March came in...not as the proverbial lion or lamb, but more like a polar bear.

For the second time recently the area fell prey to the stalking white bear, as freezing rain and sleet, then a dusting of snow covered roads and steps, houses and farms.

It's difficult weather to like for most people, although there are those hardy souls who revel in it. But its beautiful, too.

A walk through the countryside reveals a beauty unparalleled. Some of the sights over the weekend?

Every single limb of trees and shrubs was coated in a pristine, sparkling sheath of ice. The clatter of the branches played every music, counterpointed by the whispering wind as it sang by.

Red berries formed bouquets of beauty as they stood amidst the greys, whites and black of the winter world.

Cardinals and slate juncos, sparrows and crows, wild ducks and cranes flashed movement upon the frozen landscape.

Windows became frames for unusual pictures for those who were housebound. From every window a different scene presented itself. One might show children sliding and laughing on the street. Another a yellow cat fluffed up with tail curled around paws...and yet another might reveal an insight into the heart of a bush or tree where squirrels or birds hunted for food.

On Monday the sun came out, and treacherous as the ice was underfoot, it became glorious to the eyes.

The glistening, sparkling ice and snow turned the ordinary into the exotic. Overhead power lines carved blazing paths against the sky...fences created necklaces of jewels across the throat of the land.

Icicles drooped down to shatter like fragile windchimes and houses shown like some fabled city of legend.

The cold, the ice causes havoc among traffic, creates problems of mobility.

But like most things, along with that bad came the chance to see good. The chance to enjoy beauty of a kind foreign to our normal environment.

It was beautiful, and it is to be hoped that all took a moment to appreciate that beauty in spite of the complications.

Winter Weather Lashes Area Again

Winter waited until a little later than usual, then proved emphatically that cold was still definitely in control.

After a warm week last week icy rain began to lash the area on Saturday morning, turning to heavy sleet within a few hours.

Ice began to form on trees, wires and fences, then on cars and structures.

Sleet fell for most of Saturday and into Saturday night, then switched to dry, powdery snow, sealing the ice with a layer of white that ranged from a half inch to several inches.

Among the usual weather problems created by the cold temperatures was a driving hazard that left cars in ditches, fenders crumpled and many people simply staying home.

Highways were coated with a solid sheet of ice so hard that vehicles

didn't really crunch through it.

Steps and walks were covered and treacherous, electric and phone lines went down in some places. Utilities employees worked overtime to keep service going.

Ranchers added extra feed to cattle rations, but found that newborn calves frequently froze to death before they could get up and nurse.

Monday morning temperatures didn't rise above the freezing point, but a strong, bright sun began to melt the ice off of roads and roofs.

By mid-day road conditions were almost back to normal.

Bitter temperatures fell again on Monday night, refreezing patches on the road and pools, but Tuesday's warm up quickly took care of it.

Prediction for the weekend...naturally, temperatures in the eighties!

ICY WINTER Scene-Snow and ice turned the area into a slippery hazard, but also a beautiful scene Saturday, Sunday and

Monday. Low temperatures, freezing rain and sleet, capped with a dusting of snow, melted

quickly in Monday and Tuesday's sunshine. (Staff Photo by Nanalee Nichols)

National Conservation Program Announced

The U.S. Department of Agriculture has released a ten-year update of the National Conservation Program, designed to guide USDA soil and water conservation activities through 1997.

Steve R. Smith, district conservationist for the Soil Conservation Service in Clarksville, said the program was developed in response to the Resources Conservation Act of 1977 to guide USDA's conservation activities.

"Top priorities will be reducing erosion on highly erodible crop and protecting water quality and quantity," Smith said. Other major goals will strengthen the partnership between state and local agencies and groups, and increasing the consistency of USDA programs.

The new update, titled "A National Program for Soil and Water Conservation: the 1988-97 Update" is the first since 1982.

Parents May Earn Tax Credits

Parents who pay someone to care for a child or dependent while they work or look for work may qualify for a special tax credit, the Internal Revenue Service says. This Child and Dependent Care Credit may be taken not only for payments to babysitters and day-care centers but also to certain relatives paid for this service.

This credit is available to married couples who both work part-time or full-time, or are actively looking for work, and file a joint tax return. If one spouse works full-time and the other works part-time, is a full-time student or is disabled, they are also eligible for the credit, according to the IRS.

The credit may also apply to a divorced or separated parent who has custody of a child who is under 15 or physically or mentally incapable of self-care, even though the parent may not be entitled to a dependency exemption for the child. The parent claiming the credit must, however, have custody for a longer period during the year than the other parent. A married person living apart from his or her spouse for the last six months of the taxable year, is eligible for the credit if a separate return is filed.

Expenses which can be used for the tax credit include only amounts paid

for household services and care of the qualified person. Child support payments are not qualified expenses, nor are amounts paid for an overnight camp.

Percentage Varies

The credit is from 20 to 30 percent of eligible expenses, depending on the taxpayer's adjusted gross income. The maximum credit that may be taken is limited to \$720 for one qualifying person and to \$1,440 for two or more qualifying persons.

To qualify for the Child and Dependent Care Credit, a taxpayer (1)

from Day Care Expenses

must have been gainfully employed or in active search of gainful employment when the expense for the child's or dependent's care was incurred, and (2) must have paid over half the cost of maintaining his or her household, which included one or more qualifying individuals. Also, the IRS has emphasized that the taxpayer and the qualifying person must have lived in the same home during 1988. A qualifying individual is a dependent child under 15 years of age or a spouse or dependent who is mentally or physically incapable of self-care.

How to Claim

To claim the credit, taxpayers can file Form 1040A, using Schedule 1 (Form 1040A) to compute the amount of the credit. Taxpayers who file Form 1040 may also claim the credit, even if they do not itemize deductions. These taxpayers compute the credit on Form 2441, "Credit for Child and Dependent Care Expenses," and attach this form to the Form 1040.

Additional information is available in free IRS Publication 503, "Child and Dependent Care Credit," which may be ordered by filling out the order blank in the tax package or by calling 1-800-424-3676.

Pre-Emergency Herbicide Application Time Near For Lawns

By Paul D. Payne

Each spring many gardeners delay the application of pre-emergency herbicides for weed control until it is too late and wonder why poor weed control is achieved. If a pre-emergency herbicide is part of ones weed control program for control of warm season weeds in 1989, then February would be an ideal time to make application.

Remember that a pre-emergency herbicide must be applied prior to the time the targeted weed and/or grass seed germinates. Pre-emergency herbicides will have no effect on weeds already growing. So, it goes without saying that applying such a herbicide now to one of the winter weeds already growing will not control the winter weed.

There are several pre-emergency herbicides available locally. Three of the most commonly used ones are surflan balan and betasan. Either of these will control most of the annual weeds occurring locally. However, they will not control the lawn burweed or grass burr which are problems in

some yards.

Pre-emergency herbicides containing either atrazine or simazine will do a much more effective job of controlling burr problems. However, they are known to damage some trees and shrubs where applied to the root area. These herbicides do not generally kill a tree, but leave the leaves deformed. So, if you must use either of these, try to stay away from the root zone of young trees and shrubs.

Most of these herbicides come in a granular form and should be applied evenly over the area in order to get a uniform control. Some also come mixed with fertilizer and are convenient to apply. However, one should compare prices. As a general rule the target date is March 15, but that date may not hold this year.

Individuals wanting to learn how to graft pecan trees will want to reserve Saturday morning, April 15 for a clinic to be held at Crawford's Orchard located at Forest Chapel. More on this later.

New Tips Law Expands Employer's FICA Tax

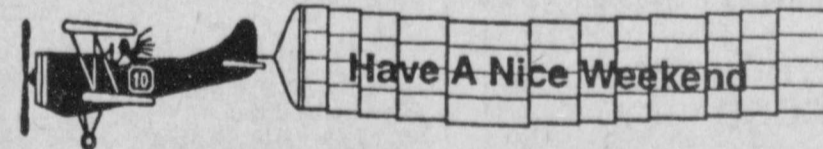

Beginning in 1988, employers with tipped employees must pay social security (FICA) tax on the total amount of cash tips reported, the Internal Revenue Service has announced. Under a new provision of the law, all cash tips subject to employee social security tax are considered wages, making these tips subject to employer's social security tax.

The '88 law stated employers were required to pay social security tax on tips, unless they paid wages that were less than the federal minimum wage. Only the tips which made up the difference between the minimum wage and wages paid were taxed. The IRS says the new law eliminates the benefit an employer with tipped employees

would have over an employer whose employees receive all their compensation as salaries or wages.

Employees report to employers each month cash tips of \$20 or more. Employers withhold income tax and social security tax (or railroad retirement tax) from the combined tips and wages, up to the social security wage base. Form 941, "Employers Quarterly Federal Tax Return," is used to pay the taxes collected to IRS and explains how to report the employer's portion of social security tax on tips.

Publication 539, "Employment Taxes," contains additional information and can be obtained by calling the IRS toll-free number, 1-800-424-3676.

Sportsmanship... Should Be The Name Of The Game

By Nancy Brown

There has been a lot of Little Dribblers action going on lately. Some of those games have been close.

Little Dribblers games are by no means played or referred like junior high or high school basketball, but, in my opinion, the association is currently leaving too much uncorrected.

Bad manners and sportsmanship on the part of players and coaches sometimes seem to be the rule instead of the exception.

Fouling, walking and rough talk among these youngsters is certainly setting a poor example for future athletic competition.

The main idea behind Little Dribblers basketball is to have fun and learn more about basketball. But learning about manners and sportsmanship is certainly one of the main reasons for playing.

Perhaps professional referees should be hired to encourage better adherence to rules?

In the near future, these fifth and sixth graders will begin junior high play, and they should become accustomed to competing under "regular" conditions.

If money is a problem, surely there are enough interested people in Talco and Bogata to raise the necessary money.

Parents, Coaches, spectators, we need to unite to correct the problems that have evidenced themselves.

Sportsmanship and a spirit of healthy competition should be the rule...not filthy language and rough play.

Card of Thanks
The Talco First Responders would like to thank Mrs. Grace Hearron, Mrs. Ruth Hanks and many others who donated their time and money toward the purchase of the heart monitor. Also a very special thanks to the Talco City Council for furnishing the funds necessary to finish purchasing the unit. This unit is the most important item that we have on our truck and has already been instrumental in reviving two people and helping to treat others.
