Five Hungry Children Deserted

When their dad failed to return home with his pay check, their mother and started out to look for their father. The result was five hungry children, Ronald, 2; Francis, 3 (rear); Bobby, 7; Geraldine, 6; and Wayne Strader, 5. They were given a home by their grandparents, Mr. and Mrs. Harold Dombrose of Chicago.

Tractors on Tinian Excursion

A long line of marine and army amphibious tractors, coming into the beach at Tinian Island, looks like a holiday excursion train, one after another as they near the shore. It was just another stop on the road to Tokyo and when the island fell it proved the GIs and Leathernecks were more than a match for the best that Tokyo could give.

A Wac Helps in the Training of American Soldiers

The gadgets on this movie projector are no mystery to Pvt. Leona Harris of the Women's Army Corps who operates it to show training films to soldiers at Fort Francis E. Warren, Wyoming. She is assigned to the Visual Aids Education Section at that post. The Army needs many more Wacs for 239 different types of military duties.

ROTARY CLUB

The program for the Rotary Club Wednesday at noon at the DeLuxe Cafe was in charge of Edward Ferguson and the Rotarians were entertained by Mrs. Ferguson with two excellent readings. Verne Walden, who has been doing a good job of giving a weekly news review, gave his last report at this meeting. Frank Kirkpatrick will assume the duties of giving a news review at the next meeting.

MEXICAN CHILD DIES

Paul Valencia Jr., son of Mr. and Mrs. Paul Valencia, died at the family home on August 20, after an illness of several weeks. Funeral services were held at the Mexican Assembly of God Church on Monday, August 21. The little boy was about 11 months old, having been born on Sept. 5, 1943. Approximately 2,000 buildings are struck by lightning annually in the United States.

No--the Large Stovepipe Instrument in J. T. Brooks' Front Yard Is Not a Big Gun--It's a Powerful Telescope

Many people, who have seen the big instrument in the front yard of J. T. Brooks' home, have been wondering what it was. Well, it is not a big gun of some kind as it appears to be, but one of the most powerful telescopes in this section of the country with a 12-inch mirror, and belongs to Mr. Brooks' brother-in-law, Ennis Setliff, owner and operator of the Setliff Machine Shop. Mr. Setliff bought the Winghamam Machine Shop several months ago and came to Crowell from Tulsa, Okla., with his family to make his home here.

Preservation of Food Supplies Is Important Factor

Taking care of what we have is one way to boost available food supplies, suggests Julian Wright, Foard County Supervisor for the Farm Security Administration. FSA is emphasizing to the 45 families co-operating with its program in this county that protection is a twin to production. "Everything and everybody must do double duty these days," says Mr. Wright. "The only way this is possible is to take the very best care of what we have. Protection doubles the life of our farm equipment and household appliances. Conservation increases the power of our soil to yield its maximum in food and fibre required for our nation at war. Care increases the production and lengthens the life of our livestock, work stock and poultry," he added.

Moon Looks Like Babbit

The craters in the moon can be studied by the telescope. Under the magnification, the silver moon looks like a half circle of imperfectly poured babbit, rough and shining unevenly. Mr. Setliff is planning to give the people of Crowell and surrounding territory a chance to view the moon and stars at the proper time in September, date of which will be announced later.

and he completed it in October, 1940, when he lived at Eldorado, Okla. He constructed the telescope for the fun and experience of it and says that he is no astronomer. He had had previous experience, however, in building the instruments, having constructed a six-inch mirrored telescope several years before he attempted to build the larger one. Most of the value in the mirror, which was ground by Mr. Setliff himself. Originally an inch and a half thick, the mirror took ten months to shape and polish.

Despite the fact that a telescope of so great a power is relatively rare, Setliff's piece cost him only \$75—and a year's work in his spare time. The base of the telescope is also ingeniously planned. The direction of vision is adjusted by turning it on two axes, thus making it possible to turn it toward any direction. One of these axes, the polar axis, is exactly parallel with the axis of the earth. Therefore, the observer can follow a star as the earth rotates by merely turning the polar axis, rather than readjusting the whole piece.

This telescope is powerful enough to distinguish the moons around Jupiter. Many stars come into view in the eye-piece that are not even glimpsed by the naked eye. A star in the big dipper turns out to be two stars, so close together that they look like one.

George Cates Jr. of the Merchant Marines arrived home from New York Wednesday morning to visit his mother, Mrs. Mildred Cates, and family in the home of his grandmother, Mrs. A. E. McLaughlin. George has recently completed an officer's training course in the Merchant Marines.

Pvt. Jimmy Cates, who is stationed at Camp Hood, is here spending a furlough with his mother and grandmother, Mrs. A. E. McLaughlin.

Arrangements Made to Handle Waste Paper Here

Arrangements have been completed for the handling of waste paper in Crowell, according to an announcement made by D. E. Eaton, county chairman of the Salvage Committee, this week. The Boy Scouts will sponsor the program in Crowell. Donors of paper can assist a lot by separating the paper and tying with twine in small bundles and placing it in a convenient place to be picked up and where it will not get wet. All papers, cardboard and magazines, should be tied in separate bundles. Loose paper may be put into cardboard boxes and corrugated cardboard only is wanted. The Magnolia Service Station, next door to the Borchardt Chevrolet Co. garage, has been secured for a place to store the waste paper until it can be conveyed to Vernon by J. L. Lawson, dealer, who has agreed to haul the paper. The Boy Scouts, Mr. Eaton says, will be glad to collect all of the paper they can, but if they have conveyance and other help, it would aid them to deliver the packages to the point of concentration. The boys also would probably be willing to assist in bundling the paper, according to Mr. Eaton, unless it is tied in small bundles with a strong string, preferably binder twine, which will be provided for the Boy Scouts.

Foard County Men Inducted in Dallas

Charles E. Earthman of the Thalia community reported in Dallas for induction into the Navy on August 21st. John Ray Rashaw, (colored), reported for induction into the Army at Dallas on August 23rd. Eighteen registrants were forwarded to Dallas by the local Selective board for re-induction examination last week and fourteen were accepted for general military service.

HOSPITAL NOTES

Foard County Hospital
Patients In: Pamela Simmons
Patients Dismissed: Mrs. W. M. Johnson and infant daughter, Milton Williamson, Mrs. Delgado Agilar and infant son (Mex.)
Visiting Hours: 9:30 to 11:30 a. m.; 2 to 5 p. m.; 7 to 9 p. m.
Congressman W. P. Lambert, son, Republican, who served the first district of Kansas for eight years was defeated for the nomination in the recent primary by a young attorney, Albert M. Cole, of Holton, Kansas. Lambert, a bitter and tireless critic of President Roosevelt, attributed his defeat to his criticism of the military record of President Roosevelt's sons.

The name Illinois is a combination of Indian and French words meaning "band of men."

The name of Idaho is derived from an Indian word meaning "Gem of the Mountains."

The war casualties now total over 311,000 with more than 63,000 dead.

In Service

Pvt. Edward Roark, who is stationed at Fort Riley, Kan., spent a short furlough here Saturday night and Sunday visiting in the home of his father, H. C. Roark.

Second Lieut. Raymond S. Joy, son of Mr. and Mrs. C. C. Joy of Crowell, has reported to Randolph Field, San Antonio, as one of the expert pilots selected for training in AAF Central Instructors School, according to a news release from the public relations office. Upon completion of a month's specialized training here, he will go to another field of the AAF Training Command to be an instructor of aviation cadets.

Clarence Earl Orr, 17, son of Mr. and Mrs. Claud Orr, was inducted into the Navy in Dallas on August 26. He is a graduate of Crowell High School and a 2-year letterman in basketball.

Cpl. and Mrs. Milton Callaway spent last Wednesday night here visiting his parents, Mr. and Mrs. Claude Callaway, leaving Thursday morning for Graham to visit Mrs. Callaway's parents, Mr. and Mrs. Guy Ketchersid. They went from there to Fort Leonard Wood, Mo., where Cpl. Callaway reported for duty.

Pfc. Robert Thompson of Harvard Air Base, Harvard, Nebr., was here last week on a 5-day furlough visiting his parents, Mr. and Mrs. John Thompson.

Pfc. Thomas Nichols of Grand Island, Nebr., is at home on a 10-day furlough visiting his parents, Mr. and Mrs. W. W. Nichols, and other relatives and friends.

George Cates Jr. of the Merchant Marines arrived home from New York Wednesday morning to visit his mother, Mrs. Mildred Cates, and family in the home of his grandmother, Mrs. A. E. McLaughlin. George has recently completed an officer's training course in the Merchant Marines.

Pvt. Jimmy Cates, who is stationed at Camp Hood, is here spending a furlough with his mother and grandmother, Mrs. A. E. McLaughlin.

Ensign Marvin Myers, who has been stationed in Florida is spending a 15-day leave here with his family. He will report to New York upon the conclusion of his leave.

Government Jobs May Be Obtained

Applications for Departmental Guard (Announcement No. 194, 1942) are restricted to persons entitled to military preference as long as sufficient preference eligibles are available, the U. S. Civil Service Commission has announced. At present, however, sufficient preference eligibles are not available, and persons not entitled to such preference are invited to file applications. The Commission has also announced that the closing date for acceptance of applications for Architect (Announcement No. 222, 1942) will be August 29, 1944. Applications must be filed with the United States Civil Service Commission, Washington, 25, D. C., not later than that date. Further information and forms for applying for these positions may be secured from the Commission's local secretary, Mrs. Alva Spencer. Applications are also obtainable from most first- and second-class post offices and from the United States Civil Service Commission, Washington, 25, D. C.

Appropriate Exercises in High School Auditorium Will Open 1944-45 Term of School; Faculty to Meet Saturday

School Superintendent Grady Graves announces that appropriate exercises will be held in the High School auditorium Monday morning, Sept. 4, when the school year, 1944-45, is scheduled to begin. The exercises will start at 9:30 a. m. for all High School pupils and all patrons and friends who care to attend are given an invitation. A schedule has been worked out whereby all pupils will be issued books and assignments will be made and all will be dismissed by noon. On Saturday, Sept. 2, prior to the opening day of school, there will be a faculty meeting of all teachers in all departments at the

High School at 9 o'clock, after which the principals of the various departments, Leo Purvis, High School; Miss Cora Carter, Intermediate department; and Mrs. Carrie Hart, Primary department, will meet with the teachers of their respective department for the purpose of organizing for the year's work.

Registration of High School pupils has been going on all week and on Wednesday morning, 134 pupils had registered. This number gives promise of a large enrollment.

The following is the list of High School instructors for the coming year: Grady Graves, superintendent; Leo Purvis, principal; Harold Wilkinson, Mrs. Harold Wilkinson, Mrs. Doyle Kenner, Mrs. John Nichols, Mrs. F. A. Davis, Mrs. Lewis Sloan and Mrs. Earl Manard.

Teachers for the intermediate department, include Miss Cora Carter, principal; Mrs. E. C. King, Mrs. Florence Black, Miss Frankie Kirkpatrick and Mrs. Jimmie Hem-bree.

The primary teachers are Mrs. Carrie Hart, principal; Miss Thelma White, Miss Zelma Ferguson, Miss Mary Frances Soff, Mrs. Grady Graves, Mrs. Floyd Thomas and Mrs. Claudia Carter. Bus drivers for the term are Lewis Sloan, Ralph McKown, Bill Cox, E. W. Burrow, Wallace Hazelwood, Barney Sanders and George Pruitt. The bus drivers for Thalia, Riverside, Good Creek and Truseett have not been learned yet.

Miss Helen Jo Callaway will serve as secretary in the superintendent's office. Mrs. Arnold Rucker will continue to teach piano lessons in the music room in the Grammar School building.

Elmer Brisco will be keeper of the buildings. The following ladies will operate the lunch room: Mrs. S. A. Wallace, foreman; Mrs. Carl Taylor, Mrs. Verge Allen, Mrs. Luther Denton, Mrs. Eunice Jones and Miss Ida Mae Yount.

Millionth Benefit

Mrs. Mary Rex Thompson, widow of Cleveland war worker, receives the one-millionth benefit under the federal system of survivors' insurance for herself and children.

Foard County Gets Two Good Rains Since Friday Night

A good rain fell over most of Foard County last Friday night and 1.8 inches was recorded at the Crowell State Bank. The severe heat wave that had lasted for several weeks, owing to the extreme dry weather, was broken and the people of the community have been enjoying a season of refreshing, cool atmosphere. The moisture was of great benefit to cotton and other growing crops and the land that is being prepared for the fall sowing of wheat. Another good rain fell Tuesday night which measured about one inch at the Crowell State Bank, and from all reports it was general over the county.

Governor Proclaims Aug. 20 to Sept. 20 Paper Salvage Month

Gov. Coke E. Stevenson has issued a proclamation calling on all citizens of Texas to put forth their full efforts to collect at least 20 pounds of waste paper per capita during Paper Salvage Month, August 20 to September 20, it has been announced at headquarters of the Texas Newspapers' Waste Paper Drive in Fort Worth. The Governor has asked specifically for the co-operation of the American Legion, the Boy Scouts, local salvage committees and all newspapers, pointing out that waste paper now is the No. 1 critical war material. Many mills which convert waste paper into war products now are shut down or operating on a part-time basis because of the shortage of supplies, he stated. "Collections in the United States for 1944," Governor Stevenson said, "have averaged 79,000 tons monthly short of quotas. Consumption of waste paper is increasing every month and inventories are diminishing. It is vitally important to replenish inventories in order that production of blood plasma containers, boxes for emergency lifeboat rations, life preserver cartons, protective bands for bombs, field ration containers, and hundreds of other vital military needs may be increased." Following the Governor's request for co-operation of newspapers in Texas to help avert a critical shortage of waste paper, George B. Peeler, president of the Texas Press Association and publisher of the Taylor Daily Press and Conway Craig, president of Texas Newspaper Publishers Association and publisher of the Corpus Christi Caller-

Experienced Traffic and Transportation Specialists Wanted

Until further notice the United States Civil Service Commission will accept applications for traffic and transportation specialist positions in Washington, D. C. and throughout the United States. Salaries range from \$3,163 to \$7,128 a year including overtime pay. From 2 to 8 years' responsible experience in the traffic and transportation field is required for these positions. There are no age limits and no written test is required. Appointments to these positions will be war service appointments and will be made in accordance with War Manpower Commission policies and employment stabilization programs. The Commission has also announced that applications for the following positions must be filed not later than September 7, 1943: Inspector, Defense Production Protective Service (Announcement 20 of 1941). Further information and application forms may be obtained from the Commission's local secretary, Mrs. Alva Spencer. Applications are also obtainable from most first- and second-class post offices, Civil Service Regional Offices, and from the United States Civil Service Commission, Washington, D. C.

INTERESTING FACTS OF THIS AND THAT

The Golden Gate bridge in San Francisco harbor is the longest bridge in the country. It has a length of 4,200 feet. The lighthouse at Navassa, N. Y., is equipped with a light of 9,000,000 candle power, by far the most powerful lighthouse beacon in the world. At a height of 50 feet, objects at sea are visible a distance of 3.3 nautical miles. At the height of 1,000 feet visibility extends to 16.2 nautical miles. The total population of the world is estimated at 2,145,500,000. A cube of gold measuring 24.3 inches weighs a ton. New York harbor is the greatest port in the world from the standpoint of tonnage handled. London is second with less than two-fifths as much tonnage handled. A child was born in the United States every 14 seconds in 1943. The Leaning Tower of Pisa, in Pisa, Italy, was built in 1174 A. D. and finished in 1350. The tower story building is 16 feet out of plumb. The tower settled shortly after it was built and has been gradually settling ever since. In 1922 Mussolini injected over 1,000 tons of cement into the foundation to stop further settling. It is rumored that the CIO offered Henry Wallace a job at \$25,000 a year.

Mrs. T. S. Patton of Crowell spent the weekend in the home of Mr. and Mrs. E. T. Evans. Mrs. Ray Felty of Paducah is

Washington News

By Congressman Ed Gossett, 37th District, Texas

Washington, D. C., Aug. 28.—Much against my personal wishes I was called back to Washington on August 28 to work on the bill to provide for disposing of surplus war property. After several intensive hearings and consideration the committee reported to the House of Representatives a bill known as H. R. 727. This bill was debated in the House for a week and was passed by the House on August 29. The measure seeks to provide for the disposal of surplus war property. The bill or disposition of the property will be handled by the executive branch of the government under policies established by the Congress. Many members of the House, including myself, feel that the legislative branch of the government should set policy in this matter and require the executive branch to carry out the policy. The bill as reported to the House is a compromise between the two branches. As a member of the committee I am sure that the bill will be passed by the House and I am sure that the measure will be passed by the Senate. The measure will be passed by the Senate and will become law within the next several weeks. The surplus properties bill and the reorganization bill are the two most important matters upon which Congress is expected to act prior to its recess early in the fall. Washington.—The war's wounded and met by the Red Cross at their first hospital stop in the United States, almost universally make the same request. They ask: "How far am I from home? What's the quickest way to let Mom know I'm back?" More than 170 miles of the subterranean passages and cathedral chambers of Kentucky's Mammoth Cave have been explored and mapped.

Child Survivors of Saipan

A Japanese child on Saipan, her head, arm, and legs bandaged, sits with bloody face, her tiny battle-scarred legs wrapped in netting to keep the flies away, and stans out at the wreckage of the island. Next to her on the stretcher sits a tiny friend, a name tag pinned to her torn dress, telling a U. S. Marine the answers to his questions. Behind them, a bloody-faced Marine waits for medical aid.

will be finally drawn, agreed to, and sent to law within the next several weeks. The surplus properties bill and the reorganization bill are the two most important matters upon which Congress is expected to act prior to its recess early in the fall. Washington.—The war's wounded and met by the Red Cross at their first hospital stop in the United States, almost universally make the same request. They ask: "How far am I from home? What's the quickest way to let Mom know I'm back?" More than 170 miles of the subterranean passages and cathedral chambers of Kentucky's Mammoth Cave have been explored and mapped.

ANNOUNCEMENT. Both gins belonging to the Farmers Co-Operative Society of Crowell have been thoroughly repaired and are now ready for the ginning season. The north gin is equipped with a cotton dryer of the latest type, and this will be its first season for operation since it was destroyed by the storm. This gin is an all-steel, fire-proof plant. The Farmers Gins are under new management and the manager has had thirty years experience in the cotton ginning business. We will appreciate your patronage and will endeavor to give you courteous and efficient service. FARMERS GINS. H. M. NICHOLS, Manager

ALKA-SELTZER BRIGHTENS MY DAY. WHEREVER you are, whatever you're doing you wear your tin hat and respirator for a certain part of a certain day each week at one of the RCAF's Pacific coast stations. Telephone operators suddenly sound as if they'd developed cleft palates. Stenographers catch up on typing practice as dictation is suspended until voices get out in the open once more. The airman who whips up a smart salute can accompany it with a rude face—no one is the wiser—and cooks can peel onions without a qualm. How the precaution program works is illustrated here. Even off duty, the girls don't let the drill interfere with their routine. Left to right above (and their own families wouldn't know them) the crokinole players are Leading Airwoman Evelyn Dugman, Edmonton; Cpl. Jennie Cassidy Bethany, Man. A.W.I. Barbara Wilson, Saskatoon; and Cpl. Bernice Martin, St. Vital, Man. Leading Airwoman Bertie Johnson of Winnipeg, right, finds that keeping her eyes on the notebook has complications, but types bravely on. In oval — Detroit is "home" to Leading Airwoman Catherine Mullin, now overseas with the RCAF Women's Division, even though the flash "Canada" shows at her shoulder. She was born in Canada, and is not entitled to wear the "U.S.A." badge usually used by Americans in the Canadian Forces.

ALKA-SELTZER BRIGHTENS MY DAY. OCCASIONALLY, I wake up in the morning with a headache. It sometimes wears off along the middle of the forenoon, but I don't want to wait that long, so I drink a glass of sparkling ALKA-SELTZER. In just a little while I am feeling a lot better. Sometimes the week's ironing tires me and makes me sore and stiff. Then a tablet of ALKA-SELTZER to the rescue—a tablet or two and a little rest makes me feel more like finishing the job. And when I eat "not wisely but too well" ALKA-SELTZER relieves the Acid Indigestion that so often follows. Yes, Alka-Seltzer brightens my day. It brings relief from so many of my discomforts, that I always keep it handy. Why don't you get a package of ALKA-SELTZER at your drug store today? Large Package 60¢, Small 30¢.

READY FOR TROUBLE. She is the daughter of Mr. and Mrs. Patrick Mullin, 8716 Orangelan Drive, Detroit, and has a brother, Sergeant Hugh Mullin, in the United States Army. She attended MacKenzie High School, Wayne University, for a year, was trained as a meteorological observer in the RCAF, and was an officer clerk in an insurance company in civilian life.

T. H. Matthews and daughter, Ava Mae, visited relatives in Gray-son County last week.

C. B. Morris and family of Clarendon visited in the J. M.

Scholarship in Mary Hardin College Given Wichita Falls Girl

Belton, August 29.—Miss Peg-gy Pauline Adams of 2172 Ave-nue I, Wichita Falls, has been awarded the Fannie Breedlove Davis Scholarship from District 11 of the Texas Baptist Woman's Missionary Union, for the Cen-tennial year at Mary Hardin-Bay-lor College, which opens Septem-ber 14. Miss Adams was select-ed from a group of applicants from thirteen counties in north-central Texas, which comprise District 11, according to Presi-dent Gordon G. Singleton, who announced the award this week.

The scholarship has been award-ed for the college's one hundredth year to honor one of Mary Har-din-Baylor's former students, Mrs.

Fannie Breedlove Davis, who led in the organization of the Texas W. M. U., and who aided in the organization of the Southwide W. M. U. She served as the first president of the Texas W. M. U.

Miss Adams is the daughter of Mr. and Mrs. B. T. Adams of Wichita Falls, and was grad-uated from the Wichita Falls senior high school last spring, and has ranked among the upper ten per cent of her classes all through her school work.

Fifteen Fannie Breedlove Davis Scholarships have been awarded in Texas. One each has been awarded in New Mexico and Louisiana, and two in Oklahoma.

Counties comprising District 11, from which Miss Adams was chosen include Archer, Baylor, Childress, Clay, Cottle, Foard, Har-deman, King, Knox, Throckmor-ton, Wichita, Wilbarger and Young.

J. L. Lanier Sr. of Crowell vis-ited in the Lanier Grocery in Truscott Tuesday morning.

Mrs. Wynn Fannin and daugh-ter, Linda Kay, are visiting Mr. and Mrs. Homer Houston and fam-

POST WAR ON THE FARM COMES LATER And It Calls For Action Now

You hear a great deal these days about post-war planning. That's a fine thing, and mighty important, too. It will mean a speedy change-over from making things for war to making things for peace. But for us farmers and ranchers "post-war" comes later than for anyone else.

Our job will be to help feed the whole world for several years after victory. The demand for American foodstuff will remain great. This means we must keep busy now and plan for immediate action. Our farm buildings must be kept in tip-top condition and additional ones added, now.

BUILD NOW	IMPROVE NOW	PRESERVE NOW
The government is permitting new construction of barns, bins, silos, poultry houses, and all other kinds of essential structures for ranches and farms.	The best place to invest ranch and farm profits, next to U. S. War Bonds, is right back in the business. Improve buildings, repair fences, strengthen foundations and put on good roofs.	The value of paint on farm buildings can't be reckoned in the nice appearance, and air of prosperity it gives the place. Good paint, such as Minnesota brand, penetrates the surface, seals the pores and adds years of life to the buildings. Minnesota Standard Red Barn Paint has been a favorite on American farms for over 70 years. On your implements, tractor, and equipment use Minnesota Implement Paint. A gallon or two will paint every implement on the average farm.
You can't find a better place to get materials and good, practical suggestions for farm construction work than at Wm. Cameron & Company. Besides supplying all the materials you need, they also give you complete, easy-to-use plans absolutely free.	Present increased production calls for a number of new structures such as brooders, poultry houses, utility buildings, feeders, etc. At Cameron's you will find these items already made, waiting to be loaded on your truck. Every time you're in town, visit Cameron's.	

FOR A COMPLETE BUILDING SERVICE GO TO Wm. CAMERON & CO.

LOCALS

Shopping bags, 35c.—W. R. Womack.

The News has a good supply of standard staples and also for C-52 plier stapler.

Mrs. Sam Collier of Medicine Mound spent the week-end visiting her daughter, Mrs. Dorris Gentry.

Mrs. A. Y. Beverly spent Monday night and Tuesday visiting in the home of Mr. and Mrs. Julian Wright in Vernon.

Visit our Gift Shop when you need that "Extra Special" Gift.—W. R. Womack.

Mrs. Georgia Pearce of Plainview spent last week with her sisters-in-law, Mrs. S. W. Gentry and Mrs. Charlie Hunter.

Get your paper clips at The News office. Good supply of No. 1 clips.

M., while Miss Nancy will return to Wichita.

Nazi Tunic Taken

Capt. Tom Carothers and Lieut. Roy Green, both of Tuscaloosa, Ala., on the tunic of a German general, just one of the souvenirs that fell into American hands during the great offensive. Note the Iron Cross still on the coat.

PEACE IN HANDS OF AMERICAN PEOPLE

With the end of the war in sight, people are beginning to think of the day when readjustment to peace can be made. Part of that readjustment must include a new conception of the United States in relation to the rest of the world. Hereafter, the problems of the world are our problems. If there is another war, we will be in it.

It is our responsibility to help lay the foundation of enduring peace by seeking to reestablish equal trading opportunity and free markets. Admittedly, this may take time, but failure means another world depression and another world war, in the opinion of J. B. Condliffe, Professor of Economics in the University of California, who declares that: "The whole case for expanding international trade is that there is gain, not loss to the national economies participating in such trade. In the circumstances of the immediate postwar period it does not require much reflection to realize that not loss but disaster, is threatened if the channels of trade cannot be re-opened promptly. There is little chance of a relatively smooth conversion from war to peace economy unless this conversion can be carried out in an expanding system of international collaboration."

"In the successive emergencies of recent years so much stress has necessarily been laid upon the regulation of all sorts of prices... that the more important necessity of maintaining active and healthy markets has come to be forgotten. The foundation of prosperity is abundant production and free interchange, not nicely regulated equity. "It is an unrealistic to consider national economic activity apart

ALL IN SAME BOAT

How to avoid unemployment after the war is a grim question that is foremost in everyone's mind. But job-creating industry and its problems, which are determining factors in the lives of all of us, is not receiving the public consideration it deserves. Too many people still look upon industry as an entity unto itself. They feel that tax and legislative measures affecting industry are things for the "big guys" to worry about. They don't realize that when a corporation gets slapped in the face with crippling legislation or taxation, eventually the effect is reflected in its capacity to produce, and the little guy as well as the big guy gets hit between the eyes by loss of employment or restricted output.

For example, when you take an aspirin, you are using a derivative of coal. Thus, although you may live thousands of miles from the

Too Late to Classify

FOR SALE—One 6-foot M. M. One-Way, one 4-wheel trailer suitable for stock or cotton.—Harley Capps, Thalia. 9-2tc

Virginia coal fields, you are dependent on the coal industry. In fact, the bathroom cabinet would be swept nearly bare if the coal industry should fold up and quit. In addition to aspirin, bituminous coal derivatives are used in making laxatives, rubber goods, and perfumes, to say nothing of the life-saving sulfa drugs. These things are incidental to the more primary uses of coal which maintain the war effort, heat and light our homes and drive our trains and make steel. Coal is typical of many industries employing millions of American workmen. In common with other industries, it is meeting its problems aggressively and resourcefully, with two objectives in view—more production and more jobs.—Industrial News-Review.

UNSUNG HEROES

"There's a group of unsung heroes in these war times that I think deserve a pat on the back. I'm referring to the freight train crews who are doing such a monumental day and night job of moving war supplies to embarkation points. They're on the job every day when and where they're needed."—The Kate Smith Program, Columbia Broadcasting System, July 21, 1944.

And This Little Pig Cried

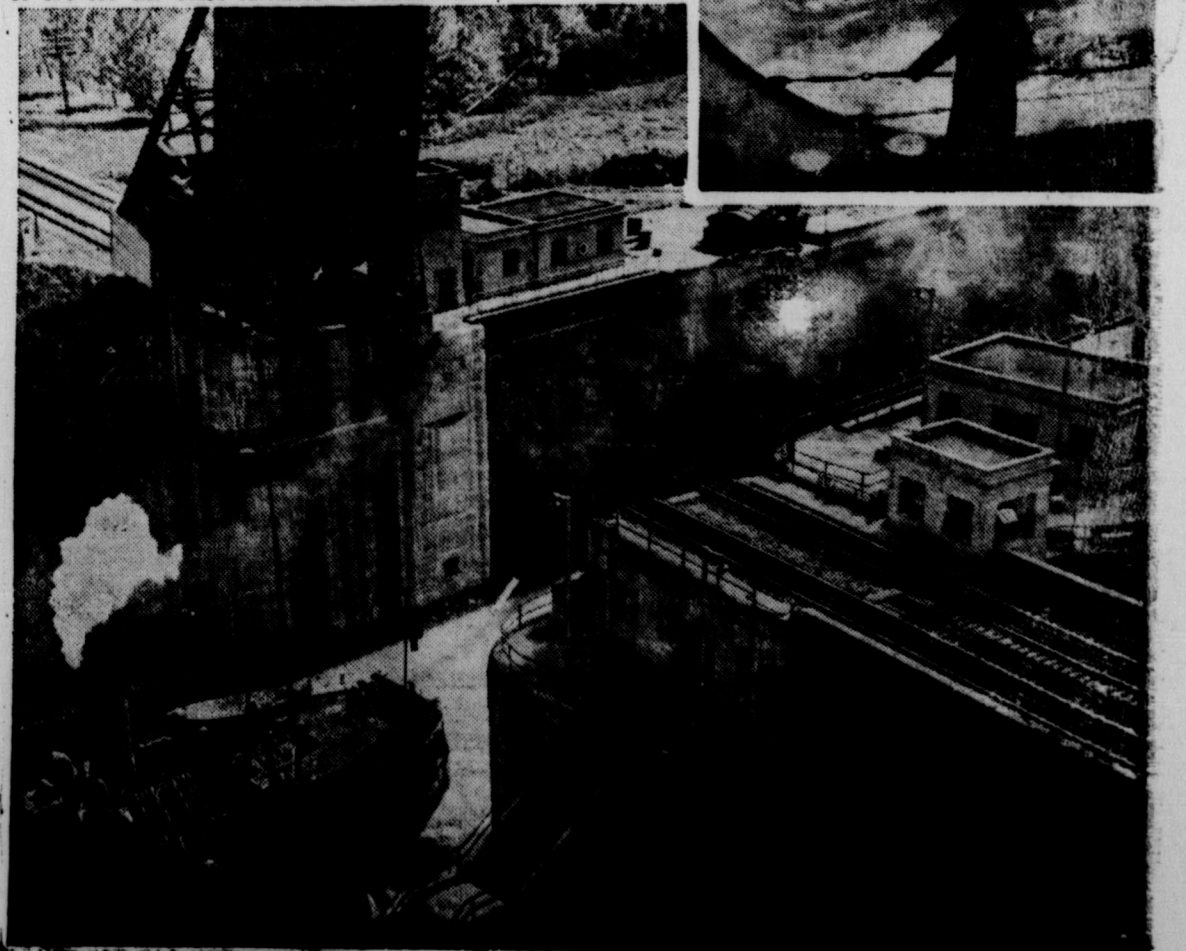

Bemoaning their fate are three little pigs, the prized captives of these three marines on Guam island. The Leathernecks are holding on tight and there is little hope of escape for the porkers. Left to right the marines are: Pfc. Ed D. Davidson, Portland, Ore.; Pfc. Jack L. Mathier, Bridgman, Mich.; and Pfc. Clyde A. Morrison of Easton, Ill.

U.S.-Canada Inland Water Route Busiest in World

DURING the seven months that they are open to navigation the Great Lakes are alive with ships. This inland water route, stretching over 2000 miles, links the heart of industrial Canada and U. S. with the war effort of the United Nations. Coal carriers lug black fuel from Erie or Buffalo to Toronto and the Soo; bulk carriers bring grain from the world's breadbasket to Midland and Collingwood or rust-red ore from the Mesabe and Vermillion Ranges to Hamilton and Conneaut; oil tankers take liquid dynamite from Sarnia to Kingston, and little package freighters deliver paints, steel pipe and breakfast food from Montreal to Cornwall. This traffic has made the canals at Sault Ste. Marie, connecting Lakes Superior and Huron, and the Welland Canal, between Lakes Erie and Ontario, the busiest in the world.

Below is shown a railway bridge spanning the Welland Canal being lifted to allow the passage of a freighter. At right, a crewman on the C. S. Robinson, bound up Lake Superior, watches the SS Cornell, headed down the lake with a rich cargo of ore for the blast furnaces of Hamilton.

TOWN and FARM in WARTIME

Prepared by OFFICE OF WAR INFORMATION

REMINDERS

Meats, Fats.—Red stamps A8 through Z8 and A5 through D5, good indefinitely.

Processed Foods.—Blue stamps A8 through Z8 and A5 through F5, good indefinitely.

Blue stamps G5 through L5 become good September 1 and remain good indefinitely.

Sugar.—Stamp 30, 31 and 32, each good for five pounds indefinitely, and 33 good for five pounds after September 1 and remains good indefinitely. Sugar stamp 48, good for five pounds of canning sugar through February, next year.

Gasoline.—In 17 East Coast States, A-11 coupons, good through November 8. In States outside the East Coast Area, A-12 coupons, good through September 21.

Fuel Oil.—Period 4 and 5 coupons, good through September 30. New period 1 coupons now good.

Shoes.—Airplane stamps 1 and 2, good indefinitely.

Millions Trained For War Jobs.—During the past four years, more than 13,300,000 men and women enrolled in organized training programs for war jobs, Paul V. McNutt, chairman of the War Manpower Commission reports.

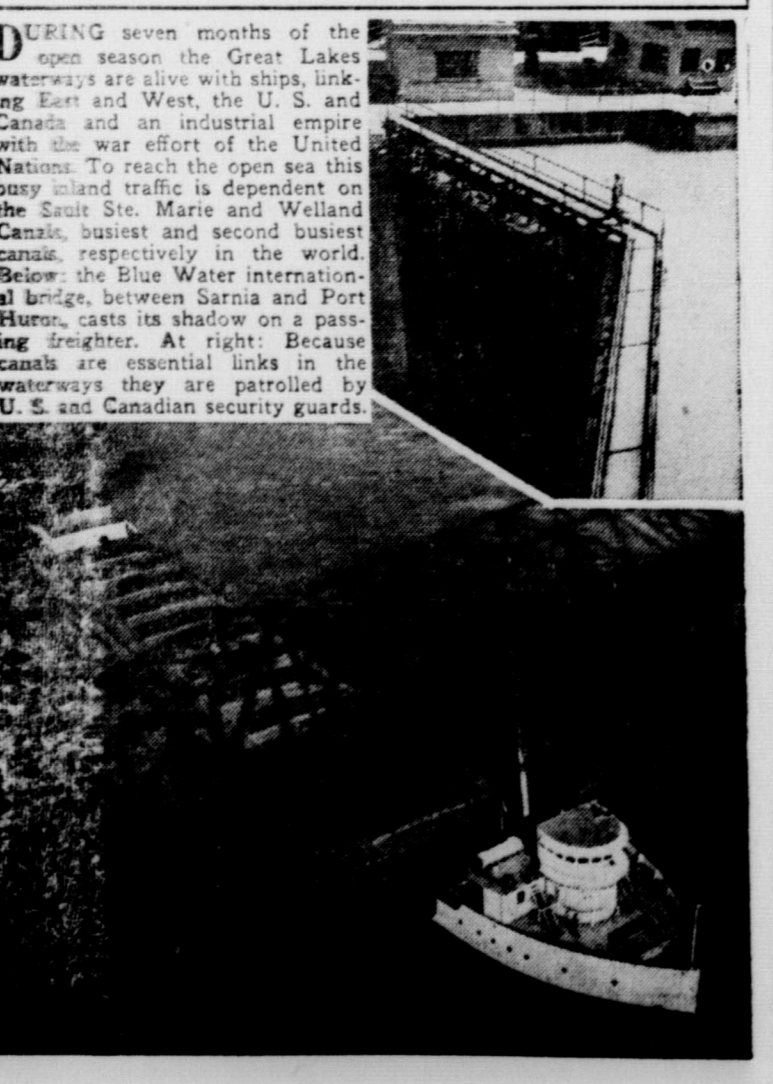

The training was provided by agencies co-operating with the War Relocation Authority. Of this vast group, the food production training program, conducted through vocational agricultural schools had 3,035,566 enrollments. The engineering, science and management war training program, given in selected colleges, had 1,568,123 enrollments. The training within industry program enrolled 1,375,767 supervisors who, in turn, provided instruction for millions of war plant workers. The National Youth Administration, which is no longer in existence, provided training for 772,756 persons, during 1942 and 1943 fiscal years.

Veterans Learn of Rights, Benefits.—Every veteran, upon being discharged, will receive a booklet entitled "Your Rights and Benefits, A Handy Guide for Veterans of the Armed Forces and Their Dependents." The booklet was prepared by the retraining and re-employment administration of the Office of War Mobilization. Nearly 2,500,000 copies of the booklet are now available. Veterans who have already been discharged will be able to obtain copies from Draft Boards, Office of Veterans Administration, USES or Community Veterans—Information Centers.

Now You Can Draw A Bead On Them.—If you have a few moments to spare, you may begin to oil up the family dirt-lock. WPB has taken cognizance of the fact that animals and birds are causing widespread destruction of crops and livestock all over the country. The ban on the sale of ammunition to hunters will be removed temporarily in the near future. Available for nitro and will be 240 million .22s and .243s, 8 million .243 center fire cartridges and 130 million shotgun shells. Wolves, coyotes, foxes, weasels, wild ducks, crows and pheasants should not be told of this regulation. Happy hunting.

Lend-Lease Food Deliveries Drop.—Meat, dairy and poultry products lead the list of foods for the Allies, in the War Food Administration report of July deliveries. For the month ending July 31, Lend-Lease food deliveries totaled 522,851,964 pounds compared with 658,119,418 pounds in June.

World's Busiest Canals Control U. S.-Canadian Lifeline

DURING seven months of the open season the Great Lakes waterways are alive with ships, linking East and West, the U. S. and Canada and an industrial empire with the war effort of the United Nations. To reach the open sea this busy inland traffic is dependent on the Saint Ste. Marie and Welland Canals, busiest and second busiest canals, respectively in the world. Below: the Blue Water International bridge, between Sarnia and Port Huron, casts its shadow on a passing freighter. At right: Because canals are essential links in the waterways they are patrolled by U. S. and Canadian security guards.

New Ceiling Prices on Brides (QM)

New life has no more surprises—in Durban, South Africa, a man was able to get rimped if a wife by paying her dad \$88 in hard cash plus seven cows. So what (QM). So, into the Office of the Price Controller there appeared a man who protested that his prospective father-in-law had jacked up the price of \$128 in cash. The F-I-L explained that increased cost of living made it necessary for him to boost his price. The controller allowed as how the problem was beyond his province. But, says Canada's Wartime Information Board which reported the incident, it proves that even this primitive man could see the solid common sense and usefulness of price control.

Norwegian Laborers Undernourished

The food ration for Norwegians working in Nazi Slave Labor Camps is so small the workers must have food sent to them from their homes, the Swedish Newspaper Stockholms-Tidningen says in an article reported to OWI. Attempts to get Norwegians to sign up for "harvest work" failed because all knew that meant working on military fortifications.

Army Can Field 50,000 Ball Teams

The Army purchases annually enough baseball equipment to outfit 50,000 baseball teams and 100,000 softball teams; the Navy enough for more than 11,000 and 22,000 respectively, OWI reports. The Army and Navy buy up about 90 per cent of all sports and game equipment produced in the United States and, as a consequence, civilians can expect little or no increase for the present in the amount left over for their use. Last year the services bought sports and game paraphernalia, devoted to the use of enlisted men, costing \$38,000,000. Even so, total new supplies represent approximately one baseball glove for every 17 men in the Army and for every 28 in the Navy.

Round-Up

WPB announces—the total value of farm machinery produced during July, 1944, was \$75,565,553, a figure which is 51.2 per cent higher than the monthly average during the 12 preceding months. Manufacturers of corn pickers and binders were urged to speed up their production during August and September so that corn growers will have this machinery for the fall harvesting season. . . . American coal mining machinery sent to Britain is helping to raise the rate of production of "strip" coal from the current 10,000,000 tons a year to 18,000,000 tons. . . . Lumber stocks at sawmills and concentration yards totaled 4,118,038,000 board feet at the end of the second quarter, 1944, the lowest figure since December, 1941. . . . Exactly 15,000 electric hair clippers will soon be made and the finished snippers will go to the Armed Services.

OPA summarizes—Chester Bowles, Administrator, says, "each of us, each Government Agency, each industry, each labor union, each group of farmers—and each individual community—will have a share in this enormous (reconversion) task. . . . Since April, 1943, when the hold-the-line program was issued, rents and retail prices for cost of living items have been generally stabilized—showing a rise of less than 2 per cent. . . . I believe that full credit for cost-of-living stabilization must be shared with our farmers, workers and our industrial managers."

AGRICULTURE

(D. F. Eaton, County Agent.)

Winter Pasture

Perhaps the best winter grazing can be provided in this county by planting small grain. The moisture supply at present is sufficient to get the grain up and to carry it for some time if snow now.

It is important to get this crop early to provide early grazing. Early planted grain will become deep rooted and will stand the cold better. This early grazing will provide sufficient protein for livestock and will reduce the feed bill this winter. It will require from one to two acres per cow, depending on the fertility of the soil. On the sandy soils of the county, sorghum is well adapted as a heavy rooted plant. It is a heavy rooted plant. The recent rain will enable grain growers to put the final touches on the preparation of their small grain land in preparation for sowing. No doubt there will be a crop of volunteer grain and rescue grass to destroy before planting.

Remember there is a limited supply of Commanche wheat seed available here in the county. Should anyone want certified seed of other varieties there is seed available direct from the growers.

Feed Situation
There is some indication that the feed situation may be less serious than last year. Some factors affecting the situation are a satisfactory national corn yield, a reduction in the number of hogs to be grown and fed out and satisfactory yields of oats and barley as reserve feed grain. Also a fair crop of grain sorghum is now being harvested. However, there is an all-time high increase of cattle and poultry over last year.

It would be well to check your present feed stocks and arrange to get your needed supply early as prices will likely be some higher later and transportation is easier now and available feed supplies nearer home, a shorter haul. Protein feed supplies will prob-

Canada Extends Mutual Aid To Her Allies

Under the Mutual Aid Plan, Canada has expended close to one billion dollars in goods and services to the United Nations. The extent of this help is portrayed above. While to date, the assistance to the fighting French has not been extensive—mainly naval ordnance—a larger program has been initiated to meet their needs.

ity of the farm adapted to each particular section of the entire country and for every crop grown to be used in soil preparation, seeding, tillage and the harvest of all crops.

For example, they now have a new pickup hay baling machine that picks up the hay, packs it into a bale without blocks, and automatically ties it with heavy twine. This entire outfit, tractor and all, is operated by one man. We saw a cotton picking machine that will pick from 95 to 98 per cent of the cotton from the stalk, and four or five bales per day.

They had a one-way disc plow that will break stubble as deep as you care to go, say up to 12 inches deep. There were subsurface tillage plows well adapted to clearing stubble land of vegetation, regardless of the amount of straw or other waste material on the surface of the soil.

Factors in Feeding Dairy Cattle
At least one-fifth of the average dairy herd must be replaced yearly. Economical replacements depend upon the survival of the largest number possible of the calves born within the herd, says O. W. Thompson, dairy husbandman for the A. & M. College Extension Service. Correct feeding and care are imperative in raising and develop-

ing a heifer into a thrifty producer. Milk should be fed at regular intervals at blood temperature and over-feeding avoided. Thompson says that it has been found through research that milk feeding can be stopped at two weeks of age and the calf raised on milk substitutes. But for the first three or four days it is important that a new born calf receive the milk or colostrum from its dam. The colostrum cleanses its digestive tract and aids digestion.

Although a calf usually will eat grain at two weeks of age it should be taught to do so, as well as to eat hay, as soon as possible. Putting a little into the pail immediately after feeding milk is a good way to begin. The grain mixture should be fed to each calf individually in separate feed boxes. Hay should be bright, clean and of high quality, and kept before the calf at all times so it will eat all it desires. Non-legume hays such as prairie, cane, Bermuda, Johnson grass or sudan, or a mixture of non-legume hays with not too much legumes should be fed. Silage, however, should not be fed under five or six months of age. Pasture also should be provided. A young calf will not eat much grass, but it needs exercise and sunshine, and the vitamin A from the grass it does eat.

The violinist is always up to his chin in music.

SAFETY SLOGANS

A fall from a ladder can be in serious injuries. Make your ladder is without defects. Apply safe automobile practices to your bicycle and you'll probably avoid accidents.

When you get old papers of the house you're removing, fire hazard.

HOUSEHOLD HINTS

Rotten stains can be removed from the kitchen range with cloth dipped in turpentine. The pressure will help there. Don't forget that matching curtains and slip covers will make rooms sprightly in spite of the season.

Since quilts are expected to last a long time, sometimes better bedrooms, and entail quite a bit of work for even the simplest, only new cloth and good thread.

One of nature's strangest features is the Ice Cave, a rock at near Decorah, Iowa, which recedes the laws of nature by being warm in winter and below freezing in spring and summer.

The state of Kansas received name from an Indian tribe called the Kansas—meaning "People of the South Wind."

JOIN GULF'S "Anti-Breakdown" Club TODAY!

BEFORE THIS WAR IS OVER, there may be only two kinds of people in America . . .

1. those who can still get to work in automobiles,
2. those who are forced to walk.

If you want to be in the fortunate group who will still be riding to work in automobiles, join Gulf's "Anti-Breakdown" Club today. How do you do it? Just come in for Gulf's Protective Maintenance Plan!

This plan was conceived by experts in car care. Gulf developed it because car maintenance is a most important civilian job.

Here's Gulf's Protective Maintenance Plan

- 1 Protects your car at 39 danger points...**
- 2 Guards your bearings and piston rings...**
- 3 Helps gas coupons go a little further...**
- 4 Get an appointment at your Gulf station**

GULF'S Protective Maintenance Plan includes Gulfex Registered Lubrication which reaches up to 39 vital points with six different Gulfex Lubricants that reduce wear, and lengthen your car's life.

IT'S IMPORTANT to give your car a good motor oil and change regularly. Gulf offers two outstanding oils . . . Gulfpride, "The World's Finest Motor Oil," and Gulfube, an extra-quality oil costing a few cents less.

AIR-FILTER and spark-plug cleaning, and radiator flushing help give better gas mileage. A clean air filter makes gas burn more economically; clean plugs increase power; a clean radiator prevents overheating.

HELP YOUR Gulf Dealer do a thorough job—and save your time—make an appointment in advance. Phone or speak to him at the station. Then you should encounter no delay when you get Gulf's Protective Maintenance Plan—15 services in all!

GULF

For better car care today... to avoid breakdowns tomorrow!

Gasoline powers the attack... Don't waste a drop!
