Reese CFC drive tops \$84,000

by Col. Roger Brady 64th Flying Training Wing Commnder

As of last Friday, the 64th Flying Training Wing stands at 88 percent of our Combined Federal Campaign goal of \$95,000 — just \$10,955 more dollars and we're there!

Sounds like a lot?

Well, if any one individual had to come up with that amount it would be. But, this is a team effort. Several of our units have had outstanding numbers turned in. If you have not made a contribution, please contact your key worker and be a part of this great effort. You'll be glad you did.

Below are some of the questions people have asked about the Combined Federal Campaign. If you have others, please ask.

We want you to be fully informed regarding how your contributions will be used. To all who have given so generously, thanks for making a difference!

Question: Why is the CFC brochure designed so haphazardly? It's very difficult for me to find my favorite charity.

Answer: I asked that question myself. Other than the main sections being segregated (international, national, local), sequencing is strictly done in a random order to promote fairness. It was determined that in any alphabetized system, those at the beginning tend to receive more money than those in the back of the pack. Ask your keyworker, that's what I did!

Question: Am I required to donate to CFC?

Answer: No. Supervisors will not confront you personally nor will they keep any list of givers or non-givers. Donating is strictly a voluntary decision, but our commitment to the community is part of who we are, and the 64th FTW has always taken great pride in stepping up to this challenge. I

believe we all want to continue that tradition of excellence.

Question: What do those percentages mean at the end of each agency listing?

Answer: That's the amount of administrative expenses that agency incurs. With rare exception, any agency with an expense rate greater than 25 percent is not included in the campaign. If they can prove they've taken measures to reduce their costs, then they may be included.

Question: I worry that the embezzling scandal two years back is still going on. How do I know my money is not going to support a crook?

Answer: When the news broke, the local United Way immediately broke its affiliation with the national office. Since then, the national United Way has cleaned up its act. Local United Ways now comprise one-third of their

board of directors and serve as a "watch dog" for all of their expenditures.

Question: I'd like to increase my allotment, but I've already submitted my pledge card for this year. What do I do?

Answer: Just fill out a second pledge card. If there is any doubt about what your intentions are, you will be called directly by our Reese accounting and finance center.

Question: How do I know that the agency I designate on my pledge card receives the money that I donate?

Answer: First, only charities that have been approved by the Office of Personnel Management

may receive money. Second, of all monies donated, 93 percent goes directly to the agency. The remaining 7 percent covers cost of printing the brochures,

> training the volunteers, and auditing the contributions. This cost is quite low compared to many of the "professional" fund-raising organizations.

Question: What happens if I check the "Yes" block on my pledge card granting release of my name?

-

1

1 2

1

B

Answer: This is purely a personal decision. If you do release your name, the agencies listed on your pledge card may establish direct contact with you. Your name and mailing address may also be shared with other charitable organizations who may also wish to contact you directly.

Question: What happens if I don't designate an agency to receive my dollars?

Answer: Undesignated monies will be divided among all the charities listed.

Question: What is my personal fair share donation?

Answer: About one hour's wage per month. Question: No matter how hard I look, I can't find my favorite agency listed. Can I write in their name on the pledge card?

Answer: No. Only approved agencies will be listed in the brochure and only those agencies will receive donations through CFC.

Again, your key worker in your squadron will be glad to help you find any agency you are looking for in the brochure.

From your perspective

"A Careline column provides one of many opportunities for a commander to find out what people are thinking, what's bothering them, what they like, etc. If you've wondered why we do something, or just want to make a comment, don't hesitate to call. You can call the Careline 24 hours a day at 3273. If you leave your name and telephone number, we'll get back to you and answer your concern by telephone. Calls of interest to the Reese community will be published, without the caller's name, in the Roundup the following week. I look forward to hearing from you."

> Col. Roger Brady, 64th FTW Commander

Civilian dress standards

I realize that there is no official dress code for civilians such as there is for military, but, some civilians are apparently unable to use good judgement and taste in their dress. I don't believe short-shorts, tank tops and flip-flop sandals are appropriate work clothes. As a civilian employee, I am embarrassed by the way some civilians dress

We also have concerns with dress and grooming that is less than professional. All civilian employees are expected to comply with reasonable dress and grooming standards set by the commander, organization or supervisor.

Civilian dress and grooming standards must be based on comfort, productivity, health, safety and the type of position held. The Air Force does not prohibit

an article of clothing, dress style or grooming fashion because of disagreement with the way it looks. Specific articles of clothing, dress style or grooming may be prohibited when there is a clear indication that it contributes to an unsafe, counter productive or disruptive work environment.

Basically, management can use dress and grooming standards similar to those used in private business or industrial firms. For example, if you work in an office, blue jeans, sneakers and shorts may not be appropriate. In an industrial or outdoor environment, they may be appropriate. All need to consider how the image we present reflects on ourselves, our unit and the Air Force. And supervisors need to exercise good judgement in establishing and communicating appropriate standards of appearance.

ROUNDUP OCT. 14, 1994

You're never too young to 'turn it off'

by Maj. Judy Burk Reese Energy Working Group

Having been raised in a middleclass family which instilled edicts of tried and true convictions, such as "waste not, want not" — it's easy to understand how I can feel guilty upon discovering a light that was left turned on all day while I was at work.

There have been a couple of fairly recent instances when I've returned home from work and discovered a closet light on for no one's use or a ceiling fan on, circulating for no one's appreciation.

Maybe you will understand, if you had parents who appreciated the value of a dollar in the 1950s and 1960s as I did, the almost overwhelming sense of "screw up" you can feel when you open that closet door and discover the light still turned on.

It's a feeling of "if I could kick myself— I would." For me, discovering a closet light left turned on all day was bad enough, but finding a ceiling fan left on all day while no one was home—and within a week of the closet light incident—was enough to make me stop dead in my tracks.

-

The very first thought to enter my mind was a personal labeling process that I won't go into, but suffice it to say that I was thorough and explicit in denouncing my lack of attentiveness with these electrical switches. The second thought concerned

"why" I had left these switches turned on.

The answer was simple enough: I was in such a hurry on those particular mornings that I rushed out of the house (and more specifically the closet/bathroom/ bedroom portion of the house) without even noticing the light and fan were still turned on.

Now, I've been in a hurried mode before in my adult working life and rushing out

the door to get to the office is certainly not an unknown

factor in my morning ritual. In fact, I'd go so far as to say that rushing out the door to get to the office is pretty much a normal routine with me. But on two occassions within a week of one another, I left electrical switches turned on. Without over-anaylizing the situation (I'm sure Dr. Sigmund Freud would have a field day with this one), let's just say that I was twice careless and will pay money for

the wasted energy that was used on those days.

The question I hope that's raised by relating this episode of daily life is: do you ever feel as if you've wasted energy dollars when you discover a closet light or ceiling fan left turned on while you've been out of the house all day? If so, then good for you. It's mindsets like this that enable a great

many Reese people to save energy dollars by not wasting electricity when no one will be home to enjoy its benefits.

Now, the next question is: do you instill these same feelings of consideration in your children?

My philosophy is the younger your

children are the better they learn these little life lessons that parents impart. But, it's never too late to teach your children about conserving energy. In fact, teenagers can relate very well to the "money end" of why lights and ceiling fans are to be turned off while no one is home.

These are usually their first years dealing with allowances and savings and they need to be made aware of the fact that simply forgetting to turn them off can cost money belonging to the family's household budget.

My bottom line here is instilling an energy-conservation mindset in your children just as my parents did, and probably your parents too.

Teaching that lesson well will save money for you, as parents; your children, who will eventually become adults and parents also; and the entire energy-consuming community we all live in today and well into the next century.

How will you know if your tenanciousness at this energy-savings lesson will have made the lasting impact you wanted it to make on your children? It will be the day when one of your now-adult children telephones to say, "You know I could just kick myself when I came home and found I'd left a closet light on all day.

That's when you know your children learned your lesson well.

Reese Town Meeting provides critical feedback

Facility improvements among briefings given base residents

Improvements to base facilities topped the agenda at the Reese Town Meeting, Oct. 6, at the family support center.

During the 90-minute meeting, representatives of several base agencies talked about current and future programs.

Col. Terry Weimer, 64th Support Group commander, opened the town meeting by stressing how important it is in providing community feedback to the senior leadership at Reese.

Maj. Leonard Fischman, 64th Civil Engineer commander, told the attendees that about \$10 million was funded for base improvements in fiscal year 1994 and more than \$20 million has been targeted for projects in fiscal year 1995.

Non-appropriated Fund projects in FY-94 totaled \$173,000. This included renovations to the base clubs and golf course. More than \$500,000 is tabbed for FY-95, with the bulk of this funding to go to expand the number of tee boxes on the golf course and to complete the Reese Club consolidation project.

Military family housing projects totaled \$111,000 in FY-94. In FY-95, Reese is looking to spend more than \$2.2 million on a dozen improvement projects. This includes renovation of Reese Village doors, windows, floors and carports.

Improvements to the base infrastructure in FY-94 accounted for approximately \$2.7 million. Among the major projects included in the FY-95's \$4.5 million construction program, are plans to upgrade facility fire safety, renovation of dormitory 220, upgrade of the child development center and resurfacing of the outdoor courts at the youth center.

Another \$150,000 went to medical projects in FY-94 with \$725,000 targeted for FY-95.

Environmental projects in FY-94 totaled over \$7 million, and almost \$13 million is targeted for projects to protect the Reese environment in FY-95.

While noting that Reese has been very fortunate in obtaining funding for these improvement programs, Colonel Weimer stressed that every effort will be made to minimize the disruption of activities normally associated with construction programs.

Maj. James Peck, 64th Security Police Commander asked Reese residents to assist security police efforts to stop vandalism in the housing area.

"We need the help of Reese Village residents," said the major.

"If you see something suspicious, call us at 885-3333/3332. Don't be afraid of getting some kid in trouble. We want to prevent problems before they happen," he said.

The major also announced that the hours for trick-ortreating at Reese this Halloween will be from 6 to 8 p.m. As in past years, only Reese personnel and invited guests will be authorized access to housing during these hours.

On the personnel front, Maj. Joseph Vivori, 64th Mission Support Squadron commander, talked about the Air Force's senior NCO rollback program.

The program calls for certain retirement eligible senior NCOs to retire by next summer.

The major pointed out that the program does not currently affect any Reese personnel.

Major Vivori added that the current airman leadership class will be the last taught by Reese instructors.

The school will close in November and future classes will

The danger of children playing near sanitary sewer manhole construction sites was one of the topics discussed at the Reese Town Meeting. The manhole excavation can reach depths of up to 8 feet. Base officials said the sites will be enclosed with a chain-link fence. There are 12 manholes being installed in Reese Vilage. Construction is expected to continue through Nov. 21.

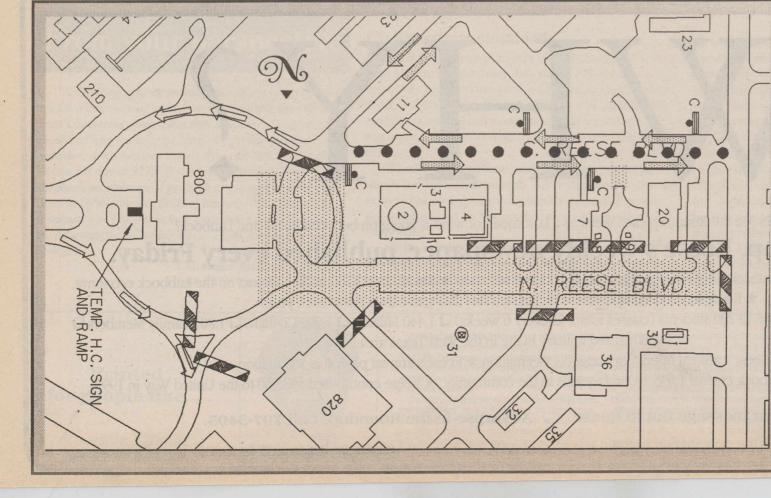

be taught by instructors from Goodfellow AFB, Texas.

Colonel Weimer closed the meeting by lauding the work of the Reese Military Housing Council. He said the group, which represents a cross-section of the community, has been very helpful in identifying and providing proposed solutions to a variety of quality of life issues here. 1

Reese Boulevard repair scheduled

Renovation of Reese Boulevard will begin Monday.

According to Jim King, 64th Civil Engineer Squadron, the project will be completed in two phases.

Phase 1 will include the north side Reese Boulevard extending from Bldg. 800 to Davis Drive. During this construction, the south side of Reese Boulevard will be a two-way street.

When Phase 1 is completed, the traffic flow will be reversed for Phase 2.

Construction is expected to take approximately four months. Parking in the rear of Bldg. 800 will be restricted throughout the construction.

Full-Time Sports

(NAPS)-If you wanted to watch sports 24 hours a day back before 1979, you would have had a hard time. Happily, that dream became a reality with ESPN, which celebrates its 15th birthday September 7. In that short time span the network has had such an impact that Bob Verdi of The Sporting News said, "I can vaguely remember what civilization was like before ESPN, but I don't care to re-live it."

4033 34th • 34th & Orlando • 785-020

THEN: ESPN began televising sports in 1979 to 1.4 million subscribers

NOW: ESPN is the largest cable network, reaching over 63 million households. This represents nearly two of every three American homes with television. In addition, EPSN provides programming in 11 languages to more than 125 million households in over 120 countries. Many say its accelerated distribution around the world makes it one of the greatest success stories in American business. In addition, in recent years under the direction of President and CEO Steve Bornstein, the ESPN brand name has been attached to several new ventures. These include ESPN Sports Radio, ESPN Enterprises to handle new business opportunities and a whole new network-ESPN2-designed to appeal to a younger audience.

It's not just the volume of sports presented but the quality of production and the standard of journalism undertaken. According to The Sporting News, in 1992,

Antique & Collectible Toys

President deploys more troops to Gulf

WASHINGTON (AFNS) — sage from the White House Oct. Despite indications from Iraq 10, President Clinton said the that its forces are pulling back from the Kuwaiti border, President Bill Clinton has ordered an additional 45,000 U.S. troops and more than 360 aircraft into the Gulf region.

Another 156,000 people and 196 aircraft are on standby status, said Pentagon officials here.

The United States' objective is to slow, stop and push back Iraq's troops, said Gen. John M. Shalikashvili, Joint Chiefs of Staff chairman, during a Pentagon press briefing Oct. 11.

Iraqi U.N. Ambassador Nizar Hamdoon announced Oct. 10 that Iraq would pull back the more than 60,000 troops it began moving toward Kuwait Oct. 7.

However, in a televised mes-

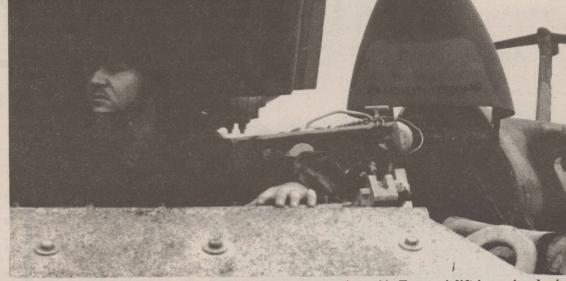

United States was interested in "facts not promises ... deeds not words."

Clinton said the massing of troops on the Kuwaiti border was "provocation" requiring "a strong response of the United States and the international community."

As of Oct. 11, that response included deploying U.S. Air Force F-4s, F-15s, F-16s, A-10s, F-117s, F-111s, C-130s and F-111s, B-52s, KC-135s and airborne warning and control system aircraft.

The aircraft will join some 200 U.S. and allied aircraft already iN the Gulf region, said officials.

About 7,600 Air Force members will deploy to the Gulf, joining some 3,857 airmen already in theater. Another 1,151

A soldier from Fort Stewart, Ga., waits to drive operation. Air Force airlift is again playing a Galaxy during a recent overseas deployment troops in the Gulf region.

airmen are on standby, officials said. The Navy will deploy 21 ships to Gulf region

while the Army and Marine Corps will deploy 36,145 ground troops. The United

his Bradly M2-A2 fighting vehicle onto a C-5 key role in the President's ordered buildup of

States already has more than 18,500 troops in the Gulf, including 3,638 ground forces.

Final appropriations bill cuts AF budget Includes funding for C-17, F-22, B-2 programs

by MSgt. Merrie Schilter **AF** News Service

WASHINGTON - Although the fiscal 1995 defense appropriations bill includes \$3.5 billion more than the preceived \$1 billion less in funds. The service had requested \$74.7 billion.

President Clinton passed the bill Sept. 30 giving the Department of Defense \$243.6 billion.

vious year's, the Air Force re- pay hike for the military. Air Force received \$263.2 million less in operations and maintenance funds than it needed for programs that include civilian pay, base support, training and education The bill includes a 2.6 percent programs, flying operations

Force officials in the Pentagon.

Ironically, Air Force received \$100 million to restore three SR-71 Blackbirds to service money it did not request. Congressional supporters say the SR-71's reconnaissance capabilities are needed in places such as North Korea and Bosnia.

A House and Senate appropriations conference committee reached a compromise on the FY-95 spending plan Sept. 26. Conferees also agreed to:

□ Fund the C-17 settlement with McDonald Douglas; reduce research, development, test and evaluation costs by \$31 million; provide \$2.2 billion to procure six aircraft in FY -95 (a reduction of \$304 million) and advance procurement for eight aircraft in FY -96; and direct C-17 flight testing not be extended without congressional approval. The committee rejected a House proposal requiring the Air nearly simultaneously. Con-Force to find a second company to produce the C-17 engine.

□ Reduce RDT&E funding for the F-22 by \$110 million and direct the Air Force to conduct effectiveness evaluation

and communications, said Air of holographic radar systems for radar cross-section testing and submit a report by March 1. RCS is a measure of how reflective, or "stealthy," the F-22 is on radar.

> Provide \$60,100 in operations and maintenances funds to retain 74 B-52s on active duty rather than the proposed

> **Provide** an additional \$54.5 million for RDT&E for the tri-service stand-off attack missile program. However, Congress did not provide procument funds for the program. Air Force had asked for \$373.9 million.

> □Provide \$125 million to help sustain the B-2 bomber industrial base for one more vear.

The committee directed the Commission on Roles and Missions of the Armed Forces to study whether additional B-2s should be produced to help fight two major regional conflicts gress had capped cost on the B-2 program at \$44.4 million for 20 aircraft.

The additional funds will not count against the statutory cost, the conference report said.

5

Upholding democracy

U.S. soldiers provide security on the streets of Port-au-Prince, Haiti, as part of Operation Uphold Democracy.

U.S. military forces are currently deployed in several regions around the world.

64th CS works to develop blueprint for wing communications network

Reese communications personnel are working to develop the blueprint for a command, control, communications computer system here.

According to Frank Misaege, 64th Communications Squadron Plans and Implementation Flight chief, the new system is called C4 and consists of all those systems people use to "talk" to their counterparts on base, at command and other Air Force and Department of Defense installations.

The blueprint, explained Misaege, is a plan, including documentation and actual sketches of the current and planned C4 for Reese.

"It's our road map to the future information superhighway," said Misaege.

The C4 project is an extension of the System Telecommunication Engineering Manager program created a few years ago when the Air Force determined that it was necessary to close the gap between our current capabilities and the technology that's available.

One of the first steps taken was to dedicate a C4 engineer to each Air Force base as an ongoing consultant who would assist in planning for the future in an integrated fashion, said Misaege.

"After years of independent planning within each functional area, the Air Force had little to show for our efforts, save a lot of mostly stand-alone computers," he said. "We were using more paper than ever, and hadn't really taken automation nearly far enough."

So, enter STEMs and C4 blueprints. The STEM for Reese is Mark Moore, of the 1845th Engineering Installation Group, at Tinker AFB Okla.

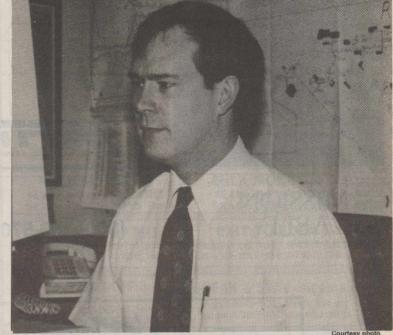

Moore wrote the initial blueprint in late 1992. Among other things, it "opened the door" to integrated planning, taking into account the needs of the many instead of the few, as had been done for many years, said Misaege.

"From that blueprint, we have a growing infrastructure of conduits (ducts) and manholes in many parts of the base. They are the essential paths and connecting points for fiber optic and copper cable. Fiber optic cable will be the media through which Reese's own information superhighway will travel. It will support voice, data and video applications," he said.

Moore recently spent two weeks at Reese, talking to representatives from nearly every functional area throughout the base about the systems they currently have, problems with them, and planned upgrades. Moore will use the data gathered during those discussions to form the basis for the second edition of the Reese C4 blueprint.

"It will truly be an integrated base planning document that will guide us into the 21st century. Its target is a fiber optic cable that will form the backbone of the communication system here and allow all Reese users to access 'the world' via their computer on their local area network. It will be Reese's own information superhighway, much like that envisioned by Vice President Al Gore on a national scale," said Misaege.

One of the cornerstones of the blueprint will be the LANs many of Reese people will be receiving later this year. The chief LAN architect, SSgt. Robert Battles, has been working to implement functional area LANs. They will tie together what are now mostly standalone computers within a func-

Mark Moore works on the C4 blueprint for Reese. The blueprint will help the base establish its communications network for the future.

tional area or building.

The next step is to connect buildings together with fiber optic cable so the different functions can "talk" to each other electronically. One of the ways Reese plans to do that is via the civil engineer computer system program that monitors energy consumption within most buildings. Since about 20 buildings don't currently have

the system, the 64th CS is providing the communications for

the upgrade by fiber optic cable. The project will provide al-

most half of the fiber optic backbone.

In a little over a year, Reese can begin seriously connecting LANs together.

Anyone with questions about LANs or the C4 program should contact Misaege at 3089.

Reese Honor Guard holds annual banquet

A member of the 64th Civil Engineer Squadron has been recognized as the outstanding honor guard member of the year.

SrA. James Eberly, 64th CES, was presented the award during the Reese Honor Guard Annual Banquet held Saturday at the Reese Club.

Airman Eberly was cited for his overall knowledge of honor guard operations and his outstanding performance as a member of the honor guard. Airman Eberly was also recognized as one of three members to receive the Extra Mile Award.

Also earning the Extra Mile Award were: SrA. Michelle Novak, 64th Services Squadron, and SrA. Brad Ferch, formerly of the 64th Medical Group.

Airman Novak received two additional awards. She received the Motivation Award and the Military Excellence Award. SSgt. Shirley Board, 64th MDG, was presented the Most Improved Member Award and A1C Brian Applegate, 64th Logistics Squadron, was named member of the quarter.

All 20 members of the Reese Honor Guard received a special honor guard sweatshirt.

New colonel

Lt. Col. John Mazurowski, 52nd Flying Training Squadron commander, was among those Air Force lieutenant colonels notified last week that they had been selected for promotion to colonel.

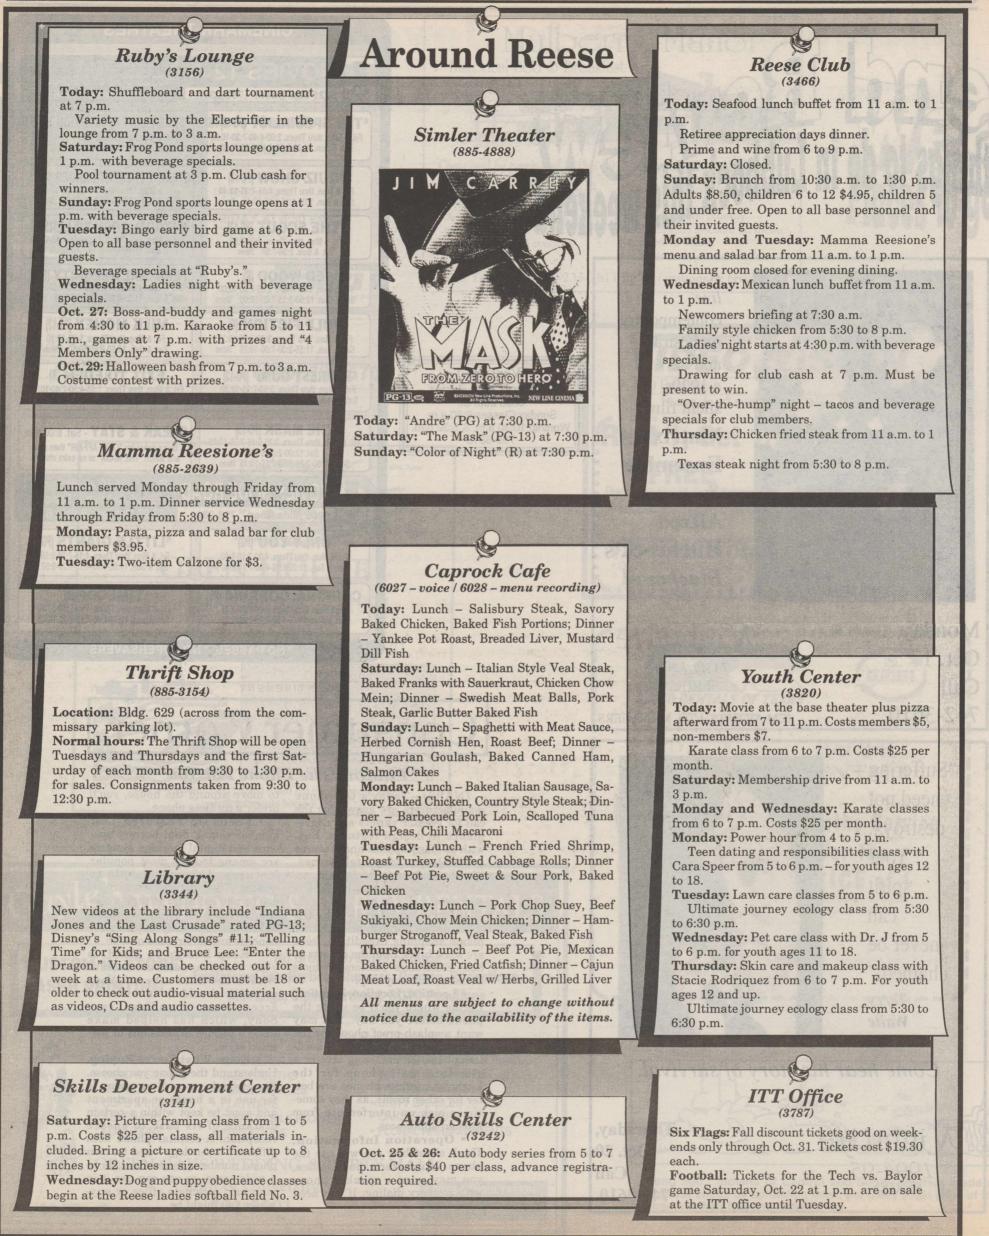

.

COMMUNITY

ROUNDUP OCT. 14, 1994

Community notes

Enlisted call set

The Wing Quartely Enlisted Call is scheduled for 9 a.m. at Oct. 21 in the Simler Theater. Wing quarterly awards will be presented at that time. All enlisted personnel are required to attend.

EWC holds bake sale

The Reese Enlisted Wives Club will hold a bake sale at 2 p.m., Saturday, in the gazebo between the commissary and base exchange. Proceeds will go toward the EWC scholarship program. For information about the bake sale, or the EWC, call Christy Miller, 885-4775 or 793-8111.

Caprock Cafe plans special lunch

The Caprock Cafe will serve an Oreintal lunch Wednesday. The lunch features chicken egg-drop soup, pork chop suey, beef sukiyaki, chow mein chicken and a variety of vegetables.

Photography contest set

Entries for the base photography contest must be submited by Nov. 1. The contest includes three categories: black and white prints, color prints and color slides. Each contestant may enter up to three photos in each category. For details on how to enter, call the skills development center staff, 3141.

Cholesterol class scheduled

The 64th Medical Group Health Promotion Clinic is offering a class on how to reduce cholesterol levels Monday from 1-2 p.m. in the aerospace physiology classroom. Class size is limited to 20 people. Call 3860 or 6153 to register.

Haunted house committee meets

The Reese Halloween Haunted House committee continues to meet Mondays at 11:30 a.m. in the Reese Club. The committee plans to sponsor a haunted house on base and is looking for Reese organizations to sponsor individual rooms in the house. For more information, contact SSgt. Uwe Woestendiek, 3711.

AAFES schedules IG visit

A two-person Inspector General team from Headquarters Army and Air Force Exchange Service will be at Reese Wednesday.

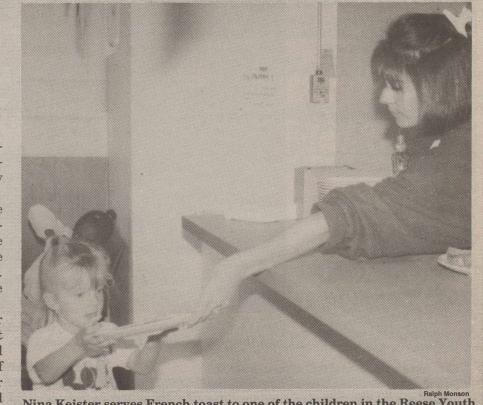

The team will host a customer-satisfaction forum at 10 a.m. in the Simler Theater. The session provides the team with an opportunity to obtain exchange patron feedback. In addition to the forum, individuals who want to meet with the team privately can schedule an appointment by calling John Sharp, base exchange manager, at 885-4581.

Youth center seeks new members

The Reese Youth Center will hold a membership drive Saturday from 11 a.m. to 3 p.m.

The drive will include a variety of special programs, including a kite show and music by the band Black Tooth Grin. There will also be free food and prizes.

On Oct. 28, the center will host a fall harvest carnival. The carnival will include a variety of games and crafts. For more information, call the center satff at 3820.

Nina Keister serves French toast to one of the children in the Reese Youth Center before-and-after school program.

ALS schedules graduation luncheon

Reese Airman Leadership School Class 94-E will hold a graduation luncheon at 11:30 a.m. Oct. 28 in the Reese Club. Cost is \$5.50 per person. For reservations, call 3147 by Oct. 26.

CPR class scheduled

A CPR instructor class will be held from 8 a.m. to 4 p.m. Wednesday and Thursday at the 64th Medical Group. In addition, a basic CPR class will be held during the same hours Oct. 21.

For more information about the two courses, call TSgt. Kenneth Loftis, 3242.

Embry-Riddle opens registration

Today is the last day to register for the Embry-Riddle Aeronautcal University Master of Aeronautical Science Degree program.

The school term begins today and runs through Dec. 17. For more information, contact the education center at 885-6391.

Voluntary bicycle registration begins

The 64th Security Police Squadron began a voluntary bicycle registration program Oct. 1. The program is available for all base employees and their

CHAMPUS field representative visits

A CHAMPUS field representative will conduct deductibles and catastrophic cap began again on a seminar on patient benefits in the 64th Medical Oct. 1. Any medical services received through Group today.

The seminar will be from 8:30 to 11 a.m.

CHAMPUS coverage should bring the explanation of benefits statement and bill in question.

Beneficiaries are reminded that the CHAMPUS

1

Sept. 30 will be processed for fiscal year 1994. Any services provided on or after Oct. 1 will be pro-Anyone needing information about specific cessed for fiscal year 1995 deductible and catastrophic cap.

families.

Bicycles are common theft targets and registering bicycles is one method of detering a thief. It also helps police return recovered bicycles.

If interested, bring a bicycle to the Reese Visitor Center, Bldg. 6100, between 8 a.m. and 4 p.m. Monday through Friday. Participants will be issued a permanent decal to affix to the bicycle. For more information, call 6652.

Retraining program is extended

Phase II of the fiscal year 1995 NCO Retraining Program has been extended through Oct. 31. The extension provides additional time for members to volunteer for retraining. For information, call A1C Barbara Nez, 6492.

Library adds career series

The library has added the Careers Without College series, which provides information about jobs which require little or no college training.

It includes fields that deal with topics such as emergencies, kids, sports, health care and computers.

Dog obedience classes start

Dog obedience classes begin Wednesday with puppy classes from 6 to 7 p.m. and adult dog classes from 7 to 8 p.m. Topics covered in this five-week course include social manners, basic obedience, behavior problems and basic grooming.

Classes cost \$40 for five sessions and must be paid in advance of the first class. Sign up is currently under way at the skills development center.

Class size is limited to a minimum of three students and a maximum of 10 students. All dogs must have proof of vaccinations.

For more details, call the skills development center at 3141.

Building Hope Around the World

Habitat for Humanity International, a nonprofit, ecumenical Christian housing ministry, works in partnership with people in need to improve the conditions in which they live. Habitat partners are at work in all 50 states, and over 40 nations worldwide.

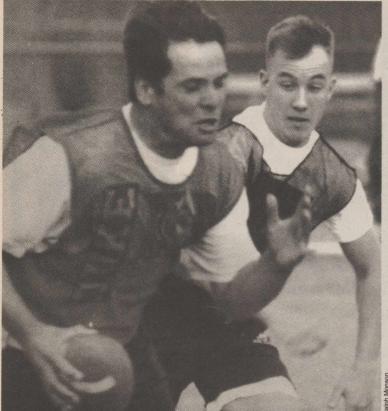

Habitat challenges people of compassion to provide the initial funding, through donations of money and materials, to build or renovate simple, decent houses for the inadequately sheltered. Houses are sold at no profit, with no-interest mortgages repaid over a 15 to 25 year period. House payments are then recycled to help build more houses.

64th SPS wins battle between grid leaders

by A1C Tim Dempsey *Roundup Sports Editor*

The battle of the division leaders took place Oct. 5 as the American League's 64th Security Police Squadron won in overtime against the National League's 64th Logistics Squadron, 13-12.

The 64th LS was the first team to get on the scoreboard as quarterback SrA. Pete Adams connected with SrA. Mark Capps for a 6-0 lead.

It didn't take long before the 64th SPS responded as Rob Crowder, quarterback, lead the team down the field. The drive was capped off by a short quarterback sneak to tie the game.

In the third quarter, Airman Adams lead his team back to a six-point lead as he threw a touchdown pass to A1C Micheal Dickerson. 64th CES 64th MSS 64th MSS 64th SPS

But the 64th SPS offense wouldn't die as it marched the ball back down the field. Crowder tied the score by waltzing into the end zone, 12-12.

Both teams scored a touchdown in overtime, but it was the 40-yard pass from Crowder to John Dutkowsky that gave the 64th SPS the victory
