Chamber of Commerce Luncheon Each FIRST MONDAY at Town Hall. Everybody Invited Each Pays for His Meal

British farmers as late as the last century chased their cattle through a "need-fire" with the idea that it saved them from pestilence.

Good To Be Funny Man In Arena At Boomtown Rodeo

Area Highway Construction Contract Let

A contract for 0.752 miles of construction on US 287 in Wichita County has been awarded to an Abilene firm, it was announced in Austin this week by the State Highway Commission.

E. M. Bailey, Contractor, submitted the low bid of \$27,961 on the project. Illumination from present US 281 to 16th Street in Wichita Falls is expected to take 80 working days, according to L. B. Dean District Highway Engineer at Wichita Falls.

Billy L. Dickenson, Resident Engineer at Wichita Falls will be in active charge of the project while it is under construction.

Former Teacher Improved Following Car-Truck Crash

Word has been received here that Mrs. Henry Lee Somerville, has been transferred from the Polly Ryan Hospital in Richmond, Tex., to the Wilford Hall USAF hospital at Lackland, AFB.

Mrs. Somerville, the former Miss Emily Moore of Burkburnett was critically injured in a car-truck crash in Richmond, May 11th. She is reported to be improving at this time and present indications are that she will continue to improve.

THIS 'N' THAT AROUND TOWN

Mr. and Mrs. Donald Ray Elliott of 816 Mimosa Dr., have returned from a wonderful vacation trip, which took them to Canada, New York, Washington, D. C. and Nashville, Tenn.

From Ontario, Canada, they visited beautiful cascading Niagara Falls, then went on to Albany, New York.

While in Albany, the Elliotts decided to see the World's Fair. As the happy pair toured the Fair, Mother Nature saw fit to drench them in rain.

That dampened their spirits a bit but the trip continued and the next stop was Washington, D. C.

As anyone, they wished to visit the White House, but bad luck presented itself once more when the door closed and the key turned as they arrived, leaving them with a keen sense of disappointment.

Heading toward home, they entered the city of Nashville, Tenn., and decided to rest there.

Remembering it to be the home of one of their favorite radio programs, the Grand Ole Opry, rest was postponed for the show.

Once inside, after being part of a long line, they sat for a couple of hours waiting for the show to begin, but it was worth it.

The next day the happy Elliotts began the last part of a wonderful trip.

For the third time in two months, death has claimed a relative of Mr. Charlie Morris, of 107 Michael.

A nephew, Larry Russell, 16, drowned in Amon Carter Lake in Bowie, Monday, June 8th.

He was interred in Sunset, south of Bowie, with Owens-Brumley of Bowie tending the arrangements.

Mr. W. O. Chadwick of 407 S. Ave B. is very happy to have as his house guest, his daughter, Mrs. Sybil Smith of Bakerville, Calif.

Mrs. Smith flew to Cape Kennedy and then to Burkburnett to visit her father, brothers and sisters.

She arrived on the 9th and will probably leave Saturday the 13th for Farwell, where she will spend some time with another brother, before returning to California.

Have you noticed that Henry's Bakery has a new location? Watch for opening day across from the Corner Drug Store, near the new bank construction.

Our City Manager, Jess Whatley, was in Odessa on business this week.

Burk Science Teacher and Student Attended A Nuclear Symposium Held In Austin, Texas Last Week

Kent Reppond, right, science teacher at Burkburnett High School, explains to Mitchell Lively Jr., student, one of the items displayed at the Texas Nuclear Science Symposium held last week at Austin. They were guests of Texas Electric Service Company at the four-day meeting jointly sponsored by the University of Texas and the Texas Atomic Energy Research Foundation, composed of 10 electric power companies operating in Texas.

Jehovah's Witnesses Circuit Assembly In Wichita Falls

Jehovah's Witnesses in this area are cancelling all local meetings to attend a circuit assembly in Wichita Falls, June 12 thru 14th.

The 16 congregations will meet to discuss their ministry and to offer remedies for existing weaknesses in order to stay abreast with the world wide work of Jehovah's Witnesses.

The semi-annual circuit assembly will be held in the Barwise Junior High School. The group is expecting 500 delegates from the circuit, reaching from Wichita Falls to Fredericksburg and Abilene to Mineral Wells.

The principal speakers for the Texas Circuit 12 assembly will be H. A. Fetzik of Brooklyn, N. Y., district overseer for Jehovah's Witnesses in a multi-state area, and Wallace D. Goff from California, who was recently appointed by the Watchtower Society to oversee the circuit by visiting the congregations three times a year.

The 3 day program includes a variety of Bible talks, discussions on ministerial problems and demonstrations on the technique of the ministry.

Harold P. Bruce, overseer of the Wichita Falls congregation, said, "The theme, 'Around the World with Jehovah's Witnesses,' will be highlighted, Saturday at 7 p. m. by a two hour color film showing excerpts from a global assembly of Jehovah's Witnesses held last summer in 24 different cities."

Climax of the assembly will be Sunday at 3 p. m. when Fetzik gives the discourse, "Facing up to the Urgency of the Times."

Wichita Singers To Meet June 13-14th

Conditions beyond our control, The Wichita County Singing Convention had to be moved at the last minute.

The convention will be held at the First Free Will Baptist Church, corner of Authur and Arizona Streets, just off Kemp Blvd. on June 13th and 14th.

Starting time Saturday will be 7 p. m. and Sunday starting time will be 11:00 o'clock.

Home folks are requested to please bring a picnic lunch to spread at noon.

The Patterson Family of Duncan, Okla., and the Spricel Airs Trio of Lawton, are expected to be there as well as other special groups and a program of class singing. Have some local talent worth listening to in special numbers.

The public is cordially invited to come and take part with them.

David Teal arrived here this week to spend the summer with his grandparents, Mr. and Mrs. Will Teal.

Mr. and Mrs. Harold Sanders recently attended funeral services for his mother in Kansas.

WATER

Burk's Most Essential Product

BETTY BOYD
Star-News Feature Writer

How long could you survive without water? Have you ever thought of that?

"Cleanliness is next to Godliness," an old friend used to say when I was a girl, but how would we keep our high standard of sanitary life without water?

Can you imagine beginning the day without washing your face, brushing your teeth, shaving or having a cup of coffee? If you're thirsty, just turn a faucet, but what if nothing came out?

Need a clean shirt? How will you wife wash it without water?

All of these things are essential to our everyday life. Water is essential to our very being, yet it is one of the most taken for granted blessings we have. Our health depends on clean, non-contaminated water. Without it, we would die.

De we ever question the source of our supply? No. Do we ever wonder how it is possible to simply open the faucet and receive a necessity of life? No. We do gripe about the water bill, though, don't we?

There is what is called a 'Water Plant' on Route One, about one mile east of town. At the same site, there are four water storage tanks.

These are supplied from 67 wells, drilled by the town, thru pipes purchased and laid by the town.

Water from three of the tanks keep a steady depth of approximately 11 feet in the fourth, and it is treated to eliminate any bacteria which could cause illness, as it passes through the pump house.

From the fourth tank, it is pumped through the header into pipelines connected through out Burkburnett reaching to your home and mine.

The header, may be operated in such a manner, that should one pump fail, the pipe connected to it, may be shut off and the water directed through another to the same part of town.

The water tower near City Hall, remains full, providing

the pressure which causes water to flow into our tubs and sinks when we turn the faucets.

Several men are responsible for sending clear, pure water into our homes 24 hours a day. Every second it is at our fingertips because H. B. Tally, head pumper and plant operator, A. N. Eaves, assistant and the men who relieve them, are specialists in keeping undesirable organisms out of the water, keeping the header working properly and pumping the water to our homes.

Others help to protect our health by careful checks and tests of the water supply.

Twice yearly, 1-2 to 1 gallon samples of raw water, that is untreated water, is taken from a well and sent to the Texas State Health Department in Austin for a complete analysis.

Twice each month, six samples of treated water are taken at random, from private homes and sent to the Wichita County Health Unit to laboratories to be tested for purity.

Water of satisfactory bacteriological quality should be with out coliform organisms.

The Health Department keeps a constant check to be certain we will not partake of water which could cause serious illnesses.

Chlorine is used, .75 parts per one million parts, to purify our supply.

Per capita, on a national average, we use 140 gallons per day and it is reported on a gradual increase.

In 1963, Burkburnett used an all time high of 55,593,000 gallons in August.

November saw the least amount used for 1963, with 20,138,000 gallons having been pumped from our water plant to the town.

Operators at the plant are licensed technicians.

H. A. Tally, plant operator, Haskell Draper, Water Superintendent, Jack Northrip, Jess Whatley and Claude Reed all own operator's certificates from the state Health Department.

It is obvious our water supply is well and expertly tended, so drink hearty and remember this great blessing and the unheeded protectors of our health in your next prayer.

YOUTH CENTER

The Youth Center board met on their regular meeting, June 2nd, with three members present.

The board expressed their appreciation to the ones who helped with the cake walk and to the Square Dancers who donated their time and money to help boost the funds of the Center.

There are still donations coming in and we want to thank them. And if there is anyone else who could not at that time bake a cake for the Center, and would still like to donate, it would be greatly appreciated.

Again, too, we want to thank the women's clubs and other individuals for their many donations, the drapes, the chairs,

the cash donations, their time, and their interest in the Center.

Special thanks to the Optimist for their Friday night youth group. And to Carl and Zelma Sutherland for sponsoring the Teen Swingers on Thursday night. And Mr. Cecil Curtis for his time and patience for teaching them.

Thanks to Mr. Purkey of Purkey Glass Co., for donation of his work and materials in fixing the broken windows.

Donations and proceeds for May:

- Cermics \$2.00
- Election \$7.50
- Friday night Youth, \$16.65
- City \$2.00
- Pepsi \$3.85
- Square Dance and Cake Walk, \$153.64
- Coke \$5.30
- Current Literature, \$10.00
- Square Dance Lessons, \$25.00

Burk Water Station Attendants

Mr. A. N. Eaves, left and Mr. H. B. Tally, are very important men to each of us. They maintain and tend the water station on Route 1, and the storage tanks, such as shown, and assure us of our daily supply of this essential commodity.

Army Enlistment Option Open Here

Operation Lone Star, a special enlistment option will be available to 50 men of this area until June 25th, according to an announcement by Sgt. Drue McBride, U. S. Army recruiter for this area.

Texans enlisting for this special plan will be guaranteed air borne training after completion of basic training at Fort Polk, La.

Paratroopers on jump status receive a bonus of \$55 each month above regular pay. Airborne training lasts 3 weeks.

CORRECTION

The honor roll list for section 6-6 of the Burkburnett Junior High School, Sixth-Six Weeks, was incomplete when submitted to the Burk Star office for publication and 2 names were omitted. They were Janice Fields and Alan Nunn.

WHAT IS "CHEAP POWER"?

What is "cheap electric power"? When is it actually and truly cheap, all elements considered?

One answer to these questions is provided by Gerry Pratt, Business Editor of the Portland Oregonian. He tells of a company that wasn't sure where to build a new plant, and to which the cost of electric power service was of importance. A Public Utility District offered a rate which was somewhat lower than the best a private utility could propose.

Why was this so? Mr. Pratt answers. The PUD pays no federal tax at all — successful private corporations, including power companies, pay a 52 per cent income tax. The PUD issues nontaxable municipal bonds at low interest rates — the private enterprise has no such special

WASHINGTON AND "SMALL BUSINESS" BY C. WILSON HARDER

To an American, as well as all decent people, one of the most horrifying facets of a communist regime is the way in which children are influenced to report to the police on their parents.

Yet perhaps this should not be so surprising. As Rep. John Ashbrook of Ohio recently pointed out on the floor of the Congress, in many areas of the nation school children are being brainwashed in a similar fashion all with the benign approval of the United States Department of Health, Education & Welfare.

C. W. Harder

For there has come into quite wide usage a series of psychological tests. These often termed by such fancy names as the Youth Inventory Test given by the Science Research Associates, comprising hundreds of questions, or statements to which the school child is supposed to give an answer.

On the results of these replies the "inventory" score on the child is made.

For example, in a test being used, and devised by a Benjamin Shimer, over 50 statements are slanted to plant the seeds of rebellion in the minds of children. Here are some of the statements they are asked to comment upon.

"My father is a tyrant."
"I am ashamed of my father's job."
"My parents neglect me."
"My parents don't trust me."

"I am ashamed of my parent's dress and manners."
"I am seldom consulted in family decisions."
"My parents won't let me make my own decisions."

As is well known, one of the chief objectives in preparing the mind of youth to accept the enormous lies of communistic ideology is to first destroy any loyalty to the family, or belief in any religion. Then into the mental vacuum communistic beliefs are implanted.

Rep. Ashbrook also pointed out that a foremost advocate of child brainwashing is Dr. G. B. Chisholm, a psychiatrist who in a published speech said, "For many generations we have bowed our necks to the yoke of the conviction of sin."

He further stated that the problem today is freeing children from swallowing "all manner of poisonous certainties" fed by parents, Sunday school and day school teachers and by priests.

"If the race is to be freed from its crippling burden of good and evil it must be psychiatrists who take the original responsibility."

The Ohio Congressman points out that Dr. Chisholm is no unknown crackpot. In fact, he has held high posts in United Nations offshoots such as a former Director-General of the World Health Organization, former president of the World Federation for Mental Health, and is honorary president of World Federalists of Canada.

No wonder people object to Federal bureaus getting into local education.

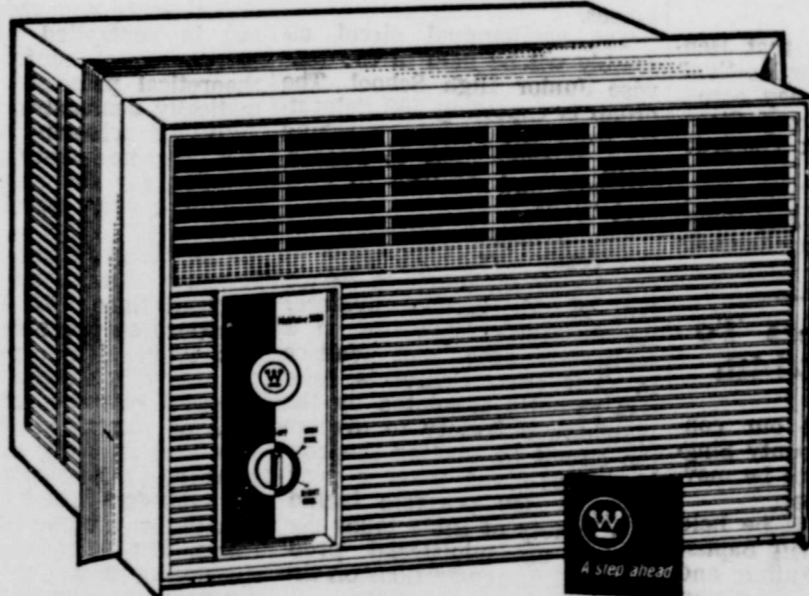

privilege, and must pay the going commercial interest rate. The PUD, in other words, is directly and indirectly subsidized by all the nation's taxpayers. The private enterprise must pay its own way in every particular, along with heavy taxes.

The story Mr. Pratt tells is reflected, the country over, wherever public power, which is socialized power, exists. That is true of the biggest federal system, such as TVA — and it is equally true, in principle, of the smallest REA cooperative. All of them, one way or another, are wards of the government — which means wards of the taxpayers at large.

That is the reason, and the only reason, why socialized power is allegedly "cheap power." It has no built-in economic magic — but it sure does have its subsidies. Following the same principle, we could have "cheap" food, or dry goods, or automobiles, or entertainment, or newspapers and magazines, or insurance, or anything else. And with it, of course, we would have a system in which government made all the decisions and gave all the orders on an or-else basis. This is known as the communist system, or the fascist system, or the socialistic system. Whatever the name, its principal product is slavery.

IT'S UP TO YOU

By Howard E. Kershner, L.H.D.

MR. WALTER P. REUTHER maintains that manhour output in the automobile industry is increasing at the rate of 4.9% annually.

Dr. Kershner

He states, therefore, that the minimum annual increase in wages that his U. A. W. will accept is 4.9%. Unfortunately, he is ignoring a very important consideration.

Increase in manhour output, to which he refers, is due much less to increased skill, diligence, or output of energy on the part of the workers, than it is to better machinery and equipment made possible by the people who put their savings at the disposal of the managers of the automobile companies. Savers are principally responsible for the increased output of workers.

Let us say that a man digs 25 bushels of potatoes per day by hand and receives as a reward 50¢ a bushel or \$12.50 for his days work. Another man supplies him with a potato digging machine which enables him to dig 100 bushels per day. Should he now receive \$50.00 for his days work? Surely he will see that his increased output is mainly due to the machine, and that he must divide generously with the man who supplied the machine. If both men are intelligent they will see the wisdom of dividing also with the public. That is, reducing the price of potatoes so that many more will be consumed; thus, increasing the reward both to the man who saved to supply the machine and to the worker who operates it.

Labor will be very short sighted if it insists on absorbing in wages all the gain from increased manhour output. The saver likewise must be rewarded or the worker will find himself without adequate equipment. In the long run, that will result in much back breaking toil at very low wages. It will destroy the gains that have been made possible by the industrial revolution and continuing automation.

Howard Kershner's Commentaries, Inc., New York 18, N. Y.

Contemporary Club Holds Installation Dinner At Centime

Members of the Contemporary Study club held their installation dinner at the Centime Ranch, Tuesday evening. The tables were decorated in a gay western motif. Mrs. Joe Crowley brought a beautiful arrangement of mums which she later used in installing the new officers.

After dinner was over, the outgoing president, Mrs. Joe Crowley, installed the following officers, President, Mrs. Oran Wilson; vice President, Mrs. David Gibson; Recording Secretary, Mrs. Cliff Wampler; Corresponding Secretary, Mrs. Jim Maag; Parliamentarian, Mrs. F. A. Eastman, Historian, Mrs. Alan Riddle; Reporter, Mrs. H. S. Thaxton; Treasurer, Mrs. Joe Eastman.

Perfect attendance awards were presented to 8 members, Mrs. Dan Hofacket and Mrs. H. S. Thaxton tied for best program awards. Mrs. Hofacket program was holiday tables, Mrs. Thaxton's program was How to prevent Worry and Fatigue.

There were 16 members and one guest present.

Texas Nuclear Science Symposium At University Of Texas June 7-10

One student and a teacher from Burkburnett High School will attend the Fourth Texas Nuclear Science Symposium at the University of Texas, June 7-10 under the sponsorship of the Texas Electric Service Company, it was announced by Joe Salter, today.

Mitchell W. Lively, Jr., of 220-A Polaris, Sheppard Air Force Base is the student and will be accompanied by Kent M. Reppond, a member of the school faculty.

The symposium is being jointly sponsored by the Texas Atomic Energy Foundation and the University of Texas. The Foundation is made up of ten investor-owned electric utility companies in Texas, including Texas Electric of Burkburnett. 500 selected high school science students and teachers will attend the sessions in Austin at which some of the nation's outstanding nuclear scientists will speak.

"The Foundation, which is co-sponsoring with the General Atomic Division of General Dynamics Corporation, the world's largest privately financed research effort in the field of controlled nuclear fusion, is also seeking, through its sponsorship of science symposiums, to contribute to scientific education and understanding in Texas," Salter said.

"The meetings seek to bring to high school science students and teachers of Texas, lectures on nuclear physics and related topics, by outstanding scientists and to provide the students with an opportunity to obtain answers to their questions on careers in this field

and college curricular."

Speakers at this year's symposium will include two General Atomic scientists from San Diego, Calif. They are Dr. Frederic de Hoffman, president of General Atomic and Dr. W. E. Drummond, theoretical physicist.

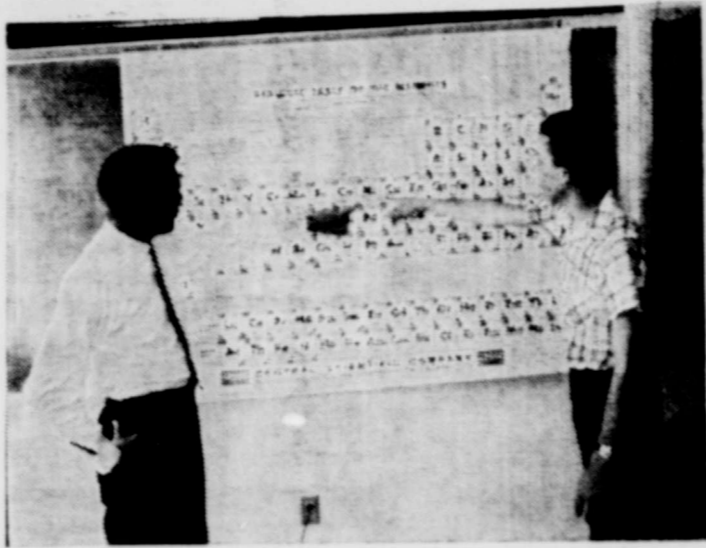

Dr. B. H. Amstead, professor of mechanical engineering, Dr. J. D. Gavenda, associate professor of physics and Dr. W. T. Guy, Jr., professor of mathematics, all of the University of Texas, also will be heard. Others who will speak are Dr. H. C. Thomas, chairman of the physics department at Texas Technological College, Dr. W. O. Milligan, vice chancellor for research at Texas Christian University, Dr. J. A. McIntire, professor of Physics at Texas A and M University and Howard R. Drew, executive vice president of the Texas Atomic Energy Research Foundation.

Topics which will be covered during the three day session will include nuclear physics and nuclear reactors, thermonuclear fusion research, superconductivity, the wave nature of matter, cyclotrons and X-ray, electrons and neutron diffraction methods.

There will also be group discussion sessions and a tour of laboratory facilities at the University.

A Russian who lives happily under the present system of government in Russia must either believe that man has no soul, or that, if he has, it is not worth developing.—Oscar Wilde.

Mr. Kent M. Reppond Explains Chart

Kent M. Reppond, member of the faculty of Burkburnett High School, explains the chart, "Periodic Table of the Elements," to student, Mitchell W. Lively, Jr., of 220-A Polaris, Sheppard Air Force Base. The teacher and student will attend the Fourth Texas Nuclear Science Symposium to be held at the University of Texas, June 7-10, sponsored by the Texas Electric Service Company.

Thrifty new 2.8 ton gas air conditioner that cools and heats average-size homes. Own it for as little as \$25 a month!

The same top-quality central gas air conditioning you'll find in large mansions is now sized for medium and smaller homes. This new 2.8 ton gas unit has 2 to 3 times the durability of comparable electric models, lower maintenance costs and gas economy. The new low price includes installation. Own it for as little as \$25 a month after down payment. For an estimate on gas air conditioning customized for your home, call your dealer or Lone Star Gas.

THE HIGH ROAD

L.W. PRENTISS

The New Attack on Highway Accidents

The accident rate on freeways with median strip dividing the highway and control of access is about one-third of the accident rate for all other highways, and this fact alone is a good justification for the construction of freeways. But it is a great oversimplification, of course, to think of freeways as "safe" and all other roads as "unsafe". As we all know, some sections of conventional highways are relatively free from accidents while other sections have accident rates substantially above the average. Every police department and every ambulance driver knows certain spots where accidents happen again and again.

President Johnson called attention to those hazardous highway locations in his recent letter to the Secretary of Commerce in which he called for a "safety priority program" to meet the urgent need to reduce traffic accidents.

In turn, Secretary Hodges wrote to the governors of the 50 States urging that they give high priority to programs of safety improvements to facilitate their completion "well in advance of the time they would be scheduled on the basis of general traffic needs."

And Federal Highway Administrator Rex M. Whitton has announced that the Bureau of Public Roads is adopting "as liberal an attitude as possible" in determining whether safety improvement projects recommended by the States are eligible

for participation in the Federal-aid highway program.

Specifically, Mr. Whitton said that the Bureau of Public Roads will be receptive to project proposals on the Federal-aid systems involving the widening of narrow traffic lanes and narrow bridges, the installation of traffic control devices including protective devices at railroad crossings, the reconstruction of dangerous intersections for the better channelization of traffic, the flattening of side slopes and the removal of fixed roadside obstructions to provide a clear recovery area for vehicles out of control, reconstruction to improve sight distances on curves and hills, and the installation of guardrails, guide posts, delineators, highway lighting and fencing. Fortunately, practically all of these safety measures will be incorporated in any ultimate modification or major overhaul of the ABC roads.

The number of lives that can be saved through this program has not been estimated. Much will depend, of course, on the willingness and ability of the States to allocate highway funds to spot safety improvements. There are other highway needs which also demand priority attention.

But, as President Johnson put it, "In a society such as ours where human life and health is valued so highly, there is a special obligation to use our scientific abilities to bring this problem of highway traffic safety under control."

Rambler Classic 770 Four-Door Sedan

POWERFUL V-8 SURPRISE

This smart and sporty Rambler Classic has more V-8 power than the standard V-8 in a top-size Ford or Chevrolet, has virtually the same room, handles and parks a lot easier, costs over \$230 less,* and has many big advantages at no extra cost that they don't have at all. What's more, with the savings of this big-room Rambler, you can keep your budget happy and still splurge on sporty options like reclining bucket seats, console, floor shift (manual or automatic), power steering, brakes, windows... or whatever. So come on and have fun. Take a look at this powerful surprise at your Rambler dealer... especially now when you can make extra savings.

Rambler Classic—the big buy during the Big Rambler Selling Spree

*Comparisons based on manufacturers' suggested retail prices for top-line 4-door sedans with V-8 engine, heater and front seat belts. Prices may vary with dealer's individual pricing policy.

Which Way Do You Wash Dishes?

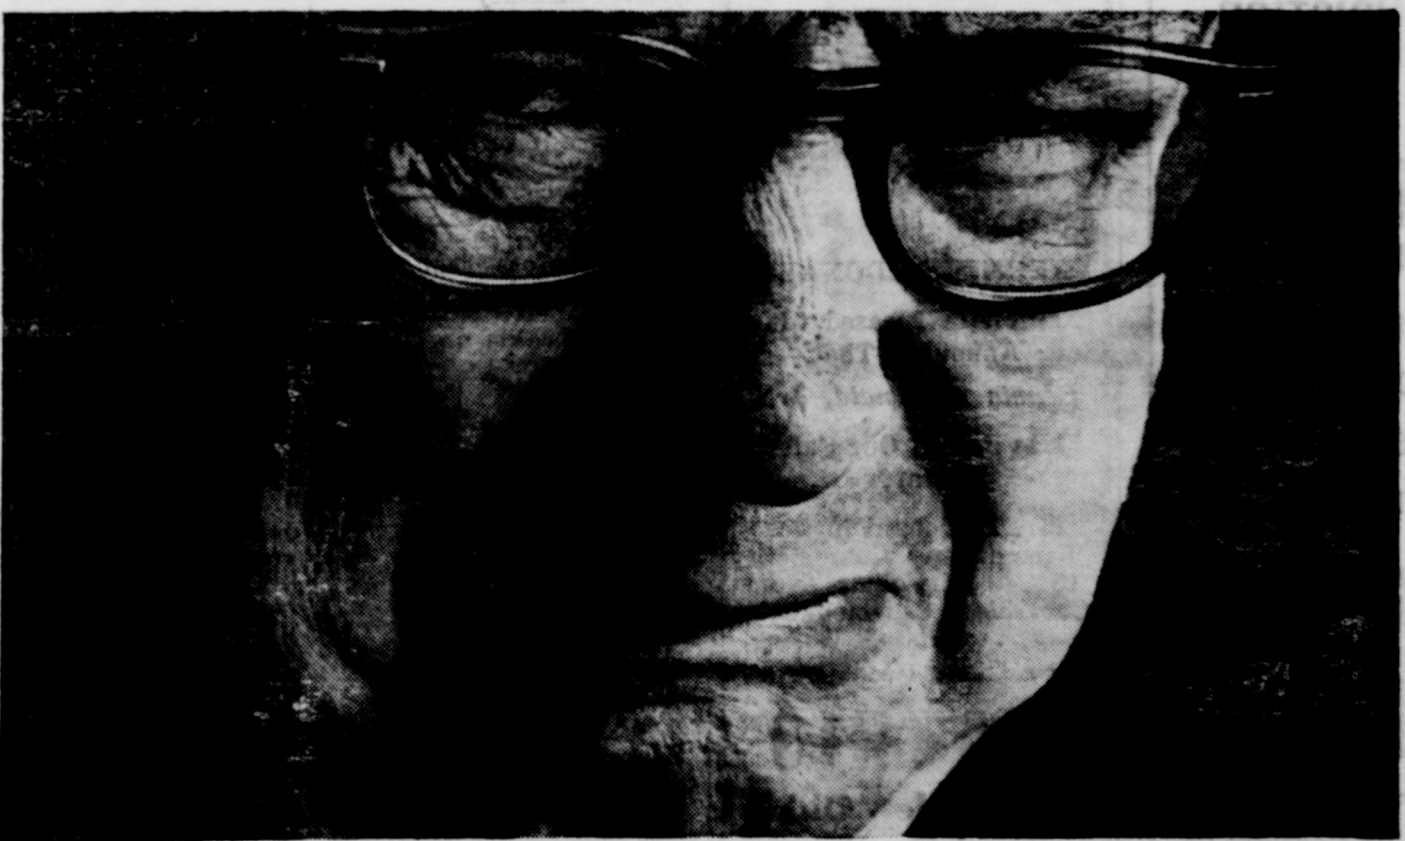

It's a SNAP when you use an Electric Dishwasher!

Dishwashing's done at the snap of a switch when you do it the modern electric way. Instead of soaking, washing, rinsing, and drying dishes by hand, you just load and start your Electric Dishwasher and you're free to tend to other things.

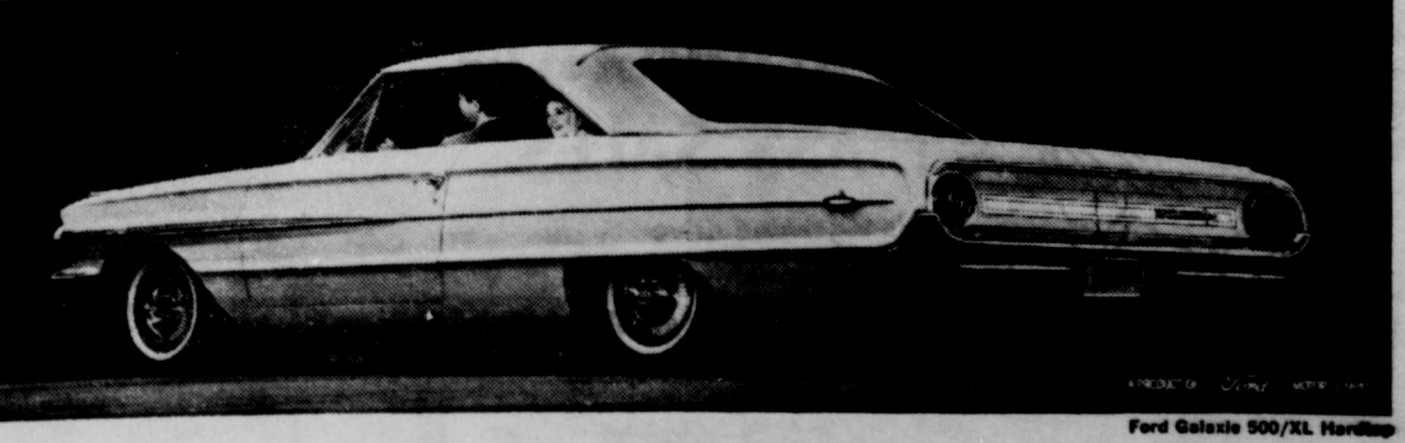

An Electric Dishwasher not only eliminates a tiresome daily task, it washes your dishes hygienically clean, using water hotter than hands can stand. It helps keep your kitchen tidier and your hands lovelier. And entertaining is much more fun when you're free from dirty dish drudgery.

See your electric appliance dealer

TEXAS ELECTRIC SERVICE COMPANY
JOE T. SALTER, Manager 569-3373

Have you ever seen 7,000 grown men cry? You'd think success would make them happy, but ever since Mustang came out, seven thousand Ford Dealers all over the country have been weeping and wringing their hands. They can't get as many Mustangs as they would like. All this would upset us, too, except it's happened to us before. You see, this was the hottest sales year in Ford Division history even before Mustang came out. At the beginning of the model-year, dealers couldn't get enough of our big, hot Super Torque Ford Hardtops (sales up 54%) . . . or luxurious Thunderbirds (sales up 68%). Falcon sales are almost as big as Chevy II and Valiant combined. Fairlane continues to be a leader in its field. So, even though some people would like us to put all our plants to work on Mustang, we can't let down our hundreds of thousands of Ford, Thunderbird, Falcon and Fairlane lovers. Why don't you come see what all the shouting's about! Ask your Ford Dealer for a test drive. (You might even get him to smile.)

GAS CAN LIFE JACKET

Don't forget the gas can for your outboard will float. Tucked under a seat it will also provide a reserve of buoyancy if your boat swamps.

First cannon balls were made of stone.

Clara-Fairview HD News

The Clara-Fairview Home Demonstration club met in the home of Mrs. Newt Crane, with Mrs. Dude Smith as hostess, on June 2nd, at 2 p. m.

The meeting was called to order by Mrs. E. J. Simons, president. The members repeated "The Lord's Prayer" in unison and sang "Daisy." Roll call was answered with My Favorite Recipes. The minutes were read and approved and treasurers report given. Committee chairmen reported on their committees. The thought for today is: "The Man Who Says it Can't be done usually interrupted by someone doing it."

Mrs. Newt Crane brought the program on "Your Congressman." There are two senators from each state and there are 437 members in the House of Representatives, the number from each state depending on the states population. Representatives are elected every two years and senators every six years.

A congressman's first obligation is to his people. They appreciate personal contact with the people they represent. People must make known their views so that the congressman knows what we feel and what we want, so they can weigh the importance of each bill. Talk and correspondence between congressman and the people of his district makes the Government function better and it grows stronger. Congressmen lead busy and important lives and they try to make their decisions and actions so they benefit the people they represent.

Mrs. J. D. Dilbeck won the game prize and Mrs. E. J. Simons won the door prize.

Refreshments were served to two visitors, Mrs. John Crane and Miss Louise Bentley and to nine members, Mesdames Mary Blar, Newt Crane, J. D. Dilbeck, Ted Harris, J. H. Bentley, R. C. Gilbow, W. Ray Stimpson, E. J. Simons, and Dude Smith.

Next meeting will be held June 16th with Mrs. J. D. Dilbeck as hostess.

Dwayne Askins, 142 1/2
Allen Cates, 127 1/2

More than 225 different tree types, 600 species of grasses and 4,000 species of wild flowers grow in Texas.

Guadalupe Peak in the northwest corner of the state is the highest point in Texas with an elevation of 8,751 feet.

The ship's rudder for steering large vessels was perfected in the 13th century, paving the way for long voyages.

Porpoises are warm-blooded, air-breathing mammals.

3 Boys From Burk Attending Boys State

The American Legion Boys State commenced June 4th as 718 high school boys from throughout the state began registration, Attorney General Waggoner Car, chairman of the youth program, has announced.

Among those registering from Burkburnett were Kenneth Edward Siber, Danny Taylor and Carroll Jay Forrest, who were sponsored by local American Legion Posts.

Upon arrival at the University of Texas Campus, each citizen was assigned to one of two political parties—the Longhorn or Pioneer. Each citizen then functions as a member of his party; he attends its conventions, caucuses and votes in its primary.

In Boys State, The American Legion provides the type of program where the young citizen has the opportunity to learn for himself that his government is just what he makes it. The boy learns to do by doing.

Highlight of Boys State will be a trip to the Capitol on Wednesday morning where each elected Boys State Official will be given an opportunity to serve in his respective office for a day, followed by the Governor's Ball Wednesday evening.

Outstanding speakers scheduled to appear are Department Commander John E. McKelvey, Electra; Dr. Harry Ransom, Chancellor, The University of Texas; Zollie Steakley, Associate Justice, Supreme Court of Texas; American Legion Auxiliary president, Mrs. Harold J. Cooper, Beaumont; National Vice Commander of The American Legion, Harry Wright, Mexico City; Robert W. Calvert, Chief Justice, Supreme Court of Texas; and Dave Shanks, Austin American Statesman.

Boys State enrollment year brings the total of high school boys who attended since 1948. Boys State was first held in Texas.

A well of water...

Many important events have taken place at the well. In days long ago it was a meeting place, where all came because of the necessity to obtain life-sustaining water.

Jacob met his beloved Rachel at the well. Moses met the daughters of his future father-in-law at the well in Midian. Much later Jesus Christ met a woman of Samaria at the well and said, "Whosoever drinketh of the water that I shall give him shall never thirst: but the water that I shall give him shall be in him a well of water springing up into everlasting life."

The church of God today is a meeting place where many come to obtain this life-giving and life-sustaining water of which Jesus spoke. Won't you come to this meeting place next Sunday?

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny, the truth which alone will set him free to live as a child of God.

"Bubble" Sunsuit for Babies

Baby girl's sunsuit in a bubble silhouette in soft, stretchable terrycloth fabric is a feature in Carter's line of infants' wear for Summer, 1964. Part of the "stretchable softies" group, which includes separate tops and bottoms, this style combines solid and striped stretch terry in yellow or pink and white.

The white yoke looks nautical with two embroidered stars. The group comes in one size only which fits infants 6 mos. to 18 mos. old. Weight range is 18-26 pounds. Retail price is \$3. Other garments in the group come in blue and white stripes, as well.

Wherever the Greeks went, they planted vineyards.

CHEVELLE by Chevrolet

FRISKY AS IT CAN BE... FINE A BUY AS YOU CAN GET (even finer now!)

Trade 'N' Travel Time is running out at your Chevrolet dealer's. This is about your last chance to get in a whole summerful of fun with a beautiful buy like a Chevelle Malibu wagon.

Let us point out some less obvious pleasures. It has curved side windows—not just for looks, but to give you more shoulder room. It has those self-cleaning rocker panels beneath the doors that resist rust.

Inside, the upholstery over its wide foam-cushioned seats is soft, durable vinyl. We don't want anything playing havoc with Chevelle's good looks if we can help it. All in all, there are 11 different Chevelles being offered during Trade 'N' Travel Time. Wagons, coupes, Super Sports, convertibles, sedans. One's as beautiful a buy as the other. It's up to you. But hurry, whatever you do!
