Lions Club News

Lion Jerry Thomas had the program for the Tuesday night meeting. After a very fine meal, he showed the members a movie of our missile service which was very much enjoyed by all who were present.

Last Tuesday night Lion Thaxton had the program. Coach Henderson and four high school boys, Jerry Bingham, Mike Music, Rusty Kennett and Dean Thompson, showed the club the kind of exercises that are used in our physical fitness program each week in our P. E. classes in High School. The boys gave a very fine account of themselves on the weight lifting and tumbling.

After the program, President Roy L. Silkwood appointed Lions Brack Preston, Jim Frye and C. J. Lippard on the nominating committee to get the slate for next year's officers ready to be voted on with in 3 weeks. The new officers must be elected by April 15th.

President Silkwood reported on the Zone meeting he attended Monday night at Chillicothe. The Burkburnett Club is the only Lion Club in this Zone that has not lost members this year and our attendance is also the best.

Red River Boxing Tournament Set March 11th-14th

The fifteenth annual Red River Boxing Tournament will be held March 11 through 14 at the Wichita Falls Central Boys' Club. This tournament features approximately two hundred of the top boxers of the Texas, Oklahoma, and New Mexico area. The top classes, which will probably run on the 13th and 14, will include boxers just below professional standing. This means the tournament should provide some of the best boxing seen anywhere in this area. Judging from last year's success and the quality of the boxers provided, it should be a show well worth the notice of sports editors throughout the area.

This project is jointly sponsored by the Boys' Club and the Jaycees, with the proceeds going to the Boys' Club.

"LUCIA" Billy Graham Film At First Baptist Church, March 17

The new Billy Graham feature length sound-color motion picture, "LUCIA" will be shown 7:30 p. m., March 17th at First Baptist Church.

This is the story of "LUCIA", coming to the motion picture screen with all of the pathos and poignancy that transcends its Latin setting, to embrace the spiritual needs that are common to every culture and clime around the world.

"LUCIA" was made in its entirety in Buenos Aires, directed by World Wide Pictures' President, Dick Ross. The fire and excitement of gaucho folk music, South America's unmatched scenic grandeur and the excitement that belongs to one of the world's largest cities, are all enriched by full color and authentic sound.

But the real impact of "LUCIA" is to be found in its intimate, utterly honest treatment of an individual's emptiness and frustration apart from the filling of the "God-shaped vacuum" with which all mankind is born. With this newest of the Billy Graham Films, "LUCIA" enters into the area of domestic discord and the romantic triangle — and what the Bible has to say in resolving the emo-

tional problems that are the hallmark of the 20th Century living.
As long as you live you will never forget "LUCIA."

Unworkable Demands Unpopular

Years after the demise of wood burning, coal burning and oil burning locomotives, the railroads of the United States are still having to hire thousands of firemen on diesel engines who, according to numerous fact finding reports, are no longer needed.

Presidential commissions and courts have all upheld the right of the railroad to eliminate this useless expense. But the railroads are still being drained of over half a billion dollars a year, which the public must pay in rates, for work not performed.

A federal judge has just overruled a challenge by four operating brotherhoods that the last arbitration panel went beyond its authority in authorizing the gradual elimination of unneeded firemen, under the law passed by Congress last summer to head off a nationwide strike. The decision of the panel was to be binding on the railroads and the unions for a two-year period and take effect January 25th. Now an appeal to the Supreme Court is proposed which can further delay a settlement.

While the railroads and the unions are seeking to reach an agreement on other issues in the dispute, a nationwide strike is again threatened by Feb. 24th.

The unions would be well advised to not try to force unworkable demands on any industry because the patience of the public, the last arbiter, is being badly strained.

GRASS ROOTS OPINION

PORT HURON, MICH., TIMES HERALD: "Governor Romney voiced the fears of many when he termed the Nationwide contract between the Teamsters Union and the trucking industry 'an excessive concentration of power.' And he is precisely right. The contract involves some 400,000 men in 400 locals, working for about 1,000 companies. These figures alone are potent, covering as they do the major firms in the trucking business. If there is an avowed determination on the part of teamsters not to use the power which the pact gives them, why was there such a dither to get it?"

THE AMERICAN WAY

The Most Important Consideration

There Must Be Better Ways

News reports and current comment is that government sources contemplate urging U. S. tourists to see our country first instead of traveling to Europe this year. This is an effort on the part of the government to solve to some extent our balance of payments problems.

There is no doubt that the problem is a very real and vital one—many more dollars have gone abroad in late years than have been received in exchange. Our gold reserves have suffered accordingly. And the pending drive to encourage Americans to visit unknown corners of their own nation is understandable.

But there is another problem involved, and a delicate one. The era in which isolationism could be a workable way of national life has passed. The world's need is for an ultimate kind of internationalism in which peoples will find a common meeting ground for hopes, aspirations, differences. And this most certainly involves the maximum possible flow of strangers to our shores—and of our own people to other shores.

The jet plane, with its conquest of time and distance will be a major force in bringing about understanding and friendship between nations and peoples. The American overseas airlines, with Pan American as the leader, have worked to this end, by reducing fares and by promoting travel in all feasible ways. It would be a pity if this people-to-people movement were impeded.

See America—by all means do so. But America is part of a vast world. That world needs to be seen too.

IT'S UP TO YOU

By Howard E. Kershner, L.H.D.

ALL indications are that conditions in the Congo are rapidly deteriorating. Disease is increasing, taxes are not collected, many of the bureaucrats cannot even read, trained personnel is not available to operate public services, ships are standing idle while the army continues to loot, rape, and murder. In short, the Congo is returning to the bush as the sway of the tribal chieftains and witch doctors increases over the confused and frustrated population.

Dr. Kershner

Katanga was formerly an island where Western civilized standards prevailed. It was reasonably prosperous and well-administered by trained personnel. President Tshombe and his family are Christians and were conducting the government on a basis of Christian morality.

Our country in cooperation with U.N. fought two bloody wars to destroy and reduce it to the primitive level of the rest of the Congo. Conditions are still vastly better in Katanga where some twenty thousand white people remain carrying on useful services and business operations but the tendency for this province is to deteriorate toward the primitive conditions of other parts of the Congo.

Be it remembered that our country took the lead in forcing the Belgians out of the Congo years before adequate preparations could be made for independence. We must bear a large share of the responsibility for the wretched conditions existing in that large African territory.

Freedom for a people who are not prepared for it is not a blessing. We destroyed a well-functioning, hopeful regime in Katanga that might have spread through the rest of the Congo under benevolent Belgian administration, blighting the brightest hope of the Congolese for many years to come.

Howard Kershner's Commentaries, Inc., New York 19, N. Y.

"Brown Bess"

Brown Bess was the nickname given a series of musket models. The first were made in England about 1725. They were brass mounted and had pin fastened barrels of about cal. .75. An historically significant weapon, it was used in the Revolutionary War by both the American and British soldiers.

STOW THOSE OARS
What do you do with oars when you're fishing? Do you chance losing them by letting both drag in their row locks. Unshipping and laying across seats again and again is a bore. Solve the problem with this tip: Fasten two inexpensive broom holders on the side of your boat. Locate in the right spots to receive the narrow necks of each oar. A push and the oar is securely stowed out of the way. A pull releases it.

SHADE FISH

This tip is somewhat crude but it could be effective too. In small ponds that cook up in the sun of mid-summer, you'll do the fish favors by scattering old boards on the surface. Fish will be in board's shade, stay healthier.

Envy-Green Families Turn Pleasure-Pink In New Kitchens

Green is the color of apartment dwellers when they see their home-owning friends' modern kitchens. Apartment buildings—at least the older ones—are notorious for their outdated kitchen appliances. But FHA, recognizing that more and more families are becoming permanent apartment dwellers, has now made it possible for them to have up-to-date kitchens with modern built-in electric appliances. Until recently, FHA Title I loans for built-in kitchen appliances such as electric ranges were limited to single-family homes. The regulation was amended recently to make such loans available for buildings with two or more kitchens if the borrower and the dealer or contractor certify that the improvements, installation, alterations and repairs conform with all applicable building codes and zoning regulations.

LESS MESS, DAD
 Male cooks make marvelous meals — and leave monstrous messes, many wives say. If Dad cooks on a modern electric range, the aftermath will be easier to handle because the new electric ranges stay cleaner during cooking and are easy to clean later.

News of St. John The Divine

FOOD FOR THOUGHT

A parish vestry was faced with the task of locating a minister, the previous incumbent having moved. One of the vestry men read the following letter, stating that they had just received it from a minister whom they had written:

Gentlemen: Understanding that you wish me to consider becoming the Rector of your parish, I feel it only fair to inform you of certain facts about myself of which you may be unaware, before we proceed further toward such a binding relationship.

I am blessed with considerable powers as a preacher and a writer. However, I am over sixty years of age and in quite poor health. I sometimes have fits of epilepsy, which can of course be rather embarrassing when they occur in public places or during divine service. Nonetheless, I manage to get a great deal of work done.

The only parishes I have ever served have been small. This is partly, I suppose, because I have a rather fierce temper and do not hesitate to chastise publicly in rather scolding language, any churchman who compromises the Faith or becomes troublesome to the peace and charity of the parish. Out of a sense of loyalty to our Lord, I have always used the discipline of excommunication freely with such persons.

I am not too good at keeping records — in fact, I am notorious for forgetting whom I have baptized.

One other fact, I feel you should understand is that, also out of obedience to Our Lord and His Church, I am extremely active in the cause of racial equality, as you are of course aware from my many writing on the subject. In four cities I have been jailed by the local officers for causing riots and disturbances. I was released only at the intervention of federal authorities. Right now it is beginning to appear that I may wind up in serious trouble even with the federal government.

I feel it only fair that you should be completely aware of these facts. If you still feel that I may be of service to you, I shall at least give your invitation my prayerful consideration.

Faithfully in Christ
After the letter had been read, there was considerable discomfort and hesitation. It was urged by several present that they should manage to terminate the invitation as quickly and tactfully as possible.

"By the way, who did you say he was?" The vestryman replied with a mischievous smile, "The Apostle Paul."

Theta Epsilon Held Business Meeting Monday, March 9th

Theta Epsilon Sorority met March 9th, in the home of Mrs. Clyde Slusher. The opening ritual and business meeting were conducted by the President, Mrs. Bruce Sheperd.

Plans are being formulated for seven members to attend the District VI meeting March 22, at the Hotel Texas in Fort Worth, Texas. Yearly report forms were handed out to various committee chairmen. Campaign material from District VI officers was read.

Mrs. Neal Tullis, welfare chairman, reported that the Heart Fund containers would be picked up and that supplies had been delivered to the Children's Center in Wichita Falls.

Mrs. Raymond Brammer gave an interesting and informative program on Burma and Siam. To complete her program she showed slides which her husband made while stationed in Thailand. The pictures were very colorful and showed their way of living, their customs and the methods of farming the rice fields.

At the conclusion of the meeting a hilarious White Elephant Sale was conducted by Mrs. T. M. Cornelius.

The closing ritual was repeated and delicious refreshments were served to Mesdames Bruce Sheperd, Neal Tullis, Raymond Brammer, Bruce Miller, Bryan Farris, J. A. Tibbets, Quinton Howard, T. M. Cornelius, Raymond Van Loh, Clarence Bridges, Wayne Johnson, Lyle Eaton, Zac Henderson, James Spinks, and Cloyd Adams, by the hostess, Mrs. Clyde Slusher.

NATIVE HOME

This tip comes from Africa where natives keep knives razor sharp without hones. They use soil preferably sandy soil, on a flat piece of wood. Soil acts like pumice or rotten stone. Work is slow but edge is keen.

IN A HURRY!

It's Sunday! An exciting day! I've planned so many interesting ways to present God's love to the wee small people I'm teaching. How they love God and His church! They are always there early. Must hurry! My young ones want to be there early too. How pleased our Father in Heaven must be to see so many preparing excitedly and happily to have a worship experience with Him.
See you there in a very little while!
Psalm 26:8 "Lord, I have loved the habitation of thy house, and the place where thine honor dwelleth."

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Shopping Scene

By Dorothy Owens Wright

Do you have the idea that those things we think of as convenience foods are more expensive to prepare than their old-fashioned counterparts? A recent U.S.D.A. study showed that such things as instant coffee, frozen orange juice concentrate and cake mixes are actually less expensive than ground coffee, fresh orange juice and homemade cake.

Whether you're counting pennies or calories or food values, you can count on cottage cheese. Just three-quarters of a cup gives you about half the protein you need for an entire day, the Fairmount Food people remind us.

Ever wonder how much of the American food supply comes from abroad? Last year, 13 per cent of the total food supply used by civilians in the continental United States was imported. Coffee accounts for more than half the imports.

Americans are eating twice as much sausage today as they did just 20 years ago, according to Armour and Company. Franks, weiners and hot dogs lead the popularity parade, but with more than 100 varieties being marketed, it's not hard to find one for every taste.

Are you aware that vanilla ice cream and chicken have replaced apple pie and hamburger as the most popular American menu items? The abundance of low-priced broilers and fryers accounts for the latter replacement.

Speaking of chicken, the Shenandoah Valley Produce Company supplies us with some information on those inspection and grading marks that you see on so much poultry. They're two different operations, both carried on during slaughtering and processing. Inspection is required by law for all poultry in interstate commerce, to determine its wholesomeness. Poultry grading determines its level of quality and about half of all poultry sold is federally graded.

You may want to stock up on beef for the freezer in the near future. The number of cattle on feed January 1 was less than a year ago and prices may be expected to advance by March.

Potato processing operations continue to grow. One of the largest processors in the country, Ore-Ida Foods, Inc., says that only 73 per cent of today's potato crop is sold in its natural unprocessed state. Potato chips, frozen french fries and other frozen forms and dehydrated products take better than a quarter of the crop.

The National Cotton Council reports that more all-cotton stretch fabrics will be seen in ready-to-wear sportswear this year. A number of major manufacturers are featuring garments made of such fabrics in resort and summer lines.

It appears that 1963 was a record year for tree nuts. The crop of the four major edible nuts — almonds, filberts, walnuts and pecans — was estimated at 308,000 tons, 80 per cent higher than 1962 and 38 per cent higher than average.

Star Shines in Kitchen, Too

NEXT TO A NEW ELECTRIC RANGE, the best kitchen helper a woman can have is a husband who can cook. And the best way to encourage him to learn is to make it easy, as this built-in electric cook-top does. A thermostatic control will permit long, slow simmering without worrisome watching.

They will still purchase food, shelter, and clothing items in good volume, but they will also buy a great many other things besides. These will mostly be comforts and semi-luxuries. The average work week in America has not shortened very much in the past twenty years, but emphasis on leisure time and making the most of it has increased. The desire to travel and to enjoy to the full holidays and vacations is a powerful force influencing buyers' attitudes and behavior. I predict a good increase in dollars spent for travel in 1964 versus 1963. In addition, I look for big boosts in spending for sports clothes, boats, fishing tackle, and many other recreational wants.

Markets of Tomorrow
The amount of installment debt contracted to help finance expensive vacations and other services, and to pay debts accumulated as people have sought a higher standard of living, is not yet large in relation to total income. But I forecast it will grow fast and that

Talk about cooking speed!

In just 65 seconds

This high-speed electric unit can heat a can of soup bubbling hot

Super-speed cooking units on today's electric ranges start heating *instantly*—reach full high heat in *seconds!* And because they transfer heat by direct contact with utensils, they offer unsurpassed cooking speed. A can of soup or beans, for example, can be heated bubbling hot in just 65 seconds. A quart of water boils in only four minutes. On top of range, broiler or oven, you get the cooking speed you want electrically. See your electric range dealer soon. Cook electrically... live better electrically!

'64 CHEVROLET—THE GREAT HIGHWAY PERFORMER

Nothing feels steep in a Chevrolet Impala (including the price!)

A hill is just something to admire the view from in a '64 Chevrolet with engines up to a 425-hp V8*.

And if Chevrolet can go over a whole mountain so you hardly feel it, you can imagine how it goes over plain old bumps. Jet-smooth, of course, because we put a big coil spring at all four wheels (and 700 sound and shock absorbers throughout the car).

As you'd expect, Chevrolet turns in its usual fine performance with everything inside that big beautiful Body by Fisher, too. All kinds of stretch-out room. Wide thick-cushioned seats. Yards of deep-twist carpeting and elegant fabric and vinyl upholstery. You feel good just being there. You can see how anyone might get the idea this is a high-priced car. Unless they happened to look first at its Chevrolet price.

And your Chevrolet dealer will be happy to show you that the price is probably what you'll feel least of all.
