### GENERAL ELECTION

# Early voting underway

Early voting in the Nov. 3 General Independent. Election was begun Wednesday, and will continue through Friday, Oct. 30, according to Vernen Cannon, county

Early voting by personal appearance will be conducted from 8 a.m. to 12- noon and 1-5 p.m. weekdays at the Wichita County Agricultural Building, 220 W. Park.

Additionally, the county's mobile voting poll is to be at Heritage Manor from 8:30 to 12-nogn next Monday.

Four polls for early voting will be maintained on the second floor of the county courthouse.

at the Wichita County tax office and Precinct Four building, respectively.

Positions, candidates and their parties appearing on the ballot are as follows.

President and Vice President - Bill Clinton and Al Gore, Democrat; George Bush and Dan Quayle, Republican; Andre Marrou and Nancy Lord, Libertarians; Ross Perot and James Stockdale,

U.S. Representative, Dist. 13 - Bill Sarpalius, Democrat; Beau Boulter, Republican.

Railroad Commissioner - Lona Guerrere Democrat; Barry Williamson, Republican; Richard N. Drahelm, Jr., Libertarian,

Justice, Supreme Court, Place 1 Oscar H. Mauzy, Democrat; Craig Enoch, Republican; Alfred Adask,

Justice, Supreme Court, Place 2 - Rose Spector, Democrat; Eugene Cook, ke-

Justice, Supreme Court, Place 3 - Jack Burkburnett and Electra polls are Hightower, Democrac; John. D. Montgomery, Republican.

Judge, Court of Criminal Appeals, Place 1 - Charles F. (Charlie) Baird, Democrat; Joseph A. (Joe) Devany, Re-

Judge, Court of Criminal Appeals, Place 2 - Morris L. Overstreet, Democrat; Sue Lagarde, Republican.

Judge, Court of Criminal Appeals, Place 3 - Pete Benavides, Democrat;

Lawrence (Larry) Meyers, Republican, Member, State Beard of Education, Dist. 14 - William L. (Bill) Hudson,

State Senator, Dist. 30 - Steven A. Carriker, Democrat; Tom Hawwood, Republican.

State Representative, Dist, 68 - Charles Finnell, Democrat.

State Representative, Dist. 69 - John Hirschi, Democrat.

Justice, 2nd Court of Appeals, Place 3 - Doyle Willis, Jr., Democrat; Tod Weaver, Republican.

District Judge, 78th Judicial District Keith Nelson, Republican. District Judge, 89th Judicial District

Juanita Pavlick, Democrat; Roy Sparkman, Republican. Sheriff-Tom Callahan, Democrat; Ray

Cannedy, Republican. County Tax Assessar-Collector Monette Pemberton, Democrat.

County Commissioner, Precinct 3 Gordon Griffith, Democrat. Constable, Precinct No. 3 - Sam Fairchild, Democrat.

SMOTHERING DEFENSE - Iowa Park quarterback Tony Lozipone is smothered by the Vernon Lions' defense, in Friday's district opener. It was their worst defeat, 44-0, since 1927. For a complete report on the contest, please turn to page 8.

# Hobblin' Hawks hosting Hares

Iowa Park and Bowie, two teems - who felt they had been upset the previ- maining on the clock. that are still looking for their first wins against district opponents this season, will meet at 7:30 p.m. Friday in Hawk

This will be the 14th meeting betweer the two teams, since they first clashed in 1970. Iowa Park has won 11 of the games.

Because the Jackrabbits are an improved ball club, and the Hawks are limping severely, tomorrow's game isn't expected to be a rematch of last year.

In that game, the Hawks had bullied the 'Hares to a 35-7 score, when the contest was terminated at halftime be-

cause of a threatening severe storm. That was a revenge for the Hawks,

Decisions reached during Monday

night's meeting of the city council will

ous year, when Bowle won 9-7

Bowle's other victory was in 1988, which also was a close score: 26-21.

Six of the games between the two schools have been Mean Green shutouts, including 1970's 70-0 and 66-0 in

The Jackrabbits almost won their Dist. 4-AAA opener against Breckenridge last week, and would have, had that game ended 3:55 earlier.

Leading 13-6 at that point, the Buckaroos mounted a 55-yard drive, Then, facing a fourth-and-six situation at the 15, scored on a pass. Breck's Caleb Myers then ran for the winning two-point conversion, with 20 ticks re-

Two ordinances planned

The 'Rabbits' two victories of the season were 24-7 over Jacksboro and 14-10 over Trinity Christian.

Jacksboro's fone touchdown was on a 64-yard run. Bowie amassed 272 yards rushing end 129 passing in that

In the win against Trinity Christian, fullback Jacob Clark accounted for 119 of Bowie's 200 yards rushing, and Troy Chandler caught a pass that covered 85 yards.

Against Breckenridge, halfback Jered Clark was credited with 125 of Bowie's 204 yards rushing, Jackb Clark had 32, and Troy Chandler gained 60. Continued on page 4

# Police case load builds

Capping off an unusually heavy unit and cartridges, were recovered. week of activities for the police were Also Thursday, police received a & public intoxication charge. He was two reports received Wednesday c

The first, received at 5:28 a.m., was the theft of a vehicle from the 400 block of North Yosemite. A 198 Dodge Spirit had been left overnight with the keys in the ignition, and parked near the alley.

It was not there when the owner attempted to leave for work, police were

called to investigate the burglary of a

storage unit at Lee's Bargain Center. A lock on the unit had been knocked off and a gasoline generator and vehicle tow bar taken, police said.

Two young men were arrested at 12:39 a.m. Thursday near US 287 and Pacific, on charges of public intoxica-

Jerome Koerth, 18. and Ronnie four hours later. Gene Johnson, 22, were later released after signing personal recognizance

The arrest of a suspect Tuesday morning apparently cleared a burglary case reported in July from a resident of Woodbriar Apartments.

Charles Edward Page, 26, was placed in county jail under a \$3,500

A warrant had been issued for his arrest after investigation linked him to the burglary, police said. Most of the

block of Texowa, that an AM/FM cassette stereo unit had been take sometime during the previous evening.

Officers arrested a man at the football stadium who was wanted for an outstanding warrant issued by the sheriff's department.

Richard Stephen Fairchild, 32, was wanted for capias pro fine, possession Shortly afterward, police were of marijuana, which carries a \$482 bond. He was later turned over to county deputies.

> When summoned Friday afternoon to a domestic discurtance in the 200 block of West Pecan, officers placed James William Greenwood, 38, under arrest on a charge of assault to prevent family violence. He was released some

A call to the 200 block of South Bond at 1:40 a.m. Sunday, where a disturbance was reported, resulted in the arrest of Jason Allen Dudley, 17, on a charge of disorderly conduct. He was released an hour later after signing a personal recognizance bond.

Police received a complaint Sunday morning that a girl's 26-inch mountain bicycle, valued at over \$20, had been taken from a residence in the 700 block of South Victoria.

Officers took Lester Baptist Sargent items taken, including a VCR, Nintendo Sr., 52, into custody at 9:27 p.m. Sun-

### Permit issued to build home

bolstered September's building permit total for the city to almost \$100,000.

The home is to be built by Mr. and Mrs. Jim Bradberry on Bentwood. For the year, Iowa Park's permits

have now risen to \$542,260. Permits issued during September

included: Don Roy Klinkerman, 521 Aldine, roofing, \$500; Delbert Sigafus, 405 S. Victoria,

storage shed, \$4,000; Joe Minton, 705 W. Texas, storage shed, \$600; W.N. Whitehead, 404 W. Poe,

roofing, \$830; Larry Thompson, 601 W. Texas, roof repair, \$300; Shannon Guthrie, 310 W. Valley,

open carpc.t, \$600; Paul Duffey Jr., 408 E. Bank, alteration, \$600; Shirley Wesbrooks, 412 W. Valley,

roofing \$600; Phillip Staggs, 1119 W. Louisa, greenhouse, \$600;

Jeff Coats, 311 E. Ruby, addition, Bill Cook, 509 S. Wall, roofing,

Wayland Stewart, 1114 W. Louisa,

storage shed, \$600; Jim Bradberry, 1514 Bentwood, new structure, \$80,000; James Frazier, 608 E. Cash, carport,

lead to enactment of two ordinances at the Oct. 26 meeting. One issue is for the city to enter into a joint agreement with the county and A permit to construct a new home

other municipalities within the county on a comprehensive emergency management plan. The other apparently will be to

replace an ordinance currently on the books which requires the city administrator, police chief and public works director to reside within the city limits.

Alde: ... en voted to table the joint emergency management issue so that a completed ordinance could be acted on at the next meeting. No one objected to the agreement.

Once enacted, cities struck by a disaster can request assistance of personnel and equipment from others.

The city had a plan prepared in 1985 to react in case of a local disaster. Committee heads and members held meetings, but the ordinance somehow was never entered into the code of or-

for next council meeting dinance books.

> That plan will be revised and put into the overall ordinance to be considered at the next meeting. The council's action on the ordi-

nance requiring residency of the three key city personnel was a carryover from the last meeting of the group.

At that meeting, the majority of the councii approved a motion to grant a waiver as requested by Adminstrator

However, after the vote, Mayor Wayne House announced he would veto the council's action.

At Monday's meeting, Alderman Bob Hamilton proposed a motion to sustain the mayor's veto, and at the same time instruct the administrator to prepare an ordinance for the following meeting which would abolish the one containing the residency requirement.

That motion was approved 4-1, with Alderman Johnny Crawford casting the lone descenting vote. The mayor voiced opposition to it, but has no vote unless to break a tie cast by aldermen.

A bid for a grass mower, submitted by C&L Service Center, was accepted. Two mowers, one new and one used, were offered, and aldermen decided to purchase the new mower, with an extra set of blades, for \$6,040.

Action on bids to purchase a brush chipper was tabled 30 days, to decide what action the city will take or alter-

### Tax rebate check lower

Iowa Park's sales tax rebate check this month was down considerably from the same time last year, as were all the other cities of the county.

But, for the year, Iowa Park continues to be well ahead of 1991 thus far. This month's check from the state

comptroller's office was for \$12,530.11, down 14.96 percent from the October, 1991 check of \$14,733.53.

The other communities did not have as great a decrease as Iowa Park, Burkburnett was a minus 4.22 percent, Electra 2.46 and Wichita Falls 2.49, bringing the overall county down to a minus 2.49 percent, when compared with the same month last year.

But, for the year, Iowa Park has thus far received \$167,961.25, which is an 18.56 percent gain for the same time last year, when it had received \$141,667.43.

All the other counties also are reporting gains for the year: Wichita Falls 5.79 percent; Electra 3.61, and Burkburnett 2.23.

October's rebate checks reflect sales taxes collected on August sales and reported to the comptroller in September by businesses filing monthly tax

Holliday is a minus 24.28 percent for the year, having received \$50,969.11, according to the report.

### New septic regulations told

A requirement affecting mostly rural residents is now being enforced.

It concerns septic systems, is a mandate of the Texas Water Commission (TWC) and will be enforced in this area, Wichita Clay and Archer counties, by the Wichita Falls/Wichita County health District, Water Pollution Divi-

"County orders in each of the counties require the inspection of:

"1) individual septic system installations, "2) septic system renovations, and

malfunction before any sales and/or

transfers of ownership of property

(private, conventional, FHA, and VA loans included)," the article states. All septic system installers and

"3) all existing septic systems for

repair technicians must be licensed and certified by the TWC.

paid permit, the announcement states.

The county order calls for a fine of up to \$200 a day for failure to comply. The Wichita Falls/Wichita County

Permitted installers may not begin construction, alteration, repair or extension on a septic system that is owned by another person unless the owner or a representative shows proof of a current

Each owner or buyer of property with an existing septic system is required to request an inspection and permit from the Wichita Falls Pollution Division prior to closing or transfer of a

Health District office is located at 1700 Third Street in Wichita Falls.

Action on bids, and various department reports, are the major items on the next school board meeting agenda. The meeting is to begin at 7:30 p.m. Tuesday in the junior high school li-

Trustees to consider bids

Action on bids for teaching supplies, library books, periodicals, videos and tennis supplies and equipment are on one line item, while permission to solicit bids for grazing rights at the

Valley View campus is another. A proposal that the board reject bids submitted by Total Sports of San Antonio and L&D Supply of Arlington, because of "poor performance," will be

When the topic of transportation comes up on the agenda, several topics will be considered. They include pay-

ing Tim Stewart for use of his tools, operation costs, cost per mile for regular and handicapped routes, selling a bus and pickup at the next auction, and donation of an automobile to the auto mechanics class.

Under the topic of the tax department, trustees will take action on school and city tax reports and adjustments, the 1992 school certified tax roll, and the city's annual tax year report, which is required because the tax department also does the city's tax work, by con-

Supt. Glen Mitchell is to give an enrollment report, as well as report on a recent convention he attended.

Personnel is the final item on the agenda, listing accepting of a resignation and employing new personnel.

By MYRNA SMITH

Beautiful and interesting handcrafts will be on display for the next month by Tommie Smith and Ann Harper, members of the iowa Park Art and Crafts Association.

Mrs. Smith's two stuffed reindeer immediately evoke interest, and no doubt they will be sitting on the fireplace mantle at Tom Burnett Memorial Library with their legs crossed.

That is where she uses them in her home at Christmas, with each of them holding one end of a red ribbon with the words "Merry Christmas".

One of the ones that will be on display is red and white stripe and the other is a bright colored plaid. They have red felt hands, feet, ears and nose. But they aren't called Rudolph. One of Tommie's granddaughters, Robin Furnish, named them Raiph-anything but Rudolph.

One of the most "alluring" things about the two Ralphs are their long black eyelashes, but one has to see them to really appreciate them.

Mrs. Smith has been making the reindeers for people since 1987. One of them soon will go to South Dakota to make someone happy during the Christmas season.

Tommie is adept at any kind of handcrafts, and she also is a painter. Possibly two of the handcrafts the does that she may be best known for in Iowa Park are her angels, and the dolls she makes from pillowcases.

She began making the dolls in 1989 and has made 637 of them. "They have gone all over the United States and some have gone across the waters," she said.

Most of the dolls she makes are from pillowcases that have a sentimental meaning to the receiver. Many of them are heirloom pieces, or from a child's pillowcase. She makes the dolls like Amish dolls, with no face. She also makes pantaloons and bonnets for them.

Mrs. Smith has written a poem to go with each of the dolls that she makes.

Tomraie retired from the school room in 1975 after 261/2 years with the Iowa Park Independent School District. Her husband, the late Roy

Smith, also was a teacher in Iowa Park. Three of their four daughters followed in their parents footsteps. They are Linda Hambrick of Hurst, Paula Holmes, of Denton, and Micky George of Greenville. The fourth daughter, Nancy Pierce, lives in Wichita, Kans., and is a homemaker.

Mrs. Harper will have a beautiful stitchery "painting" on display at State National Bank and a quilt in the "Castle Windows" pattern displayed at American Bank.

Ann does a lot of handwork and crafts, but her forte is quilt making. She acquired that interest from both of her grandmothers, she said.

She made her first quilt in 1958 for her second daughter, and always tries to keep six quilts ahead, so each of their children will have one she has made. She and her husband, Bob, a retired letter carrier, raised five children, three they adopted as babies and two of their own.

The quilt she will have on display is one that was started by her sister, Margie Elaine Langford, before her death in 1987. Ann did not feel that she was ready to finish piecing the quilt until this year.

Mr. and Mrs. Harper hope next year to do more traveling than they have in the past. She plans to devote more time to tracing her genealogy. She has done some, enough to know she wants to find out more about her background. Ann knew very little about her father's family, but now that she has found some information, she wants to find more.

Her needlepoint picture is a residential scene and uses the colors of orange, blue, gold and green.

Ann is display chairman this year of the Arts and Crafts Association if at sponsors the displays of their members each month.

### Amity meeting features Columbus Day program

Amity Club members met Monday in the home of Ruth Welch for a program on Columbus Day by Mary McIlroy.

Roll call was answered by each member telling a childhood memory of Halloween.

Mrs. McIlroy gave the history of Columbus Day and said that the day honors what is perhaps one of the most important events in history. She added that this being the 500th anniversary it has been observed and commemorated.

Marilyn Hale gave the meditation entitled, "Ideas are Like Stars," by Helen Steiner Rice.

Pledge to the American flag was led by Amy Brown, president.

Items discussed during the business meeting were the report and success of Whoop-T-Do, and members were reminded of the joint meeting in November at Tom Burnett Memorial Library.

Mrs. Hale gave a report on the District workshop held in Crowell.

### Birthday party Saturday

A birthday party for June and Kristi Lane will be held Saturday from 2 to 4 p.m. at the First Christian Church.

All family and friends are invited to attend. Refreshments will be served.

Hostesses for the courtesy are Coleta Grubbs and Shirley Collins.

Project for the month was for each member to bring school supplies.

Refreshments were served by the

### Look Who's New

### **Evening Lions hear** program on drugs

Herman Sanders of Wichita Falls, drug awareness chairman for Lions District 2E-1, spoke to the Evening Lions Club Tuesday. He is a member of the Northeast Lions Club and the United Fund chairman for PPG. He was introduced by Harvey Troutman.

Sanders has spoken on drug awareness to high schools in the area, at Midwestern State University, and various clubs. One of his hobbies is writing about drugs and other problems where he endeavors to emphasize that the best way to combat the problems, which are so prevalent now, is to show love and friendship instead of hatred. He said that Jesus' example of love proved that He loved the offenders even though He despised the offense.

He closed with one of his original poems, "This Old World's Only Answer Is Love," before a question and answer period.

During the business conducted by Pete Elliston, plans were made for the Dec. 8 meeting when members of the Evening Lioness Club will be feted at a catered holiday meal.

FRIDAY, Oct. 16

Salmon rice loaf with tartar sauce, corn, broccoli, hot rolls, plums, Sir Soft thick sugar cookies, milk. MONDAY, Oct. 19

Salisbury steak, baked beans, mustard greens, cornbread, peach half, milk.

TUESDAY, Oct. 20

Chicken tetrazzini and spaghetti, vegetable sticks, carrot-raisin salad, bread, pear slice in lime Jello, milk. WEDNESDAY, Oct. 21

Tex Mex casserole, green beans, toss of salad, hot rolls, Apple Brown Betty, milk.

THURSDAY, Oct. 22

Barbecued pork roast, oven potatoes, mixed vegetables, rolls, pumpkin pudding, milk.

Mr. and Mrs. Richard Phillips

### Phillips' to be honored on 60th

### Letters

### to the Editor

### Finds editor's mistake

Dear Mr. Hamilton,

I was reading the Iowa Park Leader when I noticed the word "Studys" was spelled wrong on the front page. I just thought you should know.

Very Truly, Lindsay Goodman

5th grade 3380 Horseshoe Bend

Iowa Park TX

(Editor's note: You are absolutely correct, Lindsay, and Mrs. Black, English teacher at Iowa Park High School, confirms your finding. The correct usage of the word is "Studies." I stand corrected, and will try to not make the same mistake twice. Thank you, and thanks for reading the paper.)

As is often the case, we fail to see the wisdom, or in this case the lack thereof, in certain laws until they effect us personally. I speak in reference to the "No Pass-No Play" provision of Texas House Bill 72.

Recently, the law's negative impact on kids has touched close to home. Sharing his anguish, I watch as my son struggles with the pain of having failed one class, and being declared ineligible for Jr. High football. Prayerfully, I trust our support coupled with his resolve and strength of character, will salvage positive benefits from the disappointment of this mini-crisis. Still, I hurt for other children out there. Is it such a mini-crisis for some of them. . . .?

For me, intense reflection has cleared the muddy waters of this controversial legislation. "No Pass-No Play" needs further evaluation. I believe the law is discriminatory, shortsighted, selfdefeating, and unfair for the following

1) The blanket rigidity co the law fails to consider emotional and/or academic deficiencies that could hinder achieving the mandated level of performance. The law mistakenly assumes equal capability of all students. This is clearly discriminatory relative to a child's ability.

2) Inarguably, co-curricular activities are part of the educational process. Children derive benefits such as experience, confidence, teamwork, and belongingness from the organized participation. Any attempt to motivate academic performance in children, which at the same time deprives them of such positive, once in a lifetime opportunities, is shortsighted.

3) The deteriorating moral fabric of our society is creating an increasing number of dysfunctional homes, thereby placing more children in disadvantaged emotional, socio-economic positions. Based on academic performance, can we justify depriving these children of

activities which often can be the critical source of nurturance and acceptance in their lives? Emphatically, NO!

Though our foremost goal as a state education system is to provide quality education opportunity, and to encourage educational commitment in children, we can not be blind to the fact that a growing populace of students are coming to us hurting from a variety of social ills. To accommodate, we should respond positively by providing cocurricular activities free from academic conditions. We should seize every chance to provide acceptance, instead of demanding performance and depriving privilege. To do otherwise is self-defeating.

4) Finally, children have different intellectual and creative capacities. Special aptitudes may greatly enhance performance in one area and preclude doing consistently well in another.

Consider those gifted in the fields Send the Leader to: of art or music. It follows we should encourage their participation in activities that develop these natural talents. Conversely, it is unfair to discourage them for not achieving a minimum level of performance in an area in which they are not particularly adept. As they process life and forge a base of self-esteem by standing on the building blocks of successful achievements, how can we advocate a system that kicks the blocks out from under them?

In summary, sobering questions need examination. Has zeal to improve statewide academic performance made us callous to the needs of children with lesser capabilities? Are their rights to oceive the very real benefits of participation in various school funded activities being overlooked? Can we validly discount the ter ible negative impact on the increasing multitude of socially and emotionally disadvantaged children, as we effectively reinforce the message they've often grown up that "You don't measure up."?

Will we continue to sacrifice our children's never-to-be-repeated opportunities of youth on the alter of academic performance. Steve Love

### 'Becoming nostalgic'

Congratulations. Twenty three years, you must be doing something right. Keep it up.

I graduated with the Class of 1951 and returned last year for our 40th class reunion. I had so much fun that I came back this year. In fact my sister from the Class of 1950 and cousin from the Class of 1959, made the trip along with me; and we made a pact to try our best to come back every year.

We would like to express our gratitude to all the members of the Ex-

#### Students Association and the merchants who did such a great job of making things so enjoyable for us. While there, we made a visit to the Drug Store so I could buy an Iowa Park Paper. I am really getting nostalgic in my old age. You see I was class reporter way back in 1950 and '51. Of course that was before your time. Anyway, I am enclosing my check for \$15.00. Please start sending the "Leader" as soon as possible, in fact, if you could send one for this week, I would be so pleased. I'd like to read what you have to say about Home-

Also, I'd like to add that we made a visit to the cemetery to pay our respects to some of our friends there. We were so pleased to see how well it looks.

Gratefully, Lucille Wesley Holman - 1951 Marie Wesley Martinez - 1960 Bill Moore - 1959 Lucille W. Holman 3038 Heatherglen Rd.

natives for the landfill operation. In a "catch-up" action, three Employees of the Month were recognized: Tammy Coats, Charley Wright and Mike

In other action, the council voted approval of the 1992 tax roll, as well as a format for a plaque to be displayed at the Recreational Activities Center, and received a letter of resignation from David Collins, city code enforcement officer and fire marshall, who has ac-

cepted a position at Mount Pleasant. Jones also received permission from the council to rent the small apartment or the Tom Burnett Memorial Library grounds, for \$150 monthly.

### Hawks

Continued from page 1

Four of Bowie's eight pass receptions were by Wes Kleinhans (two for 34), and Lyle Tate (two for 19).

In their 26-7 loss to Decatur. Bowie's Jacob Clark carried 25 times for 124 yards, including a 52-yard TD.

The Jackrabbits have enough depth on their team that only three players, Chandler, Lyle Tate and Ben Davis, are needed to start both offensively and

Ankle injuries could possibly hold out two key starting seniors on the Hawk's offense.

Quarterback Jason Miller was held out of play last week at Vernon, and was still limping noticeably early this week, after having his ankle twisted early in the second half at Wellington.

Chris Williams' and was hurt at Vemon, when he recovered an offensive fumble. After having it attended to on the sideline, he returned to the field, but went off soon afterward and never

Tight end Mark Tatum watched last week's action in street clothes, but he was working out in pads early this

And runningback Mark de la Rosa, who saw only limited action against the Lions, also is expected to start Friday.

Starting offensive tackle and linebacker T.J. Bean is still sidelined with a broken forearm. He could possibly see action before the season's end, he said, but not this week.

Back Scott Byrd now has the cast off his foot, after experiencing a broken bone in his foot in the first pre-season scrimmage, and has begun working out on a limited basis.

Lineman Patric Kennedy and back Don Ellis, who suffered earlier ankle injuries, both saw considerable action

Coach Robert Clensay reminded his players Monday that they still have a good opportunity to advance into the state playoffs, despite their 1-5 record.

"This is the beginning of a new season," he said at the start of the

# s I See It

I guess all these debates between the candidates for president and vice president are good for something, but the national media is having a feast.

One thing is apparent. Neither the national media nor I have changed our minds about the election ... they are for the Democrat ticket and I'm for the Republican.

No sooner is a debate ended, the commentators are delaring whichever Democrat appeared to be the victor.

They're not a quick as I, though. I said the Republican candidates were winning well before the closing talks.

The national media is quick to pick up on the so-called polls, all of which indicate Democrat candidates are running away with everything.

Folks, just give me an opportunity, and I can set up a pol! on the blink of an eye that would indicate Fidel Castro was the winner.

Polls and statistics can be used in ways to make whatever outcome one

If anything, all this stuff with the debates is coming just in time for the election polls to open. In fact, the early

### Highland Cemetery meeting set Sunday

The monthly meeting of the Highland Cemetery Association is to be held at 2:30 p.m. Sunday at the Iowa Park Recreational Activities Center.

voting polls opened yesterday in Texas.

I just hope all the publicity the election is receiving isn't turning off

Whomever the winner is, I really feel he should receive a mandate from the voters . . . the majority of the voting population, that is.

#### Mrs. Mitch Miller

Kay Miller and her husband Mitch are a couple who share many interests, in dition to encouraging and being supportive of each other's individual talents.

Kay, who is a talented artist, won the People's Choice Award for her oil painting entered in the Arts & Crafts Association's Art Show this year at the Whoop-T-Do. She said that she has always liked to draw and paint. Thirteen years ago, she began painting with oils and loves it. She taught a beginner's class for a while in Wichita Falls.

Kay said that Mitch also loves art and encourages her in her work. In fact, he has almost completed work on a studio he is building for her next to their home.

Mitch is the owner of Iowa Park Plumbing. He does carpentry work as a hobby, and Kay was very complimentary of the unusual and creative idea he comes up with.

The Millers like to travel, and went to Canada year before last, and Colorado last year.

They also like to walk for exercise, and Mitch has cleared a walking trail on the land around their home.

Kay is originally from Childress and graduated high school there. She has been employed 13 years as property manager at Raintree Apartments in Wichita Falls, and also has her realtor's license. She is on the board of North Texas Rental Properties Association, and a member of Texas Apartment Association and National

She and Mitch attend services on Sunday mornings at the Cowboy Church at Blackwell Arena.

Kay said that their family is very important to them, and that everything revolves around them.

of the WEEK

Their combined family includes five grown children, and Jason, a high school senior and quarterback of the Hawk football team. They also have three grandchildren. At least once a month they get together for a "family eatin" as Mitch calls it, and are planning a trip to Arkansas during the Thanksgiving holidays.

Kay cooks mostly on weekends and holidays, but said if she had time she would like to cook more. Most of the recipes that she brought in are ones that she uses for holiday meals, but Kay said that Mitch is especially fond of the "Tortilla Roll-Ups," and could eat all of them by himself.

#### Tortilla Roll-Ups

### Gibbs completes RN exam

Carolyn Copas Gibbs, a 1980 Iowa Park High School graduate, has successfully completed the Texas Board of Nurse Examiners Licensure Exam for Registered Nurses.

She graduated Midwestern State University with a Bachelor of Science in Nursing degree.

During college, Carolyn was involved in MSU's Student Nurse Association. She served as president her junior year and as advisor her senior year. She was a state representative and a national representative of the same association.

Her senior year, Mrs. Gibbs was named state chairperson for the Child Abuse Task Force for Texas Student Nurses Association.

Also during her senior year she was named to the prestigious Who's Who In Nursing Professionals. She was on the Dean's List and the President's Honor Roll.

Her junior year, Mrs. Gibbs was named outstanding junior nursing student and nominated for Outstanding Junior Woman. Her sophomore year she was listed in Who's Who in American Colleges.

Mrs. Gibbs has certification in Advanced Cardiac Life Support, Basic Cardiac Life Support and Neonatal Advanced Life Support. She is employed full time as a nurse supervisor at Hamilton Hospital in Olney, and as a staff nurse at Wichita General Emergency Department.

Currently Mrs. Gibbs lived in Olney with her huband, Bruce, and son, Chance.

She is the daughter of Perry and

#### "IT'S ONLY BEER"

Advertisers would have us believe drinking beer is simply an innocent pleasure for every "good ole boy." Many would have people believe beer is innocent and harmless. Beer is neither innocent nor harmless! If it was, why do most brewers and distributors fire any employee for drinking on the job? Think about the following facts and make a decision.

Beer contains alcohol. The alcohol content of one twelve ounce can of beer contains a little more alcohol than one ounce of 100 proof whiskey or a small glass of

forty proof wine.

Beer is a major culprit in alcoholism. Some think that one cannot become an alcoholic from drinking beer. It is documented that beer drinkers compose a large percentage of alcoholics undergoing treatment in VA hospitals. Alcoholism is a major social problem in Germany and Belgium where beer is the alcoholic drink almost exclusively.

Beer contains a second powerful narcotic. Besides the narcotic of ethyl alcohol, beer contains the narcotic called lupulin. This drug is the active narcotic agent contained the hops from which beer is brewed. The chemical formula for lupulin shows it contains the same chemical elements as the narcotic agent in marijuana, only in a heavier molecular structure. The hops from which beer is brewed is classified by botanists as belonging to the same plant family as the hemp family from which marijuane is derived. When one drinks beer, one receives a double dose of narcotics (alcohol and lupulin).

The alcohol in beer has the same effect as the alcohol in wine or whiskey. It slows reaction time, often just enough to prevent the handling of an emergency on the job or behind the wheel of an automobile. Many medical schools demonstrate the effect of alcohol by giving two exams on successive days with similar questions. The first exam is given as usual. The second exam is given after each student has drunk one bottle of beer. The tests are graded by people ignorant of the experiment, thus unbiased Most of the students judge the second test to be easier, but the grades average 17% lower. Only one beer makes a difference! The fact that alcohol gives one the sensation of being better able to handle a situation when the opposite is true becomes a major factor in driving a car and other avenues of life.

Jesus teaches we will know things by their fruits. (Matthew 7:16-20) Like other alcoholic beverages, beer has been associated with people who commit crime, and cause heartaches, deaths, and destruction. Not everyone who drinks will do the above actions, but there is a known factor of those who have committed such action to have been drinking. The most dangerous drinker of all is the one who does not commit the above actions, appears to be the model citizen, and treats his family well for he tells the entire world "there is no danger in beer." causing them to ignore the grave and potentially serious consequences of their actions.

We repeat, beer is neither innocent nor harmless!

Welcome To The

### AFTER 'DISTINGUISHED CAREER'

# Pastusek retires from Air Force

By MYRNA SMITH

Col. Robert R. Pastusek, Iowa Park native, 1963 honor graduate of W.F. George High School, and son of Mr. and Mrs. W. R. "Pat" Pastusek of Fort Worth and Iowa Park, retired from the United States Air Force Aug. 31.

Colonel Pastusek retired with "distinctive accomplishments culminating a distinguished career in the service of his country, reflecting great credit upon himself and the U.S. Air Force."

Pastusek is a master navigator with more than 2500 flying hours in F-4 and F-111 aircraft. His military decorations include the Joint and Air Force Meritorious Service Medals, Air Force Commendation Medal, Navy Commendation Medal, Presidential Unit Citations, Air Force Outstanding Unit Awards, and Republic of Korea Presidential Citation. His date of rank is Dec. 1, 1988.

He received the Legion of Ment for distinguishing himself by exceptionally meritorious conduct in the performance of outstanding services to the United States as Director, Interoperability a: I Integration and Director, Battle Management and Interoperability, Deputy Chief of Staff, Requirements, Headquarters Air Combat Command, Langley AFB, Va., from Sept. 25, 1990 to Aug. 31, 1992.

During this time he led a four-division major command headquarters directorate with more than 60 assigned personnel, supporting the management of more than 100 USAF, joint service, and allied programs to meet the command, control, communications, computer, and intelligence (C41) requirements of the Combat Air Forces (CAF).

At the request of the USAFE DCS, Operations, Colonel Pastusek delayed reporting to the assignment at Langley AFB to serve as Director of the USAFE Battle Staff during initial deployment of US combat forces for Operation Desert Shield.

From Aug. 3 to Sept. 20, 1990, he directed the mobilization, orderly movement, and initial support of six USAFE fighter squadrons to Southwest Asia that had no mobility tasking or training for deployed operations.

Col. Pastusek personally devised and implemented plans to use apportune strategic airlift, made available by C-5, C-141 and commercial aircraft awaiting new CONUS movement orders at European airfields, to

move critical initial support elements.

His initial focus upon arrival at
Langley was to develop and deliver a
prototype tactical mission planning
system based on the first theater-wide
satellite imagery capability ever de-

This \$10 million project was completed in 90 days, using Gulf Peace funds, and was largely responsible for the highly successful precision weapons attacks viewed nightly on national television during the Operation Desert Storm air campaign.

At the request of the CENTAF DCS, Operations, Col. Pastusek went to Taif, Saudi Arabia in January 1991 to set up and operate the alternate Tactical Air Control Center.

Although this facility was never used to direct combat planning or operations, Pastusek and his team provided invaluable emergency air refuelling tanker coordination, secondary air tasking order (ATO) dissemination, real-time target imagery and battle d mage assessments, and the first computer-based theater battle management (TBM) display system.

Upon Col. Pastusek's return to Langley AF3, he extanded the scope of the battle management program to include all C41 aspects of theater air operations, and increased the participating membership to include the DCS Operations from all AF operational commands.

His subsequent strategy-to-task analysis of C41 requirements to support future contingencies resulted in increases to seven core TBM programs totalling \$140 million in FY94 and formed the baseline for the Air Force-wide C41 architecture now being developed by ACC, PACAF, USAFE, AMC, AFSOC and AFSPACECOM.

This effort, reviewed in September this year, will provide the architecture and program guidance for all AF MAJCOM command and control projects for the next 10 years.

Four key C41 programs originated and guided during the 1980s by Pastusek have become AF standard systems and represent key elements in this architecture.

The Wing Operations Management Information System evolved as the USAFE and then TAF Wing Command and Control System (WCCS) and is today being built as the AF WCCS.

Col. Pastusek's combat-proven fighter mission planning system recently supported a disaster relief airlift in the Soviet Union (Operation Provide Hope) and emergency rescue operations in Yugoslavia; the newest version will go on contract this fall as the AF Mission Support System (MSS).

The Sentinel Byte and Constant Source intelligence systems started as prototypes supporting F-111 operations at RAF Upper Heyford that are linked to the WCCS and MSS systems and installed as Sentinel Byte II in all operational commands. Col. Pastusek's Advanced Planning System evolved from the USAFE Force Level Planning System and has been installed as a core piece of the Contingency Tactical Air Control System Automated Planning System.

These are but a few examples of Pastusek's unceasing advocacy and forward thinking that greatly improved the Air Force's ability to plan direct, and assess compat operations, and will provide the development path for the future.

A retirement party at Langley AFB, inonored Col. Pastusek. It was attended by his parents, his brothers, Mike, and Ed and his wife, Mary of Fort Worth; his sisters. Fran and her son Ron of Keller, and Beity of Arlington. Another brother, Paul of Salt Lake City, Utah, was unable to attend.

Col. Pastusek and his wife, the former Judith Smith of Colorado Springs, Colo., reside in Hampton, Va. He now has a government contract with Sweden and one with the United States as a consultant for some of their military actions.

Col. Pastusek is a 1967 graduate of the U. S. Air Force Academy and holds a Bachelor of Science degree in Engineering Science. He completed Squadron Officer School at Maxwell AFB. Alabama in 1974, and the Marine Command and Staff Course by correspondence in 1982.

Col. Pastusek was commissioned June 7, 1967 and was a distinguished graduate of the USAF undergraduate and radar navigator/bombardier training programs in 1968-69 at Mather AFR Calif.

His first assignment was to the 33rd Tactical Fighter Wing, Eglin AFB Fl., as an F-4 weapon system operator. While there, he flew almost

1000 hours as an operational and test and evaluation crew member in the F-4C, D, and E aircraft.

In 1970 Pastusek moved to Macdill AFB, Fla., to train and equip the 43rd Tactical Fighter Squadron for movement to Elmendorf AFB Ak. He moved with the unit in June 1970, and completed three years as an instructor weapon system officer flying air defense for the Alaska NORAD Region from Elmendorf and three remote operating bases.

He moved to Osan AB, Korea in 1973, where he served 18 months as Executive Officer and Aide to the Commander, US Air Forces Korea and 314th Air Division.

Pastusek then moved to the 27th Tactical Fighter Wing and began flying the F-111D at Cannon AFB N.M. in 1974. While there, he served as a flight commander in the 522nd Tactical Fighter Squadron, wing standardization/evaluation flight examiner, plans officer and executive officer to the wing commander.

He planned and directed several operational expansions of F-111D capability, including the first CGNUS and first overseas deployments of the aircraft, and highly successful participation in Strategic Air Command's worldwide bombing competition in 1976 and 1978.

In 1978, Col. Pastusek started the first of two consecutive staff tours at the Pentagon. His initial assignment was to the Fighter Force requirements Division (AF/X0XFT) where he developed concepts for the advanced tactical fighter (now F-22) and requirements for night attack (now LANTIRN) systems.

He successfully defended attempts to retire the F-111D aircraft and developed requirements for airdelivered area attack munitions.

In 1980 Pastusek moved to the Force Planning and Programming Division of the Joint Staff (JCS/J-5), where he was the principle author for the Joint Strategic Capabilities Plan (JSCP) from 1980 through 1983, and the supporting analysis to the Joint Strategic Planning Document (JSPOSA) in 1983.

Returning to operational flying duty in 1984 in the 48th Tactical Fighter Wing's F-111Fs at RAF Lakenheath UK, he served principally as the wing's contingency mission director and the director of offensive

operations.

There he developed operational and mission execution plans to meet NATO and US contingency tasking, including the Operation El Dorado Canyon mission to Libya in 1986.

In 1987 Col. Pastusek moved to Ramstein AB Germany as deputy director of fighter operations for the United States Air Forces Europe Subsequently he served as USAFE deputy director of operational requirements and director of combat employment from October 1988 through September 1990.

It was in this capacity he served as the Director of the USAFE Battle Staff during the build up and deployment of USAFE and TAC forces to Southwest Asia for Operation Desert Shield.

### IN THE MILITARY

DUERSON IN TASK FORCE

Petty Officer 1st Class Ronald G. Duerson is currently with Commander, Naval Station, Roosevelt Roads, Puerto Rico and is midway through a six-month deployment to the Caribbean and South America.

He is participating in UNITAS, a multinational exercise that brings together ships' aircraft and ground forces of the U.S. Atlantic Fleet, Brazil, Argentina, Chile, Colombia, Ecuador, Paraguay, Uruguay and Venezuela, under the command of the Commander, South Atlantic Force.

Held since 1960, UNITAS involves

a series of combined nava! warfare exercises designed to improve the interoperability of U.S. and South American forces at sea.

The four U.S. Navy ships assigned to the Task Force will train with each of the eight South American navies and air forces while traveling clockwise around the southern continent.

The exercise involves more than 15,000 service members from the nine countries.

Duerson, son of Mr. and Mrs. Donald L. Duerson of Iowa Park, will also visit 19 port cities during the exercise.

### Lions shut out Hawks, 44-0

805 W. Highway

An inadvertent whistle by an official led to Iowa Park's being shut out, 44-0, at

With slightly less than 30 seconds left on the scoreboard clock, quarterback Tony Lozipone completely faked out the Lion defense -- and officials -- and was well on his way to a 56-yard touchdown, when the play was called dead by an official's whistle.

Hawk fans, players and coaching staff loudly protested. But the Hawks were given only a three-yard gain, to the point where the official had thought the runner had been tackled. That left by 20 seconds on the clock, enough for one more play.

Ironically, Lee Grace, a member of the Wichita Falls Chapter of the Southwest Football Officials Association, wrote on that very subject in his column in the Wichita Falls newspaper only the day before.

"Probably the worst mistake an official can make is an early or 'inadvertent' whistle. This is especially true when the play could have resulted in a touchdown," Grace wrote.

KEN COOPER SNAGS PASS

CHAD THOMPSON BRINGS DOWN VERNON'S WILLIE CHERRY

Vernon, the club that has dominated Dist. 4-AAA play the past several years and is ranked second among AAA teams across the state, completely dominated the game.

Led by 215-pound runningback Dexter Butler, the Lion ground corps amassed 263 yards rushing. To that was added another 127 yards via the airways, for an evening's total offense of 390 yards.

The Lions built up a 37-0 lead before halftime, scoring two touchdowns in the first quarter and three more in the second. Added to those was a safety, when the ball was snapped over the head of punter Lozipone and into the end zone.

Coach Leo Brittain played mostly reserves through the second half, during which only one touchdown was scored.

Iowa Park was shorthanded, going into the game.

Quarterback Jason Miller and tight end Mark Tatum were both held out of play, recovering from injuries sustained in the Memphis game.

Then, two main runningbacks, Mark de la Rosa and Chris Williams, were sidelined. Williams twisted an ankle in the game, and de la Rosa was withheld, apparently to prevent any further damage to a

knee that received surgery during the sum-

Consequently, playing mostly backup players in the backfield, against one of the toughest defenses in all of northern Texas, Iowa Park had only 48 net yards rushing and 79 passing for 127 total yards.

Lozipone completed five of 12 pass attempts, two to Michael Frazier for 41 yards, two to Stan Tigrett for 12 and one to Williams for 26.

Though he was called upon to carry the ball only four times in the first quarter and once in the third, de la Rosa was Iowa Park's leading rusher, with 14 net yards.

Big defensive plays were registered by two Hawk linemen. Jason Dudley covered a Lion fumble and Scott McNeely intercepted an attempted extra point pass.

# The power (and the cost) of public perception

EDITOR'S NOTE: This article is being reproduced from the August, 1992 issue of the Texas Municipal League's Texas Town & Country magazine. It was written by Frank J. Sturzl, executive director of TML.)

On April 6, 1984, the United States General Accounting Office (GAO) released a report entitled, "Cost-Benefit Analysis Can Be Used in Assessing Environmental Regulations, Despite Limitations." That report was apparently prompted by a growing concern about the costs of environmental regulations and the desire to subject those regulations to some form of cost-benefit analysis.

When the GEO report was issued in 1984, the nation was spending \$70 million annually on environmental protection, and those costs were increasing rapidly. The GAO, concerned about this high and growing level of expenditures, reached the following conclusions:

1. although major gaps in data make it difficult to calculate the costs and benefits of environmental programs, such cost-benefit analysis can -- and should -- provide useful information.

2. since some federal laws (the Clean Air Act and the Clean Water Act are examples) prohibit or limit the use of cost-benefit analysis in environmental rule-making, the Congress should re-examine those restrictions and should consider easing or eliminating them.

3. the Environmental Protection Agency (EPA) should perform costbenefit analysis of environmental regulations and transmit them for information purposes to Congress.

The bottom line in this 1984 report was this: even though some federal environmental laws prohibit the use of cost-benefit analysis for environmental rule-making, those analyses can and should be performed and given to policy makers. These were hardly radical recommendations, yet they fell on deaf ears, and Congress and the EPA continued to make environmental policy without the slightest idea of the relationship between costs and benefits.

By 1987, total annual spending on environmental programs had increased from \$70 million to more than \$85 billion, and even the EPA was becoming concerned. That year, the EPA released a document entitled, "Unfinished Business: A Comparative Assessment of Environmental Problems." It was the EPA's first major attempt to assess the relative risks of various environmental "problems" and to suggest spending priorities.

That 1987 report promptly went on the shelf and was largely ignored until September 1990. By that time, annual spending on environmental programs had increased to more than \$100 billion, and the EPA released a new report entitled, "Reducing Risk: Setting Priorities and Strategies for Environmental Protection." That study ranked various environmental risks into high, medium, and low risk categories. The report concluded that for the national ecology and human welfare the high-risk problems are:

1 habitat alteration and destruc-

species extinction and loss of biological diversity,

3. ozone depletion, and

global climate change.
 Relatively minimum-risk programmer.

Relatively minimum-risk problems identified in the report included nutrients and other pollutants in surface water; low-risk problems included oil spills, groundwater pollution, runoff to surface waters, and thermal pollution.

In summary, this groundbreaking EPA study, for the first time ever, pointed out an ugly little secret: the nation was spending billions of dollars on relatively low-risk problems and was spending far less on high-risk problems.

When EPA finished its 1987 study, it instructed each EPA region to perform similar risk assessment studies. EPA Region 6, a five-state region which includes Texas, concluded that for the region as a whole the high-risk problems include:

1. pesticides,

2. indoor radon (a naturally occurring radioactive gas which can seep into

3. indoor air pollution, and

4. ozone depletion.

Even more important than the highrisk findings were these results: municipal wastewater was found to be a medium-low risk and municipal solid

EDITOR'S NOTE: This article is being reproduced from the August, 1992 problem. waste was categorized as a low risk problem.

The EPA studies clearly demonstrated that risk assessments can be done and can be used to guide spending decisions. Despite these facts, the risk assessments have not been used; they have, rather, been ignored by policy makers and by the mass media and have been rendered useless.

Why have these studies been useless? Is it because they are based on bad logic or bad scientific analysis? Is it because environmental policy can't be subjected to priority-setting?

The answer is a bit more complicated. These risk assessments are useless because of two great gaps in our policy making process: two great disconnections which stand in the way of sound, reason-based environmental policy and effective spending on environmental priorities.

#### **Perception Versus Reality**

The first great gap is the gap between public perception and scientific fact. The EPA risk assessment studies described above each recognized this gap. Each study commented on the great differences between the scientific assessment of risk and the public perception of risk. Here's what the U.S. EPA study said:

... the remaining and emerging environmental risks considered most serious by the general public are different from those considered most serious by the technical professionals charged with reducing environmental risk. This dichotomy between public perceptions and the professional understanding of environmental risks presents an enormous challenge . . . Since public concerns tend to drive national legislation, federal environmental laws are more reflective of public perceptions of risk than of scientific understanding of risk. Consequently, EPA's budget and staff resources tend to be directed at those environmental problems perceived to be the most serious by the general public . . . Yet if national resources are to be used most effectively to promote environmental quality, then such resources must be aimed at those environmental problems that pose the greatest risk.

Nothing could be stated more clearly. Even EPA has admitted that the greatest amount of money is being spent on the smallest problems because the process is driven by public perception and not by facts.

EPA Region 6 went even further and actually calculated the amount of money being spent on perceived risks as opposed to real risks. Here are those startling statistics:

\* less than five percent of the region's cost of full-time employees and contact or grant dollars is committed to the ecological problems ranked in the highest categories.

\* seven percent is committed to the human health problems in the highest risk categories.

\* 90 percent of the region's resources are utilized to address problems in the moderately low or lowest risk categories.

Again, nothing could be more clear: massive amounts of money are being spent on risks which are perceived to be great, but really aren't, while little is spent on problems which are in fact significant but aren't perceived to be.

What creates and perpetuates this great gap between perception and reality? Prominent among the creators of this gap are irresponsible environmental groups and the know-nothing panic mongers in the mass media.

### **Authority Versus Obligation**

The second great gap which precludes the development policy is the gap between the authority to make rules and the obligation to pay for them. As long as one level of government can create environmental programs and require a "lower" level of government to raise the necessary revenue, there will continue to be no connection at all between need and allocation of resources.

The mechanism through which one level of government sets policy and requires another level to pay for that policy is, of course, the "unfounded mandate." (Note: the issue of unfounded mandates has figured prominently in the pages of this magazine during the past year. Please see "A Necessary Heresy," July 1991; "The Tyranny of Environmental Mandates," September 1991; "The Public's View of Mandates," November 1991; "Small Cities' Cor-

ner," March 1992; and "TML Survey: Cities Struggle to Keep Up With Environmental Costs," March 1992.)

Examples of unfounded mandates are everywhere. The Clean Water Act is a federal unfunded mandate paid for with city-generated revenue. The Resource Conservation and Recovery Act is a federal unfunded mandate paid for with (you guessed it) city-generated revenue. The Texas Water Quality Standards, to the extent they are more stringent than Clean Water Act requirements (and they are), represent a state-imposed unfunded mandate paid for with city-generated revenue.

If small amounts of money were at stake, the issue wouldn't be worth discussing. But the unfortunate fact is that immense amounts of revenue are involved. The EPA estimates that total public sector spending on environmental quality between 1992 and 2000 will be \$466 billion nationwide, and that the local government share will be 87.3 percent or \$407 billion.

These are very conservative estimates, according to EPA, because they are based only on current federal programs and are expressed in constant

Since the Texas population is 6.7 percent of the total U.S. population, it is not unreasonable to assume that local governments in Texas will pay roughly 6.7 percent of the total, nationwide, local government costs. That means that between now and the year 2000, local governments in Texas will be forced to generate more than \$27 billion to pay for unfunded environmental mandates.

During the same period that local costs will soar, the cost to the federal government (from whence most unfunded environmental mandates emanate) will shrink from \$4.3 billion (9.6 percent of the total) in 1992, to \$4.07 billion (7.6 percent of the total) in 2000

The casual observer may very well wonder why it makes any difference which level of government pays for environmental mandates, since all public revenue comes from individual rate-payers and taxpayers anyway. Why does it matter whether those individuals pay a local government, the state government, or the federal government? In short, why do unfunded mandates matter?

They matter a great deal, for the following reasons.

1. Unfunded mandates result in increased spending. When the federal or state government can create programs and require cities to pay for them, total program costs will be higher than they would be if the federal and state governments had to pay for their own programs.

As the federal government decided to pay less and less of total environmental quality costs, it felt perfectly at liberty to create larger and more extensive programs for cities to pay for. There is a strong, inverse correlation between:
(1) federal spending on the environment, and (2) total environmental costs. That is, as federal spending goes down, total costs go up! It is not unreasonable to conclude that this is a cause-and-effect relationship. Those who don't have to pay, don't worry about details like the

On the other hand, there is a strong, positive correlation (almost a one-to-one relationship) between total costs and the percentage paid by cities. As the federal government decided to spend less, Congress threw caution to the wind, created costly programs, and forced cities to pay an ever-larger share.

The simple, unvarnished truth is that if you could force your neighbor to pay for your decisions, you would live a fine life, indeed.

2. Unfunded mandates direct spending to the wrong programs. As the first section of this article makes clear, environmental spending is directed to the wrong programs. It's easy to see why. When federal and state policy makers can get political credit for creating programs addressed to perceived needs and never have to pay for them, they aren't likely to care if the programs make any sense.

On the other hand, if federal and state policy makers had to generate the revenue for each program they create, risk assessments and cost-benefit analysis and scientific facts would undoubtedly matter a great deal more.

3. Cities have access to fewer revenue sources. A growing percentage of environmental costs are being loaded on the backs of cities, the level of

government least able to raise the required revenue. Both the federal government and the state government have access to a wide variety of revenue sources not available to cities.

When cities are forced to pay for unfunded environmental programs, they have virtually no alternatives except to increase property taxes or utility fees, even if those two funding mechanisms aren't equitable, efficient, or effective for the environmental program in question.

4. Municipal capacity to raise revenue has been restricted. Ironically -- and tragically -- the cities' capacity to raise the revenue necessary to pay for environmental mandates has been restricted by the same levels of government which impose the mandates in the first place.

In addition to cutting aid to cities, the federal government, as a result of several federal tax laws, has created all manner of havoc in the municipal bond market. To make matters worse, Washington has found a number of ways -- including the craconian Social Security and Medicare tax measures -- to actually tax cities as if they were taxable entities.

The State of Texas has also done its share to limit municipal revenue. Over the years, the legislature has enacted a large number of property tax exemptions and has subjected property tax rates to rollback petitions. Most recently, the legislature undertook the "great bank franchise robbery" and decided to keep for itself millions of dollars in annual bank franchise tax revenues which had previously been paid to cities.

Unfunded mandates destroy local priority-setting. It is obvious that every dollar a city must spend on mandates is a dollar that can't be spent on local needs.

Separation of policy making authority and revenue-generating responsibilities is a fundamental flaw in American federalism. Risk assessments, cost-benefit analysis, and priority-setting will not matter one whit until that flaw is corrected.

### Conclusion

Today, public sector spending (state, federal, and local) on environmental quality totals \$114 billion in non-inflated 1988 dollars, a 63 percent increase since 1984. At some point, it seems clear, ratepayers will object to those costs and will demand that they be justified. When that backlash comes, we will have absolutely no assurance that the real environmental problems -as opposed to the perceived problems -- have been addressed. We will lack that assurance not because we are unable to perform risk assessments, but because we are unable to use them. And we are unable to use them because of the critical flaws, described above, in our policy

Unless we believe that there is an unlimited amount of public revenue with which to fund environmental programs (and it is doubtful that anyone believes that), then we are forced to conclude that our finite public resources must be addressed to real problems. There is today virtually no evidence that we are doing that; there is ample evidence that we aren't.

What can we do? There are several important steps.

1. City officials must educate the public. The tyranny of unfunded mandates will not be addressed until the rate-paying public gets mad about it, and rate-payers won't get mad until they are informed. City officials must inform them.

How? Steal parts of this article and write an editorial for your local newspaper. Talk about the issue when you address local groups. You may even want to reformat your utility bills to reflect the cost of federal and state environmental mandates as a separate line item, or you may want to develop a bill-stuffer to inform rate-payers about unfunded mandates.

2. As a society, we must focus on real problems. We must do this regardless of what strident environmental groups say and regardless of the reluctance of the mass media to deal with the real issue.

3. We must have the courage to insist that the level of government which creates a program must raise the revenue to pay for it. It is likely that the league's 1993 legislative program will address this issue.

We live in a state which has urgent and obvious needs: education, the war

on crime, health care, and many others. Yet we are spending billions of dollars on low-risk environmental "problems," and the public isn't aware of it. There is obviously something wrong with that,

and it must be fixed. It would be wrong to ignore serious environmental problems, but it would be equally wrong to let environmental spending continue to escape our scrutiny.

### Williamson is bronze award winner

Clay Williamson has been named a bronze award winner in competition for the national FFA cereal grain proficiency award.

He is the son of Mr. and Mrs. John Williamson Jr. and a member of the Iowa Park FFA Chapter.

He became eligible for the award when he won the \$100 state award in the event. It is among 29 agricultural proficiency awards presented annually at local, state, regional and national lev-

This year's national finalist was Quentin Burdick of Ekalaka, Mont., who will receive a plaque, a check for \$250 and partially-paid travel expenses to the national FFA convention in Kansas City, Mo. in November.

At the convention, Burdick will compete against three other national finalists in the cereal grain proficiency award area selected from each of the FFA regions.

### **Junior Hawks** split with Hares

The Seventh Grade Hawks defeated Bowie 37-6 Tuesday night, but the Eighth Grade was edged 22-12.

Brandon Brown scored four times for the Seventh Grade, Chad Wright once, Todd Yeager had a pair of twopoint conversions and Brandy Holley kicked an extra point.

In the Eighth Grade contest, Nick Black ran for one TD and threw a pass ss ss ss ss ss to Matt Rose for the other.

Four games are scheduled next Tuesday against Breckenridge, two here and two there.

The Seventh A and B teams are to travel to Breckenridge, while Eighth Grade A and B teams will be playing in Hawk Stadium. First games are to begin at 5 p.m.

The Pee Wee Hawks have dropped their last two games. They lost 32-0 to Holliday Oct. 3, and 30-0 to Sheppard last Saturday, and now stand at 3-2 for

The Midgets defeated Holliday by a 14-6 margin on Oct. 3, but lost 12-0 Saturday to Sheppard, and stand at 4-1 for the season.

No, that 44-0 loss Friday at Vernon didn't set a modern-day record, by any means. The record is 54-0 to Rider, back in 1974. Some other miserable memories include: 56-6, Rider, '76; 51-8, Brownwood, '76; 50-0, Graham, '76; 42-0, Vernon, '83; 35-0, Lawton, '76; and in 1977, Brownwood 49-0, Vernon 40-0, Stephenville 39-0, Burkburnett 35-0, and Lawton 31-0.

Graham plays at Breckenridge tomorrow night, and this will be the 47th meeting between the Steers and Buckaroos. They first played in 1922, the first year of the University Interscholastic League, and are the only two schools that played that year still competing against each other. Breckenridge holds a 32-11-3 advantage over the years.

SS SS SS SS

Both the Hawk Junior Varsity and Freshman teams lost last week to Vernon, 28-8 and 7-0, respectively. Today they travel to Bowie, where the Frosh are to kick off at 5 p.m.

Helpful Facts

The City of Iowa Park offers a \$250 reward for information leading to the arrest and conviction of any person committing arson within the city limits.

### Runners earn medals fifth Saturday in a cross country meet at Archer City.

### **Election Sunday** for Little League

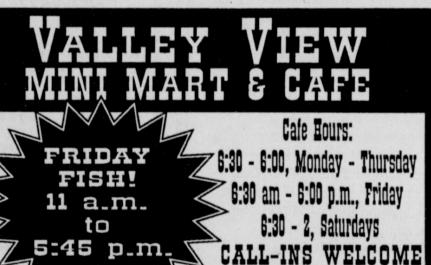

Election of officers and 20 board members will be held when at a meeting of the Little League Baseball Sunday. The meeting will begin at 3:30 p.m.,

and will be held at the Iowa Park Recreational Activities Center.

Anyone interested in the local program is eligible to vote, and encouraged by League officials to attend.

Also, all coaches and prospective coaches are encouraged to attend.

Lori Spruiell was eighth and earned a medal in junior varsity competition.

Wendy Bridwell, competing against 90 runners from junior highs, finished in 27th place.

In boys' competition, Mark Childs finished in fifth place and earned a medal.

The team has one more meet, Oct. 17 at Ponder, before the Dist. 4-AAA championships at Breckenridge on Oct. 26, according to John Hoelter, coach.

### **KEY REALTY WELCOMES ROBERT NOLEN**

Key Realty welcomes Robert Nolen as he joins the staff of professional real estate agents.

Robert is a lifetime resident of Wichita Falls and lowa Park and resides in lowa Park at present with

his wife, Mary Ann. They have two sons, Dr. Robert Jr. of Flower Mound, and Jeff of Wichita Falls, and are the proud grandparents of a precious granddaughter,

Lexie Elise. Although Robert is a rookie in real estate, he is already making his mark in the Wichita Falls and surrounding area real estate community. Since joining Key Realty in July, he has been very active and has 5 closed transactions to his credit.

Robert's background of 34 years working with people and providing them a service gives him an upper edge. Robert was associated with Crawford Painting and Drywall as an estimator and supervisor from 1958 to 1985. In 1985, he became Owner/Partner of Crawford Drywall Co. Inc. During that time Robert was involved in building commercial offices and hospitals in Texas, Oklahoma, Louisiana, and New Mexico.

Robert doesn't mind the long hours associated with a Real Estate Career and is prepared to spend whatever time necessary to provide good service to his customers.

Whether you are in the market to purchase a home, have one to sell or wish to know more about the Real Estate market activity, give Robert a call. He'll be glad to be of service to you.

#### Halloween Safety Program

IOWA PARK

Thursday, Oct. 29, the RAC and Tom Burnett Library will be co-hosting a Halloween Safety Program featuring Artie Woods and McGruff of the Wichita County Sheriff's Depart-

This will be a free program open to all children. You are invited to join us at the RAC, 806 N. 3rd, beginning at 3:30 p.m. If you have any questions, please call Ardis Jensen at the Library, 592-4981, or Jo Lynn Cockrum at the RAC, 592-4471.

#### Country-Western Dance

The C&W Dance held at the RAC last week was a lot of fun. Thanks to all of you who attended. We hope you will join us for a dance each month.

Special thanks are extended to Gerri Thurlo for all of her time and efforts in coordinating the dance for

If you would like to see a monthly dance held at the RAC, please let us know by attending or by calling the RAC Office to offer sug-

#### **Bridge Results**

With three tables in play this week, Beatrice Mayfield held the high score of 3900. Frank Mayfield had the second high score of 3530.

The Bridge Club meets each Monday afternoon at 1 p.m. RAC membership is required to play. If you would like to join, please feel free to come on Monday, or call the office and your name can be added to the Club Roster.

#### **New Activities**

There are several new activities going on at the RAC, including various interests and age levels.

Some of those activities included are dominoes on Tuesday afternoons, after school activity hour on Wednesday afternoons, kids bingo on Thursday morning and afternoon, and calligraphy classes on Thursday evenings.

If you would like more information on these or any other activities, please call the RAC office at 592-

#### Remember

Please note that it is time to renew your RAC membership. Single memberships are available for \$4 per year. Family or daycare memberships are available for \$12 per year. If you have not yet renewed your membership, please do so during the month of October.

Great Things are happening at your RAC, Join the Fun!

### Holliday school board meets

Holliday school trustees approved a recommendation to apply for a waiver for third grade classes.

The decision was reached when the board met Monday evening.

The state madates a limit of 22 pupils per classroom in grades kindergarten through fourth.

However, Holliday, with three classrooms available for the third grade, now has 72. "We even remodeled the teacher's lounge to create another classroom for this year," commented Supt. Dan Owen.

The board is expected to confirm appointments to a building committee in the near future. Holliday schools have a five percent increase in enrollment, and had a similar increase last year.

"All sections are pretty well at the limit in elementary," Owen said.

A public hearing was held on the district's academic excellence indicator, a report card for campuses.

In other business, a textbook committee was selected to contain four elementary, six middle school and seven high school faculty representatives; a contract for the Archer County Appraisal District to collect taxes another year was approved, a bid of \$11,200 from Murphy Chevrolet for a new drivers education car was approved, and board president Mike Birdwell reported on the TASA convention.
