit well with the 6,000 to 9,000 foot formations in the Permian Basin.

"We are pleased with the acquisition," said Allen, "because it brings us one more step closer to becoming a pre-mier shallow drilling company for all of Texas.'

for all of Texas." He said Sojourner was always known for the high quality of its equipment. "All the equipment was highly maintained and had back- ups for back-ups. The addi-tion of this quality equipment will improve the overall quality of Riley Drilling Co."

### **HORIZONTAL DRILLING** WILL MAKE ADIFFERENCE

As Permian Basin reservoirs become more mature, and are more fully defined by new seismic technology, horizontal drilling will inevitably make a difference in whether or not some reservoirs remain commercial. You are invited to attend a two day conference that

will thoroughly explore the technology, potential and promise of horizontal drilling for the Permian Basin.

#### ACTIVITY HIGHLIGHTS

The rigs on the map above show counties in which significant drilling activity has taken place, as reported in the Activity Highlights below.

### Medders Oil tests Tannehill Sand strike

#### **Staff Reports**

**MEDDERS OIL CO.** has completed a Tannehill Sandstone discovery in King County.

On potential test, the No. 1-1A Forks pumped 177 barrels of 36 gravity crude. Production was natural from perforations 3,789 to 3,799 ft.

The well was drilled to 3,960 ft., where 4 1/2 inch casing was set. Location is 2,082 ft. from south

and 2,005 ft. from west lines of League 1, Somervell CSL survey, Abst. 284.

#### Eddy County yields **Brushy Canyon find**

Devonian discovery flows 96 barrels

A Devonian discovery has been potentialed in Lea County, N.M., nine miles east-northeast of Crossroads.

LAYTON ENTERPRISES INC. finaled the No. 1 El Zorro "H" Federal to flow 96 barrels of 45 gravi-ty crude on a 12/64 inch choke with flowing tubing pressure of 10 psi. The well flowed from open Devonian interval 12,340 to 12,358 ft. Drilled as a 12,500 ft. explorer,

the well reached total depth of 12,358 ft. with 5 1/2 inch casing set at 12,340 ft.

Location is 2,080 ft. from north and 510 ft. from east lines of Sec-

well was plugged back to 4,660 ft. with 5 1/2 inch casing set at 5,290 ft.

The well topped the Palo Pinto at 4,430 ft. on kelly bushing elevation of 2,411 ft.

Location is 662 ft. from north and 661 ft. from east lines of Section 74, Block H, GH&SA survey, Abst. 936. The well was drilled by Phillips Petroleum Co. and completed in May 1954 as a Harkey producer in the Toe Nail field, producing from perforations 4,714 to 4,790 ft. In 1987, Phillips recompleted the well was a Strawn producer in the field, tested for a calculated absolute open flow of 3,004 Mcfd from perforations 5,184 to 5,195 ft.

The well topped the Yates at 2,907 ft., Grayburg at 4,430 and Holt at 5,378 ft. on kelly bushing eleva-

tion of 3,133 ft. Location is 735 ft. from north and ,980 ft. from west lines of Section , Block 43, T-1-N, T&P survey, Abst. 43.

**Odessa Oil Investors Co. Inc.** tried a plugback operation in 1992, plugging and abandoning the well at 8,760 ft.

#### Canyon pool opened in Scurry County field

CHISHOLM EXPLORATION INC. has opened a new Canyon Reef pool in the STM field of Scurry County, 5.8 miles southwest of

. . . .

PAGE 3H

Eddy County, N.M. has gained a Brushy Canyon discovery, 10

miles east of Carlsbad. MARALO INC. tested the No. 2 Gold Rush "30" Federal Com. to flow 126 barrels of crude, 300 Mcfd and 176 barrels of water from per-forations 7,094 to 7,109 ft. The \*interval was acidized with 750 gallons of gel and fractured with 20,000 gallons of gel and 20,000 lbs. 20/40 sand.

Permitted as a 14,800 ft. test, the well was drilled to 14,200 ft., where 5 1/2 inch casing was set, and plugged back to 9,975 ft.

Location is 660 ft. from south and -2,310 ft. from east lines of Section 30, T23s, R30e.

tion 1, T9s, R36e.

#### Palo Pinto opened in Schleicher field

A plugback operation in Schleicher County has opened Palo Pin-to pay in the Toe Nail field, 15 miles southeast of Christoval.

WILLIAMS OIL CO. reentered the No. 2 Harris "C," testing it for a calculated absolute open flow of 352 Mcfd from perforations 4,433 to 4,443 ft. The interval was acidized with 800 gallons 15 percent NeFe acid

Originally drilled to 5,303 ft., the

#### Andrews reentry expands Holt pool

An Andrews County reentry has expanded the Holt pool in the Cowden North field, 20 miles south of Andrews.

STELLAR ENERGY & **INVESTMENT** reentered the No. O.B. Holt, testing it to pump 95 barrels of 36 gravity crude, 2.5 Mcfd and 78 barrels of water from perforations 5,386 to 5,398 ft. The interval was acidized with 1000 gallons 15 percent NeFeHCL acid. Originally drilled to 5,600 ft., the well was cleaned out to that depth and plugged back to 5,407 ft.

#### MEETINGS

#### Landmark Users plans Tuesday meeting

The March meeting of the Landmark Users Group will be Tuesday at Arco Permian, 600 N. Marienfeld, Room 251, beginning at 11: 45 a.m. Jay Siebens, an Arco Permian geophysicist, will present "Time to Depth with Zmap Macros.'

#### SIPES to host Midland oilman Jim Henry

Jim Henry, president of Henry Petroleum Corp. of Midland, will be the guest speaker at Wednesday's meeting of the Midland chapter, Society of Independent Professional Earth Scientists. The meeting will be at the Midland Country Club beginning at 11:30 a.m.

Henry will speak on "The Future of the Oil Industry in the Permian Basin." He said he believes the future can be very bright if the people in this area fully utilize the technical expertise which has been devel-oped in the Permian Basin and exported to all parts of the globe.

He adds that low cost operations by both independents and majors are essential if the industry is to prosper in the mature producing area of the Permian Basin.

#### Bellwether receives gas purchase contract

HOUSTON – Bellwether Explo-ation Co. has received \$9.875 mil-operations, effective March 1, ration Co. has received \$9.875 million in cash in conjunction with an assignment of a gas purchase contract from Texas Gas Transmission Corporation.

Bellwether has used the cash proceeds to pay down its revolving credit facility and will become the purchaser under the gas contract which expires May 31, 1999. Bellwether's financial exposure under the contract will be fully reserved and the company will

1996

Darby Sere, Bellwether's CEO said, "We expect to be able to reinvest the cash received in the transaction in our core business of acquiring and exploring for oil and gas reserves in the Gulf Coast region.

Bellwether is engaged in the acquisition, exploitation, development, exploration and production of oil and gas properties.

MIDLAND REPORTER-TELEGRAM, SUNDAY, MARCH 10, 1996

Compressor Systems Inc. announces two new additions to its staff

GAIL SUSIK has joined the company as marketing director, based at the company's corporate and fabrication facility in Midland. LES PULLIG has joined the

company as application engineer. He will be based in Midland, working with CSI's engineering and design team.

Apache Corp. has announced two promotions

MARK JACKSON has been promoted to vice president and chief financial officer. He joined Apache as vice president and controller in 1988. In 1994 he was named vice president, finance.

MATT DUNDREA has been named treasurer. Prior to his promotion, he was assistant treasurer.

To advertise call Paul Wiseman at 697-7468 or Robert Keegan at 687-8835.

### Improve the bottom line on marginal wells with the Penny Pincher

Marginal wells can foster a love-hate relationship. You hate that they make so little, yet those little profits add up. If there were just a way to reduce operating costs while maximizing production.

People love the Penny Pincher from D-Jax because it solves both problems at a very affordable cost. It reduces the two major expenses caused by marginal wells that have pumped off: wasted electricity and damage caused by fluid pound.

Marginal wells, by definition, pump off quite often. Once that happens, the pump spends most of its stroke pumping nothing, and only a little of its stroke actually pumping oil. The electricity used to pump nothing is wasted.

The Penny Pincher monitors pump speed and shuts it off when it detects the faster speed of a pumped-off well. This allows the oil in the formation to catch up with the pump.

In fact, according to D-Jax founder and President Dee Mills, the Penny Pincher usually pays for itself in about one year, based on energy savings alone, on a three to four barrel per day well. Every year after that, the savings simply increase your profit.

The Penny Pincher also eliminates the shock to the system caused by fluid pound, which is caused when the pump hits the fluid surface after speeding through the empty space on its way down. That means Penny Pincher greatly reduces rod parts, tubing leaks and pump failures. The Penny Pincher pays for itself immediately if it eliminates one rod part.

With the dictated run time feature, the Penny Pincher can be set to shut off before fluid pound starts for up to nine cycles, further reducing opportunity for rod parts and other damage. Many operators set the Dictated Run Time to shut off early for four cycles, thereby eliminating 80% of fluid pound. Other POCs let the pump pound fluid before they shut it off on any cycle.

Many companies are still trying to make do with timers, simple devices that turn the pump off and on at predetermined intervals, regardless of actual fluid level. These cycles are usually based on an estimate of the well's production rate, not how long it actually takes to pump off.

The problem, says Mills, is that "Wells are either over pumped or under pumped. Usually they are over pumped because pumpers are afraid that too little pumping will reduce production.'

Timers cost little to install, but they can't create the savings possible with the Penny Pincher, which monitors the well and adjusts itself to the changing conditions in the field.

The Penny Pincher's LCD display also provides pump cycle times for various time frames, information no timer can give.

This information can alert the pumper to potential problems before they end up in production down time.

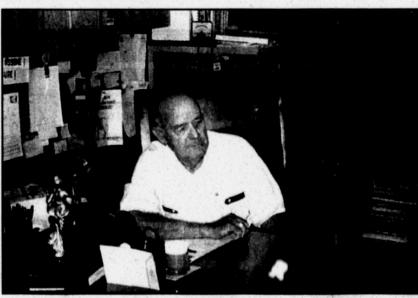

Mills recommends testing the well first. Collect the utility bills from the well for three to six months. Then install the Penny Pincher while continuing to monitor the costs for the same period afterward. The savings should be apparent. In fact, the Penny Pincher can be the difference in a marginal well's

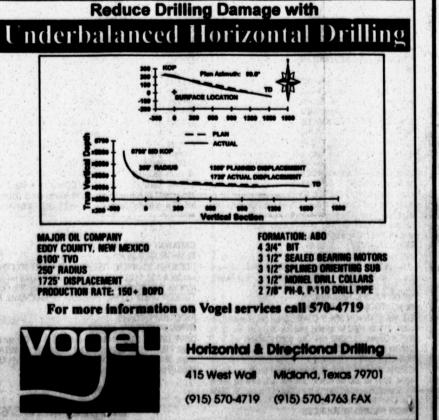

profitability. It can be what allows a well to continue pumping, rather than being shut down.

That's what people love about the Penny Pincher.

Founded in 1973 by Dee Mills, D-Jax Corporation builds and markets the Penny Pincher and dynamometers worldwide. Call them at 683-5710 or 1-800-446-3529.

The Penny Pincher pump off controller can greatly reduce operating costs in marginal wells. Here, D-Jax founder and President Dee Mills checks out a Penny Pincher before sending it out.

#### The Penny Pincher Advantage

Maximizes production while minimizing cost.

Alice Borron

- Takes full advantage of changing fluid entry rates.
- Saves lost production due to frequent workovers.
- Saves costs due to wear on rod string, tubing, pump and gear box (fewer pump strokes per day).
- Protects from fluid pound damage that causes rod parts.
- Saves energy costs by not operating a partially filled pump.
- Protects from gas locking.
- Increases the economic life of stripper wells.

#### Find out what hundreds of users have known for years ... there is a fully integrated solution to oil & gas accounting

A complete, integrated software package for any size oil & gas company. Our experienced staff and unparalleled client support combine to make OGAS one of the industry's most user friendly and cost effective software solutions available today.

MIDLAND REPORTER-TELEGRAM, SUNDAY, MARCH 10, 1996

### Phillips to proceed with gas reinjection project in North Sea field

proceed with an \$82 million gas reinjection project in the Judy-Joanne fields (J-Block) in the U.K. North Sea.

The project will enable a Phillips subsidiary — Phillips Petroleum Company United Kingdom Limited (Phillips U.K.) - and its co-venturers to begin liquids production ers' program to start production,"

BARTLESVILLE, Okla. – Phillips Petroleum Co. announced it has received approval from the United Kingdom authorities to With a state of 30,000 to 40,000 gross bar-rels per day (10,950 b/d to 14,600 b/d net to Phillips U.K.), while the gas will be reinjected for later delivery.

The reinjection project is expected to increase ultimate hydrocarbon recovery by more than 5 percent.

"Approval of this project signif-icantly advances the J-Block own-

said Wayne Allen, Phillips Petro- block 30/7a, two months ahead of leum's chairman and chief executive officer.

Mr. Allen said that while discussions related to startup and pro-duction of the dedicated J-Block gas reserves will continue, there is no basis for changing the terms of the existing gas-sales contract. The J-Block co-venturers earli-

er this month completed the production, processing and trans-portation facilities, located in

schedule. Overall project costs remain within budget, even with the additional costs of gas reinjection.

Mr. Allen repeated the company's position that the long-term economics of the J-Block project remain favorable, even though delays in production would impact earnings and cash flows in the near term.

The J-Block owners continue to

evaluate plans to produce gas from adjacent block 30/6b through the J-Block facilities. The co-venturers own these reserves, which are in communication with J-Block reserves but are not dedicated to any purchaser. Gas production from 30/6b would permit the production of associated liquids.

In addition, Phillips U.K. is continuing an ambitious exploratory and appraisal drilling program

on other prospects in the J-Block area, where the first two wells of a four-well program are being drilled.

PAGE 5H

The J-Block and block 30/6b are operated by Phillips Petroleum **Company United Kingdom Limit**ed, which owns a 36.5 percent interest. Other interests are held by Agip (U.K.) Limited, 33 percent; and British Gas Exploration and Production Limited, 30.5 percent.

### Pennzoil says Caspian Sea oil venture approved

#### By N.Y. Times News Service

Houston - Pennzoil Co. said the Azerbaijan parliament has approved the U.S. company's sec-ond big oil venture in the Caspian Sea, this time with partners LUKoil of Russia and Agip SpA of Italy.

Pennzoil has a 30 percent stake in the Karabakh prospect, which has estimated reserves of more than 1 billion barrels of oil and is located near a 3-billion-barrel project that Pennzoil and 11 other companies are developing at a cost of \$8 billion.

The Azerbaijan parliament ratified an agreement that Houstonbased Pennzoil signed in November with the nation's president, Gaidar Aliev. The agreement has an effective date of Feb. 23.

'We are especially pleased that this project is now under way, as we consider this area to be one of the premier oil basins in the world," Tom Hamilton, president of Pennzoil exploration and production, said in a statement.

Terms of the agreement call for claim.

MAXIMIZES

the partners to explore with wells and geologic surveys for three years, with an option to extend that another 18 months.

If enough oil is found to be produced profitably, the partners will have the right to develop and pro-duce the petroleum for 25 years, with a possible five-year extension.

LUKoil has the biggest stake in the venture. It has a 7.5 percent direct interest, and it shares a 50 percent stake held by a joint venture of LUKoil and Agip called Lukagip. Agip has a 5 percent direct interest and the State Oil **Company of Azerbaijan Republic** has.7.5 percent.

Pennzoil's 30 percent stake in the new Karabakh venture has been the subject of a dispute with one of its partners in the other, bigger Caspian project.

Scotland-based Ramco Energy Plc has sued Pennzoil in the U.S. to get a piece of Pennzoil's share in the Karabakh project, saying the two had agreed to be partners in all Caspian ventures. Pennzoil said Ramco has no legitimate

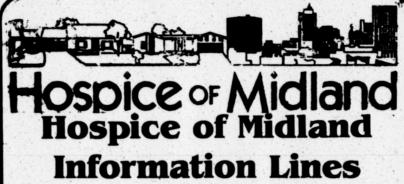

Pennzoil took a 30 percent stake in Karabakh from the Azerbaijan state oil company as compensation for \$60 million owed for work by Pennzoil and Ramco on a natural gas project, according to Ramco. Ramco said the two companies had agreed that both would participate in any projects that result-ed from their joint gas venture. Pennzoil's relationship with

Ramco began in the early 1990s when it bought into Ramco's share of the Guneshli oil field in the Caspian and agreed to pay Ramco's share of development costs. The two companies began a \$150

million project to recover gas that was being burned at existing oil platforms in the Caspian.

A pipeline system was built, and over the past year 1 billion cubic meters has been transported ashore. Pennzoil has paid operating costs that are shared by Azerbaijan, which still owes about \$150 million.

Since then, Guneshli has been merged with two other fields in the Caspian in a joint project being developed by a consortium of companies led by British Petroleum Plc and Amoco Corp.

#### Triton Energy signs agreement to sell U.S. royalty interests

DALLAS - Triton Energy has signed a definitive agreement to sell its royalty interests in U.S. properties to SASI Minerals Company, a privately held Dallasbased oil and gas firm.

Triton expects net cash from the sale, which is effective January 1, 1996, to be \$23.8 million and to book a net gain of approximately \$4 million.

The sale, subject to customary closing conditions, will include all of Triton's royalty interests in producing and nonproducing properties in 18 states, primarily in Texas, Oklahoma, Louisiana and Utah. This includes interests in about 1,500 producing properties containing approximately 5,000 oil and gas wells.

"This essentially completes Tri-ton's divestiture of its U.S. oil and gas holdings," said Thomas G. Finck, Triton Chairman and Chief Executive Officer, "and is part of our ongoing program to harvest noncore assets so that we can continue to maximize our shareholders' investment in the Company.

Triton Energy is an international oil and gas exploration company primarily focused on highpotential prospects around the world.

### ICO acquires Rainbow Inspection

international oil field services company based in Houston, Texas, announced the acquisition of the assets of Rainbow Inspection Company of Mississippi, Inc. ("Rainbow"). Rainbow, located in Brookhaven, Miss., provides a variety of tubular inspection services on new and used tubing, casing and drill pipe to customers in Mississippi and adjoining states.

Sylvia A. Pacholder, president and chief executive officer of ICO, stated that, "The acquisition of **Rainbow Inspection provides ICO** with an entry into the tubular services market in Mississippi, a

HOUSTON – ICO, Inc., an market in which ICO previously haternational oil field services has not been active. We believe this is an attractive acquisition with potential growth opportunities for expanding and enhancing Rainbow's current tubular services. In addition, Rainbow can provide a base for offering ICO's other services, including sucker rod inspection and reclamation, in a new market.

Rainbow's owner, Ray Grant, will join ICO as regional manager. ICO, Inc. serves the energy, petrochemical, and steel indus-tries by providing high technology equipment manufacturing, testing, inspecting, reconditioning and coating.

SAND HILLS (MCKNIGHT)- RE-ENTRY; PUBLIC SCHOOL

DALLAS — Dresser Industries, Inc. has changed the name of its upstream petroleum services business from Dresser Oilfield Ser-SLAUGHTER- HORIZONTAL; ZAVALLA COUNTY SCHOOL LAND sur, 996 fnl 959 fel of lab 76 ige 38 of sur, 10607 fsl 4365 fwl of unit 6219.7 acre unit. 2 mi SW of Sun-down. BHLoc: PROPOSED: 1300 fsl 1132 fwl of lab 76 ige vices to Dresser Drilling and Pro-

duction Operations. James L. Bryan, Dresser senior vice president-Operations for the drilling and production segment said, "The name Dresser Drilling and Production Operations more closely identifies our customer focus, the range of products and services, and the value we offer to the upstream oil and gas well markets which we serve.

Headquartered in Houston, Texas, Dresser Drilling and Production Operations includes a comprehensive array of products and services for oil and gas well construction and evaluation. **Dresser Drilling and Production Operations** are comprised of: Baroid Drilling Fluids, Inc. drilling and completion fluids and services; Sperry-Sun Drilling Services - directional drilling, formation evaluation, measurement-

#### while-drilling and related ser-vices; Security DBS - fixed cutter and roller cone drill bits, downhole tools and coring services; Dresser Oil Tools - production and completion tools and equipment; Dresser Wheatley - production products, valves, controls, pumps and metering equipment; and Dresser Integrated Oilfield Services - drilling and production management services.

Dresser also changed the name of its integrated drilling and production project management operation to Dresser Integrated Oilfield Services. Dresser Integrated Oilfield Services provides integrated solutions, service company alliances, and multi-divisional bundling of product and services for drilling and production operations worldwide.

Dresser Industries, Inc. is a leading supplier of highly engineered products and services utilized in hydrocarbon energy-related activities throughout the world.

### The word for the day is **WonderWare**

. . . . . . .

Dresser renames oilfield services

WonderWare™ (wun - der - war), n. Automation and control software used by REF-CHEM, which, under the skillful direction of REF-CHEM's 13 member I&E team, assists in returning control of a facility to its owner.

Commission production data on CD-ROM, will send you our statewide year-end disc with over 25 years (1/70-12/95) of production history and gas well tests for less than \$600.

MIDLAND REPORTER-TELEGRAM, SUNDAY, MARCH 10, 1996

### **RIG ACTIVITY PROFILE**

### Noble Drilling purchases offshore rig unit

Corp. has purchased one offshore jack-up drilling unit and has been notified of the acceptance of its offer to purchase a second jack-up drilling unit, both located in the Arabian Gulf.

The Odin Explorer, a Levingston 111-C independent-leg cantilevered unit, is capable of drilling in up to 300 feet of water. The unit, which the company plans to rename the Gus Androes, is presently located in Sharjah, U.A.E. The company has submitted a tender to an international oil and gas company

term of one year plus two one-year options. The company has extended a first right of refusal for the unit to this international operator. Noble Drilling has received written notification of acceptance of its offer to purchase the rig Dana, a Marathon LeTourneau 82-C independent-leg cantilevered unit, which is capable of drilling in up to 250 feet of water. Noble is currently operating the unit for the Qatar **General Petroleum Corporation** (QGPC) under a management

HOUSTON - Noble Drilling for a drilling contract to com-orp. has purchased one offshore mence in the third quarter for a possession of the rig in March at possession of the rig in March at which time drilling operations will continue prior to rig enhancements scheduled for late in the second quarter. The unit will commence a three year contract for QGPC upon the completion of the scheduled refurbishments.

Noble Drilling Corporation is a major drilling contractor with offshore and land operations in the United States, Canada, Mexico, the United Kingdom, Africa, India, South America and the Middle East.

### Western Atlas to purchase Microline Inspection

Logging Services, a division of Western Atlas International Inc., has entered into an agreement with Microline Corp. of Traverse City, Mich., to acquire technology and exclusive marketing rights from Microline relating to mag-netic flux leakage (MFL) inspection of pipelines and downhole casing and tubing.

Previously, Western Atlas has offered its customers Microline technology as part of its pipeinspection services, and these services have been well received in the oil and gas industry.

'By adding this technology to our existing inspection services, Western Atlas Logging Services

HOUSTON - Western Atlas has taken an important step in strengthening our position and ensuring our continuation as the technology leader in pipeline, casing and tubing inspection services," said James L. Gresham, senior vice president for Western Hemisphere operations.

Western Atlas Logging Services and Microline have also entered into other arrangements under which Microline will work closely with Western Atlas in expanding the technology and service applications in the area of MFL inspection services of metal tubular goods.

'Microline Corp. is pleased to complete this technology agree-

ment with Western Atlas Logging Services, the recognized leader in oilfield-casing inspection services," said Douglas W. Spencer, president of Microline. "We are confident that this long-term relationship will benefit our customers through a renewed commitment to product development and improved service.

Western Atlas Logging Services is a division of Western Atlas International Inc., a subsidiary of Western Atlas Inc. Western Atlas is a leading worldwide supplier of oilfield-information services and industrial-automation systems with total revenues of more than \$2.2 billion.

### Pogo announces successful test in Gulf of Thailand

HOUSTON – Pogo Producing Co. and its partners have drilled and tested an exploration well on the Pakakrong seismic structure. the "Pakakrong No. 1", located on Block B8/32 in the Gulf of Thailand.

Pogo and its partners will immediately begin drilling an additional Pakakrong well as a location approximately one mile southeast of this Pakakrong discovery well. Drill-stem tests were conducted

the Pakakrong No. 1, yielding calculated cumulative daily flow rates of 25.5 million cubic feet of natural gas and 738 barrels of oil or condensate per day.

The Pakakrong structure is located west of the Benchamas structure and northwest of the company's Tantawan Field.

Pogo and its joint venture partners Rutherford-Moran Oil Corp. and Maersk Olie og Gas As, each

on two of the sands encountered in hold a 31.67 percent working interest, operated by Maersk Olie og Gas As. The Thailand corporation, The Sophonpanich Co. Ltd., has the remaining 5 percent working interest in the area.

Pogo explores for, develops and produces oil and natural gas. Headquartered in Houston, Pogo owns interests in 78 federal and state lease blocks offshore Louisiana and Texas in the Gulf of Mexico.

### HALLIBURTON PROVIDES SOLUTIONS **Case History #63**

**Pin-Hole Casing Leaks Successfully Repaired With INJECTROL-G** Solution in Squeeze Operations

LOCATION OF JOBS:

Ector, Gaines, Howard, and Andrews Counties, Texas TYPE OF JOBS: Pin-Hole Casing Leak 'Squeezes **CUSTOMER CHALLENGE:** 

Repair casing pin hole leaks.due to pitting or corrosion on ection wells to satisfy Railroad Commission's H-5 Integrity

• The INJECTROL-G solution is squeezed into the leak in a method that the water phase is extruded leaving the solution's base material. This material is squeezed to a paste and eventually to a body of solid material that has compressive strength equal to the pressure applied to it. The material is permanent since it is resistant to acid, corrosion, bacteria, and

dContinent (Arkoma) \$1.93 Gulf Coast (Louisiana) \$2.94 Rocky Mountain (Wyoming) \$1.16 Injection wells to satisfy Railroad Commission's H-5 Integrity Tests or on producing wells to stop unwanted water production due to these casing leaks. The State of Texas Railroad Commission's Integrity tests require placing pressure on the injection well casings and recording it over time to determine if they are losing enough pressure to fail the test. Casing leaks can occur in the designated fresh water zones per the Texas Water Board, across intervals with poor original primary cement bonds and intervals with high influres of water that have historically been a problem to fix. fluxes of water, that have historically been a problem to fix. influxes of water, that have historically been a problem to fix. If the leaks on injection wells are not successfully squeezed and pass the H-5 test, the RRC may assess penalties or the wells must be plugged and abandoned. The influx of unwanted water production on producing wells with pin-hole casing leaks can cause formation damage, loss of production potential, and greatly increase the corrosion of tubulars in wells and on surface equipment. Many of these leaks are so small that even small particle cement cannot be placed outside of the casings in order to build a barrier to the water influx or obtain squeeze integrity. The majority of the casings involved are old and damage can be done in drill outs or tool settings. settings.

#### HALLIBURTON'S SOLUTION:

Halliburton patented INJECTROL-G Solution is utilized to squeeze the wells. Halliburton uses our knowledge and expertise of this solution and proper mixing and placement techniques to squeeze the wells.

#### **MAJOR OBSTACLES:**

MAJOR OBSTACLES: Paradigms - Both the customers and the Texas Railroad Commission had to be willing to take a 'leap of faith' that they could use a liquid solution to squeeze these casing leaks. The normal success rate using cement slurry to squeeze these types of leaks is generally less than 10 percent and usually required the casings be perforated for slurry entry. Usage of fine grind cement is successful only if the casing leaks are large enough to allow sufficient slurry to enter and not be influxed with water causing dissolution and deterioration of the cementous material.

#### **DETAILS OF JOBS:**

Well Types: Number of Wells Squeezed: Casing Leak Intervals: Rock Types:	Injection & Production 10 wells 700 to 12,800 ft. Red Beds, Anhydrite, Sandstone, Dolomite, & Limestone
BHST:	75 - 190°F
Casings:	7 in., 5-1/2 in., or 4-1/2 in.
Tubings:	2-7/8 or 2-3/8 in.
Packers:	Used on deeper intervals to be squeezed
Maximum Allowable Surface Pressure:	600 psi. to 6,000 psi.
Equipment Used:	HES RCM II & Chemical
Transport	Odessa, Brownfield, Snyder, Texas

#### **JOB PROCEDURES:**

Tom Zeltman

Rig up Halliburton to perform the INJECTROL-G Squeeze jobs as follows:

· Determine the severity of the casing leak by pressure leak-off or maximum rate achievable below maximum pressure restriction.

· Mix and pump desired amount of INJECTROL-G Solution to spot across leak interval with excess in casing or tubing above

Displace to a balanced spot with fresh water if required.
Pick up tubing to a point above the top of the solution and reverse out casing if desired.
If a packer is utilized, set and squeeze to the required pressure in multiple steps until the pressure is holding at the desired psi. A packer is not utilized if the interval to be squeezed is at a shallow depth.

HALLIBURTON

cleaned out through the squeezed interval with tubing. They are then pressure tested to meet RRC Requirements if an injector or swabbed/pressure tested to determine if water entry has been shut-off if a producer.

#### **RESULTS:**

The success on nine out of ten wells performed by Halliburton has been a squeeze achieved on the first attempt. It took two attempts on one of the wells due to the high leak-off rate. The amount of INJECTROL-G placed outside the casings is generally 1/4 to 5 bbls. of solution with between 250 to 1,000 gallons of material used.

#### **CUSTOMER TESTIMONIAL:**

"The effectiveness of the INJECTROL-G Squeeze for pin-hole casing leaks is amazing. We are able to use this very economical material and workover method to get squeezes on wells that normally would have to be abandoned or have a liner run on them. The method of squeezing a leak without having to go in and drill-out a casing is also beneficial in cost and less likely to damage old casings

#### **UNIQUENESS OF JOB:**

The Halliburton knowledge and operational experience in mixing this type of liquid material and using expert advisory and design knowledge for procedures has set us apart from competition. The use of INJECTROL-G is exclusive to Halliburton on their jobs.

#### **FUTURE WORK:**

Due to the success and economics of performing this type of job, the customers are now calling-in and ordering the INJECTROL-G Solution for their pin-hole casing leaks and also informing other customers of their success. The number of old wells that have very poor casings in them with potential old wells that have very poor casings in them with potential pitting, poor cement bonds, and high water influxes is estimated to be over 100,000 in the Permian Basin alone. Identifying potential applications of this technology and transferring concepts and problem resolutions for future success on problems of this nature are the concerns of our customers. Available products and technology that are being provided by Halliburton to resolve problems associated with casing leaks and poor casing integrity is necessary to satisfactorily provide economic methods to our customers. INFORMATION TO DETERMINE ECONOMIC BENEFIT TO THE CUSTOMER

#### COST ANALYSIS:

\$25,000 \$20,000 \$15,000 \$10,000
