For several months now I have been one of a number of folks going up to our newly formed reservoir to observe wild ducks, geese and other water fowl. Binoculars and a long lens camera have been the only weapons needed, and the rewards were great.

Now it seems that someone has found a new sport. It consists of taking target practice on Canadian Snow Geese and leaving them floating dead upon the water.

wa,e,, Some hunting, which by the way, is quite illegal, since the lake is within the city limits of Deport, and the duck and goose season is long over, has been going on all along.

I've hated it because the new water is the perfect place to establish a wildlife refuge where numerous people could enjoy it. But this slaughter without purpose is truly tragic.

It lacks any purpose except destruction, and it lacks any moral sense of sport-

My impulse is to say what I've said about people hunting on our property, "Caution, hunters may be hunted." I know that can't be done, but it would be just about as logical and decent as destroying beautiful creatures and leaving them
