**England Must** 

- London, Aug. 13 -Lord Cecil, ederal funds which can former undersecretary for foreign affairs, said today "only plain speaking can save us from a repetition of the fateful blunders of 20 years ago." "We (England) must tell Italy in plain, decisive words we are not bluffing and that we are ready to carry out our solemn obligations to the League convenant no matter how drastic an action may be required." he asserted. "Our path is clear and first England must exercise economic and diplomatic measures to prevent hostilities. If those fail, we must call on the League members to unite by force if need be." Dord Cecil, a leading advocate of peace, earlier expressed his views at a special meeting of the executives committee of the League of Nations union. The committee adopted a resolution insisting upon collective action by League members to prevent war between Italy and Ethiopia.

everal days and nights, and it was Cap Rock League. ery hot and sultry Monday night. breeze whatsoever. The rain Lubbock to Spur to Jayton and most all of Kent county.

#### The Sweetest Music

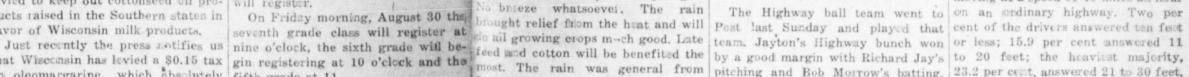

Honestly and truly the sweetest usic that we have heard for some ime was the songs sung by the amous frogs in the famous frog bank of Jayton early Tuesday morning.

The teaching staff will have some the burning heat. Crops had begun wither and dis. Many patches of cotton were blooming right in the top. Feed was wilting down and the grass had burned up. Our expectations and hopes for big crops which we of this part of Texas badly needud, were being blasted out by the roots. Faces were getting drawn and discouragement was seen on ever countenance, than came the rain of early Tuesday morning that put the frogs singing, and when the frogs sing in Jayton in August, the man that can't smile is afflicted with something besides dry weather. Sweet

spectacular plays by all members of For example, drivers were asked stop a car with four wheel brakes moving at a speed of 40 miles an hour The Highway ball team went to on an ordinary highway. Two per nost. The rain was general from pitching and Bob Morrow's batting. 23.2 per cent, answered 21 to 30 feet, and 14.1 percent answered 51 to 60 feet.

> The true answer is 80 feet- and it was given by less than 6 per cent of the drivers. Only a minority of motorist realize that, no matter how good a car's brakes, it is impossible going 40 miles an hour will skid farther than that with locked wheels.

Memphis has provided a good example showing that we vitally need continuious and intensified "schooling" for drivers-and that the driver who has operated a car for twenty years should be given attention as well as the beginner.

Adequate knowledge of the limitvention.

## YOU DON'T HAVE TO "BREAK IN" THE FORD V.8

## You can drive it 50 miles an hour the day you buy it

THE FORD V-8 is ready for normal driving when you buy it. There is no tedious period of breaking-in for 500 or 1000 miles. You can drive it up to 50 miles an hour the first day. And after the first hundred miles you can drive it as fast as you desire.

That means greater motoring enjoyment for every motorist. It is especially important to motorists who are thinking about a new car for a vacation trip - to physicians, salesmen and all those who use a car for business. Instead of dragging along at slow speeds for lays, you can make good time from the start. The reason for this is as important as the result. The Ford V-8 needs no breaking-int because of unusual accuracy in the manufacture of moving parts and the smoothness of bearing surfaces. Clearances are correct when you buy the car. It is not necessary to depend on a long wearing-in period to eliminate tightness and insure smooth running. Longer life, greater economy and better performance are bound to result from such precision methods. The Ford V-8 gives you fine-car construction, along with fine-car performance, comfort, safety and beauty.

the most delightful bedrooms you hopes to have it a future.

A good cigarette, too needs Balance\_

And that's why the tobaccos in Chesterfield are carefully balanced one against the other . . . not too much of one - not too little of another.

We take the right amounts of the right kinds of four types of tobacco - Bright, Burley, Maryland and Turkish.

It is this balancing of tobaccos that makes Chesterfields milder and makes them taste better.

IRONS A NIGHTIE, the pavement had been removed. 2 SLIPS, 2 STEP-INS, 6 HANDKERCHIEFS **About Editing**

#### A Newspaper

Editing a newspaper is a lot of fun -sometimes. Almost anyone can edit a newspaper; if you don't believe it ask the first man you meet on the street and he will probably tell you: "If I couldn't get out a better paper than that old sheet. I'd go jump in the creek."

And he might be right at that. One thing is puzzling, however. Someone asks: "What's in the paper today?" The answer is "Nothing in it, never is." And yet when that party fails to get his paper he rushes into the office for another and wants to know what is the matter.

Yes, editing a mewspaper is a lot of fun. All you need is a sharp pair of shears, a paste pot, plenty of guts and a gun.

The best news stories seldom get to the newspaper. There is a reason. Most editors are firm believers that "self preservation is the first law of nature."

An editor should be like Rastus mule. The mule was blind. One day Rastus sold his mule. The buyer failed to motice the mule was blind and in a few days came to Rastus complaining that the mule was blind. "Runs into everything." he warthfu'ly exclaimed.

"Dat mule ain't blind," portested Rastus, "Dat mule jess don't give a dam."

"I Was Drunk"

"I was drunk," said the prisoner at the bar and I don't know what I was doing," as he was asked by the judge if he had anything to say before sentence was passed on him for

killing his best friend. "No doubt you were drunk" said the judge, "But being drunk excuses no man for murder, but it can be pleaded in mitigation of punishment for a crime."

"Refore you got drunk, you knew very well what you might do when drunk. You knew that when drunk you were apt to do things that you would not do when sober. Yet, you deliberately swallowed that which you knew would take away your powers of self restraint and reason. You knew this while you were swallowing the staff."

"Your attorneys have pleaded that you cannot control your appetite for hard liquor. This may be true, but we are going to place you where

The promoter and his as-

> some \$300,000 or more from creduulous investors in the past four years, folded their tents and departed shortan investigator from the Department of State. It is impossible to compute the saving thus afforded. In another Texas city a stock salesman returned \$4,000 to one of his victims when appraised that the State Department was investigating the matter.

"But the job has only begun," Secretary Mann declares. "Our objective is to rid the State of these rackateers, so far as is humanly possible. It can be done with only the assistance of the people of Texas. No purchaser should buy any form of security without first determining if the seller is registered and licensed by the department of State. We should likewise be appraised of cases of fraud. The time has come in Texas when the Securities rackateer must take his rightful place along side the convicted murderer, hi-jacker and common thief behind prison bars."

## YOU DON'T HAVE TO "BREAK IN". THE FORD V.8

### You can drive it 50 miles an hour the day you buy it

THE FORD V-8 is ready for normal driving when you buy it. There is no tedious period of breaking-in for 500 or 1000 miles. You can drive it up to 50 miles an hour the first day. And after the first hundred miles you can drive it as fast as you desire.

That means greater motoring enjoyment for every motorist. It is especially important to motorists who are thinking about a new car for a vacation trip - to physicians, salesmen and all those who use a car for business. Instead of dragging along at slow speeds for lays, you can make good time from the start.

The reason for this is as important as the result. The Ford V-8 needs no breaking-int because of unusual accuracy in the manufacture of moving parts and the smoothness of bearing surfaces. Clearances are correct when you buy the car. It is not necessary to depend on a long wearing-in period to eliminate tightness and insure smooth running. Longer life, greater economy and better performance are bound to result from such precision methods. The Ford V-8 gives you fine-car construction, along with fine-car performance, comfort, safety and beauty.

A good cigarette, too needs Balance\_

And that's why the tobaccos in Chesterfield are carefully balanced one against the other . . . not too much of one - not too little of another.

We take the right amounts of the right kinds of four types of tobacco - Bright, Burley, Maryland and Turkish.

It is this balancing of tobaccos that makes Chesterfields milder and makes them taste better.
