In conference play, the Bull-
dogs have tied one, lost one
and won one.

This week, however, after a
series of very stiff workouts,
the boys are in excellent shape
and with sufficient support
from home folks who will fol-

be able to win this one by a

Seymour Raps Burk Bulldogs

After knocking off the highly
favored Electra Tigers here
recently, the Bulldogs went to
Seymour last Friday night and
came up on the short end of a
46 to 6 score. Somehow they
just couldn't seem to crack the
Seymour line, or break up the
power drives hurled at them by
the Seymour lads.

nouncements will be made lat-
er.

FIRE PREVENTION WEEK
OCTOBER 8 TO 14

"FerHevin's Sake Be Careful!"

As Fire Prevention Week got under way, Fire
Marshal C. R. "Dick" Chambers had this to say:
"FerHevin's sake be careful! @ZV; I ought to know!"
And he should. Monday he received severe burns,
which only proves it's easy to get scorched.

Green on top, but dry as powder underneath
well describes the rank growth of weeds and grass
which covers too much of Burkburnett. Tuesday
the Fire Boys answered a call out on West Third
where knee high grass and waist high weeds had
caught fire and broken out of control.

Be more than cautious with your trash fires.
Just because green vegetation surrounds the trash
barrel is no cause for a feeling of security. That
green stuff has enough dead, dry undergrowth to
burn like gasoline soaked pine shavings.

If you must burn vacant lots, etc., do so with
a little judgment. First take a hose and wet the
edges good where you want the fire to stop. Then,
wait for a still day, and keep the water hose close
at hand. After the area is burned off, go over it
and soak down all smoking objects such as wood,
and other things which may blaze up and start
a jim dandy fire where you don't want it.

Another thing: If you have to call the Fire
Department, take time to give the exact location,
then have someone meet the fire truck and direct
the driver to the fire. Many fires in the future will
be in almost unaccessible places, and precious time
can be lost while the firemen are trying to figure
out a way to reach the blaze.

Fire Marshal Painfully Burned

Fire Marshal C. R. (Dick)
Chambers was burned painfully
Monday afternoon when some
gasoline exploded. His hair was
all burned off, right arm sec-
ond degree burns, left arm
blistered and painful blisters on
his face and neck.

He had gone to stand by with
fire fighting equipment while
an old abandoned cellar was
being burned off. Previously a
quantity of gasoline had been
poured on the weeds and grass.
Not knowing about the gasoline
Dick struck a match and tossed
it on the heap of rubbish.
The explosion knocked him to
the ground and possibly saved
his life as the flames fanned
out over him as he lay almost
unconscious.

This happened during Fire
Prevention Week, reminding us
again that fire is dangerous to
both property and humans. DO
BE CAREFUL—this week and
every week in the year.

Curbing Progresses On West 3rd Street

City Manager P. A. Wiggins
and his crew of concrete men
have really got things rolling
out on West Third Street. The
curbing contractors gave up
after trying three weeks to get
organized. Last Friday they
threw in the sponge and left
it up to the City. Wiggins took
O. D. Bernethy and Louis John-
son from the regular City crew,
rounded up several more work-
ers Tuesday and tackled a job
that others failed on. In four
hours the new bunch laid 180
feet of curbing, far more than
the former crew had been able
to put down some full days.

Today the gang should reach
the end of the line running
West on the north side. The
South side is already finished
on that section. This brings the
complete job up to Hardin St.
and another week or so should
be sufficient to bring the job
all the way to the bridge at
Bell Oil & Gas office.

Dr. J. B. Ohern Entertains Lions

Tuesday night Lions Ray-

had charge of the program.
Teal introduced Dr. J. B. Ohern
who entertained the club by
explaining and demonstrating
the difference between the con-
scious mind and the sub-con-
scious mind. As assistants he
called Lions Frank Kelley, Roy
Magers, James Mason and Jim
Frye to the stage. In one deli-
cate experiment concerning the
sub-conscious mind functions,
all the subjects reacted favorably
except one. After several
futile attempts for reaction on
this one subject, the entertain-
er threw up his hands and said
"I don't understand it. I give
up."

J. C. Boyd, Jr., had as his
guest Judge Hall from Wichita
Falls. D. F. Douglas' guest was
Thomas Bell, local Vocational
Agriculture teacher.

BRIGHT OCTOBER

Color is beginning to creep over local trees after one of the wettest and greenest summers in many years. The elm, maple, sycamore and cottonwood trees are beginning to turn yellow and a few leaves speckle lawns. In October, gold is predominate, in sunflower, marigold, and goldenrod (accompanied by hayfever). We who condemn the heat of the sun in summer, seek its pleasantness in the fall. This is indeed the month that shows the work of the artist's brush, wielded by Nature.

In the more wooded sections of our country, this is the most beautiful time of year. Every color of the rainbow is reflected by leaves as they reluctantly turn loose of their branches and flutter to the earth.

NATIONAL BIBLE WEEK

The Bible is our rule and guide for religious practice, the source of our faith in God, the inspiration upon which all civilized living is built. The Bible, the greatest book seller of all times, has an increased sale during war. Parents tuck the Book into a soldier's kit, seek ownership for their own reading to find rest and peace for heavy hearts. There is no literature of any time to equal your Bible. As a literary masterpiece, a historical narrative, it might not have lived alone, but because of the comfort and solace it brings the believer, the unfortunate and forsaken who seek its pages for comfort and strength, the Bible has maintained its steadfast hold upon mankind. It is indeed, the Book of Books.

YOUTH SPEAKS

In Washington, early in December, there occurs the 1950 mid-century White House conference on children and youth. Now numerous local cities have formed committees on civic, education and social welfare leaders, who are making regional surveys, taking notes, to send to this Washington conference to assist in evaluating youth's problems, the potentialities of children. Folks often get so enthusiastic about presenting the adult angle they forget to check with the adolescent.

In Camden County in New Jersey, a committee of elders spent five and a half hours discussing, reading reports, quoting statistics and trends. At the end of this time, a young high school girl came into the room and, in a few minutes, gave a pretty concise opinion of what youth needs and wants. She said: "We want understanding from our parents, our schools and our community. We want to do modern things. We want to lead our own lives but we also want to take part in the family discussions, share in the budget planning, have it explained why we can't afford this or that. In fact, we want to be considered old enough to share in some of the secrets of the family." Parents might well consider the words. They may be the answer to a few of their own problems at home.

IT WON'T BE LONG

Christmas packages for our Armed Forces, outside of the continental United States, will be accepted by the post office between October 15 and November 15. Recalling past experiences with Christmas boxes, mailed to travel within the states, we should use more care in wrapping and addressing. Packages should be of strong construction, securely tied and sealed, addressed legibly by printing in ink or typewritten and on the wrapper rather than on pasted label. We want to send Christmas to Japan, Korea, the Pacific Islands and remote areas where Americans are "holding the fort." Let's make it bright by making it right.

Ought To "Polish Up Her Traffic Manners!"

Spent most of yesterday over at the Court House. "Tiny" Fields, the biggest and fastest-talking of our three policemen, was holding forth about his traffic troubles.

"Women drive just as good as men do," Tiny said, "and just as bad. For instance—a girl in a convertible today. She started a three-block tie-up all by herself.

"She's creeping down Main Street—left hand stuck out and sort of waving around. Never turns right or left, never stops. But, of course, everyone behind her thinks she's signaling about something. Nobody dares to When I stop her and ask what she smiles sweetly and says that she's drying her nail pol-

From where I sit, that girl wrapped up in themselves, never notice they're not being to others. Our neighbor has to drive in safety—just as he right to enjoy a glass of beer, all respect the other fellow's rights.

Who Runs America?

the Congress? the President?

OR YOU AND THE MAN NEXT DOOR?

RUNNING AMERICA is the joint job of 150,000,000 people. It's the biggest job in the world today—keeping it running for liberty and for freedom. And the whole world's watching to see whether Americans can do it!

IN MUCH OF THE WORLD today, the people have resigned from running their own countries. Others have been quick to step in—first with promises of "security"—and then with whips and guns—to run things their way. The evidence is on every front page in the world, every day.

FREEDOM COMES UNDER ATTACK. The reality of war has made every American think hard about the things he's willing to work and fight for—and freedom leads the list.

But that freedom has been attacked here recently—just as it has been attacked in other parts of the world. One of the most serious threats to individual freedom has been the threat of Government-dominated Compulsory Health Insurance, falsely presented as a new guarantee of health "security" for everybody.

THE PEOPLE WEIGH THE FACTS. In the American manner, the people studied the case for Socialized Medicine—and the case against it.

They found that Government domination of the people's medical affairs under Compulsory Health Insurance means lower standards of medical care, higher payroll taxes, loss of incentive, damage to research, penalties for the provident, rewards for the improvident.

They found that no country on earth can surpass America's leadership in medical care and progress. They found that able doctors, teachers, nurses and scientists—working in laboratories where Science, not Politics, is master—are blazing dramatic new trails to health for Americans—and for the world.

THE "GRASS ROOTS" SIGNALS CONGRESS. In every community in the Nation, people stood up to be counted on this important issue. Thousands of local women's clubs, civic groups, farm, business, religious, taxpayer, medical, educational and patriotic organizations spoke out—giving the great United States Congress its unmistakable Grass Roots signal from home!

And ever watchful, ever sensitive to an alert people, The Congress saw that signal, and heard the people speak out, loud and plain. That's democracy in action. That's the American way!

Today among the 10,000 great organizations on militant public record against "Compulsory Health Insurance" are:

General Federation of Women's Clubs	American Legion
American Farm Bureau Federation	National Association of Small Business Men
National Grange	United States Chamber of Commerce
Veterans of Foreign Wars	National Association of Retail Grocers
National Conference of Catholic Charities	National Retail Dry Goods Association
American Protestant Hospital Association	American Bar Association

Doctors of this Nation are grateful that the people refused to be wooed by the fantastic promises of this un-American excursion into State Socialism. Doctors of America are dedicated to serve their fellow citizens at home and their comrades in uniform, wherever service to this Nation may take them. And the thing they stand ready to fight for—to sacrifice for—to die for—is not the alien way of life of Socialism, but the pridelful security of a free and self-reliant people!

THE VOLUNTARY WAY IS THE AMERICAN WAY!

Throughout the Nation, free men and women, working and planning together, are finding the American answer to every question of medical service, care and cost. Hundreds of Voluntary Health Insurance Plans are in healthy competition—sponsored by doctors, insurance companies, hospitals, fraternal organizations—by industry, agriculture and labor. Today

In America—70 million people are protected by Voluntary Health Insurance! Throughout the Nation, families are insuring themselves against the major costs of illness—at reasonable, budget-basis prices. Voluntary Health Insurance takes the economic shock out of illness. Protect your family now. For information, ask your doctor—or your insurance man.

An American's greatest heritage is the right to learn the facts—and to speak his mind. Maintained with honor and used with sincerity—that right will guarantee forever that

Every so often some one with a yen to get even with all Inspectors brings us a copy of the following verse. This week, for the umteenth time, we publish it again.

Bring back again those happy days Of Caesar, Brutus, Hector. They bought and sold, they lived and died With never an Inspector.

In caveman days, to get a wife Upon the bean you cracked her, Then dragged her home, but nowadays, Both first see an Inspector.

In Eden's garden, Mother Eve With a few leaves bedecked her. The fruit they ate, today would wait 'Till passed by an Inspector.

In other days, out in the park We loved our girl and necked her. Today you try it in your car And quick, comes an Inspector

We send our little girl to school

To teach and correct her. But all the day it seems that they Examine and inspect her.

They fix her eyes, her teeth, her nose, Until they've almost wrecked her You'd be surprised, the things that she Must show to some Inspector.

The little hen once laid her eggs As Nature did expect her. But now each step, from nest to nest Is checked by an Inspector.

Her coop, rooster, everything With which they can connect her The farmer, dealer, grocer, all Is bossed by some Inspector.

The cow must not give up her milk For beef you can't dissect her Unless the smell of all her parts Suits some darn fool Inspector

When all is ended and old Nick Has got each malefactor, We hope in each hot spot in H- There sizzles an Inspector.

Attorney Gives Facts On Legal Controversy

Dallas, Texas—Wallace Hawkins, general counsel and vice-president of the Magnolia Petroleum Co., in a book just published, reopens a famous legal discussion that has held interest for historians for almost 100 years.

"The case of John C. Watrous," published by SMU's University Press, is the first complete study ever made of this famous Texas controversy . . . which had national significance. Watrous was the first Federal judge for Texas, appointed by President Polk in 1846 to preside over courts in Galveston, Brownsville, Tyler, and Austin. From almost his first day on the bench Watrous' career was a stormy one. As Attorney General of Texas, he had made a number of political enemies, who when he ascended to the bench, charged him with "high crimes and misdemeanors." The accusations grew out of certain land-grant deals—the fever of land speculation gripped many Texans of that day, both in high office and out.

Through four impeachment trials and congressional investigations, Judge Watrous successfully defended himself, but there has remained a cloud on his name.

In "The Case of John C. Watrous," Hawkins sets forth the many issues involved, but does not express an opinion on the case; he leaves the reader to judge for himself the guilt or innocence of this stormy petrel of early Texas history. A valuable feature of the new book is the inclusion of facsimiles of important letters and court writs, all published for the first time.

Wallace Hawkins, also the author of "El Sal del Rey", has interested himself in Texas legal history since he served in the Attorney General's office in the early twenties. He joined the Magnolia's legal department in 1926, becoming general counsel in 1939. He is vice-chairman of the mineral-law section of the American Bar Association and a trustee of the Southwestern Legal Foundation, with new quarters on the SMU campus to be opened soon.

YOU IN THE CHURCH THE CHURCH IN YOU

Character is a by-product of the church. It is here that young and old alike are showered with benedictions that fortify and influence for a better citizenship and a stronger democracy. In the church the ministerial are molding religious character. Statesmen today declare that the church alone can furnish leadership to handle the affairs of state in these perilous times. Then we with our children should go to the church of our choice on Sunday. "You in the Church and the Church in you" form a combination for good. Be a regular CHURCH-GOER and a daily BIBLE READER.

Williams Newspaper Features
P. O. Box 211, Ft. Worth, Tex.

On the tip of most every tongue, 'civilization-wide,' the dreaded story of ATOMIC BOMB is being whispered. Hardships, infirmities, agonies and conceivable distress, only partially paint the horrible scene which must follow Atomic Eruption. O Lord, give us strong men of courage, and men who fear... men imbued with certain principles of justice and brotherly love, to guide in these History-making days.

The age of the harnessing of God's minute atom has long since been a reality. Skilled scientists have celebrated the occasion for years. Man now has the achievement and must control its use. It is time for the genuine love of God to reign the hearts of men if civilization is to survive.

When it becomes practical for the ingenuity of man, as is now the case, concoct instruments of inconceivable power that can rip the earth into canyon lift and wreck 'skyscrapers' more easily than a strong man can break a straw and with the heat of Hell burn to dust every object near the point of its eruption... then, brother, it's time for all mankind to 'GET ON SPEAKING TERMS WITH GOD.'

The whole world seems to be in constant fear of this terrific weapon. Nations seem to be at 'loggerhead'... they do not trust each other. Their acts and sayings are questioned; their conclusions censored. They are in a race to avoid calamity of the immortal phrase, "TOO FEW AND TOO LATE."

Christians must meet the challenge of the Atomic Age. The doctrine of BROTHERLY LOVE must prevail. This is an era when giants in the field of business and fabulously rich in the material wealth of the world, are scattering their seed in the interest of religion. The church must not be denied. Help keep her work going by attending your church regularly. Help her mold men to control the Atom.

Watch Out For Fowl Cholera

Sudden death and high mor-
 tality characterize acute fowl
 cholera, one of the most de-
 structive of poultry diseases.
 Usually striking during the
 cold, wet weather of fall and
 early winter, cholera is often
 an unnoticed invader until the
 birds are found dead under the
 roosts or in the nests. The on-
 set of this disease is so rapid
 that death frequently results be-
 fore outward symptoms are ob-
 served.

However, when birds do linger
 on briefly before dying, they
 may show these symptoms—
 sudden listlessness, ruffled
 feathers, loss of appetite, yel-
 lowish-green diarrhea, and a
 dark purple discoloration of
 the comb, face, and wattles. A
 postmortem examination of an
 infected bird usually reveals a
 liver that is light in color,
 either overall or in streaks.

Tiny Hemorrhages Evident
 Pinpoint hemorrhages may al-

so be noted on the liver of the
 infected bird. Breast, heart and
 muscles may be dark in color,
 or show signs of hemorrhaging.
 A characteristic foul odor is
 usually noticed when a cholera-
 affected bird is opened.
 In order to be certain of the
 diagnosis, it is best to have it
 determined by a poultry dis-
 ease specialist. Cholera organ-
 isms can be seen in the fowl's
 blood with the aid of a high-
 powered microscope.

Specific Medication

Against the ravages of acute
 fowl cholera, specific medica-
 tion plays an important role.
 One of the newest drug com-
 pounds of value in treating
 this disease is sulfaquinoxaline.
 When this agent is administered
 either through the feed or the
 drinking water, immediate loss-
 es from mortality are usually
 checked in a short time.

Sanitation is also important

in controlling cholera in the
 flock. Move affected birds to
 clean ground or a clean house.
 Many poultrymen vaccinate
 against cholera with a killed-
 culture bacterin. This step may
 be taken anytime and may be
 repeated as often as necessary.

Morning Worship, 11:00 A.
M. Sermon topic: "What Will
You Give?"

What would a man, or a na-
tion, be profited if he (or it)
should gain the whole world
and lose his own soul? The
greatness of our nation can
best be measured by the
strength of our faith in God.
While it is very important that
we keep our nation strong in
order to keep foreign aggressors
from seeking to destroy us,
it is equally as important to
guard that which makes us a
great people, our religious her-
itage. Worship God this Sun-
day and every Sunday in the
church of your choice.
