ARCHIE HANEY, DISTRIBUTOR

Larger radio ctive particles spill out over the immediate area of the explosion soon after it occurs. but others -- lighter particles -- may be wafted about by the upper breezes for hundreds of miles. Sooner or later they settle to earth. This is fall out.

ome cloud always seen after one

of these explosions.

Many people think radioactivity is something new, a product of modern life like the ern life like the Bikini bathing suit. That isn't true. Radiation experts say the whole world is radioactive, but normal amounts are not dangerous. It is only when Bikini bathing radioactivity is present in highly concentrated amounts that it becomes dangerous.

Radioactivity is sometimes highly concentrated in fall out, say the erperts. It can settle anywhere. You can't see, hear, taste, smell or feel it Yet, if you're exposed to it long enough it can be lethl.

And now Ford's new 225-h.p. engine gives you even hotter performance!

Today's biggest trend in automobiles is to the V-8 engine. That's because today's car buyer demands performance. And latest sales figures show that the Ford V-8 with its power-packin' punch is: the largest-selling eight in the world! Official figures for 1955 show that 346,373 more people bought Ford V-S's than bought the two other low-priced eights combined!

But now Ford is setting an even hotter V-8 pace by making available the biggest engine ever offered in the low-price field. It's the Thunderbird Special V-8-and you can order it now in Fairlane and Station Wagon models. This engine has a displacement of 312 cubic inches and delivers 225 horsepower. It whisks you from "whoa" to GO as you've never gone before!

And Ford gives you that wonderfully long, low look of the Thunderbird in all of its '56 models. You get new Lifeguard Design, also, to help protect you in case of accident. Test Drive this great new '56 Ford . . . today!

You get more GO for your "dough" in a
