WHY NOT ACCOMMODATE US?

As President Kennedy gathers with his military and diplomatic mentors for a huddle on how far we can go in accommodating the Russians in that nuclear test ban treaty, we are unavoidably reminded of State Department Publication 7277 presenting to the UN disarmament, and the general surrender to the Reds urged by the infamous "Liberal Papers."

We recall, too, more recent word from Geneva from our disarmament negotiator, Arthur H. Dean, to the effect that while it would be nice to have control posts inside the USSR from which to check on atomic blasts, "perhaps we could do without them". And this remark coincided with reports suggesting that we now have improved means of blast detection that could operate effectively from outside Red territory.

Thus, while we do not intend to predict the outcome of the White House test ban meeting, and we hope our misgivings are soon relieved, we should nevertheless be prepared for US concession on the crucial issue of inspection, on which we and the Russians have locked horns since the beginning of the talks. Why, we might ask, can't the Reds "accommodate" us, when we offer them the same control set-up we are demanding?

Should we abandon our position on control posts, on the grounds that we can monitor the Russians from outside, we will irrevocably have lost any nuclear weapon superiority we may now possess. For we should know by now that while we abandon testing the Russians will proceed happily with test programs as they please. That we will know what they are doing, and even where, will not disturb them in the least. Their bland, unblushing demials will be convincing to other nations in direct ratio

WASHINGTON AND "SMALL BUSINESS" BY C. WILSON HARDER

As this is written, it is not known what action Congress will perhaps have taken before publication of this column on the plan to withhold taxes on dividends and interest. In addition, the nationwide membership of the National Federation of Independent Business has not taken a vote on this issue.

But it seems quite significant that Sen. Harry Byrd has taken a stand against the proposal.

It is possible, that some interest and dividends is escaping taxation. On the other hand, if there are cases existing where major tax sums are being avoided, it would be among people whose wealth and affluence would mark them for intensive tax audits to begin with, and thus it would seem that any major malefactors could be uncovered with ease by other methods.

But so far, no great publicity has been placed on the extremely heavy bookkeeping costs this would place on banks, savings and loan firms, corporations, and all others paying interest and dividends.

Just to take one example that could eventually result. Millions of school children throughout the land are encouraged to open and maintain savings accounts, principally to teach habits of thrift.

Bear in mind that these savings accounts of the children

do not represent huge sums transferred to them by rich and indulgent fathers, but are accounts built up by systematic savings from their allowances, money earned on paper routes, mowing lawns, et al.

But if the savings banks every time they credit interest to the account of Johnny with a balance of \$18, or to Sue with a balance of \$48, have to compute the withholding tax and report it to the government, millions, if not billions of dollars worth of man hours will be expended.

And then if Johnny or Sue make demands for the refund they are entitled to get, it will take billions of dollars in bureaucratic salaries to get the refunds processed.

Thus, the whole plan would seem to boil down to one of two alternatives.

One is that this represents bureaucratic stupidity to the nth degree.

The other is that it is recognized that many school children, retired people, pensioners, et al, with small investments, will not be able to, or will forget to file for their refunds, and thus government will benefit by substantial collections of taxes to which it is not entitled.

Of course, there may be another alternative which is tied up in a joke along the Potomac. It goes to the effect that the government is determined to be ahead of Russia in all ways, including government control of the private affairs of its citizens.

Family FINANCIAL PROTECTION

Policyholder Questions Answered by the Institute of Life Insurance

Q. I read recently that life insurance is the largest single avenue of personal savings in the United States. What does this mean?

A. The main purpose of life insurance is to protect families against financial hardship when death occurs. In order to provide this protection at no increase in premiums as the policyholder grows older, every permanent life insurance policy must include an increasing amount of cash value or "savings." This savings is a by-product of the policy's protection features.

The cash values that American families have accumulated in their permanent life insurance policies and annuities are reflected in the policy reserves of U.S. life insurance companies, which now total more than \$100,000,000,000. This is by far the nation's biggest single repository of personal savings. The runner-up is time deposits in commercial banks, which total about \$75,000,000,000. Deposits in savings and loan associations total about \$71,000,000,000 and deposits in mutual savings banks total about \$38,000,000,000.

Q. Is it true that my wife might have to pay a federal income tax on the money from my life insurance if I should die?

A. All life insurance proceeds are completely free from federal income tax if the money is paid in a lump sum to your wife or any other person whom you name as your beneficiary. If the policy is paid out as income over a period of time, any additional amounts that your beneficiary receives as interest over and above the policy proceeds are considered income for tax purposes.

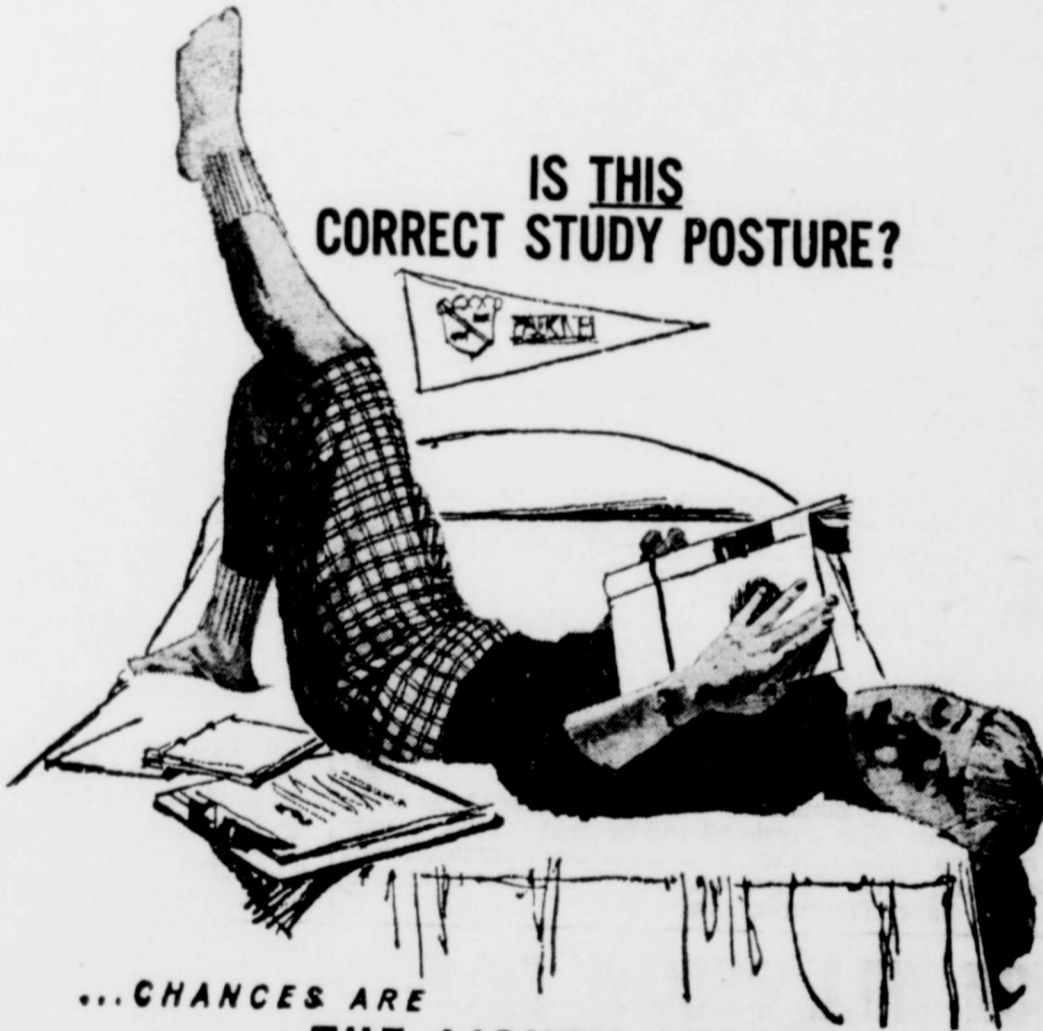

Of course, all your life insurance proceeds become part of your estate and, if your estate is large, may be subject to estate and inheritance taxes.

Your life insurance agent can help you plan your estate so as to make proper use of various tax advantages which are available to you under the law.

to the degree of mortal terror with which these countries regard the Soviets.

Even on the ground inspection system we have been insisting on may not be enough to protect us. But anything less could be suicide.

THEY WOULD READ YOUR AD TOO, IF IT APPEARED HERE

IS THIS CORRECT STUDY POSTURE?

...CHANCES ARE THE LIGHT'S WRONG, TOO

One good way to improve home study habits is to improve home study atmosphere. A properly lighted desk or table helps make studying easier because seeing and reading are easier in good light. A study lamp with a diffusing bowl and a 150-watt bulb, properly placed on the desk or table, usually provides adequate light for the long periods of reading and writing associated with homework. Help your youngster start the new school year right—with proper light for better sight.

It's easy to check your lighting with this REDDY KILOWATT Eye GUARD LIGHT-CHECKER

You can check study lighting... reading light... light for sewing... lighting in all parts of the house with this easy-to-use Reddy Kilowatt Light-Checker. Just come by our office or telephone for one. There's no charge... Get yours soon... Use it as a guide to improve the lighting in your home.

WHAT IS A SAVINGS AND LOAN

The above is a question of importance to every one in the community, yet many people are not aware of the purpose, service and function of such an institution.

The purpose of a savings and loan Association is to encourage thrift, savings, and to provide a means for people to own their homes.

The service a savings and loan performs for the community is very important. If you were to look around Burk Burnett and the surrounding area, you would see many homes, both new and old, which association has provided a means for ownership. don't have a sign up, but the satisfaction of the cupants of these homes testifies to the fine and wonderful service which we have performed.

How does a savings and loan function? Citizens young and old alike, place their money in savings accounts with us. At the present time we pay 4% interest compounded quarterly. Last year alone we paid over \$44,000.00 in dividends to our savers. The savings of any one individual are insured to \$10,000.00 by the Federal Savings and Loan Insurance Corporation. Besides earning a good return on their money, savers are contributing to the growth of the economy and the growth of the community, because we invest these savings in long term mortgages on real estate. This enables citizens to own their own homes and to modernize and prove their homes. Savings accounts can be opened for as little as \$5.00 and can be added to in any amount you desire. Come in and open a savings account with us today.

We are publishing this information in two different places in today's paper because we want to make sure you are aware of our purpose, service and function.

News From The Congress

Graham, B. Purcell, Congressman

Dear Friends— Labor Day, 1962! This is a day when we have an opportunity to rest and reflect on the past year's labor... a day dedicated to the millions upon millions of Americans who make up the largest segment of our Nation, the working force. This is a day set aside to honor the working men and women, the vast majority of Americans.

America can be justly proud of its working force. It has proven to be the most productive in the world. And the working force can and should be proud of the system of government which makes it all possible. This is a land where labor, both union and non-union, and management work cooperatively for the common good of both. Neither is hampered into submission by the other. And, except in cases where the national security is at stake, the government leaves them free to settle things among themselves.

This is the greatest economic system in the world. We should be proud. We should all work to maintain it. We should stop now, I think, and reflect on our accomplishments and the progress we have made, as well as the problems we face.

A Growing Economy

Despite the gloom and doom talk we hear, this Nation is doing well overall. Granted, we may be headed for a temporary slump. This remains to be seen in the months ahead. But, by and large, we are the most productive nation on earth. Let's glance at some of the economic facts:

1. The U. S. gross national product is up 7.8— (1st quarter of 1962 compared to 1st quarter of 1961.)

2. Personal income in the last eighteen months (ending in

June) is up more than 9%.

3. Corporate profits over the last eighteen months up more than 25%.

4. As of June, industrial production expanded by more than 15% in the past eighteen months.

5. Over the same period, labor income rose almost 10%.

6. Payroll employment (non-agricultural) rose by 1.8 million jobs in these same eighteen months.

7. Personal consumption rose nearly \$20 billion last year.

8. With all this increase, prices during the period remained virtually stable.

What do all these figures mean? They mean that during the last year and one half almost all segments of our economy have enjoyed a real not inflationary, increase in their income. It means a continuation of our progress in efforts to obtain a better life for Americans.

But most of all, all this means that our economic system is the most successful in the world, and that our progress toward a better life is continuing day by day.

Problems

There are problems on the horizon. We have a continued hard core of unemployed. A few of our major industries, like our own oil industry, face serious problems. Growing industrial communities in Europe and Japan cause us to face mounting foreign competition in industrial goods.

But many of the problems are already being dealt with. And in the American fashion, we will continue to surmount the obstacles that face us. I am firmly convinced that we will continue to grow and prosper, continue to be the strongest Nation in the world, and continue to gain higher levels of health and prosperity for our people. We will do it because we are the United States, and we have the greatest system of government ever conceived by the mind of man.

On Labor Day, 1962, we should all stop and give thanks

At HOME ... in inner or outer space

by ALICE CARTER

One of New York's smartest shops recently presented a series of highly original table settings, of which one of the prettiest, and certainly the most practical, was set entirely with plastics.

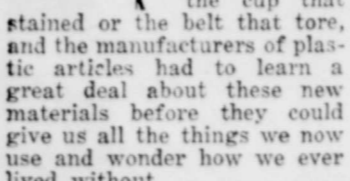

Most of us can remember when the word "plastic" did not have a happy connotation. We thought of plastics as the toy that broke, the button that melted, the cup that stained or the belt that tore, and the manufacturers of plastic articles had to learn a great deal about these new materials before they could give us all the things we now use and wonder how we ever lived without.

Take this all-plastic table setting for instance. The tablecloth, which is brand new to the market, is a handsome reproduction of a particularly lovely piece of Swiss eyelet embroidery. It not only wipes clean with a damp cloth, but this new plastic tablecloth can be dyed at home to match any color scheme. In the setting shown in New York, the white plastic cloth had been tinted a lovely lilac to repeat the color of the flowers on the break-resistant melamine dinnerware. Melamine, of course, is itself the hardest of all plastic materials.

The centerpiece, also in shades of blue and lavender, looked real enough to have grown in an English country garden, but was actually made of polyethylene, one of the most useful members of the ever-growing plastics family. When you consider that as late as 1860, a New Jersey company was offering a prize of \$10,000 to anyone who could produce a substitute for

ivory, you realize how very fast the family of plastics has grown. The ivory substitute was needed for billiard balls, which was then (and is soon to be again) an extremely popular game. Billiard balls had always been made of solid ivory, and since only three balls of the proper size and weight could be cut from the average elephant tusk, there was danger that the ivory hunters would render elephants as extinct as dinosaurs. The answer, of course, was celluloid, and the age of plastics was launched.

Today, it is safe to wager that there are at least five plastic applications within your immediate range of vision, and probably more, since many are not readily recognized as being true plastic materials. One of the newest additions to the scene of gracious and convenient living, is an electric light switch with a time delay feature. The new switch can be adjusted to keep the light on up to 15 minutes after it has been switched to the "off" position. Think what it means in terms of stumbling down darkened stairs, leaving the children's room after they have been put to bed, finding a safe place for your glasses after you are in bed yourself, or getting the garage door locked behind you. Developed by the Bracken Company of Pacoima, California, the new time delay switches are being made both in ivory and brown colored plastic and are do-it-yourself items easy to attach to house switches that are already installed.

for what we are and what we have. And we should then bear down and solve the problems that confront us. This is the American way.

It is with regret that I announce the departure of Lynn Darden from the office staff here in Washington. Lynn has been a very valuable assistant to me since the election. He has returned to Wichita Fall to resume his practice of law with the firm of Kouri, Banner and Darden.

I want to thank him for his wonderful service to me and the people of the 13th District, and wish the best of everything to him and his family. We will miss them.

Recent visitors to the Washington office included: Mr. Chester A. Newland of Denton; Mr. John

Raley of Wichita Falls; Mr. and Mrs. Ben Moody and family of Wichita Falls; Mr. Maurice Oliver, Leon Oliver, Russell Oliver and Milo Benningfield of Vernon; W. A. Hotchkiss and his daughter from Wichita Falls; Amon Bailey of Wichita Falls; the Mayor of Muenster, Honorable Herbert Meurer and Mrs. Meurer; and Mr. and Mrs. Arwood Stowe and their family from Wichita Falls.

A visitor to Mark Twain's home commented upon the abundance of books, and the rather limited accommodations for them.

"Yes," agreed Mark, a bit wistful, "yes, but it's so difficult to get friends to loan you shelves."

To expect more than your mother expected of you is expecting too much.

Theta Epsilon Sorority Has Circus Party August 27th

A "Come As A Circus Character" Party was held in the home of Bobbye Slusher, August 27, for members of the Theta Epsilon Sorority and their guests.

Some of the characters present for the evening were, The Bearded Lady, Gypsy Fortune Teller's, Totto Lady, Chinese Acrobats, Hawaiian Dancer, Popcorn and Balloon Seller.

Popcorn and large lolly pops were served at the door. Cokes and ice cream cones were served during the party.

Games were played and enjoyed by all present, as were the odd assortment of prizes they won.

Members present for the evening were Mesdames Cloyd Adams, Raymond Brammer, T. M. Cornelius, Lyle Eaton, B. A. Farris, William Glisson, Q. L. Howard, Elmer Klinkerman, Bruce Sheperd, Clyde Slusher, Neal Tullis and Raymond Van Loh.

Guests present were: Etna Wilkins, Clodella Bridges, Auline Henderson, Marilyn Zimmerman, Barbara Stanyer, Audrey Tibbets and Barbara Mennen.

Ornamental concrete work around your home will add greatly to the beauty and value of your property, whether used for a sidewalk, patio, stepping stones, planter boxes, many other decorative possibilities. Popular Mechanics magazine for July features a round-up of rules of procedure for mixing, pouring, coloring, casting, and finishing concrete. Shown here is a realistic simulated flagstone walk made by scoring the surface with a special tool before the concrete has set.

WHAT IS A SAVINGS AND LOAN

The above is a question of importance to everyone in the community, yet many people are not aware of the purpose, service and function of such an institution.

The purpose of a savings and loan Association is to encourage thrift, savings, and to provide a means for people to own their homes.

The service a savings and loan performs for a community is very important. If you were to drive around Burkburnett and the surrounding area, you would see many homes, both new and old, which an association has provided a means for ownership. You don't have a sign up, but the satisfaction of the occupants of these homes testifies to the fine and wonderful service which we have performed.

How does a savings and loan function? Citizens young and old alike, place their money in savings accounts with us. At the present time we pay the 4% interest compounded quarterly. Last year alone we paid over \$44,000.00 in dividends to our savers. The savings of any one individual are insured up to \$10,000.00 by the Federal Savings and Loan Insurance Corporation. Besides earning a good return on their money, savers are contributing to the growth of the economy and the growth of the community, because we invest these savings in long term mortgages on real estate. This enables citizens to own their own homes and to modernize and improve their homes. Savings accounts can be opened for as little as \$5.00 and can be added to in any amount you desire. Come in and open a savings account with us today.

We are publishing this information in two different places in today's paper because we want to make sure you are aware of our purpose, service and function.

FOR THE POOR COMMUTER

Raymond C. Baker
Raymond C. Baker is a newspaperman who writes on economic and social subjects.
"I erred on the conservative side. The interest in acquiring cars for our core cities is much greater than I had anticipated."
The Ozark-born Gray should know because he has just completed a study of transport systems in metropolitan areas from Los Angeles to Long Island. Grave, vice president and engineering chief of the passenger car division of Pullman-Standard, world's largest builder of railway rolling stock, started out in the railway business with the Santa Fe back in 1914 as a machinist apprentice and has devoted most of his life to transportation.
"Metropolitan New York alone will spend a quarter of a billion dollars on passenger rolling stock in the next five years," he calculates. "On the West Coast, San Francisco and Los Angeles, taken together, probably will spend well over \$100 million. Boston has already placed an order for over \$10 million worth of subway cars."
Gray stresses that the more than \$1 billion to be spent does not include such costs as land acquisitions, trackage, station platforms and other paraphernalia incidental to operation of a transit system.
Gray figures that during the 1960s some 40 cities in this country will attain the "rapid transit population mark," thus making them important metropolitan centers. He notes that cities with less than 250,000 people are showing real interest in the needed planning for modern transit.
"They're trying to avoid the

the ensuing 10 years. Now, he says blandly:

"I erred on the conservative side. The interest in acquiring cars for our core cities is much greater than I had anticipated."

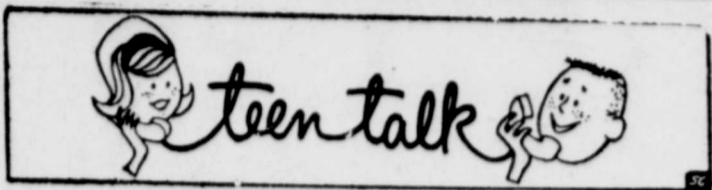

The Ozark-born Gray should know because he has just completed a study of transport systems in metropolitan areas from Los Angeles to Long Island. Grave, vice president and engineering chief of the passenger car division of Pullman-Standard, world's largest builder of railway rolling stock, started out in the railway business with the Santa Fe back in 1914 as a machinist apprentice and has devoted most of his life to transportation.

GEMINI GET-TOGETHERS ARE THE GINCHIEST

By Betsy Blake, Carnation Teen Committee

Be the first Zodiac Zombie in your neighborhood by giving a horoscope hootenany. Ask each guest his birth date (the month, not the year), tell him what his zodiac sign is and make everyone come dressed as the constellation under which he is born.
A guest born in late May or early June may have a problem, for the zodiac sign is Gemini. Either leave out the Gemini or let them cope with dressing as their own doubles. Pisces comes as a fish, Taurus as a bull, etc. Invest in a horoscope for 25¢ and read everyone's horoscope as he arrives.

Better still, make the investment, read the horoscope to familiarize yourself with the language, and write your own for each guest. Keep them light and not-too-personal, please. You want people to have fun, not hurt feelings at your party.

Organize the food on a help-yourself table that's decorated right in theme. Have plenty of drinks and munchables around to stave off absolute collapse before dinner. And make this a don't-do-it-yourself party. You do the cooking of the meal. Don't press everyone into service. Leave the washing-up till the last happy guest has gone. Boys like to be waited on. And besides, cooking for them and serving them is a very feminine thing to do.

Horoscope Meat Loaf fits in with the theme, and pairs well with Baked Beans as an ideal main course. To make 10 to 12 servings of the Meat Loaf, pour 2/3 cup (small can) undiluted Carnation evaporated milk over 1-1/2 cups soft bread crumbs; allow to stand 5 minutes. Combine bread crumbs with 1 pound ground beef, 1/2 pound ground

pork, 2 tablespoons finely chopped onion, 1 egg, 1 teaspoon garlic salt, 1 tablespoon Worcestershire sauce, 1/4 cup chopped parsley, 1/4 cup catsup and 1/4 teaspoon pepper. Mix well. Shape into loaf and place in shallow baking dish. Bake in moderate oven (350°) 1 hour.

Serve finger salad to keep the meal fun and easy to eat. . . carrot strips, radishes, celery stalks, olives and anything else green that can be eaten in your fingers with your favorite dressing as a dip. Finish up with a gooey pastry named for your own natal day: Gemini Goo, Taurus Treat or Pisces Pie. Plenty of milk completes the menu. Tote the dishes back to the kitchen yourself, turn on the music and dance, man, dance.

The Carnation Teen Committee, made up of teens in schools across the country, make suggestions for this column. If you have an idea, write to CTC, 124 East 38th Street, New York 16, N.Y. A Teen Party Idea booklet will be sent on request.

great waste" in engineering and "complex job" shop production costs resulting from custom building. "Too much of this sort of thing could make cars prohibitive in price." The other idea he implants deals with an unalterable problem of operating a transit system—peak operation is not steady. "And the more stops the higher the cost," he tells them. "If people can get to their destination twice as fast in their automobiles, it's going to be impossible to lure them back to public transit. They won't settle for a conveyance that averages less than 45 miles an hour."

Says he: "Mother Necessity is here and this business has to boom or else this country is in for one big traffic jam — from Hell's Gate to the Golden Gate."

England's Unknown Soldier is buried in Westminster Abbey, London.

MEDALLION HOME
LIVE BETTER ELECTRICALLY
When you build or buy a new home, or remodel, be sure to check with your builder or electrical contractor to see that your home qualifies for the Live Better Electrically Medallion. This Medallion identifies a home as electrically modern—and a home that will stay modern for years to come.
LIVE BETTER . . . ELECTRICALLY

mistakes of the old mother cities," says he.
A Missouri maverick, Gray envisages a startling reversal in attitude of even those railroads which have been trying to quit the passenger business. He feels strongly that people who must travel up to 300 miles to reach such metropolitan centers as Chicago, New York and Boston would welcome modern train service.
"The hedge-hopping airlines which now serve many of these people obviously can't make money," he states, "despite Federal subsidies and the absence of competition. Railroads, despite no subsidies, could make this a profitable business with modern fast equipment and regular service."
But whether it's the challenge of getting commuters out of their automobiles or inter-city travelers away from feeder airlines, Gray says new and modern equipment is mandatory. "Model T's will not suffice," he

warns.
There are two thoughts that Gray invariably leaves with transit officials in every part of the country. One is that while transit needs vary from city to city, there can be "a

Woman's Society of Christian Service
Wishes You to Join

Have you ever wondered why the Woman's Society of Christian Service is and how it may belong to it? It is a friendly group of women attending this church, who meet regularly, both as a whole and in smaller groups called for purposes in which you are interested. We do not especially have to go to the church or have any particular invitation to take part in the pleasurable and worthwhile programs of the Society. Every woman is welcome to take part in the W.S.C.S. activities. We hope you will come to the meetings and get acquainted.

There are similar Societies in Methodist churches all over the city and in fact the whole country. Briefly stated their purpose is to unite all women of the church in Christian living service as well as in friendly work to help develop and support Christian work among women and children around the city, to take part in such service activities as well as within the local church, to have over one and one-million members.

Regular meetings of our Society will begin on September 10th and plans for them will be discussed later. Join us! You are invited.

BIG PASTURE
F. F. A. NEWS

The Big Pasture FFA's new officers took their stations for the 1962-1963 year July 16th. These officers are Garland Hooper, president; Terry Baber, vice president; Don Williams, secretary; Jerry Hayes, treasurer; Roger Bates, reporter; Dan Bales, sentinel; and A. J. Mays, parliamentarian.

One of the Chapter's main achievements is electing A. J. Mays as official photographer for all the Fair's and other activities of the Chapter.

During the summer months Big Pasture FFA has purchased 12 acres of land to sow wheat as a means of raising money along with building feeders and other shop work.

The Big Pasture FFA boys have already exhibited in two fairs, the Grandfield fair and the Cotton County fair, and are now preparing for the Texas-Oklahoma fair held at Iowa Park, Texas.

Thursday, August 30 the election was held for FFA Sweetheart. The candidates were chosen for each class. From the Senior Class Billie Ann Baggs, Junior Class Sue Pruett, Sophomore Class Shirley Anderson, and Freshman Class Karen Baber. Billie Baggs won the election and will make a trip to the State Fair at Oklahoma City to compete in the State FFA Sweetheart contest on September 22, 1962.

Thursday, August 30 the election was held for FFA Sweetheart. The candidates were chosen for each class. Billie Baggs won the election and will make a trip to the State Fair at Oklahoma City to compete in the State FFA Sweetheart contest on September 22, 1962.

Ellen Newton Was Honored On Tenth Birthday Sunday

Ellen Newton was honored on her tenth birthday with a surprise slumber party Sunday evening. Highlight of the evening was an amateur beauty contest where the girls were presented in pajamas and hats they had made and decorated themselves. They each presented a talent routine. Games were played throughout the night and a midnight snack was enjoyed.

Sleepy-eyed guests who were taken home after an early breakfast were Kathy Dodd, Janice Fields, LeDeena Sneed, Lori Sue Landrum, Verna Sykes, Kay Balanky, Debra Hoffman, Sierra Fields, Debbie Metz and Nancy Malone.

LINDA LEE BALEY IS BRIDE OF T. E. CHRISTOPHER, EL PASO

MRS. THOMAS E. CHRISTOPHER

Miss Linda Lee Baley, daughter of Mr. and Mrs. G. O. Baley, Route 4, Wichita Falls, and Thomas E. Christopher, son of Mr. and Mrs. A. J. Christopher of El Paso, were married Saturday night in the Cashon Baptist Church with Rev. Charles Brasher, pastor of Thornberry Baptist Church, officiating.

The double-ring vows were exchanged before a white archway entwined with greenery and flanked by baskets of white gladioli and pyramid candelabra holding tall white tapers. The appointments were linked by white satin roping and family pews were marked with white bows and sprays of greenery.

Miss Carolyn Clement presented traditional wedding selections.

Given in marriage by her father, the bride wore a formal gown of embroidered organza over bridal satin fashioned with pearl encrusted jewel neckline, fitted sleeves extending to points over the wrists and fastened with self-covered buttons pointed waistline and dome-shaped skirt which formed a cathedral train. The bride's waist-length veil of illusion was attached to a crown of seed pearls and sequins, and she carried a cattleya orchid surrounded by lilies of the valley atop her white Bible.

Miss Linda Holt, maid of honor, wore a dress of ice blue satin styled with bouffant skirt, cap sleeves and scooped neckline. Miss Wendlyn Goins of Burkburnett, bridesmaid, was attired in ice blue chiffon, taffeta and lace. The lace jacket with long sleeves was caught

in the center front with covered buttons. The feminine attendants carried bouquets of white carnations and net tied with white satin ribbons.

Candlelighters were Miss Connie Swinford of Wichita Falls, cousin of the bride, and Miss Rosa Ann Brashier of Thornberry, and serving as flower girl and ring bearer respectively, were Cindy and Dickie Weldon of El Paso.

Attending the bridegroom as best man was Bill Brundle of Burkburnett, and ushers and groomsmen were Ken Thompson, Olen Baley, Jr., brother of the bride, and awayne Benson, all of Wichita Falls.

The bride's parents were hosts for a reception in the church parlor. The bride's table was covered with a white lace cloth over blue and centered with an arrangement of blue and white chrysanthemums. Other appointments included baskets of white gladioli. Reception assistants were Mrs. Jimmy Don Lieblyer of El Paso, sister of the bridegroom, Mrs. Olen Baley, Jr., and Miss Kay Shaw of Burkburnett.

The parents of the bridegroom were hosts for a rehearsal dinner held Friday night at Luby's Cafeteria in Parker Square.

The former Miss Baley was graduated in 1961 from Burkburnett High School where she was a member of 4-H Club and was Gold Star Girl in 1961. She was selected 1961-62 Farm Bureau queen of Wichita County. She is employed in dental offices in Burkburnett.

A graduate of Ysleta (Texas) High School and active in DeMolay work in El Paso, the bridegroom has just completed four years' service in the United States Air Force and will enroll in Midwestern University in the fall.

Following a wedding trip to Fort Worth, the newlyweds will establish residence at 407 Ave. E in Burkburnett.

Rebekah Lodge
By Cora Lee Harmon

The Burkburnett Rebekah Lodge met in usual form with the following officers presiding: Eva Bingham, Noble Grand; Cordie Lawrence, Vice Grand; Ethel Wofford, Secretary; Cora Lee Harmon, Musician; Bessie McKnight, Chaplain; Jean McPhail, Warden; and John Rogers, Guardian, pro-tem. After the roll call of officers, sick members were reported and the Noble Grand asked the Secretary to send cards to those who were sick. The District Deputy was introduced and welcomed. After the business was disposed with the District Deputy President, Bell Patterson, gave an interesting school of instruction. There being no further business the meeting closed in regular form. After the meeting cake and punch was served by the refreshment committee with Cora Lee Harmon as chairman of that committee. Pat Wales, J. C. Patterson, Lorene Northcutt, Mary Bowen and Bell Patterson were visitors from Wichita Falls, 236.

JEAN MCPHAIL HOSTESS TO PAST NOBLE GRAND CLUB

Last Thursday Jean McPhail was hostess to the Past Noble Grand Club honoring the members and officers with a picnic supper of barbecued hamburgers, baked beans, potato salad, onions, pickles, iced tea and cake or coffee was served to: Edna Peed, Mr. and Mrs. W. C. Vann, Mr. and Mrs. R. L. Gragg, Bessie McKnight, Cora Lee Harmon, Ruby Bundy, Eva Bingham, Mr. and Mrs. Stubblefield, Mrs. Crocker and Ethel Wofford. It was a delicious supper and all enjoyed themselves.

A Prelude to Autumn Fall Fashion Show Given By Sorority

"A Prelude to Autumn," a Fall Fashion Show was presented by the Theta Epsilon Sorority Monday evening, August 30th.

The Town Hall was beautifully decorated for the occasion with fall colors. The stage was decorated with ornamental colored fruit and the centerpiece for the table was a fall arrangement of dried flowers. Pink punch and cookies were served at the door by the members of the Theta Epsilon Sorority.

The models were presented to the audience by Mrs. Jo Brookman, who explained the color and types of material each one was wearing and the type of accessories that would go best with each dress.

Shown were the newest designs of fall collections. Beautiful combed cottons, fine sheer wool crepes, wool jerseys, soft wool blends, pure silk and superb double knits—each designed in easy care fabrics.

Solo's were sung by Pauline Shaw, Darlene Shaw and Carolyn Clement with Judy Clayton at the piano.

The drawing for the door ticket was won by Kenneth Palmer. He was given a \$10.00 gift certificate toward a purchase at The Elite Dress Shop.

Those modeling for the evening are as follows: Miss Sue Revier, Carolyn Clement, Dixie Van Reenan, Janell Hinkle, Billie Tullis, Gale Brammer, Betty Nell Wood, Jan Bolinger, Sharon Butler, Mesdames Cliff Wampler, Hugh Cole Preston, F. G. Jeffers, Doyle Brantley, Neal Tullis, Elmer Klinkerman, Faye Royce, Raymond Van Loh, Brack Preston and William Glisson.

A man and his wife were out playing golf. Teeing off, the man sliced his drive over to the next fairway hitting a woman who was playing there. Her husband became most indignant and stormed over to the first golfer.

"Do you know what you just did?" he thundered. "Your ball just struck my wife."

"Dreadfully sorry," replied the first golfer. Then handing a ball to the irate husband, "Here, old chap, have a shot at mine."

Local Births

BIG PASTURE SENIOR CLASS HOLDS CLASS MEETING

The Big Pasture Senior Class of 1963 had their first class meeting of the year to elect officers and sponsors. Those elected were Garland Hooper, president; Terry Baber, vice president; Nita Sue Bowles, secretary; Jerry Hayes, treasurer; Gayle Monson, reporter, and A. J. Mays, official photographer. Mr. Walton Holt and Mr. Wes Beard are the elected sponsors. The class has twenty-six members.

During the coming year, the class will be working toward the goal of a senior trip which will be the climax of the events. The projects include a senior play, box supper, concessions, the selling of Christmas cards, and many others.

Word has been received here of the serious illness of Mrs. S. E. Lee of Cheyenne, Wyoming. Mrs. Lee is the daughter of Mrs. N. H. Harris and the late Mr. Harris of this city. Mrs. Harris left Friday for Wyoming to be at the bedside of her daughter.

Woman's Missionary Society to Observe Week of Prayer

The Woman's Missionary Society of the First Baptist Church will observe the week of Prayer for State Missions, September 10-14. "My Brothers Keeper" will be the theme of the programs for the week. The program will be under the direction of the W.M.S. Prayer Chairman, Mrs. Alice Harris, and her committee: Mrs. Mamie Mason, Miss Hazel Wagoner, Mrs. C. L. Bowman, Mrs. W. B. Short, Mrs. Charlene Abdouch, Mrs. Sandra Billens, Mrs. Velma Bearden, and Mrs. Ruth Morris.

The schedule for the week will be as follows. Monday September 10, from 10:00 a. m. until 1:30 p. m., "75th Anniversary Prayer Retreat," in the yard of Mrs. A. H. Lohofener, 206 W. 4th Street. Covered dish luncheon will be served at noon. The Owens Circle will present the program.

Tuesday, September 11, 9:30 a. m., meet in the Chapel. The Alma Jackson Circle will present the program.

Wednesday, September 12, 7:30 p. m. The Hardy Circle will present a play during the Prayer Meeting Hour.

Thursday, September 13, 9:30 a. m. Meet in the Chapel. The Mayhall Circle will present the program.

Friday, September 14, 9:30 a. m. Meet in the Chapel. The Fuller Circle will present the program.

After each program an offering will be taken for State Missions. All the women of the church are invited to come.

What I don't care to say about my past would be far more interesting than what I do say.

10% DISCOUNT ON A NEW GAS

UNIT - AT LONE STAR GAS

Give your home a new modern comfort (and value) ... at tremendous savings now! Choose from a wide selection of GAS heating units at special prices.

CENTRAL GAS HEATING — healthful, 'fresh-air' automatic warmth. Closet, attic, under-floor installation. GAS economy, dependability. (Add CENTRAL GAS COOLING later.)

GAS FLOOR FURNACE — circulates warmth from floor up, economically. Dependable on coldest days. Automatic thermostat.

GAS WALL FURNACE — ideal where floor space is at a premium. Durable, dependable, thermostat control — GAS economy.

GAS BATH HEATERS — fast and economical. Modern wall insert, enclosed, safe and dependable. Never fails from weather.

GAS ROOM HEATERS — lowest cost comfort you can buy. Never fails from weather.

SAVE NOW - BEFORE THE WINTER RUSH!
TERMS UP TO 36 MONTHS.
Let a Lone Star heating specialist analyze your heating needs with no obligation

NOTICE

A part of City Ordinance No. 250, pertaining to the Vaccination, Licensing and Restraining of Dogs Within the City Limits.

SECTION II

Vaccination and License

It is unlawful to keep or cause to be kept within the territorial limits of the city, any dog, after the 1st day of July of any year, without first having said dog vaccinated for rabies within 60 days preceding July 1, and presenting a Certificate of Vaccination to the City Inspector, and obtaining a license for keeping the dog in said city for the ensuing or current year.

SECTION V

Restraint

The owner shall keep his dog

under restraint at all times, and shall not permit such dog to be at large off the premises of the owner, unless on leash and under the control of a competent person.

The City Commissioners, and City Manager feel that this Ordinance must be enforced for the protection of the public health, safety, and welfare of the citizens, especially during school season while the children are attending school.

Your full co-operation will be appreciated.

COMMISSIONERS AND CITY MANAGER

For my time and money, nothing else equals a well-edited metropolitan newspaper; I'd prefer to go without breakfast than without a newspaper.

Texas State Dept. of Health

Cancer is often spoken of as the "silent disease." This is because in many cases cancer grows without giving any symptom. And pain, which is most often thought of as accompanying diseases, is not generally present until cancer is far advanced.

Most cancers can be cured when detected and treated in the early stages. The difficulty in cancer control, then lies with the detection of the disease.

Only a physician can tell if cancer is present. Any suspicious symptom should always be examined by the family physician. But often, by the time any

symptoms of cancer show up, it is too late. Treatment of advanced cancer is difficult.

The only insurance against this silent growth is a regular, at least yearly, physical examination.

All physician's offices should be cancer detection centers, so the family doctor is most often the front line against cancer. For a physical check-up, whether cancer is suspected or not, the personal physician is the person to see.

If cancer is suspected, the family doctor may refer his patient to one or more specialists to confirm or rule out the possibility of cancer.

A top-to-toe physical examination will include inspection of the body surface, followed by examination of various organs such as the heart, blood vessels, lungs, mouth, nose, ears, eyes,

throat, abdomen, rectum, sex organs and breasts.

The blood, urine, uterine cells or other body fluids may also be examined or tested. X-rays of the chest and other parts of the body and a proctoscopic examination (visual inspection of the lining of the rectum and lower bowel with a lighted tube) may also be performed by the physician.

A proctoscopic examination has increased in importance because 70 percent of cancer of the colon and rectum can be discovered in this way.

If a physician suspects cancer, a biopsy is performed and a sample of the suspected tissue sent for microscopic examination, by a pathologist (a specialist in human tissue examination). Only a biopsy can definitely establish the diagnosis of can-

cer. The individual is the key to the prompt diagnosis of cancer. For only if a person presents himself to his physician can a diagnosis be made.

Going away to SCHOOL

At this time of the year, all over our nation, boys and girls are leaving home to attend the school of their choice. Many, for the first time in their lives, will be away from home and their home church. They should be encouraged to, immediately, seek a church nearby where they may continue to worship the Lord, and have the companionship of friends with similar outlooks on life and God.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny, the truth which alone will set him free to live as a child of God.

FISHING LINES

By DICK WOLFF

A university zoologist, Professor Paul Needham of California, claims that fishermen don't know how to catch fish. The professor, who is also a director of the university's Sagehen Creek Project, claims that very rarely is a stream "fished out". And, to prove his point, he cited a recent survey by the California Department of Fish & Game which showed sixty-five to seventy-five per cent of all fishermen do not catch anything, even when hatchery fish are dumped into the stream right in front of them.

While most anglers might take this accusation as a joke, it is true. To wit, some years ago a group of regulars complained to the New York Department of Conservation that the famed Overkill was "fished out." The department sent a couple of experts to the scene equipped with a portable generator. A mild charge was put through the water and scores of slightly stunned trout floated to the surface in front of the slightly stunned anglers.

The moral of the story is simply that fishing is an art not just an exercise. Actually, a relatively few experts are taking fifty per cent of the fish. The expert angler will fish early and late, knowing that slim pickings occur at mid-day. He'll go about his pleasure slowly and deliberately. First, he'll size up the stream or lake, choose the most likely spots, where a lurking trout or bass might rest waiting for food to drop off the banks or wash into a riffle. Once the preliminaries are completed, he'll quietly move into the river down-stream. Or, if the fish are very skittish and the water is still and clear, he might stay well away from the river edge and cast from the bank to avoid a give-away shadow on the water. He'll work his way up-stream knowing that sound, even a little, carries downstream. The careful lake fishermen will know the water temperature and that lake trout like cool water between 40 and 45 degrees. A spell of hot weather and the surface temperature might run to 60 or 70 degrees. If there are lake trout there, they'll be near the cooling inlets in a spring fed lake — and down deep. Professor Needham pointed out that the biggest fish kill is made by the weather. It's a shame to waste good fish when a little care and patience could mean trout or bass for dinner.

some money in the bank to distribute to stockholders. This company was the largest distributor of live lobsters in the world, selling at one time about five million live lobsters annually.

Competing With Africa
Suddenly "lobster tails" began being imported from Southern Africa. I visited there three years ago to learn about Africa. Last year over fifteen million

"lobster tails" came to the United States. It was too much for our company to compete against, with our antiquated plant and high labor costs and heavy overhead, and with vessels operating from Newfoundland and Nova Scotia. Live lobsters will always be in demand and small operators can trap lobsters near shore here at home and make good money; but expenses must be kept low. If you eat at the very best hotel in any city and order boiled or stuffed whole lobster, it must come from the East Coast of New England or Canada and not from Africa; but if you order a lobster salad in many parts of the United States, chances are it will be made of lobster meat imported from Africa. So much for that!

Lobsters Are An Interesting Study
(1) Lobsters are wonderful, biologically and chemically. If a lobster loses a "leg", it can grow another—which is something you cannot do. Lobsters go into hiding and climb out of their shell once a year in a most remarkable manner. During this time the mother lobster lays 10,000 eggs.
(2) Thus far no profitable way has been found to dehydrate lobsters or to stop their spoiling by any process... while preserving their delectable flavor. The housewife is content to buy dead fish—in fact this is the only kind she can buy—but she will not buy dead whole lobsters! People will be watching live lobsters which have been dropped into hot water

turn from green to red 100 or more years from now, as the New England legislators will try to protect the industry by fixing big fines for selling "short lobsters."

What Africa Has Done to Me, It Can Do to You

However, the purpose of this column is not to "cry on the shoulders" of readers because I have lost money from lobster imports. Rather, I want to warn manufacturers all over the U. S. that they may suffer the same from African imports. Africa has over 200,000,000 native Negroes who are just waking up—against only 2,000,000 whites. The Africans have a very low cost of living, wanting almost no clothes and being content with a mud hut to live in.

Africa is rich in natural resources—gold, copper, iron, and all the metals, including mountains of uranium. Africa has the greatest undeveloped waterpowers in the world. Italy, which now leads the world in the manufacture of plastics and synthetics, is teaching the African natives to manufacture textiles and other products to compete with what we are making here

African Negroes May Control The United Nations

What Africa has done to me in forcing me out of the lobster business it could do to many readers of this column in every state of our union. Remember, too, that Cecil Rhodes said the Negroes would some day control the world. This becomes an

even more realistic possibility when it is recognized that, as the United Nations Council is now set up, each one of these new small African "republics" — 95% black — has the same vote on the Council as does the United States or any other great nation of the world. Russia does not fear us and will not go to war over Berlin.

It is China and Africa which Russia fears. President Kennedy is wise in backing the Negroes of this country in their struggle for equal rights. And surely with the growth of Negro power in the United States, our President cannot help but be sympathetic with the struggle of the 200,000,000 blacks in Africa.
