Fatal and near-fatal blazes throw spotlight on building codes

By LANA CUNNINGHAM Staff Writer

Occupied housing in Midland that violates building and fire protection codes is, for the most part, left untouched by city officials.

Questions about the effectiveness of city code enforcement have been raised since December when two fires within 21/2 weeks of each other killed four children and critically burned four others. Both blazes occurred in what could have been classified under city regulations as substandard structures.

The first occurred in a small wooden structure in back of a residence at 209 N. Madison St. The structure, being rented as a house to Kathy Williams and Brenda Williams, had electricity provided through an extension cord connecting it to the main house. Firemen theorized that hookup may have caused the blaze.

The second fire claimed the lives of the four children of Mr. and Mrs. Rudy Bennett and occurred in the Tall City Apartments, a converted motel located on Garden City Highway. The fire was started by the children playing with matches, ruled

BECAUSE BOTH FIRES occurred in structures which apparently failed to meet fire and building codes, Mayor G. Thane Akins said it concerns him

A Special Report

and the council. "But I don't know offhand if it demands a change in codes. We've heard nothing from our staff.'

Under both building and fire protection codes, a structure failing to comply can be torn down by the

owner or by the city. But city officials point out they face a dilemma when it comes to substandard structures that are occupied, whether by the owner

The City Charter defines "dangerous" buildings and outlines steps the city may take in forcing a landlord to upgrade the structure to meet the codes or in having it eliminated.

Dangerous structures are defined as "any building with roof, ceiling, floors, sills or foundations or any combination thereof, rotted or decayed and falling apart; windows out, uninhabitable, untenantable and unsightly, due to obsolescence and deterioration caused by neglect or vandalism or fire damage or old age or the elements.

'Or any building in danger of falling and injuring the person or property of another.
"Or any building which is a fire menace, to wit, by

attention to their healing burns.

Hobbert, as she flipped the channels to find some. He continued in a steady cry. Sure he wanted to watch

cartoons - but he wanted to see them at home. About that time Tyrone chucked his nose-less bunny rabbit on the floor and looked off the bed saying, "Uhoh." The 1-year-old dazzled his admirers — a room filled with hospital workers — who oohed and ahhed his every move. He grinned.

Hobbert just scowled. The boys had arrived at Midland Regional Airport on a Texas International jet with their Granny just about 3:15 p.m. Monday and silenced the crowd of travelers. A photographer snapped their pictures and flashed at their faces as they awaited their luggage — a large plastic garbage bag filled with toys. The spectators suddenly recognized them as the hometown heroes and began pumping Granny for information.

"Are they still burnt?"

"Does it tich?"

"Does it itch?" "Are they OK now?"

"When will the other little girl be home?"

Lakeysha, their 3-year-old cousin, stayed at the Oklahoma hospital. Granny said it would still be a while before she switched hospitals, but she's doing well

"Do you like puzzles?" A nurse broke Hobbert's steady scowl of disbeller at Tyrone. He looked up and plainly shook his head "no."

"Not even Mickey Mouse?" the nurse pleaded as she unwrapped the puzzle.

He hesitated and waited until she went to examine Tyrone before he finally looked down affectionately at

Haig probe awaits Nixon's decision

WASHINGTON (AP) — Senators conducting hearings on Alexander M. Haig Jr.'s nomination as secretary of state say Richard M. Nixon alone can keep them from getting tape transcripts to investigate Haig's role in Nixon's White House.

"The ball is in his court now," Sen. Charles Percy. R-Ill., said Monday night. "He must be answerable for his decision.

Percy is chairman of the Senate Foreign Relations Committee, which called Haig back for a fourth day of confirmation hearings today on his nomination by President-elect Ronald Reagan.

Archivist Robert M. Warner also agreed during hearings Monday when Sen. Paul Tsongas, D-Mass., asked whether "one person stands in the way of this committee having this information and that person is Richard Nixon?

"Well, there are the regulations," the archivist replied. "But that really is the heart of the mat-

He was referring to regulations that give the former president five days to decide whether to object to the committee's subpoena for logs describing 100 hours of taped conversation between Haig and Nixon in mid-1973. If Nixon objects and the

archivist rejects his objection, Nixon has an additional five days to file suit to block delivery of the

The archivist said the logs consist of 680 pages of detailed notes describing 338 conversations between Haig and Nixon from May 4 to July 12, 1973, the early days of Haig's service as Nixon's chief of Nixon's lawyer, Herbert J. Miller, said in a tele-

phone interview he is reviewing the question of whether to block the committee's access to the log and Nixon tapes and documents. I have taken no position," Miller said.

But he noted that archivist Warner has given the committee a written opinion that Congress has no authority to subpoena the material. "I must consider that," Miller said.

The committee already has agreed to vote as early as Wednesday on clearing Haig for Senate confirmation. The effort to get the tapes will continue after Haig is sworn in as secretary of state.

Meanwhile, confirmation hearings were beginning today for CIA Director-designate William J. Casey, 67, who directed Reagan's presidential election campaign and served in the CIA's forerunner; lawyer

Samuel Pierce, 58, Reagan's choice for housing secretary and the only black selected for his Cabinet; and Deputy Defense Secretary-designate Frank Charles Carlucci III, 50, now deputy CIA director.

on yet another gown.

Confirmation hearings were held Monday for Energy Secretary-designate James B. Edwards and Labor Secretary-designate Raymond Donovan. Both were subjected to tough questioning but appeared headed for confirmation.

Donovan defended his New Jersey construction company against a charge it did business with a dummy company specializing in kickbacks. Edwards, former governor of South Carolina, was accused by senators of "waffling" and of being naive. Edwards, an oral surgeon, has described himself as more of a "problem solver" than an energy expert.

Haig, who sat stoically while committee discussion turned back to the tapes several times during his hearing Monday, testified about U.S.-Soviet nuclear power and SALT.

He said a new U.S.-Soviet Strategic Arms Limitation Treaty must allow the United States to rebuild its nuclear power to match the Soviet arsenal.

Iranian parliament delays debate on hostage issues

By The Associated Press

Iran's Parliament postponed debate today on two bills aimed at resolving the hostage crisis, but there was no indication of opposition to the measures and they are scheduled to be taken up again on Wednesday, a parliamentary spokesman said.

A top Iranian hostage negotiator, Ahmed Azizi, told Tehran Radio, "No final agreement has yet been reached" on a date for releasing the 52 Americans seized 14 months ago. But he added, "Obviously, discussions are being conducted in a positive framework."

The parliamentary spokesman said the debate was delayed because the 12-member Council of Guardians, which must approve all legislation adopted, couldn't attend because it had not been given enough advance notice of the session

"The council was informed of the session very late yesterday afternoon," the spokesman in Tehran said in a telephone interview with The Associated Press in Beirut, Lebanon.

The council is dominated by hard-line Islamic clerics who are bitterly antagonistic toward the United States. Their absence could have indicated an attempt to block any retreat from Iran's original demands for up to \$24 billion for the release

The speaker of Iran's Parliament, Hashemi Rafsanjani, said Monday that "all roads" were open to settling the 437-day-old crisis, and that he expected approval of the legislation.

One bill introduced in the Majlis would approve appointment of a third-party as arbitrator of financial and legal claims between Iran and the United States. The other would nationalize the wealth of the shah and his closest relatives, providing a legal basis for the Iranian government's demand that the royal family's assets abroad be turned over to it.

"I THINK THAT'S where one of our big worries should be," he opined.

Just as Odessa's Monahans Draw

has become the scourge of Midland

County, the Tall City's Midland Draw

has become the scourge of Midland

and Greenwood residents who are on

the downward side of the city's sew-

age treatment plant and get that

'green, slimy stuff" and stench.
"It's really bad in my opinion,"

Midland County Commissioner C.

DeWayne Davis said Monday in a

two-hour commissioners' court ses-

Commissioner Charlie Welch, who

has been throwing the political spot-

light on the draw, agreed. But he

was even more concerned about sewage runoff and other waters getting

into the city's sanitary landfill, which

is about a half-mile east from the sewage treatment plant in far south-

sion that dwelled on the draw.

The draw winds easterly out of Midland past the city's sewage treatment plant and meanders on to join with Monahans Draw in far east Midland County. Midland Draw's overflowing has been due, in part, to the rising water table and apparently to the city's inadvertent spillage of effluent sewage waters into the natural drainage basin.

The natural draw is drawing some unnatural criticism.

Leading the attack on the draw's usage by the city is Ethel Whisler, a Greenwood housewife who said she is sickened by the stench emanating from the draw and is disheartened by the sight of her and her husband Jon's washed-up pecan harvest and cotton and wheat crops.

"The water is now up in the (pecan) trees, in our cotton. And we have not had that much rain." Many of their pecan trees on their 52 acres are in and along the draw.

Mrs. Whisler backed up her protest

with a petition keyed to the "unnatural flow of water" in Midland Draw. By Monday afternoon, the petition bore 74 signatures and 82 by night-

THE "UNNATURAL" waters gracing the draw have become, according to Mrs. Whisler:

-A nuisance. -A health hazard.

-Destructive to farm land and all type of crops.

—An unhealthy play area.

—A breeding place for mosquitoes.

And the draw emits a stench that

can be smelled for miles.

city of Midland have a "ready solu-

"If something is wrong," said Mid-land County Judge Bill Ahders, "they want to rectify it."

The two city councilmen, Gordon Marcum II and Tom Sloan, indicated that they somehow wanted to solve the city's flowing sewage problem that is indicative of an affluent boom

era for the city of 70,000 people.
"I will respond to this as if my house were there (along the draw),"

He noted the gravity of the situa-

"YOU CAN'T BACK UP sewage; it's got to go somewhere," said Sloan, who apparently was not altogether convinced that Midland's effluent sewage waters are entirely the prob-

"I think we should be able to handle the water," Sloan said. "It may or may not be water that's coming from

the sewage treatment plant."

John Lowe, Midland's director of utilities, took the stance that the draw's running waters are mere evidence of a rising water table and not overflowing effluent waters.

"This is a very complex problem, more (complex) than it appears on the surface," he said.

"We've had the highest water table we've had any records of," said Lowe, who said the water table was "super charged" by the heavy September rains. "It's nothing brand new."

Rainfall, which is a "continuing factor" was raused at the continuing factor."

factor," was gauged at 30 inches le year at the sewage treatment plant Lowe said. The National Weath Service at Midland Regional Airpu about 12 to 15 miles west of the seage treatment plant, however, regional 17.7 inches of rainfall in 18

"THERE'S NOTHING in the sewage treatment plant that will kill the typhoid germ," said Commissioner

Robert Bradshaw, a district supervisor for the Texas Department of Water Resources office in Pecos, said

ponds and witnessed spillage of raw sewage waters. He estimated the overflow rate at about 216,000 gallons a day. And even in the city of Midland, he spied "manholes overflowing into Midland Draw.

> boom) construction, ground water is being pumped into Midland Draw," he said

"During the current (building-

Bradshaw said he also observed 'sewage effluent' flowing along County Road 1150 South.

Despite the effluent spillage from the holding ponds, the city does not have a permit which allows "any discharge" in the draw, he said.

He said raw sewage spilling from the pond undergoes a single primary treatment in which "the heavy stuff drops out."

The one-time treated effluent in the holding lagoons is used for irrigating alfalfa by Gene Jones and his family and helps use up the water. Additional water is lost to evaporation, and an undetermined amount is lost by leaching.

Lowe said that about 5.8 million gallons of raw sewage is pumped into the lagoons each day. And Jones uses about 4.3 millions per day. However, the rate, about 3,000 gallons per mi-

nute, varies with the seasons "They are full," Lowe said of the lagoons. "They're a lot fuller than I would like for it (them) to be.

The irrigation of golf courses at Hogan Park and Midland Country Club helped keep the effluent-level down in the holding ponds.

But, unlike the water used for agricultural purposes and some of which winds up in Midland Draw, effluent that was piped to the golf courses

Police seek two in con ring sale

ODESSA - Two black men are being sought here after an apparent con game over the sale of a ring to a man that left the victim holding paste.

According to police reports the two black men approached the man in Odessa Monday, offering to sell him a 3-carat diamond ring for an undisclosed amount of money. The man said he would have to check its authenticity before he purchased the ring and the other men agreed.

After verifying its value, the man paid the men for the ring. However, sometime between his examining the ring and the purchase, the authentic ring was switched for a

Spotlight is on local building codes

(Continued from Page 1A)

the City Council each month. The council's approval is needed before such houses are demolished

Reo Ragan, another officer in the Building Inspections Department, explained dangerous structures need to be reported to that department for the inspectors to know about it. If the structure is found to be unsafe, it is condemned and then goes through legal process of being torn down, he said.

The code states that the owner must be notified, and in this case the city does it by certified mail. The owner is given 15 days after receiving the notice to start repair work, and the repairs must be completed within 90 days.

If nothing is done to improve the building to pass the city's inspections, the City Council can order the structure torn down and removed.

THE "JUNKER HOUSING program," as some city officials call it, has been in operation on an on-again, off-again basis since 1963, according to City Manager James Brown, and about 1,000 structures have been removed.

"We had one land owner with 52 apartment units that were substandard and a few were being lived in," Brown said, adding that the apartments were bulldozed down." Then there was the case of the Belmont Apartments in South Midland that consisted of 36 buildings with several units in each building.

The problem with the program has been primarily the turnover of persons in charge of it. "It takes a while for a new person to get a handle on it," Brown said. "We find a house that we think is bad, look up the landowner and send him letters. We have to get the legal office to look into it and get the building pector to look at it. We have to take photos and build a file on it."

Vacant lots, and occasionally entire blocks, dot south and east Midland as visible proof of the city's

south and east Midland as visible proof of the city's demolition program. "I would rather see vacant lots than dilapidated buildings," Brown explained. City Attorney Joe Nuessle said the building code usually applies to new structures while the fire protection code is utilized for older buildings. In reviewing the fire code, Nuessle said the city can "enter any building or premises for the purpose of making an inspection which they feel should be made," But, the code, probibits inspecting interiors of a dwelling.

Dwelling, in the City Code, is defined as a building occupied exclusively for residence purposes.

NUESSLE SAID IF an inspector wanted to check the interior of a house and obtained permission from the owner, it would be legal. "But when you get into something like this (fire

code), it's hard to interpret," he said

A housing minimum standards code listed in the City Code hasn't been administered, the city attorney said, because "it's too strict. It would eliminate half the houses in Midland. It calls for such things as windows in each room that open to the outside," and many houses have stationary win-

One recent survey of houses in three census tracts of south and east Midland revealed 261 houses were inadequate, said Michael Williams who compiled the survey results for the Objectives for Midland pro-

But this isn't a complete survey, he said. It was a random survey of about 1,200 houses out of about 3,000 and considered only the exterior of the houses, not the interiors.

In addition to the inadequate houses, the survey showed 276 that were marginal and 692 that were deemed adequate. Of the 261 inadequate homes, 74 were abandoned. The rest had occupants, he relat-

"At least 400 houses in the city are in this condition," Williams estimated. "It's not an isolated

IN HIS OPINION, the two recent fires only "highlight what people have been talking about for a long time - there's too much substandard housing." And he cautioned, a fire killing more children could ppen again. James Brown and Joe Nuessle both acknowledge

there are a large number of people who live in substandard structures. But, they question which is better: Letting the people stay where they are with a roof over their heads or pushing them out into the streets while the city tears down the structure. "People that live there (substandard housing)

won't say anything to us," said Nuessle. "They don't want to get kicked out." And no one on the city staff has an idea of where these structures are located unless someone com-plains to the city, he added.

The city manager said many of the owners of substandard housing know that structure can't meet the City Code. But the owners bypass the city when it comes to utilities. Many landowners pay the utilities, thus eliminating any chance that once they are turned off, the city inspectors might be out looking at the place.

If the utilities are turned off for more than six months, city inspectors must check the building and call the utility company before the gas or electricity is turned on again, he said.

"BUT RENTERS DON'T call us. They don't have anywhere else to go. Do we just go out and throw out these people and say this house isn't decent to live in?" questioned Brown. "I admit the problem is wrong. But until you have something to replace it, we move with caution on houses that are inhabited.

"If we had a surplus of housing, I'd say OK, move them (renters) out," he continued. "But you have to have some heart, some empathy with these people. I wish we could move them all into decent housing. That would be the Christian thing to do. Our goal now is to attack only vacant properties. Nuessle concurred

shortage around here for years. There's no public housing to move them to, or standard housing that they can afford. Unless you get a massive public nousing program and provide decent, safe, sanitary housing, the next choice is for them to pitch a tent or move away.

"Seems like we've had a real chronic housing

If the city decided to demolish all substandard housing that had people living in it, then it should 'finish the job" by providing another place for the people, Nuessle suggested. No matter how much is spent on "decent" housing.

tragedies such as the two fires still could happen, the city attorney added. "I'm not being calloused, but you can have a fire any place. In the mayor's opinion, the two fires "point out that all of us as parents need to keep close tabs on our

for it to catch on fire and burn down.

Forcing the people out of substandard housing won't solve the problem of more possible fires and tragedies, Akins believes. 'The fact that these places burned down isn't

children. The house doesn't have to be substandard

strictly because of their being substandard," he said.
"The solution is in still being careful in regards to fire."

under went the additional secondary treatment, which further cleaned up the waters. Chlorine is used to kill the coliform germs, which are associated with sewage and excrement from man and mammal.

"I don't believe that anybody in Midland Country Club would appreciate it (Midland Draw) water being there," said Mrs. Clark. "It's the smell that's real bad.' "I feel if the water were being

treated right, it (the stench and overflow) wouldn't be happening," she said

"I moved out there (Greenwood area) for the fresh air, and now I'm getting it (the stench)."

She urged the County Commissioners to file suit against the city of Midland in the same spirit in which the commissioners said they were going to sue the city of Odessa for dumping its effluent overflow into Monahans Draw.

"If y'all can hire attorneys to fight Odessa, I think you can hire attorneys to fight Midland," she reckoned.

The commissioners, however, indicated that there was a clear difference and suggested that the protesting residents along the draw take their case before the Midland City Council this afternoon.

Tijuana Laetrile clinic is raided

TIJUANA, Mexico (AP) - An American health-care group touring a Laetrile clinic was caught in the middle when Mexican authorities raided the clinic here in an attempt to break up a car-theft ring, authorities say.

Ricardo Gibert Herrera, chief of Baja State Judicial Police in Tijuana, said an American photographer in the tour group was arrested in the Saturday raid, but was released.

The Americans just got caught in the middle of a justified police aption to break up a stolen-car ring," Gibert said, adding that he could not warn the Americans about the raid for fear of tipping off the alleged theives.

Three are hurt in truck collision

PENWELL - Three people were injured in a collision Monday that

involved two truck-tractors. The accident occurred at 10: 50 a.m. 13 miles west of Odessa on Interstate

Highway 20. A spokesman for the Department of Public Safety said Charles Edward Fisher of Odessa had parked his truck on the south side of the eastbound lane of Interstate 20 for repairs. Arthur Damboise of El Paso was driving his rig eastbound on I-20 when his truck collided with the parked truck on the

side of the road. Injured were Fisher, Damboise and a passenger in the Damboise truck, Jessie Cannoy of El Paso. DPS said Damboise was admitted to Odessa Medical Center and the other two were treated and released. However, a hospital spokesman this morning said none of the three were admit-

The accident was investigated by Trooper Dennis Riley of Odessa.

ver, indiar differe protest raw take and City vice to insure a stronger America ... for years of distinguished leadership which has instilled a renewed sense of confidence and hope to people throughout America and ... the world for a more peaceful and economically stable international environment."

All this for a man who, during his two terms as the state's chief executive, had little to do with the city's officials, according to a spokesman for Democratic Mayor Tom Bradley.

There was not a great deal of communication between the governor and city officials," said Tom Sullivan, Bradley's press secretary, who described relations between the Democratic mayor and the Republican governor as "proper but not very

Bradley became mayor in 1973. Reagan left office at the end of 1974. Sullivan said "a couple of city officials said they never remembered seeing Reagan here (at City Hall) or hearing him talk about the problems" of Los Angeles. "The only time he was in town was when he was at home,'

Sullivan said. The spokesman said Bradley, who supported President Carter's re-election campaign, "would be as proper as he can be" during the ceremon-

"He does hold a very proper respect for the office" that Reagan is assuming, Sullivan said.

Today's celebration came one day before Reagan leaves for Washington to become president and one week before he is sworn into office. And it came nearly 40 years after he arrived in Los Angles as an unknown, aspiring actor.

The president-elect is nearly moved out of his home on a hillside in the city's exclusive Pacific Palisades section. His five-bedroom house was officially listed for sale Monday asking price: \$1.9 million - and movers already have taken some of the furniture and boxes of clothing on the road to Washington.

The president-elect spent most of Monday at home, except for a short trip to nearby Will Rogers State Park where he received an Arabian stallion as a gift from Mexican President Jose Lopez Portillo, with whom he visited in Mexico Jan. 5. After a brief cere- to wear mony the horse was sent to the Reagan ranch near Santa Barbara to join five other horses.

While in the park, Reagan told reporters he felt developments in the Iranian hostage crisis were prompting greater optimism that went farther "than anyone has gone."

He said that what he had been told in national security briefings over the previous two days "has indicated this optimism.

Asked whether he would consider as binding any agreement reached by President Carter with the Iranians,

he said: "I hope and pray and I think the president is negotiating on a basis that we can all agree to, but on the

other hand I don't think anyone should be asked to sign a blank check."

about 50 miles northeast of San Salvador; San Salvador in the past year. Two others, free-lance Miguel, 120 miles to the east; Zacatecolucas, 40 miles reporter John Sullivan of Bogota, N.J., and a Salvato the southeast, and Chalchuapa, 70 miles northwest doran with U.S. citizenship, are missing and feared of the capital.

However, military sources said government troops were in control in all four towns and cleanup operations were under way. Leftist sources claimed guerillas controlled several towns including Cinqueras and San Esteban Catyarina, but the government denied

President Jose Napolean Duarte, the president of the U.S.-backed civilian-military junta, visited military garrisons and a market in San Salvador. He told one merchant the leftists attacked with all they had "but they failed."

The public in the capital ignored a call for a general strike Monday from the Democratic Revolutionary Front, the political arm of the leftist movement. Undaunted, the Front tried again and called for a strike today.

Meanwhile, doctors at a local hospital reported the death of South African journalist Ian Mates who underwent more than two hours of surgery to remove a one-inch piece of shrapnel from the back of his head. Mates was wounded Monday when a claymore

mine blew up a car in which he was riding outside San Salvador with two American photographers, John Hoagland of San Diego, Calif., working for Newsweek magazine, and Susan Meiselas of New York, on assignment for Time magazine.

Hoagland, 29, suffered facial, arm and hand wounds but was reported in good conditions. Miss Meiselas, 33, had minor cuts and bruises, "no worse

Official registration set for MC's spring semester

Official registration for Midland College's spring semester is Wednesday and Thursday, following several weeks of pre-registration. Some 2,000 students are expected to be processed during registra-

Students who have pre-registered will report to the Physical Education Building at assigned 15-minute intervals to begin the brief registration activities. Hours for both days are 10 a.m. to 1 p.m. and 4: 30 to 8 Students who have not pre-registered may come to

the Physical Education Building after 6 p.m. Thursday only and they will be processed as quickly as Registrar Dee Windsor pointed out that there will

be no registration Friday. Classes for both daytime and evening students begin Monday, Jan. 19, and late registration begins that day. A late registration fee of \$5 is assessed students who do not register Wednesday or Thursday. Late registration for students wishing to take as

many as five courses will continue weekdays through Jan.23, and until Feb.3 for students wishing to take three courses or less.

College officials point out that late registration is a handicap for many students, since they will miss vital classes. About 2,400 students are expected to enroll before the end of late registration.

More than 9,500 people are estimated to have been

killed in the past year of political warfare in El Salvador between leftist guerrillas trying to over-throw the government and the army and right-wing terrorists fighting them. About 80 percent of the deaths are attributed to the army and the rightists.

The guerrillas' "final offensive" was announced by the Farabundo Marti National Liberation Front, a coalition of five leftist groups, in a broadcast Satur-day night. Leftist sources said the Front was trying to bring down the moderate junta and install a Marxist regime before the inauguration next week of President-elect Ronald Reagan because it fears he will increase military aid to the rightist-dominated

Conflict taking toll of journalists

SAN SALVADOR, El Salvador (AP) - The political violence tearing El Salvador apart has made this tiny nation a hazardous assignment for the journalists trying to report the conflict. Three of them have have been killed in the past year, five have been wounded, and two are missing.

Many more have been threatened, often in anonymous telephone calls that apparently came from both rightist and leftist groups. Journalists also have been detained or otherwise harassed by Salvadoran

An estimated 9,500 people were killed in this Central American country last year as leftist guerrillas attacked the U.S. supported, civilian-military government, and the army and right-wing extremists fought back. About 80 percent of the dead were leftists.

In the latest incident involving journalists, three photographers were wounded Monday by a landmine explosion that wrecked their car nine miles north of San Salvador, the capital.

Ian Mates, a South African in his 20s on assignment for the television news agency UPI-TN of London, suffered a severe head wound and was in grave condition. John Hoagland, 29, of San Diego, Calif., on assignment for Newsweek magazine, suffered fragment wounds in the face, arm and hand and was in good condition. Susan Meiselas, 33, of

New York, working for Time magazine, got minor cuts and bruises A day earlier, government troops threatened to kill

Associated Press correspondents Joe Frazier and Eduardo Vazquez-Becker if they did not leave the city of Santa Ana within 10 minutes.

Frazier, AP news editor in Mexico City, and Vazquez Becker, AP's El Salvador correspondent, had gone to Santa Ana, 45 miles west of San Salvador, to investigate a shooting. The troops confiscated their film, and they heeded the threats and left.

The three slain journalists were a Mexican and two

Ignacio Rodriguez Terrazas, a correspondent for the Mexico City newspaper Uno-mas-Uno, was killed last Aug. 8 while covering a gun battle in San Salvador. Witnesses said a soldier shot him even though he was standing near an automobile with a "Prensa" - Spanish for "press" - in large letters

Stock market gains

NEW YORK (AP) - The stock market finished just barely on the plus side Monday after backing off from a strong early advance.

Oil issues dominated the list of volume leaders in an active session.

The Dow Jones average of 30 industrials, up more than 11 points in early trading, showed only a minimal .08 gain at 968.77 by the close.

The daily tally on the NYSE showed about three issues advancing for every two that declined, and the exchange's composite index edged up .08 to 76.52. Seven of the 15 most active Big

Board stocks were oils. Phillips Pe-

troleum, which raised its quarterly

dividend from 45 to 55 cents a share, gained % to 54 % as of the 4 p.m. close in New York. Texaco rose 1/4 to 46; Exxon 1/4 to 77%, and Standard Oil of Indiana % to 751/2. But Gulf Oil was off 1/2 at 421/2; Union Oil of California dropped 1/4 to 41, and Atlantic Richfield lost 11/4 to

61¼.
The day's best gainer was Sperry & Hutchinson, up 31/2 at 291/2. The company, which is one of the country's biggest producers of furniture and carpeting as well as the marketer of S&H Green Stamps, said it was involved in talks with a potential purchaser.

The round of buying at the opening was touched off by the Federal Reserve's report late Friday of a \$2 billion-plus decline in both basic measures of the money supply.

The figures were taken as another in a series of recent signs that the Fed was succeeding in its effort to curb the growth of the money supply.

Many economists consider restraining monetary growth to be a necessary step toward bringing down the inflation rate. In addition, the apparent success of the Fed's credittightening is thought to mean less likelihood of additional tightening in the weeks ahead.

Daisetta has difficult choice

DAISETTA, Texas (AP) - This small community, nestled 50 miles northeast of Houston in the piney woods country, has an unhappy choice of accepting one of two dangers, City Attorney Zeke Zbranek

"I don't know what would be worse, an explosion and fire or for residents to freeze to death this winter," Zbran-

Residents of the community, who have decided to face the possible danger of explosion, learned Monday they do not have to comply with a Texas Railroad Commission order to turn off the town's gas supply.

The commission, citing numerous leaks in the system, ordered the city to turn off its gas supply on Jan. 2 until extensive repairs were made.

The city took the matter to court and State District Judge Harley Clark issued a restraining order allowing the city to keep the gas on pending a Jan. 22 hearing. Mayor Harold McCann, city coun-

cilmen and residents worked through the holidays and replaced a 1,000-foot section of pipe after gas leaks were found in 12 homes and several public buildings. But commission members say the problem isn't solved.

Jeff Hill, a commission spokesman, said residents' attempts to repair the gas system would be admirable "if one were playing with a hay bailer but not a natural gas system.

Hill said a cigarette lighter or the flip of a light switch could be enough of a spark to ignite an explosion in or near any of the 342 homes which receives fuel from the gas system.

Cotton

NEW YORK (AP) — Cotton futures No. 2 were mostly lower at midday dealings today.

The average price for strict low middling 1 & 1-16 inch spot cotton declined \$1 points to 86.92 cents a pound Friday for the nine leading markets, according to the New York Cotton Exchange.

Midday prices were \$0 cents a bale higher to \$4.55 lower than the previous close. Mar 92.35, May 93.30, Jul 93.10, Oct. 88.25, Dec 85.10, Mar 86.35 and may b67.00.

Sheep: 300; not established at 11 a.m.

Estimasted receipts Tuesday:

Cattle and calves 4,500; hogs 4,000; sheep 300.

DR. NEIL SOLOMON

Cancer spreads in several ways

Dear Dr. Solomon: Would you please explain how cancer spreads in the body. - Mrs. S.A.

Dear Mrs. A.: Cancer cells grow into the tissue surrounding them. In addition, they may enter lymph channels and blood vessels and in this fashion be carried to other parts of the body.

Dear Dr. Solomon: A friend of mine tells me that persons who are hard of hearing cannot get seasick. Is this true? I don't understand how one condition can possibly have any effect on the other. What causes seasickness and what is the best way to treat it? - Russ

Dear Russ: The relationship be ween the two conditions becomes clearer when you understand that seasickness, which is only one form of motion sickness, results from distur-bances in the fluid that stimulates the nerve endings in the inner ear. Because the ears of deaf individuals do not function properly, they are immune to motion sickness. Everyone else, however - and animals, too, for that matter - may be affected if the stimulus is severe enough and if it continues for an extended period of

The most common causes of motion sickness are continuous wavy and rolling motions. It has been established that a pattern that occurs every four seconds is most likely to precipitate the condition.

Dr. C.D. Wood, a pharmacologist at the Louisiana State University Medical Center in Shreveport, says that the use of anticholinergic drugs, which block the stimulation of the nerve endings in the ear, is the best way to prevent motion sickness. However, the drugs do cause side

effects, including dry mouth, in-creased pulse rate, drowsiness, headache, elaborate dreams, blurred vision, and vertigo (a form of dizziness). Because of this, the anticholinergic drugs often are given in combination with other drugs that nullify the unpleasant side effects. These drugs are obtainable only with a doctor's prescription. Some antihis-tamines, which are available over the counter, also are effective in combating motion sicknss.

Oral doses of antimotion drugs should be taken at least one hour before exposure to motion. The protection lasts from four to six hours. Once an individual experiences the symptoms of motion sickness, oral drugs no longer help. For this reason, astronauts are provided with antimotion drugs that can be injected, thus speeding up their absorption into the

Susceptibility to motion sickness decreases as a person grows older, and in relation to the length of time the person has been exposed to the motion. For example, people who travel by ship may feel sick at the outset but are less likely to experience the symptoms of motion sickness after the third day at sea. However, any change in the pattern of the motion may cause a new susceptibility. Eating and drinking to excess and being overweight also increase the likelihood that a person will be prone to motion sickness.

(If you have a medical question, write to Neil Solomon, M.D., 1726 Reisterstown road, Baltimore, Md. 21208. Dr. Solomon cannot give personal replies but will answer as may questions as possible in his column.)

UAW negotiations may block efforts to save Chrysler Corp.

WASHINGTON (AP) The question of how long workers will have to suffer financial pain may throw a roadblock in the path of the accelerating effort to save Chrysler

At issue in negotiations resuming today is whether the United Auto Workers will pledge not to try to make up its concessions to the company all at once when the current contract expires in September 1982.

Asked Monday night if he would approve such a commitment, United Auto Workers President Douglas A. Fraser said, "I would not because I'm not going to anticipate the outcome of negotiations in 1982."

Asked directly whether such a response might make it impossible to rescue Chrysler, Fraser twice replied: "It will be very, very difficult."

Two of the three Chrysler Loan Guarantee Board members, who must decide whether the

No. 3 automaker gets top of the \$800 million it \$400 million in new loan received last year. guarantees needed to survive, have raised the ing the current contract, but he said last week he possibility of work concessions beyond their current contract.

And for the first time, a union source says, the company also is insisting on a "no catch-up" commitment.

Fraser told reporters that Paul Volcker, chairman of the Federal Reserve Board and a board day night. Treasury Secretary G. William Miller has told reporters he wants such a provision, but Fraser said Miller hasn't told the union

The UAW already has yielded contract terms worth \$446 million. It now is bargaining with Chrysler on a complete wage freeze, estimated to save \$673 million - a key part of the company's plan to convince the loan board it is a good risk for more money on

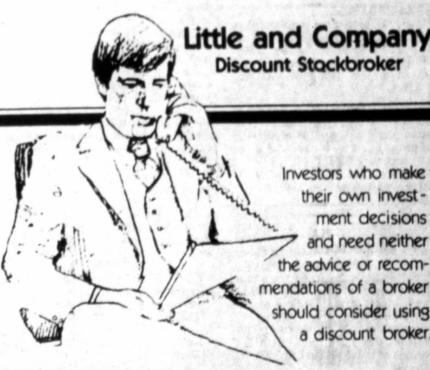

Fraser's comments did not rule out extend-

would be reluctant to recommend an exten-The loan board must determine whether Chrysler can stand on its

own after 1983 before approving new guarantees. Fraser said his visits to Volcker and Comptrolmember, brought up the ler-General Elmer issue at a meeting Mon- Staats, the third loan board member, were made at Miller's suggestion to explain the union's counter-proposal to the company's pro-

posed wage freeze. "I think we got some credit for making a proposal which was substantial," Fraser said.

Cambrian oil production reopened

Korman Operating, Inc. of Abilene No. 1 W. B. Trammell "A" has been completed to reopen Camrian oil production in the Tompkins multipay field of tonewall County, 10 miles south of Aspermont.

Operator reported a daily flowing potential of 130 arrels of 42-gravity oil, no water, with a gas-oil ratio of

Completion was through an 18/64-inch choke and perforations from 5,907 to 5,911 feet.

The well topped the Cambrian at 5,868 feet on kelly bushing elevation of 1,668 feet. Other tops include the Strawn, 5,150 feet; Odom, 5,428 feet, and Ellenburger,

The well, a northwest twin to the original Cambrian iscovery, is 500 feet from south and 330 feet from west nes of section 135, block 1, H&TC survey.

STONEWALL FIELD WELLS

Bright & Co. of Dallas has completed a pair of wells in the Peacock (Tannehill) field of Stonewall County,

two miles east of Peacock.
No. 2 E. H. Seiber finaled on the pump for 75 barrels of 38-gravity oil per day, through perforations from 3,461 to 3,465 feet. The pay was acidized with 750 gallons and fractured with 16,000 gallons.

A re-entry prject, No. 2 E. H. Seiber is 1,314 feet from south and 467 feet from east lines of the southwest quar-

ter of section 263, block D, H&TC survey. It was abandoned in October at 3,550 feet.

Bright & Co. No. 1 Veazey, one location northeast of other Tannehill production, finaled for a daily pump-ing potential of 80 barrels of 38-gravity oil, no water, through perforations from 3,584 to 3,567 feet after 1,000 gallons of acid and 18,000 gallons of fracture fluid. Wellsite is 2,173 feet from north and east lines of

The new wells are the fifth and sixth for the field.

The Gloria Gay, West field of Stonewall County ined its fifth upper Tannehill well with completion of Marshall & Winston, Inc., of Midland No. 5 Pittcock, 10

parrels of water, natural, through perforations from

3,932 to 2,937 feet.
Originally scheduled in the Mount Olive (Tannehil) field, the project was drilled to 2,988 feet. Operator set 4½-inch pipe at 2,985 feet and plugged back to 2,945

Wellsite is 2,105 feet from north and 1,475 feet from west lines of section 69, block D, H&TC survey.

Green County, two miles southeast of Christoval.

The strike finaled for a daily pumping potential of 52 barrels of 40.9-gravity oil and 69 barrels of water, with a gas-oil ratio of 962-1.

The Strawn sand 533 was topped at 5,314 feet on kelly

bushing elevation of 2,276 feet.

Other tops include the Palo Pinto lime, 4,956 feet;
Harkey sand, 5,130 feet; Strawn lime, 5,200 feet; lower

Strawn lime, 5,710 feet.

Total depth is 6,080 feet, 5½-inch pipe is set at 5,814 feet and hole is plugged back to 5,660 feet.

The strike is 467 feet from south and west lines of

Thomas McClure survey No. 182711/2 and 5/8 mile southeast of the three-well Mt. Susan (Strawn sand 5350) field.

TERRELL WELL

Sloux Natural Gas Corp. of Houston has extended Devonian gas production in the Ingham multipay field of Crockett County 31/4 miles into Terrell County. The extender, No. 1 Ingham Farms, 91/4 miles south-

east of Sheffield, completed for a calculated, absolute open flow potential of 2,750,000 cubic feet of gas per

Completion was through perforations at 8,693-9,634 feet after 11,500 gallons of acid and 64,220 gallons of fracture fluid. Scheduled as a wildcat, the well was drilled to 10,063

feet, where 5½-inch casing is set. Location is 467 feet from south and 3,575 feet from west lines of section 21, block 1, I&GN survey.

Saxon Oil Co. of Midland No. 1 Timmons has been completed in the Upton County portion of the Spraberry Trend Area field, 21 miles northwest of Rankin. The well, 1/2 mile east of the closest other Spraberry

well, completed for a 24-hour pumping potential of 44 barrels of 39-gravity oil and 114 barrels of water. Completion was through perforations from 7,321 to 8,640 feet after 4,000 gallons of acid and 168,000 gallons of fracture solution.

Wellsite is 660 feet from north and west lines of section 40, block 40, T-5-S, T&P survey.

SCURRY PRODUCER

The Fluvanna, Northeast (Strawn) field of Scurry County gained its second producer with completion of Cummings oil Co. of Midland No. 1 Fulford.

The well, extending the field 1 % miles southwest, was finaled for a daily pumping potential of 10 barrels of 42-gravity oil and 30 barrels of water, with a gas-oil ratio of 1,500-1.

Completion was through perforations from 7,915 to 7,930 feet after a 250-gallon acid treatment. Scheduled as a wildcat, the well was drilled to 8,325

feet. Operator set 41/2-inch casing at total depth and plugged the hole back to 7,952 feet.

Location is 660 feet from north and 1,980 feet from west lines of section 538, block 97, H&TC survey and 1.5 miles north of Fluvanna.

Palo Petroleum, Inc., of Dallas No. 3 Palo-Tommye Boother "S" is a new well in the Barnhart, Northeast (Grayburg) field of reagan County, 11 miles southeast

It completed for a daily pumping potential of 15 barrels of 32-gravity oil, no water, with gas-oil ratio of 2,666-1.

Completion was through perforations at 1,813-2,023 feet. The pay was acidized with 2,000 gallons and fractured with 50,000 gallons. Location is 990 feet from south and 2,970 feet from

west lines of section 237, block 1, T&P survey.

Tenneco Oil stakes deep wildcat in Loving County

DAWSON OILER

RK Petroleum Corp. of Midland No. 1 Merrill is a new well in the Lamesa, North (7850 oil) pool of Dawson County, three miles north of Lamesa.

Operator reported a daily flowing potential of 138 barrels of oil, gravity not reported, with a gas-oil ratio of 950-1. No water was produced with the

Completion was natural, through a 12/64-inch choke and perforations from 7,848 to 7,856 feet.

Wholesale gas jumps over \$1

By RICHARD DE ATLEY **Associated Press Writer**

LOS ANGELES (AP) - Gasoline dealers were forced to tighten their belts and wholesale gasoline jumped over the \$1-a-gallon mark for the first time as oil refiners reacted to a recent OPEC price increase, an oil industry expert said.

Dan Lundberg, who surveys 14,000 gasoline stations twice a month to gather price data, said Sunday the wholesale price jump was 2.22 cents, from 99.1 cents to \$1.01.3.

Lundberg said it was the largest single wholesale increase ever "outside of a government-inspired upward price adjustment such as announcement of wage and price controls."

He blamed the increases on last month's decision by the Organization of Petroleum Exporting Countries to raise the price of oil an average of \$3 a barrel.

Lundberg said other price increase factors include gradual government decontrol of domestic crude prices and the ripple effect of higher world oil prices on the newly decontrolled

The increase at the pump was slightly less than wholesale because gasoline remains plentiful and dealers competitive, thus further depressing profits on the retail level, Lundberg said. Retail prices increased 2.16 cents,

from \$1.22.8 to \$1.24.9, the survey indicated. The prices are an average of all grades offered at both full-serve and self-serve stations. "Competition is fierce. The dealers

are really struggling to make a living now," Lundberg said. Dealers are taking only 9 cents profit on the 17.7 cent ceiling imposed by the federal Department of Energy, his survey

Gasoline remains in plentiful sup-ply, said Lundberg, who also publishes an oil industry newsletter called the Lundberg Letter, because of continued consumer conservation and the increased refining of fuel oil for winter months. Two gallons of gasoline are distilled for each gallon

of fuel oil produced, he said.

His most recent figures indicated that in 1979, Americans used 6 percent less gasoline than the previous year.

Total depth is 7,803 feet and 41/2-inch

casing is set on botto Location is 1,0000 feet from north and west lines of section 66, block 35, T-6-N, T&P survey.

SCHLEICHER WELL

The Fort McKavitt field of Schleicher County gained its fourth Canyon oil well with completion of Waiter Expiroation, Inc., of Dallas No. 3 Josephine Tisdale. The well, 2½ miles south of the

closest Canyon oil production, complted for a daily pumping poten-tial of 36 barrels of 34-gravity oil, plus a trace of water, through perforations from 4,019 to 4,025 feet. The gas-oil ratio is 3.30-1.

The pay was acidized with 1,150 ballons and fractured with 20,500 gal-

Location is 660 feet from north and 1,580 feet from east lines of Josephine Tisdale survey, scrap file 15425, and 25 miles east of Eldorado.

SUTTON RE-ENTRY

Damson Oil Corp. of Lake Charles, La., announced plans to re-enter a deepen to 5,152 feet its No. 1 McDermott, a former Canyon producer in the Roberts multipay field of Sutton

The operator will attempt to com-

plete the project as the field's fourth Strawn gas well. It is 1½ miles south-west of the pay. Location is 19 miles northeast of

Sonora and 660 feet from south and west lines of section 25, block K, GHASA survey. Ground elevation is 2,369 feet.

SUTTON LOCATION

Interstate Equities Corp. of Long-view announced lcoation for its No. 4 Schultz, a south offset to dual produc-tion in the Interstate multipay field of Sutton County, 20 miles east of Son-

Contracted to 3,400 feet, the well will attempt to complete in the Harkey and Canyon pays.

Location is 1,580 feet from the most

northerly south line and 660 feet from the most easterly east line of J. E. Worth survey, abstract 6.

FISHER TEST

Texas American Oil Corp. of Midland No. 1 C. E. Anderson is to be drilled as a northeast offset to one of the two wells in the Heather (Noodle Creek) field of Fisher County, seven miles southwest of Rotan.

Location is 660 feet from south and 1,980 feet from west lines of section 57,

block 2, H&TC survey.

Contract depth is 4,000 feet.
