boys who received registered Duroc gilt pigs last spring showed them in the show. They received prize money which must be used to purchase materials or equipment to further their swine projects.

The show judge was Burt Williams, Vo-Ag teacher of Munday High School.

The first place winner was Richard Albus, 13, son of Mr. and Mrs. C. J. Albus of Rhineland. Richard will show his gilt in the area Sears Show at Wichita Falls, September 25.

Second place winner was Jacky Miller, 12, Gilliland, son of Mr. and Mrs. O. R. Miller.

Third place went to Fred Cash, 15, son of Mr. and Mrs. Jim Cash.

Fourth place gilt belongs to James Loran, 10, Rhineland, son of Mr. and Mrs. F. J. Loran.

Fifth place gilt belongs to Ricky Meinzer, 11, son of Mr. and Mrs. Pate Meinzer, Benjamin.

The County boar is under the care of Kerry Cash, Gilliland. A new boar is awarded each year usually to a boy who has had a gilt the year before. He agrees to furnish service to the five gilts in the program and then the boar is his to keep. He also shows in the Area Show at Wichita Falls.

Each boy who is awarded a gilt agrees to return one gilt from his first litter to the program to be awarded to another 4-H member. The sow and the rest of the pigs are his to do as he pleases. Since its start, nearly 20 years ago, thousands of hogs have been awarded under this program. It has done more to improve the hogs in the state of Texas than probably any other program. Pigs from these gilts have been sold by 4-H members to neighboring farmers thereby upgrading their herds.

Rickie Herring, Rhineland, son of Mr. and Mrs. C. H. Herring proved Saturday that study and regular practice can pay off. Rickie won third place and \$50. in the Tractor Operation contest at the West Texas State Fair in Abilene. Rickie has been district winner in the 4-H Tractor

Operator Contest at Wichita Falls the past two years.

Winning a tractor operator contest takes more practice than driving a tractor in the field. It involves backing two and four wheel trailers over courses with only six inches on each side of the trailer. It is a timed event with penalty points being assessed for touching the poles marking the course; having to pull forward to better one's position and various other undesirable driving faults. A written examination on tractor care and maintenance is also part of the contest. So it is not difficult to understand why the long hours of practice and study are necessary.

A total of 34 4-H and FHA boys participated in the preliminary contest on Friday to determine the 12 finalists for Saturday.

The most recent piece of Texas legislation that applies to outdoor recreation is House Bill 73. It became effective on September 1, 1965.

The Act limits the liability of any owner, leasee or occupant of real property who gives permission to another person to enter his "premises" in this case means lands, waters, water courses and private ways including all buildings, structures, machinery and equipment.

House Bill 73 is designed to encourage land uses for hunting fishing and or camping that are non-commercial. It does not limit or change in any way the liability that applies to commercial recreation enterprises that operate for a profit.

The provisions of the Act specifically state that if a landowner allows other persons to enter his premises for hunting, fishing and or camping he does not (1) extend any assurance that the premises are safe for such purposes, or (2) owe a greater degree of care to persons granted permission than he owes to a trespasser, or (3) assume any responsibility for injury to persons or property caused by an act of persons granted permission.

Recently we gave the results of grain sorghum yields when planted broadcast and when planted two rows to the 40-inch bed. This week we have some more results which pretty well establishes the fact that it is a paying proposition to have more plants per acre. This, of course, applies where the crop can be irrigated and fertilized.

Clifford Rhoads, Munday, planted RS610 and Wax 700 two

rows to the 40 inch bed in a field southwest of Munday three miles. He cut 7530 lbs per acre from 18 acres of the 610 when the moisture content was 15 per cent. He then began cutting for his neighbors and came back when the moisture content was 10-12 per cent. Part of the field had a poor stand so the entire field of R.S. 610 averaged 6600 pounds per acre. It was watered four and five times with furrow irrigation. Anyhydrous Ammonia at the rate of 100 pounds per acre was applied, making a total of 82 pounds of actual nitrogen. Clifford used properazine on half of this field and atrazine on the other half. He got excellent results with each.

Clyde Yost, Munday, planted a field on the Rhineland highway just north of his house in RS608 two rows to the bed. He fertilized with 150 pounds ammonium sulfate giving him a total of 32 pounds of actual nitrogen. He harvested 5500 pounds of grain sorghum per acre from this field. While this was a fine yield, Clyde might have applied about \$5 more of nitrogen and increased his yield up to 2000-pounds.

It takes more nutrients when the plant population is increased but the net profit can be increased easier by raising yield. It takes a certain amount of the grain to pay for the expenses so any amount the yield can be increased will mean more profit. Clyde did not use any properazine on this field. He did have to hoe it once.

Stantan Brown, League Ranch, Benjamin, used a grain drill with part of the hole covered to plant grain sorghum two rows to the bed on 40 inch spacings. He used one pound of properazine per acre for weed control. The field was planted May 3 and 4 1/2 of the field was planted to one row on each bed to get a comparison. His total cost per acre amounted to \$14.00.

The yield of the one row was 4630 pounds per acre and the

difference of 300 pounds.

Chemical weed control in the grain sorghums looks like a good practice to use. Stanton has had excellent results the past two years with half the amount recommended. The residue problem is one that can cause trouble if not properly handled. Do not plant anything but corn or sor-

ghum for 18 months following application. Some farmers will need to change their rotations. The use of chemicals also gives us another benefit. We do not have to tear out feeder roots in order to kill the weeds. We think that with the use of chemicals, fertilizers and water plus good management, we will see an increase in yields of grain sorghum in Knox County.

THE FAMILY LAWYER

MAN OVER BEAST

The Bible tells us that mankind was given dominion over the animals of the land and the fish of the sea. But, as any sportsman knows, it isn't always easy for one particular man to gain dominion over one particular animal or one particular fish.

In the eyes of the law, when do you become the owner of a wild creature?

To start with, the state 'owns' all the wild animals and fish that dwell permanently within its borders.

But the state owns them only in a very general sense, holding title in trust for the benefit of the people. Any person—subject to the fish and game laws and private property rights—may acquire ownership of any animal or fish simply by reducing it to his possession.

But just what is possession? Consider this case:

A hunter was in hot pursuit of a deer when another hunter, appearing suddenly from a different direction, felled the animal with a fatal shot.

In short order the two men went to court to settle ownership of the deer. The judge duly ruled in favor of the second hunter, holding that pursuit alone, no matter how close to success, was

not enough to give title to the pursuer.

But in another case, a hunter who inflicted disabling wounds on a wolf won over a second hunter who stepped up close and administered the coup de grace. The court said the first hunter had acquired possession, hence ownership, by making the wolf's escape just about impossible.

Even as you may gain ownership by gaining possession, so you may also lose ownership by losing possession. Clearly you have no rights in a fish which, although briefly hooked, squirms free and regains the safety of the water.

In one unusual case, the owner of a sea lion that escaped into the ocean was held to have no claim against a man who caught the same sea lion two weeks later, 70 miles away.

On the other hand, if an escaped animal is trained to come home again, then the owner retains title. The habit of return, like an invisible leash, ties the animal to its owner.

A woman's pet canary, having escaped from its cage, was caught and kept by a neighbor. But in a court test, the first woman was held to be the owner still. The court pointed out that the bird answered to her call, had not gone far, and had previously come home voluntarily after an outing.

"Such a bird could not be considered fair game for capture said the court, because it had not truly gone 'back to nature.'"

Sandra Barton, Paul Chambers United In Marriage, Sept. 4

MRS. PAUL CHAMBERS
...nee Sandra Barton

Sandra Laverle Barton, daughter of Mr. and Mrs. T. W. Barton, and Paul D. Chambers, son of Mr. and Mrs. Jack Chambers of Donna, were married Saturday, Sept. 4, 1965, in the First Baptist Church in Rochester at 7:00 p.m. The Rev. Floyd Bailey, pastor of the Knox City Four Square Church, read the double ring ceremony before an archway of greenery with baskets of white gladiolus and lilies at either side, bordered by white candles.

The bride was given in marriage by her father. She chose a gown of white peau with scoop neckline and three-quarter length sleeves. The empire waist was enhanced with re-embroidered Alencon lace and the sleeves were edged in lace. The controlled bell skirt had a removable chapel train with appliques of Alencon lace. Her floor length veil of imported illusion fell from a crown of Alencon lace petals adorned with tiny seed pearls. She carried a bouquet of tiny white rosebuds centered with an orchid.

Matron of Honor was Mrs. Barbara Holmes, of Boyd. Bridesmaids were Frankie Barton of O'Donnell, Sharon Jones of Lubbock, Carolyn Bean of Rochester, and Sue Reese of Abilene.

Best Man was Jerry Chambers of Donna, brother of the groom.

Groomsmen were Tommy Sloan of Rochester, James Petty of Seagraves, Jerry Hester of Weimert, and Bill Jones of Lubbock.

Candlelighters were Tandy Barton of O'Donnell, Carol Jean Speck of Knox City. Rhona Myers was Flower girl and Ricky Tankersley of Knox City, was ring bearer.

Ushers were Raymond Greenwood of Rochester and Marshall Barton of O'Donnell.

The Matron of Honor wore a dress of peppermint taffeta with scoop neckline and three-quarter length sleeves. A controlled floor length train fell from the back of the neckline.

The bridesmaids wore identical gowns with empire waists with floor length trains. All attendants wore headpieces of tiny taffeta flowers with melaine in peppermint. They carried bouquets of white feathered carnations. The flower girl was dressed identically to the bridesmaids.

The bride is a 1963 graduate of Rochester High School and attended college at East Texas State, and LIFE in Los Angeles, Calif.

The groom graduated from Donna High School in 1963 and attended college at Sul Ross and LIFE in Los Angeles, Calif. He

Charles Burton accompanied his father home to California and will return in ten days.

O'BRIEN SPORTS

By BILL DUNCAN

The O'Brien Bulldogs played Hobbs at O'Brien Friday night. The Bulldogs scored about four minutes deep in the first quarter and the conversion was blocked.

The next score came in the second quarter and the conversion failed again. The second half was all Hobbs.

Their offense rolled up 24 points and they scored 6 in the third quarter with 18 in the fourth period.

The O'Brien Bulldogs failed to score in the second half, which left the final score 24-12.

The Bulldogs defense looked good but the offense needs polishing.

PATTERNS FOR PROGRESS IN COMMUNITY DEVELOPMENT

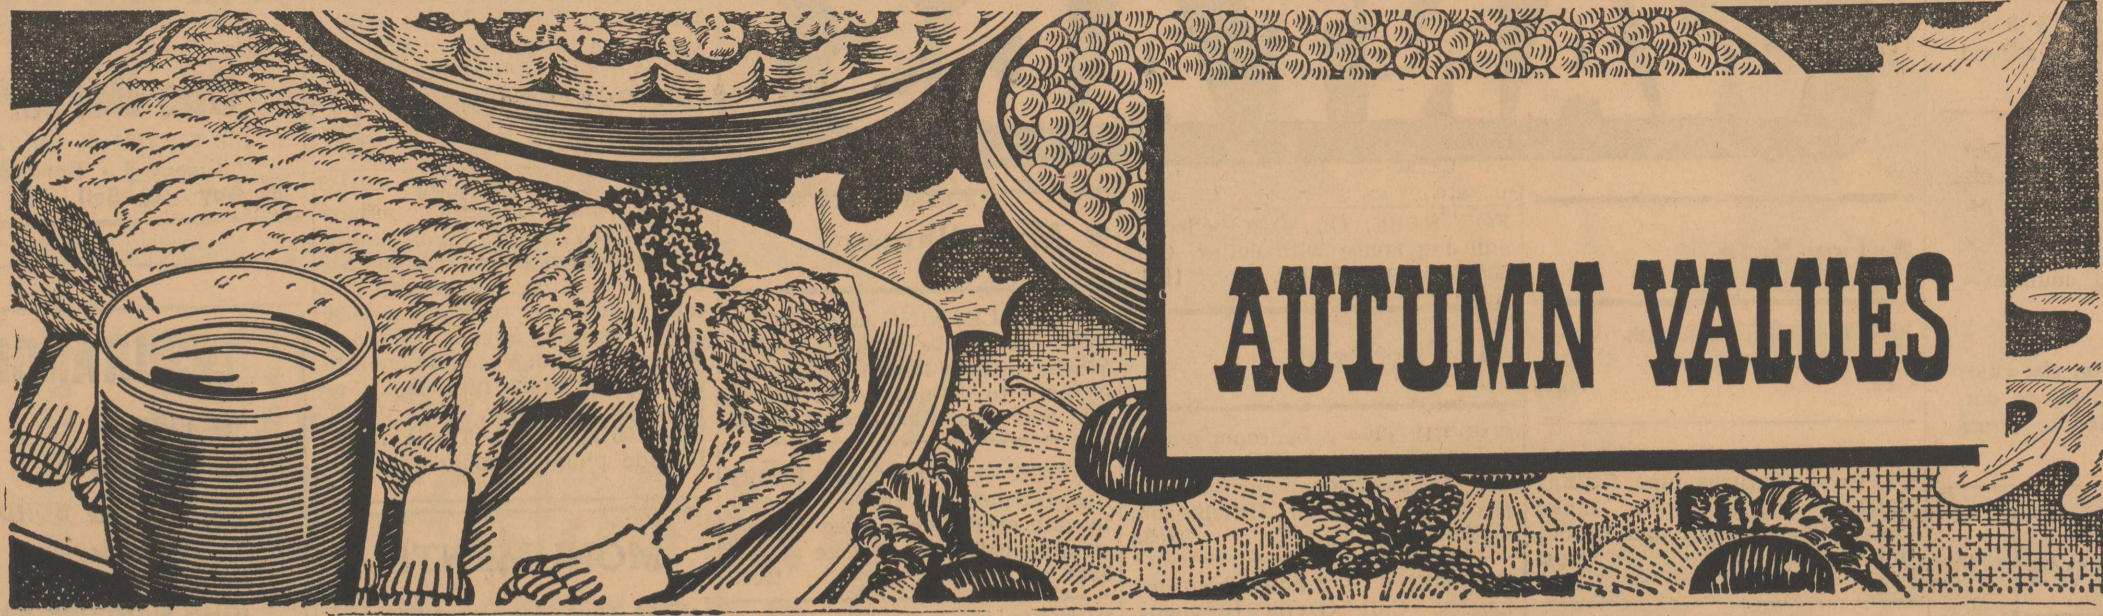

Industrial development . . . successful achievement

WTU area development representatives are available to assist growth-conscious communities in planning economic development programs

Not long ago WTU published an ad about the \$1,300,000 improvement program in the West Texas community of Stamford. As we stated then, it was done for the purpose of "improving the chances of continued economic growth and attraction of new industry." And . . . industry responded! Today a well-known maker of women's and girls' apparel and sportswear is thriving in Stamford, with an annual payroll approaching \$300,000. Selling its products all over the Nation, Stamford's new industry has almost tripled its employment in 18 months. In actual fact, here is a PATTERN FOR PROGRESS . . . a picture of successful achievement. Growth-conscious towns are invited to contact their local WTU manager for assistance from our area development representatives.
