Dear Nanalee,

Thanks very much for bringing us up to date on our subscription to the Deport Times. We had just failed to send you our new address. Sorry 'bout that.

In years past we have thoroughly enjoyed receiving and reading every word of Deport Times. It's the only newspaper we receive from the U.S. Even though the news is about 4 months old when we receive it, it is still most welcome. I especially enjoy seeing the names and photos of friends and acquaintances whom I haven't seen for many years. We appreciate the good job

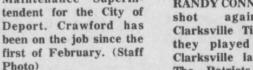

you are doing. Sincerely. Fred M. Allen Box 8196

Left-Handed

Most cats are left-pawed. Dogs, mice, chipmunks. and chimpanzees are about evenly divided. Even some climbing plants have a tendency to twine to the left instead of the right.

The childhood fun of flying a kite can be a treasured experience. But, before the fun begins, make sure your child understands the rules of kite flying safety. Use only string, paper and wood in a kite-never metal, since metal conducts electricity. Never fly a kite on a rainy day, since wet string is also a conductor. Stay away from power lines and antennas when flying a kite. If the kite gets stuck on a power line, don't try to pull it down. Instead, call us, and we'll get the kite down for you. Keep kite flying fun . . . teach your child kite flying safety.
