## Moorhouse Gets Conservation Award Last Week

J. C. Moorhouse of Benjamin, longtime rancher in the Wichita Brazos Soil Conservation District was recently honored at a Lions Club meeting in Knox City.

Moorhouse, winner of the 1963 outstanding conservation rancher award, was presented the award plaque by Jack Idol, chairman of the Wichita Brazos Soil Conservation District.

In presenting the award Idol cited the conservation work that Moorhouse had completed on his ranch.

Brush control, proper range use, deferred grazing, construction of ponds, and conservation cropping system were some of the practices mentioned.

In accepting the award Moorhouse gave credit to the Agriculture Agencies assisting the Wichita Brazos SCD, the Great Plains Conservation Program and the Agriculture Conservation Program. He stated that without technical assistance and cost-sharing assistance he would not have been able to carry out the conservation plan on his ranch.

Following the award presentation, H. W. Smith, district supervisor of Weinert, presented a talk on Soil Stewardship and need for continued emphasis on Soil Conservation.

Other members of the Wichita Brazos SCD Board of Supervisors are: L. D. Offutt, Munday, Arnold Navaratil, Gilliland and H. D. Gammill, Rochester.

B. Wyatt, Walton Dunlap, Dickie Mullins (body not returned, has marker), Kenneth Faucett, LaRoy Stubbs.

The committee has tried to get every veteran's name on this list, if any one knows of a name that should be on this list please contact a member of the committee. Mrs. B. B. Campbell Sr., Mrs. E. R. Carpenter or Mrs. C. C. Hoge.

## IN FLANDERS FIELD

In Flanders Fields the poppies blow—  
Between the crosses row on row;  
That mark our place and in the sky  
The larks still bravely singing fly.  
Scarce heard amid the guns below  
We are the dead—Short days ago  
We lived, felt dawn, saw sunset glow  
Loved and were loved and now we lie,  
In Flanders field.  
Take up our quarrel with the foe:  
To you from failing hands we throw  
The torch; Be yours to hold it high  
If ye break faith with us who die  
We shall not sleep  
Though poppies grow in Flanders Field.

The girls entertained their families with a covered dish supper Tuesday evening.

## Kennel Has Face Lifted

The Kennel has a new face!

Knox City's teenagers hardly recognized the Kennel when they came to the End of School Dance Friday night. The interior has been repainted a light shade of blue. The new snack bar has a bright red top.

Bamboo curtains in matching red are hanging from the windows. Thirty new plastic chairs in bright multi-colors have been purchased. The Coke box has a new coat of paint also. The air conditioner has been renovated. New light fixtures have been installed along with four new corner speakers for the record player. Many new records have been purchased. The floor has also been cleaned and waxed.

These improvements have come about through the efforts of the sponsors, many local citizens and several business firms and organizations.

Work and efforts have been contributed by Erwin King, Jr., R. P. Barnard Jr., Norman Lusk, W. C. Nance, Turk Everett, Robbie Wall, Doyle Graham, C. E. Williams, Charlie Clarke and Bill Sams.

Firms and organizations contributing money and materials are Knox City Chamber of Commerce, Knox City Lions Club, American Legion Auxiliary, 1946 Study Club, Egenbacher Implement Lewis Paint and Body Shop, Wm. Cameron & Co., Hoge Pharmacy, Graham Electric, Bob's Super Save and the City Council.

## Residents Father Dies In Comanche

Funeral services for N. S. Hicks, 86, of Comanche, who died Sunday May 24, were held Monday at 2 p.m. at the First Baptist Church in Comanche.

He had celebrated his 67th wedding anniversary in January.

There are 110 descendants of the couple.

Survivors include his wife and 10 children including a daughter, Mrs. Bertha Perry of Knox City.

## Chad Wilson Makes Another 1 In 1 Shot

Chad Wilson, an avid Knox City golfer, sank another hole-in-one at the Knox City Country Club last week to become the second person this month to hit a hole in one on the course.

Glenn Best sank his first hole-in-one during the first of this month.

Since that time Best has been kidded unmercifully and local golfers have been working overtime trying to duplicate his prowess on the links.

Wilson is the only Knox City golfer with the distinction of hitting the hole-in-one shot twice—last week here on No. 2 and four or five years ago in Munday on the No. 5 hole.

It is not known what iron Wilson used to sink the 155 yard "putt" but Best used a No. 4 iron to get his hole-in-one.

Wilson was well chaperoned in his flight with six Knox City golf enthusiasts, Jesse James, C. J. Reese, Bob Howell, Cidy Williams, Clyde Voss, and the hole-in-one champ, Wilson.

## Crambe Shows Promise In Texas

Crambe, a potential new oilseed crop, is showing promise in work being done at Texas A&M University and the Lower Rio Grande Valley Research and Extension Center in Weslaco. In making the statement, Dr. Eli Whiteley, associate professor in the Soil and Crop Science Department at A&M said the new crop shows especially well in the Blacklands, South Texas and the Lower Rio Grande Valley.

Crambe is in the same plant family as mustard and rape and will grow in almost all areas where wheat is grown. Oil from the plant contains up to 60 per cent erucic acid, an industrial chemical now obtained from imported rapeseed oil.

Investigations of potentialities of crame in agronomic and industrial uses are a part of an investigation by the U. S. Department of Agriculture to develop new domestic crops as raw materials for industry.

Texas A&M scientists at the Weslaco station are working to develop new lines of the oilseed crop. Work is also being done on uses of the oil and meal processed by a filtration extraction method. However, most of this work is being done by the USDA.

Filtration extraction was developed at the USDA Southern utilization research laboratory in New Orleans, especially for processing high-oil content seed.

In filtration extraction, the seed are dehulled, flaked, cooked, dried and then crisped. The crisped flakes are soaked in a solvent to remove the oil. Next, the oil and solvent are separated from the flakes by filtration and finally, from each other by distillation. A Peoria, Ill., study showed that crame meal remaining after extraction of the oil, contained only one-half per cent fat, which indicated almost complete recovery of the seed oil.

## Twenty-Four Seniors Graduate Here Tuesday; Most Plan College Careers

Graduation exercises were conducted at the high school auditorium Tuesday night for 24 Knox City graduates. Those in the graduating class and their plans for the future are:

## Cattle Numbers In Texas At Peak In History

Texas cattle numbers are the highest in history. More than 10 million head were on hand on January 1. However, Texas A&M University's livestock marketing specialist, Ed Uvacek, believes the state has reached its high peak in the current cattle cycle.

Uvacek said cattle numbers in the U. S. are also at a record high. The total on January 1, was in excess of 106 million head. The record high cattle population represents the seventh year of a buildup in cattle herds.

A national downturn in cattle numbers will begin this year or in 1965, the specialist predicts.

When liquidation begins, Uvacek expects a three year period when cattle numbers will become successively lower.

Marketings from Texas feedlots in the January-March period this year totaled 292 thousand head or 18 per cent more than in 1963, he said.

Federally inspected slaughter of cattle was up 11 per cent during the first quarter of this year. And experts look for cattle slaughter to stay well above 1963 levels for the remainder of the year, Uvacek said.

Prices of choice beef carcasses are expected to gradually decrease after May, he said, probably reaching their lowest levels in the September-October period. Uvacek predicts that good carcasses will decrease in price to lower levels in the July-September period.

The marketing specialist says feeder and stocker calves are now at their best demand for the year and should drop much lower as the heavy movement of late summer and early fall marketing begin.

He said beef and veal imports into the U. S. during the January-February period were 11 per cent below last year.

**JOE W. DOBY**  
COUNTY AGRICULTURAL AGENT

Plans are well underway for the second Knox County Vegetable Festival to be held June 26-27. The beauty pageant will be held Friday night, June 26. Deadline for entering candidates for this contest is June 1.

The success of the Festival will depend upon the entries that are received in the fruit and vegetable division. Knox County is able to grow many kinds of vegetables and we need to exhibit these at the show to demonstrate to the many visitors that Knox County has something to offer. Remember that anything that helps Agriculture helps the entire economy. For each dollar added \$7 added to the economy before this dollar finished circulation. If you would like more information concerning entries, please stop by the Munday Chamber of Commerce office, my office in Benjamin or drop either one of us a note. We will be glad to give you this information.

The Irish potato variety test plot will be harvested June 25 and 26. A sample of each of these varieties will be exhibited in the vegetable festival.

Potato harvest is expected to get underway about June 3-4 this year. Prospects look good for both yield and price right

now. Approximately 700 acres are planted this year. Three packing sheds will again be in operation — B. E. Smith and Sons, Knox Prairie Seeds and the Colville-Renufro. B. E. Smith and Sons have added a new digger this year and plan to mechanical dig their potatoes in the field. They will be loaded direct onto trailers and taken to the sheds in bulk where the washing, grading, and sacking takes place. This will eliminate the crews in the field sacking by hand.

Most of the cotton in the county is up to a stand. It badly needs a rain to settle the dirt and get it off to a good start. Thrips are damaging the leaves in many fields. Farmers are taking advantage of the dry weather to clean the fields of careless weeds.

Early season insect control is important in that it enables the cotton plant to set a crop of early cotton. Early squares should be given maximum protection. These squares are the ones that should develop into bolls that the grower must take to the gin if he is to make the most net profit from his crop. Well developed plants will put on more than a bale of squares during the 21 day square to bloom period. Fleahoppers and overwintered boll weevils are the principal insects that destroy early squares.

A boll weevil dosage of insecticides should be applied by every grower in the county when squares appear, 8 leaf stage. A second boll weevil dosage should be applied 7 days later, just before squares are one third grown. These two applications should "kill off" over-

wintered boll weevils before they have a chance to lay eggs or reproduce. At the same time, damage to early squares by fleahoppers and lygus is prevented.

Insecticides applied before squares are one third grown have little influence on the bollworm problem. Beneficial insects that often aid in keeping down bollworm damage usually move into cotton fields after the crop starts blooming. This is about 11 days after the one third growth square stage. The killing power of poisons applied to control early season insects should be gone when blooms appear.

The need for early square protection is more acute on fertilized and irrigated fields since they attract larger numbers of insects.

I am going to set up about the same schedule as last year in checking cotton insects and helping out with any problems on cotton insects control. I will try to stay as near as possible with the following schedule: Each Tuesday at 8:00 a.m., Gilliland Gin; Vera Store 10:00

Don Rummel, Extension Entomologist, will be in the county on Friday, June 12. We will visit all these places on that day and hold community meetings. This schedule will be worked out later.

The greatest number of screwworm infestations for any one week in 1964 was experienced last week with 15 cases confirmed. Llano county had two cases which is the closest to Knox of any infestation this year. We cannot afford to relax our efforts. Treat all wounds with smear or dust containing Co-Ral, Lindane or Ronnel. Smear 62 will not get the job done as its effect is only temporary. Take time to take samples of all suspected cases and send to Screwworm Eradication Center Mission, Texas. If you do not have sample kits, I will be glad to furnish them. Ask for them also at gins and stores over the county.

America's Most "Asked For" Premium Tires

- ★Speedway-proved for turnpike safety  
Firestone "500's" are built to endure the punishment of prolonged driving at turnpike speeds. They're tested and proved at speeds faster than you'll ever drive.
- ★New Sup-R-Tuf Rubber for extra mileage  
In city and cross-country tests, Firestone tires with SUP-R-TUF outwore other leading brands from 2,000 to 10,000 miles per tire.
- ★Super-weld construction for extra safety  
Firestone's inseparable bond interlocks the tread and cord body and eliminates the danger of tire failure from tread separation.

### School Dropouts On Increase, Specialist Says

Sixty-four percent of all school dropouts occur in grades 9 and 10 says Patsy Reynolds, Extension Service family life education specialist at Texas A&M University.

Another 34 percent of school dropouts aren't necessarily less intelligent than their school-mates. Many factors enter into their leaving school. A major one is parents who place little value on education.

"The dropouts usually doesn't achieve in the classroom, is irregular in attendance, gets along poorly with his teacher, resents school authority, and may be two years behind in his age group in the classroom.

What happens when the dropout looks for a job? The unemployment rate for those 16 to 19 years of age is 24 percent, compared to 16 per cent for all age groups. When he surveys his friends who did graduate, he finds that nearly twice as many in his age bracket had jobs in 1962.

Employment in the professional and technical jobs which

### VISITS IN DENTON HOME

Mr. and Mrs. Joe Gordon, of Portland, Oregon, spent the week with Mr. and Mrs. A. P. Denton. Mrs. Gordon is a sister of Mrs. Denton.

Also visiting the Dentons were Lou and David, and Mr. and Mrs. Burton Denton and son, David, of Stamford.

require advance education increased 47 per cent in the last 10 years, while employment in the laboring jobs requiring less education decreased 10 per cent in the same period. The future does not look bright for the school dropout and his family, the specialist said.

## Old Dogs Learning New Cars At The Indianapolis Speedway This Year!

OLD DOGS Learning tricks of he happens to be the mixture of pit bulldog (and greyhound) that makes up a great auto racer.

Three men over 40 have earned starting positions in the 48th 500-mile race May 30 at the Indianapolis Motor Speedway. All make fast qualifying runs over last week end in cars entirely different from those they had driven before.

Rodger Ward, 43, Indianapolis, qualified for his 14th straight start in the Memorial Day Classic in a rear-engine Watson Ford. He had driven front-engine Offenhausers to two victories, a second, a third and a fourth in the last five 500s.

Ward was the third fastest qualifier at 156.406 miles per hour and will share the front row with Jimmy Clark and Bobby Marshman.

Walt Hansgen, 44, Bedford, N. J., a luminary of the Sports Car Club of America but a stranger to the U. S. Auto Club's oval courses, qualified an unusual Huffaker - Offenhauser at 152.581. It was the liquid suspension used in British MG cars and the engine is mounted in the rear.

Don Branson, 43, Champaign, Ill., qualified for his sixth 500 start in a rear-engine Watson-Offenhauser at 152.672.

Other early qualifiers over 35 include Dick Rathmann, Roselle, Inn., 38; Johnny Boyd, Fresno, Calif., 37; Eddie Sachs, Detroit, 37; Bobby Grim, Indianapolis, 39; Bud Tingelstad, Dayton, 36; Len Sutton, Portland, Ore., 38, and Lloyd Ruby, Wichita Falls, Texas, 36.

Only Sachs and Sutton of that group had to make the transition to new rear-engine cars, which Sachs said are "fantastic-

ally different to drive." Clark is only 28 and Marshman 27 but the youngest drivers who made the field on the first week end are rookie Dave MacDonald of El Monte, Calif., and Johnny Rutherford of Fort Worth, Texas, both 26.

Drivers who hope to make the final trials next week end include Duane Carter, 51, Cayuga, Calif., and Paul Russo, 50, Indianapolis. Carter has started in 11 of the Memorial Day classics. Russo, who crashed a Novi leading the 1956 race, has started 15 times.

Russo ran into complications earlier however. He gave up the conventional Offenhauser he was ticketed to drive after failing to get it up to 150 miles per hour in attempted qualifying tests last week end.

He has not obtained a new car.

If Russo makes the field for the 16th time, he will match the record shared by Cliff Bergers and the late Chet Miller, who died practicing in another Novi in 1953. Miller was 50 years old.

### CARD OF THANKS

There are no words that can express our thanks and appreciation to the ones that helped so much during the illness of our husband and father. Our thanks to the doctors and nurses and hospital staff, to the ones who sat up at night, and also the ambulance drivers who so faithfully carried him to the hospital so often.

To those who prepared food at the church and home and the good neighbors who helped care for him so faithfully over the years of his illness, and all the lovely flowers, we pray God's blessings on each. The Eli Williamson Family

## RAW MATERIALS

... direct step in industrial development

Many industries locate near the raw materials used by them and are seen throughout the WTU service area. One example, pictured above, is the carbon black plant of United Carbon Company at Shamrock.

This flourishing petrochemical plant has become an important addition to the economy of this Texas Panhandle town. Such development anywhere creates new jobs, brings more payrolls, and adds many other advantages such as helping to provide new schools like the one pictured left.

Again, here is a PATTERN FOR PROGRESS.

In Texas the annual value of raw materials produced is \$700 per capita, while the value added by manufacture is only \$600. Contrast this with the highly industrialized state of Ohio. There the annual value of raw materials produced is \$125 per capita, while the value added by manufacture is \$1330.

Thus, as these figures show, additional processing of raw materials is the most direct way to sound industrial development. Communities seeking new industry will find that an assessment of local raw materials is the vital first step.

## STATE CAPITAL Highlights AND Sidelights by Vern Sanford TEXAS PRESS ASSOCIATION

AUSTIN—State officials have begun the long parade before Gov. John Connally's budget staff and the Legislative Budget Board. From now until summer's end, more than 150 state agencies will give estimates on how much they will need to operate in the 1966-1967 biennium.

These hearings will produce budget recommendations to the next Legislature by Governor Connally and by the Legislative Budget Board.

All estimates must be set out in dollars and cents. But the summer budget-hearing period actually is the guessing season, since agency heads have to guess now how many file clerks, how much stationery and how many pencils they will need in August, 1966.

A few items seem certain: The Board for State Hospitals and Special Schools expects a 37 per cent increase in the population of its schools for mentally retarded and will need an estimated \$28,000,000 more than its current \$100,000,000 budget. Department of Corrections will request \$5 million for pay raises for prison guards.

Budget raises not determined this summer are expected to be requested when the Legislature gets proposals for improving the state's higher education system; giving public school teachers a pay raise; building new schools for the mentally retarded; and for the mentally retarded and leges.

AUTO THEFTS — State Highway Department reveals the fact that each year about 17,000 automobiles are stolen in Texas—and nine per cent are never found!

Until three years ago, scrapped cars—complete with plates and negotiable ownership papers—could be purchased for \$50. But no more.

To prevent both plates and papers falling into hands of theft rings, the Legislature required each salvage yard operator to remove current plates from vehicles purchased as salvage.

Plates and papers are supposed to be kept under lock and key until claimed by the

highway department. About 10,000 titles and 3,000 license plates are picked up each month.

BUILDING BOOM CONTINUES — April was the second biggest construction month in Texas in Texas history, reports the UT Bureau of Business Research.

Total value of authorized building was estimated at \$153,600,000—up 6 per cent from March.

Only once before has the Bureau's index been higher—August, 1961, when it reached 152.3 per cent.

SMALL TOWNS GETTING INDUSTRY — Texas Industrial Commission reports that smaller Texas cities are beginning to get a larger share of the new industrial dollar.

In 1962, the big three—Dallas, Fort Worth and Houston—attracted 50 per cent of the new

industry locations. But in the first quarter of 1964, they showed only 38 per cent as more industrial leaders picked smaller communities.

One of the small-town leaders — Paris — will provide a big new market for South Texas vegetable producers this winter when Campbell Soup Company opens its Paris plant.

SCREW WORM PROGRAM — State and federal agencies cooperating in the southwest screw-worm eradication program announced that the sterile fly drop pattern, which originates in Mission, has been extended to reach Arizona.

Between March 29 and May 2, only 31 samples were confirmed by state animal health officials as screwworms, while 1,382 samples were classified as non-screwworms.

DEER HARVEST — An estimated 146,315 deer were "harvested" in the 21-county Edwards Plateau District during the 1963 hunting season, Parks and Wildlife biologist Rod Marburger, said.

Highest kill was made in Gillespie county with 7,779 bucks killed, followed closely by Mason county with 7,500 bucks killed.

Of the estimated deer killed, 57,938 were antlerless deer and 88,377 were bucks.

"Nevertheless I tell you the truth; It is expedient for you that I go away, the comforter will not come unto you; but if I depart, I will send him unto you. And when he is come, he will reprove the world of sin, and of righteousness, and of judgment; Of sin, because they believe not on me; Of righteousness, because I go to my Father, and ye see me no more; Of judgment, because the prince of this world is judged." (John 16:7-11).

There is a great need of the Holy Ghost in the church today as well as in the individual life. The Holy Ghost is a reprove of all sin. He opens your eyes to the real truths and lets you see yourself as you really are; helping you to understand what to do to be more victorious.

Jesus told the people who followed Him as far as they could go, before He ascended back into heaven; "You go back to Jerusalem and wait for the Holy Ghost; I will go to the Father and pray that He will send you another comforter." The Holy Ghost took up where Jesus left off. With the great need around us let us keep our minds filled with Jesus' words. (To be continued).

## Imported Beef Criticized By Rep. Graham Purcell

Rep. Graham Purcell, D-Tex., voiced concern Monday about health hazards involved in the handling of beef imported into this country, primarily from Australia and New Zealand.

He said meat once frozen should not be allowed to thaw to a temperature of 40 degrees or higher and then be refrozen.

Shipped in Blocks  
"The housewife," he told the House, "has no way of knowing that much of the ground meat she buys is imported beef which was shipped to the U. S. in frozen blocks, thawed by the U. S. purchaser, ground into hamburger, packaged by the local grocer, purchased by the housewife, and then refrozen in her home freezer."

"Almost every publication on frozen foods cautions against refreezing food. Authorities seem to agree that refreezing beef without cooking it is not a good practice."

Purcell told his colleagues in the House that there is no requirement of any kind that the imported meat used in hamburger be labeled as such, or that any notice be given to the purchaser that the meat has been previously frozen.

Correct Situation  
"I urge the federal government to take whatever action is possible under present law to correct the present deplorable situation," he said, "and I urge the Congress to act promptly in the absence of effective present law."

"I would also urge housewives to contact their members of Congress demanding action to protect the health of their families."

## Veterans QUESTIONS AND ANSWERS

Q—Can a veteran be paid an additional amount of compensation for a dependent parent?

A—Yes. If service-incurred disabilities are rated at 50 per cent or more. There is no additional allowance payable by reason of a dependent parent if the veteran is receiving pension for disability not the result of service.

Q—I am receiving pension from the VA, and must report my income each year. In March I sold some property. Should I keep the figures on this sale to report it at the end of the year?

A—No (this should be reported at once to the VA Regional Office that has your records. Any increase in income from that estimated at the begin-

ning of the year should be promptly reported to avoid possible overpayment.

Q—Are veterans of World War II and the Korean Conflict entitled to the same pensions as World War I veterans?

A—Yes, the basic requirement for payment of pensions apply equally to all veterans of World War I, and World War II and the Korean Conflict.

Q—Will a dishonorable discharge from military service bar a veteran from receiving VA hospitalization?

A—Yes, that is the case. Q—Does the VA furnish medical care to dependents of veterans?

A—No, not as such. Of course VA hospitals will admit anyone when necessary to save a life in a medical emergency. But such non-veteran patients must pay the government for their care.
