Budget may not balance until 1984

- WASHINGTON (AP) — President Reagan says he still hopes to fulfill a campaign pledge to balance the bud-get in 1983 even though White House economists are conceding privately it is unlikely the federal deficit can be erased before 1984.

"We're taking a shot at 1983, we hope," Reagan told reporters as he left a private dinner Thursday night. "If we try for '83, we're sure to get it by '84.'

Earlier Thursday, in a possible preview of how the administration would explain backing down on Reagan's bullish budget forecast, White House press secretary James S. Brady said the "economy inheritance" from former President Carter was "much worse than anyone thought it would

Several sources, who asked not to be identified, said officials now are indicating that 1984 is probably the earliest the budget can be balanced. •One congressional aide briefed by the administration said of a balanced budget in 1983: "I don't think that's realistic at this time."

The administration's latest thinking on wiping out the federal deficit emerged as Reagan continued a series of meetings with Cabinet officials to discuss budget cuts he will propose next week.

The president is expected to pro-pose spending cuts of about \$10 billion to \$15 billion for the current year and deeper cuts of up to \$50 billion for the 1982 fiscal year.

The administration program also is expected to call for 10 percent-a-year personal income tax cuts for the next three years and a business tax cut through increased depreciation allowances.

Indications Thursday that the goal of a balanced 1983 budget was slipping came one day after reports that the administration had lowered its ights on what its eq

At the same time, the White House was said to be backing off an earlier prediction of 7 percent economic growth in 1982 in favor of a smaller estimate of 4 percent.

In a paid campaign television address last Oct. 24, Reagan reiterated his call for spending and tax cuts and said, "The fact is, this program will give us a balanced budget by 1983, and possibly by 1982.'

But sources say the latest forecasts are for a relatively small budget deficit for 1983.

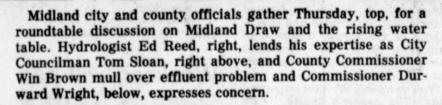

Murray L. Weidenbaum, Reagan's choice to head the White House Council of Economic Advisers, said at the White House it is still his "personal hope" that the administration can produce a balanced budget by 1984.

Asked about the prospect of balancing the budget by 1983, Weidenbaum said, "I suppose you could conjure up a scenario," but it would depend on the state of the economy and how deeply Congress cuts into federal programs.

Treasury Secretary Donald T. Regan, in testimony at his confirmation hearings in January, said he thought a balanced budget could not be achieved until 1984. Recanting, he said later he thought it possible to eliminate deficits by 1983.

Meanwhile, with the president's economic speech to a joint session of Congress scheduled for next Wednesday, Brady said Reagan is about 95 percent finished with his budget review. So far, none of the department heads has "gone to the mat" over proposed program cuts, which are "being discussed in a team manner," Brady said.

In addition to Reagan's sessions with his Cabinet members, budget director David Stockman and aides met with congressional experts Thur-say to discuss the timetable Congress will adopt for dealing with economic

Water solutions drown in controversy

By ED TODD Staff Writer

A roundtable confab to air problems surrounding Midland's rising water table and to grope for solutions made the proverbial "full circle" Thursday, when city and county offi-cials tried to strike harmony. Too, the running-over effluent and

possible leaks from Midland's sewage treatment plant and questions of health and disease drew much comment from the city council members and county commissioners.

But solutions to a possible crisis were drowned in controversy.

"We have a pretty good picture of what is going on," said hydrologist Ed Reed, who has been monitoring the rising water table for years. "The problem with Midland Draw is a complex one.'

Not all agreed with Reed at the meeting that involved Midland County commissioners, County Judge Bill Ahders, Midland City council mem-bers and Mayor G. Thane Akins in The First National Bank. **County Commissioner Charlie**

Welch offered pat solutions to the problem which increasingly is pitting the city against the county.

CRITICS, SUCH AS WELCH, of the city maintain that Midland's daily volume of effluent from the city sewage treatment plant is contributing to the rising watertable, is polluting the underground watertable, is seeping into the sanitary landfill and causing potential health hazards, and is helping turn Midland Draw into a stream.

Reed stressed that he is not prepared to unequivocally say, "This is the solution, and the solution will have this effect.'

Welch, however, was.

'We'd be glad the spread the water out." said the commissioner, who said he has been monitoring the water flow and water table in the county for years. Welch proposed that the effluent be pumped far away from Midland and into other agriculture

oriented areas which could use the water for irrigating crops and pastures

Reed agreed that the farther the effluent is removed from Midland, 'the better off you will be." But he said that much of the water will be recycled and returned to the water reserves.

"It's not a solution," Reed said. "It may be a temporary stopgap, but it'll bite you back later on.

Increasingly, Midland has been vexed by Odessa's dumping of its effluent into Monahans Draw. The treated sewage waters meander down that drainage basin, which flows eastward and merges with Midland Draw in far east Midland County. That channel then runs into Beals Creek in Howard County and spills into the Colorado River.

MIDLAND COUNTY residents east of town have been increasingly ag-gravated by Midland's effluent, which percolates from the holding ponds and on occasions overflows and

runs into Midland Draw, and, according to Welch, into the sanitary landfill.

"It's in violation of all the (Texas state) health statutes," Welch accusingly said of raw sewage waters supposedly seeping into the landfill.

"I think that it's time that something should be done. They (the city of Midland) are in violation of the permits, and they're running raw sewage" into the draw.

"I think immediate action should be taken," said Welch. "Turn on those switches (to pipe out the water). Then you can study the 'liver' out of it."

Reed rarely agreed with Welch, who, in addition to being commissioner of Precinct 2, is a water-well drill-

"Not all the water you see in the draw, Mr. Welch, is from the ponds," Reed said.

Effluent in the oxidation ponds is held for about 25 days before is transferred to a larger holding tank from

(See WATER, Page 2A)

package could achieve by the end of next year.

Sources said Wednesday the administration is forecasting inflation of slightly more than 8 percent in 1982, up from an earlier estimate of 6.5

One congressional aide said the administration was being urged to send specific legislation to Capitol Hill as early as possible. The administration had been expected to wait until the second week in March to deliver some proposals,

Transfer of Iran's funds blocked

DALLAS (AP) — Texas computer millionaire H. Ross Perot, who once hired commandos to spring two employees from an Iranian prison, has won another round against Iran — a court ruling that part of President Carter's deal to free the hostages was unconstitutional

U.S. District Judge Robert W. Porter issued the ruling Thursday in granting a temporary injunction blocking the transfer of \$20 million to Iran.

In the first major challenge to the executive order that was issued as part of the U.S.-Iran accords that led to release of the 52 hostages, Porter said Carter's action to unfreeze Iranian assets was an "unwarranted intrusion" into the judicial branch of government.

Perot's request for a temporary injunction was not the only court challenge to Carter's order. However, Justice Department lawyers have said they believe the case unique among 388 pending suits seeking com-pensation from Iran since a judgment already had been given before the Irahian accords were reached.

Carter's decree swept aside court orders and lawsuits involving the Iranian assets. Perot's computer compa-

ny, Electronic Data Systems Corp., had been granted the \$20 million by Porter in an earlier breach-of-contract suit EDS filed against the government of Iran.

"The United States in general and the State Department in particular hamper U.S. companies around the world to a degree that's just unique,' Perot said Thursday.

EDS attorney Thomas W. Luce III declined to speculate whether the de-cision would affect other companies suing Iran.

"The judge dealt only with EDS issues," said Luce. "He said the president did not have the constitutional right to interfere with EDS' suit against Iran."

The Justice Department had no comment on Porter's decision

EDS sued Iran for defaulting on a contract in which EDS agreed to computerize Iran's national health, welfare and social security records.

Last May, Porter found that Iran was guilty of breach of contract and owed EDS \$20 million. The judgment was upheld by two appeals courts. The government of Iran is appealing the amount of the judgment to the 5th U.S. Circuit of Appeals.

Testing recommended for water problems

altLake

The Midland Draw Committee established by the Human Relations Council has recommended that the city of Midland, aided by hydrologists Ed L. Reed & Associates, perform "such tests as necessary to gather information concerning possible sewage leaks and the rising water table" in and around Midland.

That recommendation was announced Thursday by Kimberly Modisett, HRC executive director, at a joint meeting of the Midland City Council and the Midland County Commissioners to discuss the localized rising watertable and Midland's sewage treatment plant.

The Midland City Council last month hired Reed to study the ground water in and around Midland and to detect leaks, if any, from the sewage treatment plant or its holding tanks.

ments, 2613 N. Midland Dr., about 9: 30 p.m. Thursday. The blaze

did heavy damage to the walls, ceiling, and floors of two

apartments in the complex. A plumbers torch was believed to

have caused the fire, which took more than an hour to extinguish.

Gulf of Mexico would not solve the problem," the hydrologist said.

Reed observed that the water table has been rising in recent years in the Midland area. Part of the cause is the unusually heavy (9.70-inch) September rains, the ever-increasing effluent and the runoff caused by construction of Interstate 20 south of table and pollution)."

Jones referred to the record-making September rains. "We'll never have another (similar) September again.

"Perhaps we shouldn't be lulled into a sense of false security," he surmised, however.

Rainfall at the sewage plant in 1980 measured about 30 inches.

Commissioner Win Brown suggested that the Salt Lake southeast of Midland might be "a good place to pump" the effluent in an effort to reduce the water table.

"We don't know that it would," Reed replied. "It may remove the oblem from one area (and take it) to another." Brown again addressed Reed and wondered if Midlanders "would float" a bond issue to finance a solu-

missioner Durward Wright. "Of course," agreed Jewel Smith, chief sanitarian for the Midland City-County Health Department, "the more water surface, you'll have more mosquitoes....More water surface, more mosquitoes

Smith said the city is experiment-ing with the gambusia, a small fish whose diet is exclusively mosquito larvae. At present, gambusia is stocked in the watertraps on Midland golf courses. Stocking gambusia in Monahans Draw would be useless, he said, due to the current. And the fish - no fish - could survive in the effluent ponds due to the lack of oxygen; turtles do, however. But then again, mosquites are no problem there, for the larvae, too, must have oxygen to live; effluent is virtually oxygen free.

water table have been "disjointed...These studies have not been integrated."

"It sounds simple on the surface, but it's complex," said the senior Reed's son, hydrologist Joe Reed.

Mayor G. Thane Akins, who was without comment throughout the twohour discussion, finally ended his silence and essentially adjourned the session.

"This is a very complex problem," said the mayor. "... The solution is to have the experts study it, and we know it is going to cost a great deal of money. We don't want to spend a great deal of money comp problem." Judge Ahders, who called the joint meeting, said he senses that "everybody is vitally interested" in the water problem.

Those participating in the "roundtable discussion were Midland Mayor G. Thane Akins, and city council members Steve Davidson, Tom Sloan, Carroll Thomas, Doris Howbert and Gordon Marcum II; County Judge Bill Ahders and commissioners Durward Wright, Charlie Welch, C DeWayne Davis and Win Brown; hydrologist Ed Reed and Joe Reed; Jim Brown, city manager; Joe Nuessle, city attorney; Fred Baker, director of public works; Fred Poe, assistant city manager; John Lowe, director of utilities; and Jewel Smith, chief sanitation for the Midland **City-County Health Department.**

Also at the meeting were Midland County Clerk Rosenelle Cherry and June Ocker, secretary to Ahders.

Making up the HRC's Midland Draw Committee are Jon and Ethel Whisler; Joe Jones; Ben Golliday; Pat Anderson, and Welch, Sloan and Ms. Modisett.

Cold weather may be factor

Midland. Unlike Welch, Reed said he could

not be certain that water in the landfill is coming from the sewage treatment plant. "I understand what you are saying," Reed told Welch. "I respect your opinion, but I do not agree with

what you are saying.' Among those on the fringes of the roundtable confab was retired geolo-

gist Theodore Jones, who said he was "rather appalled about the absence of solid information about this (water

tion to the rising water table. Brown answered his own question before Reed could reply.

"I would think so; we've raised enough hell."

ANOTHER PROBLEM addressed in the discussion was the "tremendous mosquito problem," noted Com-

Most of the discussion was focused on the rising water table and how to dispose of the excess waters until water-well driller Carl McDaniel bluntly told the roundtable panelists that they were off center.

"You've missed the most important thing: The people's health," said McDaniel. "There ought to be something done fast, because of the people's health ... because of pollution and health."

McDaniel said that he was concerned about the quality of potable water from wells.

FOR THE TIME BEING, there is no life-threatening danger in the water, Smith said.

"There is not now a health problem in the draw," Smith said.

In prefacing his comments, Reed noted that studies of Midland's rising

"We have one goal in Midland," he said. "The good of Midland County."

Weekend will be warmer but cloudy

The weekend will be warmer, but it still might not be a good day to wash the car. There's no rain in the forecast, but skies will be considerably cloudy in the morning and the evening, becoming partly cloudy the rest of the day Saturday.

The temperature will warm to the mid-60s Saturday from a low tonight in the low 30s. Winds will be light and variable tonight, becoming southerly, 10-15 mph on Saturday.

By ED TODD **Staff Writer**

The Midland City Council, which has opted to seek federal funds instead of relying on neighborhood improvement projects, Thursday voted to apply for \$1.094 million in federal Community Development Block Grant funds.

Those funds, in part, would help to "rehabilitate" the run-down and often neglected houses in the "flats" on Midland's predominantly black southeast side and in the heavy Chicano-black neighborhoods in east and northeast Midland.

In another move, the council voted 5-to-1 to spend \$625,000 in federal Revenue Sharing funds on a proposed new Midland Municipal Court, to convert Wadley-Barron Park's playa pond at A Street and Cuthbert Avenue into a living lake, to upgrade the downtown traffic signals, to install sprinkler systems in city parks and to put in a

reservoir at Hogan Park.

"We need to re-do Midkiff (Road). We're re-doing Garfield (Street), said Councilman Gordon Marcum II, who voted for both federal measures. ... Our critical shortage is housing."

Council to apply for CD funds

But instead of funding the building of new housing, the Community Development funds would be used to spruce up living quarters. Some of the money would be outright grants; other funds would be in home improvement loans.

COUNCILMAN Tom Sloan suggested that the remodeling and repairing of older houses would tend to "bring up the pride in the neighborhood, incentive.'

The council, on a motion by Carroll Thomas, proposed to break down their request for \$1.094 million Community Development funds from the U.S. Department of Housing and Urban Development (HUD) this wav:

-\$500,000 for housing rehabilitation

-\$50,000 for administration of the funds

-\$150,000 the parks.

-\$20,000 for contingency.

-\$374,000 for street improvements "I believe that's the quickest I've ever spent \$1,094,000," quipped Sloan, who, in efforts to enliven the City Council-staff discussion, occasionally would toss out jestful ways to spend

mone "I'd like to allocate a little to Missouri Street around where I live," he

mused. "We can't approve gazeboes and outdoor pools," Marcum said in

In more serious discussion, the council considered doling out \$40,-000 to renovate the Permian Basin Planned Parenthood's Midland clin-

"What do you think of Planned Par-enthood?" Sloan asked. "Do you think they're not doing any good ...? Why not do the life-time bit: Give them some money?

But Sloan's proposal went nowhere.

A SUGGESTION of sorts which, however, did make headway was to install sprinkler systems in city parks.

And Sloan found humor in that.

'We want a sprinkler system in Washington Park (in the flats)," said Sloan. He reasoned that the water would start pumping and spraying when the fellows are "shooting craps and playing blackjack and (the spray will) straighten the problem."

A proposal by Casa de Amigos director Mary Hinkle to funnel funds into a second low-rent Hillcrest Manor for the elderly and handicapped brought little comment from the council and virtually no consideration

But Mayor G. Thane Akins said that building a similar project on a vacant lot off Scharbauer Drive and near Hillcrest Manor would "be too simple, logical and reasonable" for the government. "They'll put it across town.

Ms. Hinkle noted that currently 160

people are on the waiting list to move into the 100-unit Hillcrest and that additional units are needed.

COUNCILMEN SPENT much less time on deciding how to spend Revenue Sharing Funds than they did on

the approach to apply for the HUD Community Development funds. On a motion by Councilman Steve Davidson, the council decided to slice up the \$625,000 Revenue Sharing money this way:

-\$145,000 to convert Wadley-Barron Park into a lake.

-\$90,000 for improving traffic signals.

-\$100,000 for sprinkler systems for city parks.

\$30,000 for the Hogan Park reservoir.

-\$260,000 to get work underway on the Midland Municipal Court. Total cost for the court is projected at \$564,900.

The Revenue Sharing plan got "aye" votes from all but Akins.

"I'm voting against it," he said, "because I think we need to get the court more than the other things."

Currently, the Municipal Court is housed in the Public Safety Building, which was built in the mid-1950s, at 404 E. Texas Ave. The court is cramped for space. The proposed court building would be constructed on a city-owned parking lot north of the police station.

The second public hearing on the fundings will be at 5 p.m. Feb. 24 in Council Chambers at City Hall.

Would You Like A 14-Karat Gold Chain for \$13?

As part of an advertising test we will send a genuine solid 14-karat gold chain to any reader of this publication who responds to this notice by midnight, March 10 for the sum of \$13 plus \$2 shipping and insurance. There is no further financial obligation. Each solid 14karat gold neck chain is 16" long. It is ideal as personal jewelry or as a gift. This advertising test is being conducted simultaneously in other publications. If you see it in more than one, please let us know as this information is important to us. Should you wish to return your 14-karat gold neck chains, refunds will be promptly made. While this test ends on March 10, if you are able to

respond by March 3, and you request five or more solid 14karat gold chains, you will receive them for a special price of \$12 each, and we will pay all shipping and insurance. There will be a limit of ten solid 14-karat gold chains per address. No requests will be accepted past midnight, March 10. Any checks postmarked later will be returned uncashed. Please enclose this original notice with your request. Send appropriate sum together with your name and address to: International Monetary Mint, Gold Advertising Test, Dept. GN 844, 390 Pike Road, Huntingdon Valley, Pennsylvania 19006.

Continental trying to stop takeover

LOS ANGELES (AP) - Continental Airlines, seeking to stop a takeover bid by Texas International Airlines, has filed a federal court suit alleging that Texas International violated securities law by purchasing a 9.5 percent stake in Continental before announcing its acquisition plans.

The suit filed Thursday asks the court to require Texas International to divest itself of all its Continental shares and halt its efforts to acquire any additional stock in the company.

The suit accuses Texas International of violating federal securities laws, state common law and the federal Aviation Act in connection with its attempt to acquire 49 percent of Continental's stock.

It alleges that on Feb. 6, Houstonbased Texas International violated federal securities laws requiring equal treatment of all shareholders by "secretly" purchasing 800,500 shares of Continental common stock at prices far below the \$13 a share it said it would pay in its subsequently proposed tender offer.

Also alleged is that Texas International's subsequent stock purchases and statements were intended to manipulate the market for Continental stock and that the Texas airline was illegally attempting to interfere with a planned merger between Continental and Western Airlines.

Texas International surprised the

industry Monday when it said it had purchased 1.5 million shares of Continental, that it would make a tender offer for at least 4 million more shares at \$13 each, and that it might buy as many as 6 million shares, which would give it 49 percent interest in Continental.

The merger between Western and Continental, both based in Los Angeles, recently was tentatively ap-proved by a Civil Aeronautics Board administrative law judge. The CAB turned down a similar merger bid in 1979.

In Washington, Continental also asked the CAB to enjoin Texas International from proceeding with its tender offer and from purchasing any further Continental stock until the CAB has acted on Texas International's application to seek control of Continental.

CAB approval is required when one airline wishes to buy 10 percent or more of another.

Meanwhile, UNC Resources Inc., a uranium mining firm based in Falls Church, Va., is reportedly preparing for a corporate fight with Western following the rejection by Western's directors of a proposed takeover by UNC. Western directors insisted they were going ahead with their planned merger with Continental.

Authorities allow suppressed movie to come to light

By MIKE FEINSILBER Associated Press Writer

PAGE 6A

WASHINGTON (AP) - A documentary film by director John Huston on the recuperation of shattered, shell-shocked GIs of World War II is being released 35 years after the government suppressed it as being too revealing.

The ban was lifted Wednesday in response to a campaign to release the film and after bootleg prints were shown in New York City and Los Angeles in recent months.

The hour-long Army Signal Corps picture, "Let There Be Light," will be available through the National Archives to theaters, libraries and film scholars.

It was shot in a stateside Army hospital at the end of World War II and documented the recovery of a group of returned veterans who ar-

rived barely able to function. The purpose was to convince employers they could safely hire ex-GIs who had to undergo psychotherapy before they could be discharged. In Huston's narration, these war victims were called

'casualties of the spirit." The film depicts the amazingly rapid recovery of a group of soldiers suffering from a variety of mental wounds. One can barely speak; an-other can't walk unaided, though he is physically uninjured; another has lost all memory of everything in his life that preceded the horrors of combat in Okinawa.

Each is cured with applications of sodium amytol, hypnotism or psychiatric paternalism. In eight weeks they are playing softball and dis-charged into civilian life.

The film reflects the era's unquestioning faith in psychotherapy. It carries no suggestion that the soldiers'

wounds could reopen. Its candor must have been shocking in 1946 but no longer is; audiences have seen many intimate portraits of psychoneurotic suffering since then. The Defense Department objected

to release of the picture so strenuous-ly that military police once seized a print when Huston tried to show it to friends at the Museum of Modern Art in New York, according to Variety, the show business newspaper.

The Pentagon argued that the film was unsuitable because it invaded the patients' privacy, even though they had signed releases. In relenting, the Army insisted that scenes in which soldiers spell out their names be edited out.

Release came after Variety and Jack Valenti, president of the Motion Picture Association of America, crusaded for making the film public and after the Los Angeles County Museum

of Art exhibited a bootlegged copy during a Huston retrospective last November and a commercial theater in New York City showed the film for a few days last month.

The showing in Los Angeles qualifies the film for consideration for a 1980 Oscar, Variety said.

The National Archives said prints will be available for sale and rent from its Audio Visual Center here and the public may see it on request at the Archives building in Washington. Its chief appeal probably will be to film buffs.

In a review, Variety called the movie "a masterpiece, one of the greatest films ever made on the subject of war's impact on the human spirit.'

Its only criticism was of the film's "tendency to overrate the powers of psychiatry - a fad at the time, especially in Hollywood" and of the "up- agency said this week.

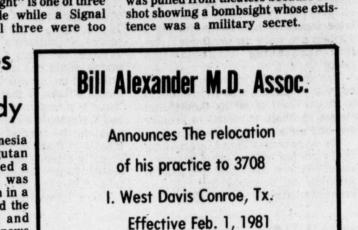

lifting group-cure ending that report-edly was imposed by the War Department."

"Let There Be Light" is one of three films Huston made while a Signal Corps officer. All three were too

Last living 5-star general celebrates birthday

EL PASO, Texas (AP) - Aides say General of the Army Omar Nelson Bradley, the nation's only surviving five-star general, plans nothing spe-cial today to mark his 88th birthday.

8

iì

io

nc h:

42 a

But a private birthday party is set for Saturday night to honor America's highest ranking military officer. He was born in Clark, Mo., Feb. 12, 1893.

Aides say Bradley is in good health despite a minor viral infection that forced him to spend two days in the hospital last week.

A spokesman at Fort Bliss, where Bradley lives with his wife Kitty, 58, said the general plans to report today, as usual, to his office where he spends a few hours daily.

Bradley, who led an Army group of 1.3 million U.S. troops during World War II - the largest body of American soldiers ever to serve under one

field commander - and then became the nation's first chairman of the Joint Chiefs of Staff in 1950, no longer gives interviews to news reporters.

But he still speaks at ceremonies and occasionally addresses soldiers or officers attending leadership classes at Fort Bliss.

Although he has arthritis in his legs that confine him to a wheelchair most of the time, Bradley takes frequent trips, and attended President Reagan's inauguration last month.

Army spokesman Ed Starnes said Bradley's arthritis was one reason he moved here from Beverly Hills, Calif., in 1977.

"It was the dry climate here, the good hospital, and he said he wanted to 'get back to the troops,'" Starnes said.

Bradley, the son of a schoolteacher in rural Missouri, was known as the

"GI's general" during World War II because of his concern for the welfare of his men. He stormed ashore alongside his First Army troops during America's invasion of Normandy in 1944 and later led his soldiers to victory against the Nazis in the Battle of the Bulge.

Five years after the war, Bradley was elevated to five-star rank, joining Douglas MacArthur, George Marshall, and a West Point classmate, Dwight D. Eisenhower.

When Eisenhower died in 1969, Bradley became the only living fivestar general in the nation. He remains on active duty because of an act of

His first wife died in 1965 and in 1966 he married Kitty Buhler, a screen writer who authored scripts for television's Dragnet, The Untouchables and My Three Sons.

Midland man to serve six months in prison

The 35-year-old Midland father of seven children was sentenced to one year in federal prison and was fined \$2,000 Thursday by U.S. Federal Judge Lucius D. Bunton after he admitted he was trapped in an anti-tax protest movement and failed to file a proper federal income tax return for 1975.

"Well, I got started into this (by) external pressure," the defendant, John Frank Cunningham, told the judge Thursday just prior to sentencing. "(And) after I realized what was going on..., I didn't figure out how to get out ... without a hassle.'

Cunningham was a member of the Midland-founded, but now disbanded, United Tax Action Patriots.

Last July 20, Bunton sentenced the leader of the band, Dr. Austin B. Tibbits, an osteopath, to five years in prison and fined him \$2,000 after a jury convicted Tibbetts of tax evasion.

Cunningham told the court he now 'can't say truthfully that the tax (protest) movement was justified...A lot of it was wrong." But he speculated said that President Ronald Reagan's administration may correct any ills in the tax system.

"I do know I'm sorry I got into it," Cunningham said of UTAP. "It'll never happen again It was wrong. I had no excuse...." His attorney, Thomas Kendrick of

Amarillo, who also was one of Tibbett's co-counsels, said that Cun-ningham's case was "tragic." He was misled by people more educated than he in some ways and too late was he aware of the implications of his

involvement in the anti-tax group. Kendrick suggested that Cunningham, a diesel mechanic, was "not well equipped to evaluate the motives of the tax protesters.'

Bunton agreed that the case was tragic.

"It is a tragedy that some in a society are misled by others," the judge told Cunningham. "You have been misled...I have utmost sympathy for your seven children."

"I certainly hope that you have seen the error of you ways," Bunton admonished the ex-protester, "and in the future you will not be misled." He said the tax-protest route "is not the way to make the changes."

Afterward, the judge levied the one-year sentence, ordered Cunningham to serve six months in prison, suspended the remainder of the term and ordered him on a five-year probation once he is out of prison. He is to report to the U.S. deputy marshal March 16 to carry out his sentence.

THE MIDLAND REPORTER-TELEGRAM, FRI., FEBRUARY 13, 1981

Small leak may force balloonists to abort misssion

By 'The Associated Press

The balloon "Jules Verne" was drifting toward the Arabian Sea today, crippled by a small leak that could force its two American pilots to abort their attempt at the first nonstop balloon flight around the world, trackers said.

At 7:30 a.m. EST, the tracking station in Bedford, Mass., reported the balloonists had not been heard from since midnight, but they were not alarmed and considered the balloon still airborne.

Tracker Bob Rice said a satellite locator was picking up some "spurious" signals, "something that has happened in the past," and the balloon "is in a very difficult communications area, and we anticipated that...There's no reason to believe the balloon is in any danger.

Co-tracker Jim Mitchell said the flight might have to be aborted in less than 48 hours, but held some "outside hope" the leak could be contained or fixed.

"If the leak is low in the envelope (the tall balloon filled with gas) mostly air would leak out and it wouldn't make any difference," he said. "Or it could be in the valve in the top of the envelope, and that could be opened and shut, electrically. Something like that could fix a leak there.

"Those are longshots, but a possibility," he said

Mitchell said earlier "the balloon is in no immediate danger and can fly for a number of hours."

Plans made to avoid

If necessary, he said, balloonists Maxie An- tic and Europe to Egypt.

derson of Albuquerque, N.M., and Don Ida of Boulder, Colo., "will apparently have the option of landing on the Arabian Peninsula, in the Arabian Sea between the peninsula and India or in India.'

The 20-story-high balloon, named for the author of "Around the World in 80 Days," took off Thursday from Luxor, Egypt, and at midnight EST, after 19 hours in the air, it had flown about 850 miles, Mitchell reported

He said at that time it was 210 miles due south of Riyadh, the capital of Saudi Arabia, traveling at an altitude of about 20,000 feet and at a speed of about 50 mph.

Its track was carrying it well south of Iran, whose revolutionary, anti-American government refused to give Anderson and Ida permission to pass through its air space. If the winds pushed them too far north, they could run the risk of being shot down.

Anderson, a mining-investment executive, piloted the Double Eagle II from Canada to France in 1978 in the first successful crossing of the Atlantic Ocean by a manned balloon. With his son, he last year claimed the first successful crossing of North America.

He and Ida, who operates tree nurseries in Colorado, plotted a course that would carry them south of the Himalayan Mountains, across China and Japan and into the north Pacific, where temperatures could dip to 60 degrees below

From there, the course passes near the west coast of Alaska, sweeps southeasterward across the United States, then crosses the North Atlan-

CAMP LEJEUNE, N.C. (AP) - A sentencing hearing for Pfc. Robert Garwood was winding to a close today after a psychiatrist testified that sending the Marine to prison would be like returning him to the Vietnamese POW camp that left him a "deeply disturbed" man.

Dallas psychiatrist David Hubbard made a dramatic plea against a prison term for Garwood in testimony Thursday, saying the convicted collaborator lives in a mental world of "shattered incoherence.'

Col. R.E. Switzer, the presiding judge, said testimony in the sentencing hearing probably would be completed today and the jury could then begin its deliberations.

DEATHS Tom L. Inman

Services for Tom L. "Grandaddy" Inman, 69, of 1501 Ridglea Ave., were to be at 2 p.m. today in the Newnie W. Ellis Funeral Home chapel with the Rev. G.A. McGee, pastor of Bellview Baptist Church, officiating. Burial will be in Fairview Cemetery.

Inman died Wednesday in a Midland hospital following an illness.

Born March 24, 1911, in King, N.M., Inman moved to Llano at an early age and then to Abilene. He met and married Edna Irene Maples in 1934 in Wingate. They moved to Tucson, Ariz., in 1942 from San Angelo. They moved to Midland in 1958. While living here, he was a self-employed mechanic, having retired several years

Price of roses not what used to be States taking steps against drought

DALLAS (AP) — Faces of the romance-mind-ed may turn rose-red this Valentine's season when they learn a dozen of the largest, longstemmed beauties now cost as much as \$75.

"Roses are just like gasoline," said Al Cooper, manager of Carren's Flowers in Dallas. "They've been going up almost daily for the past month

Prices for a dozen large roses vary from \$50 to \$75, while smaller roses with shorter stems sell for \$35 to \$50 a dozen.

Area florists blamed inflation, the rising price of natural gas, the Rose Bowl parade, the rain in California, the freeze in Florida and supply and demand for the price increases.

Some florists said they've been hit with four price increases during the past week from their wholesale suppliers.

"I've been here 10 years, and the prices go up every Valentine's," said an employee of La-kewood Florist. "The suppliers don't give us a

reason, they just give us the price. And every morning, the price is a little bit more."

"It's just inflation," said Harvey Schwartz, owner of Your Florist, Inc. He blamed the weather in other parts of the

country for "a lack of roses." "A lot of that has to do with the really bad rain

they had recently in California," Schwartz said.

But Floyd McVey, owner of Reed Floral Co., disagreed.

"The weather? It didn't have anything to do with it. It's supply and demand," he said.

"Our wholesaler-to-retailer cost is twice what it was a month ago. This always happens at Valentine's. It will hold a while at the present level, then go down when the holiday is over," he said

"There are so many roses used for the Rose Bowl parade in California. Millions are used for that," said Judy Hofmann, owner of The Flower Affair.

BUSINESS MIRROR Small business can't survive very long with high interest

By JOHN CUNNIFF AP Business Analyst

NEW YORK (AP) — How long can a good small business survive while paying interest rates that exceed 23 percent? The answer isn't precise; it's not like predicting

that a certain percentage of the citrus or coffee crops will be ruined if temperatures dip below 27 degrees and stay there for 10 hours on a windless night.

But it is certain that a large number will wither on the vine, so to speak, and that those who survive will have suffered severe, probably lifelong, damage in terms of income, jobs, expansion, and confidence.

Unlike big companies, which enjoy the advantages of volume and the market power to make price increases stick, many smaller businesses have little choice but to absorb the cost of higher interest rates.

"The increases are nothing short of catastrophic," said Professors William Dunkelberg of Purdue University and Jonathan Scott of Southern Methodist University in their most recent analysis of small-business trends.

—A Pennsylvania plant nursery: "If the prime interest rate continues to climb or stay high, I will be among the small-business casualties."

----An Ohio cleaning establishent: "Holding off new equipment installation due to high interest rates."

——A Kansas retailer: "I think it is unfair that government would guaranee loans for a large company like Chrysler Corp. We cannot get anything. Seems to me the small business does not have a chance."

The last comment has a significance beyond interest rates, since it has been demonstrated that small business has been the primary creator of jobs and the wellspring of innovation.

The two professors, who regularly conduct surveys among a sampling of the 540,000 members of the National Federation of Independent Business, found that in the fourth quarter of 1980 the proportion of firms paying 19 percent or more rose from 7 percent to 31 percent of all borrowers.

More than 60 percent of the respondents said they paid 16 percent to 22 percent, and 4 percent said they had paid 23 percent or more. And the figures reported from firms in large urban areas were even worse.

"Loans in rural areas likely include more agricultual loans and loans made by smaller banks with long-term business associations with their customer firms," the professors said. In addition, they noted, operating costs are lower for financiall institutions in rural areas.

In all, they said, credit developments were "disastrous" for small business, and they explained:

"Delays in expanding facilities mean that needed jobs are not created in the economy by these small firms. In addition, the jobs that would be indirectly created for producers of inventory equipment and construction materials are lost to the economy. Some small firms have even reported cutting employment in order to generate enough cash to make interest

Trouble brews over offshore talk

By MARTIN CRUTSINGER

WASHINGTON (AP) — Interior Secretary James Watt, on the job less than three weeks, has stirred up his first firestorm of controversy with talk of allowing oil and gas exploration off some of California's most scenic beaches.

Watt said he was considering reversing a decision made by the Carter administration because of President Reagan's strong commitment to boost oil and gas exploration in this country.

The four areas in controversy lie off Northern California's famed coastline. Former Interior Secretary Cecil Andrus, responding to objections from Gov. Edmund G. Brown Jr. and other environmentalists, removed the tracts from the proposed lease sale last October.

But Watt asked Brown for comment Wednesday on a proposal to offer the areas for leasing to oil companies in late May.

"I have made no final decision as to whether all, or any, of these basins will actually be offered at the bid opening in late May, but the president has instructed me to take the necessary steps to increase the domestic production of oil and gas, and I firmly intend to take those steps," Watt said in his letter to Brown.

Environmental groups and members of the California congressional delegation were quick to attack the proposed change.

In a telegram, 11 congressmen said leasing the

tracts would be "a tragic mistake ... which the people of the central and northern California coast will not tolerate."

The congressmen said Watt's proposed action would overturn a decision reached by Andrus after years of study that the economic and environmental dangers of drilling far outweighed the potential benefits.

In separate statements, Sens. S.I. Hayakawa, R-Calif., and Alan Cranston, D-Calif., expressed their own reservations. Cranston said the tracts should not be offered "not only to protect the sensi-tive and fragile environment of California's beautiful and largely unspoiled coastline, but also to protect the right of state and local governments to manage their coastal resources."

The proposed California sale approved by Andrus in October included 115 tracts in the Santa Maria basin off San Luis Obispo. Watt's proposal would add 127 tracts in the deleted basins — Eel River, Point Arena, Bodega and Santa Cruz — for a total of 1.3 million acres.

The disputed tracts are near Eureka, Mendocino, Point Reyes and Big Sur, Calif.

Watt said he had under review not only the California case but also the entire five-year leasing program Andrus issued in June 1980 to see "whether revisions in that schedule are necessary and desirable."

During the campaign, Reagan criticized the Carter administration for unnecessary delays in offering federal land for oil and gas exploration.

Operators report openers in Permian Basin counties

A pay has been reopened in a Winkler County field and discoveries have been reported in Tom Green, Nolan and Runnels counties.

WINKLER COUNTY

The Winkler County pay reopener is William B. Hendon Jr. of Midland No. 1-15 Mitchell which was completed from the Pennsylvanian, south zone in the G.P.M. multipay field eight miles southeast of Kermit.

The operator reported a daily flowing potential of 144 barrels of oil, gravity not reported, with a gas-oil ratio of 4,500-1. No water was made during the potential test.

Completion was through a choke of unreported size and perforations from 8,590 to 8,690 feet after 3,000 gallons of acid.

A re-entry of a 10,364-foot failure, it originally was drilled by Joe N. Champlin as No. 1 G. P. Mitchell and abandoned in February 1966.

It was re-entered by R. E. Patton and Albritton & Meyer as No. 1-P Kelly to test the Pennsylvanian.

Location is 660 feet from north and 1,980 feet from east lines of section 15,

Sumik Drilling, Inc., of Denton completed No. 1 C. E. Byrd as a Cisco oil discovery in Tom Green County,

On 24-hour potential test it flowed 16 barrels of 46-gravity oil and 20 barrels of water, with a gas-oil ratio of 625-1. Completion was through a 20/64inch choke and perforations at 3,373-

Total depth is 4,458 feet and 41/2-inch

The Cisco sand was topped at 3,373 feet on ground elevation of 1,755 feet. Loxcation is 1,908.5 feet from north and 467 feet from east lines of A. Holtz survey No. 2202.

The strike finaled for a daily flow of

with a gas-oil ratio of 220-1. Completion was through a 24/64inch choke and open hole from 6,138

ed, and 6,164 feet, the total depth. The Ellenburger was topped at 6,-136 feet on ground elevation os 2,096

west lines of section 6, block F, TCRR survey and eighr miles south of Girvin.

STERLING WELLS

Champlin Petroleum Co. of Midland No. 1 D. L. Glass has been completed in the Conger, Southwest (Pennsylvanian) field of Sterling County, 25 miles southwest of Sterling City.

Operator reported a daily flowing potential of 302 barrels of 40.3-gravity oil and 16 barrels of water, through a 24/64-inch choke and perforations from 7,954 to 8,363 feet. The gas-oil ratio is 2,123-1.

Total depth is 8,500 feet, 4½-inch pipe is set on bottom and hole is plugged back to 8,498 feet.

Location is 660 feet from south and east lines of section 46, block 32, T-5-S, T&P survey. ****

Texaco Inc. No. 1 E. B. Cope has been completed in the Conger, Southwest (Pennsylvanian) field of Sterling County for a 24-hour flowing po-tential of 324 barrels of 48-gravity oil and 62 barrels of water, with a gas-oil ratio of 2,345-1.

Completion was through a 19/64inch choke and perforations from 7,-860 to 8,206 feet after 6,000 gallons of acid and 66,000 gallons of fracture fluid.

Total depth is 8,441 feet, 5½-inch pipe is set at 8,410 feet and plugged back depth is 8,333 feet.

Wellsite is 660 feet from south and east lines of section 1, block 2, EL&RR survey. The site is 17 miles southwest of

Sterling City.

ANDREWS GAS WELL

COKE RE-ENTRY

elevation is 2,448 feet.

Vista Petroleum Co. of Cross Plains will re-enter a 4,465-foot failure in Coke County and deepen to 6,000 feet as a wildcat.

The hole is the former Sid Katz No. 1 Norton Properties 4½ miles southeast of Bronte.

It will be operated by Vista as No. 1

Leede & Pine of Midland will redrilled as a 4,800-foot wilcat 15 miles enter a former Ellenburger well in the sotheast of San Angelo. Taurus field of Ward County and plug

Location is 1,320 feet from north and 1,980 feet from east lines of section 6, block A, AB&M survey.

Mineral Development will drill No. 1-2 Mertz in an attempt to reopen the Lisa (Strawn) field 15 miles southeast of San Angelo.

Scheduled to 4,800 feet, it is 660 feet from south and east lines of section 2, block A, AB&M survey.

MARTIN FIELD AREA

McCormick Operating Co. of Hous-ton No. 1 Davidson is to be drilled as an 11,300-foot project in the J.L.M. (Mississippian oil) pool of Martin County, 20 miles north of Stanton. Drillsite has been staked 1,800 feet

from north and 1,050 feet from west lines of section 65, block A, Bauer & Cockrell survey.

WARD FIELD AREA

The Quito, West (Delaware and Cherry Canyon) field of Ward County gained a new project with the staking of Amoco Production Co. No. 1 E. Green

The 7,000-foot project is 1,809 feet from north and 467 feet from west lines of section 225, block 34, H&TC survey and 15 miles northwest of Monahans.

PECOS COUNTY AREA

PDC Gas Co. of Midland will reenter the discovery well of the Cardinal (San Andres) field of Pecos County and plug back to 1,700 feet for recompletion attempt as the fifth well in the Cardinal (Queen, west) field.

The project, three miles southeast of Bakersfield, is 660 feet from south and 1,980 feet from east lines of secton 3, block 17, University Lands survey. It was comleted from the San Andres in April 1980.

The operation is the No. 6 Universi-

HOCKLEY LOCATON

ty.

Texland, Rector & Schumacher of Fort Worth No. 1 Verette is to be drilled as a 5/8-mile northeast stepout to the eight-well Levelland (Abo) field of Hockley County, three miles southwest of Levelland.

Location is 467 feet from south and east lines of section 18, block 30, Baylor ounty School Land survey. The contract depth is 7,700 feet.

CROCKETT DRILLSITE

Warren American oil Co. of Midland spotted No. 1 University of Texas No. 234 as a 1%-mile southeast outpost to production in the Crockett County portion of the Farmer (San Andres oil and gas) field, 16 miles southeast of Big Lake.

The 2,800-foot test is 330 feet from south and 2,423 feet from east lines of section 2, block 46, University Lands survey.

TOM GREEN AREA

McBay Oil & Gas, Inc., of Crockett No. 3 Wilbert Gully is to be drilled as a

Texaco No. 2 E. B. Cope will be dug 1/2 mile northwest of production and 660 feet from south and 1,286 feet from west lines of section 1, block 2, EL&RR survey.

The operator spotted No. 4 E. B. Cope 1½ miles northreast of production and 1,90 feet from north and 1,600 feet from west lines of section 1, block 2, EL&RR survey.

Texaco No. 2 E. B. Cope "B" will be drilled as a 3/4-mile north stepout 1,980 fet from north and 660 feet from east lines of section 2, block 2, EL&RR survey.

The fifth project, Texaco No. 1 Cope-Seale Unit is 5/8 mile north of

production and 1,830 feet from west lines of section 2, block 2, EL&RR survey.

CONCHO COUNTY

McBay Oil & Gas, Inc., of Crockett announced two Strawn projects in the Speck, North (Strawn and Canyon) field of Concho County, 12 miles south of Paint Rock.

Contract depth for each test is 4,100 feet.

No. 1 Patricia Speck is 5/8 mile southwest of production and 467 feet from noth and west lines of Michael Theis survey No. 2002.

McBay No. 2 Patricia Speck is 3/4 mile southwest of production and 660 feet from south and west lines of Michael Theis survey No. 2002.

Location is 1,400 feet from north and 1,500 feet from east lines of section 47, block 21, T&P survey.

RUNNELS DISCOVERY

Harken Oil & Gas, Inc., of Abilene No. 1 Harris has been completed to open Fry sand gas production 3/4 mile southwest of the Vanderlaan-Freedman (Gardner oil) field of Runnels County, one mile south of Crews.

It finaled for a calculated absolute open flow of 11 million cubic feet of ' dry gas per day, through perforations from 3,624 to 3,634 feet after a 500-gallon acid treatment and a 76-barrel fracture job.

The lower Fry sand was topped at 3,622 feet on ground elevation of 1,-873.5 feet. Other tops include the upper Capps, 3,412 feet, and the lower Capps, 3,590 feet.

Total depth is 4,000 feet, 4½-inch casing is set at 3,982 feet and the plugged back depth is 3,824 feet.

Location is 667 feet from south and 467 feet from east lines of secton 12, Juliana V. Cabrera survey.

PECOS RECLASSIFICATION

Flag-Redfern Oil Co. No. 2-L McDonald, the lone well in the Putnam (Ellenburger gas) field of Pecos County has been reclassified to Ellenburger oil, making it a new pay opener in the multipay area.

As an oiler, it finaled for a daily flowing potential of 68 barrels of 42.1gravity oil and no water, with a gasoil ratio of 4,882-1.

The pay was acidized with 3.000 galons.

Total depth is 5,320 feet, 41/2-inch casing is set on bottom, and hole is plugged back to 5,284 feet.

Completion was through perforations from 4,603 to 4,761 feet.

Location is 660 feet from north and

Pilot gets three years

The pilot of a DC-3 aircraft laden with more than 6.000 pounds of Colombian marijuana smuggled from a South American country to a ranch south of Odessa by way of Mexico in February 1980 was sentenced to three years in prison Thursday by Federal Judge Lucius D. Bunton.

The flier, Larry Coulter Foreman, 41, of Woodsboro, a community north of Corpus Christi, is one of 10 men indicted in the scheme. Two have pleaded guilty, four pleaded innocent, and four others are fugitives.

Foreman told the court that he was in the "electronics business" in South America when he became involved in the smuggling scheme.

"I somehow got predisposed to do something I probably would not have done," Foreman said moments before the judge pronounced sentence in fed-eral court in Midland. "I'll guarantee you, I'll never do it again.'

His attorney, H. Thomas Hirsch of Odessa, also made his bid to influence the judge into lessening the sentence

Hirsch noted that Foreman had earned almost a score of air medals in Vietnam.

"He has done a disservice to himself (by smuggling in the marijuana)," the attorney said. "He has conviction in California. been an honorable person...I think Mr. Foreman has learned his lesson...I think he's an honorable man.'

In sentencing the pilot, the judge immediately focused on the apparent crux of the Foreman's part in the scheme: greed.

made the Feb. 23-24 flight from the Republic of Colombia to Texas via Mexico for a mere \$50.

"You agreed to do it for money..., for a great deal of money," the judge said without pinpointing Fore-man's fee. "They did meet your price...."

The judge, like the defense attorney, commended Foreman for his war-time service to his country, and forthwith sentenced him to three years in prison.

Foreman, who was indicted on three counts, could have been sentenced up to five years in prison and fined \$15,000 on each count.

He was indicted for conspiracy to import the contraband; for importing the marijuana, which reportedly had a street value of several million dollars; and for possession with intent to distribute the controlled substance.

A 31-year-old Laredo man, Ronald Marshall Watson, pleaded guilty to the counts and was sentenced to two years in prison.

However, Watson said he did not have an actual role in the plot but was aware of it.

"I feel that I was duped into this," said Watson, whose livelihood apparently was the "free-enterprise" merchandising between Mexico and the United States.

Before levying the sentence, Bunton noted Watson's "previous involvement" with marijuana and a

An alleged principal in the case, Anibal Acosta, 46, of Miama, Fla., has pleaded innocent to the charges and is to be tried April 20 in federal court in Midland.

Acosta, part owner of Monarch Aviation, which converts Convair 880 Jet-liners from passenger to Bunton said he doubted that Foreman would have cargo aircraft, was released this week under a \$500,000 bailbond. His bail had been set at \$1 mil-

West Texas Press Association opens its Mid-Winter Meeting

annual Mid-Winter Meeting today in the Midland Hilton, with attendance expected to exceed 125. The session will continue through Saturday night. State Sen. W.E. "Pete" Snelson and George W. Bush, both of Midland, are the featured speakers.

A golf tournament got under way this morning, with Tom Blakemore of Lubbock in charge.

The registration desk was to open at 1 p.m. in the headquarters hotel, under the direction of Mrs. Bob Craig of Hamlin.

A meeting of the association's board of directors was to begin at 4 p.m., according to Walter Buckel of Lamesa, convention chairman.

Jim Reynolds of Crosbyton is president of the organization. Other officers are John Getz of Farwell, first vice president; Buckel, second vice president; Bob Craig of Hamlin, secretary-treasur- state director of NNA at 2 p.m. er; and Larry Crabtree of Vernon, board chairman

Directors include Dan Feather, Menard; Joyce Lowe, Lampasas; Steve Monk, Graham; Brad Too-lev. Slaton: Dan Comedy, Haskell; and Marshall Andrews and Bill Collyns of Midland participating. ley, Slaton; Dan Comedy, Haskell; and Marshall Day, Seminole.

Delegates will attend a reception from 6 to 7 p.m. at the Permian Basin Petroleum Museum, Library and Hall of Fame, sponsored by The Reporter- cluding banquet session, scheduled at 7 p.m. He is Telegram, host newspaper. A tour of the museum will follow the reception.

A continental breakfast at 8 a.m. in the Hilton will

The West Texas Press Association opened its 32nd Jim Patten, head of the Allison Chair of Journalism at Midland College, at 9:45 a.m. He will be introduced by Dr. Al Langford, president of Midland College.

Eugene Cummins, an Andrews CPA, will discuss "Is Your Newspaper a Hobby, or for Profit?" at 10: 45 a.m.

A luncheon scheduled at noon will be addressed by George W. Bush, a Midland independent oil operator and civic and business leader.

The afternoon session will begin at 1:30, when James Roberts of Andrews and Lyndell Williams of Austin, president and executive vice president, respectively, of the Texas Press Association, will review activities of the state organization.

"The State of the National Newspaper Association" will be discussed by Frank Luecke of Cameron,

Work sessions and panel discussions wil continue during the afternoon, with Joe Pickle of Big Spring, Jim Cornish of Post, Bob Hamilton of Iowa Park, The president's reception will be held in the Hilton ballroom, beginning at 6 p.m.

Snelson will be the principal speaker at the conexpected to review highlights of the first 30 days of the present session of the Texas Legislature.

Sponsors of the various convention events include

Hispanic group wants to join **Organization of American States**

WASHINGTON (AP) - A Hispanic organization in search of a higher international profile is asking for affiliation with the Organization of American States.

If accepted, the League of United Latin American Citizens would become the first such Hispanic-American group to establish a formal tie to the OAS

"The whole issue of Latin American affairs is of great interest to Hispanics in this country," Ruben Bonilla, national president of LULAC, said about the approach to the inter-American organization. "It will place us in a new forum of policy formulation

Bonilla, of Corpus Christi, Texas, said he is hopeful that LULAC will be accepted as an affiliated organization but he has had no confirmation.

The OAS has 27 member nations from the Western Hemisphere. A number of countries are recognized as observers, including Austria, Canada, Egypt, France, Israel, Italy and the Netherlands. The Vatican and the United Nations also are observers.

The tie that LULAC is seeking, called "cooperative status" by an OAS official, has been granted to about 75-100 groups ranging from U.N. agencies to

Doctors keep wary eye on premature quints

PORTLAND, Ore. (AP) - Tiny quintuplets whose combined weight is about that of a healthy newborn were in critical condition today as doctors closely monitored their second day of life.

The babies were born Thursday, three months prematurely, to a 28-year-old woman who took a fertility drug and knew for five months she would bear quints, doctors said.

The three boys and two girls, who weigh about two pounds each, were placed in the neo-natal intensive care center immediately after delivery by Caesarean section at the University of Oregon Health Sciences Center.

The infants were suffering from hyaline membrane disease, a lung ailment common in early births, hospital spokesmen said.

"There are several doctors watching them," said a woman who identified herself as the hospital's admitting coordinator.

The babies had not been named by Thursday afternoon. Doctors said they were known as "A, B, C, D and E.'

Names of the mother and father were not released at their request.

"The parents don't want to be harassed," said Dr. John Yount, chief pediatrician for the babies. "This is a very difficult time for them. It's uncertain how well we'll be able to sustain the babies.'

Under normal conditions, the babies would have about a 50-50 chance for survival, but a special drug used by the mother over the past week might have improved those chances, Yount said. He said the next four to five days will be critical to

the babies' survival. Babies generally do not survive if born more than 14 weeks early, Yount added.

international professional organizations. The OAS official, who asked not to be named, said

an informal hold has been placed on all applications while the entire affiliation system is examined.

"There are an infinite variety of relationships with organizations," he said. "We're trying to get the standards set."

Apparently the ties mostly are useful for public relations but contribute little of substance. Organizations are able to exchange information and attend some, but not all, meetings of the OAS.

The tie became politically controversial last fall when the Council on Hemispheric Affairs, known for supporting human rights causes, was rejected when it applied for cooperative status.
