## Prairiland Livestock Show, Stew, Auction This Saturday

Do you like kids? Like animals? Like fun? Like stew? Like auctions? Then this Saturday, April 1, is the perfect day for you!

The Prairiland FFA will hold their annual livestock show for FFA and 4-Hers, with judging beginning at 9 a.m. In conjunction with the livestock show, there will be a stew cook-off with various teams competing for the best stew, concession stands and bake sales, a pig wrestling with the

wildest pigs this side of Arkansas and a stew supper.

The stew judging will take place at 3 p.m., pig wrestling at 4 p.m. and the supper will begin at 5 p.m. and continue until 7 p.m., with the auction following. Many of the auction items will be made by the Prairiland Ag Shop, and include smokers, picnic tables, hope chests, feeders and a variety of other items. It's a full day of events, and fun,

and worth getting out in the spring weather to enjoy.

The Pattonville Community Center will have a concession stand in the gym for those who have a hunger attack during the day, and tickets for the stew supper can be purchased at the door.

Proceeds from the auction go to finance the Prairiland FFA Chapter's projects.

The Prairiland Band will hold a fund-raising BAKE SALE this Saturday, April 1. They will begin in Deport first, then at the Prairiland Livestock Show....

Pattonville Community Center will have the concession stands at the Prairiland Livestock Show Saturday, April 1 in the gym. Sandwiches and sweets are needed from anyone wishing to donate these items.

### Start Early On Lawn Care

By Herb Brevard

Beautiful lawns are the result of planning and good management throughout the year. Now is a good time to get into the swing of things for 1989, according to Dr. Sim A. Reeves, Jr., Extension agronomist at the Texas A&M University Agricultural Research and Extension Center at Overton.

"Lawns should be mowed close, removing all dead grass, debris, leaves and weeds," said Dr. Reeves. "Delay the first application of fertilizer until about mid-April to prevent feeding weeds instead of grass."

Any low spots in the lawn should be leveled with good sandy loam soil. Grass will generally grow through this added soil if no more than one to two inches are applied.

"It is too late to apply pre-emerge

herbicides to lawns," Reeves said. "If weeds are a problem, several post-emerge herbicides are available. Read and follow label directions, making certain your lawn grass is approved on the label. Some herbicides are very selective while others kill a wide variety of grasses, weeds and shrubs."

A soil test should be done on the lawn every two or three years. In the absence of a soil test, Reeves suggests using a balanced fertilizer. Apply at a rate of no more than one pound of actual nitrogen per 1,000 square feet of lawn.

"Continued maintenance throughout the year is necessary to keep the lawn healthy and vigorous," Reeves said.
