Post office at O'Donnell, Texas, under the Act of March 3, 1879.

The lawyer's best friend is the fellow who thinks he can make out his own will.

Men put off things they ought to do; women put off things they ought to wear.

Wise-crack attributed to former Senator Jim Reed: "It's a wise stock that knows its own par."

Chicagoans: Police protecting gunmen while rival gangsters shoot two innocent bystanders.

San Francisco has the world's largest windmill, but Washington still holds the record for windbags.

Think of Solomon's plight if he had undertaken to drive with all those wives, etc., in the back seat.

Farmers are probably wondering what would have happened if Congress had failed to give them "farm relief."

"Cuba to Clear Waters of Sharks"—Hudson. But no concerted effort has been made to get rid of the land variety.

A man with short arms is grievously handicapped when trying to illustrate the length of his fish that got away.

Many think they are highly moral when they are merely refraining from forgetting his letters of recommendation got the place.

When six boys applied for the job of plumber's apprentice, the one who forgot his letters of recommendation got the place.

A generation ago the bathing girls used to dress like Mother Hubbard. Now they dress like Mother Hubbard's cupboard.

Unfortunately, those who day-dream of the great good they would do if they had a million dollars are usually about \$999,999 shy.

An Oklahoma paper declares that "any young woman of high ideals and moral turpitude can win as never before in educational history. Anyway, she can usually win a place on the front page, "with art."

RIGHTEOUSNESS AND LAW

Characteristic of Frank Putnam, who seeks the highest elective position in the state of Texas, he comes out with a series of statements which are as misleading as his candidacy is destined to prove unpopular. The photo of himself reveals written on his face the mark expected to be found on a man advocating such ideas as he advocates. He challenges the prohibition laws, root and branch, and promises to do all within his power to annul them. All of these things have long been expected of him, but when he tries to establish his ideas with "proof" from the Bible, as he does in his latest statement, one immediately gets the idea that he, not prohibitionists he so boldly derides, should be examined with a view to placing his opinions in the hospital for the feeble-minded.

Let us quote him: "The Apostle Paul in his epistle to the Galatians said, 'FOR RIGHTEOUSNESS COME BY LAW, THEN CHRIST IS DEAD IN VAIN.' Prohibition repudiates the teachings of Christ and of His great apostle."

Although we rarely step forward to give our interpretation of the Bible in controversy, we cannot let this grossly wild and unreasonable statement go unchallenged. Paul was grooving to the Texas Christian and is the only way of righteousness. The Jews had depended on the law of Moses, which had proved ineffective as a means of salvation, for no one was able to keep the law. Paul did not mean to condemn laws as a governmental institution to preserve order and the welfare of society.

THE RACE FOR GOVERNOR

The closeness of the contest for the gubernatorial nomination in Texas becomes even more close in the last two weeks of the campaign, according to Peter McGreggor, editor of the Texas Weekly, who is a keen observer in matters political. The last issue of the Texas Weekly gives some interesting figures and makes some pertinent suppositions and observations. We quote:

"With two weeks to go, the gubernatorial campaign continues to have an uncertain outlook. A contest to obtain the support of the unpledged voters is in progress and it is probable that all seven of the prin-

cipal candidates are making gains. The impression that Earle Mayfield, Mrs. Ferguson, and Tom Love are the leading candidates still prevails, but if the truth were known probably would show that this impression does not rest upon any basis of carefully collected data and is partially weighted by evidence. However, it may turn out to be the truth. Meantime, the other four principal candidates—Jim Young, Clint Small, Barry Miller, and Ross Sterling—are making gains. All of them are waging aggressive and apparently effective campaigns. There is one striking difference between the present campaign and any other that we recall. Three of them are among the very best campaigners of recent years: Jim Ferguson, Earle Mayfield and Barry Miller. Tom Love is bid- den to be a very effective one on the stump. Ross Sterling may be said to be in a class to himself, for while admittedly not a 'mob rousing' orator, he is turning out to be a very convincing speaker, appealing with especial effectiveness to the common man. While these seven may not be said to be evenly matched as campaigners, they are more nearly so than were any similar number of candidates who participated in gubernatorial campaigns in the past two or three decades. This conclusion is certainly more correct than any other factor. It gives ground for the belief that the vote is going to be badly split, and that it may be several days after election before the count to determine the result positively. If it should turn out, as it is more than likely, that three of these seven should be not more than 50,000 or 60,000 votes ahead of the candidate in seventh place, it may be several days after election before the result is known. For in that event none of the candidates would have more than 8,000 or 10,000 votes ahead of his nearest opponent, and a shift of 4,000 or 5,000 votes from one candidate to another might change the result. No prognosticator can be so accurate as to guard against a possible shift of this kind. In 1924, if only 2.6 per cent of the voters of Mrs. Ferguson had voted for Lynch Davidson instead, it would have put T. W. Davidson ahead of Lynch Davidson in the run-off and he would have been elected. And in the same election a shift of 8,100 votes would have put T. W. Davidson ahead of Lynch Davidson. The situation this year is much more uncertain than that of 1924. There were only four leading candidates then. There are seven this year and they are more evenly matched. They may finish in a bunch. It would be entirely within the known data at this time if the high candidate should receive no more than 130,000 votes and the seventh candidate no less than 70,000. This is made clear by a check on attempts, by impartial analysis, to pick out the candidate among the seven leaders who will not get 70,000 votes. In such a situation a shift of 4,000 or 5,000 votes from one candidate to his nearest opponent might change the result. And such a shift could easily occur within two weeks. Tom Ball's honest and straight-forward reply to the question of whether he ever played poker lost him more votes than that over-night in 1924. It is widely believed that a little thing like that made Jim Ferguson Governor for the first time, and thus introduced him as a permanent factor in Texas politics. A little thing in a man's favor may be quite as effective. And something of the sort may happen within two weeks. So the outlook remains uncertain."

IN CHICAGO

When the Chicago Tribune's star police reporter, Alfred (Jack) Lingle, was shot down and instantly killed by a gunman in a crowded thoroughfare recently, that newspaper was offering a reward of \$55,000 for apprehension of the slayer.

It is about nine-tenths of the press, murder was a challenge to the press, because of its warfare against gangdom. The righteous indignation felt by the Tribune and other newspapers is readily understood.

But later investigation has revealed a different situation. It has been concluded that Lingle had used his position as reporter for a reputable newspaper to cloak his participation in the spoils of gangland. Although his salary was only \$65 a week, he had made large deposits in cash regularly at a certain bank, had borrowed unusual sums from politicians and shady characters, and had indulged in extensive gambling operations connected with the underworld.

The Tribune has set forth these findings in a candid, saying editorially that the investigation "clearly indicate Lingle was killed because he was using the Tribune position to profit from his operations. Lingle now takes a different character, one in which he was unknown to the management of the Tribune when he was alive."

Chicago is a great city, with perhaps as many established people in proportion to its population as any other great city. But its criminal minority has brought an unusual degree of shame upon the whole body of its citizens. For the time being, the predominant recent element of Chicagoans it is hoped that soon some strong leader may arise who can redeem the city from the terrorism of gangdom.

A FARMER'S INVESTMENTS

Like any other business man, the farmer should conduct his operations with a view to realizing a profit from his investments, whether they be in land, implements, animals, or what not.

This is brought to mind by a recent agricultural bulletin which relates the experiences of certain southern cotton farmers, covering 1,007 tests of fertilized crops grown alongside of unfertilized.

These tests were scientifically con-

A Bumper Crop

THE O'DONNELL INDEX, O'DONNELL, TEXAS

News Sidelights

ducted and accurate records of results were kept. It was found that the application of an average of 180 pounds of Chilean nitrate per acre increased the yield of cotton to an extent that added \$23 per acre in net profits. Figuring another way, for every dollar expended for this quick-acting fertilizer an increased crop value of \$5.70 was obtained.

The same principal applies to many other phases of farm management. In the long run there is increased profit in the use of labor-saving machinery, in the raising of purebred livestock and poultry, in expenditures for the preservation of buildings and equipment; in fact, in every means whereby an expenditure can be made to yield profitable returns. Intelligently invested, "money makes money" in agriculture as well as in industry.

TO STOP WAR PROFITS

Ever since the World War the idea has been advanced that one of the most effective means of preventing war would be to make it impossible for anyone to make personal profits out of the exigencies of war.

It is notorious that in every war of the past many persons have been profiteers, earning themselves while brave soldiers and sailors served for a pittance, yielding up their lives or suffering privations and sustaining personal losses in defense of their country.

Upon the initiative of the American Legion a joint resolution has been passed by Congress and signed by the President which provides for a commission to study the problem of taking the profits out of war.

The idea is that if able-bodied citizens must suffer loss and risk their lives in the national defense, capital and industry must also be pressed into service without hope of any profit whatsoever. A man rejected for military service for physical defects could not go into a munition plant at \$15 to \$30 a day, or upon eight hours work his able-bodied brother served in trenches day and night for \$30 a month as happened in the late war.

It is to be hoped that the new commission authorized by the new act will be able to evolve a plan whereby these glaring injustices of the past may be abolished for all time.

WOMEN MORE THRIFTY

The American housewife has always been a shrewd buyer, but during the nation-wide slump in business the thrifty has become a natural habit has been practiced to an even greater extent than usual. Inasmuch as about nine-tenths of all purchases for the home are made by women, manufacturers and dealers have long sought to appeal to the housewives of the country through advertising and otherwise.

Buying habits of women have been given intensive study by home economists during the present depression, and the report of a recent survey among 3,000 home-makers showed some interesting trends. It says in part:

"There is an increasing tendency to economize through personally doing a number of tasks in the home which were formerly done by outside agencies or by servants. This has been made possible by the employment of labor-saving devices and products, which enable a woman to do most of her housework without assistance. It is also observed that a majority of the women included in the survey buy special cakes at home and bake their own cakes at home, while many other economies are effected through the more careful planning of meals so as to eliminate waste."

KNOW TEXAS

From agricultural to an urban state is the result in the past decade of population migration towards, including only incorporated towns, Stuart McGregor, statistician for the Dallas News, calculates 55 per cent of Texas population is now living in towns and cities.

Running with the best!

"Set a thief to catch a thief." So runs the old proverb which was illustrated by the invention of a hand-proof cage for bank tellers and cashiers by a prisoner serving a life sentence in the Iowa penitentiary for murder in connection with a bank robbery.

Modernism and flapperism is frowned upon by the stern Seminole Indian chieftains of the Florida Everglades. Rosalie Billie, 16-year-old Seminole maiden, was threatened with banishment for going swimming in a one-piece bathing suit.

"Bugs" Baer's comment on a rather inglorious sensational episode of the latest lobby investigation is up Salt Creek without a reserve tank. It lasted a month, which is a new endurance record for dictaphones and carbon copies.

Louis Fredrin, son of the former crown prince of Germany and grandson of the former Kaiser, has been licensed as an air pilot. He has not yet begun a regular flying career. He has a very good job in Buenos Aires.

A new slot machine installed in New York delivers photographs in eight different poses upon the dropping of a quarter.

Codling moths destroyed by stringing live electric wires through orchards which are infested with the pest.

A new device for the prevention of airplane tailspin has been tested with success in California.

Photographs recently exhibited were taken by using the eye of a glow-worm as a lens.

A method of spraying metal on wood has been devised to prevent the ravages of borers and insects.

The production of a seedless apple, without a semblance of a core, is reported from a farm near Montreal.

A Swiss inventor has constructed the world's smallest photograph, only 4 inches in diameter and 2 inches high.

DRUG SERVICE...

Drug service means more than merely having a full stock of drugs and sundries available when you need them. It is more than merely giving you what you ask for.

REAL DRUG SERVICE embodies a personal element that no other store can give. We protect you by our knowledge of your needs. We work hand in hand with your physician to be of service when you most need it—day or night, rain or shine, and holidays.

Nothing But The Best" Day Phones, 35-108 Night 163-26

From agricultural to an urban state is the result in the past decade of population migration towards, including only incorporated towns, Stuart McGregor, statistician for the Dallas News, calculates 55 per cent of Texas population is now living in towns and cities.

On the Census Bureau basis of including only those towns of 2,500 population or more, the state's urban population is estimated at 48 per cent. In 1900 it was only 17.1, in 1910 only 24.1 and in 1920 it was 32.4 per cent.

Texas stands second among the states in rock asphalt production with a total of 320,931 tons valued at \$246,000. It also produced 216,916 tons of petroleum asphalt from its oil refineries.

The largest zinc refinery in Texas is at Amarillo, located there because of the availability of abundant and cheap natural gas.

Tim—So you aren't going to marry the school teacher? Sim—No, I couldn't show up one night and she wanted me to bring a written excuse signed by my parents.

MRS J. W. CAMPBELL, Reporter

## THURSDAY MEETS WITH MRS. ROY GIBSON

Mrs. Roy Gibson was the gracious hostess to members of the Thursday Club and several guests last Thursday when she entertained with seven tables of forty-two.

Cut flowers placed at vantage points on the mantel added to the charm and the lovely living-room.

A salad course was served with sandwiches, olives, iced tea, and mints to the following: Mmes. McLaurin, Line, Singleton, Garner, Edwards, Ed Singleton, Williams, Street, Ritzen-thaler, Stark, Bradley, Wilkes, Everett, Whitsett, Hubbard, Carter, Allen, Koeninger, McGill, Shoemaker, Lee, Sorrels, and Rayburn.

## MISS HUFF ENTERTAINS THE SATURDAY NIGHT CLUB

Several members of the Saturday Night Kids Club were the recipients of the gracious hospitality of Miss Wynona Huff last Thursday afternoon at a business meeting of the club held at her home.

Plans for club dresses were discussed and decided upon, and the members ask that the residents be alarmed at the sight of so many dressed just alike.

After the discussion of other business matters, games were enjoyed by those present.

At the end of the afternoon delicious refreshments of sandwiches, olives, orange sherbet garnished with cherries and served with cookies were served to Misses Kathryn Veasey, Alice Joy Bowlin, Pauline Wheeler, Tommie Hart of Carlsbad, and the hostess.

## FIRE BOYS AND GUESTS ENJOY DELIGHTFUL OUTING

Members of the O'Donnell Volunteer Fire Department, with their families or guests spent a most enjoyable evening last Friday just north of town with a chicken fry as the diversion of the evening.

After doing away with several chickens and the gravy, pickles, hot rolls, salads, ice cream and cake which always accompany the company took part in games and stunts.

Those present were Messrs. and Mmes. Cecil Hubbard and family, Grady Gantt and family, Roy Wilkes and family, Ray Everett and family, R. C. Willis and family, and W. E. Singleton and family, C. A. Rayburn and son, J. D. Fairley and daughter, Frank Shumake and daughter, Gum Minton; Misses Aline McElroy, Jessie Middleton, Alice Bushy, and Mildred Brewer; Manual Medley, Barton Burk, and Wade Campbell.

## MRS. H. C. DAY HONORED AT CHICKEN BARBECUE

Mrs. H. C. Day was named the honoree at a chicken barbecue feast held at Guthrie Lake north of here Friday evening by a number of her friends.

About 6:30 cars began arriving at the home of Mr. and Mrs. Ben Coin, and soon the merry party was on its way to the selected spot on the shore of the beautiful lake, where Mr. and Mrs. Guy Bradley and Mr. and Mrs. W. S. Cadley had been for some time barbecuing the twenty-three fryers. With this ample supply of chickens, supplemented by pickles, olives, salads, lemonade, ice cream, and cake, nothing was lacking to make the outing an enjoyable one for the following:

Messrs. and Mmes. Burley Brewer, Marshall Whitsett, J. P. Bowlin and Alice Joy and Sonny Boy, W. S. Cadley and two sons, W. J. Shook, Mary V. Hope, and Jimmy Lee, J. F. Campbell, O. D. Carter, Guy Bradley and son, Dick C. Ben Coin and daughter, Shirley Mae, Mrs. L. E. Robinson, and L. E. Jr., and little Miss Doris Jo Thomas.

## SYLVA CORNETT HAS PARTY ON FIFTH BIRTHDAY

Little Miss Sylva Cornett celebrated her fifth birthday last Saturday with a party for several of her intimate friends.

As the little guests entered they placed their gifts in a large bowl on the table. Various group games were played on the lawn before the children were asked to come into the diningroom. A large cake was crowned with five dainty pink candles made an attractive sight for the youngsters, and was served with punch.

After the refreshment hour, the guests adjourned into the livingroom where the gifts were unwrapped and admired.

Those present were Modene and Waldo McLaurin Jr., Ouida Howard, Hope and Jimmie Lee Shook, Shirley May Coin, Aya, Ardith, Allen, Paul, and Jack Cornett.

## MISS TOMLINSON ENTERTAINS WITH FORTY-TWO FRIDAY

Miss Faye Tomlinson entertained a number of friends with a forty-two party at the home of her parents last Friday evening. Card games and tricks were also in vogue during the evening.

Tuna fish sandwiches and punch were served to Misses Esta Pemberton, Waldine Kirkland, Edwyna Vermillion, Evelyn Lawler, Frances Scott, Margaret Miller, Jewel Bean, Veda Shumake, Messrs. Wallace Ross, Vernon Kirkland, Edward Clayton, Hubert, Frank Shumake, Elmo and Jake Burkett, Delton Pemberton, Jordan Goddard, Benton Payne, Messrs. and Mmes. George Shumake and M. R. Pemberton.

## MRS. HUBBARD ENTERTAINS TUESDAY AFTERNOON

Mrs. Cecil Hubbard was hostess to a number of friends Tuesday afternoon during a pleasant social hour. Dainty refreshments of cake and ice cream were served to Mmes. Gantt, George Shumake, B. M. Haynes, Lambert, Frank Shumake, Heibson, Kay, Wilkes, Rayburn, Gibson, Carroll, Fairley, Singleton, Charlie Minton, and Gum Minton.

## Y. W. A. MEETS WITH MRS. ST. CLAIR THURSDAY AFTERNOON

The Y. W. A. of the Baptist church met last Thursday afternoon at the home of Mrs. Homer St. Clair.

A box of cookies was packed for Buckner's Home before the industrial phase of the program was begun. The work of the afternoon was the making of vases. Mrs. St. Clair then taught illustrated stories to the girls, using ribbons as illustrated material. These stories are to be told to children by members who learn them.

After the stories, the hostess served delicious apricot ice with cookies, using sweet peas as plate flavors, to the following members: Misses Roxie Hancock, Claire Ruth Nichols, Maurine Huff, Jessie Middleton, Opal Jenkins, and Gwendolyn Lawler.

Kiddo—Do you believe there is a devil?  
Ditto—Ah, it's just like Santa Claus, it's your dad.  
Burglar—I don't want your life, only your money.  
Old Maid—Get out, you are just like the rest of the men.

Dr. R. A. Houkins of Glenwood Springs, Colo., removed his own tonsils, using a local anaesthetic, regulation instruments and a hand mirror, assisted by a nurse.

Man is believed to have engaged in farming to some extent for about 12,000 years.

## WITH THE CHURCH ORGANIZATIONS

### Methodist

The Missionary Society met at the church Monday afternoon with Mrs. M. B. Hood in charge of the mission lesson. This was the first lesson on the book, "What Next In Home Missions?" A number of ladies thoroughly enjoyed the interesting lesson. The meeting next Monday will be a social and Voice program at the home of Mrs. B. M. Haynes, with Mrs. Pearce assisting her in entertaining.

Sunday school attendance, 143.

### Baptist

Rev. L. S. Jenkins taught an interesting Bible lesson to a large number of members. The lesson next Monday will be the mission program in "Royal Service." All members are urged to be present.

Sunday school attendance, 175.

### Cumberland Presbyterian

The C. P. Missionary Society has not let the hot weather interfere with the work of the organization. Each member seems determined to make a banner society. The meeting Monday was for a review of "Jerusalem to Jerusalem."

The Children's Band is doing fine. It was organized a month ago with nine members and now has eighteen. Sunday school attendance is usually good considering the time of year. With a total enrollment of sixty, fifty were present last Sunday.

The church regrets the departure last Sunday of Rev. and Mrs. Laine. They have meant much to the newly-organized church.

## JOE BAILEY JOTTINGS

We are sorry to report that T. J. Lee, son of Mr. and Mrs. J. M. Lee, has typhoid.

Mr. and Mrs. George Warren spent Saturday night with his brother, John Warren and family of O'Donnell.

Mrs. Hero Mitchell spent Sunday night with her parents Mr. and Mrs. Holt of Pridge.

Mrs. Joe Cunningham and little daughter, Mary Louise, spent Monday afternoon with Mrs. Kyle.

Hero Mitchell and family, Mrs. T. A. Harris and children, T. A. and Velma; attended the birthday dinner at M. Mitchell's parents, at Pridge Sunday.

Troy and Jewel Warren of O'Donnell spent Sunday with their uncle, George Warren and family.

Little Troy Kyle was taken to the Lubbock Sanitarium Saturday.

## MIDWAY NOTES

Crops are looking good over this way. Most farmers are up with their work but would like to see a good rain, although crops are not suffering.

There was a musical at Mrs. Eastman's Saturday night. Don't know just how many were present.

The writer and family and Opal Ray attended a birthday dinner and party at the home of Fred Williams near Ropes July 12, in honor of his son's eighteenth birthday. There thirty-six present for dinner and about seventy-five guests came during the afternoon for the party. All had an enjoyable time.

The Midway ball team has been busy playing this past week. Played Pumpkin Center Wednesday evening, 15 to 19 in favor of Midway, then Saturday evening they again beat the same team 13 to 6. Those boys are hard to beat.

Rufus Coor, wife and M. C. Swett were in Lubbock Thursday, where Mrs. Coor went for treatment. They reported good crops in that part of the country.

Mrs. Frank Boss, who was taken to a Lamesa Sanitarium Thursday, is doing nicely. She came home Tuesday.

Opal Coor has been hopping around with a very sore foot this past week, but is able to visit her uncle, Lee Stafford, and family of Brownfield. W. M. Coor and family, Claude Hill and family, Robert Harred and family, George Boyer and wife, Estela Saunders and daughter and Yvonne Ray, Jim Houston, and Irv Coor all attended the ball game at Pumpkin Center Sunday evening, Pumpkin Center beating Sparenburg.

Mr. and Mrs. Gaines and daughter were seen in our community Sunday evening.

Mmes. H. C. Day and J. F. Campbell were in our community Tuesday looking after Mrs. Day's property.

Inez Saunders and Johnnie Martin attended a party at New Moore Saturday night.

fields spent the week-end with his folks.

Mr. and Mrs. Davis of Vernon have been visiting their daughter and family, Mr. and Mrs. A. E. Leverett the past week.

Mr. and Mrs. J. L. Cunningham were Lubbock visitors last Tuesday. Mr. and Mrs. Charley Donellson are away on a fishing trip.

Mr. and Mrs. Earl Billings of Lamesa spent Sunday with relatives in this community.

Miss Cecil Dorman, who has been staying with her brother and family returned to her home at Dicks last week.

Mr. and Mrs. Less Crews went to Wells Saturday to spend the night with her brother and sister, Mr. and Mrs. Robert Cook.

More than 531 million tons of United States every year, from the Mississippi Valley.

## The Rain Was Fine!

It came just at the right time. We should be thankful.

# New-Found Hours--- Where Did They Originate?

Where does the modern woman of today get the time that she spends with her family, her friends or in cultivating the finer side of life? Her mother, tied down by household duties, never had even a small part of the freedom that her modern daughter enjoys every day throughout the year.

Of the many things that have contributed to this modern freedom from household duties, the greatest is electric service. At every turn in the modern home are electric appliances which save time — precious minutes, which, rolled together make hours saved from drudgery to be used for the more pleasant things of life.

From the living room to the kitchen, electricity has changed arduous tasks to simple duties. It has eliminated most of the muscular effort from cleaning and has simplified many other household tasks. Above all, the electric range has given the modern woman many new hours of freedom from work in the kitchen.

The very simplicity of the electric range, the uniform results which are possible when cooking by electricity and the small amount of attention necessary to prepare foods electrically are a few reasons why the electric range is considered the most valuable time saver in the home.

Tune in on the Texas Electric Service Company Radio Hour each Tuesday evening at 8 o'clock over WBAP, Fort Worth

# About O'Donnell People :

Mrs. H. C. Day left Friday evening for Paris, and from there continuing on to San Antonio.

Miss Hazel Burk is spending the week-end with Miss Maggie Wilson at Big Spring.

Miss Louise Anderson who has been in school at Tech for the past six weeks is at home for the summer.

Born to Mr. and Mrs. V. F. McCarty of the T-Bar community on July 4, a fine girl.

Mr. and Mrs. Willie King, who lives west of town, are the proud parents of a new daughter, born July 7.

Born to Mr. and Mrs. W. R. Kropp of the 849 Ranch, on July 14, a daughter.

Jack Veazey spent the week-end at home. He was accompanied on his return to Lovington by W. R. Campbell who has been recuperating from a severely strained ankle.

Mrs. T. A. McRoy left Monday for an extended visit with her daughter, Mrs. Wm. Dominguez, at San Antonio.

Mrs. M. B. Hood spent the week-end with her mother, Mrs. N. H. Graham, at Plainview.

Mrs. Bell Knight returned Saturday from a week's visit with relatives at Robert Lee, San Antonio and Miles.

Misses Jeanette Thomas and Alma Hyde were Tahoka visitors Sunday.

Mr. and Mrs. Bill Jones are visiting friends and relatives at Florence, San Antonio, Houston, Corpus Christi, and other southern points.

Ol Harris made a business trip to Lovington Monday.

Bill Phillips who has been located at Lovington for the past few weeks, spent the week-end with his family.

Mr. and Mrs. F. E. Clark and little daughter of Abilene were week-end guests of Mr. and Mrs. C. H. Masani. Mr. Clark is the "West Texas Plow Boy" who broadcasts from Abilene, and has a number of fans here.

Friends here of Mr. and Mrs. Gordon King of Lubbock, former teachers in the school here, will be much interested in the arrival of their eight and one-half pound son on July 8.

Mr. and Mrs. Jimmie Eason of Big Spring are visiting in the home of Mrs. Eason's parents, Mr. and Mrs. T. A. Wimberly, this week.

Mrs. S. A. Shepperd of Roswell, N. M. is visiting in the home of her daughter, Mrs. T. A. Wimberly. She was met near Tatum, N. M. Sunday by Mrs. Wimberly and Mr. and Mrs. Jimmie Eason of Big Spring.

Miss Florence Henderson of Big Spring is spending a few days with her sister, Mrs. Hal Singleton.

J. Y. Everett returned from Lovington Monday.

Mrs. W. M. Patton of Colorado City is spending the week with her father, J. W. Chandler.

Mrs. W. S. Cathey and sons left Saturday for an extended visit with relatives in Dora, N. M.

Glenn Everett of Big Spring is visiting relatives and friends here this week.

Mrs. J. D. Crawford and son, Jimmy, of Southland, spent Wednesday with friends here.

News received here Wednesday from Mr. and Mrs. W. E. Guey that they aren't even thinking about coming home yet.

Miss Roxie Hancock spent Wednesday of last week with Mrs. John Campbell at Wells.

Friends of Mr. and Mrs. Boyd Fortner of Los Angeles will be interested in the news that they are the parents of another fine girl born July 5. Mr. and Mrs. Fortner are former residents of O'Donnell.

Charlie Cabool attended the dinner and reception for Emil Adil Arland at the Hotel Hilton in Lubbock Tuesday. The prince, who traces his lineage to before the time of Christ, is on a tour through the United States for the purpose of acquainting his countrymen with the conditions of their native land, Assyria.

Travis Everett of Lubbock spent Sunday here with friends and relatives.

Mrs. Geoffrey Holman of Lovington, N. M. is visiting relatives here.

Naymon Everett and C. A. Rayburn made a business trip to Carlsbad Tuesday and Wednesday.

Mr. A. B. Carpenter and little son of El Paso were guests Thursday of Mrs. George Shanake. Mr. Carpenter was the manager of the theatre several years ago, and they were one of the most popular young couples here at that time.

Mrs. Jeff Musick made a trip to Lubbock Monday.

Mr. Alvin Howard of Morgan's Mill is the guest this week of his brother, Will Howard.

Mr. and Mrs. David Chandler spent Sunday here with J. W. Chandler. Miss Nell accompanied them back to Lubbock for a week's visit.

Mr. and Mrs. Harry Stacy and Charlie Cabool returned from a trip to various resort points in Texas and New Mexico.

Miss Mary Dean Preston returned Saturday from Lubbock where she had spent the week with relatives. She was accompanied on her return by her brother, Raymond, who spent the week-end here.

Mr. and Mrs. J. A. Cornett and family were Hobbs visitors Tuesday.

Mrs. Walter O. Parr and children returned Sunday. They were accompanied by Rev. Parr's brother and family, who will visit here.

Mrs. B. L. Cohen and daughters visited Mrs. W. H. Thornhill Monday.

Born to Mr. and Mrs. Jim Brinson, on July 16, a seven and one-half pound daughter who his fair to be as attractive as her mother. Both are doing well.

Mr. and Mrs. Charlie Minton had as their guests Sunday Mr. and Mrs. Tom Franks of Hilton.

Marion Edwards of Arlington arrived Sunday for a short visit with his parents, Mr. and Mrs. Don Edwards.

S. E. Clark, known as the West Texas Plowboy of KFYO radio station, Abilene, gave an interesting program before a large crowd at the Baptist Church last night.

The Baptist revival will begin Sunday, August 3, with Rev. McKinley Norman, pastor of the First Baptist Church of Quanah, doing the preaching.

The Post Baptist Encampment will begin July 28 at Two-Draw Lake near that city. More will appear about this encampment in the Index next week.

The District Quarterly Conference of the Methodist Church is in session in O'Donnell today.

The Presbyterian-Methodist union revival will begin Sunday, August 10. Services will be held in a newly erected arbor just west of the Methodist church. Rev. W. O. Parr will bring the evangelistic message.

The Methodist Ladies Missionary Society will serve lunch on election day at the Warren building, across from the bank.

More than 18 billion postage stamps are used yearly in the United States. If placed end to end they would circle the earth 11 times.

In Australia about 11,000 camels are still employed for transportation purposes.

Though R. E. Coleman, ejected penniless from his wife's home in Edinham, Eng., was offered \$20 a week by Mrs. Coleman to leave the country, he refused to accept.

## 200 FARM WORKERS EXPECTED AT LUNCHEON

Members of the Lamesa Lunch-club and the Lamesa Lions club will be guests Friday at noon during a dinner prepared by Dawson County home demonstration clubwomen here at the annual agricultural club convention in Lamesa. All arrangements have been made for the convention, according to W. W. Evans, county agricultural agent, who is anticipating an attendance of over 200 farm workers. The program is to include judging of livestock raised by 4-H club members and home work of home demonstration clubwomen.

## MASONIC EXAMINATIONS TO BE GIVEN HERE IN AUGUST BY W. S. TATE

W. S. Tate, member of the state committee on work of the Grand Lodge of Texas, A. F. & A. M., will be in O'Donnell for the purpose of giving examinations to those who desire certificates, according to D. M. Estes.

Mr. Estes is now personally lecturing several here who are preparing to take the examinations in both the Blue Lodge and Chapter work.

Articles left on trains entering Chicago in a single month included a crutch, billiard balls, shoes, umbrellas, lingerie and false teeth.

## INTERESTING NOTES

Eric Johnson and Florence Smith made the voyage from Bermuda to New York in a 15-foot sailboat, taking turns at steering their tiny craft.

Jimmy Zinn, pitcher for the San Francisco team of the Pacific Coast League, won the first reported no-hit game of the present baseball season.

The 1930 class of Harvard University numbered 1,965, the largest class to be graduated during the 294 years of the university's existence.

Mrs. Mary Nelson, 66 years old and a great-grandmother of Atlantic, Ia., was awarded \$500 in a breach of promise suit against Alexander Roe, 56.

Rose, a 21-year-old cow owned by Mrs. Emma Meads of Raceland, Ky., has given birth to her 22nd calf. Recently she drank at a moonshine still and went on a spree.

A burglar in Detroit held off pursuers with a "revolver" and escaped. His weapon, found where he had thrown it away, proved to be a toy pistol.

Mort Evans, 280-pound Indiana salesman, was traveling in a light car with his baggage. When he sneezed violently the car broke in two.

Lawrence Potoczynski asked for a handout at the back door of a Detroit home. The lady of the house recognized him as her divorced husband who failed to make alimony payments, and had him arrested.

Jack Lambert, a Scotch plumber and amateur actor, while laying drain pipes in a ditch received a telegram offering him a leading part in a comedy to be produced in London.

More than 1,000 bachelors in West End apartments in London have been ordered by landlords to marry or surrender their apartments to men with families.

# For Speed, Smoothness and Economy

## IT'S WISE TO CHOOSE A SIX

Get out on the straightaway—step on the gas—then you'll know why owners are so enthusiastic about the Chevrolet Six. For here is an entirely new kind of performance for a low-priced car—performance possible only because of its six-cylinder design.

The 50-horsepower six-cylinder engine—with its great reserve strength for every occasion—is always "taking it easy." At every point on the speedometer you travel smoothly, quietly, safely. You can drive from daybreak to dusk—as fast as you please—and never grow weary of the journey.

This type of performance is not only more comfortable—it's more economical! For six-cylinder smoothness saves the whole car from

The Coupe \$165

the strain and wear of vibration—resulting in fewer adjustments and longer life.

Come in today. Learn what it means to drive a car for the sheer thrill of driving!

### Some Distinguishing Features

50-horsepower six-cylinder motor . . . 48-pound crankshaft . . . full-length frame . . . four semi-elliptic springs . . . fully-enclosed four-wheel brakes . . . four Lovejoy hydraulic shock absorbers . . . dash gasoline gauge . . . Fisher hardwood-and-steel body . . . adjustable driver's seat . . . safety gasoline tank in the rear . . . non-glare VV windshield . . . and, for your protection, a new and liberal service policy.

### How to Raise Poultry

By Dr. L. D. LeGear, V. S., St. Louis, Mo.

Dr. LeGear is a graduate of the Ontario Veterinary College, 1892. Thirty-six years of veterinary practice on diseases of live stock and poultry. Eminent authority on poultry and stock raising. National live poultry breeder, and lecturer.

### SAVE THE SOREHEADS

Simple Measures Applied Early May Ward Off Disaster From Chicken Pox, Says Dr. L. D. LeGear, V. S., of St. Louis, Mo.

Editor's Note—This is another of a series of 32 stories on poultry raising written by the well known national poultry authority, Dr. L. D. LeGear, V. S., of St. Louis, Mo. This series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

"Go to bed with the chickens! Most certainly not!" exclaimed a well known radio entertainer in mock indignation. "No, indeed, I'd never be able to sleep, for those sickens the way they do." For more reasons than one, I am inclined to sympathize with this gentleman's point of view. As this disease, I firmly believe that, short of literally going to bed with them, the man who comes nearest to living with his chickens is going to get the greatest profits out of them. He will do so because he knows his flock both individually and collectively. The slightest change in their habits or appearance will immediately attract his attention and if disease threatens he is able to stop it in the bud long before it reaches the danger point.

Of course, not every one can give full time to the care of his fowls, nor is it altogether necessary. There are certain times every day when they must receive attention for feeding and the like. Then, scan over them as closely as possible and single out for closer examination any that show the slightest signs of possible disease. One particularly malignant disease which may crop up at any time, more especially in the fall of the year, is the chicken pox or the sorehead. As this disease may be carried by mosquitos, your flock may become infected no matter how carefully you have been to keep your houses, yards and runs in a sanitary healthful condition.

A number of eruptions or nodules, varying from the size of a pinhead to that of a pea or hazelnut, appear on the comb, wattles, eyelids, ear lobes, beak and nostrils and sometimes on other parts of the body, such as the neck, legs, under the wings, on the rump and about the vent. On the body the nodules may become larger than on the head. The nodules begin as small, red or reddish gray deposits with a shiny surface. They gradually enlarge, becoming dry shriveled, uneven and wart-like in appearance, while the color changes to yellow, brown or dark brown. As these nodules increase in number and the inflammation extends, large areas of the skin will become thickened and covered with hard, dry crusts, closing the nasal openings and eyelids, often making it difficult to open the beak.

If the attack is mild the eruptions are limited to the head, the nodules are distinct and small and the general health is not affected. The nodules seem dry, heal and shrink, the crusts become loose and recovery is rapid. But in malignant cases the eruption more generally the nodules are large and there is considerable inflammation and thickening of large areas of skin. When the crusts are rubbed off there will be a watery discharge from the ulcerated surfaces, which will later thicken, become thick and yellow and will give off a disagreeable odor. In this type of the disease there is fever, rapid loss of flesh, prostration and death.

At the very first sign of this disease give the whole flock large doses of epsom salts, once each week for three or more weeks at least. Mix a pound of epsom salts in a small amount of water and give each bird one-half to one whole pound for each 75 of the heavier breeds. For half-grown stock give one-half the amount. Put the mash out in long troughs so they can all get to it and eat it up in a few minutes. If wet mash feed is not being given, the epsom salts can be put in the drinking water, but in a wet mash it is much more effective. Remove all affected fowls to a separate location well removed from the poultry flock. Then make a thorough clean up of all houses, coops and feeding equipment.

Clean and disinfect all hoppers, troughs and drinking fountains, roosts, dropping boards and other removable equipment. Remember and burn all litter and droppings. Finally, making a strong solution of some good coal tar disinfectant and spray it into every nook and cranny where mosquitos, parasites or disease germs might find a hiding place. If possible, always change clothing and shoes before going from infected fowls to healthy ones.

Give each of the affected fowls from one-half to one teaspoonful of epsom salts and repeat the dose two or three days later if there is no improvement. A local application is also very healthful with a small swab or feather, apply a good dip to each of the sore crusts and disinfect or tincture of iodine nodules after removing the scales. The disinfectant should be used full strength, so be careful not to let it get in the eyes. Also apply once each day or two some reliable sore-head remedy. A good poultry prescription tonic in large doses will be found very beneficial at this time. Careful following out of this treatment should give highly gratifying results if started soon enough. In the fall about the time chicken

pox usually appears in your locality, advise giving all young fowls and in many cases older ones too, large doses of epsom salts once a week for three or four weeks. Give same amount of epsom salts and in the same way as recommended above. I also advise extra precaution in cleaning and disinfecting at this time. All houses and sleeping quarters should be thoroughly cleaned and disinfected every week or ten days for some time. The disinfectant should be forced into all hiding places of mosquitos and other insects with a good force pump. I have been using this treatment for preventing chicken pox for several years with excellent results. If my chickens do take the disease at all, it is usually in a very mild form.

Vaccination with a specially prepared vaccine is being used with varying results in some localities. The question is whether the disease is serious enough to justify the trouble and expense even if it was effective.

(Copyright, 1929, by Dr. L. D. LeGear, V. S.)

### KONJOLA PUT KANSAS MAN BACK TO WORK

"Proved To Be A Wonderful Medicine In My Case," says Former Sufferer.

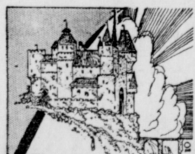

MR. H. C. SHERMAN

Any medicine that can win more than a million friends in seven years must have merit, and that is exactly what Konjola has done. You wonder why Konjola has become a household word? Well, read what Mr. H. C. Sherman, painting contractor, of Goldard, Kansas, says: "Konjola proved to be a wonderful medicine in my case. Last July I was hurt in an automobile accident. I was in the hospital many weeks. When I got out, I was in a badly run down condition; had rheumatism in the shoulder, arm and hand, and my stomach was out of order. I suffered terrible pains, and medicines did me no good. The many endorsements of Konjola led me to try it, and six bottles of this wonderful medicine made me able to resume my work. I am feeling better in every way than for a long time." Konjola's 32 ingredients work together, battling at their very source, the cause of stomach, liver, kidney and bowel troubles, and a rheumatism, neuritis and nervousness. Konjola is sold in O'Donnell, Texas at the Whitsett Drug Co., and in all the best druggists in all towns throughout this entire section.

#### HE KNEW

Father—Why were you kept in after school?

### GAS USED TO BLOW WHISTLE, RIPEN FRUIT, MAKING ICE

A writer in a scientific magazine gives some of the queer uses to which natural gas, more being put, ranging all the way from blowing a whistle where steam is not available down to the making of dry ice. Gas is being used to pump water from deep wells.

Gas is being used to ripen bananas. A gas product is used in sweating oranges and lemons. Gas furnishes carbon black, used in automobile tires and printer's ink and dozens of other things. Natural gas is used to make acetylene gas.

Dry ice is being manufactured as a by-product of natural gas. Natural gas, highly explosive, is the source of helium gas, a non-explosive.

Gas by-products are used to prevent damage to rubber when passing through calendaring rolls.

Gas by-products are used to prevent explosions in certain processes of sugar refining. Since gas was abandoned as a fuel, more than 20,000 useful purposes to which it may be put have been developed by chemists, laboratories and experimentation.

#### SHE FELT HURT

"Ah, Belinda, I wonder if my husband will love me when my hair is gray."  
"Why not? He's loved you through three shades already."

#### JUST A DUTY

"I hope you will dance with me tonight, Mr. Jones."  
"Of course, I hope you don't think that I came here merely for pleasure."

And the most popular speaker of the evening concluding with this remark: "When I came to this country I could not speak a word of English."

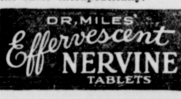

"Why, isn't that wonderful," exclaimed a lady seated near him, "but may I ask where you came from?"  
"I was born here," said the speaker, smiling.

### OVER WORKED NERVES

UP TO your ears in work—every nerve at high tension. No wonder you snap at the wife and bark at the children. Watch out! Overworked nerves may lead to Sleeplessness, Nervous Headache, Nervous Indigestion and a host of other unpleasant disturbances. Why don't you try Dr. Miles' Effervescent Nerve Tablets? Just one in a half glass of water makes a pleasant, sparkling drink delightfully soothing to over-taxed nerves. Dr. Miles' Nerve is now made in two forms—Liquid and Effervescent Tablet. Both are the same therapeutically.

Touzalin—Has your wife accomplished anything with the electric reducing machine you gave her for her birthday?

Fozzello—Well, she has burned out two bearings and the motor, and gained six pounds.

Mistress—I'm glad to hear you will be staying on with me after you're married. Do I know the lucky man?

Maid—Oh, yes, ma'am. It's your son!

Betty—Herbert declares he'll go crazy if I don't marry him.  
Hetty—Poor boy! Then there's no hope for him either way.

Judge—Guilty or not guilty?  
[Clerk reads] I'm not here to do your work.

## The INDEX Beginning Next Week

### EAST SIDE NEWS

Crops are holding up very well but are needing rain.

H. W. Waldrup and family were called to Seagraves Sunday to attend the funeral of his grandfather, C. Dolloff. Grandpa Dolloff as everyone called him used to live in the Joe Bailey community. The bereaved ones have our greatest sympathy.

Doc Beach and family, S. H. Woods and family spent the day Sunday at L. L. Rains' home.

A. L. Everette and family spent Sunday afternoon at Grandd Spontown's.

Homer Durham burned quite a bit of gasoline in our community Sunday trying to locate the whereabouts of Miss Deicie Authur.

There was quite a crowd gathered at the Wallace Rains' home Saturday night and made ice cream.

H. L. Brewer is spending the week with his hoe in the weed patches.

Joe Brooks is driving a new Chevrolet around in our community trying to locate a stray mule.

One of Mr. Marion Lee's boys has typhoid fever.

The writer of the East Side News column was ill last week, and for that reason no report came from that community.

Look for specials in this issue.

### MESQUITE AND TREDWAY NEWS

These are two very lively places. A large crowd attended Sunday school Sunday.

Mr. C. A. Bearden and family took dinner with Geo. L. Stephens and family Sunday.

Billie Banks left for Dallas Saturday where he will attend S. M. U.

Ruby McCraw of Lubbock spent the week-end at home. She is attending Tech.

O. Harris of O'Donnell spent the week-end with Lefty Stephens.

Poster Barrett, Nannie Cunningham and Yoys Bearden spent Sunday afternoon at J. B. Barrett's.

Mamie Bearden spent Sunday with Aline Nunnally.

Dee and Stelvin Burris spent Sunday with the Lamb brothers.

There is singing at the school house every Sunday night. Everyone come and help us sing.

**HELP! POLICE**

A pale, proud girl turned to the big, heavy-browed man who was looking at her intently. He held a glittering knife in his hand. "Have you no heart?" she asked in low tones.

"No," he growled.

"Then, give me ten cents worth of liver."

### DADDY'S EVENING FAIRY TALE

By Mary Graham Bonner

#### THE TOADSTOOLS

The afternoon before it had rained. And the fairies were having ice cream and cakes of all kinds and sizes and shapes.

Usually the fairies don't mind the raindrops coming down for a scamper and a patter on the earth, but the reason they weren't so glad yesterday was because it was the Fairy Ybab's birthday and they were all giving her a party.

That was why they had ice cream and cakes of all sizes and kinds—and one more thing—they had a huge birthday cake in her honor.

You see the Fairy Ybab leads the fairies' orchestra and she loves music above all things.

Her hair is very long and soft and black and on her head she wears a silver crown.

Her wand is of silver with silver stars and she waves it about when she keeps time for the fairies who are playing in her orchestra.

As she gives the music to Fairyland the fairies wanted to give her an especially fine birthday party.

They were all there, dressed in their best, and when the raindrops came

The Little Raindrops Beat Time.

down the fairies all began to feel very sad.

"But we had to come," said the raindrops.

"Why?" asked the little fairies.

Ybab was the only fairy who seemed to understand until the raindrops said:

"Why, don't you know that long ago we were told to beat the drums for Ybab's music?"

"That's why we've come to her party. We beat time very gently when we want to, and very evenly."

"Do stay then, for you'll be here in time for the great final chorus we're to have after the birthday cake."

And then a beautiful pink and white birthday cake was brought forth on a pink and white tray, carried by twelve fairies all dressed in pink and white.

Their crowns were of pink with white candles which flickered as they danced around.

The cake, of course, was covered with candles which were all burning brightly.

Now the Toadstools had been sitting there in the woods for a long time, and suddenly they thought of an excellent plan.

"Come and sit under our umbrellas," they shouted, for, as you know, the Toadstools never mind the rain at all.

"Then you can hear the raindrops but will not have your pretty frocks dampened by them."

"And the cake with the candles can be put under the great pink Toadstool right over yonder."

So the twelve fairies who were dancing around the cake with the lighted candles put it under the big pink Toadstool.

But six candles had been put out by the little raindrops and the Fairy Queen had to wave her wand to have them lighted again.

Soon it was time for the chorus. All of the little fairies sitting under the Toadstools heard the chorus of voices from the trees and the brooks nearby and from behind the all ferns.

The fairies in the chorus had been hiding until it was time to give the Fairy Ybab a wonderful song they had made up themselves to sing for her.

And the little raindrops beat time.

But oh, how the Toadstools were appreciated.

**Curious Buildings**

Every land possesses different ideas in the construction of a church. In one land you will find the majority of churches with round towers, another country boasts of its fine spires. In some far-flung parts of the world, the church is represented by nothing more than a small wooden hut. Another church, recently built, represents the pipes of an organ.

But surely the most curious church in existence is that of a place of worship in Dieppe, France. This church is simply a hollow oak tree.

The great old oak has had wooden steps built around it, and inside is the church. Its tall branches soaring up to the sky represent a wonderful natural spire.

**Just the Place**

"You must bring your train into the kitchen, Master Lennie; I'm busy making pies."

"O, but this is where we stop five minutes for refreshments,"—Stray Stories.

### PLAINVIEW NEWS

Mrs. Cleave Aten's father and mother and her daughter of Austin visited in the Aten home last week.

Mr. and Mrs. Ernest Gleghorn entertained the young folks with a party Wednesday night.

Buck Stoking left last Monday for Pampa to work.

T. H. Boyd spent the week-end in Lamesa.

Oat Harris of O'Donnell and T. and Jack Brewer of the Joe Bailey community attended the party Mr. and Mrs. Herd gave Saturday night.

Miss Edith and Bessie Herd entertained the young people with a party in the home of their parents, Mr. and Mrs. George Herd, Saturday night. There was a large crowd present and all had a delightful time.

Homer Durham and mother and Morris Durham and children of O. K. were in Plainview community Sunday.

Bud and Floy Cox came in from Portales, N. M. Saturday.

Miss Nettie Gray and brother of Mesquite were visiting in Plainview community Wednesday.

Mr. and Mrs. John Brewer of Plainview visited Mr. Brewer's parents of Joe Bailey Sunday.

Jim Vanez came in from Hobbs, N. M. last week.

Miss Jessie Fuller of the Lubbock Tech was visiting her partner, Mr.

and Mrs. Fuller of Berry Flat community the past week-end.

Mr. and Mrs. Charley Hill spent Sunday evening with his mother, Mrs. J. R. Butler near Tahoka. He reports that his mother and brother have small pox.

Aquilla Stoking had the misfortune of getting his lip split and two teeth knocked out by a horse Saturday morning.

Jim Willborn was over in Randall community Sunday visiting.

## RELIABILITY ECONOMY GOOD PERFORMANCE

THE NEW FORD TUDOR SEDAN

**YOU** are buying proved performance when you buy a Ford. You know it has been built for many thousands of miles of satisfactory, economical service.

Letters from users in every part of the world show the value of the sound design of the car, good materials and accuracy in manufacturing. You sense a feeling of sincere pride in the oft-repeated phrase—"Let me tell you what my new Ford did."

Further tribute to the sturdiness, reliability and general all-round performance of the new Ford is shown in the repeated and growing purchases by government bureaus, by police departments, and by large industrial companies which keep careful day-by-day cost records. In most cases, the new Ford has been chosen only after exhaustive tests covering speed and power, safety, comfort, ease of control, oil and gas

consumption, low yearly depreciation, and low cost of up-keep.

They have found, as you will find, that the Ford embodies every feature you want or need in a motor car at an unusually low price.

### How to Raise Poultry

By Dr. L. D. LeGear, V. S., St. Louis, Mo.

Dr. LeGear is a graduate of the Ontario Veterinary College, 1892. Thirty-six years of veterinary practice on diseases of live stock. Eminent authority on poultry and stock raising. Nationally known poultry breeder and lecturer.

### SAVE THE SOREHEADS

Simple Measures Applied Early May Ward Off Chicken Pox, Says Dr. L. D. LeGear, V. S., of St. Louis, Mo.

Editor's Note—This is another of a series of 52 stories on poultry raising written by the well known national poultry authority, Dr. L. D. LeGear, V. S., of St. Louis. The entire series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

"Go to bed with the chickens? Most certainly not!" exclaimed a well known chicken raiser in mock indignation. "No, indeed, I'd never be able to sleep on those sticks the way they do." For more reasons than one, I am inclined to sympathize with this gentleman's point of view. Nevertheless, I firmly believe that, short of a person going to bed with them, the man who comes nearest to living with his chickens is going to get the greatest profits out of them. He does so because he knows his flock both individually and collectively. The slightest change in their habits or in their appearances will immediately attract his attention and if disease threatens he is able to nip it in the bud long before it reaches the danger point.

Of course, not every one can give full time to the care of his fowls, nor is it altogether necessary. There are certain times every day when they must receive attention for feeding and the like. Then, scan each fowl as closely as possible and single out for closer examination any that show the slightest signs of possible disease. One particularly malignant disease which may crop up at any time, more especially in the fall of the year, is the chicken pox or the sorehead. As this disease may be carried by mosquitoes, stock should be inspected no matter how careful you have been to keep your own houses, yards and runs in a sanitary healthful condition.

A number of eruptions or nodules, varying from the size of a pinhead to that of a pea or hazel, appear on the comb, wattles, eyelids, ear lobes, beak and nostrils and sometimes on other parts of the body, such as the neck, legs, and the wings, on the rump and about the vent. On the body the nodules may become larger than on the head. The nodules begin as small, red or reddish gray deposits with a shiny surface. They gradually enlarge, becoming dry shriveled, uneven and wart-like in appearance, while the color changes to yellow, brown or dark brown. As these nodules increase in number and the inflammation extends, large areas of the skin will become thickened and covered with hard, dry crusts, closing the nasal openings and eyelids, often making it difficult to open the beak.

If the attack is mild the eruptions are limited to the head, the nodules are distinct and small and the general health is not affected. The nodules soon dry, heal and shrink, the crusts become loose and recovery is rapid. But in malignant cases the eruption is more general, the nodules are large and there is considerable inflammation and thickening of large areas of skin. When the crusts are rubbed off there will be a watery discharge from the ulcerated surfaces, which will later thicken, become thick and yellow and will give off a disagreeable odor. In this type of the disease there is fever, rapid loss of flesh, prostration and death.

At the very first sign of this disease give the whole flock large doses of epsom salts, once each week for two or three weeks at least. Mix one pound of epsom salts in a small tempting wet mash feed for each hundred leghorns, or one pound for each 12 of the heavier breeds. For half-grown stock give one-half the amount. Put the mash out in long troughs so they can all get to it and eat it up in a few minutes. If wet mash feed is not being given, the epsom salts can be put in the drinking water, but in a wet mash it is much more effective. Remove all affected fowls to a separate location well removed from the poultry flock. Then make a thorough clean up of all houses, coops and feeding equipment.

Clean and disinfect all hoppers, troughs and drinking fountains, roosts, dropping boards and other removable equipment. Remember to burn all litter and droppings. Finally, making a strong solution of some good coal tar dip and disinfectant and spray it into every nook and cranny where mosquitoes, parasites or disease germs might find a hiding place. If possible, always change clothing and shoes before going from infected fowls to healthy ones. Give each of the affected fowls from one-half to one teaspoonful of epsom salts and repeat the dose two or three days later if there is no improvement. A local application is also very healthful with a small swab or feather, apply a good dip to each of the sores, crusts and disinfectant or tincture of iodine nodules after removing the scales. The disinfectant should be used full strength, so be careful not to let it get in the eyes. Also apply once each day or two some reliable sore-head remedy. A good poultry prescription tonic in large doses will be found very beneficial at this time. Careful following out of this treatment should give highly gratifying results if started soon enough.

In the fall about the time chicken

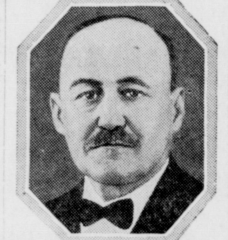

pox usually appears in your locality, I advise giving all young fowls and in many cases older ones too, large doses of epsom salts once a week for three or four weeks. Give same amount of epsom salts and in the same way as recommended above. I also advise extra precaution in cleaning and disinfecting at this time. All houses and sleeping quarters should be thoroughly cleaned and disinfected every week or ten days for some time. The disinfectant should be forced into all hiding places of mosquitoes and other insects with a good force pump. I have been using this treatment for preventing chicken pox for several years with excellent results. If my chickens do take the disease at all, it is usually in a very mild form.

Vaccination with a specially prepared vaccine is being used with varying results in some localities. The question is whether the disease is serious enough to justify the trouble and expense even if it was effective.

(Copyright, 1929, by Dr. L. D. LeGear, V. S.)

### KONJOLA PUT KANSAS MAN BACK TO WORK

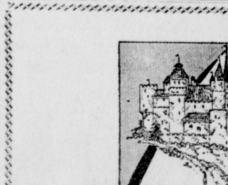

"Proved To Be A Wonderful Medicine In Many Cases", says Former Sufferer.

MR. H. C. SHERMAN

Any medicine that can win more than a million friends in seven years must have merit, and that is exactly what Konjola has done. You wonder why Konjola has become a household word? Well, read what Mr. H. C. Sherman, painting contractor, of Goddard, Kansas, says: "Konjola proved to be a wonderful medicine in my case. Last July I was hurt in an automobile accident, and was in the hospital many weeks. When I got out, I was in a badly run down condition; had rheumatism in the shoulder, arm and hand, and my stomach was out of order. I suffered terrible pains, and medicines did me no good. The many endorsements of Konjola led me to try it, and six bottles of the wonderful medicine made me able to resume my work. I am feeling better in every way than for a long time." Konjola's 32 ingredients work together, battling at their very source, and the cause of stomach, liver, kidney and bowel troubles, and of rheumatism, neuritis and nervousness. Konjola is sold in O'Donnell, Texas, at the Whitsett Drug Co., and by all the best druggists in all towns throughout this entire section.

### GAS USED TO BLOW WHISTLES, RIPEN FRUIT, MAKING ICE

A writer in a scientific magazine gives some of the uses to which natural gas is being put, ranging all the way from blowing a whistle where steam is not available down to the making of dry ice.

Natural gas is being used to pump water from deep wells. Gas is being used to ripen bananas. A gas product is used in sweating oranges and lemons.

Gas furnishes carbon black, used in automobile tires and printer's ink and dozens of other things.

Natural gas is used to make acetylene gas. Dry ice is being manufactured as a by-product of natural gas.

Natural gas, highly explosive, is the source of helium gas, a non-explosive.

Gas by-products are used to prevent damage to rubber when passing through calendaring rolls. Gas by-products are used to prevent explosions in certain processes of sugar refining.

Since gas was abandoned as an illuminant, more than 20,000 useful purposes to which it may be put have been developed by chemists, laboratories and experimentation.

### SHE FELT HURT

"Ah, Belinda, I wonder if my husband will love me when my hair is gray."

"Why not? He's loved you through three shades already."

### JUST A DUTY

"I hope you will dance with me tonight, Mr. Jones."

"Oh, of course. I hope you don't think that I came here merely for pleasure."

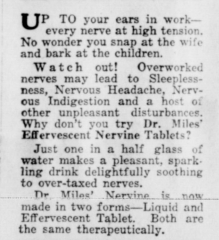

And the most popular speaker of the evening concluding with this remark: "When I came to this country I could not speak a word of English."

"Why, isn't that wonderful," exclaimed a lady seated near him, "but may I ask where you came from?"

"I was born here," said the speaker, smiling.

### OVER WORKED NERVES

### DR. MILES' Effervescent NERVE TABLETS

UP TO your ears in work—every nerve at high tension. No wonder you snap at the wife and bark at the children. Watch out! Overworked nerves may lead to Sleeplessness, Nervous Headache, Nervous Indigestion and a host of other unpleasant disturbances. Why don't you try Dr. Miles' Effervescent Nerve Tablets? Just one in a half glass of water makes a pleasant, sparkling drink delightfully soothing to over-taxed nerves. Dr. Miles' Nervein is now made in two forms—Liquid and Effervescent Tablet. Both are the same therapeutically.

Touzalin—Has your wife accomplished anything with the electric reducing machine you gave her for her birthday?  
Fozeello—Well, she has burned out two bearings and the motor, and gained six pounds.

Mistress—I'm glad to hear you will be staying on with me after you're married. Do I know the lucky man?  
Maid—Oh, yes, ma'am. It's your son!

Betty—Herbert declares he'll go crazy if I don't marry him.  
Betty—Poor boy! Then there's no hope for him either way.

Judge—Guilty or not guilty?  
Accused—Not guilty, your honor. I'm not here to do your work.

## The INDEX Beginning Next Week

### EAST SIDE NEWS

Crops are holding up very well and are needing rain.

H. W. Waldrup and family were called to Seagraves Sunday to attend the funeral of his grandfather, U. C. Dolloff. Grandpa Dolloff as everyone called him used to live in the Joe Bailey community. The bewaved ones have our greatest sympathy.

Doc Beach and family, S. H. Woods and family spent the Sunday at E. L. Kains' home.

A. L. Everette and family spent Sunday afternoon at Granddad Holway's.

Homer Durham burned quite a bit of gasoline in our community Sunday trying to locate the whereabouts of Miss Deicie Authur.

There was quite a crowd gathered at the Wallace Rains' home Saturday night and made ice cream.

H. L. Brewer is spending the week with his hoe in the weed patches.

Joe Brooks is driving a new Chevrolet around in our community trying to locate a stray mule.

One of Mr. Marion Lee's boys has typhoid fever.

The writer of the East Side News column was ill last week, and for want of a report came from that community.

Look for specials in this issue.

### MESQUITE AND TREDWAY NEWS

These are two very lively places. A large crowd attended Sunday school Sunday.

Mr. C. A. Bearden and family took dinner with Geo. L. Stephens and family Sunday.

Billie Banks left for Dallas Saturday where he will attend S. M. U.

Ruby McCraw of Lubbock spent the week-end at home. She is attending Tech.

O. Harris of O'Donnell spent the week-end with Lefty Stephens.

Foster Barrett, Nannie Cunningham and Yoss Bearden spent Sunday afternoon at J. B. Barrett's.

Mamie Bearden spent Sunday with Aline Nunnally.

Dee and Stelvin Burris spent Sunday with the Lamb brothers.

There is singing at the school house every Sunday night. Everyone come and help us sing.

### HELP! POLICE

A pale, proud girl turned to the big heavy-browed man who was looking at her intently. He held a glittering knife in his hand. "Have you no heart?" she asked in low even tones. "No," he growled. "Then, give me ten cents worth of liver."

## DADDY'S EVENING FAIRY TALE

By Mary Graham Bonner

### THE TOADSTOOLS

The afternoon before it had rained. And the fairies were having ice cream and cakes of all kinds and sizes and shapes.

Usually the fairies don't mind the raindrops coming down for a scamper and a patter on the earth, but the reason they weren't so glad yesterday was because it was the Fairy Yhab's birthday and they were all giving her a party.

That was why they had ice cream and cakes of all sizes and kinds—and one more thing—they had a huge birthday cake in her honor. You see the Fairy Yhab leads the fairies' orchestra and she loves music above all things.

Her hair is very long and soft and black and on her head she wears a silver crown.

Her wand is of silver with silver stars and she waves it about when she keeps time for the fairies who are playing in her orchestra.

As she gives the music to Fairyland the fairies wanted to give her an especially fine birthday party.

They were all there, dressed in their best, and when the raindrops came

The Little Raindrops Beat Time.

down the fairies all began to feel very sad.

"But we had to come," said the raindrops.

"Why?" asked the little fairies.

Yhab was the only fairy who seemed to understand until the raindrops said:

"Why, don't you know that long ago we were told to beat the drums for Yhab's music?"

"That's why we've come to her party. We beat time very gently when we want to, and very evenly."

"Do stay then, for you'll be here in time for the great final chorus we're to have after the birthday cake."

And then a beautiful pink and white birthday cake was brought forth on a pink and white tray, carried by twelve fairies all dressed in pink and white.

Their crowns were of pink with white candles which flickered as they danced around.

The cake, of course, was covered with candles which were all burning brightly.

Now the Toadstools had been sitting there in the woods for a long time, and suddenly they thought of an excellent plan.

"Come and sit under our umbrellas," they shouted, for, as you know, the Toadstools never mind the rain at all.

"Then you can hear the raindrops but will not have your pretty frocks drenched by them."

"And the cake with the candles can be put under the great pink Toadstool right over yonder."

So the twelve fairies who were dancing around the cake with the lighted candles put it under the big pink Toadstool.

But six candles had been put out by the little raindrops and the Fairy Queen had to wave her wand to have them lighted again.

Soon it was time for the chorus. All of the little fairies sitting under the Toadstools heard the chorus of voices from the trees and the brooks nearby and from behind the all ferns.

The fairies in the chorus had been hiding until it was time to give the Fairy Yhab a wonderful song they had made up themselves to sing for her.

And the little raindrops beat time. But oh, how the Toadstools were appreciated.

### Curious Buildings

Every land possesses different ideas in the construction of a church. In one land you will find the majority of churches with round towers, another country boasts of its fine spires. In some far-flung parts of the world, the church is represented by nothing more than a small wooden hut. Another church, recently built, represents the pipes of an organ.

But surely the most curious church in existence is that of a place of worship in Dieppe, France. This church is simply a hollow oak tree. The great old oak has had wooden steps built around it, and inside is the church. Its tall branches soaring up to the sky represent a wonderful natural spire.

### Just the Place

"You mustn't bring your train into the kitchen, Master Lempi! I'm busy making pies." "No, but this is where we stop five minutes for refreshments,"—Stray Stories.

### PLAINVIEW NEWS

Mrs. Cleave Aten's father and mother and her daughter of Austin visited in the Aten home last week.

Mr. and Mrs. Ernest Gleghorn entertained the young folks with a party Wednesday night.

Buck Stoking left last Monday for Pampa to work.

T. H. Boyd spent the week-end in Lamesa.

Oat Harris of O'Donnell and T. and Jack Brewer of the Joe Bailey community attended the party Mr. and Mrs. Herd gave Saturday night.

Miss Edith and Bessie Herd entertained the young people with a party in the home of their parents, Mr. and Mrs. George Herd, Saturday night. There was a large crowd present and all had a delightful time.

Homer Durham and mother and Morris Durham and children of O. K. were in Plainview community Sunday.

Bud and Floy Cox came in from Portales, N. M. Saturday.

Miss Nettie Gray and brother of Mesquite were visiting in Plainview community Wednesday.

Mr. and Mrs. John Brewer of Plainview visited Mr. Brewer's parents of Joe Bailey Sunday.

Jim Vance came in from Hobbs, N. M. last week.

Miss Jessie Fuller of the Lubbock Tech was visiting her partner, Mr.

and Mrs. Fuller of Berry Flat community the past week-end. Mr. and Mrs. Charley Hill spent Sunday evening with his mother, Mrs. J. R. Butler near Tahoka. He reports that his mother and brother have small pox.

Aquilla Stocking had the misfortune of getting his lip split and two teeth knocked out by a horse Saturday morning.

Jim Willborn was over in Randall community Sunday visiting.

### HE MUST BE IN LOVE

# RELIABILITY ECONOMY GOOD PERFORMANCE

THE NEW FORD TUDOR SEDAN

YOU are buying proved performance when you buy a Ford. You know it has been built for many thousands of miles of satisfactory, economical service.

Letters from users in every part of the world show the value of the sound design of the car, good materials and accuracy in manufacturing. You sense a feeling of sincere pride in the oft-repeated phrase—"Let me tell you what my new Ford did."

Further tribute to the sturdiness, reliability and general all-round performance of the new Ford is shown in the repeated and growing purchases by government bureaus, by police departments, and by large industrial companies which keep careful day-by-day cost records. In most cases, the new Ford has been chosen only after exhaustive tests covering speed and power, safety, comfort, ease of control, oil and gas

consumption, low yearly depreciation, and low cost of up-keep.

They have found, as you will find, that the Ford embodies every feature you want or need in a motor car at an unusually low price.

# The MILK PLANT

Will Be Ready to Receive Milk

## Tuesday Morning, July 22

If your farm is not on a route at present we will appreciate your bringing in your own milk or exchanging hauling with your neighbor until such time as we can establish a milk route in your territory if practicable.

### Will Pay 40c Per Pound

for Butter Fat in whole milk delivered at the Milk Plant for this period and will follow the market after Aug. 1. Milk must be sweet and cold. No SOUR MILK ACCEPTED.

## Suggestions

Cooling arrangements for the prompt cooling of all milk immediately after it is produced, should be made. A water tight barrel cut in half or a small tank deep enough to hold enough water to immerse a ten gallon milk can up to the neck should be procured and connected directly to the well and windmill (not to the supply tank) so that cold water direct from the well can be supplied to immediately cool your milk. It will take about 30 to 45 minutes in running water to cool the milk to the temperature of your well water. The milk, while in process of cooling should be stirred up occasionally to help the animal heat in the milk to escape thereby making a better product and greatly aiding the cooling process. After milk is properly cooled to the temperature of well water, cover should be placed on can to keep out dirt, flies etc. and care should be taken to see that the water line on the outside of can is above the milk line inside of can. This will help to keep your milk from spoiling. Milk must always be cooled in running water otherwise the warm milk will warm up the water. So keep in mind that your windmill must be running directly into tank when milk is being cooled.

Save all milk produced Monday evening and cool properly to temperature of well water as above. Do same thing Tuesday morning.

Never mix warm milk with cold milk or you will have sour milk.

See that all milk utensils are clean, by rinsing, then washing with hot water and washing powder then rinsing, and last by scalding with boiling water. Never wipe them dry. Turn upside down and let them drain.

Keep all flies and dirt out of milk.

We will have metal strainers on hand for straining milk. These can be purchased at the plant at cost.

And last but not least, patronize the Milk Plant. It has been erected for the purpose of helping the farmer to realize more money for his milk, and we know if you, Mr. Farmer, will apply yourself to the dairy cow as is done in the leading dairy states you, too can increase your income to the point where it will never be necessary to say CHARGE IT.

## West Texas Dairy Products Co.

LAMESA, TEXAS

### POLITICAL COLUMN

The following candidates have authorized the Index to place their names in our announcement column subject to the action of the Democratic Primary, July 26:

District Judge, 106 Judicial District: GORDON B. MCGUIRE (Re-Election).

For District Clerk: W. S. (SKIP) TAYLOR

For County Judge: G. C. GRIDER, (Re-Election).

For State Representative, 119th Legislative District: JOHN N THOMAS

For County Attorney: G. H. NELSON, (Re-Election).

For Sheriff and Tax Collector: S. W. SANFORD, (Re-Election). B. L. PARKER. J. H. BULMAN

For Tax Collector: A. M. CADE L. T. (TOM) BREWER. W. S. SWAN WASH HICKERSON R. E. KEY

For District Attorney: T. L. PRICE, (Re-Election).

For Tax Assessor: T. W. (WILL) BROWN. A. I. THOMAS. NEWTON M. BARHAM

For County Clerk: TRUETT B. SMITH, (Re-Election)

For County Superintendent: H. P. CAVENESS, (Re-Election)

For County Treasurer: MISS VIOLA ELLIS (Re-Election)

For Public Weigher, Precinct 4. MELL PEARCE, (re-election.) D. J. BOLCH. D. S. (Mitt) TODD.

For Commissioner Precinct 3: T. J. YANDELL, (Re-Election). W. G. ALLEN. WALDO McLAURIN.

#### (DAWSON COUNTY)

For Commissioner Precinct 2: H. L. HOHN, Re-election.

For Tax Collector Dawson Co.: BELLE ELIZABETH RIDGWAY.

For County Superintendent: T. M. CASL.

### Calling By Number Takes Less Time

If you know the numbers on your out-of-town calls you can get many of them about as quickly as local calls. It is worth while keeping a list of numbers you frequently use. If you do not know them, "Information" will get them for you.

If there are a lot of them, write to our business office and ask us to make out the list for you. If you want someone in a hurry, the telephone number is as important as the street address. Knowing the number will help you to speed your long distance calls.

O'DONNELL TELEPHONE CO.

### Six Years Ago

News items taken from files of The O'Donnell Index published here six years ago.

#### ISSUE OF JULY 18, 1923

#### George W. Brewer Killed When Home is Destroyed by Cyclone

A wind of terrific force swept down upon the home of Mr. and Mrs. George W. Brewer about nine miles east of O'Donnell Wednesday evening at about 7:30, totally destroying the residence and so badly injuring Mr. Brewer that he died at 2:15 p. m. Mrs. Brewer suffered some bruises and a sprained ankle. Their little son, G. H., seven years old, was badly bruised about the shoulders and back. Jewell, the five-year-old daughter, was blown through a wire corral, suffering severe scratches.

A call meeting of the chamber of commerce was held to consider a proposition of securing water service for the town. \* \* \*

Mr. Johnson, who was digging a well in the Wells community, lost consciousness and fell some 35 feet to the bottom. \* \* \*

O'Donnell has a public well, wind-

mill and tank, but so far as any good comes of it, it might as well be in the Sahara Desert. (The works was out of fix, and the Index Editor, T. J. Kellis, romped on city officials and offered to contribute money toward fixing it up.)

About two-thirds of the people of Canada live in their own homes.
