

Kracker KrumbS

Take away agriculture, and you've taken away the foundation of our community and nation.

Add something for the betterment of agriculture, and you've added that something that will benefit everyone—farmers and businessmen alike.

And that's something that's going to be done right here in our area through a representative of the Western Cotton Oil Company.

The improvement of our basic money crop—cotton—is the purpose of this non-commercial program.

The representative is Mr. Ray F. Saunders, who comes to us from Greenville, and who is establishing residence in Munday.

The program is that of experiments in growing cotton, various varieties of cotton, for the purpose of determining what variety is best suited for this area.

The program is not just for Munday, but for a large cotton producing area in Haskell, Knox and Baylor counties.

It's a free service to farmers, a program from which its sponsor does not expect remuneration except in a long-range program of growing more cotton per acre and better cotton than has ever been grown before.

The work is done through committees in each community, working in cooperation with Mr. Saunders and through their community gins.

Committees are to be set up at Weirnet, Rochester, Knox City, Vera, Seymour, Munday, Goree, Rhineland, Hefner and Red Springs.

These committees will be of farmers, working with farmers, in the planting and studying of cotton produced in the area.

Different varieties of cotton will be planted, possibly side by side in small plots, and the crops will be studied during all stages of growth and production.

Growth of plant, health of plant, its production, resistance to drought, etc.—everything to be learned about cotton will be studied during the experiment period.

It is hoped that in one or two years farmers and their committees can determine just what cotton produces best and is best suited to a given area under all conditions.

And that given area will be that area embraced by the three counties where the studies have been made.

Each gin and its community committee will select the varieties of cotton they are particularly interested in. These will be planted and cultivated and studied under the same conditions and care.

Mr. Saunders will supervise the program carried on by the various committees.

If one variety turns out to be a flop, then it's not the variety to be grown here. Selection of the best variety can be determined by the ten communities studying the improvement program in as many communities.

And we reckon Mr. Saunders knows cotton.

He has spent 10 years as county agent, and 20 years with the U. S. Department of Agriculture, and cotton has been much of his work.

"We learn to do by doing." That's an old adage that has been repeated as long as we can remember.

It'll probably be put into practice during this cotton improvement program. If a farmer can learn to grow more cotton and better cotton by growing different kinds of cotton and selecting (Continued on last page)

Knox County Hospital Notes

Patients in the Hospital February 19th:

J. W. Michael, Munday; Baby Berkenfeld, Munday; Mrs. Tom Speck, Aspermont; Mrs. G. M. Sharp, Rochester; J. E. McMeek-en, Rochester; Mrs. W. L. Moore, Goree; Aquera Baby, Knox City; Mrs. E. S. Allen, Gilliland; Mrs. Refugio Alsidis, O'Brien; Mrs. Eva Strange, Munday; John Ray Underwood, Knox City; C. A. Hull, Knox City; Mrs. Ethel Branton, Knox City; J. W. Shytle, New Port; Ben Allen, Rule.

Patients dismissed since February 12th:

J. A. Reid, Munday; Marva Jean Dudensing, Old Glory; Mrs. Dalton Gore and baby, Vera; Johanna Sue Davis, Throckmorton; Dorse Blankenship, Goree; Mrs. J. F. Woodall, and baby, Knox City; Mrs. Ida Watson, Munday; Howard Spikes, Benjamin; Emma Barboza, Munday; Mrs. W. L. Mann and baby, O'Brien; Mrs. W. D. Norman, Rule; Mrs. G. W. Graham, Aspermont; Mrs. Oscar Hudspeth, Guthrie; Mary Sumpter, and baby, O'Brien; Mrs. Elmo Stephens and baby, O'Brien; J. S. Dunlap, O'Brien; Baby Girl Mills, Knox City; Ruben Ybarro, O'Brien; Bobbie Coppedge, Benjamin; Mrs. Josie Hester, Knox City; Edward Ford, Munday; Mrs. Leland Huntsman, Knox City; Eloisa Garcia and baby, Weirnet; Caroline Carmack, Rochester; Fred Brown, Benjamin; Mrs. R. C. Partridge, Munday; Jessie Vila, Births; Mr. and Mrs. F. J. Woodall, Knox City, a daughter; Mr. and Mrs. Dalton Gore, Vera, a daughter; Mr. and Mrs. O. W. Emerson, Knox City, a son; Mr. and Mrs. E. Garcia, O'Brien, a daughter; Mr. and Mrs. W. L. Mann, O'Brien, a son; Mr. and Mrs. Erna Barboza, Munday, a son.

Mission School At Baptist Church Draws Big Crowds

A very successful mission which attracted large crowds and more than usual interest was held at the First Baptist Church in Munday during last week. Around 400 people attended the closing session of the school last Sunday night.

The school was conducted by Rev. and Mrs. Rex Ray of Bonham, returned missionaries from China. Rev. and Mrs. Ray spent some 30 years in the mission fields of China and they spoke and taught from their many experiences there. During the school, pictures of interior China, the Chinese missions, etc., were shown to the group. While in Munday, the missionaries were guests of Mr. and Mrs. Jim Reeves, Mr. and Mrs. Leland Hannah, and other relatives.

ATTEND GIFT SHOW

Mr. and Mrs. E. W. Harrell spent the first of this week in Dallas, attending the gift show and purchasing merchandise for Harrell's Hardware and Furniture.

Three Aldermen Will Be Elected Here April 3rd

The annual city election for the City of Munday will be held on Tuesday, April 3, with H. P. Hill serving as election judge. It was announced Wednesday by Harvey Lee, city secretary.

Three aldermen will be elected to take the places of the following whose terms expire: E. W. Harrell, J. Weldon Smith and Winston Blacklock. At the present time neither of the retiring aldermen have indicated whether they will file for re-election, Mr. Lee said.

Applications for places on the ballot must be made to the City Secretary by closing time Saturday, March 3, it was stated.

Carry-over members of the city council are: Mayor W. R. Moore and Aldermen Don L. Ratliff and E. B. Littlefield.

Secretary of State John Ben Shepperd (seated, left) takes from Dr. W. M. Gambrell of Austin, president of the State Medical Association of Texas, the application for extension of a 50 year charter which founded organized medicine in Texas in 1901. The Medical Association seeks to extend its charter a second half-century. Standing (left to right) are trustees of the Association... which numbers more than 6,900 physicians and surgeons... Drs. F. J. L. Blasingame, Wharton; T. C. Terrell, Fort Worth, chairman of the board; Merton M. Minter, San Antonio, vice-chairman; and G. V. Brindley, Temple; and Tod Bates, Austin, executive secretary. Missing from the picture is Dr. E. A. Rowley of Amarillo, secretary of the board.

Charles A. Pruitt Receives Promotion

CAMP CHAFFEE, Ark.—Charles A. Pruitt of Munday, Texas, has been promoted to the rank of corporal by the 5th Armored Division.

A veteran of two years active Army service, Corporal Pruitt served with the 24th Infantry Division for 22 months in the Pacific Theater at the close of World War II. He is now assigned to Battery D, 71st Armored Field Artillery, Camp Chaffee.

He is the son of Mrs. Fleda Harris of Munday.

Dr. Joe Burton Publishes Book On Marriage

The editor is in receipt of a gift edition of the new book "Tomorrow You Marry" by Dr. Joe W. Burton, who was reared in Munday. The book is published by the Broadman Press of Nashville, Tenn.

The book presents marriage, not merely as a civil contract, but as a permanent relationship between two persons committed to one another in love and loyalty. The success of such a relationship depends upon character, emotional maturity, religious convictions and motivating ideals. It is a book for the counselors of youth and for the young people themselves.

Since January, 1946, Dr. Burton has served as editor of the Department of Home Curriculum of the Sunday School Board of the Southern Baptist Convention. A year later, he became editor of "Home Life," a Christian family magazine which now has a monthly circulation of 275,000.

A native of Texas, he was born at Munday, graduated from Hardin-Simmons University, Abilene, in 1929 and from Southwestern Baptist Theological Seminary in Fort Worth in 1932. After brief pastorates in West Texas, he went to the Home Mission Board of the Southern Baptist Convention, serving as secretary of education for ten years.

TO CAMERON MEETING

Robert Green and W. C. Nance attended a meeting of Wm. Cameron & Co. employees in Vernon last Monday night. Various matters pertaining to the lumber yards were discussed.

Goree Brotherhood To Meet Thursday

The Goree Baptist Brotherhood will hold its regular meeting at the Goree Baptist Church on Thursday night at 7:30 o'clock. It was announced Wednesday by Rev. S. E. Stevenson, pastor.

Rev. Temple Lewis, pastor at Weirnet, will be the principal speaker. All men of the church are urged to attend this meeting.

Have You Been Born Twice?

Jesus said verily, verily, I say unto thee, except a man be born again (John 3:16) tells how) he cannot see the Kingdom of God. Now this I say brethren that flesh and blood cannot inherit the Kingdom of God, behold I show you a mystery... read it in 1st Cor. 15:50.

CORRECTION

A regrettable error appeared last week in ad for the Banner Produce. The ad gave the price of Colonial White Leghorn Cockerels at \$1.90 per 100, whereas the price should have been \$2.90 per 100. We regret this error and are glad to make this correction.

Rains Bring Continued Hope For Moisture

Rain clouds stewed promisingly in the Knox County area last Monday, and faces turned skyward in anticipation of that long-awaited rain.

It came—but light spots and very heavy and accompanied by hail in others. Munday's light rainfall came during the afternoon Monday, while a heavy cloud to the westward gave promise of all we needed. The cloud veered to the north and east, however, missing the Munday area but without bringing us a tenth of an inch of moisture.

At Knox City the rain was heavier and accompanied by considerable hail, while on northward at Benjamin a heavy peeping of light hail was reported and still heavier rain.

The Gilliland and Vera areas received the brunt of this storm, however. A hard hailstorm visited this section, with hail covering the ground and drifting into the low places. Residents of both Gilliland and Vera reported rainfall ranging from two inches to almost three inches.

Tuesday morning dawned bright and clear, and people in and around Munday are still hoping for more moisture to add to this light shower.

Methodists To Have Laymen's Service

The annual Laymen's Day Service will be held at the First Methodist Church next Sunday. It was announced Wednesday by M. L. Wiggins, chairman of the board of stewards. This service will be at the school auditorium.

Dr. James B. Boren, president of Western University, Wichita Falls, will bring the morning message. Dr. Boren is one of the outstanding laymen and speakers of this area, and many will want to hear him.

This will be a worship program of interest to the church, and the public is cordially invited to attend.

Wagonmasters To Be At Goree School

The Wagonmasters, stars of KWFT Western Barn Dance, will appear at the Goree High School on Friday, February 23, the program beginning at 7:30 p. m.

The group will bring a comedy, music ballads and hymns, and enjoyment for the entire family. Admission will be 50 cents for adults and 25 cents for children under 12 years of age.

The public is cordially invited to come out and enjoy this fine show.

Many County People Visit Jail Sunday

Many people, young and old, representing all parts of Knox County, were in Benjamin last Sunday to visit and inspect the new county jail, which has just been completed at a cost of around \$85,000. They saw every portion of the new structure, from the front of the buff brick building which is to house the sheriff and his family, to the cells themselves which have all modern jail equipment.

The sheriff's quarters contain three bedrooms, two baths, living room, night office and a combination kitchen and dining room. All rooms except the office have thermostatically controlled wall heaters and are equipped for air conditioning.

The jail has a capacity of 20 prisoners, with provisions being made for easy, inexpensive expansion to a capacity of 28. One cell will be used as a dining room and equipped with a shower bath. In each cell will be four bunks. A hallway between the cells contains the plumbing, which is easily accessible for quick repairs.

Windows in the building are in steel sash, and floors and ceiling are of concrete reinforced with heavy steel. The juvenile wards, one for boys and one for girls, are equipped with steel bunks and showers. Another cell for women is also well equipped.

All doors in the jail portion are electrically operated from a hallway between the jail and sheriff's quarters, enabling the jailer to handle prisoners in complete safety.

The building has a double garage, and the rear and side of the jail proper is surrounded at a distance of 30 feet by a fence 8 feet and 3 inches high, topped by three strands of barbed wire. Posts are of steel and the fence of cyclone mesh wire. It is designed to prevent people on the outside going to the jail windows, as all cells are on the ground floor.

Many who visited the jail expressed their approval of this modern structure.

Mrs. Jack Benton spent the week end in Fort Worth with her husband, who is employed in a food market.

Program To Improve Cotton Being Started

Knox City Man Is Acquitted On Murder Charge

Lee A. Wampler of Knox City was found innocent in 51st District Court at Benjamin last week by a jury that deliberated for a little more than three hours.

Wampler, former Knox City night watchman, was charged in Judge Lewis Williams's court with the death of Guy Milford, cafe owner in Knox County, on February 23, 1950.

The jury heard arguments by District Attorney Roy A. Jones of Paduach, prosecuting attorney, and T. R. Odell of Haskell, and defense attorneys, W. T. McClain of Fort Worth and J. R. Balch of Seymour. A verdict was returned at 12:15 a. m. Thursday.

The defendant received a 10-year sentence in a trial held at Benjamin last May 24th. A change of venue and order for retrial was later granted.

Leroy McMahon, Farmer, Is Found Shot To Death

Leroy McMahon, 49, prominent farmer of the Cottonwood community, north of Goree, was found dead of gunshot wound last Monday at the home of his father-in-law, Mr. Wirz, who resides near Seymour.

Mr. McMahon's wife and a mother were outside the house when the shot was fired, and Mr. Wirz, who has defective hearing, did not hear the shot, according to reports. McMahon was found in the hall of the home, a 22-calibre rifle lying near the body.

Justice of the Peace C. C. Fancher of Seymour returned a verdict of suicide. Members of the family said Mr. McMahon had suffered from a stomach disorder for several years.

Mrs. McMahon is the former Rosalene Wirz, who taught school at Vera for several years. Mr. McMahon resided in this area for a number of years.

Funeral services were held at 2:30 Tuesday afternoon from the First Baptist Church in Seymour. Rev. S. E. Stevenson of Goree, officiated, and burial was in Riverview Cemetery at Seymour.

Besides his wife, McMahon is survived by his mother, Mrs. W. F. McMahon of Munday; two brothers, John of Munday and Homan McMahon of Goree, and five sisters.

Former Goree Citizens Passes At Littlefield

Freeman R. Jones, age 89, passed away Sunday, February 18, in his home in Littlefield after a brief illness.

Funeral services were held from the First Baptist Church in Littlefield on Monday, February 19, at 2:30 p. m. with Rev. Hemphill, pastor, officiating. Burial was in the Littlefield cemetery.

A native of Mississippi, he was a retired farmer and lived a few miles north of Goree for a number of years prior to moving to Littlefield about 25 years ago.

He is survived by his wife, three sons, Otto Jones, Arthur Jones and Travis Jones of Littlefield; three daughters, Mrs. Ona Cagley, Mrs. Nona Manley, (twins), who live in Long Beach, Calif., and Mrs. Emma Lou Woods of Lubbock. All were present when the end came. Also a number of grandchildren and great grandchildren survive. He was a brother of the late E. J. Jones of Goree.

Be careful. Observe state and local traffic laws.

A long range cotton improvement program designed for a three-fold purpose is being inaugurated this year for farmers of this area. The principal purposes of the program is increase cotton production, improve the varieties grown in the area, and to increase the seed supply.

Mr. Roy F. Saunders, formerly of Greenville, has located in Munday and will work with the Western Cotton Oil Company in carrying on cotton experiments. He is fully experienced in the cotton program, having served ten years as county agent and 20 years with the U. S. Department of Agriculture.

Mr. Saunders has secured living quarters in Munday, and his family will join him here within a few weeks.

The program, as explained, is being started as an effort to ascertain what are the best types of cotton for this area. Experiments will be carried on at Weirnet, Rochester, Knox City, Vera, Seymour, Goree, Rhineland, Hefner, Red Springs and Munday.

These experiments will be strictly on a non-commercial basis, it was explained by both Mr. Saunders and those connected with Western Cotton Oil Company, for the interest of farmers of the entire area.

Cotton improvement committees will be set up in every gin in the area, and Mr. Saunders will assist the committees in carrying on the variety of tests. Each gin will select the variety it is particularly interested in, and Saunders' work will be to assist them in securing seed, supplying the committees and supervising their activities. Several varieties of cotton will likely be grown side by side, and farmers may observe these varieties during all periods of the growing season.

It is hoped that after two years, the variety best adapted to this area will be selected and adopted. After the selection is made, Saunders will work with the farmers to develop local seed supplies of the variety that will be adequate and of the finest quality that can possibly be produced at a natural cost figure.

This improvement program is planned for an indefinite period and is expected to result in the production of higher yields per acre and a higher quality cotton.

"Farmers, through their committees, will operate the program," Mr. Saunders said, "and I will assist and advise with them in carrying it on to attain our three-fold purpose of increasing production, improving the variety and increasing the seed supply. Where seed improvement projects have been carried on, records show increased production on an average of around 25 to 30 percent."

"We are coming here," he continued, "not for commercial or selfish purpose, but to assist farmers in carrying out an improvement program that will be of great benefit to this great cotton producing area. We want you to feel free to call upon us when we can be of service to you."

Oil Activities

Thomas D. Humphrey has started the No. 1 Mrs. Mattie Davis, a 6,000-foot rotary test, a wildcat being drilled about eight miles west of Knox City in Knox County.

Stanolind Oil and Gas Company has completed the No. 1 Verhalen, northeast of Knox City, to flow 124 barrels of oil and four barrels of water daily through 13/16 inch choke and casing perforations from 4248 to 4,258 feet.

Stanolind's No. 1 Mabel Milson has bottomed at 5,994 feet. One hour drillstem test from 5,851 to 5,900 feet recovered 60 feet of drilling mud and about 150 feet of muddy salt water. Bottomhole flowing pressure was from zero to 100 pounds with shutin bottomhole pressure of 2,400 pounds in 15 minutes. Formation was not identified, but the offset was deepened to test the Ellenburger.

### UNDER A BUTTWOOD TREE

In 1792, when George Washington was still serving his first term as President, the government found that it had to sell "stocks" to help pay for the Revolutionary War. But people had a natural reluctance to buy these securities unless they were sure they could be easily and quickly resold. In other words, a market place was needed.

So one was established, under a buttonwood tree which stood near the present location of the New York Stock Exchange. Traders met there each day to buy and sell. And the stock exchanges of the present serve precisely the same function—except that they now list thousands of securities representing the industry and enterprise of America.

Actually, the basic idea underlying the security exchanges is simplicity itself. In effect, the stocks are auctioned. As with anything else of value, from a piece of furniture to a farm, the buyer wants to pay as little as possible and the seller wants to get as much as possible. The exchange provides a market where the two can meet, adjust their differences as to value, and transact their business.

The exchanges do not buy or sell securities or set or influence prices in any way. The owners and would-be owners do that. And those owners now number something like 15,000,000 Americans, most of whom possess only moderate means and incomes.

### RETAILERS LOOK AHEAD

What is the outlook for the retailer of the future?

Four hundred retailers, including both chains and independents, were recently surveyed to this question. And their answers are of wide general interest.

First of all, most storekeepers expect an increase in their dollar volume. But at the same time they foresee slimmer profits.

The reason for that is a heavy increase in retailing costs. Of the reporting retailers, 64 per cent anticipated higher advertising costs, 70 per cent higher selling costs, and 67 per cent higher payroll costs. The two retail problems most frequently and heavily emphasized were personnel and prices. And, according to a press account, "running as a common pattern through the comments was an awareness of customer problems—the scarcity of wanted merchandise at the time wanted—and a feeling of uncertainty concerning the future."

The retailer, in other words, bears the brunt of inflation, just as all the rest of us do. Rising prices hurt him, just as they do the customer. More and more dollars may roll in—but more and more dollars must roll out, too, and the profit declines.

The retailer—for reasons of self-interest alone—is solidly on the consumer's side when it comes to inflation.

### GRASS ROOTS OPINION

SALT LAKE CITY, UTAH, DESERET NEWS: "Despite his urgent admonition to every wage earner, housewife, business person, or private enterprise to practice the sternest disciplinary thrift as an aid toward meeting the national economic and fiscal emergency, Mr. Truman's proposed budget actually shows an increase in non-defense spending over the comparable items in last year's deficit monstrosity."

CATSKILL, N. Y., ENTERPRISE: "America should return to the Gold Standard, make a wider use of the Golden Rule and stop killing the goose that laid the golden eggs."

NYSSA, OREGON, GATE CITY JOURNAL: "It is apparent that taxes must be increased if the appalling annual deficit is to be avoided. However, . . . enormous deficits must be wiped out by reduction in non-defense expenditures, an increase in taxes and changes in and enforcement of present tax laws."

OIL CITY, PA., DERRICK: "An X marked against the Communist party on a Red ballot merely marks the spot the voter was last seen."

RINGGOLD, GEORGIA, CATOOSA COUNTY NEWS: "We believe that the national budget could easily be cut by many billions of dollars. While preparing for our defense, could our nation not well do without many subsidies and various 'handouts'? . . . it will gall working folks to have to pay taxes in order that the Federal government at the same time maintains 'gravy trains.'"

### THE SIGN YOU NEVER SEE

The legal speed limit in Texas for trucks is 45 MPH, for buses 55 MPH. Clock the next truck or bus that passes you or that you try to pass on the highway.

How many times have you seen a Texas Highway road sign specifying the present Texas speed limits for highway buses and trucks?

Everyone is familiar with the 60 MPH and 55 MPH speed limit signs for daytime and nighttime driving permitted outside of city limits on Texas roads.

Is there not the same reason for posting truck and bus speed limits along our Texas highways to regulate the speed at which those vehicles move, the same as there is a sign posted to regulate the speed at which you are permitted to drive your own automobile?

"Nationalization of industry is the doom of trade unionism. The trade unions are being attacked from both sides. The Communists intrigue and infiltrate from the bottom and the Socialist government nationalizes and takes over the industries from the top. . . . Two-thirds of the disputes in the country have been in this nationalized area of one-fifth of its total labor force. So disputes are ten times as numerous in the Socialist sector of our life as they are in the wide area of free enterprise."—Winston Churchill.

### MR. D.A.'s CRIME CALENDAR

FEBRUARY is the Month for . . .

**EMBEZZLING:** Coming at it does at the heel of the winter, February is the month for the amateur criminal. You'll hear about the honest little men with horned rim specs, the loyal employees of long years standing. Suddenly they dig down into the firm's coffers and take off with a big haul. Most of them are people who have never before done wrong. There are several reasons to explain this sudden succumbing to temptation. We'll advance one: the easy money provides a nice trip to Florida. The return trip isn't so nice.

**CROOKED WHEELS:** Winter cruises are in season right now. The cruising cardsharp who strikes up a shipboard friendship to fleece you at cards has been pretty well ticketed by the movies and the steamship line people. Even so, canasta could still lead to disaster. But the real bait you'll nibble at is the gambling joints at your island paradise destination. I know a croopier at one of the winter wonderlands—if you're a pal he'll let you win back whatever your vacation cost; if you're a stranger better slow that return fare to your lining!

**NARCOTICS:** The dope bug has successfully bitten our teen-age problem children. The authorities have already begun wholesale drives to stamp out the source. Don't be surprised at the appalling stories you'll read this month of what vicious dope rings are doing to our youngsters.

What is meant by 'short circuit'?  
 Going somewhere by the strotz way.

What furnishes the motive power of the car?  
 My husband.

Some years ago when your columnist visited the high school at Gordon, Palo Pinto County, Supt. Tanksley told me of a ghost town, about six miles away—Coalville. About 50 years ago, coal mining flourished around Thurber, Mingus, Lyra and Strawn.

Several mines were worked near Coalville. The town had a population of 3,000 and there were progressive stores as well as saloons. School enrollment was around 350. But the mining ended, the school district was consolidated with the Gordon district and there is no sign of the once flourishing town. In fact, Coalville's site is part of a farm, and cattle graze on the once teeming spot.

## Knox Prairie Philosopher Says The Arguments On Redistricting The State Have Got Him A Wee Bit Puzzled

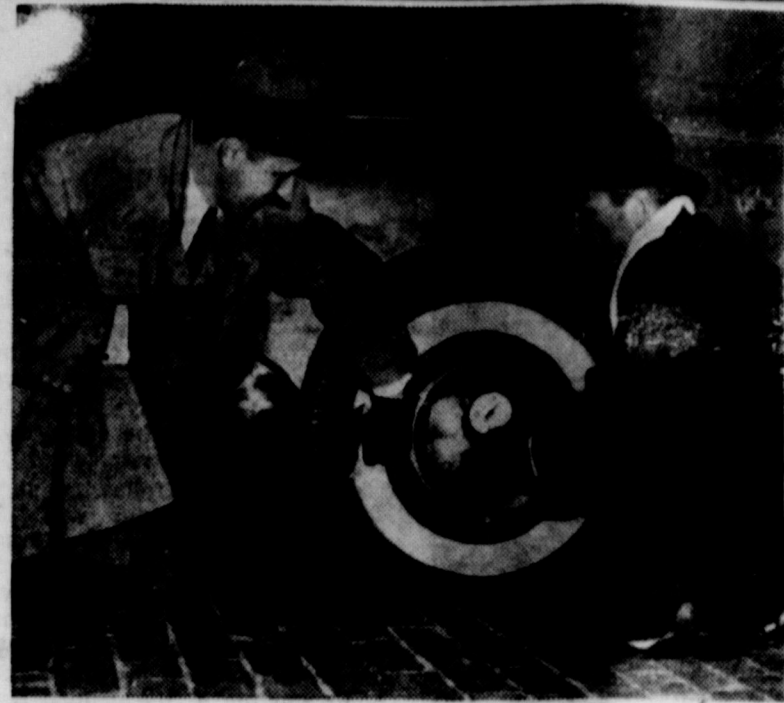

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek has tackled the redistricting problem this week, but we doubt if he has solved it.

Dear editor:  
I found a copy of a newspaper which the wind had blown in a culvert across a county road out here, it's a good thing I removed it as a few newspapers will clog up a culvert quicker than a Russian can clog up a United Nations conference, and took it down in my pasture and got comfortable and slept awhile and later on in the day read an

article about the trouble Texas is havin re-districting.

As I understand it, some areas of the state have too many state Senators and Representatives and some don't have enough, from a population standpoint that is, not from any well-recognized sentiment to just have more men in the legislature, but the job of re-shuffling the districts is a pretty big one, worse than dividin up an estate, because while everybody knows legislators is underpaid, it's the hardest thing on earth to find one wantin to give up his job and get into something more profitable. I guess Texas has the most patriotic men of any state in the union, as it ain't every day you find that many people

Roaring along at 80 miles an hour on the Indianapolis Speedway, Wilbur Shaw, world famous automobile driver, retained perfect control of his car after purposely blowing out the new Firestone blow-out-safe, puncture-proof and tubeless tire on the left front wheel. Here, Raymond C. Firestone (left), Vice-President in Charge of Research and Development of The Firestone Tire & Rubber Company, watches Shaw check the air pressure in the tire after it had been driven a mile following the blowout, the gauge showing that well over two-thirds of the original air pressure still remained in the inner diaphragm of the tire. According to Shaw, "This new tire completely eliminates all danger from blowouts and is the greatest contribution to safe driving I have ever seen."

The new Firestone tire also provides puncture-proof protection. If a puncture occurs no air is lost because soft, pliable rubber within the tire surrounds the cause of the puncture preventing air leakage and when the cause of the puncture is removed this soft rubber seals the hole so that no repairs are necessary.

## Legal Notice

NOTICE TO DEBTORS and CREDITORS:  
THE STATE OF TEXAS  
COUNTY OF KNOX  
TO THOSE INDEBTED TO OR HOLDING CLAIMS AGAINST THE ESTATE OF MRS. A. E. HENDERSON, DECEASED.

The undersigned having been duly appointed executor of the Estate of Mrs. A. E. Henderson, Deceased, late of Knox County, Texas, by J. B. Eubank, Jr., County Judge of Knox County, Texas on the 22nd day of January, A. D., 1951, hereby notifies all persons indebted to said Estate to come forward and make settlement, and those having claims against said Estate to present them to him within the time prescribed by law at his residence at Vera, Knox County, Texas, where he receives his mail. This the 30th day of January, A. D., 1951.

ARTHUR K. McGAUGHEY,  
Executor of the Estate of Mrs. A. E. Henderson. Deceased.

Mr. and Mrs. Carl Williamson of Wichita Falls visited in the home of her sister, Mr. and Mrs. H. D. Warren here over the week end. From here they all went to Leuders to visit Mrs. Williamson's and Mrs. Warren's mother, Mrs. Ella Brown.

Mrs. William F. Rippetoe and son, Mike, arrived last Sunday from Fort Worth to make their home with Mrs. Rippetoe's parents, Mr. and Mrs. Milton Dean. Lieut. Rippetoe is with the armed forces in Yokohama, Japan.

Pvt. Joseph Borden of Fort Hood spent the week end with his wife, his parents, Mr. and Mrs. Chester Borden, and other friends and relatives.

eager to serve without any thought of compensation to speak of. You'd think it would be hard to find enough men elected to an office that don't pay a livin wage, but in Texas we ain't confronted by such a situation. Don't reckon there's ever been a time when we couldn't dig up somebody willin to run for the legislature. At any rate, it's hard to ask a man to abolish his district and let his constituents go without his services. It's hard to get him to do it after you ask him, as the Texas legislature is now twenty years behind in the job.

But what interested me mostly was the complaint the editor was makin in his paper. According to him, it wouldn't be fair for example to put two small counties in with a big county to make a senatorial district, as the big county would out-vote the two combined and always elect a Senator, he said, and added: "That would be bad for the two small counties, and in the long run it wouldn't even be good for a big county."

I puzzled over that a long time. Surely he ain't arguin it's bad for a county to keep on producin a senator? He ain't suggestin a county might rise up and say, "No sir, it's your turn, we furnished a senator for 8 long years now, it's somebody else's time? Sounds to me like he's arguin a senator could get sort of like a in-law who has over-stayed his welcome.

But despite all the squabblin, I just don't believe it's possible

Mrs. Raymond Mitchell of Austin visited here in the home of her husband's parents, Mr. and Mrs. D. W. Mitchell, the last of last week. Saturday morning, while here she received word that her father, Mr. Symma of Mathis, was very sick, and she left to visit him. He passed away Saturday evening around 4:00.

Miss Margie Lou Campsey, who is attending Hardin-Simmons University in Abilene, visited her parents, Mr. and Mrs. Brooks Campsey, over the week end.

Mr. and Mrs. Travis Martin and daughters of Seymour, visited in the home of her parents, Mr. and Mrs. M. H. Reeves, here over the week end.

to divide up the state with all counties in a senatorial district exactly the same size, and in the long run it won't make too much difference. I ain't never seen a senator who wouldn't listen to a delegation, don't make no difference how small a county it come from, and in the second place, while Russia may have the atom bomb, I doubt if it has one that recognizes county lines.

Yours faithfully,  
J. A.

### Jo Ann Whittemore, Billie Joe Henslee Wed On Saturday

Miss Jo Ann Whittemore became the bride of Billy Joe Henslee in an impressive ceremony Saturday evening, February 10, at 4:00 p. m. They were married in the Church of Christ at Knox City with Minister S. C. Shipp officiating in the double ring ceremony.

Mrs. Henslee is the daughter of Mr. and Mrs. E. D. Whittemore of Munday, and the bridegroom is the son of Mr. and Mrs. J. M. Henslee, also of Munday.

The bride was attired in a navy blue gabardine suit with navy and pink accessories. She carried a white Bible topped with a white orchid.

Miss Jimmie Henslee served as maid of honor, while Kenneth Phillips served as best man.

Immediately after the ceremony, the couple left for a short wedding trip to points of interest in South Texas. After the wedding trip they will be at home in Munday.

### Sunset H. D. Club Meets Tuesday In Special Meeting

The Sunset Home Demonstration Club met on Tuesday afternoon, February 20, in a special meeting, which was called to order by the president, Mrs. R. M. Almanrode gave the parliamentary procedure drill.

Mrs. H. R. Hicks was elected club nominee for delegate to the district meeting April 12 in Wellington.

Mrs. Joe Roberts, Mrs. Weldon Floyd, Mrs. R. M. Almanrode and Mrs. Hicks gave a very informative program on handling fabrics in relation to cutting, stitching, pressing, fitting, darts and zippers. This was a continuation of a series of meetings on sewing. The next meeting will be Thursday, March 1, in the home of Mrs. Jerry Nix, at which time the program will be on making belts and button holes and covering buckles.

Present were Meses. Joe Roberts, Layne Womble, R. M. Almanrode, Bill Wyatt, Weldon Floyd, Jerry Nix, H. R. Hicks and J. S. Shannon.

### Two Counties Win Plaques For Work In Safety

Refugio County has been named ed winner of the General Motors 4-H Farm and Home Safety plaque award for the third consecutive year, announced the State Club Office. Hall County was again selected for the Westinghouse Educational Foundation plaque given in recognition of outstanding work in the 4-H Farm and Home Electric Project. Similar honors were won in 1947-48-49.

One of the most effective phases of the safety program was the weekly Farm Safety bulletin prepared and edited by 4-H Club members. Widespread distribution of the bulletin did a lot to increase interest in farm safety, according to D. E. Bedthauer, Refugio County Agricultural Agent. A total of 192 boys and girls took part in the program. One result was a safety driving course adopted in one of the schools. Club members conducted a rat extermination campaign, removing obstructing weeds from crossroad, and took part in 23 community meetings. Nearly 200 safety surveys also were made, and may hazards removed. Bessie L. Vogt, County Home Demonstration Agent and Mr. Bedthauer directed the program.

Club members participated 100 percent in the 4-H Electric program, stated W. B. Hooser, Hall County Extension Agent.

Demonstrations were given in the repair of electric appliances, cords, motors, electric farm machinery, and how to replace a blown fuse. A survey of energized farm homes was made, and compared to 1949, and increase of 230 electrified houses and 100 miles in energized lines was reported. As a result of the survey and study of electricity, man non-users became definitely interested in getting service.

Helping to make both the safety and electric programs a success were the local Chambers of Commerce, Rotary and Lions Clubs, REA, schools and 4-H club leaders. The activities are under the supervision of the Cooperative Extension Service.

### MORE and BETTER COTTON

ANTHRACNOSE boll rot can reduce the grade of your cotton

If you've had some points taken off by the grader for spotty cotton, you know what anthracnose, or pink boll rot, can cost you as a cotton grower. It is expensive and persistent; but it can be controlled now by measures that cost you little.

Anthracnose is a fungus disease, and is at its worst in times of heavy rainfall and where cotton grows rank. The fungus lives over the winter on diseased bolls and stalks left in the fields, and in or on the seeds from infected plants. Clean fall plowing and rotation of your crops helps to control it.

You will also find that treatment of your seed with an organic mercury dust before

planting helps a lot to kill off the anthracnose fungi. This treatment cuts off the disease at its source. Used with other control measures, it can practically wipe out the disease from an entire area in a few years. Mercury dust treatment will also control seed decay and damping-off (sore shin) organisms and reduce angular leaf spot.

The cost of the chemical amounts to less than 10¢ per acre. Treatment can be done on your farm or by many ginners and delinters. Ask your County Agent or Farm Extension Service about the value of seed treatment and about where the treaters are in this area.

### Home Gardens May Be Increased For Year, 1951

Home gardens can have two important effects on the family food supply. First, they may be a source of low priced food. And second, they may improve the nutritional value of the family's diet.

In 1950, there were 477,076 home gardens in Texas, says J. E. Hutchinson, associate horticulturist for the Texas A. & M. Extension Service. Home gardens usually produce about 25 percent of the total vegetables grown.

If each of these gardens produced \$50 worth of food last year, that would be \$23,853,800. As the housewife knows, it does not take much food to be worth \$50 these days.

If each garden produced \$100 worth of food, the figure would be \$47,707,600—quite a contribution to the Texas food bill.

Each person needs from 600 to 700 pounds of fresh vegetables annually, says Hutchinson. He believes that, in these tense and unsettled times, it is the patriotic duty of everyone to keep themselves physically fit.

Home gardens will help provide the fresh vegetables need-

ed in the daily diet. Hutchinson urges families to plant home gardens and thus produce as much of their vegetables supply as is possible.

Gene Russell was a business visitor in Wichita Falls on Tuesday of this week.

Mrs. Tom Bullington and daughter left Tuesday for El Paso to spend two weeks with her parents, Mr. and Mrs. Paul Espey.

Mr. and Mrs. Raymond Hargrove and children were guests in the home of Mr. and Mrs. Delmer Hill of Dallas, over the week end.

Mrs. W. M. Mayo was a business visitor in Haskell on Monday of this week.

Paul Pruitt returned home Tuesday after going to Fort Worth after his mother, Mrs. G. L. Pruitt, who had been visiting there.

New rose plants should be set at the same depth they were growing in the nursery. They should not be planted in old rose beds nor where they must compete with shrubs or trees for plant food or moisture.

### Select Rose Bushes With Care

The unusual weather, very dry and the early freeze, that has existed in Texas for many weeks has been very hard on roses. According to Sadie Hatfield, extension specialist in homestead improvement of Texas in many areas of the state, as A. & M. College, roses have been killed or badly damaged in many areas of the state, and replanting will be necessary.

She offers the following suggestions to those who will be purchasing rose plants. First, she says, select the grade 1 plants. These plants will have at least three strong canes or branches, 18 inches long, growing from the main crown of the plant starting at the ground level. Grade 1½ plants are her second choice and they should have at least two strong canes about 14 inches long starting at the ground level. Plants of these two grades will bloom more and fewer will die from transplanting for in addition to the strong top growth, they also have good root systems.

She says the root systems and underground stems should be checked on all plants for dark rough galls. Also look for nematode knots on the small roots. If diseased roses are planted, they'll prove very unsatisfactory and will foul up the soil in your garden.

Next she says to examine the tops and roots of the plants to see whether or not they have been allowed to dry out. If the stems are a dull green color and show shriveling, avoid them. If not already dead, they may be stunted.

Then check on the age of the plants. She says it is sometimes possible to buy one year old budded roses and generally they are satisfactory. It is well to know whether the roses are on their own roots. Many hardy varieties such as Cecile Brunner or Radiance roses thrive on their own roots, but generally, budded roses give better results. Then last but not least, she says, buy from a reliable nurseryman, one that you know.

The best plants will not thrive if they are not handled properly. She says they should be planted in well-drained, moderately fertile soil. They should be protected from strong winds but

should be in the sunshine most of the day. Roses will not thrive in soils that are high in lime, in tight soils which do not drain well nor in poor white sand.

Set the plants the same depth they were growing in the nursery and avoid planting in old rose beds. Planting in soil that has been in grass for at least five years is a measure of protection from diseases, she says. And don't plant them where they must compete with shrubs and trees for plant food and moisture.

C. R. Elliott returned home the first of this week from points in Bell County, where he had been visiting relatives and friends for several weeks.

Mrs. Melvin Bridgewater and sons of Wichita Falls spent the week end with her parents, Mr. and Mrs. C. N. Smith, and other relatives.

Mr. and Mrs. F. O. Gurley visited in Meridian, Mineral Wells and other points over the week end.

Guests in the home of Mr. and Mrs. A. E. Bowley over the week end were, Mr. and Mrs. J. F. Bowley and children, Mrs. Jot Tynes and children, all of Big Spring; Mrs. T. M. Anderson and Betty Anderson, Mrs. Leon Blank and son, Sammy, all of Wichita Falls; Mr. and Mrs. Mack Tynes and children of Goree.

Mrs. Joe Hill and Shirley visited in Spur over the week end.

### Activities Of The Colored People

The P. T. A. of Dunbar elementary school is making its last effort to complete the raising of money for books this week. Since they have had grand success with their box suppers, they plan to sponsor another one, Thursday night, after the regular meeting of the P. T. A. Pies and cakes will be sold.

# Goree News Items

A large number of Goree friends attended the funeral of Leroy McMahon in Seymour on Tuesday afternoon at 2:30 at the First Baptist Church. He was a brother of Homan McMahon of Goree.

Rev. S. Y. Allgood, pastor of the Methodist Church in Goree, returned Friday from a business trip to Marietta, Georgia.

Mrs. Maude Cure of Hale Center is visiting in the home of her sister, Mrs. J. E. Cure, this week.

Mr. and Mrs. S. J. Monroe of Stephenville, visited Mr. and Mrs. W. O. Lewis the first of this week.

Rev. and Mrs. J. C. Parks of Rotan and Boyd Jones of Fort Worth visited in the Dibrel Jones home during the week end.

Mr. and Mrs. Beverly King, Jr. and son, Kelly Bert, visited Mrs. King's parents, Mr. and Mrs. Ira Stalcup, Sunday.

Several Goree people went to Benjamin last Sunday for the opening of Knox County's new jail.

Don Coffman of Cisco spent the week end with his parents, Mr. and Mrs. Buster Coffman.

Mr. and Mrs. Orles Lambeth and children of Anton spent the week end with his parents, Mr.

and Mrs. R. L. Lambeth. Mrs. Henry Steward of Shamrock spent last week with her son, Jack Steward, and family and other relatives.

Mrs. E. E. Jones, Mrs. Sam Hampton, Mrs. Merle Lambeth, Mr. and Mrs. L. L. Atkinson and son, Charles Wendell, attended the funeral of F. R. Jones in Littlefield Monday.

Mr. and Mrs. W. B. Temple, who have been in Dallas for some time, where he has been receiving medical treatment, came in Friday for a few days visit with relatives.

U. B. Willis of route one, who has been in the Knox City Hospital for some time, was able to come home this week.

Mr. and Mrs. Paul Brogden and daughter visited Mr. and Mrs. W. A. Harris of Red Springs last Friday.

## WTCC Names Man For Public Relations Job

ABILENE—Alden L. Cathey has been appointed as manager of the Public Relations and Membership Department of the West Texas Chamber of Commerce.

Formerly employed by the Chambers at Port Arthur and Waco, Cathey also directed the major portion of the last statewide USO campaign.

Experienced in all phases of Chamber work, Cathey will work in community-level activities of the West Texas Chamber of Commerce in that part of its re-organizational program designed to strengthen its relations with local Chambers of Commerce.

His work during the past two years in membership activities has brought him widespread recognition in Chamber of Commerce circles.

He was graduated from Texas A. & M. College in 1942 with a degree in Business Administration.

In military service for four years, he was discharged with the rank of Captain.

Cathey will reside at 2733 South Eleventh, Abilene, with his wife, Catherine, and two children, Cotton and Christy.

Cathey is a native of Fort Worth and is the son of Mr. and Mrs. Ed V. Cathey of that city.

## Robot Stops Cars in Test

Improvement in Chevrolet brakes is illustrated by this picture showing the difference in stopping distances between a 1950 and a 1951 car using exactly the same brake pressure. To eliminate the human element, engineers used a mechanical pedal pressure applicator (inset) on both cars. When the foot lever (1) is tripped the piston exerts a constant pressure on the brake (2).

## BENJAMIN NEWS

(Elda Purl Laird, Reporter)

The Community Singing, which is held each second and fourth Sunday of each month, will be held in the First Baptist Church at Benjamin Sunday, February 25th, beginning at 2:30 p. m. Everyone has a cordial invitation to attend and help with the singing. As a result of the recent singing school held here during the past week there should be several new and good singers in the community. Adjoining towns and communities are urged to come and be with the group each meeting date.

Jackie Qualls, son of Mr. and Mrs. Jack Qualls, of Abilene, spent the past week visiting in the home of his grandparents, Mr. and Mrs. Ben Qualls.

Mr. and Mrs. Adrian West and children, and Mr. and Mrs. Wayne West and daughter, all of Fort Worth, spent the week end visiting in the home of Mr. and Mrs. Tom West and son, Leroy.

Mr. and Mrs. Willard Kilgor and family visited relatives at Tokio and Seagraves during the

KSEY Seymour at 11:15 a. m. Saturday: "Did You Know That Water Baptism Is Essential to Man's Salvation?"

Welcome to all of our services.

Rev. I. C. Hull, pastor.

past week end. Mr. and Mrs. Robert Toland, of Big Spring, spent the week end visiting in the homes of Miss Louise Brown, Miss Elda Purl Laird, Mr. and Mrs. E. B. Sams and other friends.

Mr. Jack Graham, of San Antonio, visited Miss Carlone Polster during the week end.

Mrs. Henry Steward, Marshall Steward and Miss Ila Fae Steward, all of Shamrock, visited in the homes of Mrs. W. A. Barnett and family, and Mr. and Mrs. Bert Marshall and other relatives during the week end.

Johnny McGaughey, son of Mr. and Mrs. M. D. McGaughey, was home for the week end.

Mr. and Mrs. Bass, of Tatum, New Mexico, visited in the home of their daughter and family Mr. and Mrs. Edward Lee Kirk, during the week.

Mrs. Mabel Allen of Fort Worth is visiting in the home of her daughter, Mrs. A. H. Sams, Jr., this week.

Mr. and Mrs. Floyd Herndon and children of Houston, and Mr. and Mrs. Jack Shipman, of Munday, visited in the home of Mr. and Mrs. C. P. Littlepage

Mr. and Mrs. T. G. Bengel returned home the first of this week from Honey Grove, where she has been visiting Mr. and Mrs. G. K. Fladger and other relatives for several days.

## CARD OF THANKS

We take this opportunity to thank all of our friends and neighbors for their expressions of sympathy and consideration shown us during the illness and death of our loved one.

Especially do we thank those who were so faithful to sit up with us during his long illness, the ladies who sent and helped prepare the food, and for the beautiful floral offerings. May the Lord bless each of you, is our earnest prayer, and send good friends your way when sorrow enters your home.

Mrs. W. N. Robinson and children. 1tc

Guests in the home of Mr. and Mrs. Russell Penick and family this week are Mrs. Penick's sister, Mrs. E. E. Guinn, her son and daughter-in-law, Mr. and Mrs. Donald Guinn, and another relative, Miss Loretta Delaney, all of St. Joseph, Mo.

Mr. and Mrs. H. P. Hill returned Tuesday from Tatum, New Mexico, where they had been visiting Mr. and Mrs. Earl Nichols for several days.

Mr. and Mrs. A. E. Richmond and son were business visitors in San Antonio over the week end.

## 'Spice Cellar' in Cabinet

INSTALLING a "spice cellar" at the back of a kitchen cabinet is an excellent way to keep the numerous small spice containers in apple-pie order so that there is a place for each and Mother can keep each in its place.

This organizer for everything from cinnamon to cloves, pepper to thyme, nutmeg to sage has the appearance of desk pigeonholes. It is readily made from Masonite 1/4" Tempered Presdwood. The only tool required is a fine-toothed cross-cut saw or a jig saw.

First decide how many compartments are required. Several spice boxes, of course, may be kept in each, but the

width of each pigeonhole should be no greater than four inches. One or two tiers may be five inches high, while the bottom one, for larger containers, might be six to eight inches. An ample depth is four inches.

Egg-crate construction is used in making the "spice cellar." First cut from a panel of the Presdwood strips four inches wide and the length desired for the pigeonhole shelves. The device may fill the entire back of the cabinet or not. At four-inch intervals carefully saw slots exactly two inches long and 1/2-inch wide in the front edge.

Fitted vertically into these slotted shelves are other similarly-slotted pieces of Presdwood. Saw cuts in the vertical pieces are made at intervals marking the distance between the various shelves. When carefully fitted, the pigeonholes form a very useful kitchen gadget. The "spice cellar" may be left in its natural dark brown color, but if painting is desired, the prime coat and finish coats should be applied before the pieces are assembled.

Be careful. Observe state and local traffic laws.

**FOR RENT**—Small house, close in. All modern. Mrs. W. M. Mayo. 27-tfc.

## Savings Bonds Maturing Plans Are Announced

Secretary of the Treasury John W. Snyder recently asked Congress to enact enabling legislation so that the Treasury could put into effect a plan for handling maturing Series E Savings Bonds, beginning May 1, 1951. Under this plan, the holder of a Series E bond would have the choice, as the bond matures, of:

- accepting cash, if he so desires. Bonds are cashable at any time; or
- continuing to hold his present bond, with an automatic interest-bearing extension. Owners who exercise this extension privilege will receive 2½ percent simple interest for all or any part of the next 7½ years; interest during the final 2½ years of extension will bring the total interest to 2.9 percent compounded; or
- exchanging his matured bond for a current income Savings bond of Series G.

The House in Congress has passed this legislation. As of this date (Feb. 16, 1951), the Senate must yet approve it, and is expected to do so at its regular order of business.

The plan will apply to Series E Savings Bonds only including both those sold during the past and those to be sold in the future.

The interest-bearing extension is for ten years only.

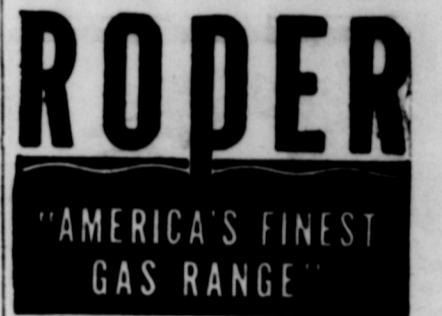

When legislation is finally passed by Congress and signed by the President, the plan will go into effect on May 1, 1951, which is the tenth anniversary of the beginning of Series E sales. (Savings Bonds sold prior to May 1, 1941, were of a series other than E.)

There are several distinct ad-

vantages in the plan to people holding Series E bonds and who want to reinvest the proceeds. First, the plan makes it unnecessary for the bond holders to cash in their matured bonds and then buy new ones; they simply hold the old bonds and the interest on them accrues automatically for another 10 years. This means that a Savings Bonds purchaser will receive 75 percent more than his original investment by holding his bond to maturity and then taking full advantage of his extension privilege for another ten years. Dollar-wise, this means that a Savings Bond buyer has the opportunity to receive \$133.33 for the bond he originally purchased for \$75. Second, the 2½ percent interest during the earlier years of the extension is a somewhat better return than a new bond.

The Treasury emphasizes these two things: (1) Holders of matured Savings Bonds may cash them in at any time; and (2) the holder of maturing E bonds has the privilege of retaining them for all or any part of another 10 years, but he is under no obligation to do so.

Air-filled tractor tires operate more efficiently and economically in sand and loam soils than tired filled either partially or fully with water.

## Washington News Letter

By Congressman Ed Gossett

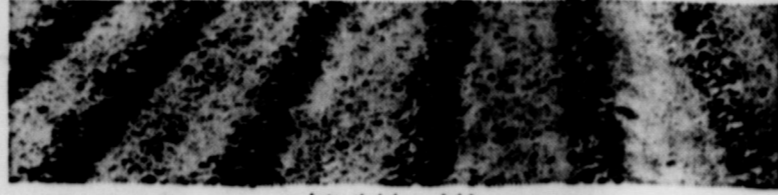

WASHINGTON, D. C., Feb. 17—Yesterday I helped to make a 30 minute radio transcription for broadcast in Texas, on the subject of tidelands. On this program was Senator Joseph O'Mahoney of Wyoming, who is Chairman of the Interior and Insular Affairs Committee in the Senate (which committee will have much to do with Senate action on the subject), Congressman Ken Regan of the Odessa-Medland district, and Congressman J. M. Combs of the Beaumont district. Former Secretary of the Interior, Harold L. Ickes, is really the father of the federal seizure of tidelands. In 1933, Secretary Ickes wrote a letter to an applicant for a federal lease on the tidelands, saying the Federal government had no rights or powers over such areas but that they belonged to the states. In 1937, Secretary Ickes reversed his position and announced that the Federal government owned the

tidelands; they appeared to be worth stealing. In the 17th Congress, on July 27, 1946, the House passed a States Rights bill by a vote of 188 to 67. The Senate passed it by a vote of 44 to 34. On August 1, 1946, President Truman vetoed this bill. His veto message rested primarily on the ground that the issue was then pending before the Supreme Court and should not be prejudiced by Congress. On June 23, 1947, the Supreme Court handed down its decision in the California case. Following the California decision, in the 80th Congress, on April 30, 1948, the House again passed the States Rights bill. The vote was 257 to 29. Senator Forrest Donnell of Missouri, (defeated in last year's election), violently opposed the bill and was able to filibuster any consideration of the bill in the Senate. During the first term of the 80th Congress, nothing was done because extensive negotiations were carried on in an effort to compromise the tidelands issue with the Federal government. After the compromise failed, the Congress waited on the decisions in the pending Texas-Louisiana cases. On June 5, 1950, the Supreme Court handed down its decision in the Texas-Louisiana cases. The Texas case was decided by a 4 to 3 vote of the Court. The Court held that Texas did not own its tidelands even though they were described by metes and bounds in the Constitution of the Republic of Texas. Now, the issue is again before the Congress. Senator O'Mahoney is advocating the so-called Interim bill. The Interim bill purports to be a temporary measure, authorizing continued exploitation and oil production pending passage of permanent legislation. The objection which many of us have to the Interim bill is that it delivers to the Secretary of the Interior complete control of all tidelands, with authority to lease and regulate exploration and production therein. There is much to the old adage that "possession is nine points of the law." Many of us feel that we should do a complete job instead of an interim job on tidelands. In my judgment, we have enough votes in both the House and Senate at this time to pass a States Rights bill over a Presidential veto if the same becomes necessary. Congressman Walter Rogers of the Panhandle district, made a speech in the House this week. He advocated extending the work-week for Federal employees. Since that time he has been getting abusive letters from such employees. My office is open at least 60 hours a week. It would certainly help the defense program to extend hours of work. Labor czars again defied the public this week. The labor members of the Stabilization Board resigned because defense mobilizer Wilson, recommended a 10% wage hike formula instead of a 15% wage hike formula. Apparently, these labor

## MORE and BETTER COTTON

SEED TREATMENT helps turn this stand . . .

into thriving yields

As a cotton planter, you can expect four-way benefits from one simple operation you can perform on your own farm, or have done for you. It consists of planting seed that has been treated with an organic mercury dust. Its results include:

1. Control of most of the seed rot or decay that reduces your stands before the seeds can sprout.
2. Control of seedling blight caused by bacteria in your soil or seeds that attack the tender seedlings.
3. Control of anthracnose or pink boll disease, another germ-caused ailment that results in smaller crops of poor-grade, spotty cotton.
4. Control of bacterial blight or angular leaf spot that kills your cotton plants or stunts their growth.

Experiment Station figures show yield increases of 5% to 40% as a result of seed treatment. This means up to \$12 per acre added to your income. Cost of the chemical amounts to less than 10¢ per acre. Those who recommend seed treatment stress the fact it should be correctly used—applied to the seed according to directions, and in the right amounts. The cotton planter has too much at stake, they say, to risk cutting corners on the use of less than recommended amounts, or skipping any steps of the fairly simple seed-treating process. The treatment can be done by many ginners and delinters. Ask your County Agent about the value of seed treatment and where you can get this service in this vicinity.

## New Grasses Being Added To Range Lands

Grass clipping work has recently been completed by Marion Everhart, Range conservationist, Soil Conservation Service to show the difference between grasses in the amount of forage they will produce on an acre of range land. This is the third year this work has been going on in the Wichita-Brazos Soil Conservation District. The past three years have been above average years for the production of grass, but on a comparative basis the study reflects a true comparison of the grasses involved.

An area of grassland is used on which all of the grasses are growing. The following grasses were used for upland range: Buffalo grass, Blue grama, and Side oats grama. The following figures were obtained this year for an acre of range: Buffalo grass 2117 pounds, Blue grama 3932 pounds, and Side oats grama 5444 pounds. It can be seen from this study that Blue grama and Side oats grama out-produced Buffalo by 186 percent and 257 percent respectively. Properly managed pasture pastures in the district are composed of approximately the following percentages: Side oats grama 10 percent, Blue grama 80 percent, and Buffalo grass 10 percent. This means that an acre of this range this year produced 3960 pounds of forage.

About 85 percent of the upland range in the district have been invaded to a large extent are now composed of either 100 percent buffalo grass or have been invaded to a large extent by Tobosa grass. Tobosa grass is not eaten by livestock during the growing season except a small amount in the early spring. A complete cover of Buffalo grass then would represent a loss of 1783 pounds of grass per acre. According to the grazing of livestock on the range they prefer Side oats grama first, Blue grama second and Buffalo grass last. The best way to right this condition is to defer the grazing

of these abused ranges during the seed producing season of Side oats grama and Blue grama. Also seeding of these grasses should be done in pastures where no grammas exist. The season of deferment is May 1 to August 1 for this area.

Miss Marguerite Hammett, who is attending Hardin-Simmons University in Abilene, visited in the home of her parents, Mr. and Mrs. George Hammett over the week end.

Mrs. Worth Gafford is visiting in the home of her mother in Coleman this week.

Mr. and Mrs. J. S. Shannon were business visitors in Wichita Falls last Saturday. They also visited a brother and sis-

ter-in-law, of Mr. Shannon, who are in a Wichita Falls hospital.

Mr. and Mrs. H. F. Jungman returned home last Thursday from a 10-day visit with relatives at Robstown and vacation trip to Mexico City. They reported a very enjoyable trip.

Mr. and Mrs. Aaron Edgar were visitors in Wichita Falls last Saturday.

Mr. and Mrs. I. V. Cook spent last Sunday with friends and relatives in Abilene.

P. V. Williams, Tom Hoosier of Seymour, and H. A. Pendleton attended the state Golden Gloves tournament in Fort Worth the latter part of last week.

## The Fair Store

They're HERE! MORE POWERFUL than ever!

The trucks that do the most for you!

## NEW DODGE "Job-Rated" TRUCKS

**Here's what's NEW about power**  
You get more horsepower than ever in the new Dodge "Job-Rated" Trucks! Eight efficient engines—94 to 154 horsepower—with power increases up to 20%! You get the right power for your job with top economy. Yet, these new trucks are priced with the lowest!

**Here's what's NEW about styling**  
Distinctive new lines, massive new grille, new two-tone cab trim, and new appointments make these the best-dressed trucks on the road! Lower hood lines make it easier to see more of the road ahead. More comfortable, redesigned seats, too!

**Here's what's NEW about ease of handling**  
You can turn these new trucks sharper—in a smaller circle. Handling is easier because of new worm-and-roller steering gears, more convenient steering wheel angle, cross-steering, wide front tread, and short wheelbase.

**Here's what's NEW about safety**  
Never before such safe, smooth, quiet truck brake action—thanks to new molded, tapered Cyclebond brake linings. (On trucks 1½-ton and up, except air brake models.) Improved hand brake operates independently of service brakes. "Pilot-House" cabs offer extra visibility.

More than 50 brand new features...including:

**NEW!** More economical performance with higher compression ratio—on models through 1-ton.

**NEW!** Easier bad-weather starting with new moistureproof ignition and high-torque starting motor.

**NEW!** Easier-to-read instruments—now grouped in a cluster in front of the driver.

**NEW!** Twin carburetion and exhaust system for more power—available on all high-tonnage models.

**NEW!** Smoother ride with new, "Oriflow" shock absorbers—standard on ½-, ¾-, and 1-ton models.

**PLUS THIS EXCLUSIVE!** gylol Fluid Drive available on ½-, ¾-, and 1-ton models.

# FARM NEWS

From the County PMA Committee

## CONSERVATION FOR PRODUCTION

Increasing farm production to meet defense needs presents a challenge which requires a lot of good judgment and common sense, says J. C. McGee, chair of the Knox County PMA committee.

As he sees it, there is no indication that the emergency will be over in a few months, even a few years. There may be need for even greater increases in production next year. And the next year after that may call for further increases. In addition, the population of this country since 1940 has increased around 20 million. That is at the rate of 2 million a year. There is no indication that this rate of increase will materially change in the next few years.

Against this background is the cold reality that new land from which increased production may be obtained is very limited. For that reason it is largely a matter of obtaining the needed increased production from the land now being farmed. This, according to the chairman, means:

First, the land we have must be protected against erosion and depletion. Less of topsoil and fertility will mean just that

much reduction in our ability to produce. Second, the land we have must be made more productive. This will mean building up the organic matter and fertility.

Sound, practical conservation farming that fits in with the nation's production needs is the answer to increased and maintained production. Erosion can be checked with terraces, contour farming, dams and sod waterways. Organic matter can be restored and built up through the use of grasses and legumes as cover crops, pastures and in rotations. Fertility can be maintained and built up through the use of livestock and commercial fertilizers.

In the chairman's words, "For a long pull, the nation and we, as farmers, cannot afford to deplete our soil reserves for a temporary gain. To be strong we must keep our agriculture strong and productive."

## SURE WAYS TO MACHINERY BREAKDOWNS

There are ten sure fire methods of handling farm machinery to insure its breakdown, farm machinery dealers in Texas say. The dealers feel sure of these methods even though they seem relatively harmless, since from 45 to 85 percent of farm machinery breakdowns in the past trace directly to them. And, as J. C. McGee, chairman of the Knox County PMA Committee, points out, "the more expensive and complex the machine, the surer and more destructive they are."

1. Don't check tires. Let them go flat. They'll shake the engine to pieces faster that way.

2. Don't stop for fences with a combine or a corn picker. Keep going. This is a sure way to spring a frame.

3. Don't clean the filters. Your engine will wear out several times as fast when the filters are clogged.

4. Let the loose bolts alone. They'll fall out some day and then the breakdown will not be far off.

5. Use baling wire or any piece of scrap iron as a substitute for a broken part. Soon you'll have lots of scrap iron for further repairs.

6. Keep going no matter how much the machine rattles and pounds. Adjustments take time. There won't be much time to the next breakdown.

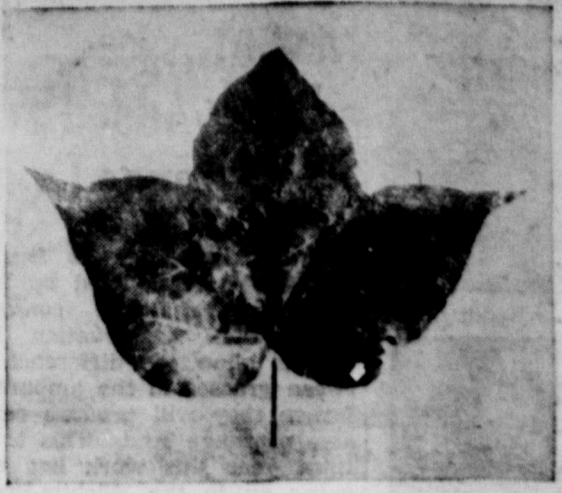

7. Skimp on grease. That way parts wear faster and break sooner.

8. Let it rust. This is a sure fire way to the scrap heap.

9. Don't ever clean your engine. Let the dirt-filled grease pile up. It will cover up small defects so that you'll have a big breakdown instead of a little one.

10. Speed up the pulleys while you skimp on grease. This has never failed to cause a major breakdown.

Mr. and Mrs. Lee Haymes spent the week end with relatives in Abilene and Baird.

ANGULAR LEAF SPOT or bacterial blight can be stopped

Angular leaf spot, bacterial blight, boll rot, vein blight or black arm. These are all names for the same thing, and they all mean bad news for you as a cotton grower. The blight causes death of seedlings, defoliation or loss of leaves from the plant, and shedding or rotting of bolls. It all adds up to less cotton per acre.

As the name shows, it is caused by bacteria. The germs live in the seeds, and grow up in the cotton plant to cause various harmful results.

Clearly the way to wipe out this disease is to plant disease-free seeds. You can make sure that your cotton seeds do not carry the disease germs by killing the bacteria before you plant, using an organic mercury dust. You can do this on your own premises, or have it

done by the seed treating service of your local gin or seed supplier. The chemical costs less than 10¢ per acre. Other control methods include delinting of seeds with sulphuric acid or by hydrochloric acid gas. These are harder to apply, but also effective.

Because wind-blown rain spreads bacterial blight readily from one field to another, its control is a job that all the planters in an area should do together. Otherwise one field planted with untreated seed might re-infect all the others. It will pay every planter to stamp out bacterial blight in his fields. Planting seed that has been mercury dust-treated will not only reduce this disease, but will reduce seed decay and damping-off (sore shin) organisms, too.

## Letters From The People

Editor's Note: The following letter was received last week and is being published for whatever interest it may have for our readers:

5 Kosoko Court, Lagos, Nigeria 24th Dec., 1950

Dear Editor: Reading some American books this morning and came across your famous world-wide newspaper and I took up my pen to write you in order to have my name and address published for people who are willing to exchange or buy African products with American products.

Africans want people in both sexes to write. I am 140 pounds in weight, 5 feet 6 inches in height, also have brown complexion. My hobbies are running, swimming, boxing and footballing. My wife is 135 pounds in weight, 5 feet 2 inches in height, also have brown complexion.

We exchange articles like ebony carvings, handbags made from crocodile skin, slippers, ivory rings, native carved combs, also native costume, with American goods, such as tee shirt,

## LOCALS

Guests in the home of Raymond and Elizabeth Reeves last Sunday were Rev. and Mrs. Rex Ray of Bonham, Rev. and Mrs. S. E. Stevenson and Mrs. Alma Reeves, Goree; James V. Reeves, Wichita Falls; Mr. and Mrs. Rex Allen, Goree; Mr. and Mrs. Troy Denham and daughter, Leuders; Mr. and Mrs. Travis Martin and daughters, Seymour; Mr. and Mrs. Leland Hannah, Mr. and Mrs. M. H. Reeves and Evelyn and Mr. and Mrs. Jim Reeves, all of Munday.

J. O. McMahon, son of Mr. and Mrs. John McMahon, was taken to the Knox County Hospital for treatment for pneumonia last Tuesday.

size 36; anklets, size 10 1/2 and 11; ties, sport shirts, neck size 16 and long sleeve, shirt size, 32, soaps, perfumes and chewing gums.

I would like you also to publish the name of my friend. He is Mr. and Mrs. Alaki K. Okodana, 54 Aweloya Street, Lagos, Nigeria, B. W. Africa.

I will be expecting letters from people and also from yourself to tell me what you will like from Lagos. Reply in time. Thanking you in anticipation. Mr. and Mrs. Morayo A. Kosoko 5 Kosoko Court Lagos, Nigeria, B. W. Africa.

Mr. and Mrs. J. E. Cure have as their guests Maude E. Cure of Riverside, Calif., and Mrs. Lillie R. Jones of Denton. Sunday guests were Mr. and Mrs. E. A. Burgess of Gilliland, Elmo Cure and family of Abilene, Mrs. Georgia Maples and Mrs. Elizabeth Cowser of Goree. All enjoyed an old-fashioned singing in the afternoon.

Mr. and Mrs. C. P. Baker took their daughter-in-law, Mrs. Charles Boker and sons, to San Antonio last Friday. Charles Baker is stationed there with the armed forces.

Mr. and Mrs. L. C. Guinn, Jr., and daughter visited in the home of his brother in Olton over the week end.

Mr. and Mrs. P. W. Bryan of San Angelo visited in the home of Mr. and Mrs. A. B. Warren over the week end.

Misses Betty Blacklock and Patricia Cloudis spent the week end with friends in Abilene.

## Let's Talk LIVESTOCK

(By T. A. Gouddy)

FORT WORTH, Feb. 16.—New orders from the price control offices concerning ceiling prices permitted for meat processors forbid the use of so-called "token" sales at high levels being used as the legitimate ceiling price for the firm. The regulations also forbid high "branch house" prices being used as over-all ceilings in areas other than the branch house where the high ceiling price has been established.

For months before the introduction of the price freeze, it was common practice for wholesalers to establish "high ceilings" by billing customers for a shipment at a high price, which did not represent the true price, the idea being that by thus establishing this high price, the firm would be permitted to call this the legitimate ceiling.

The idea was carried so far that on certain days some restaurants even printed and used for one day only a menu with all the entries marked sharply higher so as to be able to establish a high ceiling in the event of controls.

It is encouraging that the control officials have spotted these practices so early and noted them for what they are. If we must have controls, it is hoped the officials in charge will stop up the loopholes wherein black

markets breed.

Prices for livestock during the past week followed the same pattern of a week earlier in that all of them were strong to higher. Slaughter cattle and calves sold in line with the best prices of the past two months and some spots were higher.

Stocker and feeder demand were exceptionally broad and the moisture the recent storm brought should enhance the outlook for the Spring stocker market even more.

During the past week at Fort Worth several loads of calves were sold at peak prices for all-time high here. Among them was a load of 376-pound calves from William Noble of Johnson County at 40. Mrs. Willie I. Martin, Hamlin, had a load of 416-pound calves at \$40. Incidentally, last year some of the Martin calves set a temporary record of \$32 per hundred here. Guess we can sell the calf market \$8 higher by now. Another load of \$40 calves came from D. S. Pumphrey of McCulloch County and the mixed heifers, steers and bull calves were horned and averaged 330 pounds. Another load of fair quality feeder steers from Benton, La., were shipped by J. E. Jones and brought \$30.50, averaging 960 pounds. There is still a very aggressive play on the two-way kinds of feeder and fat cattle buyers contending for them. Ed Bevering of Charlie in Clay County had some \$32.50 feeder steers and some other fleshy feeders sold at \$33. Nearly ev-

## MORE and BETTER COTTON

Why do some of the cotton seeds you plant fail to come up? Seed rot is the answer in a great many cases. Disease organisms in your soil attack the seeds and make them rot or decay, before the seeds have any chance to sprout or germinate.

The rot-producing organisms can attack your seeds in any kind of weather. Their effects are worst in a spell of cold, damp weather shortly after planting time. But even in fine weather, they can cut down your cotton crop before it ever starts to grow.

There are several kinds of harmful bacteria or fungi that can live in your soil. You cannot see them without a microscope. But you can see their effects all too clearly, by scooping up some dirt from a spot

SEED ROT kills many cotton seeds before they can sprout

where you planted seeds that never came up. Just by looking at them, you can plainly see how the seeds have decayed.

Fortunately you can prevent much or most of this seed decay at a low cost for the chemist less than 10¢ per acre. Treat your seed (or have it treated) before planting, with an organic mercury dust. This will protect your seed from the bacteria that cause decay. Ask your County Agent about the value of this treatment and where you can get your seed treated.

## Farmers Urged To Plant Good Quality Seed

Farmers who plant poor quality seed are likely to harvest poor crops, warns L. C. Coffey, associate agronomist for the Texas A. & M. Extension Service. Careful examination of the tag on each sack of seed will help the farmer determine the quality of the seed he is getting.

Coffey says that certified seed are usually the best seed of a particular variety available. Certified seed come from fields that have been inspected during the growing season, and have been properly handled at harvest time, cleaned, tested for purity and germination, and properly stored.

Blue tags attached to each sack of certified seed carry accurate information about the quality of the planting seed. These blue tags are issued by the State Department of Agriculture for use on seed which have met certain high standards of purity and germination. In 1950, blue tags were issued for 96 varieties of 12 different crops grown in Texas.

Although certified seed may cost slightly more than seed that

those pelts which were ideal length and staple for making mouton. Mouton pelts are valuable for making fur coats in time of peace but right now those pelts are going into flying suits for our aviators.

## A Three Days' Cough Is Your Danger Signal

**CREOMULSION**  
Relieves Coughs, Chest Colds, Acute Bronchitis

are not certified, the added expense is offset by the assurance of purity and percentage of germination, says Coffey. Seed of questionable germination and purity may not be cheap at any price.

When farmers buy certified seed, they know what they are getting. Coffey reminds farmers that the certification tags are an excellent source of valuable information when they are buying planting seed.

## Have Your Planting Cottonseed Completely Delinted

(Kemgas Process)

SAVE---Approximately half of your planting seed.

SAVE---Time, fuel, wear and tear by planting 25 percent more per day.

SAVE---On chopping expense.

PROFIT---By faster germination with less moisture.

PROFIT---By being able to plow cotton earlier as Kemgas delinted and treated cottonseed grows off quicker.

PROFIT---By more lint yield per acre.

These are just a few reasons for planting delinted cottonseed. For further information, contact . . .

## From where I sit ... by Joe Marsh

### Sometimes Good Intentions Aren't Enough

That fire at the Griffin place didn't do much damage last week, but Volunteer Chief Murphy was pretty angry about it. Spoke to some of us over dinner and a bottle of beer.

"Griffin's farm is a good mile from town," he said. "And by the time we'd dodged all the people on the highway who were going to watch, we hadn't a minute to waste."

"Then blamed if those sight-seers hadn't parked cars right in Griffin's driveway and there was a mob of people milling around the house—just gawking. Joe, tell

folks a fire's no sideshow. Ask 'em to think of the other fellow!"

From where I sit, some of us need to be reminded occasionally that even though our intentions are good we may be unfairly interfering. Whether it's blocking the right-of-way of fire equipment or criticizing a person's right to enjoy a temperate glass of beer now and then—the American Way is to give way, and give the other fellow his fair "share of the road!"

Joe Marsh

Copyright, 1951, United States Brewers Foundation

everyone seems to want stocker cows, too. One lot from John R. Black's farm near Renner in Dallas County, sold for \$29 and averaged 845 pounds, they were top-horned young cows. Charley Brown of Rosebud had a load of 1,009-pound steers at \$33.50.

Hog men have been disturbed this week by talk of rolling back hog prices, which was heard in Washington. It appears to most observers that hogs are still somewhat under-priced in comparison with other livestock. However, this week hogs climbed to within \$1.50 of the highest point last year in August.

The supply of hogs was lighter at all points this week and seemed to indicate that the peak of the winter movement may be behind us. Stronger prices appear to be in order for hogs on this account, too.

Sheep and lamb prices reached all time high prices. Woolled fat lambs topped at \$38, such a load from Tom Dial of Hamil-

ton County weighed 110 pounds. Some freshly peeled fat lambs from E. H. Elliott of McCulloch County set a new high for killing lambs at \$30.50. They averaged 95 pounds.

The importance of wool on sheep and lambs in relation to their price cannot be over emphasized. For instance, there was a double deck of ewes sold at Fort Worth Friday that averaged 98 pounds and brought \$24 per hundred. Recently the best ewes for slaughter had been stopping at \$20. These ewes came from Daugherty & Cooper of Sudan in Lamb County.

What made these ewes so attractive to the packer was

## BROACH EQUIPMENT

Phone 277

Munday, Texas

You'll do better on a used truck with your GMC dealer

now!  
clothes  
dried  
faster  
than  
you can  
wash 'em!

by Gas  
of course,  
because  
Gas is fast!

**FASTER** than any other clothes dryer. Lightweight fabrics are ready to iron in 15 minutes... dry in 20. Compared with old haul-hang-and-pin way... a Gas dryer is 15 times faster.

**LESS & EASIER IRONING.** Gas clothes dryer damp-dries; no sprinkling. Also, towels, sheets and knits come out so unwrinkled you do not have to iron them at all!

**SAFER, MORE SANITARY.** Gas dryer does not over-dry and weaken fibres. It sweetens, purifies better than sunshine... without danger of sun fading and clothes pin rips.

**NO WEATHER WORRIES.** icy fingers, mud splattered sheets, laundry milderew... you'll never have these. With a Gas dryer you can wash any day... even at night if you want to!

**COSTS LESS** per load than any other dryer. What's more, you don't have to keep such a big supply of children's clothes. A Gas dryer makes it easy to wash more often.

**FASTER FOR WATER-HEATING, TOO.** Gas is only fuel fast enough to keep up with hot water demands of any washer... yet flexible enough to give right temperature water for any job.

Why wait? See new automatic Gas clothes dryers at Gas Appliance Dealers or Lone Star Gas Company, today!

### McMurry Will Sponsor Willson Lectures Soon

ABILENE—Speakers for the sixth annual Willson Lectures at McMurry College March 6-9 have been announced by President Harold G. Cooke.

They will be Dr. Louis Hadley Evans, pastor of the First Presbyterian Church in Hollywood, and Dr. Evelyn Millis Duvall of Chicago, executive secretary of the National Council on Family Relations.

Since 1946, McMurry College has been participated in the Willson Lectureship through the generosity of Mr. and Mrs. J. M. Willson of Floydada, Methodist lay leaders.

Dr. Evans, pastor of a church with nearly 6,000 members, has recently been the subject of features in Life, Time, and Christian Century magazines. Formerly president of the Presbyterian Board of National Missions, Dr. Evans was called to the Hollywood Church from the Third Presbyterian Church of Pittsburgh in 1941. At Occidental College, he was on all-conference football and basketball player.

Dr. Duvall is the author of several high school and college texts on marriage and family. She originated the marriage course for the Town Hall Workshops. Her degrees are from the University of Chicago, Syracuse University, and Vanderbilt University. Her husband, Dr. S. M. Duvall, is on the Chicago faculty. They have two children.

### Draft Board Members Make Classifications

During the recent Local Board meeting, which was held on Monday, February 12, a total of one hundred and fifty-seven registrants were classified and re-classified. One hundred and twenty-seven were re-classifications. At this meeting classifications and most of the re-classifications were brought up to date.

A number of questions have been asked concerning classification which some fifty-five registrants received during the past week. To make this classification clear to those concerned the following is quoted from Selective Service Regulations: "In Class V-A shall be placed every registrant who has attained the twenty-sixth anniversary of the day of his birth except (a) those registrants who are in active military service in the armed forces and are in Class I-C, and (b) those registrants who have consented to induction. Except as is otherwise provided in the regulations, registrants who prior to attaining the twenty-sixth anniversary of the day of his birth have been classified in some other class shall, as soon as practicable after attaining the twenty-sixth anniversary of the day of their birth, be reclassified into Class V-A.

Local Board members continue to meet only once each month, and that date each month is on the second Monday. The next meeting will be held

Monday, March 12, beginning at the regular time, 2:00 p. m. Anyone wishing to meet with the board members are welcome at any time.

### Three Students Are Enrolled At WTSC

Three students from Munday are enrolled at West Texas State College at Canyon for the spring semester.

The students are Billy Cammack, freshman, son of Mr. and Mrs. Bryan Cammack; and Joe and John Lee Spann, seniors, sons of Mr. and Mrs. John C. Spann.

### Weather Report

### Kracker Krumbs—

(Continued from Page One)

the best varieties—then he's learned to do by doing.

The program is designed to accomplish principally three things: 1. To increase cotton production. 2. To improve the variety. 3. To increase the seed supply.

Increased production means more money per acre. Improved variety means more money per pound. Increased seed supply means being able to secure the better seed, etc.

Seems like it aims at more prosperity—unless there should come a time in the future like a period we remember in the past when the government had us to plow up part of our cotton.

Maybe that won't happen again. We hope it won't.

Mr. and Mrs. Bill Ehlers and family were visitors in Stamford over the week end.

Mr. and Mrs. Charles McCaulley were business visitors in Dallas last Friday and Saturday. They went on to Mertens and spent Sunday with relatives there.

## Some Facts About the Time Payment Plan For FINANCING FURNITURE and APPLIANCES

Although this plan is controlled by Regulation W, is still the easy way to finance your needs.

We have principally three plans, two of which have recently been made available. They are:

- MONTHLY PAYMENT PLAN**  
Down payment on furniture, 15 pct.; on appliances, 25 pct. Balance monthly in 15 payments.
- ONE PAYMENT PLAN**  
Down payment, 50 pct.; balance due in 6 months, or 9 months, or 12 months.
- TWO PAYMENT PLAN**  
Down payment, 20 pct.; balance due in 6 months; remainder due in 9 or 12 months.

Plans Two and Three are ideal for farmers with yearly incomes or salaried people who depend on bonuses to buy home conveniences. On appliance paper only, insurance policies are carried against fire, explosion and windstorm for the duration of the contract.

We invite you to further investigate our convenient payment plans.

## Change to NEW GOOD YEAR SUPER-SURE-GRIP TRACTOR TIRES

New Super-Sure-Grip is the "greatest pulling tire on earth" — as proved in actual farm tests where it pulled tractors through wet, slick, slippery soil where other tires bogged down.

These super traction tires will help you plow, plant and harvest faster. They'll save crops when you are pressed for time and they don't cost a penny more!

Super-Sure-Grips are good crop insurance — let us install them on your tractor.

**SUPER-SURE-GRIP GOES WHERE OTHER TIRES WON'T**
