Souls In Conflict At 1st Baptist Church Feb. 4 At 7:30 p. m.

SINGULARLY ENTERTAINING SPIRITUALLY UPLIFTING... AND DOUBLY REWARDING... beyond any doubt!

Billy Graham in "SOULS IN CONFLICT"

"Souls in Conflict," newest film release by Billy Graham Evangelistic Films, Inc., will be shown in Burkburnett on Feb. 4th at 7:30 p. m. local arrangements are in charge of Rev. Leroy Meyers, and the film will be shown in the First Baptist church. "Souls in Conflict" was filmed during Graham's world-publicized London Crusade. It is a full length film in color and it is through screen presentation such as the one scheduled for Burkburnett that the Graham organization anticipates surpassing the success of an earlier film, "Mr. Texas," described as "the worlds first Christian Western," which played to more than 5,000,000 persons in its first two years of showings, and to which 135,000 "decisions for Christ" are attributed.

The Story of "Souls in Conflict" encompasses the lives of three typical individuals, troubled with the present and completely confused about the future. Joan Winmill, star of the British TV thriller, "Epitaph for a Spy," plays an actress; Eric Micklewood and Charles Leno portray a jet pilot and a factory worker, respectively. Their need for a soul satisfying religious experience is realized when each attends one of Graham's meetings in Harringay Arena, London's vast stadium.

Your Home Could Be Destroyed!

YES, your home could be destroyed. I know two places where homes were one time beautiful and business thriving. Today, those places are no more than ghost towns with most of the buildings closed and practically all of the houses either torn down or moved from their foundations to another city.

The people never dreamed that an absence of what we call "A Home Spirit" was the real reason for this ghost town. The empty buildings and vacant lots, with only a foundation where once was a happy home, were mock reminders that once theirs was a thriving community.

The people, who were the finest that could be found anywhere, never stopped to realize that they were needed in their own home town. It is possible that trading at home could have built a progressive little city and avoided another ghost town.

If you and I will trade in our city, we will not only preserve our homes but build a better Burkburnett with better schools, parks, streets, youth centers, etc.

If you are in another city and see an article or item that you need, please wait, buy it at home and have a part in building a progressive Burkburnett.

Remember, to do this we need your help and we feel that you will understand and co-operate in a way that will make our city bigger and better in every way. Weldon Wright, Manager Chamber of Commerce

FOR PRIVATE HOMES

We don't know whether Marco Polo was having trouble that way, but for us today, the problem of privacy seems to loom larger and larger.

As our communities grow, houses get closer and closer. To many "view" windows merely give us a view of the neighbors and vice-versa. And as our lives grow more crowded with duties, problems and distractions, psychologists say we've got to shut out the world now and then.

But still the difficulties can't be too new. The Venetians must have been having trouble living their own lives back in the fourteenth century, too. At least, we know that when Marco Polo brought those adjustable slat blinds back from far Cathay, or wherever he found them the home folks went for them in a big way.

They found, as we have six centuries later, that what are now called Venetian blinds not only bring us the blessed mental security of privacy, but allow for venetian and provide control of heat, light and air at the same time.

And since these versatile blinds may be had in almost any color, with harmonizing or contrasting tapes, and the color effects change as they are opened to varying angles both by day and night, they have also provided a field day for the interior decorators.

Certainly, a device that has been steadily gaining in popularity through the centuries must have a real contribution to make to distraught humanity.

At least, it looks as if Marco Polo's greatest discovery is here to stay.

A DOUBLE SOCKET

Suppose you wanted a double socket to plug into an electric outlet. Obviously, you'd find one without the slightest trouble, and for very little money. It is a stock item not only in hardware and electric stores, but in many variety, grocery and other retail outlets. All stores are competing for your business, whether the item be a small one, like the socket, or an appliance costing many hundreds of dollars.

Things are different indeed where there is no competition, and the state is the sole judge of what shall be sold and what the price shall be.

Marguerite Higgins, the distinguished foreign correspondent, tells of her search for a double socket during a recent visit to Moscow. The hotel didn't have one. Neither did any of the stores she toured. She was finally offered one by an individual, for \$10. However, this socket didn't work. Some five days later, a workable socket was procured, and Miss Higgins was able to operate a heater and have light at the same time.

This may seem a trivial matter. But that double socket is an excellent symbol of a difference between a free competitive economy, such as we enjoy, and a controlled, state-bossed economy under which the Russian and many other peoples live. Next time you enter an American retail store, with its abundance of stocks, its excellent display and services, and its competitive prices, you might offer a little prayer of thanks not only for the material abundance our system provides, but for all the other freedoms that are inextricably related to economic freedom.

Shhh! DON'T ASK

In a telegram of greeting to the Chicago huddle of the Republican National Committee, President Eisenhower praised the party's "Splendid Record," and said: "I shall do everything in my power next year to help you report the record accurately and fully to the country."

A few days earlier, Chairman Len Hall had reported a private session at Gettysburg that he thought the President would run again "if he feels he is able"

Mr. Hall stressed that this was his personal opinion. What's Yours?

Notes from County Ag. Agent and HD Agent

Price trends and a decline of income indicates that farm families must add income from farm sources, or reduce their expenses in order to maintain the present level of living. Home production of food also offers a hedge against lower cash incomes.

Since 1950 the proportion of employed farm persons working non-farm jobs has continued to rise. Six percent more farm families had non-farm jobs in 1955 than in 1950. The 1954 census shows 22 percent of the farm families in the labor force as compared with 7 percent four years ago.

The number of persons on farms has dropped 3 million in the past five years. The decline has reduced the number of farm families to 13.5 percent of the total population, decreasing an average of about 600,000 per year.

Because of facts such as these, rural homemakers and home demonstration club women have become very interested in the idea of better business in the home. The home demonstration club women are beginning their work this month. The leader-demonstrators are making plans for work in their own homes.

Mrs. Fritz Tennant is the county economics leader-demonstrator for the Valley View home demonstration club. Mrs. Tennant plans to keep a record of all family expenses. This record will help with their future planning and will be a great help at income tax time. Mrs. Tennant will also get her birth certificate. Everyone needs a birth certificate at some time in life and the earlier they get it, the easier it is. Mrs. Tennant will also give demonstrations and pass other information on to her club members.

Mrs. C. A. Grisham, from the Barwise Home Demonstration club is making a record book and plans to keep accurate records in the year to come.

Mrs. Grisham is using a suggested guide, from the county home demonstration agent's office, to make the record book. Anyone may receive this guide by writing Miss Thelma Wirges, 305 Federal Bldg. Wichita Falls.

Specialists reports show that many improvements have been made in rural areas of Texas in housing and equipment facilities. Despite this, many rural families still have a long way to go to meet the level of living which is taken for granted in urban areas.

The following club boys will enter steers this week in the Ft. Worth fat stock show. Frank Morton, William Morton, Jim Barbour and Edward Brock.

The steers will be taken down to Ft. Worth Jan. 25th and will be accompanied by B. T. Haws, county agent and Allen Turner, assistant county agent.

Sermon, "Life to be Found, Must be Life Laid Down".
Evening Service, 7:00 o'clock.
Fourth Chapter of Acts.

The Apostle Paul had been charged with heresy and sedition and was being tried before Festus and Agrippa.

Paul was allowed to defend his preaching and in doing so, told the two rulers of his conversion experience with the Master. So convincing was his defense that Agrippa replied, "... almost thou persuadest me to be a Christian".

The reply of Agrippa is typical of a lot of folks today. They are in every respect fine and decent people. They are law-abiding, sincere, honest, hard-working, clean-living, peaceable folks. They go to church services and sing the hymns, listen to the prayers, hear the sermon, teach their children right from wrong, and are, in general, the

"salt of the earth" type people. But one thing they are lacking, they have never met the Master face to face. They believe Him, love Him, even fight for Him. But to step across the line and confess His name unto their salvation they will not. They are not deliberately refusing—they just "almost" do it, but not quite. What a terrible thing to stand before the great judgment and hear the Master say, "Well you almost made it but not quite."

You see, almost just doesn't do the job.

PERFORMANCE made it the Largest Selling "8" in the World...

the FORD V-8

Just look at these official registration figures for the first 11 months—January through November, 1955

Here's why!

People just naturally go for 8 cylinders in the FORD package!

And to a world record extent! Just think, in the first 11 months of 1955 alone, 344,496 more people bought Ford V-8's than bought the two other low-priced competitive eights combined! They even bought 396,589 more Ford V-8's than the next competitive Six!

Of course, the reason the Ford V-8 is the

largest selling eight-cylinder car in the world is that more people like its brand of performance—the kind that comes with the car!

These people aren't amateurs in judging engines. Nearly 24 years of building Ford V-8's to supply their demand is convincing proof of that.

And the Ford V-8 of today is the best yet... by a country mile!

Smoother and quieter—you can scarcely

hear it, even with the hood up! Sassier—just ask the highway patrol officer who drives one. He knows it takes a Ford to catch a Ford!

And, for the very practical question of durability—ask a Ford cab driver. He knows how Fords take it days on end.

So, if it's performance that you want—and wrapped like a gift—the '56 Ford V-8 is your baby.

Come in... try it today!

Mrs. Reagan made the Mississippi swamplands very real as she told the humorous and heart warming story of the love of the boy, Skeeter, for his dog, Lady, the queer little dog he had found in the swamps. Uncle Jess, considered by all as shiftless, realized the importance of mutual respect and confidence between a boy and his elders.

This training made it possible for Skeeter to later make the

heart-breaking decision to give up his dog, Lady, and send her back to her wealthy owner. Through this act, Uncle Jess knew that his prayers had been answered and that Skeeter would grow up to be a "fitting man". Mrs. Reagan concluded her review by stating that Skeeter illustrates how we gain individual strength through responsibility.

The door prize was won by Mrs. O. E. Melton.

Delicious refreshments were served to the following: Mesdames Joy Sessums, L. Mathis, Felix Kindel, A. R. Bunsine, L. W. Brocker, B. N. Cauthorn, I. E. Harwell, W. H. Holt, W. J. Lacy, J. D. Majors, O. E. Melton, R. P. Reagan, J. H. Rigby and S. S. Reger.

Research Study On Lung Cancer

Nearly every adult in Burkburnett is concerned directly or indirectly, with a bit of unusual detective work that has just been completed.

The half-million dollar "investigation" concerns lung cancer. Results of this latest research on lung cancer appears in the current issue of the "Atlantic Monthly." A medical and scientific director of the American Cancer Society, Dr. Charles S. Cameron, has written the article entitled, "Lung Cancer and Smoking — What We Really Know."

This account of the association between cigarette smoking and the growth of lung cancer, is a calm report of known facts and statistics," says Charles M. Crowell, president of the Wichita County Unit of the American Cancer Society. "It may save lives," Crowell stated.

According to the article, tobacco has not been proved guilty of causing lung cancer, but tobacco has been shown to have been on the scene of the crime.

Sifting the facts, Dr. Cameron says, "The lung cancer death rate curve suggests that whatever agent is responsible for the present increase in cancer of the lung is of recent appearance in terms of its current prevalence, did not involve men who are beyond the age of 70, but did involve men who are 65 to 70, and in the light of usual exposure period necessary to produce cancer, about twenty to thirty years ago. This puts the critical exposure period in the 1920's and early 1930's, when the present susceptibles were relatively young men."

The author examines a number of suspicious substances which are inhaled and then asks "What are we inhaling which is widespread, which is more prevalent in cities, which is recent, which is increasing, and to which more men than women are, or

rather have been exposed?" After dealing with other possibilities, from industrial fumes to motor vehicle exhausts, the article states:

In the twenties, cigarettes took the inside track, and by 1935 were exceeding all other forms of tobacco use (including chewing) as measured by pounds consumed per capita. Expressed another way, during the past thirty-three years there has been a 450 per cent increase in the volume of cigarettes consumed per person in the United States.

Dr. Cameron points out that a survey made from the American Cancer Society indicated that the death rates from cancer of the lung were at least five times higher in the heavy cigarette smoking group than in non-smokers.

The article concludes by stating that the ACS "does not propose to tell the public not to smoke. It does intend to equip the national conscience with the information by which it can make up its own mind fairly. If time should establish the innocence of tobacco, such a course will prove less blameworthy than failure to suggest caution."

Crowell says, "Everyone in Burkburnett who is old enough to smoke should be interested in reading this article for the light it sheds on the lung cancer-tobacco problem."

He also stated that the American Cancer Society information Center, 1302 Ninth Street in Wichita Falls, Phone 3-2253 will be glad to provide additional information on cancer to all interested persons in Burkburnett. Films on lung cancer, breast cancer as well as general information on cancer are available to all groups of ten or more interested people for the asking. Crowell added. The Burkburnett representative on the Wichita County Unit Board of the American Cancer Society is Mrs. Madell Ellis, RN. For further information, people are invited to contact Frances Jane Muenster, the above listed Wichita Falls address and phone number.

Adult Classes At MU Slated

The Adult Division of the Midwestern University Evening College announced today that the new 9 week class schedule includes 26 courses. The new non-credit nine week adult classes begin Monday, Jan. 20th.

Registration should be made now. Director Dr. Louis H. Dobbs stated. Some of these classes such as ceramics, weaving, typing and others are limited to a certain number of students because of the physical equipment involved. Every effort will be made to include everyone who wishes to take advantage of these courses, although only a limited number of students may take such above courses each night.

The Adult Education program, which was started in September with thirteen classes and 240 students, has proved very popular. Anyone may enroll in these non-credit classes. We want to offer the best service possible to Wichita Falls and community.

Dr. D. L. Ligon, acting president of Midwestern University stated. We feel that the Adult Education program is fulfilling a particular need to those who do not wish to pursue a degree, yet who wish to continue to learn in order that they may be better workers, citizens and homemakers.

The objectives of Midwestern University Adult program is to meet the needs of the people of Wichita Falls and surrounding areas. Any class will be organized, day or night, provided there is sufficient interest to warrant such offerings, Dr. Dobbs stated. Representatives of the University will be happy to meet with any group to discuss and organize courses which will meet their needs. Twelve enrollees are necessary for the formation of an adult class.

Among the courses which will be offered beginning Jan. 20th are the following:

Monday evening classes — Beginning shorthand, intermediate shorthand, Advanced shorthand, real estate and insurance.

Tuesday evening classes will include speed (improvement) reading, general mathematical

review, ceramics, structural and historical geology, duties of a receiving clerk, music and literature, public speaking and weaving.

Wednesday classes are everyday English and grammar and the world of life.

Thursday classes scheduled are child development, bookkeeping, personnel management, blue print reading, ceramics, oil painting, interior design, weaving, advertising and typing. The typing class includes beginning, intermediate and advanced students.

Dr. Dobbs stated that the class schedule bulletin, which includes the course description, room number, teacher and other pertinent information, will be mailed to those requesting them. These courses are practical in nature and are geared to meet the needs of the people in these modern times. Much of the content of these courses, Dr. Dobbs related is developed upon the needs of those enrolled. Every effort will be made to build the classes around the needs of the people seeking knowledge of any kind, whether vocational, cultural or recreational.

Nothing without wings climbs like a '56 Chevrolet!

The new '56 Chevrolet handles hills like they aren't even there! Aim it up a steep grade . . . and you'll see why it's the Pikes Peak record breaker!

Ever level off a mountain with your foot? Nothing to it. Just point this new '56 Chevy uphill and ease down on the gas.

In the merest fraction of a second you sense that big bore V8 lengthening out its stride. And up you go with a quiet rush of power (hydraulic-hushed valve lifters now in all engines—V8 or 6) that makes a mountain seem as flat as a road-map!

For nothing without wings climbs like a '56 Chevrolet! This is the car, you know, that broke the Pikes Peak record. The car that conquered towering grades and vicious switchback turns to prove its superior performance, handling ease and cornering ability.

These are built-in qualities that mean more driving pleasure and safety for you. You can also have such safety features as seat belts, with or without shoulder harness, and instrument panel padding at extra cost.

You've a choice of 19 frisky new Chevrolets all with Fisher Body and with horsepower ranging up to 205. Drop in, when you have a chance, and drive the new record breaker!

Grade School News

We have been very busy the past week finishing out the first half of the school year. The mid-term exams were a little more severe than we had anticipated, but that will only help to make us work a little harder the next time so we will be better prepared for those at the end of the year.

We are very happy to welcome Mrs. Butin as a member of the faculty. She was a member of the faculty of the Junior High last year, and now we are very fortunate in having her as one of our third grade teachers. We have 150 pupils in the third grade with 4 sections. With the new fifth section in the third grade we will have 30 pupils per room in the five sections.

The increased enrollment has been felt a little more in the third grade than in other grades but has not been confined to that particular section. We have 141 enrolled in the fourth grade with four teachers. This is an increase of 15 students since the very first of school and is still growing. We are proud of all our boys and girls and want each of them to do their very best.

The Spoilers - For Real Men & Women

"THE SPOILERS" (2-B)

Rory Calhoun and Jeff Chandler engage in an epic rough-and-tumble battle, probably the roughest ever seen on the screen, in "THE SPOILERS", Universal-International's action drama in Technicolor in which they co-star with Ann Baxter.

THE SPOILERS - A lusty, action-packed film at the Palace this Special Saturday night Preview, Sunday, Monday and Tuesday.

It's Rex Beach's immortal novel come to life again on the screen. Probably every man living has at one time thrilled to the action packed exciting pages of this novel.

The SPOILERS was first made as a motion picture in 1914, again in the late '30's and now the new and modern version just released from Hollywood. THE SPOILERS, for wide screen and filmed in color by Technicolor, starring Jeff Chandler, Ann Baxter, Rory Calhoun.

THE SPOILERS is a mighty saga of the Great Alaskan Gold Fields, in the reckless brawling era when man's lust for riches drove him even beyond the law and left women lost in the shadow of shame. It's Rex Beach's novel of brute force and bare fists, of violence and fury. The romance is rugged and realistic in this story of the frozen North and it's unbelievable winters.

THE SPOILERS is a picture for real Men and Women.

We are spending approximately \$800,000,000 a year for flowers and seeds as more and more Americans go in for gardening.

Highest In 10 Years Sale Of Bonds

Mr. Nathan Adams and Mr. Ed Gossett, State Co-Chairman of the U. S. Savings Bonds Committee, stated today that Series "E" and "H" Savings Bonds sales during 1955 were the highest in the ten post-war years.

A total of \$193,154,377 of Savings Bonds were purchased in Texas during the past year, as compared to \$163,851,000 in 1954. Sales of Series "H" Bonds, which are current income Bonds, last year exceeded 1954 by more than 50 percent.

Mr. Nathan Adams said, "The sales of U. S. Bonds, which are the safest investment in this nation, will continue to increase through the coming year."

We have a fine organization of volunteers and we want to thank them for the work they have done. It was their interest and efforts that made our 1955 sales record possible, Mr. Adams continued.

Mr. Ed Gossett paid tribute to newspaper, television, radio, theatre, outdoor and transit advertising people over the state.

Last year the Savings Bonds program received, throughout the nation, over 50 million dollars in free advertising. Advertising media donate their services to the U. S. Treasury as a public service. Without the fine cooperation and support of Texas' advertising media we could not have made this 1955 Savings Bonds record, Mr. Gossett stated.

Basketball Girls Get Warm-up Jackets

The girls have won three district championships and will be in style as they go on the court this season.

THE SILVER CHALICE - Palace Theatre

Paul Newman and Pier Angeli declare their love in the shadow of 'THE SILVER CHALICE,' filmization of Thomas B. Costain's best selling novel presented by Warner Bros. in CinemaScope and WarnerColor. The much heralded motion picture offering, which also stars Virginia Mayo and Jack Palance, opens Wednesday Feb. 1st at the Palace Theatre.

THE SILVER CHALICE

The movie industry can pat its back and be proud. THE SILVER CHALICE coming to the Palace Theatre next Wednesday and Thursday, Feb. 1-2 proves that Hollywood has really taken its new method of making movies, mixed it with a good story and turned up a masterpiece of entertainment. 'CHALICE' is this movie. Starring an all star cast including Virginia Mayo who plays the role of the Seductress, embarked on a wanton life of sin. Pier Angeli, who has the role of Deborra, the Innocent, whose virtue defied all Tyranny. Jack Palance, who rises to new dramatic heights as the Magician who nearly brought the world to Chaos and introducing a new dynamic personality to American movie goes in Paul Newman who very ably carries the part of Basil, the Defender, the slave who battles to save the Sacred cup. Such are the lead cast of SILVER CHALICE made into a motion picture in color and CinemaScope, from the best selling novel (over 25 million copies) written by Thomas B. Costain.

THE SILVER CHALICE might well be called a mighty story of truth and Temptation.

News From The Congress

By FRANK IKARD

Last week the President submitted to Congress the Budget for the fiscal year of 1957 which called for overall expenditures of almost Sixty-Six Billion Dollars. It is interesting to note that the Budget of a year ago requested a little over Sixty-Four Billion Dollars and for the year before Sixty-Four and One half billion dollars. In other words, the Budget for next year anticipates an increase in expenditures of over a Billion and one half dollars.

National defense accounts for 64 percent of the Budget which recommends that Sixteen and one half billion dollars go to the Air Force, Eight and one half Billion to the Army, Nine and one half to the Navy, and recommends an increase of two hundred million dollars in the Atomic Energy program and also a substantial increase in the amount of money spent in the development and production of guided missiles. The Budget estimates that there will be an average of 2,815,700 in the military on active duty during 1957.

It is estimated that veterans' services and benefits for 1957 will amount to almost five Billion dollars which is an increase of Eighty-Six million dollars over this year. Agriculture is allocated Twelve million dollars less in 1957 which is approximately 3.4 billion dollars. The major new item in the agriculture program is the soil bank proposal which amounts to Four hundred million dollars. Commerce and housing are allocated a little over two billion dollars which is a decrease of approximately one hundred ten million dollars from this year even though some of the program in this general category will be increased such as the development of civil aviation public housing and disaster insurance. The Budget proposes three billion dollars to be spent under the heading of labor and

welfare which is an increase of two hundred million dollars. Interest on the public debt for next year is estimated at Seven Billion Dollars, and the President requested in his message that the debt limit be continued at Two Hundred Eighty-one Billion dollars.

The Budget is only the recommendations of the Administration for expenditures during the year. It is highly improbable that every item that is recommended in the Budget will be approved by Congress. In years past, the appropriations made by Congress have been less than the Budget estimates, and it seems that there is a good possibility of that being true this year.

The Budget estimates that there will be a surplus in the Treasury of expenditures at the end of this year of Two Hundred million dollars. Other very reliable estimates place the amount of this surplus at a much higher figure, and even though it is too early to tell definitely, it does seem that it is most probable that this surplus will be between one and one half and two billion dollars which, if it proves to be true, will allow us to make some realistic payment on the National debt. If we can not adopt some plan for reduction of the National debt with its present level, then it seems to be doubtful that we will ever be able to make any substantial reduction in it.

Mr. Roy Hixon of Electra was a Washington visitor this week.

CONTEST..

(Continued From Front Page)

ners. Postmark or time of delivery will also be a factor. In case of ties, duplicate awards will be presented.

The feature was prepared for The Burkburnett Star by Jack Henseler of Oklahoma City, copyright-holder of the idea. Henseler spent several days here earlier this month taking pictures for the feature.

Here are the rules:

1. You will notice that each cartoon has a number.

2. Take a sheet of paper and list there the numbers (starting with number 1) on the cartoon. There are 82 numbers. Following each number list the name of the individual and firm, business or profession with which he or she is associated. Nicknames, if used, must be placed in quotation marks between the first and last names, such as John "Jack" Jones. Spelling of names and firms is important.

3. Neatness and attractiveness will be taken into consideration in judging.

4. Contest is open to all except the Star employees and their families.

5. In case of ties, duplicate prizes will be awarded.

6. All entries must be delivered to The Star office before 5:00 p. m. Tuesday, Jan. 31st, in order to compete for prizes.

Time of delivery at The Star office or postmark will be considered in the judging. No telephone entries will be accepted.

8. All entries become the property of The Burkburnett Star.

9. Address entries to "Eyes to the Future Contest in care of The Burkburnett Star."

Winners will be announced in The issue of The Star to be published Thursday, Feb. 2 and the page of pictures will be printed again along with the complete identification of all those in it.

Burk Garden Club Urges Plant a Tree On Arbor Day

In observance of Arbor Day, members of Burkburnett Garden club urged everyone to become conscious of the Plant Texas project by planting as many trees as possible during this planting season.

Nebraska in 1872 was the first state in the union to proclaim a tree planting day and named it Arbor Day. Texas passed a law in 1889 designating Feb. 22nd, as Arbor Day in honor of our first president.

Trees are planted for posterity, to express hope for the future; trees preserve our health by absorbing poisonous gases and give off oxygen. Trees are nature's air conditioners by shading and evaporating moisture while they beautify our homes and cities; they shelter man, birds and wild life from cold, the winds and the heat; they give employment to thousands and supply us with homes, furniture, paper, medicine and many other uses.

Wichita County has twenty native trees, Ash, box-elder, cottonwood, chittewood, hackberry, Amer. elma, red haw, mesquite, mulberry, oak, red cedar, osage orange, pecan, persimmon, wild chinaberry, wild plum, red bud, black willow, buck thorn and salt cedar.

Mesdames Ralph W. White, W. B. Short and Roy Magers of the Current Literature Club, and Mrs. Harry C. Dodson of the Burkburnett Study Club attended the First District Federation Institute in Olney last Friday.

Stanley Owen Is Basketball Star At Howard Payne

Ann area boy making a name for himself in collegiate cage circles is Stanley Owen, the ex-Burkburnett flash. Owens has averaged 17 points for Howard Payne, regarded as a cinch to capture Texas Conference honors. Against McMurray Saturday night, Owen staged his top performance of the season, netting 32 points. He collected only four field goals, but added 24 free throws, hitting 12 in a row at one stretch.

Freshman Stanley Owen has been selected to play on the all-college tournament team at Texas Lutheran College. Stanley is the son of Mr. and Mrs. Dawson Owen of Burkburnett.
