Mrs. Hardberger had been at church and returned to find the house filled with smoke. The house was tightly closed and the lack of air caused the fire to go out. Damage of about \$200 was done to the bathroom, probably the origin of the fire. A small dog closeted in the room was "out" due to the smoke but soon revived when given air.

In the early part of the same night a slow cotton shower netted 15-16 inch rain in town with a lack amount over an area to the south and east.

WHAT CAN KILL INSECTS CAN (AND DOES) KILL MAN

Austin — State health officials have raised a red flag of warning against careless use of insecticide compounds around homes. Despite being agents for good when used properly, the potent compounds can be fatal when absorbed thru the skin or mucous membrane or when inhaled, Health Commissioner Henry A. Holle said.

Only last week health department food and drug officials asked that a roach paste containing thallium be recalled from the market because its odor and taste made it attractive to children.

Two of the newer garden spray products — parathion and tetraethyl pyro-phosphate — come from a group known as organic phosphate insecticides. They were originally designed for professional use only, by workmen thoroughly familiar with the dangers associated with them.

Now they are available in small packages or bottles which frequently reach the general public. Persons who use either of the two powerful compounds should handle them as professionals do.

They wear special protective clothing with goggles to keep spray from their eyes, and respirators approved for protection against organic compounds.

They never smoke or eat until they have thoroughly washed after using the preparations and they know the symptoms of insecticide poisoning.

Holle listed headaches, excessive sweating, giddiness, blurred vision, weakness, nausea, cramps, diarrhea, or chest discomfort as symptoms of insecticide poisoning.

Council is Progressing

A Girl Scout Council which will serve nine South Plains counties became more nearly a reality daily as volunteer workers from these counties continue working in committees to set up the mechanics of the proposed council. The work of all committees is aimed at January 1st, 1957 when it is planned that the organization will have been completed and the new council will be in operation.

Under the capable direction of Miss Virginia Burgess, professional Girl Scout Executive from the Dallas Regional Office, the committees have been working thruout the summer. The next general meeting will be held Oct. 2 at which time the plans which are being made by the functioning committees will be studied and approved.

The organization of this council will be a great step forward in girl scouting in this area. The girls will gain thru more extensive programs, including troop programs as well as camping opportunities, while the volunteer workers will have the opportunity to participate in training courses which will be used in their work and will be better organized in their own communities to work together for better and more efficient scouting.

IT'S SURE BEEN HOT!

"This summer, I have put in a great many extra hours of work for my customers every day.

"Air conditioners, attic fans, evaporative coolers, and portable fans have been going full blast around the clock — 24 hours a day practically every day. High temperatures, lack of rainfall and many nights without our usual cooling breeze have combined to make it an exceptionally hot summer. Electric refrigerators have had to call on their reserve power to keep food fresh and wholesome at constant temperatures under 40 degrees and to maintain ready supplies of ice cubes and cooling beverages.

"Some electric bills may be higher during such extreme hot weather because of this extra work but now — when you're able to stay cool and comfortable in spite of the heat — is when your electric service really proves to be the biggest bargain in your home."

MRS. NOBLE THANKS VOTERS

I wish to express my thanks to the voters for your support during my campaign for state representative. I especially appreciate the fine backing the O'Donnell area and the Lynn County citizens gave me at the polls. Although I did not win the race, I can truthfully say it was one of the most interesting and enjoyable experiences of my life.

FISH CARBURETOR PASSES GRUELING TEST

Hervey Gardenhire, local theatre manager, who has been advertising the Fish Carburetor, recently made a grueling test run into New Mexico and Colorado.

Mr. Gardenhire, driving a 1947 Fluid drive Chrysler for 3000 ft. altitude to 12,183 ft., reports the Fish performed out of this world and on some of the 10,000 ft. passes the run was in high gear.

In addition Mr. Gardenhire's family he had about 100 lbs of luggage. In the total distance of 2,335.7 miles the Fish used 122 gal. of gas and there was no lugging nor jerking as in conventional carburetor. It was as smooth as silk.

Mr. Gardenhire states at our local altitude of 3,000 ft. the Fish is doing 20 M.P.G. at speeds 55-60 with fluid drive. It has better get-away and can increase top speed by 10 miles. The carburetor, being unique in design, has no choke, no jets and no acceleration pump and weighs only 2 1-2 lbs and can be adapted to any motor. Anyone wishing to get better performance out of their cars, may contact Mr. Gardenhire for further information. (ADV.)
