There has already been one column on this subject, but as time goes on, a few more of these serious philosophical questions have arisen.

These are definitely important questions, things that need to be answered!

For instance...why won't the soles of feet or the palms of hands tan? Just think about it! It doesn't matter how much sun they get exposed to, the soles of feet and palms of hands still remain pink. Why? For what reason? As a secondary question...how come they don't blister? They never seem to. Have you ever met anyone walking tenderly because the bottoms of their feet were sun-burned?

How come we don't have hair on our eye lids...but have hair above them and on the very edges of the lids?

On the less biological side, more on the mechanical side.

Has anyone ever seen an extension cord that all three plugs worked on? How come two out of three work, but one is always dead? And how come with a two out of three chance to plug in to one of the two working plug openings, 99 percent of the time it's the non-working one that gets tried?

The next section is kind of a mechanical-biological section. It concerns the reproduction of non-living things! Like needles and pins. What is it, some kind of chemical reaction that every time a pin is dropped into carpet it begins to multiply? Needles...how do they crawl? Tiny little slivers of silvery metal, they have no arms, no legs, no hooks. But one put down on an ordinary surface can move two to three feet with seconds!

Glue is another of those mysterious things. How in the world can glue stick it's own container shut, pull human skin off, dry into a solid mass that has permanently affixed some object where it doesn't belong...and yet, when applied to hold two pieces of plastic, paper, or metal together, proceed to absolutely refuse to hold anything?

Mysteries. Mysteries, if not of the universe...at least of ordinary life. Oh, I know that no think tank scientists are receiving grants to try and solve these burning questions, but I do suspect that in the wee small quiet times most of us regular humans have pondered on them. If not specifically these questions...at least similar ones!

## Geese War Collection Makes Past Live

By Mollie Williams

If anyone would like a glimpse into the past, specifically the second World War, Harold Geese can provide that glimpse.

His collection of memorabilia from World War II includes guns, flags, letters, German and French money, pictures and much, much more. In fact, the collection included enough items to cover a large antique dining table.

During the war, Mr. Geese was in the United States Army, 4th Platoon, Company A, in the Engineering Regiment.

Although the war is many years past, Mr. Geese describes with extreme clarity each person or event he recalls as he thumbs through his thick picture album.

With the same expertise he most likely initiated in the 40's, Mr. Geese mounted a grenade launcher to the

end of his old army rifle, explaining with surity just how it was done, and the uses it had during war time.

Among the most fascinating things in his collection is a diary, kept from 1941 to 1945, his service years.

Scanning the handwritten pages is an almost magical journey back to those war days. All the anxiety he and others felt as the bombers flew overhead, attacking the camp.

The sadness he felt as he wrote about the many Americans he saw killed, while fighting for freedom, the loss of friends, all are revealed in this day to day account of life during a turbulent, difficult time.

At the end of the diary, the tone changes, and the exuberance and pride Geese felt as he recounted the victories and his final days of wartime becomes stronger and stronger.

Mr. Geese generously explained

about many items of interest, and his pride and his devotion to his nation is strong and inspiring.

After a visit to his home, after talking with someone whose patriotism has been tested in the sternest of tests, it is impossible not to ponder on the men and women who fought so bravely for the liberty that each and every American enjoys.

Mr. Geese was among the fortunate ones who lived to come home from that war. Those memories are branded forever in his mind.

Somehow, it is doubtful that he, or other veterans, sees fit to consider burning the flag that they fought for as a "form of free speech". For him, the flag and the collection of war memorabilia, are very real reminders of a desperate time when freedom was at stake. It isn't something they take lightly.

HAROLD GEESE is pictured with his large collection of memorabilia from World War II. He served in the United States

Army from December, 13, 1941 to September, 1945. (Staff Photo by Mollie Williams)

## Abundant Rain Leads To Abundant Mosquitoes

By Nanalee Nichols

How can anything so very small be such a very big problem? But with this abnormally wet spring, and the continuing rains of this summer, the mosquito is very definitely a big problem.

The fierce, persistent, armed, as everyone knows, with a blood-sucking "beak" and the desire to feed, is everywhere this summer.

Few things are as frustrating as trying to sleep with the irritating whine of a mosquito fading in and out as it zooms in closer, then backs off. Small enough to evade being spotted, the mosquito nevertheless, leaves behind huge welts that itch fiercely. Fortunately, this part of the world doesn't have to worry about transmission of diseases such as malaria by mosquitoes, so that the welt is about the only result of a bite.

Usual control methods, such as

eliminating standing water in outside containers and pots, are nearly useless this year, because of the large amounts of water left standing everywhere.

Old tires, cans, jars or scrap piles make ideal sites for mosquitoes to raise, and usually by July, these sites have gone dry. This year, however, with rain still falling, these places are continuing to provide excellent breeding spots.

Since some species of mosquitoes can fly up to 10 miles, control efforts are really difficult.

Another by-product of the heavy rains is dense foliage and tall grass, mosquito heaven! Spraying dense shrubbery near or around the home with insecticide such as malathion can help, since that is where the insects concentrate.

Screens should be checked for

small holes, and patches applied, in order to help keep them outside.

Garages should be checked, and perhaps sprayed, as the mosquito likes to "lurk" in dark corners, they fly in through opened doors.

In order to go fishing, sit on the porch or have an outdoor patio, some measures must be taken. Insect repellent helps, as do oil of citronella candles or lamps. But remember, it takes a pretty heavy concentration, since outdoors the effects of the repellent dissipate quickly. Bird houses for Purple Martins can provide natural controls, too.

All in all, there is little that can be done about the mosquito except to eliminate as many breeding sites as possible, spray if they are really bad, and hope for dryer weather! Oh, and be prepared to use the ever-useful slap and scratch technique!

## Sales Tax Figures Released

State Comptroller Bob Bullock said Friday that local sales tax allocations to cities, counties and transit authorities across the state increased 14.2% during the first half of 1989, compared to the first half of 1988.

"The Texas economy continues to strengthen and expand, and the local sales tax rebates reflect that growth," Bullock said. "Even payments to economic areas that haven't fully recovered, such as Austin and San Antonio, are improving."

In the first six months of 1989, statewide city allocations totaled \$512.5 million. Last year's payments for the first six months were \$465.9 million.

Checks totaling \$66.3 million were sent Friday to 875 cities that impose

local sales tax at either one or one and one-half percent, Bullock said.

Bullock added that the June 1988 monthly allocation was unusually large, so this month's payments compared to June 1988 payments may appear to be slightly lower than they actually are.

Bogata received \$1,397.84 for a 6.97% increase over last year's payment of \$1,020.57. Total payments to date are \$13,767.91.

Clarksville received \$12,782.15 for a 5.49% increase while Detroit received no payment for this period.

Mt. Pleasant received \$83,544.78 for a 9.75% increase for this period.

Talco received \$1,247.89, showing a 19.51% decrease, as last year's payment was \$1,331.10. Total pay-

ments to date are \$10,083.44.

Blossom received \$790.09 for this period, a 27.55% increase over 1988, which had no payment for this period.

Deport received no payment this period, with no payment for the same period last year. Total payments to date are \$6,904.56.

Paris received \$158,529.23, showing a 6.24% increase over 1988's payment.

"The best indicator of sales tax rebate trends is the year-to-date totals. One payment won't give as accurate a comparison as six payments," Bullock said.

June's checks represent taxes collected in April by monthly filers and reported to the Comptroller's office by May 22, Bullock said.

## Rose Reunion Held

Eighty-five members of the late W.W. Rose family held their reunion Saturday, July 1 at Musgrove's Flying M Ranch and Camp.

The family enjoyed good food, fellowship, singing, horseback riding, swimming and lots of other activities throughout the day.

## Locals Attend Reunion

Descendants of Hiram Kennedy/Sarah Jane Deweese gathered in Paris at the Holiday Inn on Friday, June 16 and at the Red River Valley Fair Grounds Saturday, June 17 for a family reunion.

This pioneer couple to the Republic of Texas in the mid-1840's soon established themselves in Harrison County as landowners. In 1857 they purchased land in the southeast part of Lamar County which is registered in the State Land Office as the Hiram Kennedy Survey. They lived in their home east of the present community of Cunningham until Mr. Kennedy's death September 8, 1878. He and Mrs. Kennedy are buried in Halesboro Cemetery.

Seventy-two people registered and were identified with name tags. A quilt bearing names of members was presented to Wade Kennedy of the sixth generation and Brie Nelson, a seventh generation member. On display were family records dating back to the 1700's, pictures of early family members, and a large wheel showing names of all members for six generations of George and Mollie Kennedy. A cookbook of family recipes contributed by members was compiled by Roxie Kennedy Thomassen and available to each family.

Birdie Davis, 90, was recognized the oldest person present; Audrie Nelson, the youngest. Kai and Roxie Thomassen of Torrance, CA traveled the farthest distance. Largest representation was the Dan and Mary Page Kennedy group with 22 present.

Following the noon meal and visi-

tation, some drove to the cemeteries at Cunningham, Halesboro and Woodard where ancestors are buried.

The next reunion is scheduled for June 1991.

Attending were Cassie Cook, Debbie Dunham, Kimberly and Paul of Commerce; Etheleen Walker of Lake Creek; B.J. and Marcella Ditto, Jay, OK; Gary and Bonnie Ditto, Sarah and Meegan, Irving; Wayland, Wanda and Wade Kennedy; Barry and Oneta Nelson, Brie and Audrie; Gary and Cyndee Rutherford and Megan of Celina; Mina Kyle, Rhonda Burns, Deport; Larry and Virginia Bell, V.O. and Norvella Kyle, Lonnie and Betty Kennedy, Angie, Billy and Jade; Claude Kennedy; Benny and Doris Kennedy; Jesse and Nellie Kyle; Mrs. Birdie Davis, Paris.

# "You're Invited to Beltone's Special Consultation" (Date to Date)

Not long ago, Beltone invited me to re-examine a hearing problem I'd been struggling with for quite some time. That was a turning point in my life, because at Beltone's free hearing evaluation I learned how easily my hearing problem could be helped.

Today I wear two tiny Beltone Petite hearing instruments. They're so small, people rarely notice I'm wearing them. Yet they help me to hear better and enjoy a fuller, more rewarding work and home life.

If you can't hear as well as you'd like, or if you hear but have trouble distinguishing all the words in a conversation, like I did, please accept Beltone's invitation to the Special Consultation. There's no cost or obligation. Beltone helped me change my life for the better. Now it's your turn!

Gonzales, settled in 1925 by James Kerr, is the site of the largest number of episodes of the Texas Revolution. The town is home to the cannon that fired the first shot of the Revolution on October 2, 1835. The first battle flag of Texas depicts the cannon and the words, "Come and Take It," in response to Mexico's demands for its possession. Gonzales was the only town to come to the aid of the men of the Alamo. Three Texas armies were formed at this site. Today, Texans can visit a museum in Gonzales commemorating its role in the Texas Revolution.

The state of Texas is the largest "aviary" in the United States recording more than 540 bird species. More than 97 percent of recorded migratory species of birds can be seen in the Surfside Beach area. Two continental flyways come together at this point on the Gulf Coast making Brazosport, Texas the wild bird capital of the United States. California is the second largest "aviary" with approximately 460 species.
