

THE KNOX COUNTY HERALD

VOLUME 52

KNOX CITY, KNOX COUNTY, TEXAS, THURSDAY, OCT. 17, 1957

NUMBER 46

Everyone was looking forward to the Knox City-Munday football game and it's too bad it had to be cancelled because the flu bug got too many of the Moguls... members of the Knox City Pep Club see one good thing about the cancellation.

After the game with the Stamford Bulldogs was scheduled for tonight, the pep clubbers just happened to have some "Baffle the Bulldogs" ribbons for sale... the ribbons they had printed three weeks ago, before the Moran game was cancelled!

Oil Progress Week has come and almost gone, with no special observance of the occasion in Knox City.

No special edition of The Herald, either, because the Herald staff has a hard-enough time publishing a regular edition... But we do join others in saluting an industry that plays a vital part in the economy of Knox City, as well as in the American way of life.

Did you know that in addition to the gas that makes your car go, oil products produce detergents, wax paper, beverage and food containers, cleaning fluids, floor wax and furniture polish, disinfectants and antiseptics, shampoos, hand lotions, lipsticks, rouge, nail lacquer and polish remover, nylon and dacron, and hundreds of other items?

What in the world would we women do without it!

Yep, oil is a big business... which reminds us of the story that when the first oil well was being brought in at Titusville, Pa., in 1859, another well was being drilled in New Brunswick, and that the Canadian driller, hearing of the Pennsylvania find, shut down his operation. North America, he said, could support only one well!

Our mother would be fighting mad if we said she was absent-minded... But we understand that on a trip to Houston this week, she happily remarked that she still had her purse, and told about losing it, on another trip, and having to drive back 30 miles for it.

And about the time she finished the story, she discovered she'd left her coat fifty miles back down the road!

Wesley Garrison, who was on the trip, was prepared to "hoo-raw" her about it... but he's been keeping mighty quiet—probably because, before the trip was over, he wandered into the ladies' room at a rest stop!

Hob Smith tells us that next week, Pinkard-Smith Funeral Home will be ready to announce its airplane ambulance service.

Hob says on long the trips the air service will cost about the same as by regular ambulance, and will get the patient there quicker.

Well, that's another sign of progress!

Three Men Get Two Years Each For Burglary Here

Three Graham men were sentenced to two years each in the penitentiary for entering Harbert Hotel here and taking money from hotel guests.

The three, Lanny Lee Parsons, Leroy Westerman and Billy Joe Russell, all 20, pleaded guilty to the charges before Judge L. M. Williams in 50th Judicial District Court Monday.

The men were accused of entering the hotel in July and again in September. Another youth, 14, had previously been sentenced by the Knox County Juvenile Court to a term in a reform school.

Parsons, Westerman and Russell are still in Knox County jail. Sheriff H. T. Melton said they will either be taken to the penitentiary or turned over to another county for prosecution. Charges against them are pending in several area counties.

Munday Girl Named To Represent County In Oil Queen Contest

Mary Lou Booe, 16-year-old junior in Munday High School, has been selected to represent Knox County in the North Texas Oil Progress Week queen contest in Wichita Falls Saturday.

Miss Booe will enter the district contest in competition with beauties from eight other Texas towns.

Miss Booe, daughter of Mr. and Mrs. Dan Booe of Munday, has been assistant librarian in high school the past two years. She has been a member of the Mogul Band the past three years and is playing tenor saxophone and snare drums in the band this year.

Mr. and Mrs. L. N. Bridges Sr. are living in McLean during the winter months. In a note to the Herald last week Mrs. Bridges said, "We have a place as comfortable as our Knox City home, and is nice living by some of the children." Their address is Box 6, McLean, Texas.

Cole Circus Coming To Knox City Monday

The famous Cole Wild Animal Circus will be in Knox City Monday, Oct. 21. The show will be in town under auspices of the Knox City Volunteer Fire Department.

Circus Day is always a big day for youngsters and for all those who are still young at heart.

The big white trucks and vans of the Geo. W. Cole Three Ring Wild Animal Circus will roll into town early Monday morning and move directly to the Athletic Field where the work of setting up the tents and other circus props will get under way. For all those able to get over to the show grounds Monday morning, the setting up of the circus should prove an interesting operation. The Cole Circus carries its huge "Big Top" on large truck-mounted spools, spread it on the ground mechanically, and then raises it into the air with the aid of ponderous elephants wearing special leather work harness. Stakes are driven mechanically and the big top goes into the air with amazing speed and efficiency. About 10 a. m. circus day, all of the circus wild animal cages will be open for nearly an hour's free inspection by visitors to the circus grounds. The Cole Circus has found that this morning "Free Sample" has had an excellent effect on boxoffice receipts by giving townspeople a chance to judge the quality and calibre of the show.

MUNDAY GAME CANCELLED

Greyhounds, Stamford B To Play Here Tonight

Members of the Greyhound football team, as well as coaches Les Cowan and Bob Johnson, were about ready to turn in their suits Wednesday after Munday cancelled a game scheduled for tomorrow night.

For the Greyhounds, it was the third game to be cancelled in as many weeks. A practice game with Moran was cancelled because a majority of the Greyhounds had influenza or were recuperating from the illness. Then last week's practice game with the Anson B squad was called off right at starting time. The visiting team was on hand, but only 11 'Hounds showed up to suit out.

To take the place of the Munday game Coach Cowan scheduled a game with Stamford B, to be played here tonight (Thursday) beginning at 7:30.

School Attendance Almost Normal

Attendance in the Knox City Schools was near normal Wednesday, according to E. A. Youngblood, high school principal, and Mrs. E. F. Branton, elementary principal.

Youngblood reported only three absentees Wednesday. There were five Monday and four Tuesday, he said.

Mrs. Branton said less than 20 were absent from elementary school Wednesday. Several of those were Latin Americans, out to pick cotton for their parents, the principal said.

Forty-four were absent Monday, and 23 failed to report for classes Tuesday.

School was dismissed last Wednesday, Thursday and Friday when more than 80 students became ill with influenza. Also ill were two teachers and Supt. Chas. E. Silk.

Things will be back to normal as soon as "make-up" work is completed, including six-weeks examinations, which were scheduled for last week, the principals said.

Knox Juniors Lose To Rule Kittens

The Knox City Pups' lone touchdown was made by Glendale large in the third quarter when the Pups bowed to Lueders, 21-6, at Lueders Tuesday night.

The juniors will play Rule here next Tuesday night. Earlier in the season, Rule swamped the Pups 33-0.

The Pups' game with Aspermont last week was cancelled due to the flu. Two starters, Danny Colwell and Jerry Cornett, were out of the game Tuesday night.

Large Collection Of Books Donated To School Library

One of the largest single collections of books ever received by the Knox City School Library was given to the school last week by Mr. and Mrs. E. Q. Warren.

The outstanding collection, 80 volumes in all, included Bret Harte's Argonaut edition of his complete works, 25 volumes; Washington Irving, six volumes; French novels including Maupassant, Zola, Dumas, Daudet and Goncourt, 10 volumes; Harvard Classic Shelf of Fiction in 20 volumes, including Fielding, Sterne, Dickens, Thackeray, Hugo, Scott, Eliot, James and others; Charles Kingsley's works, 14 volumes; miscellaneous volumes including Reed's Lavender and Old Lace, Hawthorne's The Marble Faun, and Holmes' The Autocrat of the Breakfast Table.

Mrs. Philip Colehour, county librarian, says the school needs books for the lower grades, especially books in subject fields.

Knox County officers investigating the burglary are seeking a man, known to have been in the town Saturday, for questioning.

Moral Power Answer To Atomic Power, Minister Tells Lions

The only answer to atomic power is moral power, Rev. Herb Barker, Rochester Baptist minister, told members of the Knox City Lions Club Wednesday.

"Instead of worrying about the Sputnik and the atom bomb," the speaker said, "we should worry more about ourselves. We cannot count on supremacy in atomic weapons, because an atomic war would see a breakdown of our society."

The minister said a man or a nation cannot be good morally outside of God. "A religious man is a man who bets his life that God exists. And if God exists, then all truth hinges on that fact, and there is no goodness outside of God."

Seniors Selling Car Floor Mats

Personalized car mats are being sold by members of the senior class, as another project to make money for the class fund.

The class is also taking orders for Manor Texas fruit cakes, with deliveries to be made in November. Officers of the class say the cakes make ideal desserts for Thanksgiving dinners, or for Christmas giving. The cakes are packaged in tin containers.

Mrs. Chas. E. Silk is class sponsor.

Leaflet Available on New Sorghum Hybrid

COLLEGE STATION. — A white-seeded sorghum hybrid, showing a very favorable performance when compared with the other hybrids, has been developed by the Texas Agricultural Experiment Station and the U. S. Department of Agriculture. Seed will be available in limited quantity for the 1958 crop.

This new hybrid, RS 630, is the first white-seeded hybrid released by the Texas Agricultural Experiment Station. In 25 tests in nine states, it yielded 67 bushels per acre—higher than

any of the other hybrids tested. It is a medium-early grain sorghum hybrid that matures in 90 to 100 days after planting. The head is well above the upper leaf and dries readily, thereby permitting harvesting soon after the grain is mature. A recently released leaflet, L-362, gives detailed information on this new hybrid. It contains sections on parentage, yield record, production of certified seed and gives a complete description. This leaflet may be obtained from the Agricultural Information Office, College Station, Texas.

County Divided Into Four Divisions for Census Purposes

as "County Census Divisions," for use in statistical reporting. Similar areas were established in the State of Washington prior to the 1950 Census, and since 1950 have been put into effect in eleven other states.

James R. Kirby of Washington, a member of the Census Staff, has been consulting with Knox County officials in regard to the proposed areas for Knox County.

The proposed Census County Divisions should be particularly useful for local administrative purposes. They are generally larger in area and population than the Justices' or Commissioners' precincts; they have clear-cut boundaries which can be easily identified; and they are intended to remain as permanent areas. For the most part they are based on the communi-

ties which serve as the focal point of each area. The statistical data for these divisions will serve as a yardstick with which to measure the sphere of influence exercised by such communities. It is believed the Census County Divisions will be a hand tool for the use of county officials, local newspapers, and business and civic organizations.

Kirby says the county divisions set up by the Bureau of the Census will not interfere in any way with the use of Justices' or Commissioners' precincts by the state or counties.

For census purposes Knox County has been divided into four Census County Divisions, which will be known as the Benjamin, Goree, Knox City and Munday divisions.

SOME WORKERS OVERLOOKING SOCIAL SECURITY ELIGIBILITY

Are you losing social security benefits? Do you know anybody who is?

Under old-age and survivors insurance you may be eligible for payments now but you cannot get them unless you apply for them. Erton F. Tate, district manager of the Wichita Falls district social security office, recently called attention to the fact that a considerable number of beneficiaries lose some of the payments they should receive simply because they do not apply for them. The most frequent case is that of the worker who is over retirement age who is temporarily or permanently laid off, according to Tate. The worker expects to go back to his old job or get a new one and quite

often he does return to work. But in some cases he is idle for a month or more. Retirement benefits for the women workers at age 62 and the men at age 65 are payable on a monthly basis under the old-age and survivors insurance program.

A test of retirement is provided by the Social Security Act to insure that only those older workers who have substantially retired from their jobs will receive old age benefits. In other words, Tate pointed out, the present law permits the payment of benefits to the men and women workers under the age of 72 for every month in the year if they do not earn over \$1200; if they earn more than \$1200 some of the checks for that year may not be payable. After reaching age 72, there is no restriction on earnings amount.

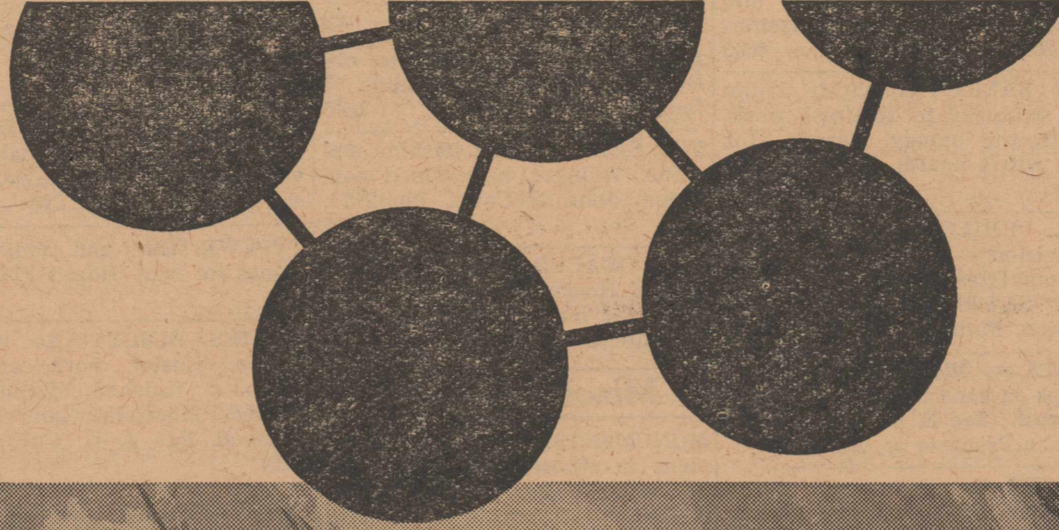

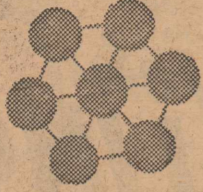

The following chart describes how payments are made and the number of monthly payments payable for those who earn over \$1200:

Annual Earnings	Monthly Benefits Payable
\$1,200 or less	12
1,200.01 - 1,280	11
1,280.01 - 1,360	10
1,360.01 - 1,440	9
1,440.01 - 1,520	8
1,520.01 - 1,600	7
1,600.01 - 1,680	6
1,680.01 - 1,760	5
1,760.01 - 1,840	4
1,840.01 - 1,920	3
1,920.01 - 2,000	2
2,000.01 - 2,080	1
2,080 or more	none

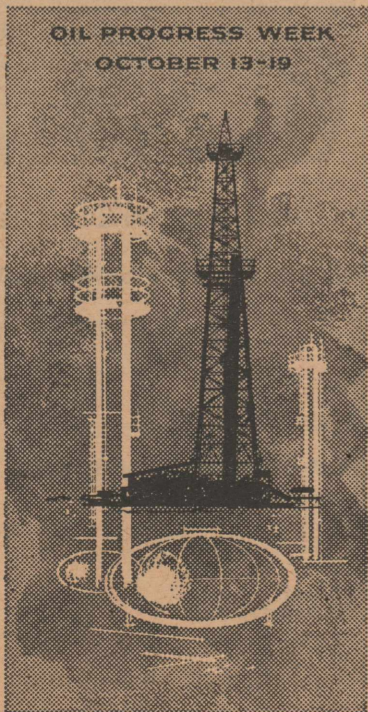

Tate gave as an example the worker who earned \$400 a month from January through June of this year. Beginning in July he earned only \$80 for the months of July through December. His total yearly earnings amounted to \$2,880. But because the worker did not earn over \$80 in wages or render substantial services in self employment in the last six months of the year, he will receive his benefit checks for all of those six months. So, any month in which a beneficiary earns \$80 or less, or any month in which a self-employed person performs no substantial services at his business, are months in which the beneficiary may receive payments from old-age and survivors insurance no matter how much he earns in a year.

After workers reach 72 years of age, they are entitled to benefit checks regardless of the amount of their earnings. However, in figuring the number of payments due in the year they reach age 72, their total earnings for the year may affect the number of payments due prior to the month they reach age 72.

Tate suggests that even if the worker earns over \$1200 a year, he may be entitled to some checks for that year and should contact his nearest social security office and get more information.

THE WONDROUS YEARS OF OUR TIME...

Man's use of petroleum — of oil and natural gas — began before the first records of history.

But petroleum's full usefulness to man has been a matter of decades only.

They have been wondrous years, those decades. Years that saw automobiles built by the millions because gasoline was available as a cheap source of power. Years that saw the oceans dwindle under the high speed of great ships powered by oil. Years that saw the evolution of a more comfortable living in homes warmed by oil and natural gas. Years that saw rubber, fibers, paints and many other useful items of everyday living produced from petroleum's hydrocarbons. Years that saw the earth shrink under the wings of the airplane, and great wars decided by the availability of oil.

Thus, the oil industry has led the way into the wondrous years of our time. The industry, through foresight, ingenuity, research, and risk-taking, has found and produced the oil required in greater quantity each year, has conserved

oil for the future, has devised the transportation systems that move oil economically, has built the refineries and plants that convert crude oil and natural gas to the hundreds of useful products needed by a growing United States.

The Humble Company, founded in 1917, has participated in petroleum's progress during four great decades, and has pioneered in the development of many current techniques for finding, producing and refining oil. This week, with the industry, Humble invites you to consider the variety and extent of oil's progress . . . Surely no other industry has contributed more to the making of modern America.

"I'm cooking dinner with my **CLEAN, AUTOMATIC Electric RANGE**"

Be Happy! Live Better—Electrically

and nothing is as **COOL, FAST and SAFE** as **Electric Cooking**—

As this modern kitchen clearly shows, today's trend is to electricity. And perhaps the best example of this is the electric range. Smart looking, convenient. Insulated on all 6 sides (as are all electric ovens) you get even, steady heat for baking and roasting. No guesswork with electric surface units either. The heat you set is yours automatically every time. And the heat goes directly into the bottom of the pan, not up the sides and into your kitchen.

But the thing you'll appreciate most is the way your electric range stays modern—year after year.

Winter Cover Crops Highly Beneficial, Specialist Says

rains and winds that characterize winter weather often rob the farmer of valuable topsoil by erosion—not to mention the hidden damage from leaching. But farmers can prevent this wintertime destruction of their land by planting cover crops.

But it must be remembered that cover crops do more than just protect the land, says R. J. Hodges, extension agronomist. These crops improve the soil itself, leading to increased yields.

Many growers have discovered that winter legumes increase their cotton yields, more than paying for the time and money spent in putting in the legumes, points out the agronomist. These cover plants do not interfere with other crops, coming at a time when farm work slows down. They are turned under to add plant food, especially nitrogen, to the soil during the slack period in the spring. Grazing, hay, silage or seed taken from the winter crop will provide other sources of income for the farm, he adds.

Annual winter legume crops named by Hodges include vetch,
