

THE O'DONNELL INDEX

VOLUME XII

O'DONNELL, LYNN COUNTY, TEXAS, THURSDAY, JUNE 27, 1935

NUMBER 38

Timers to Meet Stamford Reunion

Stamford, Texas, June 25.—A number of men—the cowboys—came when they carved a path from the trackless plains to Stamford. They will be honored at the Annual Texas Cowboy Reunion which will be held here July 2, 3 and 4. The men who saw service on the trail or on horse back will be special guests of the reunion.

The reunion will feature a "round-up" and election of officers during the reunion. The members of the association who are good standing are issued at the reunion metal badges which entitle them to free admission to the rodeo grounds, a chuck wagon dinner and free admission to the dancing and social dance every night and to the rodeo.

The reunion is a goodly affair and the reunion will feature a "round-up" and election of officers during the reunion. The members of the association who are good standing are issued at the reunion metal badges which entitle them to free admission to the rodeo grounds, a chuck wagon dinner and free admission to the dancing and social dance every night and to the rodeo.

South Plains Singers Met At Tahoka

Singers from fifteen counties met Sunday at Tahoka when the South Plains Sacred Harp singing convention was held.

A number of local people attended the convention at the basket lunching in the afternoon.

Curb Service Curb Service NEW ARRIVALS IN JEWELRY

For the benefit of our lady customers who want their personal adornment to be just a bit better than the average, we have this week received a new shipment of lovely jewelry. We wish to especially call your attention to the new ear rings, for both pierced and unpierced ears.

DAVIS DRUG STORE

Carrying a complete line of quality drugs and drug sundries. Remember we will not be knowingly undersold in O'Donnell.

Sterilized Glasses - Registered Pharmacist

Work Continued On State Highway No. 9

Approximately \$5,000 was allotted last week by the State Highway Department for the employment of teams and trucks for the completion of caliche work on the highway from Tahoka to the Lubbock county line.

Bids are to be received on July 3 for double asphalt surface on four miles of this sector, according to press dispatches which appeared in the Sunday dailies.

County Judge W. E. Smith recently attended a highway meeting in Roswell, New Mexico, and returned with the pledge of that state that New Mexico is ready to meet Texas with a paved highway at the state line.

Last Saturday Is First Day of Summer

For one time local people agree with the weather prognosticators, or climatologists, as they are officially termed.

To be absolutely correct, summer began at about 9:38 A. M. EST. Thursday of last week, when the earth's axis tilted toward the sun.

South Plains Singers Met At Tahoka

Singers from fifteen counties met Sunday at Tahoka when the South Plains Sacred Harp singing convention was held.

A number of local people attended the convention at the basket lunching in the afternoon.

Duck, Here Comes the Five-Ten

Stores Will Close Thursday, July 4th

On another page of the Index our readers will find an ad signed by business men and merchants, to the effect that their places of business will be closed next Thursday, July 4.

Hubbers Win Game From New Moore

Skipper Lee Wright's Hubbers and several car loads of fans drove out to New Moore Sunday afternoon, and fans were treated to a nice exhibition of real baseball.

Hubbers To Get New Uniforms

Through donations from business and professional men and merchants with assistance from other fans, a move is underway this week to raise funds to purchase new uniforms for the ball players.

Club Bedspread to be Given Saturday

Club ladies ask us to remind the public that their annual bedspread to be awarded the holder of the lucky number next Saturday, June 29th.

New Filling Station Opened Last Week

Oil D. Harris, for several years book-keeper at the Farmers Gin resigned that position Tuesday of last week, and immediately afterward went into business for himself by opening the filling station known as the White Service Station on the highway.

Highway Meeting On No. 84 Project

County Judge W. E. Smith was head of the Lynn county delegation who met with representatives from six other counties Tuesday at the Lubbock office of the district highway engineer, G. M. Garrett.

Car Kicks Back; Driver Is Injured

J. M. Farmer, a well-known resident of the east part of our territory, was the victim of an unusual and somewhat peculiar accident Sunday, receiving injuries which may necessitate the extraction of the upper central teeth.

Mr. Farmer was cranking his car, and it "kicked back," the jerk causing him to fall forward in such a manner that his front teeth came in contact with the headlight. Or, as his "small son" described it, "Daddy tried to take a bite out of the ole light."

District Epworth League Meets Here Saturday - Sunday

Members of the Epworth League of the local Methodist church will be hosts over the week end to come 150 delegates from various Leagues of the Lubbock district when the regional District Conference will be in session.

This is the first time in several years that the Conference has been held with the local group, and committees in charge of arrangements have spared no effort nor pains to insure the success of the affair.

Registration of visitors and assigning of homes will be the order of business Saturday afternoon, with a vesper service and a social meeting in the evening.

Visitors will be in the Sunday School Sunday morning, and will have charge of the eleven o'clock service. Luncheon will be served to delegates, and the main program of the session will be held Sunday afternoon, according to information given us this week by those in charge of plans here.

We understand that our young people are anxious to have a few more homes open for delegates, this term including bed for Saturday night and breakfast Sunday morning. If you can help them out in this undertaking, please get in touch with some member of the Epworth League and they will appreciate it very much.

PROGRAM FOR YOUNG PEOPLES MEETING, JUNE 29TH AND 30TH, 1935

- Theme: Going Forward. SATURDAY: 4:30 to 6:00 Registration. 6:00 to 7:30 Supper. 7:00 to 7:30 Vesper "Gratitude for Past Success"; Leader, W. A. Apple, Slaton. 7:30 to 8:30 Snapshots of the Summer Assembly. 8:30 to 9:30 On to Memphis Program. 9:30 to 11:00 Recreation. SUNDAY MORNING: 7:30 to 8:00 Morning Watch "New Opportunities"; Leader, Garth Rustin, Loveland. 8:00 to 9:00 Interest Groups. 9:00 to 9:15 Mt. Sequoyah Meeting. 9:15 to 9:30 Union Meetings. 9:30 to 11:00 Sunday School. 11:00 to 12:00 Morning Worship "Youth's Responsibility." SUNDAY AFTERNOON: 1:30 to 2:30 Business Session. 2:30 to 3:30 Consecration Service "Following Our Leader"; Rev. Cecil Turner, Lamesa.

Nazarene Young People To Meet

Next Sunday being the Fifth Sunday in the month, the regular Young Peoples' Rally for young people of the Nazarene churches of this district will be held at Post.

Because of the illness of Mr. Pearl Keeton, local pastor, there will be no service at the church at eleven o'clock, though Sunday school will meet at the usual hour. Most of the young people of the local church and a considerable number of those from the other Nazarene churches will attend the rally at Post.

Regular worship services will be held at the evening hour, however, and all members, or any others who might desire to attend, have a cordial invitation to come and take part.

College Quartet Coming To Local Nazarene Church

Mr. Pearl Keeton, pastor of the local Church of the Nazarene, has brought down news that on July 15 the quartet from Bethany-Peniel College will be here. This school is one founded and maintained by the Nazarene Church and is the center of the Nazarene movement in Texas.

A number of the local people are familiar with this little college town and the students turned out each year from the institution itself, so that the boys will find a friendly acquaintance in O'Donnell. Mrs. Keeton and members of the church extend a cordial invitation to the public to come and hear them during their brief stay here.

Friends have received announcements of the birth of a seven pound daughter to Mr. and Mrs. J. W. Clinton of Lubbock, Mrs. Clinton will be remembered as Miss Jessie Sergeant one of the most efficient and popular teachers who has ever been on the staff of the public schools.

Austin Family Reunion Held; First In Twenty-one Years

For the first time in twenty-one years, all the children of Mr. and Mrs. H. J. Austin were at home together this week end. Though somewhat saddened because of the ill health of the mother, the occasion was still a happy one.

Mrs. Austin has not been well for several years, and will probably undergo major surgery sometime this week, but was still able to enjoy the visits of her children.

A beautiful family dinner at noon Sunday was followed by an old-time family singing, with the girls taking their turns at playing piano accompaniments, just as they did before the group was scattered. Pictures of the entire family were taken also.

Among those present were Mrs. D. L. Casey and three sons, D. H., Billy and Walter of Williams, Ariz., Mr. and Mrs. E. A. Austin and daughters, Niveli, Lillian Fay and Paula June, of Lamesa; Mrs. A. D. Beasley of Houston; Mrs. J. B. Thompson and children, Earnestine and Charles of Chidress; Mr. and Mrs. Lloyd Thompson and daughters, Loydella, Olive, Such LaVera, of Lamesa; Mr. and Mrs. Carl Austin of Bernalillo, N. M.; Mrs. Andy Townson of Ft Worth; who will be remembered by friends here as Miss LuVenia Austin; and the baby of the family, Miss Charis Wanda.

"Split Tax" Payment Is Due June 30th

The Index heartily congratulates Mr. and Mrs. Austin on being the parents of this splendid group of children and joins with the community in extending best wishes for many more happy family meetings.

"Split Tax" payers in Lynn county, Dawson county, and Borden county are reminded by the tax collectors of the fact that June 30 is the date for the last payment of the 1934 tax. Such taxes must be paid on or before that date to avoid payment of an 8 per cent penalty plus 6 per cent interest to be calculated from June 30.

Tax collector Aubra M. Cade has caused notices to be printed in both papers in this county, calling attention of tax payers to this date, and asking their cooperation. It is supposed that similar notices have been published in all counties.

Local Masonic Lodge To Install Officers

We are asked to announce that the O'Donnell Lodge No. 1187 A. F. & M. will install officers for the coming year in a meeting to be held at the hall Friday evening, June 28th.

Masters degrees will also be conferred on several candidates. All members are urged to be present with any new brothers will be cordially welcomed.

Mrs. Waldo McLaurin was in Lubbock Monday on business.

Ray Lawler left last Thursday for Fort Keok, Montana.

ACCURATE BRAKE TESTING DEVICE

A brake testing device which is described by engineers as ideal for its accuracy and simplicity is employed by the Brooklyn Edison Co., of Brooklyn, N. Y. This public utilities corporation employs a large fleet of cars which are kept in top notch condition. The device consists of a fifth wheel upon which is mounted a speedometer that is checked for exactness by the New York Police Department as well as the Stewart Warner Co., makers of the instrument. When the brakes are applied a gun is fired, discharging a slug against the ground, leaving a distinct mark. The speedometer needle is stopped at the speed at which the car was running when the brakes were applied. It is simple, then, to measure from the mark made by the gun to the point directly below the gun, where the car was brought to a stop. Thus the exact speed of the car is known as well as the exact number of feet and inches in which the stop was made. The fifth wheel is counter-weighted so that it follows the ground accurately. A recent test on the Hudson car shown above recorded stops in phenomenally short distances, averaging about half the distance considered safe by police departments.

FLOODS MAY CAUSE TYPHOID EPIDEMIC

Austin, Texas, June 25.—Recent floods may be responsible for an epidemic of typhoid fever, declares Dr. John W. Brown, State Health Officer. Flood conditions have prevailed over most of the state and unless the utmost precautions are observed to prevent this disease the monetary loss from illness may equal the property loss.

Typhoid fever is often called a "filth-borne" disease. It can only grow into epidemic proportions under conditions which are unsanitary. A typhoid epidemic means that water, milk or food have been contaminated with germs from the body discharges of a patient or carrier. Contamination of milk or food by flies is favored by a lack of sanitation.

The prevention of typhoid fever is peculiarly a matter of community responsibility. In cities large and small most urgent control measures are those providing for (1) proper disposal of human excreta through sewage disposal plants and toilets of sanitary type; (2) safe public and well water supplies; (3) extermination of flies; (4) healthy food handlers; (5) supervision of disease carriers and (6) public milk supplies of high quality with the added safeguard of careful pasteurization.

Inoculations with vaccine increase individual resistance to typhoid fever. Such treatments are advised for exposed persons and those who, thru travel or change of residence are subject to varied water, food, and milk supplies. For the rank and file of our population, reduction of deaths and sickness from preventable disease like typhoid fever is largely dependent upon carrying out the six above mentioned measures.

INDUSTRIAL SURVEY PLANNED FOR TEXAS

Austin, Tex., June 25.—Governor James V. Allred announced this week completion of plans for a far-reaching industrial survey designed to provide jobs, attract outside capital into Texas and rehabilitate dormant and ruined industries.

The governor revealed that Dudley P. South of Houston, an industrial engineer of exceptional training had already done several weeks work in determining the feasibility and possibilities of the survey.

Mr. South, a graduate of Rice Institute and Columbia university, close associate of Dr. Walter B. Pitkin will head the survey. Governor Allred, pointed out that

an industrial survey of Texas, with particular reference to getting men and women off public relief rolls into gainful private occupation, had been recommended by the Democratic party in its convention last September.

"Inauguration of the Texas Industrial Survey," the Governor said, "with Dudley P. South as director, offers almost unlimited possibilities for co-ordinating public and private initiative to the end that jobs for the jobless will be provided and the entire industrial welfare of the state be promoted."

"We have already received assurances of cooperation from leading civic organizations, including chambers of commerce throughout the state, the University of Texas and Southern Methodist University, also from many public spirited citizens. An advisory council composed of prominent commercial and industrial leaders in Texas, will be announced shortly. Also, a co-ordination committee, composed of several men who have worked with Mr. South in the preliminary surveys and will assist him in furthering the work."

The governor released a statement from Mr. South briefly outlining objectives of the survey as follows:

"The function of this survey is to make available for all business enterprises such data as will enable them to expand their work, undertake new development, hire more men, and judiciously invest more capital."

"There are also many major industries outside of Texas which do not have important branches in the state and which could profitably establish such branches. We hope to furnish them with data that will convince them of the wisdom of coming here."

"The survey will be entirely impartial with respect to the different cities and sections of the state and will make its findings available to all. It invites the cooperation of all institutions which have been doing this sort of work on a local or regional scale; and we have already received

assurance of help from many of these.

"National and world opportunities for Texas business enterprises will be studied. We hope to increase the scope of the survey and this increase will come steadily if we receive the cooperation we have been encouraged to expect."

Mr. South is a veteran of the World War, having served with the signal corps in the Meuse-Argonne, St. Mihiel and other offensives. He is married and has two children.

FRIENDSHIP
FRIENDSHIP is one of the finest things in life. A good friend comes to us when we are in distress and unhappy, and without a good friend our life would be empty. But to make a friend we must first be a friend. A friendly, thoughtful deed is appreciated at all times. The bonds of friendship are far more comforting than coupons cut from bonds. Don't let old friends pass out of your life just because they do not live next door. Spare a few minutes now! Reach for your telephone! Extend your personality to the next block, the next town or another state without leaving your easy chair. Make your old friends a telephone visit while you are in the mood.

Drive far—drive fast —without a worry!

With Conoco Germ Processed Oil in your crankcase, you KNOW the strain won't hurt your motor!

Tests prove this new alloyed oil has 2 to 4 times greater film strength than plain mineral oils and resists heat better!

On July 4th or week-end and vacation trips, you'll want to drive far and get there in a hurry. And you don't want that nagging worry of "I wonder if this speed and heat will hurt anything in my motor."

You can't always be sure when you use plain mineral oils, for they have little film strength and oils over-refined by new cleaning processes have even less. Moreover, as motor heat goes up, these oils rapidly lose film strength.

Film strength is the load-carrying ability of an oil, the quality that keeps bearings and cylinders from wearing out. Lack of film strength results in costly damage.

You can drive without a worry when you use Conoco Germ Processed Motor Oil! It has 2 to 4 times greater film strength than any plain mineral oil. Heat does not lessen this advantage.*

Supervised road tests—over good and bad roads, at low and high speeds, in all kinds of weather—give practical proof that Germ Processed Oil pro-

CONOCO GERM PROCESSED MOTOR OIL PLAIN MINERAL OILS

***HERE'S THE PROOF**
Note that as heat increases, the plain mineral oils continue to lose film strength, but that above 225° (Minimum Summer crankcase temperature) Germ Processed oil's film strength is not affected by heat. Tests made with Timken machine.

TECTS motors better. In every test, gravimetric measurement of motor bearings showed that Germ Processed Oil prevented wear far better than plain mineral oils. Tested in a fleet of cars equipped with the new alloy-metal bearings used in many 1935 cars, a high-quality plain mineral oil permitted 45% more wear on connecting rod bearings than did Germ Processed Oil.

Conoco Germ Processed Motor Oil is the first alloyed oil—alloyed, much as metals are, by adding concentrated oily essence to highly refined oil. It is the only oil made by the Germ Process. It is the oil with the "Hidden Quirt" that stays up in your motor and never drains away!

Say "O. K.—Drain"—fill with Germ Processed Oil. Drive far—drive fast—without a worry!

Special Conference For Teachers

There will be a curriculum conference for school teachers, held on the campus of Texas Technological College, Lubbock, on June 28 and 29. This conference is designed not only to discuss and summarize the work of the past year, but is particularly designed to lay definite plans for the work of the coming school year. Several leaders in the field of curriculum construction will be present and a large number of leaders in this section of the state are expected. Opportunity will also be afforded for consultation with the State Superintendent of Public Instruction and certain members of his staff, including the Deputy Superintendent of District No. 2, Mr. G. D. Holbrook. It is hoped that a large number of Dawson county teachers will be able to attend this conference.

MISS LOIS WEBB AND JESSE BARNES MARRIED

Announcement was made Saturday evening at the home of the groom's parents in the Wells community of the marriage of Miss Lois Webb of Crane and Jesse Barnes, the ceremony having been read at Fort Stockton Wednesday of last week. The marriage is the culmination of a romance which began last year when the bride came to Wells as a member of the faculty and was not altogether unexpected by the many friends of these popular young people. Mrs. Barnes was one of the most enthusiastic workers in the school.

munity during the school term, being especially active in musical projects of the school. She is much appreciated for her many personal charms and for her efforts toward community betterment.

The groom is the son of Mr. and Mrs. A. J. Barnes of the Wells community, and is also numbered among the most popular and esteemed young men in our part of the county. He is engaged in farming with his father in their community.

The Index joins with the community in extending hearty congratulations to the happy pair, with best wishes for their continued happiness and prosperity.

FORMER H. D. AGENT MARRIES TAHOKA MAN

Of interest to many of our readers is announcement of the marriage of Miss Madeline Cox, until recently home demonstration agent of Dawson county, to Fred B. Hegi of Tahoka.

The wedding took place June 12 at the home of the bride's parents, Senator and Mrs. H. B. Cox at Goodrich, Kansas.

Mr. and Mrs. Hegi came back to Texas for a brief visit with his parents, Mr. and Mrs. John Hegi of Petersburg, and are now on a trip to resort points in New Mexico.

After July 1st they will be at home in Tahoka, where Mr. Hegi is employed at the First National Bank.

Wheat Production In County Expected To Be 100,000 Bu.

Wheat production in Dawson county is reported above the normal. The average production per acre is reported to be eight to ten bushels per acre. The grain is now turning and will be ready for harvest by the last of June or the first of July, according to farmers who have grain for the harvest.

It is estimated that the county will yield 100,000 bushels of wheat this year. Considering the fact that Dawson county is yet young in the matter of wheat production, this is considered a good yield.

Farmers over the county are coming more and more to the idea of wheat production, since this crop has proved itself here and the county has gone in strongly for dairying and winter pastures needed in the dairy field are supplied by wheat, so states leading dairy and wheat farmers of the county.

H. D. CLUB MET TUESDAY; DELEGATE NAMED

Seven members and a visitor were present Tuesday afternoon at the regular meeting of the O'Donnell Home Demonstration Club, held at the home of Mrs. Waldo McLaughlin. Roll call was answered by giving receipts for various dishes utilizing kraut, and the use of kraut in the family menu was the subject of the afternoon's program.

During the business session, Mrs. F. A. Anderson, president of the club, was elected delegate to the Short Course at A & M next month. The next meeting will be held July 9th at the home of Mrs. Anderson.

Delinquent Tax Information

On all delinquent and unpaid taxes that are paid by June 30, 1935, there will be added only 5 per cent penalty. All taxes due and delinquent for the year 1934 and former years that are not paid by June 30th will bear 6 per cent interest per annum from the date they were returned delinquent together with 8 per cent penalty amount of redemption. This is in accordance with H. B. No. 7, Acts of the 43rd Legislature. Any one who has

delinquent taxes will make a great saving if possible to pay same by June 30th, 1935.

"WATCH THE FORDS GO BY"

OVER TWO MILLION

Over two million Ford V-8 cars and trucks have been built — over a million within the last year. You see them everywhere. Owners are enthusiastic about the all-round value and economy of the car.

THE REASON

The Ford has made it possible for the average purchaser to have the kind of car that used to be beyond his reach. Fine-car performance, comfort, safety, beauty and convenience are now available to all.

FORD MOTOR COMPANY

SEE THE FORD EXHIBITION AT THE CALIFORNIA PACIFIC INTERNATIONAL EXPOSITION AT SAN DIEGO

ON TEXAS FARMS

"Cut out the old dewberry and blackberry vines now," says J. F. Rosborough, Extension horticulturist. "Leave three or four of the new canes and when they get three feet or better, top them," he says. "All this makes for increased production next year. Also, picking will be easier."

Tomatoes are suckering too much

due to recent rains, Rosborough states. The thing to do is to pinch back all except two or three suckers and when these have set a cluster of fruit pinch their tops off so all the strength of the plant will go into development of quality tomatoes. Old railroad ties for posts with two strands of wire run between two and four feet above the ground doubled the yield of berry vines owned by Manco Morrow of Marion county. The berries were trained to grow on the wires. Morrow has been able to

sell all that he grew and is increasing his patch to an acre. If the rows in her garden were laid end to end and 334 more feet were planted, Hilda Thielman, second year club member of the Lamar Girls Home Demonstration Club in Fort Bend county, would have to hoe one mile of garden. She has reported 366 feet of dewberries, 488 feet of tomatoes, 1206 feet of leafy vegetables, 2478 feet of other vegetables and 488 feet of peanuts, making a total of 4846 feet. To date she has

RELIEF CASE LOADS ARE RE-EXAMINED

Austin, June 25.—State Relief Director Adam R. Johnson early in the week told county administrators and chairmen of county relief boards that he is "greatly disturbed" by rumors from several counties to the effect that "as soon as the group which is in the county conducting a re-examination of our case load leaves, we will reopen the cases which they are closing."

Re-examination of relief cases in Texas and other states was begun about a month ago at the order of federal relief officials, and is expected to be completed in about two or three weeks. The examination was undertaken to establish the validity of cases receiving public assistance. "This is, of course, an evidence, not only of disregard for instructions from this office, but also of complete misunderstanding of the objective of this organization and wholehearted lack of cooperation with this office," Johnson said.

"The case load check which we are making is primarily for the protection of those eligible for relief in that we have a limited amount of money to distribute to the various counties in Texas, every dollar of which needs to go to the source intended. For even though we succeed

in eliminating all ineligible, on account of the material reduction in relief grants, the available budgetary allowances for those who are in actual need are extremely meager. Thus, it behooves every one of us to do our utmost to see to it that our eligible clients are not further penalized by having to share their small dinner pail with ineligible. This recheck is costing our government a great deal of money which will be absolutely wasted if you fail to do your duty in carrying out its purposes.

"Your case load, following the re-examination, will be carefully scrutinized as to re-openings and any indication that we find of a board, administrator, or anyone else, re-opening of cases legitimately closed, will be just grounds for the discontinuance of their services unless such re-openings are justified by reputable affidavits which will be forwarded to this office.

"We hope that the rumors I have come to us are unfounded; we do not want you to think you stand indicted. We simply want to impress you with our earnestness and determination to clean our records of all ineligible, and that are not going to stand for any abuse of our efforts in this respect," Johnson concluded.

DO YOU HAVE?

Extremely tired feet and leg pain and cramps in any of the toes; bunions and calluses; pain in the heels; weak and sore ankles; aching and cramping muscles under the arch;

IF SO

To set the bones and reconstruct the arch, will rid you of these ailments.

C. E. CAMERON, Manager

BANKING EVOLUTION

By R. S. HECHT

BANKING as we know it was a product of business, but more recently has developed into a profession—a semi-public profession. This change has not come suddenly but has been the result of an evolutionary process. Banking has grown and changed with the growth and change of our country.

R. S. HECHT

The banker who has survived the trials and tribulations of the past few years has proven himself a man of courage and ability, and we may expect him to meet the problems that lie before him with resolution and sound judgment. Changes of momentous importance have occurred in our economic structure and bankers have had a difficult road to travel. Some will argue that all of these changes were evolutionary and inevitable, while others look upon many of them as revolutionary and unnecessary. It is extremely difficult to trace with any degree of accuracy the real causes for many of our troubles and it is not always easy in judging these developments to distinguish properly between cause and effect.

Unfortunately it has become the fashion to blame our banking system all the troubles which the country has brought. As a consequence we hear much of needed reform of banking by law. No one will deny that certain defects have developed in our banking laws which need correction, and that certain abuses were committed which no one wishes to defend or have remain possible in the future. Never before was there a demand so determined that they are today to bring about whatever changes in our banking system are called for by the public welfare.

The best results can and will be accomplished by normal processes and gradual adjustments of our present private banking structure—suitably supervised by proper authority—rather than by the passing of still more drastic laws, offering panaceas in the form of more government-owned or government-controlled financial organizations.

The Basis of Good Laws

Lasting laws relating to any phase of human need are formed and modeled in the rough school of practical human experience and are usually the result of sound evolutionary processes rather than of sudden impulses to change fundamental principles.

If we analyze the new banking picture which has developed during the past eighteen months, we cannot help but arrive at the conclusion that evolutionary changes which have taken place in banking, and the economic life of the nation of which it is a part, have justified much of the banking legislation recently passed. As we look ahead and consider the new problems which are facing us we must inevitably come to the conclusion that some further changes in our banking laws will become necessary.

It is not enough that bankers merely acquiesce in banking imposed by law. Zeal for evolutionary banking reforms must be more aggressive than that. Banking practice itself, without compulsion of law, can and should reflect the changes and lessons of the times and difficulties through which the nation has passed and, even to a greater extent than law, render banking more truly a good public servant by voluntary self-reform. In no small measure is this accomplished by the better training of the members of the banking fraternity and by installing constantly higher ideals in those who are ultimately responsible for bank management.

As we march on into the world of tomorrow the banker has a greater opportunity for usefulness than ever before, and I hope that the service he will render to society will be so conscientious, so constructive and so satisfactory as to merit general approval and assure him his logical high place and leadership.

NATIONAL SAVINGS MARK INCREASES

NEW YORK—The annual savings compilation of the American Bankers Association for the year ending June 30, 1934, shows that for the first time since 1930 total savings in all American banks recorded an annual increase. A statement by W. Espy Albis, Deputy Manager of the association in charge of its Savings Division, in the organization's monthly magazine "Banking," says that savings deposited in banks as of June 30, 1934, gained 3.5 per cent as compared with a year earlier.

"The aggregate is an increase over last year of \$742,132,000, the first since the year which closed June 30, 1930," he says. "This is a notable achievement, for the decline since 1930 had been precipitate and all-embracing. In that year savings had reached the all-time high of \$28,478,621,000. A year ago the amount was \$21,126,534,000, a loss in three years of \$7,352,087,000. This year the figure stands at \$21,867,666,000." Depositors, too, have gained in number, going from 39,262,442 on June 30, 1933, to 39,562,174 on June 30 this year, a gain of 299,732. Four years ago there were 32,729,422 depositors, or one depositor for each 2.3 persons in the country. Now there is an account for each 2.2 persons."

Test gas systems have their advantages as self-contained protective units where outside air is inconvenient or too remote from the bank to be effective. One objection to the use of test gas in preventing hooding is the need of developing a sewer or button to discharge it. Although this necessary action seems too much to expect of the victims in a crisis where their lives are in jeopardy, the fact remains that test gas systems have defeated bank robbery. Its deterrent value is also important.

"Different styles of bandit resisting enclosures are available. The lock manufacturers also produce timelocks which can be set to open at intervals of five minutes or longer. These locks are especially adapted for attachment to small safes or chests for safeguarding surplus funds while the bank is open for business."

Stock of Central Banks Usually Privately Owned

Of all the central banks at present existing there are only four whose stock is owned by the government. The newest central bank is that of Canada, which opened its doors only a few months ago after a most exhaustive study had been made of the experience of all nations with the result that the stock of the Bank of Canada is privately owned.

In the United States—
168 Banks over 100 years old.
2,472 Banks over 50 years old.
10,391 Banks over 25 years old.

There are in the United States 168 banks that have been in continuous existence for more than one hundred years. There are 2,472 banks over fifty years old, while 64% of all the banks in this country, or 10,391, are twenty-five years old or older.

In other words, practically two-thirds of the banks in this country have come through several successive periods of depression and panic, including 1907, 1914, 1920 and 1929-33.

The Oldest Bank

The oldest bank in the country, which is in Boston, was chartered February 17, 1754.

In the 64% of banks that are twenty-five years old or older is lodged a major portion of the banking resources of the nation. In commenting recently upon the stability of a great majority of the banks in the United States, Dr. Harold Stoller, Educational Director of the American Bankers Association, said:

"The fact that we have so many banks that have been in existence a long period of years is an eloquent tribute to the genius of American managerial ability, for no other country has experienced such wild gambling eras and resultant periods of business stagnation as those through which our country has passed at frequent intervals during the past century."

Hester Grows Fine Peaches on His Farm

E. W. Hester, who lives some four miles south of town, was in town Monday with a peach which was ample proof to even the most incredulous that the Plains country can produce the finest fruit in the world.

The peach came from a six year old tree of the J. H. Hale variety, and was perfect in form and color. Weighing seven ounces, it measured exactly nine inches in diameter and slightly more than ten inches from stem to tip and back to stem.

Mr. Hester said the tree is loaded with clusters of this fruit, even though part of the crop was slightly damaged by hail several weeks ago. Thus the center branches and those on the south side of the tree, however, there is still an unusually heavy crop. He estimates that this one tree will yield about two bushels of peaches.

"Juneteenth" Quietly Celebrated Here

June 19th, Independence Day for colored citizens of our country, was quietly observed by O'Donnell's colored population. No program of any kind was held here, but we understand that several parties went to celebrations staged in neighboring towns.

At Slaton there were private parties, attended by a few from here, but the most important celebration was at Brownfield, where a barbecue and ball games were enjoyed by a large crowd.

The Terry County Herald devoted quite a bit of front page space last week to a description of the celebration. We quote one striking sentence from Editor Stricklin's comments, which seemed to us to be decidedly pointed and timely. He said: "We have always thought that the reason God gave the colored people such a big mouth was in order that they could smile and grin and just be a happy lot of children all the days of their lives."

1000 Families Are Homeless from Floods

Austin, June 25.—More than 1000 families were left homeless and approximately 5,600 relief cases will be reopened as a result of devastating floods that swept through Texas last week. Tabulation of reports from relief administrators in 51 counties showed that 6,130 additional families were in need of assistance as a result of the high water.

The survey showed 150 homes of relief clients destroyed and 753 homes damaged. Some 300 houses of non-relief clients were destroyed, and 1,500

homes damaged. Bulk of the loss appeared to be in the counties along the Colorado river; principal sufferers among the counties already reported are Travis, with 140 homeless and more than 500 homes already-ruined or damaged; Bastrop with 600 damaged homes, and a check-up was yet to come from Wharton and Matagorda counties.

In Northeast Texas, Fannin county reported 300 damaged homes; Bowie county reported 250 families temporarily homeless.

In the Hill country, Kimble county reported 30 homes destroyed, 35 damaged and 11 families homeless.

West of San Antonio, Medina county reported 25 homes destroyed, 275 damaged and 45 families homeless.

Extent of the damage in Brazoria, Matagorda, McAllen, and Cameron counties was yet to be determined. In the latter country, a project has been rushed through to permit relief workers to aid in reinforcement of weakened levees.

DR. KENNETH CAMPBELL

Miss Elsie Wolcott Wed. Of interest to friends throughout West Texas, and particularly to O'Donnell residents is announcement of the marriage of Miss Elsie Wolcott, daughter of Mrs. Ida Wolcott of Midland, and Dr. Kenneth Campbell, son of Dr. and Mrs. J. F. Campbell of this place. The wedding took place in San Antonio on June 22.

Dr. Campbell received his degree from Baylor School of Dentistry in 1926. He practiced his profession here for a short time after graduation, and went from here to Midland where he remained.

Coy Thompson Home Wednesday

We are indeed glad to report that Master Guy Thompson, who has been in West Texas hospital for more than two weeks recovering from injuries received when he fell on a knife, was brought home Wednesday night. He is still very weak and will be in bed for at least two weeks longer, but is now apparently out of danger.

Miss Mae Cox of Blackwell is the guest this week of her sister, Mrs. J. F. Campbell and Dr. Campbell.

Miss Beverly Wells attended the sunrise wedding of Misses Juanelle Wyndham and Fern Aycox of Tahoka to Messrs. Fenner Tubbs and Melton Leslie of Lubbock, the ceremony having been read in the garden at the home of Mr. and Mrs. Tom Garrard at Tahoka Saturday morning.

T. A. Carlisle of Blackwell was here over the week end on business connected with his building property.

Mrs. J. B. Miles has been informed that a niece, Miss Attye Belle McGonagill of the Edith community near Tahoka, underwent two operations at West Texas hospital on Sunday, June 16. One was for the removal of her appendix and the other an operation on a foot. She is the daughter of A. R. McGonagill.

Mrs. H. R. Womack returned Sunday from a visit with friends and relatives in Waco and other Central Texas points.

Mr. and Mrs. Hugh P. Harbert of Lubbock were here on business Tuesday.

Mrs. Billy Gibbs was in Lamesa on business Tuesday.

Miss Angeline Haidy, who has been the guest of her sister, Mrs. C. H. Cabool, for several days, has returned to her home in Borger.

Mr. and Mrs. C. H. Doak are enjoying a new car, delivered Friday. Mr. Doak says this free wheeling and no gear shifting is about right.

W. H. Ritzenhaller, former editor of the Index, but now located at Salisbury, Mo., arrived Monday for a short visit with friends. He will be accompanied home by Mrs. Ritzenhaller and their daughter, Dorothy

Ann, who have been here several days.

Dr. O. H. Shepard and B. J. are out of town this week enjoying a vacation and fishing trip.

Mr. and Mrs. Owen Davis of mado, N. M. spent the week end with relatives and friends.

B. L. Davis made a business to Lubbock Wednesday.

Mr. and Mrs. Randall Gibson the week end with relatives friends at Miles. They were accompanied on their return by Mrs. Shook and son, Buddy, who have been visiting there for the month.
