Budget prescription battle begun

WASHINGTON (AP) - President Reagan, armed with a massive prescription for curing the nation's economic ills, is returning from the peaceful mountains of Maryland to find the battle of the budget already

begun. With most of the details disclosed and a congressional lobbying effort in full swing, Reagan spent the weekend at the Camp David presidential re-treat polishing the program he will

outline Wednesday night. Rep. Tony Hall, D-Ohio, said the fight over Reagan's plans is shaping up as "the biggest legislative battle in this country since President Franklin Roosevelt fashioned the New Deal." On the early fronts:

-AFL-CIO leaders caucusing in Florida this week are mapping strategy to resist planned cutbacks in federal jobs and unemployment compensation programs.

-Businessmen are complaining about reductions Reagan is expected to seek in the Export-Import Bank, which provides key aid to American businesses operating overseas.

-Several celebrities are protesting Reagan's plans to slash government subsidies for the arts. "We must pray that we not be thrown right back into the dark ages, where it's dog-eat-dog. We deserve better," said folk singer and actor Theodore Bikel.

-Vice President George Bush, joining the giant public relations campaign to promote the plan, urged support for the package in New York Sunday night, saying the administration's "instrument will be the remedial scalpel, not the meat cleaver.'

The budget blueprint Reagan is bringing back to Washington today is expected to include reduction or elimination of 83 federal programs. The goal would be to cut \$40 billion to \$50 billion in the \$739.3 billion budget proposed by former President Carter

for the spending year that begins Oct.

The plans, according to administration sources, include phasing out the government's popular public service jobs program, reducing extended unemployment compensation benefits and special unemployment benefits for workers hit by high import levels, cutting Medicaid and some Social Security programs and scaling down the food stamp program.

Some politically popular farm subsidies and government support for the nation's fledgling synthetic fuels pro-

"The biggest legis-

lative battle ... since ... Roosevelt fashioned the New Deal."

gram also reportedly could feel the budget ax.

At the same time; military spending would increase \$26.6 billion.

Reagan also wants to reduce Carter's proposed foreign aid spending by more than 22 percent, reduce individual income tax rates by 30 percent over three years beginning July 1 and cut business taxes retroactively to Jan. 1, sources said.

Sprinkled in are cuts that could touch some of the most sensitive nerves on Capitol Hill.

For example, Reagan's plan to dis-mantle the Appalachian Regional Commission would have its greatest impact in Tennessee and West Virginia. Those two states are represented by Senate Majority Leader Howard Baker and Minority Leader Robert C. Byrd, respectively.

Key to the success of the president's program will be its reception on Capitol Hill, where Reagan will deliver what White House press secretar

James S. Brady billed as "straight talk to the Congress and the nation" at 9 p.m. EST Wednesday.

A Reagan supporter, Sen. Pete Domenici, R-N.M., said congressional approval depends on whether the president's program is considered as a package or in pieces.

"It these cuts have to come to the floor one at a time ... then there is no chance of getting this country turned around on fiscal restraint," Domenici said Sunday on ABC's "Issues and Answers.'

But Sen. Russell B. Long, a Louisiana Democrat, said he sees success - and that much only if the Reagan

House Majority Leader Jim Wright

"Everybody in the entire United States wants to reduce expenditures. Unfortunately, there isn't any line in the budget that says 'waste, fat and fraud,"" Wright said on NBC's "Meet the Press.'

"When you get down to specifics, it's extremely difficult," he added.

Newsweek magazine reported Sunday that Reagan's economic recovery program eventually could trim the federal work force by 10 percent — a total of 200,000 people. Most of those would be in federal regulatory agen-cies, which Reagan has pledged to curb as a way to aid American businesses.

The chairman of the Nuclear Regulatory Commission has told Reagan's budget chief, David A. Stockman, that the president's federal hiring freeze will seriously affect his agency and hamper its nuclear plant inspection program.

for only "65 to 70 percent" of the plan forces can capitalize on what Long sees as "the momentum and the will of the people on his side.'

of Texas cautioned Sunday that the cuts won't come easily, even though Democrats are "every bit as eager' as Republicans to cut the budget.

President Reagan stretches out in his cowboy boots to look over economic notes during the weekend at Camp David. The president is due to present his economic report to the Congress this week. (AP Laserphoto)

As the pope's jet crossed Lebanon's

nation in Asia, he was to visit the slum dwellers of Manila, Indochinese "boat people," sugar plantation workers and Moslems and other ethskies, he sent wishes for "peace and nic minorities.

On his way back to Rome Feb. 26, John Paul is to make a brief stop-over in Anchorage, Alaska.

Pope Paul VI visited the Philip-

II arrived to say Mass today, killed one man and injured two others, according to a doctor who treated the wounded.

The pope, making a brief stopover here on his 12-day Far East trip, was apparently unaware of the explosion, in a stairwell leading to a seating section for foreign diplomats. There was no immediate word on whether the incident would alter the pope's schedule.

A physician who treated those injured said "it was an explosion but we don't know what it was." American vice consul Tim Kane was one of those in the area, and took off his shirt to

The pope had arrived at the sta dium, normally used for cricket matches, to deliver a 90-minute Mass.

His stopover schedule in this Moslem nation also included a meeting with Pakistan's president, Gen. Mohammed Zia ul-Haq, before heading to the Philippines, Guam and Japan. The 60-year-old pontiff stepped from his jetliner to a 21-gun salute, heard a military band play national anthems and reviewed an honor guard.

A hastily sewn yellow and white Vatican flag assembled over the weekend after officials discovered

Some priests complained about Zia's orders that for security reasons only bishops and a few other church officials could attend the welcoming ceremony. They alleged it was an attempt to turn the papal stopover into a "state visit" to give the appearance John Paul sanctions Zia's military regime.

John Paul was to meet with Zia, celebrate Mass and send greetings to Pakistan's estimated 750,000 Catholics before leaving for Manila. There, he is to spend much of his time with the faithful in cities, rural areas and slums, and meet briefly with Philippines President Ferdinand E.

existence fraternal co-Christian, half-Moslem nation rocked by civil war in a telegram to Lebanese President Elias Sarkis. The pope said, "I have not forgotten the dear country of Lebanon. I hope in my heart that it will have peace and brotherly love.

The Vatican said John Paul sent messages of peace and brotherhood to other heads of states whose countries he flew over.

Pope John Paul's visit to the Philippines will be the second papal visit in 11 years. It will be the first in history to Japan and Guam.

Vatican officials said the pope's major theme on his 21,000-mile voyage would be peace - through disarmament, fair distribution of wealth, protection of human rights and interfaith dialogue.

L'Osservatore Romano, the Vatican newspaper, said the pontiff would call for critical decisions to advance the cause of peace because mankind is "threatened by an immense danger, ... an atomic conflict and the terrible existential and social inequalities which culminate in the tragedy of poverty and hunger.'

Local church sources had warned before the pope left Rome that Zia and Marcos might try to exploit the visit for their own political purposes.

Marcos, who with his wife, Imelda, vied with Cardinal Jaime Sin of Manila for the pope's time and attention, sought to improve the atmosphere for the visit by lifting martial law, which

In Japan, he was to pray for the victims and visit survivors of the 1945 U.S. atomic attacks on Hiroshima and Nagasaki.

The pope has been taking daily Japanese lessons and for two months has been saying his morning Mass in Japanese, his first Oriental language, in his private chapel, with two Japanese nuns correcting his pronunciation. He is expected to use the lan-

guage frequently when he gets to Japan next week.

said today.

secretary.

BONN, West Germany (AP) - Foreign ministers of three major U.S. allies - Britain, West Germany and France - met here secretly last week to discuss the implications for Europe of the new Reagan administration's foreign policy, West German officials

he imposed eight years ago.

But scores of nuns, priests and seminarians joined more than 2,500 young people in an anti-government demonstration in Manila Friday. Calling for an end to "fascist dictatorial rule," they said they planned more protests during the pope's visit. In the Philippines, the only Catholic

pines in 1970 and was slightly injured by a deranged Bolivian painter who lunged at him with a knife during the welcome at the Manila airport. That papal tour also included stops in Australia, Pago Pago, Hong Kong, Ceylon, Indonesia and Pakistan.

On his eight other trips outside Italy, Pope John Paul has visited Mexico, the Dominican Republic, his native Poland, Ireland, the United States, Turkey, six countries in Africa, Brazil; France and West Germany.

Allies meet to discuss Reagan foreign policy

MEXICO CITY (AP) - The Cuban government is refusing to negotiate with 31 men, women and children who seized the Ecuadorian Embassy in Havana and are holding two diplomats hostage, Cuba's Prensa Latina news agency said.

In a dispatch monitored in Mexico City on Saturday night, Prensa Latina said an embassy secretary, Guillermo Bazante Ramirez, was permitted to leave the mission. Ambassador Jorge Perez Concha, his first secretary Francisco Proano, and a Cuban office worker were still held. There was no explanation for Bazante Ramirez' release.

The Cubans holding the embassy, described by the government as "antisocial" elements, demanded safe conduct out of the country, Ecuador's undersecretary-general for foreign affairs, Mario Arman, told reporters in Quito, the Ecuadorian capital. Ale-

man did not specify what arms the group had or where they wanted to

> Prensa Latina quoted Granma, the official Communist Party newspaper, as saying the demands of the group that captured the embassy, which included six women and four children, would not be considered.

"The Cuban government is absolutely decided not to accept, under any conditions, any demands from these elements," the news agency quoted the newspaper as saying. "No forceful action against diplomatic missions accredited in Cuba will produce benefits for their authors.

Last April, more than 10,000 Cubans iammed the Peruvian Embassy in Havana seeking political asylum. Most eventually were allowed to leavey for the United States, Costa Rica, Spain or Peru.

al miles off the coast returning from the whale-watching excursion about 4 p.m. Sunday when the fog rolled in. Barr radioed a Mayday to the Coast Guard.

Authorities estimated Barr turned his ship about 300 yards too soon. It grounded directly beneath the Coast Guard lighthouse station at the tip of Point Loma.

Efforts were planned to tow the ship, built in 1935, into deeper water and save it from the crashing surf. Barr said.

Crew members said there was no panic among the 49 Los Angeles-area passengers, and that everyone was able to slide safely from the ship into the waist-deep water and walk to shore.

Passengers said there was no indication of trouble aboard the vessel until a scraping sound was heard and the ship came to a halt.

"When it happened, nobody knew how far out we were," said passenger Larry Foutz.

"We heard a loud bump and the whole ship shifted," said Monica Schoppe, another passenger. "We all waited for it to right - and it

Raising legal drinking age now in Senate

THE MIDLAND REPORTER-TELEGRAM, MON., FEBRUARY 16, 1981

AUSTIN, Texas (AP) - Senators had a chance today to decide whether to make Texas teen-agers wait an extra year to step up to the bar for a drink or buy a six-pack at a drive-in grocery.

Two senators had notified their colleagues they would seek approval of their bills raising the legal drinking age from 18 to 19.

The reason for this is to get alcohol out of the schools," said Sen. Walter Mengden, R-Houston.

Sen. Bill Sarpalius, D-Hereford, had a similar bill on the calendar. Both bills, however, would allow 18year-olds to work in bars and places that sell alcohol.

The Senate and House scheduled floor sessions and a full committee slate on the state holiday - Washington's birthday — in starting the sixth week of the 4½-month legislative session

Also on the Senate agenda is a bill that would wipe out Attorney General Mark White's ruling that Comptroller Bob Bullock may deduct union dues from state employee paychecks. The bill is part of Gov. Bill Clem-

ents' legislative program. A House-approved resolution plac-

ing a moratorium on state licensing of nuclear dump sites until Sept. 1 was among the 12 proposals scheduled for Senate consideration Monday. Adoption of the resolution would

give the Legislature time to enact a law covering radioactive burial grounds. Nothing was on the House calendar

but state representatives scheduled their first full week of committee hearings on non-emergency bills.

Senate committee hearings are set during the week on penalties for stealing oil field equipment, beefing up the fund to cover expenses for crime victims, testing the competency of teachers and establishing a group insurance program for state

The Soviet news agency Tass reported that Romanian Foreign Minister Stefan Andrei flew to Moscow today and was greeted at the airport by Andrei A. Gromyko, his Soviet counterpart. There was speculation the visit could signal plans for a new Warsaw Pact meeting on Poland, since the Romanian made a similar trip before a Warsaw Pact meeting to discuss the Polish situation in December

Andrzej Kacala, deputy minister of agriculture, arrived in the southern city of Rzeszow today for talks with farmers who are occupying a government building to back demands to register their organization Rural Solidarity as a legal trade union.

A Solidarity spokesman in Rzeszow said Walesa, leader of the independent labor union, would participate in the talks, which the spokesman said were to begin at midday. Walesa went to Rzeszow Sunday to counsel the farmers.

However, Walesa, after meeting the new government labor affairs chief on Saturday, said "this is not the to press the farmers'

dents' union is not registered by midnight Monday.

A student spokesman in Lodz said it was doubtful the charter would be signed during the meeting today in Warsaw, but that the students had been unofficially informed that an education ministry official would come to Lodz later in the day with authority to register the union.

"If, however, our charter isn't registered tonight, we may expect a general students strike throughout the nation," he said.

On Sunday night, Education Minister Janusz Gorski made a televised appeal to students to end the sit-in and call off the strike alert.

"We are close to reaching an agreement and as a matter of fact we agreed on all that concerns them," Gorski said. "But I understand that some dozen or so of Poland's colleges and universities are on strike alert." Minutes after he finished, medical

students in Warsaw called off P sit-in they had been holding to surport the Lodz protesters and called on other student groups to follow suit.

The 4,000 to 6,000 Lodz strikers are seeking sweeping changes in academic and administrative policies for the state-run institution as well as student exemptions from the one-year military draft. Their protest prompted sympathy strikes by students in Warsaw, Poznan and Krakow.

Density of fog slows traffic, keeps planes from landing

Visibility was reduced to 1/16 of a mile early this morning by a dense fog, slowing traffic considerably and keeping airplanes from landing.

San Angelo San Antonio Shreveport, La Stephenville Texarkana

A light fog rolled in about 5: 16 a.m., according to a weatherman with the National Weather Service at Midland Regional Airport. The density had increased by 7 a.m.

An air traffic controller at Midland Regional Airport related that the fog was delaying landings. A Southwest Airlines flight from El Paso decided to skip the Midland landing this morning and flew on to Dallas, he said. Four small aircraft were holding for takeoffs this morning until the fog lifted, said the controller.

The problem, he explained, is not in departing, but with landing because the visibility was poor. The fog was expected to lift by

mid-morning. The weatherman is calling for fair skies through Tuesday with mild afternoons. Low tonight should be near 40 degrees, warming into the low 70s

on Tuesday. Wind should blow out of the south at 5 to 10 mph tonight, increasing to 10 to

15 mph Tuesday. High on Sunday was a pleasant 60

degrees, still short of the record 81 set on that date in 1945. Low today was at the freezing point - 32 degrees - but it still was above the record of 17 degrees set in 1936.

Only a trace of precipitation has been recorded this month. For the year, the amount stands at .56 of an inch.

Closing arguments today in Scarsdale Diet trial

WHITE PLAINS, N.Y. (AP) - Attorneys in Jean Harris' murder trial were going to court today to present final arguments to the jury that will decide whether Mrs. Harris killed Scarsdale Diet doctor Herman Tarnower in a jealous rage or accidentally during a suicide attempt.

The jury, which heard from 97 witnesses during the three months of testimony, is expected to begin delib-

erations Tuesday. Mrs. Harris, the 57-year-old former headmistress of The Madeira School for girls in McLean, Va., is charged with killing her lover of 14 years in the bedroom of his Purchase, N.Y., estate

Six people injured in crash in Lamesa

LAMESA - Six people, including a San Antonio family, were injured in a two-car head-on collision about 4:45 p.m. Sunday on U.S. Highway 87 in far south Lamesa.

All were reported in fair condition this morning in Lamesa's Medical Arts Center hospital.

Injured were Miguel Lugo, 38, of Lamesa, the driver and only occupant of a northbound 1970 Buick Skylark; and Teofilo Benavidez, 22, of San Antonio, driver of a southbound 1980 Mercury Cougar, and his five passengers, his wife Ronda Benavidez, 21, and their 15-month-old daughter, Jessica-Benavidez, and Rick Varta, 21, and Rae Burns, 15, both of Colorado

Springs, Colo.. The mishap was investigated by the Lamesa Police Department.

March 10. Prosecutors contend she was angered at Tarnower's affair with Lynne Tryforos, his 38-year-old office assistant.

Assistant District Attorney George Bolen contended that Mrs. Harris planned to kill Tarnower and then take her own life because she wanted no other woman to have him.

During eight days of testimony in her own defense, Mrs. Harris told the jury she only remembered shooting Tarnower, 69, in the hand as he grabbed her gun when she tried to commit suicide. She testified she did not know how he suffered three more bullet wounds.

Mrs. Harris said she drove to Tarnower's home late that night to say goodbye to him. She said she then intended to shoot herself at the side of his duck pond. She denied Tarnower's affair with Mrs. Tryforos played any part in his death.

The prosecution called several scientific experts who testified that from the location of Tarnower's bullet wounds, it did not appear that he was shot during a struggle for Mrs. Harris' weapon.

Two pathologists testified they found tissue from Tarnower's palm embedded in his chest. The prosecution suggested the palm tissue was carried into the chest by a bullet which first passed through the palm as it was outstretched in a classic defensive gesture.

Six pathologists called by the defense insisted they could detect no palm tissue in Tarnower's chest.

Mrs. Harris faces up to 25 years to life in prison if convicted of seconddegree murder.

The May 18 eruption of the southwest Washington volcano changed the stresses on a system of fault lines in the area, causing pressures that may have brought about Friday's quake, said John Dvorak, a geophysicist at the U.S. Geological Survey's volcano center in Vancouver.

"The major eruption caused the stresses in the crust - how the crust is pulled and pushed," Dvorak said Saturday. "When you move such a large amount of material, the stresses readjust. This earthquake is probably a

Meanwhile, a flurry of aftershocks that jolted western Washington realization of those stresses." through the weekend had tapered off drastically by Sunday night, scientists said.

The earthquake, centered about 12 miles northwest of the volcano, registered 5.5 on the Richter scale of ground motion and was detected by people from California to lower British Columbia.

A quake of 5 is capable of considerable damage in a populated area. "Since Friday we've easily had over 100 (aftershocks), but since 7

o'clock (Sunday) morning we've only had about 15," said Susan Carlson, spokeswoman for the University of Washington geophysics center.

Only two of the minor tremors were strong enough to be detected by people, and no one called in to report them, Ms. Carlson said. The largest of the aftershocks measured 2.0 and 2.8 on the Richter scale of ground motion at about 11 a.m. and 2.45 p.m., respectively, she said.

Such aftershocks are likely to continue for about three days after a

quake as large as Friday's, Ms. Carlson said. Friday's quake was the largest to shake the Northwest in nearly 16 years. A 6.5-magnitude earthquake struck on April 29, 1965, causing five

deaths, dozens of injuries and millions of dollars in damage. There were no reports of injury or serious damage from Friday's 10:09

p.m. PST earthquake. The epicenter of the southwest Washington quake was in a sparsely populated part of the state.

ight moment demands.

"I promised them I would discuss their problems and I won't let them down," he told reporters, "but it took us 10 years to be registered, so they can wait a while.

The Supreme Court ruled last Tuesday that farmers could not unionize because of a 1932 law declaring them self-employed. It recommended that Rural Solidarity, which claims to represent 600,000 of Poland's 3.3 million private farmers, register as an association. But an association would not have the right to strike or bargain collectively for its members.

In Warsaw, Jozef Pietrasik, a director of the Ministry of Higher Education and one of the government's negotiators, said he was awaiting the arrival of a student delegation from Lodz, where sources confirmed a student strike was still on.

Leaders of the 26-day-old sit-in in Lodz, Poland's second largest city, have said they will call for strikes at other Polish universities and colleges if a charter for an independent stu-

DEATHS Leonard Springer

Services for Leonard Melvin Springer, 60, of W. 3527 Shandon Ave., were to be 1 p.m. today in Newnie W. Ellis Funeral Home Chapel with the Rev. James C. Holman, pastor of St. Paul United Methodist Church, officiating. Burial will be in in Ouleout Valley Cemetery in Franklin, N.Y.

He died Friday in a Midland hospital following an illness of several months.

Springer was born March 1, 1920, in Clyde, grew up in several places in Texas in the oil patch, and was married to Rose Giudice in Midland in 1947. He was a gauger for Mobil Oil Corp

Survivors include his wife, a daughter, his mother, four brothers, three sisters and several nieces and nephews.

Kenyon Banks

KINGSLAND - Services for Kenyon "Ken" Banks, 59, of Kingsland and formerly of Denver City, stepfather of Dwayne Slemmons of Midland, were held last Wednesday in the Kingsland Church of Christ. Burial was in Lakeland Hills Memorial Park.

Banks died Monday of a heart attack in his Kingsland home.

He was born May 17, 1921, in Mount Vernon and was married to Gertrude Slemmons at Brownwood in 1976. He was a World War II veteran.

Other survivors include his wife, four sons, two daughters, a brother, a sister and 12 grandchildren.

Blues guitarist, **Butterfield dies**

SAN FRANCISCO (AP) - An autopsy was being conducted today on Michael Bloomfield, whose electric guitar playing for the Paul Butterfield Blues Band led a revival of urban blues music.

Bloomfield, 37, of Marin County, was found slumped in the passenger seat of his car in San Francisco about 11:30 a.m. Sunday, a deputy coroner said.

Authorities said they believed the death was accidental. An empty bottle labeled "Valium" was found on the car seat, the deputy coroner said, but no suicide note was found.

There were no signs of a struggle, the official said.

Delphina Hundle

Mrs. J.L. (Delphina) Hundle, 80, of 2508 W. Golf Course Road, died Sunday in a Midland nursing home.

Mass was to be said at 11 a.m. today in St. Ann's Catholic Church. An additional service will be at 2 p.m. Tuesday in the Hillier Funeral Home Chapel in Bryan. Burial will be in the Wheelock Cemetery.

Mrs. Hundle was born Jan. 12, 1901, in Wheelock, grew up there, was married to the late J.L. Hundle on June 1, 1920, in Bryan, and moved to Midland that year. Hundle, a partner in the Pliska & Hundle Water Well Supplies Co. in Midland, died March 17, 1974.

Survivors include a son, Raymond Hundle of Midland, and a grand-

Pallbearers were to be David Holster, Preston McCleskey, Pat McMullen, Raymond Robinson, Joe Kloesel and Bob Massey.

by others may not be kept. Evening favors the pursuit of romance. too curious for his or her own

GOREN BRIDGE

1 V Pass 1 + Pass

What is your rebid? A .- Despite your fine suit, don't rebid two hearts-that action normally shows a sixcard suit. You have a minimum balanced hand, with stoppers in the unbid suits, which can be accurate-

ly described by rebidding one no trump. Q.5-As South, vulnerable, you hold: ◆KQ10974 ♡5 ◇K87 ◆J92

The bidding has proceeded: North East South West 1 ◊ Pass 1 ♦ Pass 2 ♡ Pass 2 ♦ Pass 2 NT Pass ? What do you bid now? A.-When partner "reversed" into hearts on the second round, he announced a hand worth about 18 points. His subsequent action showed virtually no support for spades -- he might even have a singleton! Nevertheless, we recommend a leap to four spades. You have the values for game, and your suit

should play for no more than two losers opposite any holding partner may have. However, your spades could prove virtually worthless at a no trump contract.

Q.6-Neither vulnerable, as South you hold: ◆AQ9 ♥A9865 ♦K7 ◆A73 The bidding has proceeded: North East South West 1 + Pass 2 V Pass Pass 3 + Pass 2 + 3 + Pass ? What do you bid now? A.-Slam prospects flared when partner opened the bidding, which encouraged you to make two forward-going moves by overcalling at the two-level and cue-bidding the club ace en route to four spades. Partner, however, has shown a distinct lack of enthusiasm so you must be content with four spades for the moment. If partner has been taking it easy, awaiting to see whether you have a fit or not, and now bids again,

don't settle for anything less

than a small slam.

Majors to cut off gas supplies

By LYDIA CHAVEZ The Los Angeles Times

In the little more than two weeks since President Reagan abolished oil price controls, two major oil companies have notified 64 distributors that their gasoline supplies will be cut off and credit policies will be tightened.

Phillips Petroleum Co. said Thursday that it has told 27 wholesalers in 10 northeastern states that their supply will be terminated on Feb. 28. The distributors sell about 100 million gallons of gasoline a year to some 300 retail service stations.

The same day that Reagan announced the end of controls, Atlantic Richfield Co. stopped delivering gasoline to Lerner Oil Co., based in Gardena, Calif., Arco confirmed. Lerner sells gasoline to 106 service stations in Southern California.

Separately, an Arco spokesman said Thursday, the company has told six distributors in the Pacific Northwest that their credit had been canceled and that they must now pay for gasoline on delivery. And the Los Angeles-based oil company told 30 distributors in 14 Midwestern states that their supply of gasoline is only assured for one more year.

Before decontrol, these distributors had been assured under government regulations of a steady allocation of gasoline at a set price and under fixed credit terms.

With gasoline supplies plentiful, none of the distributors is expected to have a difficult time finding a new supplier. But industry sources said that the distributors might not be able to secure long-term contracts in the new unregulated environment and that they could find themselves without gasoline to sell in the event of any new oil shortage.

While some oil companies and refiners distribute their products directly to retail stations, the major portion of the gasoline consumed in the United States is sold through a nationwide network of more than 22,000 independent distributors.

It was in part to protect such independent companies from being cut off by the oil companies in the event of such disruptions as a Mideast oil embargo that the government started allocating supplies

While no other major oil company said it had plans to change supply contracts, some independent oil analysts said that they expect more such actions, at least on a regional basis.

Lerner refused to comment on the supply cut off, but the company had depended on Arco for nearly 50 percent of the 100 million gallons of gasoline that it sold each year.

Jay Cole, a lawyer for Arco, said that Lerner and Arco have had an agreement to end their business relationship since 1977 but that federal regulations. had prohibited Arco from cutting off Lerner's sup-

ply. "We expected Arco to tighten up our credit, but not to end it altogether," said Forest Tower, the owner of Portland-based Tower Oil Co.

Tower, which owns 31 service stations in Oregon, was one of the six independent distributors in the Pacific Northwest affected by Arco's credit policy change.

"It's going to be tough and I'm going to have to raise my prices a couple of cents to pay for a bank loan," he said.

Arco's Cole argued, however, that the policy change simply put the Northwest distributors on the same payment basis as the rest of its gasoline wholesalers.

Phillips said that its wholesalers in the Northeast have known for a year that their supplies would end as soon as the president lifted gasoline controls.

'Some of our wholesalers there found new supplies on their own," said Don Johnson, Phillips East Coast manager. Johnson said that Phillips does not produce enough gasoline at its own refineries to supply all of its distributors. In the past, he said, Phillips has had to buy gasoline on the open market to supply its customers in the Northeast.

Cole said that the 30 distributors affected by Arco's 14-state pull out have also known since 1976 that the company intended to withdraw from that market as soon as permitted under federal law.

Inventor makes waves in energy hunt

By Bob Corbett Copley News Service

If everything goes properly, El Cajon, Calif., engineer Ed Parr could ride the waves of the future to wealth worth millions of dollars.

And in the bargain, he could efficiently provide a non-contaminating electrical power source he confidently feels could be used around the world to alleviate the energy crisis.

Parr, an inventor, says his design could be the basis for the first commercial plant on the West Coast to tap the wave energy of the Pacific Ocean.

Parr, also chief design engineer for the Jet Air Corp., an El Cajon aerospace firm, recently entered into an agreement with a non-profit Northern California firm that will allow them to build a prototype plant to test out his idea for harnessing wave action of the ocean to produce mass quantities of electricity.

If the prototype works out, the firm

project is being bankrolled by a millionaire he declined to name. The basic appeal of his plan, Parr

said in an interview, lies in its simplicity. He said it basically involves three units: a series of three large floats

that support an air compressor and a flywheel, an underwater waterwheel and a generating plant on land. The center float in the series rises

and falls with the ocean swells, he said, and is attached to the compressor and flywheel by a series of mechanical armatures.

A plunger system in the compressor serves to suck in air and then pump it to the waterwheel, which actually is a series of drums formed in a circle.

At any one time, Parr said, the drums on one side of the wheel are filled with air and are rising, and the other half are filled with water and descending.

This action, he said, is linked to a drive shaft that turns the generator on land to create electricity. Parr tested the system on a small scale in 1972, and it worked well, he said. The Sonoma County project, he said, will be much larger. The compressor cylinders will be 10 feet in diameter with a stroke -- the plunger moving in and out -- of four feet. The entire float structure, he said, will be about 60 feet in length. This can be expanded or shortened, Parr said, through some wave sensors so that the floats always will ride on the crests or troughs of the swells, thus increasing the system's efficiency. The flywheel, he said, will be 10 feet in diameter and the waterwheel 100 feet in diameter. The entire system, Parr said, would require some 80 such units covering almost 10 acres of ocean surface about a mile offshore. Such a system, Parr said, should be able to produce the equivalent of 150 megawatts of electricity -- a megawatt is a million watts -- enough to service the needs of about 200,000 homes An added touch, he said, is that new laws would require public utilities to buy up any excess energy, further reducing costs.

said, could be built at about one-third the cost of a fossil-fuel plant.

Looking even further into the future, Leary said his group already is contemplating the construction of similar plants off Alaska and Southern California.

Should the idea prove to be a success, Parr said he will receive about \$100,000 a machine because of his patent rights.

Eventually, he said with confidence, such plants "will be all over the world."

Chaves Abo strike among Permian Basin completions

Fred Pool Drilling Co. of Roswell, N.M., No. 1 Corn Brothers, Inc., has been completed as an Abo gas disco-very in Chaves County, N.M., 40 miles west of Boaz.

The operator reported a daily potential of 500,000 cubic feet of gas, through a 3/8-inch choke and perforations from 3,658 to 3,744 feet. The pay was fractured with 35,000 gallons.

Wellsite is 660 feet from north and 1,980 feet from east lines of section 19-6s-25e amd 3% miles northwest of

unnamed Abo gas field. The following tops were called on

ground elevation of 3,856 feet: San Andres, 272 feet; Glorieta, 1,285 feet; Tubb, 2,830 feet; Abo, 3,379 feet, and Wolfcamp, 4,122 feet.

CROCKETT WELLS

MGF Oil Corp. of Midland No. 2 C. E. Davidson III is a new well in the Ozona (Canyon sand gas) field of Crockett County, six miles southeast of Ozona.

The proeucer, 1% miles east of the closest other Canyon gas well, finaled for a calculated absolute open flow potential of 1,557,145 cubic feet of gas per day.

Completion was from pay behind casing perforations at 6,314-6,328 feet and from 6,370 to 6,390 feet. The zones were acidized with 1,500 gallons and fractured with 32,000 gallons.

Location is 1,320 feet from south and west lines of section 4, block KL, GC&SF survey.

C. F. Lawrence & Associates, Inc., of Midland No. 3-62 Halff has been completed in the Fergus (upper Grayburg gas) area of Crockett County, 5/8 mile southwest of other upper Grayburg gas production.

The operator reported a calculated absolute open flow potential of 1,200,-000 cubic feet of gas per day, through perforations from 1,480 to 4,496 feet after 15,000 gallons of acid.

Originally staked in the Haflaw (Queen oil) pool, the well is bottomed at 1,624 feet, 51/2-inch pipe is set on bottom and plugged back depth is 1.610 feet.

Wellsite is 467 feet from north and 7,200 feet from east lines of secton 62, block 1, I&GN survey and six miles southeast of Iraan.

DAWSON PRODUCER

The Gin, North (8000 oil) pool of Dawson County, four miles west of Lamesa, gained a new well with completion of Laguna Petroleum Co. of Midland No. 1 Spruil.

On 24-hour potential test it pumped 54 barrels of 34-gravity oil and 110 barrels of water, with a gas-oil ratio of 444-1.

Completion was through perforaons from 8,066 to 8,096 feet after

On 24-hour pumping potential test, the well made 60.6 barrels of 39.3-gravity oil and 10 barrels of water, with gas-oil ratio of 904-1.

Completion was through perfora-tions from 6,682 to 6,709 feet. The pay was acidized with 3,500 gallons and fractured with 60,000 gallons.

.

ENERGY OIL & GAS

Wellsite is 467 feet from south and 1,341 feet from east lines of section 1, Gonzales County School Land sur-

The well is the seventh completed in the field from the Canyon oil pay.

Another new Irion County oiler is Meadco Properties of Midland No. 2-20 Cravens

Completed as the eighth Cisco oil well in the ela Sugg multipay field, it finaled for a 24-hour flowing potential of 22 barrels of 46-gravity oil and five barrels of water, with gas-oil ratio of 1,818-1.

The final was taken through a 12/64-inch choke and perforations at 7,137-7,257 feet after a 4,000-gallon acid job.

Location is 5,300 feet from north and 660 feet from west lines of section

No. 3 J. W. Fields, new well in the Arden, South (lower Canyon sand) field of Irion County, 16 miles north-

On 24-hour potential test, the well flowed 138.7 barrels of 39-gravity oil and 21 barrels of water, with gas-oil

Completion was through a 1/4-inch choke and perforations from 6,503 to 6,524 feet after 1,500 gallons of acid and 46,500 gallons of fracture fluid.

Location is 467 feet from north and west lines of John Dunman survey No. 1802. No. 3 J. W. Fields is the field's eighth lower Canyon sand well.

KING COUNTY

The Twin Peaks (conglomerate) field of King County, 17 miles southeast of Guthrie, gained its fourth well with completion of Taubert, Steed, Gunn & Medder of Wichita Falls No. 17 S. B. Burnett Estate "WA."

One location south of other congomerate production, the well finaled for a 24-hour flowing potential of 307 barrels of 36-gravity oil, natural, with

block F, H&TC survey, abstract 174.

SUTTON COMPLETIONS El Paso Natural Gas Co. No. 6 Halbert is a new well in the Sonora (upper Canyon) field of Sutton County, 4½ miles west of Sonora.

Five-eighths mile south of other upper Canyon production, the well finaled for a calculated absolute ope ... flow potential of 2,500,000 cubic feet of gas per day, through perforations from 6,052 to 6,100 feet and from 6,245 to 6,295 feet. The pay was acidized with 1,500 gallons and fractured with 20,000 gallons.

Location is 1,100 feet from south and east lines of section 124, block B, HE&WT survey.

The Interstate (Canyon) field of Sutton County gained its sixth well with compltion of Ike Lovelady, Inc., of Midland No. 1 West.

The well earlier had been completed as the discovery well of the Inter-state (Ellenburger) field. It will be dual produced.

It is 1/2 mile east of Canyon production and complted for a calculated absolute open flow potential of 4,276,-300 cubic feet of gas per day, through perforations from 2,944 to 2,960 feet and from 2,972 to 2,980 feet.

Location is 660 feet from north and 1,980 feet from west lines of section 5, block V-26, E. B. Titus survey.

William Perlman of Houston No. 1 Lillian M. Hudspeth Memorial Hospital "I" is a new well in the Whitehead (Strawn gas) field of Sutton County, 16 miles west of Sonora.

Scheduled as a project in the Sawyer (Canyon gas) area, it finaled for a calculated absolute open flow potential of 290,000 cubic feet of gas per day, through perforations from 7,564 to 7,627 feet. The pay was aci-dized with 3,100 gallons and fractured with 14,850 gallons.

Location is 850 feet from north and 450 feet from west lines of section 54, block IJ, TC survey and 5./8 mile west of other Strawn gas production.

IRION OILER

producer.

Meadco Properties of Midland No. 2-11 E. Sugg is a new well in the Taos (Canyon oil) pool of Irion County, 26 miles north of Barnhart. The seventh well in the field, it is 5/8

mile north of the closest other Canyon

It finaled for a daily fklowing potential of 45 barrels of 4015-gravity oiland 10 barrels of water, with a gas-oil ratio of 1,044-1.

Completion was through a 1/4-inch choke and perforations from 7,123 to 7,172 feet after 1,500 gallons of acid and 40,000 gallons of fracture fluid.

Drilled as a wildcat, it is bottomed at 7,500 feet, 41/2-inch pipe is set at total depth and hole is plugged back to 7.260 feet. Location is 2,000 feet from north and 660 feet from west lines of section 11, block H, TCRR survey.

20, block 27, H&TC survey. Tucker Drilling Co., Inc., of San Angelo reported potential test on its

ratio of 1,614-1.

plans to offer a stock issue of 150,000 shares at \$400 a share -- that's \$60 million -- to expand the operation so that it could supply the electrical needs of about 200,000 homes according to Joseph Leary, a member of the board of directors.

The firm is called OPEC -- Organization of Parr's Energy Concept -- a deliberately contrived acronym link to the Organization of Petroleum Exporting Countries, the oil cartel that's been jacking up the world's energy costs, Leary said.

The editor of the Sonoma County Stump, a weekly newspaper in Forestville, Calif., Leary also said his group is interested in the environmental aspects of Parr's energy plan. Admitting to a strong anti-nuclear sentiment, Leary said Parr's waveaction project "won't pollute anything.

Parr, however, is more interested in seeing his design become a fullscale reality. No newcomer to the field of invention -- he holds 40 patents, including one for the Minuteman missile guidance activator -- he realizes the need for development money

"They are the first ones with the money to start out with," Parr said. Leary said the first phase of the

Such a wave-action plant, Parr

Pioneer announces oil, gas strikes

AMARILLO - Pioneer Production Corp. announced the test results of two discovery wells, a gas discovery in Red River Parish, La., and an oil discovery in Brazoira County.

The gas discovery, the No. 1 Justin L. Teer, is completed in the Cotton Valley formation, with perforations from 12,001 to 12,017 feet. It produced at a rate of 2.8 million cubic feet of gas per day through an 8/64-inch choke, with a flowing tubing pressure of 8,480 pounds per square inch. During initial testing, a shut-in tubing pressure of 8,915 pounds was record-

A confirmation well is drilling below 5,000 fest toward a total depth of 12,300 feet.

Pioneer Production, a subsidiary of Pioneer Corp., and the other owners of the well have approximately 11,000 acres under lease in the prospect area

Pioneer Production owns a 25 percent working interest in the discovery well, the well now drilling, and the leases. Other owners are Amerada Hess Corp. with 50 percent, and Inexco Oil Co., with 25 percent. The oil discovery is the No. 2A

Williamson, which flowed at a rate of 384 barrels of oil per day through an 11/64-inch choke with a flowing tubing pressure of 2,050 pounds. The well is completed in the Frio F-4 sand with perforations from 10,265 to 10,272 feet.

Pioneer Production owns a 331/3 percent interest in the well. Murphy H. Baster, the operator, and individuals own the remainder. Prioneer Production and the other owners hold approximately 2,700 acres in the immediate area.

IRION OILERS

ARCO Oil & Gas Co. No. 1-44 R. F. Mayer and No. 1-56 R. F. Mayer have been completed in the Irion County portion of the Spraberry Trend Area, three miles north of Barnhart.

No. 1-44 R. F. Mayer, 1% miles south of other Spraberry production, completed for a 24-hour pumping potential of 65 barrels of 38.7-gravity oil and seven barrels of water, with a gas-oil ratio of 738-1.

Completion was through perforations from 4,504 to 6,260 feet after 3,000 gallons of acid and 84,600 gallons of fracture fluid.

Wellsite is 760 feet from south and 660 feet from west lines of section 44, Washington Co. RR survey.

ARCO reported a 24-hour pumping potential of 48 barrels of 38.7-gravity oil and 15 barrels of water on its No. 1-56 R. F. Mayer. The gas-oil ratio is 750-1

Completion was through perforations from 4,313 to 6,198 feet after 3,000 gallons of acid and a 94,500-gallon fracture job. The well is two miles southeast of

other Spraberry production and 660 feet from north and east lines of section 56, Washington Co. RR survey. ****

Fortune Production Co. of San Angelo No. 1 Murphey is a new well in the Irion County portion of the Cal, South (Canyon) field, nine miles southwest of Mertzon.

On 24-hour potential test it flowed 78.7 barrels of 41.2-gravity oil and 10.9 barrels of water, with a gas-oil ratio of 2.546-1.

Completion was through a 1/4-inch choke and perforations from 7,027 to 7,125 fet after a 1,000-gallon acid treatment and a 66,500-gallon frac-

ture job. Wellsite is one location northeast of other Canyon oil production and 560 feet from north and 467 feet from west lines of section 1219, GC&SF survey.

Irion County, 19 miles northwest of Mertzon, gained a new well with com-pletion of Indian Wells Oil Co. of Ozona No. 1-60 Harris.

Operator reported a 24-hour flowing potential of 35.7 barrels of 37.3-gravity oil and 21 barrels of water, with gas-oil ratio of 5,434-1.

Completion was through a 12/64inch choke and perforations from 6,-678 to 6,743 feet after 4,000 gallons of acid and 60,000 gallons of fracture fluid. Wellsite is 467 feet from south and

west lines of section 60, block 6, H&TC survey. ****

Indian Wells also completed its No. 1-1 Phillips in the Irion, West (Canyon oil) field of Irion County, five miles southwest of Mertzon.

gas-oil ratio of 250-1. The flow was gauged through a 20/64-inch choke and was from perforations at 5,804-5,806 feet.

Wellsite is 990 feet from north and 330 feet from east lines of section 13,

IF I COULD ONLY TOUCH HIM

One day Jesus went out into the mountains to pray, and prayed all night.

At daybreak He called together His followers and chose twelve of them to be the inner circle of Hisdisciples. (They were appointed as His "apostles," or "missionaries.")

Here are their names: Simon (He also called him Peter), Andrew (Simon's brother), James, John, Philip, Bartholomew, Matthew, Thomas, James (the son of Alphaeus), Simon (also called "Zealotes"), Judas (son of James), Judas Iscariot (who later betrayed Him).

When they came down from the slopes of the mountain, they stood with Jesus on a large, level area, surrounded by many of His followers who, in turn, were surrounded by the crowds. For people from all over Judea and from Jerusalem and from as far north as the seacoasts of Tyre and Sidon had come to hear Him or to be healed. And He cast out many demons.

Everyone was trying to touch Him. For when they did healing power went out from Him and they were cured. Luke 6:12-19

Invention detects 'hot spots' in wires

DALLAS (AP) - George Spencer hasn't built a better mousetrap. But the world may be beating a path to his door anyway when he finally gets his invention plugged into the marketplace.

By simply reading two meters on the face of a plastic box plugged into a wall outlet, Spencer says he can tell whether the electrical wiring is faulty, thereby preventing a possible blaze in a home or office building.

'The thing that impresses me is that he (Spencer) can walk into any building, old or new, and tell you whether the wall outlet is safe to operate," said Dennis Griggs, a Dallas patent attorney.

Griggs said he received a bit of a shock himself when Spencer plugged in the invention at the attorney's of fice and found that the wiring behind an outlet could not safely carry electricity to a space heater without causing serious stress to hidden wires.

"I was surprised that a couple of our outlets are underrated for a heavy electrical load," Griggs added.

Electrical fires in Dallas caused more than \$3 million in damages over the past year, said Dallas Fire Marshall Jerry Lambert.

Spencer, awaiting a patent and a sponsor for his device, says the invention could prevent some of those fires

visual inspection.

suburban Plano. Spencer said lightning traveled through the house without damaging any appliances and ap-parently without harming the wires, according to an inspection by the

Plano Fire Department. Spencer said he asked the firemen about verifying that the wiring was safe and found that there was no reliable detection device.

The fire inspectors told me that within three to six months of lightning striking an area, there typically was a house fire," Spencer said.

The recent boom in home insulation has compounded the problem of natural aging since most insulation is laid over wires, creating a thermal-blanket effect that causes the wires to overheat, he said.

Spencer, who began his electrical training in the Navy and now works for Adar-Scientific-Atlanta, Inc., says he is not using scare tactics to promote a potential money-maker in the fire prevention business.

His own home was heavily damaged by fire after a child playing with a candle set the blaze. Though no one was injured, Spencer says he frequently thinks of the lives lost in other fires.

Turning to a page in a report issued by the National Commission on Fire Prevention and Control, Spencer pointed to a photograph of the charred body of a child still huddled by detecting "hot spots" in wiring against a dresser in a burned-out which ususally cannot be found by bedroom. He said he learned that after light-"I remember this when I think of ning struck the home of a friend in quitting," he said.

Mediation urged in fish dispute

SANTA FE, Texas (AP) — Involv-ing the Ku Klux Klan in a dispute between native Texans and Vietnam refugees competing for shrimp in Galveston Bay will not solve any-thing, said a member of a governor's task force.

"It is unfortunate that the Klan has been brought in," said Dr. Nguyen Van Chau, a member of Gov. Bill Clements' task force set up to try to mediate the long-simmering quarrel between the two groups of fishermen.

Texas Klansmen sponsored a rally near this South Texas community Saturday to show their support for the Texans in the dispute.

Native fishermen claim the Vietnamese do not respect customary fishing grounds and overfish the bay, causing economic hardship for the old-timers.

The U.S. Justice Department has tried to mediate but the dispute erupted into a shooting incident last year that killed one man.

Saturday's rally was highlighted by a fish fry, a cross-burning, the burn-ing of a mock Vietnamese fishing boat and uniformed Klansmen standing guard with rifles at the approach to the remote rally site.

"Violence cannot resolve anything at all, and threats from one side or another will not help anything," Van Chau said Sunday from his home in Beaumont.

Texan Gene Fisher told the 300 people at the rally that he asked the Klan to get involved in the dispute to get publicity for the Texans' side of the

story. He said his movites were not racial but economic, as he feared the Vietnamese would drive the Texans out of business

Said Van Chau, "It's true, fisher-men along the Texas Gulf Coast are facing real disaster in the next year or two. But the problem is due to factors such as inflation, the cost of fuel, not being able to fish in Mexican waters and a reported depletion of the shrimp population in the Gulf. Those are the major problems, not the Vietnamese.

"These people are a very minor factor, but some ... blame everything on them," Van Chau said. "Burning a cross or boat, or claiming that they are Communists is ridiculous." 'What Gene Fisher and his collegues want, I do not know," Chau added.

What Fisher says he wants is "the attention of the state department and the federal government and I want them to understand how we are hurt-ing along Galveston Bay."

"There are no fishermen that I know of that are KKK members, but this is one way to get people to listen to our plight," Fisher added. As he spoke, Klansmen prepared a

large sack-wrapped cross to be

burned along with a small boat. "The best thing that could happen would be if we could take 7,000 Vietnamese fishing boats, hook them all together, put them behind an aircraft carrier and tow them back home,' Fisher said.

Youths may have set fire to club

DUBLIN, Ireland (AP) - Ninety detectives are questioning survivors of the Dublin nightclub fire that killed 48 people, checking reports that the blaze could have been started by youths with a grudge setting fire to chairs.

An off-duty fireman who was working at the Stardust Cabaret as a bouncer, John Fitzsimons, told officers at least two youths were seen setting fire to some stacked foam-backed chairs, a police spokesman said Sunday.

The spokesman said there were reports the youths, who he said had not been identified, could have had a grudge against the club, but he did not elaborate.

Other sources said the club refused to admit persons if considered troublemakers. But the manager refused to say if anyone was turned away Friday night, when about 800 people jammed the Stardust for a "Dance the Night Away" Valentine

party. The Sunday Tribune said five girls reported they saw youths lighting the padded chairs with matches just before the fire began to spread near the stage of the club early Saturday.

A 19-year-old waitress, Elizabeth Marley, said she saw two chairs afire and ran for help.

"I told the barmen and the bouncers and between 12 and 15 of them rushed to the fire and tried to put it out with fire extinguishers," she said. "One of them opened a fire prevention screen and the flames just leapt out across the ceiling."

Witnesses said thick black fumes filled the nightclub within four minutes and burning plastic dripped from the ceiling on the panic-stricken young men and women trying to flee. Officials had believed 49 people were killed, but a

only 48 bodies were found. However, the mother of three teen-agers who were in the club, 40-year-old Mary Coyne, died of a heart attack when told her son and two daughters were safe.

"The strain must have been too much for her," a neighbor said.

By Sunday night the bodies of 15 victims had been identified, all in their teens or early 20s. Police said many of the others were so badly burned it might be impossible to identify them. Authorities believed no foreigners were among the dead.

More than 130 others were injured. Eight were in Etiquette critical condition. "This fire comes to no great surprise to me," said

Michael Maguire, the chairman of the Fire Officers

Bra plant reopened

BUFORD, Ga. (AP) - The Lovable C. bra manufacturing plant was reopening its doors today after health officials determined natural gas leaks and stale air caused the mysterious illnesses of 45 work-

The plant was closed Thursday when employees began getting ill for a second time in less than a week

Company spokeswoman Trudy Piper said investi- that Mrs. McBride, 36, gators from federal and state agencies would moni- was fired last year from tor the plant once it reopened. But she said the her job as a sales clerk

police spokesman said pathologists established that Association. "The association has been warning that this could happen, and has been making representations to the Department of Environment for many years on proper fire regulations.

The firemen's organization and the Fire Prevention Council said building regulations to increase the use of flameproof materials were proposed five years ago, but the government had not put them into effect. Firemen said the proposed code would have outlawed the foam-padded chairs and polyurethane ceiling which gave off choking gas as they burned.

adviser quits

mayor on the proper etiquette for dealing with foreign dignitaries, has resigned her \$35,000-ayear job, Mayor Jane

Byrne says. The resignation followed published reports

Striking teachers jailed

RAVENNA, Ohio (AP) - Seventeen striking teachers and a union negotiator were sent to jail Sunday night when they refused to sign personal recognizance bonds and stop picketing classrooms, authorities said. The teachers were sent

weeks. to Stark County Jail amid a sit-down protest by some 25 people who attempted to block a bus being used to transport the teachers.

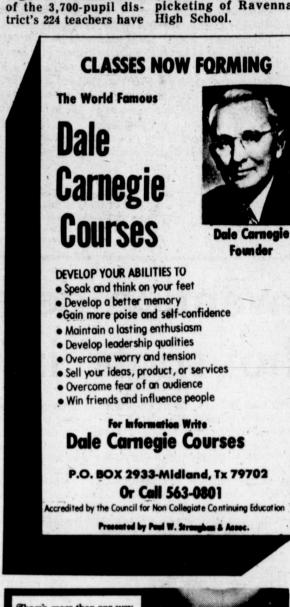

The husband of one striking teacher was arrested on charges of obstructing justice, resisting arrest and assulting an officer, but was later freed on bond.

One teacher was slightly injured in the scuffle between the man and police. The teacher was treated at a hospital and released.

The jailed teachers were 17 of 25, plus union negotiatior Richard Schneider, who were cited last Monday for mass picketing at Ravenna High School. Portage County Common Pleas Judge Joseph Kainrad told the teachers they could remain free if they signed \$1,000 personal recognizance bonds and agreed to stop picketing.

Ravenna Education Association President Alan Balog said Sunday that the eight teachers who signed the bonds did so for personal reasons. "There are some people who had commitments. and for them, jail was the last step," he said. The teachers will be held in jail at least until Tuesday, because of the President's Day holiday

today.

Each citation was is- stayed away from classsued separately and each rooms despite two backto-work orders and a teacher, plus Schneider, picket limitation order must receive an individissued by Kainrad. The ual hearing. If Kainrad's first contempt charges court docket is crowed, some of the teachers were filed last week after school superintendent Jim Coll signed commay not be assigned a court date for days or plaints against 29 teachers he identified from The Ravenna strike those involved in a mass began Nov. 12. investigators have determined that health hazards because of tardiness and no longer exist at the building where 515 employees work.

Workers first became ill on Monday last week, when some 20 employees were sent to hospitals after complaining of headaches and nausea when a forklift struck a natural gas heater and caused a leak. Three days later, the plant was closed when 25 to 30 workers were dispatched to hospitals with similar

symptoms. None of the workers remained hospitalized for more than a few days. In a prepared statement issued Saturday, the company said, "The results of the investigation

today suggest the episodes of illness may have been triggered by a combination of two minor natural gas leaks and stale air."
