Welch outlines proposed actions

By LANA CUNNINGHAM Staff Writer

County Commissioner Charlie Welch advised The Reporter-Telegram today of proposals he intends to make before the other commissioners at their regular meeting on Monday in the Midland County Court-

He said a statement he has issued is the result of about two months of meetings with the Midland City Council over problems with the sewer treatment plant, a rising water table and effects of both upon city and county residents. Primarily, he has been focusing his attention on the health of Midlanders.

Welch explained the reason for his concern. "It is time the citizens of Midland became aware of some facts about the sanitary facilities of the city. The so-called sanitary landfills and the sewage treatment ponds are

adjacent to each other. The requirements for such installations call for a type of soil that will allow no more than one-tenth of a foot per year. percolation of water. The soils in this area are highly permeable; therefore, the year-after-year saturation has raised the ground water almost to the surface," he explained.

"THIS MOUND OF WATER, along with trash from the landfills and solids from the sewer have, in my opinion, restricted the flow of the underground river, causing water to back up Midland Draw. In spite of this problem being evident for several years, the city did, in 1979, apply for and receive a permit to only primary treat this sewer water."

Welch related his interpretation of that permit.

"This permit requires the water to take 21 days from the time it enters the ponds until it reaches the irrigation pumps for distribution on alfalfa fields, at a specified amount per acre. If they (city) could, in fact, put all the 5.8 million gallons they admit to producing each day into the ponds, and if all pumps connected to the ponds were operating at top efficiency, approximately 5 million gallons could be taken out.

"However, for many months in 1980, only one small pump that could pump approximately 1 million gallons a day was pumping out of the ponds. Therefore, two county roads were destroyed by water flowing over the dikes, out of the ponds and then down the draw until it ponded under many acres of pecan trees. I estimate about 1 million gallons a day flowed out, leaving three gallons per day to percolate into the underground aquifer with the balance evaporated. Cries for relief from the citizens and county fell on deaf ears."

WELCH, WHO HAS BEEN commissioner of Precinct 2 since 1969, proferred that, "It is my personal opinion that the City acquired the permit knowing full well they could not abide by it, in total disregard for the health and property of the people.

"Several actions are imperative to begin correcting the situation," he suggested. These include: 1. Start treating the sewer water to

the highest grade effluent possible with the present equipment, and begin engineering for a better treatment plant.

2. Several so-called monitor wells

near the landfills must be plugged at the depth of the landfills, or the bottom of the top water formation.

3. A portable treatment plant must begin immediately to pump the water out of the landfill area and purify it.

4. A pipeline must be constructed to take the water out of this area

5. All wells in the area should be pumped until the water table is lowered below the landfills so they can be dug up and hauled to a legal location.

At the last joint city-county meeting on Feb. 26, Welch opposed a study suggested by Ed Reed and Associates for a long-term investigation of the flowing water in the county and the rising water table. The City Council and County Commissioners approved paying for the study on a joint basis. Welch was against the proposal for this reason:

"IN MY JUDGMENT, our citizens need a second opinion on this matter if, for no other reason, than the fact that simple prudence demands it. That, basically, is the issue to be placed before the Commissioner's

(See WELCH, Page 1A)

"It is my strong personal feeling that we may have a terrible problem, which, unless immediately rectified, threatens the health and well-being of virtually this entire area."

- Charlie Welch

Administration may ask more defense funds

By W. DALE NELSON Associated Press Writer

WASHINGTON (AP) — The Reagan administration, finding support in Congress for its proposed \$32.6 billion buildup in military spending through 1982, is promising to seek even more money for defense if it fails to tame inflation. Secretary of Defense Caspar Weinberger, outlining a budget he said would make "a major start on meeting needs too long unmet," said Wednesday he

would submit a supplemental request if prices of military hardware increase beyond the administration's estimates.

"We have to keep this program intact, absolutely." Weinberger told the

"We have to keep this program intact, absolutely," Weinberger told the Senate Armed Services Committee.

. Under questioning by Sen. John Warner, R-Ya., Weinberger conceded the revised defense budget envisions lower inflation than the Carter administration's forecast, which he previously said was underestimated.

But he said it is "fair to assume a lower (inflation) rate" if President Reagan's proposed tax cut and domestic spending reductions are enacted. The Reagan administration predicts inflation will drop steadily to 7.2 percent in 1982 and 4 percent in 1986 as the president's economic recovery program

takes hold. It was 12.4 percent last year, and the Carter administration's last forecast was for 9.6 percent in 1982 and 6 percent in 1986.

"If what we hope does not come to pass and we are not able to reduce inflation

and don't get the cuts we are seeking, then I will have to present you with a supplemental," Weinberger said.

Members of the committee generally welcomed the budget increase, which

would pay for an expanded Navy, a new bomber, a new kind of nerve gas and substantial pay raises for military personnel.

"There is no doubt that increased resources are required," said Sen. John Tower, R-Texas, the committee chairman.

Sen. John Stennis, D-Miss., the senior Democrat on the panel, told Wein-

Sen. John Stennis, D-Miss., the senior Democrat on the panel, told Weinberger, "I believe you will get your money this year," and Sen. Strom Thurmond, R-S.C., said the additional spending is "absolutely essential."

Tower indicated he wants the Pentagon's major budgets approved by Congress before there is any backlash about cuts in domestic programs.

Democrats display displeasure with economic plan

By CLIFF HAAS Associated Press Writer

WASHINGTON (AP) — President Reagan's honeymoon with Congress is wearing thin although Democrats, wary of being cast as obstructionists, are sticking with their public pledges of cooperation with his economic plan

"We aren't ready to play hardball yet," House Speaker Thomas P. O'Neill Jr. said. "We're not obstructing, we're going along."

Nevertheless, by a growing number of actions, Democrats are demonstrating their displeasure with many

aspects of Reagan's package.

For example, the House Budget Committee called the inspectors general of several federal agencies to testify today on the billions of dollars in government "waste, fraud and abuse" Reagan decried during the presidential campaign.

"We're going to tell them (the administration) where it is," said a Democratic source, who asked not to be identified.

Critics of the president's program have said it does not show how to recover money lost by government inaction on audits and inadequate collection of delinquent loans and overdue debts.

They say simply eliminating waste and stepping up collections would eliminate the need for deep cuts in several social programs.

In the Senate, where Democrats are the minority party and thus cannot call formal committee hearings, the Democratic Policy Forum has launched a series of meetings to hear from opponents who complain the proposed budget cuts would cause more unemployment, hurt education, lessen the quality of health care and threaten the well-being of the elder-

Sen. Edward M. Kennedy, D-Mass.,

chairman of the forum, said the group's hearings Wednesday were the first of a series "on the challenges before America."

"We will explore the most pressing issue facing this committee — the equity and effectiveness of the proposed Reagan budget cuts," Kennedy

The forum consists of Democratic members of the Senate Labor, Health and Human Resources Committee.

Sen. Gary Hart, D-Colo., a member of the Senate Armed Services Committee, was due to make a speech on the Senate floor today outlining a

substitute for Reagan's plan to nearly

double the Carter administration's shipbuilding program, with an additional 15 Navy ships to be financed in 1982 as a start toward expanding the American fleet from 456 ships to 600.

At the other end of the Democratic spectrum, members of the House Conservative Democratic Forum, were having breakfast at the White House today to present Reagan a package of spending cuts exceeding what he has already requested.

Meanwhile, House Democrats and Republicans took political swipes at each other Wednesday.

Representatives of the 52 House Republican freshmen met with Reainto the press briefing room to tell reporters they thought O'Neill was playing politics by not moving more swiftly on Reagan's program of tax and spending cuts.

gan at the White House and emerged

Back at the Capitol, O'Neill told reporters the reaction of the freshmen Republicans was "understandable."

Earlier Wednesday, House Democratic aides had let it be known that several Democrats would be on the House floor making brief speeches attacking administration economic plans.

Escalation in El Salvador hinges on Soviet action

WASHINGTON (AP) — Secretary of State Alexander M. Haig Jr., dismissing a call to draw the line now on aid to El Salvador, says any further escalation of U.S. involvement depends on what the Soviet Union and Cuba do.

The possibility of additional aid, Haig said Wednesday, "will depend largely on the willingness of Cuba, the Soviet Union and those associated with them to continue to intervene illegally in the affairs of the member states of this hemisphere."

"Specifically, Haig refused to say whether U.S. aid would stop with 20 additional military advisers and \$25 million in new military assistance. "It would be foolish to attempt to do so," he said.

so," he said.

The administration has accused Cuba and other communist nations of complicity in smuggling at least 200 tons of military supplies to leftist

insurgents in El Salvador.

"This is no longer an acceptable or tolerable kind of activity in this hemisphere," Haig declared after a closed Scenato briefing.

Senate briefing.

Earlier, the No. 2 Democrat in the Senate said the Ceagan administra-

tion should supply no military assistance to El Salvador beyond the 20 additional advisers and \$25 million in aid.

"Enough is enough," said Sen. Alan Cranston of California, the assistant Democratic leader in the Senate. "In the interest of protecting American lives and avoiding deeper and more dangerous U.S. involvement in the fighting in El Salvador, we must draw the line somewhere.

"And as far as I'm concerned, this is it."

Cranston said Congress is unlikely to block the extra advisers and military aid, "but whether some people will try or not I don't know."

Haig and White House Press Secretary James Brady, meanwhile, denied a Salvdoran rightist leader's statement that the United States wouldn't oppose a military coup in the Central American Republic.

Brady called that "pure fiction."
"We are in support of the stability
of the current government of El Salvador, and anything that can be done
to make sure that reforms are carried
out and elections held," Brady told,
reporters.

Upward expansion suggested by panel studying courthouse

By ED TODD Staff Writer

A blue ribbon ad hoc committee suggested an upward proposal — not just outward — in trying to help the Midland County Commissioners' Court solve the county government's expansion problems.

The committee, conceived by Commissioner C. DeWayne Davis, was appointed Feb. 23 by the county commissioners and Judge Bill Ahders to drum up proposals on a new Midland County Courthouse annex building and a new or expanded library.

"How about going up?" committee man Reagan Legg said in proposing that the downtown courthouse grow like a skyscraper.

"When they put that fifth floor on (in the early 1970s), that was the maximum," speculated John Hyde, committee chairman. "That's possible (going up), too." It's more than possible, Clark

Moreland, former county commissioner, suggested later in the meeting.

MORELAND SAID that the courthouse, built in 1929-30 and renovated in the early 1970s, was designed and built to support eight stories. He suggested that three additional stories might provide adequate space for the county's 24 offices and 200-plus employees. That fifth floor added in the

early 1970s was the jailhouse.

The committee also hashed around other proposals, earlier discussed by the commissioners, to solve space problems. For several years, the commissioners have been laboring over what to do about needs for an enlarged library and more space for county government.

The committee considered building a courthouse annex on or along a segment of Baird Street between Illinois and Texas avenues.

Another proposal included buying or leasing the abandoned Sears, Roebuck & Co. building in Town & Country Shopping Center in central Midland. Sears has relocated to Mid-

land. Sears has relocated to Midland Park Mall.

"We have got to use foresight," regardless of the route taken," said Legg, a lawyer who has seen Midland grow from a town of 19,000 to 55,000 or 56,000 in a four-year period in the 1950s. "That was the (oil) boom era before this last one."

"I think we ought to plan for a town of 200,000," said Moreland.

"My experience has been that the people of the county will support anything that's worthwhile, that is needed," Legg said.

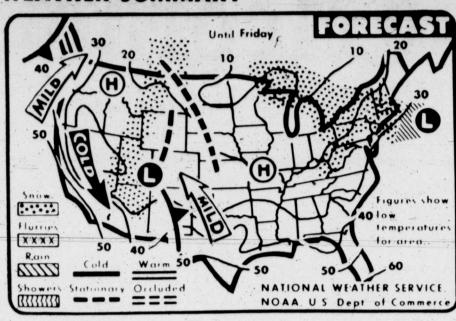

THE COMMITTEE again considered the annex and, as is the practice now, the placing of county offices in two major buildings. Such measures would not be as convenient to the taxpayers, who might have to walk a distance to take care of "county business," as would one building housing all county functions, excluding the county's Road and Bridge Department.

"If we're going to have a big town," said Moreland, "we're going to have to do like they do in big towns.... People are going to have to learn to walk

Collateral found to be counterfeit

AMARILLO, Texas (AP) - An Amarillo bank president resigned his post after learning the South African gold coins he accepted as collateral for \$270,000 in loans were counter-

However, federal agents say Robert Ringo, former president of Tascosa National Bank of Amarillo, was only one of a number of people duped by a counterfeit operation that has sold the fake Krugerrands in Houston, Austin and Amarillo.

Investigators have confiscated gold-plated lead coins with a counterfeit value of almost \$1.5 million in Amarillo and about \$70,000 worth in Houston, said Secret Service agent David Freriks in Lubbock. He said some fake coins have turned up in the Dallas-Fort Worth area and agents are aware of sales in Austin.

Besides the Tascosa National Bank, agents-say another unidentified lending institution in Houston authorized a \$35,000 loan with fake coins as collat-

Ringo abruptly submitted his resignation Wednesday, which the bank's board immediately accepted.

"I made a loan secured by a gold Krugerrand that turned out to be counterfeit. That's what it's all about," Ringo said, adding he made four loans totaling \$270,000.

Federal agents say they still cannot account for about 300 of the fake coins that were being sold for \$200 to \$350 each. The value of a genuine Kruger rand - a 1-ounce, all-gold South African coin - fluctuates with the price of gold and currently is about \$588.

Sidney James Heard, 38, of Amarillo, was released on \$10,000 bond after he was charged in Houston with theft over \$10,000 in connection with the alleged sale of fake Krugerrands,

Houston police became involved when a coin dealer called to say he was suspicious of Krugerrands he was offered for \$350 each. Detectives watched the purchase of 100 of the coins for \$35,000, then arrested Heard at a bank.

Secret Service agents say no arrests have been made in the Amarillo

Federal authorities were tipped last fall by a suspicious jewelry manufacturer in Austin, who said he thought he was stamping out the lead coins as costume jewelry

Agents say the coins were shipped to Amarillo, where they were plated with .22-carat liquid gold, then put in cardboard and plastic coin protectors to prevent the gold from rubbing off.

Freriks said those who were duped should have known that Krugerrands do not come in protectors:

Freriks said the real Krugerrands weigh twice as much as the fake ones. are shiny and ring when dropped while the counterfeits have blurred details and sound flat when dropped.

A federal grand jury in Amarillo is expected to hear evidence in the case March 25, Freriks said.

The committee also considered the

Welch outlines proposed action on sewer treatment, landfills

(Continued from Page 1A)

Court this coming Monday. "It is my strong personal feeling that we may have a terrible problem, which, unless immediately rectified, threatens the health and well-being of virtually this entire area. I want an outside firm, which has no previous opinions or decisions in this matter to support, to come and analyze this problem.

The Reeds have been the hydrolo gists employed by the city in the past for studying water-related projects.

"I say this without meaning to comment in any way upon any person or firm's competence or integrity," he stressed. "It is simply that the stakes are too high; we just cannot afford to be wrong. It is my personal belief that the extra expense of such a study will

discourage the Commissioner's Court

from authorizing it. I am calling every citizen to come to the Court, or contact his or her commissioner prior to the meeting in an effort to show that, in this particular instance, we must secure a second opinion in spite of the expense, and that we must do it now," Welch said in outlining his alternate plan.

'Therefore, on Monday, I will make a motion at the Commissioners Court meeting for the county to employ a hydrologist out of Austin, with or without the city's cooperation. I will. further make a motion that the Commissioners Court request a new hearing before the Texas Water Quality Board to cancel the raw sewage permit under which the city is now operating.

EXPLAINING WHY HE is now

voicing publicly his opinion of the situation, Welch said, "I have tried quietly and diligently for years to get the city government to conduct this facility (sewage treatment plant) in a prudent manner, and move the landfills to a suitable location. The water backed up into the city of Midland tells me citizens should demand immediate action. I need their help.'

Welch, who farms land in the county, explained he has been in the water well business in the Midland Draw area since 1953. Prior to that, he worked in the business for other people. Welch recently sold his busi-

The commissioner added that he has taken courses from Texas A&M University on operating sanitary landfills and has completed the land selection portion of that training.

Upward expansion suggested

Man charged with assault

counts of assaulting private citizens in incidents that reportedly occurred prior to his arrest. Justice of the Peace Charlie Spray-

berry set three bonds totaling \$23,000 on Silvano Garcia, 27, of Mexico. Garcia was arrested as he walked eastbound in the westbound lane of traffic on Highway-80 near Midland Regional Airport Sunday afternoon.

As he was being booked into the jail, deputies said Garcia kicked Chief Jailer Richard Sexton in the groin. Sexton remained in satisfactory condition at Midland Memorial Hospital Wednesday.

Early Monday afternoon, Lt. Pat Fuller was escorting Garcia back to kicking Fuller as they neared the sheriff's department reception area on the ground floor of the court-

Sheriff Dallas Smith and Investigator Benny Matlock came to Fuller's aid and Garcia was quickly subdued and returned to his cell. Fuller filed assault on a peace office charges Wednesday afternoon. Also Wednesday, two Midland men

filed additional assault complaints against Garcia, after telling deputies he struck them during an altercation outside a trailer park near the airport just before his arrest. Garcia allegedly hit one man with a hammer and kicked the other man in the face.

Garcia remained under bond in the county jail late Wednesday. He is expected to be brought before the grand jury next week.

Three injured in Lamesa accidents

LAMESA - Three persons remained hospitalized in Medical Arts Hospital here today following two separate traffic accidents.

Listed in satisfactory condition were James Lee Tucek, 22, of Lampasas, suffering from a broken pelvis; Marvin Kadley, 37, of Austin; and Jacke Tinney, 47, of Austin.

Tucek was the driver of a southbound pickup which overturned five miles south of here on U.S. 87 at 6:50. a.m. Wednesday. According to a Department of Public Safety report, Tucek apparently fell asleep at the wheel and lost control of the vehicle when he attempted to regain the roadway.

A passenger, Harry Hendrix, 44, was treated at Medical Arts Emergency Room and later released.

Kadley and Tinney were passengers in a van containing 11 persons which overturned in the median 6.6 miles south of here on U.S. 87 at 11:35 a.m. Tuesday.

Cancer machine hearing reset

The Texas Health Facilities Commission has rescheduled its hearing for Odessa's application for a new cancer machine for April 13 and 14. The two-day hearing for Odessa's Medical Center Hospital's certificate of need application was postponed from Feb. 25 and 26 when the THFC's chairman, William Keener, died the afternoon before the hearing. Keener was found slumped in his car and pronounced dead at the scene of

apparent carbon monoxide poisoning.

Odessa plans to replace its cobalt radiation unit with a "state of the art" 6 Million Volt Electron linear accelerator. Midland Memorial Hospital officials will oppose the application, stating the installation of the machine in Odessa may financially hinder the Allison Permian Basin Cancer Therapy Center. The Allison Center, scheduled to open in late May or early June, will feature the 6MEV linear

accelerator as its "major work unit." Other Midland groups, such as the Chamber of Commerce, the City Council and Parkview Hospital, have joined MMH in its opposition to the

application. Medical Center Hospital officials claim the machine is the natural replacement for the Cobalt-80 machine which has been in use in Odessa for

A spokesperson from the THFC said this morning a new chairman has not been named, and Hearing Officer Kevin Reeves will preside at the session in April.

Man jailed for impersonating officer

A 24-year-old Midland man was in the county jail this morning on charges of impersonating a police

officer. The man was arrested at work about 5:30 p.m. Wednesday on information supplied by a woman who said the man stopped her in a lobby of the Hilton Hotel the night of Feb. 28 and searched her purse after saying he was an undercover narcotics officer with the Midland Police Depart-

ment. A badge and identification card produced by the man were phony, and the man has been involved in similar incidents, deputies said. He is expected to be arraigned on the charge — a third-degree felony - later today.

The ID card was a standard one issued by the Department of Public Safety and can be obtained by any citizen. It differs greatly from police identification cards and is normally used for check cashing purposes or buying alcholic beverages. The sheriff's department urges residents to closely read identification papers produced by anyone claiming

Moscow issues warning to new strike threat

WARSAW, Poland (AP) - After a two week lull in Poland's labor turmoil, a local Solidarity chapter called a strike alert as Soviet and Polish Communist Party leaders again raised the threat of intervention by other members of the

Soviet Bloc if "anarchy and disarray" does not end in Poland.

Leaders of the independent trade federation's chapter in Lodz, Poland's second largest city, said Wednesday that they ordered a strike alert to protest the firing of five hospital workers, four of them Solidarity organizers.

Under the strike alert, union members distribute leaflets and posters and fly Polish flags in a show of strength. Union members are to meet Saturday in Lodz, the center of Poland's textile industry, to discuss their next step.

A union spokesman said the five were dismissed without explanation, and local and national government officials failed to respond to the union's appeal for their reinstatement. He said the alert was approved by the 10-million-member labor federation's central headquarters in the Gdansk

"In this situation we believe that all possible means to solve the problemswere used, without using the last resort - a strike. So we decided to announce a strike alert," a union communique said.

It was the first strike threat since Feb. 20, when farmers in southeast Poland ended sit-ins after the government agreed to increase state aid for private

Meanwhile, Polish Communist Party chief Stanislaw Kania and the nation's premier and defense minister, Gen. Vojciech Jaruzelski, met in Moscow Wednesday with President Leonid I. Brezhnev and other Soviet leaders, including Defense Minister Dmitri Ustinov.

Tass, the official Soviet news agency, said the two delegations agreed on the 'particularly pressing" need to counter the threat to Polish socialism posed by "imperialism and internal reactionary forces hoping that the economic and political crisis in Poland would lead to a change in the alignment of forces in the

The Poles pledged to oppose "anarchy and disarray" in their country, and the Soviet leaders said they would give them "all necessary support," Tass said. The two delegations joined in a declaration that the "socialist community (of

states) is inseparable," and "defense of it is the cause not only of each state but also of the entire socialist coalition.

Kania said the same thing in a speech last week to the Soviet Communist Party congress in Moscow. The statement appeared to be a reaffirmation of the so-called Brezhnev Doctrine which holds that neighboring communist countries have the right to intervene militarily if necessary to crush challenges to communist rule in Eastern Europe.

The Kremlin used this policy to justify the Warsaw Pact's invasion of Czechoslovakia in 1968.

DEATHS George Dobrescu

Graveside services for George Dobrescu, 66, of 700 Scharbauer Drive, Apt. 215, will be at 1:30 p.m. today in Fairview Cemetery. Officiating will be the Rev. Jim Foelker of Our Lady of Guadalupe Catholic Church. New-nie W. Ellis Funeral Home is in charge of arrangements.

He died Monday at his home.

Dobrescu was born June 13, 1914, in New York City. He was reared in Romania from 1930 to 1945. He then lived in New York City and Youngstown, Ohio. He moved to Midland in 1977. Dobrescu, a disabled veteran, was a member of the Greek Orthodox Church

Survivors include a brother, John K. Dobrescu of Camarillo, Calif., and a half-brother, Charles Dobrescu of

Couple killed in second crash

GRAND CANYON, Ariz. (AP) -Two years ago, honeymooners Herbert and Anna Redd escaped injury when their light airplane went down near the Grand Canyon.

Wednesday, 10 miles from that spot, rescue crews pulled the bodies of the Salt Lake City couple from the wreckage of another plane, officials said. The plane crashed four days earlier when the couple was flying to the funeral of a close friend.

"The first crash they had, they spent the night on a ledge in the snow," said Richard Walker, a close friend of the Redds. "I was surprised that he got her back in an airplane."

Sheriff's Lt. Tom Brawley also recalled the previous crash involving the Redds, both 51.

Both crashes occurred at night during foul weather. Sunday's crash happened during a snowstorm. In 1979, the pilot encountered snow and heavy

Brawley said the Redds suffered only minor injuries when their Piper Cherokee crashed in 1979. They were flying a two-seater, single-engine Piper Colt on Sunday's flight, he

Deputies said that shortly after take-off from a refueling stop Sunday night in Page, the pilot radioed he was encountering stormy weather.

One of Redd's eight children by a previous marriage, Alan Redd of Salt Lake City, said Wednesday his father was a "fairly experienced" pilot who had logged 500 hours since he began flying five years ago.

He said his father founded Beehive International, a biomedical electronics firm based in Salt Lake City, in 1967. The firm recorded \$33 million in sales last year. Redd was on the board of directors and was a major stockholder.

Scientists discover why people drink coffee

By KEVIN McKEAN AP Science Writer

NEW YORK (AP) — Scientists have finally discovered why coffee, tea or eola can keep you alert: that shot of caffeine inhibits a natural mechanism that's trying to slow you down

"Now we know why we drink coffee," said Dr. Solomon H. Snyder at a seminar held here Tuesday by the Society for Neuroscience.

A research team led by Snyder, director of neuroscience at Johns Hopkins University School of Medicine, pinpointed the exact method by which caffeine acts as a stimulant.

He said the discovery may point the

way to improved drugs - including

an improved form of theophylline, a chemical relative of caffeine that is commonly used to treat asthma but which can be toxic in large doses.

Caffeine is "the most widely used psychoactive substance on earth," Snyder said at the seminar, which dealt with frontiers of research in the neurosciences.

It's found in coffee, tea, chocolate

and many soft drinks and foods. It's also a common ingredient in over-the-counter medicines ranging from stay-awake pills to cold remedies to pain killers.

The research, by Snyder, Jefferson Katims, Robert Bruns, Zoltan Annau and John Daly, will be published in May in the Proceedings of the National Academy of Sciences, Snyder said. For two decades, scientists have theorized that caffeine worked by inhibiting an enzyme known as phosphodiesterase, which is needed for energy production in cells. But Snyder said he began to doubt that explanation since there are other drugs which better inhibit the enzyme but which are not stimulants.

The researchers hatched a theory that caffeine might work by blocking the action of a compound called adenosine which they were already investigating.

Adenosine is one of the building blocks of DNA, and it's also involved in cellular energy. But its crucial function, as far as the Johns Hopkins researchers were concerned, was its role as a "neuromodulator" that tends to depress activity.

Even in microgram amounts, adenosine derivatives injected into the brain could bring mice to a virtual halt, Snyder said, "which makes this, in mice, more potent than LSD."

The researchers studied caffeine and a number of its close relatives, including theophylline, and showed that the stimulant effect of each was proportional to its ability to block this natural anti-activity chemical, he

The caffeine relatives worked by occupying a brain "receptor" intended for adenosine, hence preventing adenosine from doing its job.

Theophylline is taken by asthmatics to open the air passages of the lungs but it can be hazardous because of its caffeine-like stimulation of the brain and heart. But Snyder said that

if adenosine receptors in the lung differ from those in the brain or heart, as is likely, then a modified drug might be devised that would confine its action to the lungs.

The researchers have already identified two kinds of adenosine receptors, and Snyder says there may be as many as four.

The Johns Hopkins scientists also are investigating why the body has developed the natural mechanism of adenosine to depress activity. Rats which receive the chemical cease all activity, yet they remain awake, relatively alert and sensitive to pain, he said

The chemical is not especially toxic, even in large doses. Snyder said its action resembles that of a potent natural tranquilizer.

Decision may justify draft

WASHINGTON (AP) — The Army's decision to hold down the number of women in enlisted ranks is "a step backward in efficiency and justice" and may be a ruse to justify a draft, Sen. William Proxmire, D-Wis., said today.

Proxmire, a member of the defense appropriations subcommittee, commented on testimony given to an armed forces subcommittee last week by William D. Clark, acting assistant secretary of the Army for manpow-

Clark said the Army was "trying to hold the line on the number of women" pending the outcome of a study to determine how combat readiness would be affected by signing up female soldiers in the numbers the Defense Department has proposed.

Air Force personnel officials, on the other hand, told the same subcommittee Tuesday that the 61,000 women on active duty in their service are "doing a tremendous job" and their number will be increased to 64,000 or 65,000 next year. They are serving in all but four jobs that are combat roles, from which women are banned by law.

At the end of 1980, there were 61,970 enlisted women in the Army, a little over 9 percent of the total enlisted force of 669,800. The Defense Department has directed the Army to increase this to 87,500, or 13 percent, by 1986.

Proxmire said Clark "not only contravened Pentagon policy, but he in essence told American women: you can't do the job."

"The Army is just using the new administration as an excuse to deny women equal pay, promotion and enlistment rights," the senator said.

"Women have made the all-volunteer force successful to date," he added. "So maybe what lies behind the Army's change of policy is the simple decision to restrict women recruits, accept the inevitable shortfalls in manpower levels, and then justify a return to the draft."

Clark also said in his testimony, "We have got a lot of women in the Army and most of them are doing really ... fine jobs. They are valuable and productive."

An Army spokesman, asked for a response to Proxmire's statement, said the Army's decision was "prompted by indications from field commanders that combat readiness is being affected by such factors as attrition, pregnancy, sole parenthood, strength and stamina which have come to light during the recent rapid increase in the numbers of women in the Army."

What's Cooking?

Dr. Bill Trotter

Many people may think of doctors as too busy to spend much time at home with their families. And if the doctors do get some extra time with their families, most people don't picture the doctor in the kitchen. But

such is not the case with at least one local physician.

Dr. Bill Trotter, chairman of the radiology department at Midland Memorial Hospital, often dons a chef's hat in his home. Trotter said he began cooking a couple of years ago because "if you like to eat, you learn to like to cook.". He added "when men are cooks, they are good cooks because they like to eat."

He said his wife, Yvonne, is an "excellent cook, but hates it." So they share the cooking chores, "about half and half," he said.

Trotter said he does a lot more cooking when all the children are home. The Trotters have three chilren, Brooks, a senior at Texas Tech Medical School; Stacy, a senior at Texas Tech University; and Heather, a junior at Midland High School.

The following recipes for Russian Mushroom Soup were derived after Trotter and his family went to Moscow several years ago. "While at Moscow, we had this heavy, thick mushroom soup and I could not get the recipe. When we got home, I started fixing it and after several years' experience, I found a quick way to prepare it." The quick recipe follows the longer version below.

Trotter said the soup is a good way to have a filling meal without a meat. He also suggested serving Spinach Salad and fresh French bread with the soup for a delicious meal.

RUSSIAN MUSHROOM SOUP

SOUP STOCK

1 chicken carcass 2-4 lbs. beef bones 1 stalk celery, cut 1 large onion, diced

1 tbsp. black pepper 2 tbsp. salt 4 quarts water

Boil yigorously and then simmer for two hours. Cool. Discard solid fat on top. Should yield three quarts. Can be frozen for a long time in clean, empty milk carton.

MUSHROOM-ONION BASE

1½-2 lbs fresh mushrooms ¼ lb. butter or margarine 1 large bunch shallots

Slice mushrooms and shallots and sautee in butter. When fluid releases from mushrooms cover with sherry wine. Bring to a boil and then turn off

For the Russian Mushroom Soup long version, use 2½ quarts soup stock. Thicken with 6 tablespoons flour. When thick and smooth, add Mushroom-Onion base. Salt to taste. Add three tablespoons grated Parmesan cheese. Simmer 15-20 minutes and serve.

For quick Russian Mushroom Soup, mix until smooth two packages Knorr's Mushroom Soup Mix with 2½ quarts water. Bring to a boil. Add Mushroom-Onion Base. Add three tablespoon grated Parmesan cheese. Simmer 15 minutes and serve.

AT WIT'S END

'Thank you' enough

By ERMA BOMBECK

I have a recurring nightmare in which my son is getting the Nobel Prize for Science. After he is presented the award, he turns to see the entire audience on its feet clapping wildly. Finally, the applause dies down and there is a silence that lasts at least a year.

I can't stand it. I crawl to the stage on my hands and knees, tug on his pantsleg and whisper, "Say thank you!" He is 55 years old.

To a mother, "Thank you" is the ultimate in manners and breeding. It's toney...it's style...it transcends raggy underwear, knotted shoestrings and dog hairs on your sweater. It melts the hardest hearts, bends the rigid, and insures a happy death for her.

To a child, "Thank you" is something you say to make your mother let go of the cookie.

Looking back, I think my kids were under the influence of hypnosis. They'd stand there like a fire hydrant until I said the key words, "What do you say?" and then they'd respond with all the feelings of a doll with a string in its neck, "Thank you."

I could never get them to use the

I could never get them to use the word in the right place. They'd say "Thank you" for a lick off a second-hand ice cream cone

from a friend.
They'd remain mute when their grandmother gave them a check for

their birthday.

They'd say "Thank you" for a piece of auto glass and a weasel tooth.

They'd be comatose when someone

gave them a ride to the library in a blizzard.

The "Thank you" experience may be an exercise in futility, but it is one lesson that mothers never seem to give up on. They pursue it forever. The other day I said to my son, "Did you ever thank Mrs. Butler for that little bathtub toy for your birthday?"

"Mom! That was 23 years ago."
"She's probably wondering if you liked it."

"I ate it, didn't I?"

"And I don't suppose you ever thanked Aunt Mary for the atlas for your graduation."

"Why are you bringing all of this up now?" "Because I am tired and I want to

put child-raising behind me."
He lifted up the phone, dialed and finally said, "Hey, thanks a lot!"
I beamed. "You see, that wasn't so

difficult, was it? By the way, who were you talking to?"
He shrugged. "It was a recording. I forgot myself."

Country Squire play entertaining

"Do we really have the right to take another person's life?" Arlene questions, somewhat pensively

"Of course not, that's why it's called murder," replies Mitchell. And murder it is. The motive is clear. As is always true in affairs of the heart, two's company and three's a crowd.

The location is set — the Howard Johnson Hotel.

However, the party to be murdered changes with the seasons as does the fickle heart. What is consistent is the laughs as the three acts of Sam Bobrick's and Ron Clark's "Murder at the Howard Johnson's" unfolds at the Country Squire Dinner Theatre, located east of Odessa on Highway 80

Cast members include James MacArthur as Paul Miller, Patti Heider as Arlene Miller and Ray Stewart as Mitchell Lovell. All do an excellent job of carrying their roles and entertaining the audience.

The play is well balanced with each of the three carrying major roles. As a team, these actors work well together and are quite effective on stage.

MacArthur, perhaps best known for his portrayal of Dano in the television series "Hawaii Five-O," is the son of the first Lady of American Theatre and two-time Oscar winner Helen Hayes and the late newspaperman-playwright Charles MacArthur.

By the time he was 21, he had appeared in five movies, including "Kidnapped," "Third Man on the Mountain," "Swiss Family Robinson," "The Light in the Forest" and "The Young Stranger." MacArthur also co-starred in "Spencer's Mountain" with Henry Fonda and Maureen O'Hara, which later was made into the television series "The Waltons."

Ms. Heider has made television appearances on such shows as "McCloud," "I Dream of Jeannie," "M.A.S.H.," "Switch," "Holmes and Yo Yo" and "It Takes a Thief." A seasoned stage actress, Ms. Heider has had featured roles in the motion picture films "They Shoot Horses, Don't They" and "Three's

Stewart, who was born and raised in the Rio Grande Valley and is a graduate of The University of Texas at Austin, has appeared on Broadway in "The Lincoln Mask" with Eva Marie Saint and "Poatcards." He has acted in many off-Broadway productions including the long-running musical, "The Fantasticks." His television credits include appearances on "Barney Miller," "Dallas," "Benson," "Hart to Hart," "The Rockford Files," "Fantasy Island" and "Canon." His last film was Mel Brook's "Silent Movie."

For an evening filled with one liners (that Tuesday night kept the audience laughing throughout), make a reservation to see "Murder at the Howard Johnson's" by calling 563-4111. It's a pleasant way to kill an evening.

— GEORGIA TEMPLE

Dentist Mitchell Lovell, left, (played by Ray Stewart), ties up Paul Miller (played by James MacArthur), his patient and husband of the woman he loves, in the current Country Squire Dinner Theatre production of "Murder at the Howard Johnson's." Newhouse announces merger

NEW YORK (AP) - The Newhouse Organization, which publishes newspapers, magazines and books and owns broadcast outlets, today announced a merger with Vision Cable Communications Inc. of New

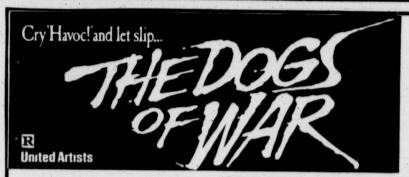

Vision Cable owns and operates 16 cable television systems with 150,000

subscribers in six states Newhouse, which already operates cable systems, would have a total of 500,000 subscribers under the merger, making it the eighth largest cable television operation in the United States.

The merger was jointly announced by Sidney R. Knafel, chairman of Vision Cable, and Donald Newhouse, president of the Newhouse group. It is subject to approval by the Federal Communications Commis-

Vision Cable will function as a distinct entity within Newhouse and will retain its top managers, the announcement said.

Newhouse brings us broad experience in the communications industry to apply to our cable television activities plus the resources to assure success," Knafel said.

'Sixty Minutes' knocks out 'Dallas'

NEW YORK (AP) - CBS' newsmagazine "60 Minutes," the most watched show in prime time last year, has toppled "Dallas" from the top spot in the networks' ratings race, according to figures from the A.C. Nielsen Co.

'Dallas' took first place from "60 Minutes" early in November, and has won the weekly competition 13 times in the last 16 weeks. Only January's Super Bowl, historically a big ratings winner, and a key 'Monday Night Football" game on ABC in December marred the program's record before last week's 60 Minutes.

Despite the setback for "Dallas," CBS was a big winner once more - for the 15th time in 18 weeks with seven of the 10 highest-rated shows for the period ending March 1.

CBS' rating for the week was 21.6 to 17.5 for NBC and 17.3 for ABC. The networks say that means in an average prime-time minute during the week, 21.6 percent of the nation's TV-equipped homes with television were tuned to CBS.

Services to be held for Bixby's son

MAMMOTH LAKES, Calif. (AP) - Private services are planned for Christopher Sean Bixby, son of the star of "The Incredible Hulk" series, who died at the age of 6. after a severe and sudden throat infection, spokesmen say.

The boy, son of actor. Bill Bixby, died of cardiac arrest less than 24 hours after he entered Mammoth Hospital for an emergency tracheotomy operation for acute epigolotitis, said Ben Halpern, a spokesman for Universal Studies Television, producers of "The Incredible Hulk" series on CBS-TV.

Epigolotitis is a severe bacterial infection of the

throat. The child was on a weekend trip to this High Sierra ski-resort with his mother, Brenda Benet Bixby, when he became ill with a sore throat Saturday.

When his condition worsened, he was taken to the hospital that night and fell into a coma following the emergency surgery. The child had no history of throat prob-

Bixby, who was at the family's Los Angeles home over the weekend, rushed the 300 miles to Mammoth Lakes when he received word of his son's illness.

Funeral plans were pending, but they would be private, Halpern

By STANLEY MEISLER the federal government. (c) 1981, The Los Angeles Times

TORONTO - For months now, the image of the dismantled oil rig has

played a key role in the bitter battling over the Canadian government's new energy policies.

Calgary oil men, Alberta politicians and western separatists have all cited the number of rigs heading south as concrete evidence of the folly and destructiveness of the federal government. The Canadian Association of Oilwell Drillers has issued periodic "industry casualty reports" on the number of departing rigs. There has

ENERGY OIL & GAS

been no more searing indictment of the federal govérnment than Canadian television's coverage of workers dismantling rigs and trucking them across the border to take advantage of favorable policies and prices in the United States.

Federal officials have long protested that the image of the rigs distorted the issue, but few Canadians listened to the protests. In recent weeks, however, there has been a reexamination of the phenomenon. Two influential newspapers, the Toronto Globe and Mail and the Toronto Star, have reached the conclusion that Ottawa was generally right - that the dismantling of the rigs had far more to do with a surplus of natural gas in Canada than with the new federal policies.

The image of the rigs is especially significant to the government of Alberta because it is trying to court public approval outside the province as it intensifies the energy battle with

Pricing policies are questioned

OTTAWA (AP) - The federal government will issue a report Wednesday claiming oil firms established a price-fixing scheme that cost consumers several billion dollars over the past 10 years, The Canadian Press

reported. It said Tuesday that all major oil companies operating in Canada are named in the seven-volume report compiled after an eight-year investigation. CP said the investigation involved more than 300,000 documents. from at least 14 oil and pipeline com-

public inquiry would be opened into the allegations within the next few months.

According to the Canadian news agency, the report of the allegations within the next of the canadian news agency, the report of the canadian news are the second of the second of the canadian news are the second of the second of

ies agreed to fix prices and it makes specific recommendations on how the practice should be halted.

CP said government lawyers examined the investigators' findings for more than a year to determine if legal action should be filed. It said they decided such action should not be taken because of existing legislation and instead suggested a public inquiry by the Restrictive Trade Practices Commission.

The investigation by the Department of Consumer and Corporate affairs started in 1973.

It was headed by Robert Bertrand and came in response to a complaint by the Consumers' Association of Canada alleging major oil companies had conspired to set gasoline and fuel oil prices.

The association said seven companies made substantially the same price increases within two or three days. Firms named by the association at that time were Shell, Imperial, Gulf, Texaco, Great Canadian Oil Sands Ltd., Sun Oil Co. Ltd., and Petrofina, recently purchased by Petro-Canada, the government oil company.

CP said the investigation was expanded to include other pricing and competition practices by the major companies.

Riestrictrive Trade Practices Commission, informed Ouellet on Tuesday that his commission will hold the public inquiry

Quellet said it will hear the evidence compiled by Bertrand and the oil firms will have an opportunity to present their case.

after hearing both sides, could decide if it should refer the matter to the Justice Department for legal action.

Taxes not a laughing matter

AUSTIN, Texas (AP) — Increased state taxes on gasoline, a suggestion laughed out of committee last Octo-Associated Press. Don Rives, executive assistant of Lt. Gov. Bill Hobby, said a gasoline tax increase had not been discussed lately in the lieutenant governor's

highway system, financed largely through Texas' nickel-a-gallon gasoline tax, is draining state revenue at a rapidly increasing pace, possibly reaching \$900 million in 1982-83.

Clayton's comments came after conferring with Gov. Bill Clements, who wanted to make a gasoline tax increase part of his legislative program but dumped it for lack of legislative support

Clements' budget director, Paul Wrotenbery, was almost laughed out of a House Ways and Means Committee hearing in October when he presented a graduated approach that would raise the tax to 10 cents by

"It's not a laughing matter any more. It is something to be looked at.

October by Minister of Energy Marc Lalonde as "the national energy program," angered both the Alberta government and the oil industry. Lalonde set wellhead oil prices at half the world price and increased the federal share of oil revenues while decreasing the share of the Alberta government and of the oil industry. On top of this,

the minister announced a plan to in-

crease Canadian ownership of the in-

dustry, now mainly in American

hands, and to encourage exploration

ON SUNDAY, ALBERTA reduced

its oil production by 60,000 barrels a

day to protest the federal policies.

Premier Peter Lougheed of Alberta

has warned that the reduction will

reach 180,000 barrels a day by Sept. 1.

Since this oil will have to be replaced

by expensive imports, Canadian con-

sumers will surely have to pay more

for a gallon of gas. The Alberta gov-

ernment wants to show that the feder-

al policies are unjust and destructive

enough to justify its desperate mea-

The federal policies, announced in

and production, mostly by Canadians, offshore and in the Arctic areas. The Alberta government objected to the program because the low prices deprived it of income and because, it said, some of the federal government's ways of collecting revenue through taxes amounted to an at-

tempt to seize ownership of the oil.

Under Canadian law, the provinces

On top of this, the Alberta government took the position that anything

own all natural resources found be-

neath their soil. that hurt the oil industry — like Canadianization and reduced income hurt the province as well, for most of the economy of Alberta is now dependent on the industry. There also was a feeling by Alberta politicians that Ottawa was trying to encourage oil production in federal controlled areas like the Arctic at the expense of the province.

The rig heading toward the U.S. border quickly became the symbol of all that was wrong with federal policies. The quick, telling image of the fleeing rig was used to demonstrate that Prime Minister Pierre Elliott Trudeau and his government in Ottawe were ready to damage the country to get their way.

In its latest "industry casualty report," the Canadian Association of Oilwell Drillers said that 60 rigs had left Canada by Jan. 31 and that 60 more were committed to leave by May 1. Insisting that this could lead to a loss of 40,000 jobs by March 1, the association blamed the problem on the new federal policies.

So did Premier Lougheed in a recent speech to the Calgary Chamber of Commerce. "The rigs, the people and the capital funds will have to go, Lougheed said, "before Ottawa will realize that it has gone overboard and destroyed an industry

District 8A Wildcats

Aminoil U.S.A., Inc., operating out of Midland, staked the No. 1 Dennis as a 8,800-foot wildcat in Borden County, 3 miles northeast of Gail.

another Vietnam-type entanglement

.over," he said.

Officials study spills attack ATLANTA (AP) - U.S. officials have developed a sophisticated attack plan to deal with oil spills, replacing the "brute strength and awkward-

ness" approach used when oil spills

first began appearing 14 years ago, a

federal environmental official says.

Kenneth E. Biglane, director of the Hazardous Response Support Division of the U.S. Environmental Protection Agency, said Tuesday that technology for dealing with oil spills has advanced rapidly since 1967. That was the year when the tanker

Torrey Canyon spilled tons of petrole-

um off the English coast, polluting

both the English and French shore-

"It was then the world realized for the first time that mankind could in fact insult large portions of the earth (with pollutants) and, secondly, that the nations of the world were illequipped to cope with such large insults," Biglane said.

Biglane was interviewed during the Oil Spill Conference, an international gathering of oil spill experts from government, academia and the oil industry. It is sponsored by the EPA, the U.S. Coast Guard and the American Petroleum Institute.

He said U.S. plans for dealing with

oil spills first were drawn up in 1968,

but at that point, "we knew infinitely more of what not to do than what to "The technology was virtually nonexistent," Biglane said. "We had some pathetic little booms ... (that were) as big around as your arm and wouldn't hold back dust on the water,

But he said private industry developed more sophisticated booms that could withstand 10-foot seas, automated skimmers to pick up the oil on the water and material called sor bents to soak up the oil. Those technological advances were incorporated over the years into a sophisticated attack plan with specif-

much less oil.'

The attack plan, according to Biglane, works this way: It begins at the source of the oil spill

ic phases for dealing with oil spills.

fall-back plans come into play as the oil advances toward shore. If oil does strike shore, the National Response Team, or its regional counterpart, will have decided in advance the priorities for clean-up — whether marshes or rip-rap or beaches or

marinas will receive primary atten-

Biglane said the attack plan worked

well during the Ixtoc I oil well blowout in Mexico's Campeche Bay, which dumped 3 million barrels of oil into the Gulf of Mexico in 1979 and 1980 and soiled some 140 miles of U.S. beaches. The response team decided to clean

several beaches, leave others alone, and use booms to keep oil out of lagunas that were nursery areas for sealife, he said. Because of cleanup efforts and heavy waves and tides from Hurricane Frederic, only about 5 percent of

the oil that reached the Gulf Coast

But if that spill had occurred a

decade earlier, Biglane said, "I am

sure that heavy equipment would

have been used, and we would have

probably torn up a lot of Padre Island,

shores remains.

and it would have taken years to Field trip planned

MIDLAND - The Permian Basin Section of the Society of Economic Paleontologists and Mineralogists will hold a one day field trip to Dark Canyon, Guadalupe Mountians, New

Mexico on Saturday, March 7. The group will examine Tansill and Capitan depositional and diagenetic facies typical of nearshore and intertidal carbonate environments. The trip wil be co-led by Dr. S. J. Mazzullo, Union Texas, Midland, Texas, and Dr. C. G. St. C Kendall, Gulf Research, Pittsburg, Pennsylva

The trip will depart from the Carlsbad Civic Center parking lot on Hwy. 62-180 at 9 AM. Bring dilute acid, drinking water, hiking boots, and sack lunches.

Stock market gains

NEW YORK (AP) - Stock prices rebounded today as the government reported factory orders slipped in January and sales reports indicated rebates are drawing buyers for U.S. autos.

The Commerce Department reported that new factory orders fell 0.3 percent in January to a seasonally adjusted rate of \$161.63 billion, after rising 2.1 percent the previous month.

All the U.S. automakers, except Volkswagen, have cut prices by offering rebates, and reports for late February showed sales ran ahead of a year earlier for all the companies except Ford. But auto issues were generally lower.

Steel issues were strong and among the most active stocks but most oil stocks were lower.

TODAY'S ANSWER

New program to help smokers quit

To help smokers quit on their own, the American Lung Association of Texas is joining lung associations nationwide in launching the new self-help pro-

gram, Freedom from Smoking.
"Developed after four years of Christmas Seal supported research and testing, the program provides a nuts-and-bolts approach to kicking the habit in 20 days," said Midlander Pearl Cobb, RN, PHN, a member of the lung association's Big Country Area Advisory Council.

'Since more than 90 percent of smokers who quit do it on their own without attending cessation clinics, a self-help approach is by far preferred by most people," Ms. Cobb said.

"The unique aspect of this program is a mainte-nance manual, which helps smokers quit for good," she said. "Tensions and events that cause backsliding in new non-smokers are anticipated. Counterstrategies for coping without cigarettes are spelled

The manuals explain ways to change and improve eating habits, reduce stress, assert feelings and produce a healthier lifestyle, while encouraging the smoker's interest in quitting.

According to the ALAT, the annual health costs of cigarette smoking to the overall economy have reached \$27 billion. Of this amount, \$5 to \$8 billion is in health care expenses; the rest is the cost of lost productivity, wages and absenteeism caused by smoking-related illness. Some studies show that smokers are absent from work because of illness 33 to 45 percent more than non-smokers

"If the questions for smokers are when and how to quit," Ms. Cobb said, "then the answers are easy. The when is now and the how is the Freedom

from Smoking program." When ordering the Freedom from Smoking materials, a contribution of \$5 to the lung association is requested to cover printing and handling costs. Contact the American Lung Association of Texas, 7701 N. Lamar Blvd., Suite 104, Austin, Texas 78752, or call (512) 458-2206.
