10 CENTS A COPY

New Business Planned For Hart

A NEW BUSINESS FOR HART--The beginning of a new corn cleaning plant is shown in the photo above. Garland DePrang of Olton will be the manager of the business which will be

known as "Plains Corn". The plant is expected to be completed and in operation by fall.

Construction began this week in Hart on a seed cleaning plant to be known as Plains Corn. Manager of the company is Garland DePrang of Olton.

The new operation is located between Hart Grain Company and Grain Handling Corporation.

Built specifically for corn, the plant will primarily be used the coming year for cleaning corn for delivery to Frito-Lay, Incorporated.

Several thousand acres of corn have been contracted this year by High Plains Grain Company for use by the Frito-Lay Company.

Corn is not the sole grain, however, which can be cleaned at the new plant.

"The plant will offer a higher capacity than anything in the trade area," said a spokesman in Olton Wednesday.

An extremely modern installation, the plant is expected to be completed this fall. Operations will be mostly mechanically controlled.

Location of the new plant in Hart is expected to be an added boost to the economy of the trade territory by offering a ready market to area farmers.

Hart Residents Prepared For Saturday's Activities

Fun, frolic and fellowship will be the order of the day Saturday as Hart residents, young and old, celebrate "Hart Day" and the beginning of the 1969 Castro County Roundup Week.

Members of the Good Neighbors Club will be hostesses at Farmers State Bank as old settlers and visitors register for the day's festivities.

A highlight of the day, the annual parade of horsemen, floats, antique autos, and bicyclists will travel through downtown at 2 p. m.

The third annual Playday will begin immediately following the parade in the Henderson Rodeo Arena.

Playday events will include Keyhole, Potatoes, Poles, Rings, Barrels and Flags.

Hart merchants and their employees will be eligible for the best dressed man and best dressed woman awards which will be given by the Castro County Activities Committee.

Topping off the Saturday schedule is the annual Miss Grain Sorghum Contest at 8 p. m. in the Dimmitt High School Auditorium.

Miss Susan Darlene Cannon, daughter of Mrs. Sue Cannon, managing editor of the Hart

Beat, is a contestant in the big event.

Other activities in observance of Roundup Week will include a County Wide Song Festival at 3 p. m. Sunday afternoon in the Dimmitt High School Auditorium.

A Talent Show and Street Dance are scheduled for Monday and Tuesday evenings, respectively, in Dimmitt.

Thursday is Dimmitt Day

with activities planned all day. A Quarter Horse and second performance of the Rodeo are planned for Friday.

Saturday, Aug. 16 is filled with activities designated as Children and Youth Day, including games, races, pet show, water polo and other contests and the final rodeo performance.

The Dimmitt Jaycees will present an Air Show Sunday, Aug. 17.

Five New Teachers Employed, Maintenance Man Still Sought

Hart school board has announced that five new teachers and the school secretary have been hired.

Mrs. Linnie Campbell of Olton has been hired to teach high school English.

A teacher for 26 years, Mrs. Campbell has taught in Olton for the last 23 years. She was graduated from West Texas State University.

Miss Sherry Scott, a spring graduate of Texas Technological University will teach

home economics in Hart High School.

Miss Scott is from Pasadena.

A graduate of Wayland Baptist College in Plainview, Mrs. Wilma Lemons will teach fifth and sixth grade language arts. She has had four years teaching experience, all in the Hart schools.

Mrs. Ruth Wood, a teacher with 31 years experience, was hired to teach the first grade.

Hart Voters Approve No. 2

Hart voters, numbered 145, which is about one-third the registered voters, gave their approval of the all-important water amendment as did the county.

The results on all amendments are as follows:

AMENDMENT	FOR	AGAINST
No. 1	75	50
No. 2	120	21
No. 3	42	86
No. 4	75	49
No. 5	94	49
No. 6	61	61
No. 7	86	46
No. 8	88	46
No. 9	56	69

Hawkinses Buy Interest In Wink Bank

Controlling interest in the Winkler County State Bank in Wink has been purchased by W. A. Hawkins Sr., W. A. Hawkins Jr. and Norlan Dudley. Announcement of the sale was made this week by Melvin Dow, whose interest the trio purchased.

The trio also owns controlling interest in the Farmers State Bank and in Citizens State Bank in Earth.

Billy Van Baird, assistant vice president, who has been with the Wink Bank for four years has been promoted to Vice President and active manager.

W. A. Hawkins Sr. has been elected president. W. A. Hawkins Jr. and Dudley will serve as senior vice presidents.

Mrs. Kendall To Collect News

Mrs. Leon Kendall will be taking news for the Hart Beat effective immediately. Mrs. Kendall replaces Mrs. Lela Gallion, who resigned her post and is planning to move to Dimmitt.

Readers are urged to call Mrs. Kendall at 938-2295 or leave news items at her home which is located across the street from the Baptist parsonage.

ATTEND HART DAY SATURDAY, AUG. 9

Financial Facts

By Willis A. Hawkins, Jr.

Sometimes tellers get checks with a conditional endorsement. This is an endorsement which authorizes payment only on certain conditions.

For instance: "Pay to Frank's garage only if motor is in good condition. It must be as good as it was before the wreck."

Naturally the teller cannot honor such conditional endorsements.

When a payee's name is misspelled, the payee must make two endorsements. First — the way the name was spelled despite being wrong. Second — the payee's name correctly spelled.

Most banks certify checks. However, banks are not required by law to certify a customer's check.

Tellers will not cash post-dated or "stale" checks. A post-dated

check has an advanced date. Most banks regard a check "stale" if it is 30 days old.

Watch Next Week For "ANCIENT DEPOSIT VAULTS"

We are having a drawing on Hart Day Aug. 9th for a \$25 bond. Register at the Bank.

What are your banking needs? Whether you need a specific savings plan or a commercial loan, you will find it at **FARMERS STATE BANK**. "Friendly courteous service" is yours at **FARMERS STATE BANK**, 938-2111, in Hart. Open 9 a.m. to 3 p.m. daily. We have money that will spend!

Statistics Show Older Driver Has Low Accident Involvement

The current reputation of the older driver is a myth. A national study shows that the older driver has less than his proportionate share of "all accidents", "fatal accidents", and "injury accidents". Even in highly populated areas, the older driver has low accident involvement.

Minnie Bell, Extension specialist for aging, reports these findings from a recent national study by Judge Sherman G.

Finesilver, University of Denver College of Law. Judge Finesilver is an authority on safety and the older driver.

The older driver refers to those persons 65 years and older, Miss Bell explains. The study is significant in regard to insurance licensing and general acceptance as competent drivers.

Fatal accidents are a real problem of the elderly. Judge Finesilver believes this is due to the inability to withstand injury. The older driver is more likely to have a fatal accident than any driver from ages 35 to 64.

The two youngest group of drivers, those under 24 and those from 25 to 34, have higher rate of fatal accidents.

Gas Company Dividends Told

The Board of Directors of Pioneer Natural Gas Company at their regular meeting held Tuesday in Lubbock, declared a quarterly dividend of 20¢ per share on the outstanding common stock, payable Sept. 3 to stockholders of record on Aug. 22, 1969.

The report for the second quarter operations of the company will be mailed to the stockholders about Aug. 13.

SUNDAY GUESTS

Mr. and Mrs. Bobby Sanders and daughter of Amarillo visited in the home of Mrs. Harris Sunday.

FOR SALE

1963 Chevrolet 1/2 ton - 6 cyl. pickup. Good shape ready to go. T. J. Morrison 938-2466. 1-tfc.

1960 Plymouth Fury, new tires, runs good. Call W. A. Hawkins Jr. 938-2111. 1-tfc.

FOR SALE - Oil field pipe and rods for corrals and feed lots. Call W. A. Hawkins, Jr. 938-2111. 1-tfc.

FOR SALE 3 bedroom house on pavement, priced to sell on lots 50 x 140 feet, with water, gas and sewer. Call 938-2472. 2-tfc.

Dirty Filters

Dirty filters hinder performance of air conditioners. Most new air conditioners have permanent filters which don't need to be replaced, but do need to be kept clean.

Mrs. Jane Berry, Extension housing and home furnishings specialist, tells how to keep a unit at top-performance. Lift the filter out, shake off loose dust, then dip it up and down in hot sudsy water. The bath loosens and removes the greasy soot which the filter has captured.

Rinse, dry and apply a coat of special filter oil to help "trap" and hold additional soil, lint, and air-borne grime.

Disposable filters should be cleaned in the same manner, but since they will take only a couple of cleanings a season, it is necessary to replace them occasionally.

DROWNING DEATHS

Summertime is fun time in and around the water. Liberty Mutual Insurance Companies suggest you make it a safe time too. They remind that drowning is the fourth leading cause of accidental death and warn - don't you become a statistic this summer.

NOTICE

HOWDY, PODNER!

Welcome To Our Celebration of HART DAY

THE HART BEAT

Accent on Health

With a summer heat wave scorching Texas, there is the possibility you could become a victim of sunstroke or heat exhaustion during the blast-furnace weather ahead, advises the Texas State Department of Health.

The combined effects of the sun, exercise, heat and excessive perspiration with water and salt loss can produce serious symptoms and may even be fatal.

Sunstroke is caused by over exposure to the hot sun while heat exhaustion is due to prolonged exposure to high temperatures indoors or outdoors. In sunstroke the body overheats. Usually the victim has a severe headache and everything looks red to him. Often the victim becomes unconscious.

Heat exhaustion is caused by prolonged heat and high humidity, but it is very different from sunstroke. The victim is usually conscious but weak and dizzy. His temperature falls instead of rises, and he feels cold and clammy.

In either case call a doctor at once. The victim should be moved into the shade and any tight clothing loosened.

Simple, common-sense precautions will nearly always prevent these conditions. During hot weather:

Don't expose yourself to the heat when you don't have to.

Don't go out in the hot sunshine without a hat.

Don't wear heavy or tight clothing.

Don't exercise strenuously in the sun or heat.

Don't exercise just before or after meals.

Don't overeat.

Don't overindulge in alcoholic drinks.

On sultry days, keep the air circulating to help the evaporation of perspiration. Keep shaded windows open and use an electric fan.

If you perspire freely, you may need extra water and salt.

DEPTH LINES

Dividing a home pool by depth lines can be a life saver, suggests Liberty Mutual Insurance Companies. Swimmers who go in over their heads may find themselves in more than just deep water. Panic and tragedy may ensue.

Supervender

A new type of office vending system consists of centrally located production and storage facilities with beverages directed to each floor in nickel stainless steel pipelines.

Drink water often throughout the day, one glass at a time. The amount of salt needed depends on how much you lose through perspiration, office workers probably get enough in their food, but others doing heavy labor may need salt tablets periodically or a quarter of a teaspoonful of salt dissolved in a glass of water every hour.

The aging, the very young, alcoholics and people with heart trouble are easily affected by sun and heat.

Hart Families Plan To Attend Nat'l. Playday

Several Hart families are planning to attend National Playday activities in Ft. Worth August 13 through August 17.

The families making plans to attend are the R. G. Henderson family, the Joe Edd Carson family, the Bill Swindle family, the Curtis Malone family, the C. C. Wade family, the D. L. Irwin family, the Charles Black family, the Herman Burrell family, and the Cleve McLain family.

Aaron Hutto To Receive DVM

Aaron L. Hutto of Hart is among 122 veterinary medicine students scheduled to graduate Aug. 8 from Texas A&M University.

Hutto, son of Mr. and Mrs. S. R. Hutton, will receive his Doctor of Veterinary Medicine degree at 8 p. m. ceremonies in Bryan Civic Auditorium.

Texas A&M's College of Veterinary Medicine conducts graduation separately from other units of the university, Dean A. A. Price explained, because it operates on a trimester basis, rather than the standard semesters.

The dean said the largest previous graduating class was last year's, which totaled 101 students.

SWIMMING TOO SOON

Swimming too soon after eating can be a hazardous habit, warns Liberty Mutual Insurance Companies. A swimmer whose muscles cramp will be defenseless and may find himself unable to reach safety in time to avoid tragedy.

4-H Youngsters Organized To Conserve Resources

When 300,000 energetic young Americans from coast to coast organize to conserve the natural resources of this country, things begin to happen.

These youths are 4-H members participating in a national program to wisely use and conserve natural resources. As individuals and as a club they carry out conservation projects most needed in their communities. Projects cover the four principle areas of conservation: soil, water, grasslands, wildlife and forests.

The program is sponsored by John Deere of Moline, Ill., in cooperation with the Extension Service. Other branches of the U. S. Department of Agriculture provide resource information and the services of personnel. They include the U. S. Forest Service and Soil Conservation Service. The National Park Service and the Bureau of Sport Fisheries and Wildlife of the U. S. Department of Interior assist the 4-H groups, as do other agencies.

Examples of what a 17-year-old 4-H lad has done in seven years of conservation work is to terrace, fertilize and plant hundreds of acres of farmland to enrich the soil and protect it from erosion and depletion. On the family farm a 37-acre

watershed was built for flood control and wildlife refuge.

The lake was stocked with bream and bass, and now is used on a pay-as-you-fish basis. Profits from this project are banked for the young man's college education.

Non-farm 4-H'ers find opportunities and situations within their towns from which they learn why conservation and wise use of all natural resources is necessary to insure food, water and shelter for the nation's rapidly increasing population.

For the most effective conservation projects, annual awards are provided by John Deere for individual 4-H'ers and for their club as well.

Recognition is given at county, state and national levels. The youths earn medals, educational trips to the National 4-H Congress in Chicago, and \$600 scholarships. John Deere also will be host to state and national award winners while they attend the National 4-H Congress, November 30 - December 4.

FARM COOPS UP

Farmer cooperatives now have an annual business volume of more than \$17 billion.

Cards Of Thanks

We wish to take this opportunity to thank each of our many friends for all the prayers, visits, flowers, cards, food and other acts of kindness shown us during our recent loss of our loved one. May God bless and keep each of you.

Lela Gallion
Billy and Kay Gallion and children

TEACH POOL SAFETY

Youngsters under 10 years old who swim in home pools must be watched closely and taught pool safety, suggests Liberty Mutual Insurance Companies. Over half the victims of drownings in residential pools are children in this age group.

FUNERAL DIRECTORS normally file the necessary papers with the VA for payment of a veteran's \$250-maximum burial benefits.

'Kidnap Breakfast' Fetes Zealot Club Members

Mrs. Lorenzo Lee was hostess Saturday morning for a "Kidnap or Come As You Are" breakfast in her home north-east of Hart for the members of the Zealot Club.

Assisting with hostess duties were Mmes. Ted Averitt, Glenn Gleghorn, and William D. Bell.

The tables were laid with floral cloths centered with fresh garden flowers in green containers. Table appointments were silver and china. The menu consisted of bacon, sausage, jams, jellies, juice, coffee and homemade bread.

The group discussed plans for the float they will have in the parade Hart Day, August 9.

Members present were Mmes. C. C. Hanes, Deryl Clevenger, Preston Upshaw, C. T. Cunningham, L. D. Williams,

Elmer Six, Jackie Burns, Howard Mitchell, Hubert McLain, William D. Bell, Ted Averitt, Eldon Shive, Glen Gleghorn, Jack Dyer, Cleve McLain, Warren Lemons, Cecil R. Jones, David Irons, Garland Crosby, Jerry Kittrell, Darrell Davis and Mrs. Lee.

TOPS Club Met Monday

Hart of Texas TOPS Club met Monday, Aug. 4 with two guests, Deann Richburg and Virginia Roland.

Mrs. Jewel Brooks, leader, led the members in the TOPS pledge and Jonalyn Jones led the "TOPS Song" and "TOPS Enthusiasm Song."

Chosen Queen of the week, Augusta Farris, chose a gift from the grab bag.

TOPS members are selling Hart Day badges. Anyone interested is asked to contact any TOPS member.

E. E. Fosters To Be Honored

Mr. and Mrs. Emmett E. Foster will be honored on their 50th wedding anniversary at a reception from 2 to 5 p. m. Sunday, Aug. 17 in the Fellowship Hall of the First Methodist Church in Hart.

Hosting the event will be their children, Mrs. Marie McCluskey of Grand Junction, Colo., Mrs. Marion Tucker of 3302 Palmetto in Amarillo, and Wamon Foster of Hart.

The Fosters are former residents of Petersburg and have resided in Hart the past 16 years.

Friends are invited to attend.

Mrs. Griswold Leads Program

Women's Society of Christian Service met Thursday afternoon July 31 in the First United Methodist Church. Mrs. L. A. Griswold presented the study "Generation Gap".

Mrs. Willis Hawkins Sr. gave the closing prayer.

Those attending were Mmes. L. L. Swindle, E. E. Foster, Willis Hawkins Sr., and Mrs. Griswold. Mrs. Jerry Hood was a guest.

Shower To Fete Diana Malone

A miscellaneous bridal shower will fete Miss Diana Malone, bride-elect of Clifford Ray, Thursday afternoon Aug. 14, in the Owen Norfleet home at 4th and Ave. G in Olton. Calling hours are 3 to 5 p. m.

Friends and relatives are invited.

POOLSIDE TABOOS

Riding tricycles or roughhousing at the side of a swimming pool can result in a tragic accident, points out Liberty Mutual Insurance Companies. Accidents on abrasive surfaces or drownings are too high a price to pay for this type of poolside fun.

LEARN TO SAVE

Knowing how to revive a drowning swimmer may someday save the life of a loved one, says Liberty Mutual Insurance Companies. Many persons who have drowned in home pools may have been saved if someone knew how to apply artificial resuscitation.

Recipes Of The Week

Parlay this crunchy, creamy blend of gelatine, walnuts, sweetened condensed milk and heavy cream into a delightful party-going parfait. What a break for the busy cook. It's made with all the quickstep magic of canned sweetened condensed milk.

Nut Cream Dessert (Makes six servings)

1 envelope unflavored gelatine	1/2 cup walnuts or hazelnuts, finely ground
1/4 cup water	1 teaspoon maple flavoring
1-1/3 cups (15-oz. can) Eagle Brand Sweetened Condensed Milk	1/2 pint Borden Heavy Cream, whipped

In the top of a double boiler, soften gelatine in water. Place over hot water; stir until dissolved. In medium-size bowl combine condensed milk and flavoring. Add dissolved gelatine and nuts. In a large bowl, fold condensed milk mixture into whipped cream. Place bowl over ice water. Continue to stir until mixture mounds slightly when dropped from a spoon. Spoon mixture into six 5-oz. parfait glasses. Refrigerate about 1-1/2 hours or until firm. Garnish with whole nuts.

DEVILED SCRAMBLED EGGS

serves 4 to 6
6 eggs
1/2 c. dairy sour cream
1 tsp. prepared mustard
Dash oregano
3/4 tsp. celery salt
1/4 tsp. pepper
2 T. butter

Beat eggs slightly; stir in sour cream mixed with mustard, oregano, salt and pepper. Melt butter in top of double boiler, pour in egg mixture and cook slowly, stirring until eggs are thick. Serve at once.

MODEL IN LUBBOCK

Misses Janet McLain and Sandy Bennett were models in the Seventeen Benefit Show sponsored by Dunlap's in Lubbock Aug. 4 in the Hayloft Dinner Theater.

ORANGE MARSHMALLOW PIE

1/2 lb. marshmallows
1/2 c. orange juice
juice of 1/2 lemon
1 T. grated lemon rind
1 T. grated orange rind
1 c. heavy cream, whipped
1/3 lb. vanilla wafers rolled into fine crumbs
Blend marshmallows, orange juice, lemon juice and grated rinds in top of double boiler. Cook over hot water until marshmallows are melted. Cool. Fold in the whipped cream. Line buttered pie pan with crumbs. Spoon in filling and refrigerate pie for several hours.

FRUITED CREAM DESSERT

1/2 tsp. salt
2 lbs. cottage cheese
2 c. heavy cream
Strawberries or raspberries
Confectioners' sugar

Add salt to cheese; beat until cheese is smooth. Stir in cream. When mixture is thoroughly blended, place in colander; set in refrigerator and let drain overnight. Line a dessert mold with cheesecloth and press cheese mixture firmly into the mold. Return to refrigerator. At serving time unmold onto serving dish, strip off cheesecloth, garnish with berries which have been sprinkled with confectioners' sugar.

THE HOME IS becoming an increasingly attractive target for burglars, warns Liberty Mutual Insurance Companies. While businesses have employed watchmen, watchdogs and highly intricate alarm devices, many homeowners don't even bother to lock their doors when they go out.

INSTANCES of lead poisoning have been decreasing the past few years but if you have young children at home beware of paint, which contains lead. Children will eat almost anything, advises Liberty Mutual Insurance Companies, and paint is no exception.

Carolyn Franks To Get Degree

Carolyn Marie Enochs Franks of Hart is listed among the 398 candidates for degrees at the summer convocation of West Texas State University, Aug. 21.

U. S. Senator Ralph W. Yarborough of Texas will deliver the commencement address which will be in Amarillo Civic Center Coliseum.

Mrs. Franks is seeking a bachelor of science degree.

Shower To Fete Mrs. Carson

Mrs. Gene Carson of Sunnyside will be feted with a bridal shower Friday, Aug. 15 from 3 to 5 p. m. in the Fellowship Hall of Sunnyside Baptist Church.

Friends and relatives are invited.

Pleasant Dream Gift

Showers and weddings are occasions of joy, expectation—and gift-giving. And what's new in gifts these days?

Luckily, there's now something freshly exciting for the bride, or others on the receiving lines. Super not only for beauty but for welcome sleep after hectic festivity, it's a luxurious, custom-size pillow that's completely machine washable and machine dryable. A full two inches longer than a regular one, it fits into a standard pillow case.

Fittingly called Serene® Superba, this soft, ever-fluffy pillow has a secret—Celanese Fortrel 7 polyester fiberfill—which prevents matting or lumping. Most important to busy new housekeepers, it has an extra rose-patterned zippered cover that can be removed and laundered many times before the pillow itself needs washing, with a wrinkle-resisting durable press finish.

Gift shoppers will want Serene Superba pillows for themselves. In beautiful bridal packages, or sealed dust-proof bags for those not middle-aisling it, they cost only slightly more than regular-size pillows. They're really dream items! (NP Features)

SENSING THE NEWS

By Thurman Sensing

EXECUTIVE VICE PRESIDENT

Southern States Industrial Council

In the 15 years since the U. S. Supreme Court handed down its controversial decision in the school cases, public education in many parts of the nation has suffered severely. The courts and other federal agencies have largely lost sight of the objective for which schools are built -- to impart an education, that is -- in their drive to compel association across racial lines and to obtain political benefits therefrom. The need today, therefore, is a rededication to the goal of education and an end to playing politics with children.

One of the most hurtful developments in the continuing school crisis of the last 15 years was the Johnson administration's decision to issue so-called guidelines. These prescribed the rate and methods by which Southern school districts were to alter their student bodies. No consideration was given by the Johnson administration to the wishes of parents and students or to their needs for specific types of schooling. Everything was subordinated to the demands of politics.

Doctrinaire liberals in both parties insisted that the Nixon administration order a general extension of the guidelines. A controversy raged both in and out of the administration, and a new policy statement has been released.

The practical significance of the new policy statement is still unclear. Administration spokesmen stated their opposition to "arbitrary dates and systems," but added that school districts would be held to deadlines except where there were "bona fide educational and administrative problems."

It is hard for the ordinary citizen and parent to make sense of this statement. Sen. Strom Thurmond (R-SC) has said it is an improvement, though it falls short of his desire for a "true freedom of choice plan." Liberals such as Mrs. Martin Luther King Jr. condemned the new guideline statement. Liberal elements in the Department of Health, Education and Welfare seem satisfied that the policy statement doesn't change anything significantly.

Actually, the meaning of the policy won't be known until decisions have been made regarding specific school situations. School patrons can only hope for -- and would do well to declare their support for -- abolition of arbitrary dates and systems.

The country, and the nation's school children, need relief from political and judicial management of public schools. School

trustees cannot efficiently administer school tax funds if they have to spend all their time trying to meet complex formulas devised by HEW officials. Principals and teachers cannot give direction and instruction to student bodies if classes cannot be structured in such a way as to place students according to their ability.

The federal government actually is hurting a child if it pushes him into a particular classroom simply to carry out a sociological experiment or to respond to the dogmatic demands of militants. Irrespective of race, creed or color, a child in a public school needs and deserves a good education. Washington is in no position to determine the best school -- or best classroom -- for a student to attend and study in. School authorities need wide latitude in placing children, and should be free to make judgments on the basis of a youngster's cultural background and ability to achieve.

If a child who is a slow learner is placed in a class with a number of fast learners, he may become unhappy and fall behind. And, of course, vice versa. The Supreme Court in 1954 said that separate schools could not be tolerated because they resulted in psychological damage to the youngsters. After 15 years, school authorities can properly assert that merging of schools, simply for the sake of abstract social conceptions, causes even more serious damage to a youngster's development. And what of the poorly prepared teacher, with limited cultural development, who is assigned to a class where advanced 12th graders from cultural advantaged homes can correct their teacher's pronunciation and interpretation of lesson material?

If the nation wants to promote genuine education, therefore, it will continue to build pressure on the Washington level for a relaxation of HEW's guidelines. The ultimate objective should be to embrace the principle of freedom of choice in schooling and development of curriculum "tracks" that will allow different educational paths for students of different abilities.

Federal coercion certainly has no place in an effective educational system. The federal government has the power to enforce its rulings of course, but it should never forget that in doing so it may very well drag the whole nation down to a lower level.

LIONS TO MEET

The Hart Lions Club will meet Monday, August 11 at noon in the Community Room of Farmers State Bank. A special program is planned.

VETERANS attending school under the G. I. Bill are reminded that it normally requires three months before they receive their initial subsistence check, which will be retroactive to the start of training.

WEEKEND VISITORS

Mr. and Mrs. W. B. Sanders and Mr. and Mrs. A. T. Sanders and family of Leveland visited in the home of Mr. and Mrs. B. N. Fancher during the weekend.

Practitioners Examinations To Be Given By IRS

Those who wish to take the enrollment examination to qualify to practice before the Internal Revenue Service may obtain application forms and other informational materials from Richard R. Bishop, Examination Coordinator, P. O. Box 594, Dallas, Texas 75221. Bishop may be reached by telephone at area code 214-749-2795, or in room 1132 at 1600 Patterson Street, Dallas.

District Director Ellis Campbell Jr., emphasizes that the right to represent clients in tax and other matters before

IRS is limited to those who meet the highest standards of technical proficiency and ethical conduct.

The examination will be held in the Dallas District Office on September 29 and September 30, 1969, for those tax practitioners who are not attorneys or certified public accountants.

Applications, accompanied by a fee of \$25 payable to the Internal Revenue Service, should be sent to Director, Audit Division, Internal Revenue Service, Washington, D. C., 20224, by August 31, 1969.

**August Foods
Are Plentiful**

August is Sandwich Month, and right in line with good sandwich eating is the plentiful supply of wheat products, reports the Texas Agricultural Extension Service.

Flour, bread, pastries, buns and rolls -- all are expected to be abundant.

Also reported plentiful by USDA's Consumer and Marketing Service are peanuts and peanut products, fresh pears, nectarines, watermelons, limes, summer vegetables and onions.

California production of Bartlett pears is expected to run about four percent larger than last year. Nectarine output will be slightly higher and summer watermelons are expected to total about four percent more than a year ago.

Fresh lime output is expected to be slightly less than last year, but sharply more than the crop of two years ago.

Local and commercial supplies of summer vegetables should be seasonally heavy in August --- indicating a wide selection. Total planting for late summer onions is estimated at less than two percent below a year ago when the largest acreage since 1951 was planted.

PASTURE AND FORAGE CROPS SHORT COURSE-- New grasses, weed and brush control and forage programs for beef and dairy producers will feature the program for the annual Pasture and Forage Crops Short Course to be held at Texas A&M University June 26-27. A. C. Novosad, Extension pasture specialist, said the formal program will begin at 1:30 p. m. on June 26 in A&M's Memorial Student Center. It is sponsored by A&M's Crop and Soil Sciences Department and is open to any person interested in improving forage production on his farm or ranch.

DOUBLING UP--Nearly twice as many persons are able to make the trip on ASTROWORLD's Alpine Sleighs this season since the sleighs have been coupled, virtually doubling the capacity of one of the family amusement center's most popular adventures, along with the all-new Bamboo Shoot log flume feature. ASTROWORLD is open daily from 10 a. m. to 10 p. m.

**IT'S AN IDEA
HOME DECORATIONS**

Plant care even when you're away is possible with this scientific watering system because the flow of water into the soil is actually determined by the plant. The unit holds enough water to last most plants for several weeks, is an attractive double-walled plastic container either with a clear or wood grain finish. It will accommodate a standard 4-1/4 inch clay pot of a 4-1/2 inch plastic pot.

National Safety Council Reports July Accidents Total \$67 Million

Traffic accidents in the Lone Star State during the past month picked the pockets of Texans to the tune of over \$67 million, the Texas Safety Association reported today.

While preliminary reports indicate that rural fatalities, injuries and property damage cost Texans some \$25 million in the past four weeks, urban accident costs range up a staggering \$42 million tab.

When all reports are in, the Safety Association further reported, July automobile crashes on Texas' streets and highways are expected to put traffic costs for the first seven months of the year over \$475 million.

Costs of accidents are based on a formula supplied by the National Safety Council.

Noting an 18 percent increase in fatalities and an 11 percent increase in accidents on Interstate Highways in Texas during the past month, as

compared to a similar period in July, 1968, the Safety Association called on the state's drivers to observe the following rules when traveling on high-speed roads:

- * On entering a freeway, pick up speed quickly to match the flow of traffic.

- * Choose a lane and stay with it. Signal well in advance if you must switch lanes.

- * Keep right if you have to drive slower than other traffic.

- * Leave plenty of space between your car and the vehicle ahead for emergency stopping. At 60 miles per hour, you need at least 450 feet to stop safely on dry roads.

- * If you have car trouble, get your vehicle well off the highway to make repairs.

- * Watch for changes in speed limits. Decrease speed when driving at night.

- * On long drives, take a

break in driving every hour. Many safety rest areas are provided along Texas Highways.

* Plan exits in advance. Decrease speed sharply once you are on the exit ramp.

Bright Future

Present indications are that 25 countries propose adopting or expanding their use of nickel and nickel alloys for coinage in 1969 or 1970. These changes will involve 41 denominations.

FARM CO-OPS AND NEW LENDING LAW--Farm cooperatives which extend credit should carefully study the provisions of the new Truth in Lending Law. It went into effect on July 1. Johnny Feagan, Extension farm organization specialist, said the government is not attempting to regulate the amount of interest or charges made to customers. Instead, the act simply enables customers to examine in detail the credit terms of the sale.

High-Pressure Operation

Test chambers capable of duplicating pressures found many thousands of feet under the sea are being used to evaluate models of deep-submergence research and rescue vessels. One such chamber uses 750 tons of nickel-containing steel and has walls 16 inches thick.

Join the fun during the celebration!

Dear Editor

My Hometown Editor
Amarillo Daily News

Dear Editor:

I would like to submit my hometown, Hart Texas for your consideration in the "My Hometown" contest. I do not know what other information you need, aside from the letter, itself, but will give you some history pertaining to the town.

It was founded by W. T. Hart, near the turn of the century, when the post office was established in his home, on the Runningwater Draw, here in Castro County. His son, Percy Hart and daughter, Mrs. Ruth Hamm still live here, and he has grandchildren living there in Amarillo. By the time we arrived here in 1937, it had flourished and grown into a town which boasted of three grain elevators, three implement houses, two or three service stations, wholesale gasoline warehouses, grocery stores, two churches, blacksmith shops, lumber yard, drug store, laundry, cafe, rooming house, telephone exchange, school house, cotton gin, the post office and depot.

After the depression of the 30's Hart began to dwindle away, and in the 40's saw it almost deserted as businesses moved to other locations and houses were moved from the town site. The war years came and went, and slowly with the development of irrigations wells and production of abundant crops, it began to rebuild. It became an incorporated city in 1956, and apart from the 66 businesses now established here, we also enjoy a very modern, up-to-date school system, water and sewage disposal system, our very own newspaper, a volunteer fire department, paved streets, four churches, a domino hall, where our older men can meet and while away the hours, out from under their wives feet, and many civic organizations. Much activity centers around pri-

vately owned livestock feeding operations, a potato shed, and the grain elevators, cotton gins and warehouse farm service centers and agricultural spraying service, which all contribute their part in making this a thriving, prosperous community and to my way of thinking, the greatest place in the world to live. As for myself, I am simply a wife, mother, and citizen who believes that America is great because her people are great, and that this community contributes her proper share in perfecting that image. I never cease to thrill with pride, joy and love for my "Hometown, Hart". My contribution follows. Thank you so much for letting me sound off.

The Letter:

"Each week, since the "My Hometown" contest started, I have rushed to get my paper, thinking surely this week someone much more proficient with a pen than I, has written in glowing term of the greatest community on the Golden Spread, my "Hometown, Hart, Texas, U. S. A.", only to note with a twinge of disappointment, that if so, another has been selected so now I feel that I must try to set down in words what she means to me, and I'm sure to every other resident here. Perhaps, they like myself, are waiting for someone else to find words adequate to describe our wonderful community.

Travel 168 from Nazareth to Olton, highway 194 as it bears Northeast to Southwest from Plainview to Dimmitt or highway 145 East to west from Kress to Lazbuddie, and you slice right through a town as big as its name--Hart, Texas. People--my people, hurry to and fro on their busy schedules, and one can almost see and feel it pulsate and vibrate as its life blood, the friendly, compassionate, wonderful people who live here go about their daily activities.

Perhaps to people driving through, Hart would seem to be just a hick town, but to those of us who live here, it is the greatest little city on earth, and as one of our residents has often said, its name should have been spelled H-E-A-R-T. Nowhere could you find a place whose heart is any bigger, or it's arms spread any wider to shelter, protect and nurture those who seek a haven from the storms of life, within her bosom. Your sorrow becomes her sorrow, your joy her joy, your hopes her hopes and your achievements her achieve-

ments. Once you have passed this way, stopped to abide for a little while, and go on your way, you never again need to walk Life's pathway alone, for you have become a cherished part of her, and she goes, grows and glows with you as a record of your deeds come back to her.

It was here that my husband was born and reared, went away to serve his country in World War II and returned. It was here that I came as girl of eleven, thirty two years ago. It was here that I finished high school and met and married the light of my life. It was here that I bore three precious children, and here twenty years later, we laid two of these treasured jewels to rest, after separate automobile accidents claimed their lives, just one short month apart and here, that we learned first hand, of the love and compassion that she bestows so generously upon her own.

It is the streets of this little town that will ever beckon us, no matter where life may take us, not streets paved with pure gold, as Heaven is pictured to us, but streets that are paved with the gold of friendship and love, of companionship and compassion of laughter and tears --- not Heaven, itself, but just next door to it --- Hart, Texas, U.S.A., my "Hometown".

Written by Marguerete McLain of Hart.

Decorating

Wallcovering Thinks Young

A noted authority in the field of wallcoverings, James Seeman Studios, Inc., has developed wallcoverings which enable Mrs. Housewife to create different moods for different rooms by a do-it-yourself application. Well known artists have contributed to the mural series, which is continuously updated by the addition of new scenes and themes.

The new wallcovering spectrum includes tones and combinations which would have been considered "way out" less than two years ago, but now come in stripable, washable materials that are easy to apply (and remove) and simple to clean. The collection is available at all leading wallcovering stores and department stores throughout the United States. (NP Features)

LEWIS LLEWELLYN

Greatest Week In History

"This is the greatest week in the history of the world since the Creation," President Nixon told Astronauts Armstrong, Aldrin, and Collins, as he welcomed them back to earth after their epic round-trip voyage to the moon.

Certainly the feat of the three intrepid adventurers, backed by the technological resources of the National Aeronautical and Space Administration, dwarfed the achievements of many previous explorers.

For the first time in history, man had planted his feet on the surface of an extraterrestrial body.

Thus the way has been opened for future exploration of other planets. Perhaps Mars will be first, then Venus, then . . . who knows where this may lead us?

Some Disagree

But there are some who would not agree with the president's designation of "the greatest week."

One who would certainly disagree that the week of the moon-trip was "the greatest" would be Sen. Edward Kennedy—for that was the week in which Mary Jo Kopechne died of drowning in the senator's car, overturned in Poucha Pond on Chappaquiddick Island.

Also—Evangelist Billy Graham has expressed disagreement with the president, saying that several other weeks would have to be given consideration as contenders for the title of "greatest week."

Without detracting in any way from the significance of the moon-landing, which even Cairo Radio—not usually given to

praising Americans—hailed as "the greatest human achievement ever," one would have to agree that sober second thought might cause us to consider some other weeks as being even more important to the welfare of mankind.

Other Great Weeks

Consider, for instance, the week in which Christ was born.

That was an occasion when One Whose home was in the heavens came to this earth. It was the time when God showed us that His love for us was such that He wanted to express it in the only way in which we could understand it—by sending His Son to become a man, like us, so that He could tell us of God's love.

Then, think of the week of the crucifixion and the resurrection of the Lord. Certainly, no week can compare with that in its importance for the ultimate destiny of those who put their faith and trust in the Savior.

Some of us might also want to nominate other times for the title of "the greatest"—especially if we were thinking in terms of personal experience, rather than world-wide significance.

Sir James Young Simpson, the Edinburgh physician who discovered that chloroform could be used as an anesthetic, was once asked, "Which of all your discoveries do you consider the most valuable?"

"To me," he replied, "the most valuable discovery I have ever made was when I discovered myself a sinner, and that Jesus Christ was my Savior."

MOST BEARS HIBERNATE TWO TO SIX MONTHS A YEAR, SLEEPING SOUNDLY.

ONLY VETERANS who are disabled by injury or disease incurred in or aggravated by active service in line of duty are entitled to compensation, states the VA.

A VETERAN'S PENSION is generally not reduced when he is in a VA hospital and if he has a wife or child.

OIL DEPLETION-- Most Texas government leaders publicly denounced action by the U. S. House Ways and Means Committee that would, if accepted by both houses of Congress and the President, cut the oil depletion allowance from 27.5 per cent to 20 per cent.

Lt. Gov. Ben Barnes and Atty. Gen. Martin "deplored" the action. Barnes condemned it, and cited the contributions the oil industry has made and will make to Texas.

Martin charged that it will cut the amount of state taxes coming from the oil industry.

James Wilson, a researcher for the State Comptroller, disagreed. He says more money would come to the state if the depletion allowance was lowered. He figures that the oil and gas companies will raise prices to make up the difference and since state taxes are based on the price, the amount of money coming in should increase.

Governor Smith is withholding comment until more action is taken by Congress.

Mrs. L. McLain Is Chairman

The Castro County Service Unit Committee of the Salvation Army announces the selection of Mrs. Laurence McLain as campaign chairman for Hart. Mrs. McLain will head the team of volunteer workers who conduct the annual fund raising appeal in Hart. This appeal is scheduled to begin October 7.

Judge Raymond Wilson is County Service Unit Chairman for the Salvation Army in Castro County and Rev. Fred Brown is a Hart committee member. This committee administers the charitable work of the Salvation Army in Castro County.

Boys Ranch To Celebrate Rodeo's 25th Anniversary

The biggest Labor Day event of the Texas Panhandle is expected to attract a record crowd when the nearly 350 boys of Cal Farley's Boys Ranch celebrate the silver anniversary of the annual Boys Ranch Rodeo.

More than 100 of the boys will compete under R.C.A. rules in the riding contests that will be held on Aug. 31 and Sept. 1 at 2:30 p. m. each day. Considered the only one of its kind in the nation, the rodeo was witnessed by approximately 10,000 people in 1968. Among those attending this year will be many of the Ranch's former boys and their families who will have a reserved section in the rodeo arena.

Other rodeo highlights will be the presentation of trophies to the Senior and Junior All-Around Cowboys, the crowning of a queen, and the appearance of the Boys Ranch Marching Band. Each of the Ranch's boys will have some part in the rodeo. Those not appearing as contestants will be in specialty acts, park cars, sell soft drinks and pop corn, or help with the numerous jobs connected with the rodeo production. Giant-size barbecue beef sandwiches will

BOYS' LONG HAIR CAN AFFECT SKIN

The concern over long hair for boys has led to the revelation that it can be a major cause of problem skin.

Psychologists say that between the ages of 11 and 18 a boy becomes hyper-sensitive, hyper-critical, and hyper-self-conscious—it's called the hyper-phase—and long hair is just one of the many hyper-phase fads and notions he may try in order to find what is "right" for him.

But while most girls are used to the problems of controlling long hair, a boy is less apt to keep his hair as clean as he should because he finds that the oil that develops on it helps him to control it. And it is this accumulation of excess oils that can create and spread an acne-like skin condition.

There is no one prescribed cure for this problem skin, but dermatologists stress that a rigorous regimen of cleansing is of the utmost importance in controlling its spread. Today they recommend a liquid cleanser with anti-bacterial action for both the face and the scalp. And the most recent development, the foaming Hyperphaze cleanser—named after these skin problem years—adds cumulative protection.

For shampooing, authorities say that massaging about 1/2 teaspoon of the Hyperphaze liquid into the wet hair, adding more warm water for more lather, starts the action against the bacteria-spreading oils. They remind that any after-shampoo conditioner should be greaseless, to avoid putting oil back on the hair.

Whether it's long or short, hair that is properly cared for can help reduce the skin problems of those hyper phase years, say the experts.

DANGER PERIODS

June and July are peak months for drowning danger, reminds Liberty Mutual Insurance Companies. Last year nearly one third of all drownings occurred during these two months. Have fun swimming and boating this summer—but be careful too.

be sold to visitors who arrive early.

Tickets for the two rodeo performances may be obtained in advance at the Boys Ranch office, PO Box 1890, Amarillo, Texas, or by calling 372-2341. Reserved box seats are \$2.50, and general admission is \$1.50. Children and servicemen in uniform will be admitted for 75¢.

Tax Man

Sam Sez:

It may be just the time of year, but those taxpayers receiving a notice from the computer that they owe some tax, due to one reason or the other, usually think that the day was a lot longer than it really was. If you owe the tax it's better to send back the notice with a nice check attached and leave this problem behind you even though you may have to borrow the money. Taxpayers who procrastinate on paying Internal Revenue for taxes due usually end up with a levy on their bank account or their pay check.

Internal Revenue simply follows the law, step by step. They don't want to be mean but you'd better believe the law is very firm. However, if you don't owe any tax it's another matter. It doesn't pay to lose any time in writing a nice friendly letter to the Director of the Service Center pointing out that they are mistaken with the reasons why. This will usually result in Internal Revenue correcting the error or your getting a letter that points out your mistake that you missed. By acting promptly you will not run into trouble, but if you owe, it pays to pay.

USE INSECTICIDES ON COTTON ON BASIS OF NEED-- Because of the many problems brought on as a result of continued insecticide use, today's cotton producer must carefully weigh the insect situation in his field, study the alternatives, and make control decisions on the basis of his own insect situation, says John Thomas, Extension entomologist. The first major decision is when to begin treatment.

HUNGER-- State Department of Public Welfare officials declined to comment on a huge report of hunger in Texas, as made by the U. S. Commission on Civil Rights, since they had nothing to do with the study.

Report says that out of every ten families who live in poverty in Texas, nine get no assistance from Federal Food Programs. It further estimated that 26 per cent of the families in Texas live in poverty compared to a national average of 15 per cent.

Ten Times Older

Although nickel was only isolated as an element 200 years ago, coins minted in Bacteria more than 21 centuries ago were similar in composition to our present-day copper-nickel coins.

Well-Traveled Metal

Nickel is Canada's 4th greatest export. The versatile element, used in more than 3,000 alloys, is shipped to some 40 countries.

Smoking and Your Health

CIGARETTE SMOKING: A Growing Danger

Unlike the smoke rings that lazily rise to the ceiling and dissipate, the dangers of smoking remain. Study after study confirms the grim report issued by the Surgeon General's committee in 1964.

Our hospitals and our cemeteries testify to the accuracy of that report and those which followed:

Over 300,000 Americans will die prematurely this and every year from diseases associated with cigarette smoking, according to former Surgeon General Luther Terry. This is almost ten times the number of Americans killed in Vietnam in the past eight years; it is six times the number of people killed on our highways in traffic accidents.

How will they die? Lung cancer is a major cause, killing at least ten times as many people as died from this disease in 1936. Heart disease, a major killer in its own right, takes an extra toll among cigarette smokers. Emphysema, a crippling and irreversible lung malfunction, which eventually is fatal, once rare, is now becoming more common among heavy smokers. All in all, the death rate among men who have been smoking since they were teenagers is double that of non-smokers.

Despite these grim figures, nearly 4,500 children smoke for the first time, every day, according to the National Congress of

Parents and Teachers, which is now engaged in a program to discourage teenagers from becoming smokers. Moreover, it points out that one-third of our high school students smoke and that by the time they reach 18, half the nation's teenagers are regular smokers.

Small wonder then that serious steps are being taken to discourage smoking. For one thing, new regulations will undoubtedly strengthen the warning that must be carried on each package of cigarettes. The warning now reads "Caution—cigarette smoking may be hazardous to your health."

For another, the FCC is continuing to press for banning all cigarette commercials from television and radio. Advertising Age, a trade publication, has reported that advertising men privately concede it will be just a matter of time before this is accomplished.

Also recognizing the hazards of smoking is the State Mutual Life Assurance Company of America of Worcester, Mass. In April, 1964, the company became the first major insurer to offer a life insurance plan with a lower premium on new policy issues for persons who have not smoked any cigarettes for one year or longer. State Mutual realizes that in most cases, damage from smoking cigarettes is reversed after smoking has stopped. Thus, non-smokers are better insurance risks and merit lower premiums.

Music Maker

The master dies from which thousands of copies of a single phonograph record are made are electroformed of pure nickel. Electroforming is a plating process that can reproduce designs with extreme accuracy.

Changeless Change

The most widely used coinage material in the world—an alloy of 75% copper and 25% nickel—is used in more than 270 denominations circulating in 94 countries. The United States has used this alloy for its five-cent piece since 1866.

'Texas Originals' Production To Be Presented August 10

The cast members of "Texas", Palo Duro Canyon's outdoor drama, will stage a production of their own August 10, called "Texas Originals." The show will include original choreography in ballet and jazz, songs from popular Broadway musicals and from operas, and piano selections of Gershwin's Rhapsody in Blue as well as original piano compositions. There will even be an excerpt from a Shakespearean play, and a display of art work, all presented by those selected for the "Texas" cast of 1969.

"Texas Originals" is being produced to raise a scholarship fund for a well-deserving college student in the cast to be named by the directors and other selected members of Paul Green's "Texas." The scholarship is not limited to a WTSU student, but to any college student who is in the "Texas" cast regardless of his or her major. The recipient of the scholarship will be named the night of "Texas Originals".

The show will be for one

night only on Sunday, August 10 at 8 p. m. in the Branding Iron Theatre in Canyon. A minimum donation of one dollar is requested and any further donation will be graciously accepted for this worthy scholarship.

KABOBS SPARK FLAVOR

Spark the flavor of outdoor grilled hamburgers and franks with fruit kabobs. Thread fresh fruit chunks with canned pineapple chunks on skewers. Brush with kabob sauce and grill over hot coals 7-10 minutes, turning frequently. Continue to brush fruit with sauce during grilling. To make sauce combine 1/4 cup (1/2 stick) butter, 1/4 cup pineapple juice, 3 tablespoons honey, 6 crushed fresh mint leaves and 1/2 teaspoon cinnamon. Heat until mixture is slightly thickened, Mrs. Gwendolyne Clyatt, Extension consumer marketing specialist, completes.

COUNTY AGENTS MEETING

From Aug. 3-5 don't expect to find your local county agricultural agent in his office. Chances are good he will be in Houston for a very important meeting, the state association's annual meeting. It's their opportunity to get together to discuss mutual problems; to recognize those who have helped them over the years; hear addresses by leaders of the state; recognize their outstanding members, and for entertainment and recreation.

PINEAPPLE A HIT

Attract listless summer appetites with fruit in family meals, suggests Extension consumer marketing specialist Gwendolyne Clyatt. Fresh pineapple is sure to make a hit, and is available in local market at moderate prices. One cup of fresh pineapple furnishes almost half of the daily requirement of vitamin C. A two-pound pineapple will yield about six servings.

Tax Man Sam Sez:

If you have found yourself wishing that somebody had hanged Alexander Graham Bell with a potato vine when he was a mere boy, consider the Internal Revenue folks. During the recent income tax filing season they had about 300,000 taxpayer calls. More than 125,000 additional taxpayers dropped by for a visit with the good tax folks. Since the Dallas District receives about 1,600,000 tax returns, it would appear that about one taxpayer in four decided to have a few words with Internal Revenue before he voluntarily complied.

Some 49 per cent of the tax returns come from the Dallas-Fort Worth combined metropolitan areas, but 3/4 of all the telephone calls were received at the Dallas and Fort Worth offices. 54 per cent of the visitors also showed up at the big city offices. Wichita Falls won the popularity contest among the other seventeen offices. Lubbock, Amarillo, Abilene, Odessa, Midland and Plainview had more telephone calls than walk-in visitors, but the margin was narrow. The farm and small town areas appear to have had more visitors from outside the headquarters city, and these people naturally were walk-in visitors, since apparently they came to town for this purpose. Tyler, San Angelo, Sherman, Texarkana, Lufkin, Big Spring and Vernon were in this group. Longview, Brownwood and Pampa bucked the tide for their types of communities and had more telephone calls than walk-in visitors. The next time you feel that you are doing nothing but answering your telephone just remember --it's easy to find proof that Internal Revenue finds time for lots of other things besides talking on the phone.

Local Scouts Participating In Wilderness Canoe Trip

Two members of Boy Scout Troop 246, David and Theron Hawkins, are among the 14 high ranking Scouts from the South Plains Council participating in a 10-day canoe trip in the wilderness area of Northern Minnesota and Canada.

The group, accompanied by veteran Scout leader Robert L. Hawkins, left Lubbock Saturday morning by commercial jet enroute for Ely, Minn.

The Scouts virtually abandoned civilization for 10 days as they put their canoes into Moose Lake, north of Ely, at Charles L. Sommers Wilderness Canoe Base, operated by the Boy Scouts of America.

The base serves as the starting point for more than 3,000 Scouts and Explorers annually.

After leaving the base camp, the Scouts carried all the provisions and equipment for the 10 day voyage which takes them

through a series of glacial lakes.

The trip also includes several portages over which they will carry their packs and canoes from distances ranging up to three quarters of a mile.

Gary Cooper and Gary Gregory of Troop 220, Olton are also making the trip.

Stainless Speaker's Chair

The Speaker's Chair for Parliament House in Gambia, Africa, has a base, back and canopy support of welded nickel stainless steel tubes.

Psychedelic Dance Floor

A dance floor, fabricated of stain-finish nickel stainless steel, reflects psychedelic lighting for dancing at The Bird's Nest in Twickenham, England. The floor will last for decades, is easy on the feet, easy to clean and is readily transportable.

School Calendar 1969 -70

August 21-22 -- Teachers In-Service Training (2 days)
 August 22 -----Registration all students
 August 25 -----Opening day of School
 September 8 ---Regular board meeting
 October 3 -----End first six weeks (30) days

October 13 ----Regular board meeting
 October 27 ----Faculty meeting - Dismiss 3:00
 November 10 --Regular board meeting
 November 14 --End second six weeks (30) days

November 26 --Begin Thanksgiving holidays --2:00
 December 1 ---Resume school
 December 8 ----Regular school board
 December 15---Faculty meeting - Dismiss 3:00
 December 22-23 --Mid term exams --Dismiss 2:30 each day
 December 23 ----End third six weeks (25) days

December 24 - January 5 --Christmas Holidays
 January 5 ----Teachers work day (1 day)
 January 6 - ---Resume school
 January 12 ---Regular board meeting
 February 9 --Regular board meeting
 February 13 --End fourth six weeks (29) days

March 2 ----Faculty meeting -- Dismiss 3:00
 March 9 ----Regular board meeting
 March 13 ---District XVI TSTA Teachers meeting (No school)
 March 27 ----End fifth six weeks (29) days
 March 27 ----Begin Easter Holidays 2:00
 April 6 -----Resume school
 April 13 ----Regular board meeting
 May 4 -----Faculty meeting - Dismiss 3:00
 May 18-19--Final Exams --Dismiss 2:30 each day
 May 19 ----End sixth six weeks (32 days) 175 days
 May 19 ---High School Graduation 8:00 p. m.
 May 20 ---Teachers work day (1 day)
 May 20 ---Junior High Graduation 8:00 p. m.

**Yes. We have
 NEW High-Yielding
 DEKALB
 BRAND
 PALO DURO
 Wheat Variety!**

Especially bred for this area. Delivers big yields of high test weight grain with excellent milling, baking qualities. Short, stiff-strawed, takes higher fertility and irrigation. Medium-early maturity, excellent tillering. And it's breeder seed. Plant a portion of your acreage this year . . . seed your entire acreage next year. Discover this better wheat now . . . yours from nine years of DeKalb research.

Federal Registration Given Insecticide 'Di-Syston'

Federal registration for the foliar application of DI-SYSTON liquid Concentrate on grain sorghum for greenbug control has been announced by Dr. Walter H. Grimes, product manager for Chemagro Corporation, Kansas City, Missouri. DI-SYSTON systemic insecticide has been widely used for aphid control on many other crops in the United States.

Since the first outbreak of the greenbug (aphid) on sorghum in 1967, DI-SYSTON Liquid Concentrate has been used experimentally as a control measure with great success. With the receipt of federal registration, the way is now cleared for ground or aerial application of the chemical wherever greenbugs have become a problem on sorghum.

DI-SYSTON L.C. is an emulsifiable concentrate containing six pounds of active ingredients per gallon. It is now registered to be applied at the rate of 1/3 pint (4 ounces active ingredient) to 2/3 pint (8 ounces A.I.) per acre. Two applications may be made per crop season. The last application can be made up to seven days before harvest of the grain, or 28 days prior to use of the plant as forage or fodder.

DI-SYSTON kills aphids on contact, then is absorbed rapidly by the leaves of the plant and moves into the sap stream to carry on its work through long-lasting systemic residual action. When aphids begin to feed, they are quickly killed by the insecticide carried in the juices of the plant.

After the material has been absorbed into the plant tissues, beneficial insects such as lady-beetles, lacewing flies, syrphid flies, and wasp parasites can carry on their work unharmed by the chemical residue.

Research data from tests

conducted on extensive acreage in Oklahoma showed that Di-syston L.C. at 4 ounces A. I. per acre (1/3 pint) gave better than 99 per cent control of greenbugs within 72 hours. Pre-treatment counts had established the aphid population at 5,000 0 per plant.

Phytotoxicity studies throughout the major grain sorghum producing areas, carried out on many varieties ranging in size from very small plants up to the milk stage of the seed head, showed that DI-SYSTON was not harmful to sorghum foliage.

In 1968, explosive outbreaks of the greenbug, *Schizaphis graminum* (Rondani), occurred on grain sorghum throughout a major portion of the sorghum-producing region of the United States. Severe infestations were reported in Arizona, California, Colorado, Kansas, Nebraska, New Mexico, Oklahoma, South Dakota and Texas. In these states, the greenbug infested more than 7 1/2 million acres, and damage was estimated to exceed 68 million dollars. Populations of 30,000 to 40,000 insects per plant were observed, and thousands of acres of small grain sorghum were killed.

Taxonomically, the sorghum greenbug is considered to be a biotype of the species of greenbug which infests wheat and some minor distinguishing differences have been noted in the field. It has been discovered that the sorghum aphid is able to withstand high temperatures. No adverse effects were noted at temperatures of 106 to 109 degrees F.

When feeding on sorghum, colonies of the greenbug generally start on the bottom leaves and move upward. Normally only the underneath side of the leaf is infested. Heavy feeding

by this insect causes the leaves to turn reddish in color first, then brown.

Oklahoma tests in 1968 indicated an overall average yield increase of 33 per cent resulted from greenbug control. This would mean a return of \$6 for ever \$1 spent for treatment. Chemagro officials estimate a cost of 66¢ per acre for treatment with DI-SYSTON, when applied at the recommended rate of 1/3 pint per acre.

There's Trimethylxanthine In Your Cup

It quickens your mind, brings vigor to your tired muscles, sharpens your taste and generally makes you feel good. Minute amounts of it are found in your coffee cup. It's trimethylxanthine, better known as caffeine.

It was first discovered in 1820 by German chemist Ferdinand Runge. But primitive man knew about coffee's good effects. Coffee grew wild on the plains of Ethiopia, and man pounded the berries with stones and mixed the powder with animal fat to form balls of "energy food". African warriors carried ready-to-eat rations on long trips when there was no time for cooking. They found that the coffee-fat mixture not only satisfied their hunger but was good for quick energy as well.

Both tea and cocoa are nearly as rich in stimulants as coffee. But sleeplessness is usually determined by each person's subconscious. Coffee is actually beneficial without harm, because caffeine stimulates without being stored in the body and causing addiction. Modern industry experts have discovered that workers achieve a higher level of productive efficiency following their coffee breaks. (NP Features)

'Rough' Fish In A Local Lake

By JIM STEIERT

Competition between any species of fish is severe, and even in the best surroundings, only the most hardy fish will survive.

In many lakes, desirable fish are forced into ruinous competition with "rough" fish, such as carp. Because rough fish deprive game fish of much of their vital food supply, it is often necessary to control them.

Rough fish, such as carp, take up their food from the lake bottom by means of their extensible, toothless mouths, which they use like vacuum cleaners. The insect food supply of many of the game fish is thus destroyed, for these insects must be well on their way to the surface before gamefish species can utilize them as food. Because the carp get the immature insects before they leave the bottom, gamefish are soon competing under unfair conditions with the rough fish population.

An example of this would be Buffalo Lake, at Umbarger. Rough fish in this lake have been a constant problem, and with the increase in fishing intensity for desirable game fish through the years, these rough fish went almost unmolested for an extended period of time, and literally took the lake over. It became obvious to wildlife personnel at the lake that these rough fish had to be reduced or destroyed in order to improve game fishing conditions.

For this reason it was decided to kill all the fish in Buffalo Lake, and restock it with desirable game fish. To accomplish this, a chemical attack was made on the rough fish with Rotenone. Commonly used as an insecticide in this country, Rotenone has proved quite effective in killing off unwanted populations of fish. It acts

upon the respiratory system of fish, and quickly kills them, with relative safety to surrounding areas. Also, it is easy to apply, and economical to use.

At Buffalo Lake, steps were first taken to reduce the amount of water in the lake, in order to cut down on the amount of chemical needed to treat the water, and also to restrict the fish to a limited area, which is more easily attacked.

Because waters which have been treated remain toxic to fish for periods of time which vary with the water temperature, control measures at Buffalo Lake were delayed until spring weather warmed up the water, and also because the warmer the water, the sooner re-stocking can take place. Once the water became warm enough, the lake was treated with Rotenone.

Within seven days the lake was again safe for stocking. Game managers then released numbers of Crappie and Channel Catfish, primarily because these are two of the most widely favored panfish varieties in this area, and their chances of thriving in Buffalo Lake are quite good.

As of now, the lake is closed to fishing for an extensive period of time, in order to allow these fish to proliferate. A stocking is not considered successful until reproduction under natural circumstances occurs. When these desired game fish begin to reproduce successfully, and their numbers become sufficient to merit it, Buffalo Lake will again be open to public fishing.

The long wait may be a bit annoying, but many of the Texas Panhandle fishermen who fish at this lake will soon be finding vastly improved fishing.

TEXAS CALF CROP UP

The 1969 Texas calf crop is expected to total 5,184,000. According to the Texas Crop and Livestock Reporting Service, this compares with 4,948,000 for last year and is the highest since estimates began in 1924. The nation's calf crop is estimated at 44,473,000 head, one percent above last year.

PERKY ICE CUBES

Garnished ice cubes add a gay note to many fruit drinks. Fill an ice cube tray about two-thirds full of water. Boiled water tends to make the cubes clear. After the water freezes slightly, add an orange, lemon or lime wedge, or a pineapple tidbit, fresh berry, cherry or grape. Finish filling with water and freeze again, suggests Extension Consumer Marketing Specialist, Gwendolyne Clyatt.

National Barrow Show Set In Minnesota For Sept.

Nearly 10,000 copies of the Premium List for the 1969 National Barrow Show, Sept. 8-9-10, in Austin, Minn., are now in the mail.

The 80-page booklet is being mailed again this year to purebred and commercial hog producers, farm school personnel, county agents and extension directors, vocational agricultural instructors, and a host of other interested persons in the United States.

The Premium List describes in detail the \$40,000 in prize monies awarded to exhibitors. Rules and regulations governing the several divisions of the three-day show -- purebred, crossbred, truckload, carcass contest, and judging contests -- are also included in the book.

The final deadline for boar,

gilt, and single barrow entries is Aug. 11. Absolutely no entries will be accepted if postmarked later than this date, Saturday, Aug. 30, is the deadline for entry of truckloads of market hogs. All entries must be postmarked on or before this date. Opening day activities will commence on Monday, Sept. 8, and conclude on Wednesday, Sept. 10.

A copy of this booklet, including entry blank for the 1969 National Barrow Show, may be obtained by mailing a card to the National Barrow Show, Austin, Minnesota 55912.

The kids in the grandstand are yelling, "Strike him out!" and our young pitcher is going to do exactly that. This is his day for a shut-out game . . . his day to win.

He's feeling pretty good about it, and who's to blame him? But what if things had gone the other way? What if some other boy had been warming up in the bullpen, about to have taken his place? But he is a well-balanced youngster, and he would have taken that in stride, too.

He has learned about being a good sport, about regard for his fellow men, and about many other equally important things in Church. For, like thousands of other American youngsters, the Church already plays an important part in his life. That is one reason why his parents have faith in the fact that he will grow up to be a pretty fine man.

Looking at the economic progress of the community of Hart in Castro County, there seems to have been advancement by the decade. In the first decade of this century, settlers were brought in by the train load. They came from all areas of the States and most had farming in mind when they settled here. However, it was during the decade of World War I that wheat and grain became king of crops in the Hart area.

The use of horses for power sources denied our farmers from use of many acres, however. In the roaring twenties things really began to roar here with the incoming use of tractors, large plows and gasoline powered harvesters. In those days it was not uncommon to hear tractors roaring all night long. The age of agricultural industrialization had begun.

With the coming of the railroad, all Hart was in a booming, festive mood. The skyscrapers of the plains began to appear on the horizon. These grain handling facilities loaded wheat from thousands of acres which were cultivated with very little capital investment. The decade of the dirty thirties is characterized by the introduction of irrigation from our fine underground formation. Hart is sitting over the thickest water bearing formation south of the Canadian River.

The decade of World War II is portrayed by the expansion of irrigation to include nearly all the acreage in the Hart area. The roar we heard then was of motors pumping water night and day. With the fifties came the mighty surge of cotton as a cash crop. Since cotton required the use of many dollars in its production, the need for capital sources was met by the establishment of Farmers State Bank.

This bank was founded by Hart men with the idea of complete community development in mind. Since so much capital was being used for fertilizer, seed, manpower and increased production, these men knew that capital had become a tool for farming.

On our 12th anniversary this year we at Farmers State Bank know that we have fulfilled the thinking of our founders. We have become a vital part of the agricultural development of Hart and its area.

Now we must not stop here. We feel we have made substantial growth in view of the poor crops lately as has the town of Hart. This growth for Hart, in any manner whatsoever, is the basic premise at this Bank. We want industry to recognize the advantage of the area. We therefore promise the area that any opportunity for growth will not be overlooked.
