Had the Americans been in a position to follow up their advantage and keep right after the flying rebels, disorgan-ized as they were by that first unexpected advance, there is no doubt that the question of supremacy would have been settled by this time once and for all time. Unfortunately, however, large armies, such as that of the Eighth corps, are not self-supporting, and no provisions had been made for such an emergency as arose on the night of February 4, it became necessary to call halt at the very outset of what prom-Disastrous in Many Ways.

While this was unavoidable, it was disastrous in many ways. Firstly, because the moment the halt was made eradicated from the minds of the rebels, since it gave them time to both recover from their fright and to frame excuses for their failure to avoid it secondly, it afforded an opportunity which their leaders were quick to take —advantage of, to play upon the feelings of the majority and enlist the sympathies of thousands who had carefully refrained from joining the rabble in their ill-advised demands; thirdly, it allowed the rebels to rally their scattered forces, and after concentrating them in various places, to infuse new blood into their ranks. As soon as it dawned upon them that the Americans were still on the defensive and no further advance was to be feared the rebels again assumed the aggressive adopting the same bushwhacking tac tics which had proved so successful against their old enemy, the Spaniards. At first these were almost harmless since they almost invariably brought on a fresh advance on the part of those whom they were intended to intimidate A Galling Situation.

After the battle of Caloocan, however, when the American line was so long and thin that any further general advance became inexpedient, the rebels made a discovery which revolutionized their plans and inspired them with renewed courage. This was that their rifles had a superior range to those of the majority of the American weapons. Thereafter their sharpshooters carefully remained out of range of the Springfields carried by the volunteer regiments in front of them, but maintained a constant and more or less effective fire from trees, clumps of bamboo, rocks or other natural points of which the Americans have been placed for the past few weeks it would be difficult to imagine. Constantly potted at by an unseen foe, yet unable to silence his fire except upon such rare occasions as when the country was occasions as when the country was clear and then compelled to retire to their original lines after having done it, the wonder is that the men were kept in check at all. Forty Thousand Volunteers Are to Be Mustered Out.

Washington, April 6.—All the troops which are to return to the United tates for muster out are expected to States for muster out are expected to return before May 1. About 13,000 returned in March and it is expected that 25,000 more will arrive during the present month. Every precaution is being ent month. Every precaution is being taken by the war department and the marine hospital service to prevent the introduction of infection from these troops. Up to April 1 the regulations of the treasury department required the disinfection of the baggage of the troops, and over 1,000 tons of baggage were disinfected during March. Since April 1, in addition to the disinfection of baggage, the detention of all troops baggage, the detention of all troops r examination has been demanded by marine hospital. The period of de tention is from three to six days. provide for the camping of the toops during the period of detention, the co-operation of the quartermaster general, the surgeon general and the marine hospital service and General Brooke in Havana was necessary, and a thorough understanding has been reached by these officers as to the course to be puried. Not every quarantine station has facilities for accommodating a regi-ment or more of troops. Those that have been and are now being actually used for this purpose are the United States stations at Dry Tortugas, Blackpoard station, off the coast of Georgia, and Egmont Key station, near the Flor-ida state quarantine at Mullet Key. The when disembarked, are required to pitch their tents. This sunning and airing of the tents is considered suffient, but if the tents are not pitched they are disinfected. Orders have been issued to General Brooke not to permit any bedding or mattresses to come with the troops. The baggage of men and officers is disinfected under the diand officers is disintered under the direct supervision of the marine hospital officers at each port. As a further measure of co-operation, General Brooke is required to notify the war department in advance of the proposed sailing of each ship and its destination is deter-mined here after consultation with the surgeon general, who decides to which quarantine station it shall go. This will effectually prevent confusion and over-crowding. Most of the troops thus far have been landed at Savanah, where aging the troops is performed by the marine hospital surgeons and Colonel Ballinger of the quartermaster's de-partment. The latter has done especially efficient work. Today he reported that the Daufuski island, six miles from Savannah, offered exceptional advantages for detention camps. It is ca-pable of accommodating six regiments

The facts were communicated to the authorities here immediately and upon the officer's ar-rival at Tampa he was met with or-ders from the war department to return with his baggage to the quarantine sta-tion and remain there until discharged with his baggage to the quarantine sta-tion and remain there until discharged by the quarantine authorities. The mustering out of the troops will, in many cases, take place at the detention camps, in order to prevent delay. The yellow fever situation in Cuba is said to be very much better than it usually is at this time of the year. There are a few cases at yarious points, which is as few cases at various points, which is to be expected, as Cuba is never entire-ly free from sporadic cases, but at no point is there as yet anything ap-proaching an epidemic.

His Purpose Is to Solidify the Cuban People Into a Party that Shall Without Ceasing Urge the United States to Withdraw from the Island-He May Become a Source of Disturbance.

Havana, April 6.-The Cuban military assembly being dead, General Maximo Gomez will take up his programme of solidifying the Cuban people into a party that shall, without ceasing, urge the United States to withdraw from the island. His purpose is to make the people seem to have but one emotion, one desire—the thought of independence and absolute separation from the Unit-

General Gomez considers the dissolution of the assembly as his personal achievement, aided by the Military administration here and countenanced at Washington. He believes that he em-erges from the controversy with the assembly stronger than ever with the better classes. His theory is that the Cubans who before thought him merely an adroit guerrilla chief are now pre-pared to regard him as a political leader, and that a few days more probably him in name general-in-chief of the army.

Conference of Officers. Yesterday the Cuban general, Pedro Diaz, who commands in the province of Pinar del Rio, invited several generals and brigade commanders who are friendly to Gomez to a conference regarding the latter's future course. As many who were invited were some distance away from Havana and could not arrive here in time for the meeting there were only a few actually present, but the possibility of reinstating Go-mez as commander-in-chief was informally discussed, with the result that little or no opposition to the proposi-tion developed. In order to get a more general expression of opinion, it was decided to defer the formal meeting until tomorrow morning. No other candidate is possible, and if any such acn is attempted it will undoubtedly be carried through.

Harmful Agitation. General Gomez, if reinstated, would be of great service to the United States institutions; it is not our duty to deny keeping up of agitation and disturbance producing the impression that every-thing done by the Americans is temporary and may sooner or later be over-turned. American observers consider any such agitation as extremely harmful to the industrial revival and the restoration of Cuban credit. Some who are high in authtority and who have extended to the Filipinos as she surrendered ceptional opportunities of knowing the character and ideas of Gomez think the trouble with him yet. His attitude has always been consistent regarding independence for Cuba and he is still working for the same end.

To Consolidate. The National Cuban party and the Liga Patriotica continue their cam-paigns for the formation of the party of Cuban independence. Efforts are now being made to effect a consolidation of the two movements. The principal difference between them seems to be that one wishes ward representatives in a national convention, to be chosen according to the number of yor. chosen according to the number of vot-ers in a ward, while the other insists which makes congresses. TWO LIVES LOST IN THE DESTRUC-TION OF WALLACE ANDREWS' RESIDENCE IN THE MILLION-AIRES' NEIGHBORHOOD.

New York, April 7.-A few minutes before 2 o'clock this (Friday) morning fire broke out in the five-story dwelling at No. 2 East 67th street, the home of Wallace Andrews, president of the New York Steam Heating company. The fire spread very rapidly and though the firemen made desperate efforts to get the inmates out of the house they were only partially successful for at least two lives were lost. The victims are believed to be Mrs. St. John, daughter of Mr. Andrews, who with her husband and several children lived with him, and Austin St. John, 10 years old, Mrs. Andrews' grandson. Several other members of the family were carried out

The house is in the very heart of the distict occupied by the homes of New York's richest millionaires. The house on the corner is occupied by H. O. Armour, the wealthy beef packer. The house at No. 4 is occupied by Mr. Rothschild. The firemen found it impossi-ble to save the Andrews house and devoted most of their energies to saving the Armour and Rothschild properties. Many times both were on fire but the vigilance of the firemen as often put the flames out.

In the form of a hollow square they advanced up a ravine. The South Dakota company was moved fur-ther to the left and company M was sent to the trenches with company H on their right. Captain Spicer was in charge of the first platoon and Lieutenant Goudy of the second. Then the Springs boys showed what they could do in the shape of volley firing. CHICAGO GRAIN.

So. Pac.

Chicago, April 6.-The wheat market as exceedingly nervous and uncertain. Milder weather and somewhat lower Liverpool cables caused some liquidation at the start and a consequent de line. The sellers were soon bailed out, nowever, and as soon as the selling ressure was removed the market had a rapid recovery on buying orders from traders who had further crop damage news from the country. May opened at 7234 down to 7256 and after rising to 73 without any wild stirring of the contending forces, the price shot suddenly up to 73%. It then receded to around 73 and then occurred a struggle among some large scaplers to see who could unload fastest. It then went to 72% for both May and July. Then a recovery set in that was about as sudden as the slump had been. Everything gave place to the influence of the shoals Co., Lim., Battle Creek, Mich., followed a line of experiments until he produced the food called Grape-Nuts, of which grape sugar forms the principal part, and it is produced by following out Nature's processes, in a mechanical way. The new food has a charming flavor and can be served instantly either cold with cream, or by pouring hot milk or cream over it, one has a hot mush at once.

Denver, April 6—George Gemmell was arrested here today on his own confession of having voted three times at Tuesday's election. He gave the names of five others who he said had voted sullegally and said they were hired by Jack Hall, a deputy sheriff.

Hall and Dan Hickey were arrested charged with conspiracy to commit election frauds. free offerings from the local talent

DEEPER WATER. Dominion Merchants Want the Wel-

land Canal Deepened. Montreal, April 6 All the shipping firms of Montreal have petitioned the Dominion government to deepen the narbor of Port Colborne, at the Lake end of the Welland canal, to a depth of 20 feet, placing it on an equality in this respect with Buffalo, which is the head of the competing Erie ca-

With the port thus deepened the large upper lake steamers, carrying 7,500 tons or more of freight, will be able to un-load directly on to vessels of 2,500 tons, which will be able to come through direct to Montreal when the St. Lawrence can as well be deepened to a uniform depth of 14 feet, as they will be by the middle of the present summer. At Montreal these steamers will deliver their freight to the ocean steamers, and thus grain will be brought from the Lake Superior ports to the ocean freighters at Montreal with but two transshipments in place of the half

With these improvements and modern elevators at Montreal they can capture a large part of the trade of the Eric canal. It is thought that the government will accede to the request, as it has closely identified itself with the problem of interior transportation and is pledged to spend millions in deepen-ing the harbors of the great lakes and improving the canals.

HUBER PROBABLY ALIVE.

He Was Taken Prisoner Before the Hostilities Commenced. Washington, April 6.-General Otis has

sent a dispatch to the adjutant general re-plying to inquiries made in regard to one Huber. Senator Perkins of California had informed the department that it was be-lieved that Huber had been killed by the insurgents. The reply of General Otis today says:
"Huber, hospital corps, insurgent pris-

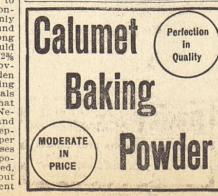

oner; passed beyond lines without permission seven days before hostilities commenced. Having camera and revolver. Was arrested near Malolos because armed and taking photographs. Was in civilian's clothes; claimed to be British seaman, was in fair health, February 10, when money furnished him with promise of more to fol-low. He and three other prisoners arrested before hostilities commenced were at Malolos ten days before capture of city. Believed that all are alive."

SERIOUSLY INJURED.

Workman in the Moon-Anchor Mine Caught by a Cave-In.

Special to the Gazette.
Cripple Creek, April 6.—At about 3 o'clock this afternoon John Fortin, a miner, was probably fatally injured at the Moon-Anchor mine. Fortin was employed by contractors and was en-gaged in timbering the sixth level of the mine when he was caught in another cave-in. Two of the unfortunate man's ribs were broken and it is feared that he has received internal injuries in addition to severe scalp wounds. He was emoved to the Sisters' hospital and at a late hour was resting easily. This is the second accident in almost the same spot within a very few days.

TELLER COUNTY BUSINESS.

CHEAP SUGAR.

The War Getting Lively Between the Orient and the Occident. San Francisco, April 6.—In order to meet the opposition of two firms which are selling the grocery trade sugar refined in Hong Kong, the sugar trust has cut the price of granulated sugar to 4 15-16 cents pound. This decrease has been more than met, and now, according to the Cronicle the trust has notified dealers that it will not sell any cube or other qualities of sugar to those who buy Oriental granu-lated. It is estimated that if there is no advance in present prices consumers of sugar will save over \$3,000,000 a year.

ST. LOUIS STOCK EXCHANGE. St. Louis, April 6.— Messrs. Charles Hodgman, William C. Little and Ben-Hodgman, William C. Little and Bennett Wasserman, a special committee appointed by the St. Louis Stock and Bond Brokers' association, today decided to act in accordance with a recommendation that a stock exchange be established in St. Louis. Arrangements were completed for the leasing of the building formerly occupied by the National Bank of the Republic. The exchange will be opened as soon as the change will be opened as soon as the building can be placed in order. Stocks and grain as quoted in all markets will be listed daily and St. Louis stocks will be quoted on all other exchanges.

Reading, Pa., April 6.—A fire which originated in the Hershey building, owned by Milton Hershey of Lancaster and occupied by the Lancaster Cara mel factory, of which he is the prietor, did over \$100,000 worth of dam age this morning. The flames spread rapidly and communicated with the building of Bard, Reber & Co., hardware dealers. The Hershey building was completely destroyed. Bard, Reber & Co. lose \$40,000 on their stock and their building is damaged to the ex-tent of \$10,000, partially insured. The

cause of the fire is not known.

Now that the election is over here is a story that will be enjoyed by all concerned. A Republican canvasser stopped at a certain house to ascertain how many voters there were in the family and how they stood politically. He was told that they were all Republicans, and at once expressed his satisfaction, and made some nice little remark to the effect that he presumed they would all turn out and assist in the election of Dr. Robinson.

An amused smile crossed the face of some story that will be enjoyed by all concerned. A Republican canvasser stopped at a certain house to ascertain how more than a machine. BACK FROM CALIFORNIA

The many friends in this city and elsewhere of Mrs. Charles G. Garrison, whose two charming young daughters are reckoned among the choice buds of the city, will be interested in the following clipping from a New York paper concerning Mrs. Garrison's husband. The paper says: Mr. S. N. Nye Returns from the Great State and Discourses Upon His Trip.

The paper says:

"Charles G. Garrison, for instance, who is now judge of the supreme court of New Jersey, began life as a doctor. He was a graduate of Princeton, had acquired a fashionable practice, and, besides living in comfort, had saved nearly \$8,000. By the time, however, that his future had become assured he had become to lose interest in his work. Fresh from the sunny lands bordering the Pacific, and bubbling over with good nature, Mr. S. N. Nye returned yesterday nearly \$8,000. By the time, however, that his future had become assured he had begun to lose interest in his work, and in the best of health and spirits. Mr. Lincoln J. "Soon afterward he took a country house at Merchantville, N. J., moved An amused smile crossed the face of the lady who was answering his questions as she replied: "Well," we're all good Republicans here, but we are not going to vote for Dr. Robinson this year."

This rather stunned the canvasser, and he at once proceeded to do a little campaign talking for the Republican candidate for mayor. He did not get yery far, however, for he was interrupted by the question:

"Soon afterward he took a country house at Merchantville, N. J., moved there with his wife and children and sented down to the study of law. He was a full-fledged barrister and opened an office at Camden, N. J. His clientele grew rapidly. He became prosperous, and within six years was seated upon the supreme bench. securing registration and bringing out the voters on election day. Then there is the employment of men who take the canvass, that is, they go around and find, as nearly as may be, exactly how each person is going to vote, what his circumstances are, and whether he is open to argument. Another source of expense is the workers whose business it is to talk to people and to present arguments in favor of this side or that. In the case of the more important elections are to be added rent for public halls, cost of music, processions and illuminations, printed matter of various kinds, etc. Some of these things seem to be as much a part of the machinery of election as the ballot boxes provided by the state, but others might be dispensed with to the general benefit. It would be difficult to do this, however, without a mutual agreement between the political parties. Each one is unwilling that the other should have the advantage, and it would be most certainly a great advantage if one should spend money in these ways and the military truism to libel the brave men of other should not. If the managers of his own commonwealth, he merely snatches the cap and bells from the head that no money should be spent for carriage hire, it might be a real benefit to possible to hide. the cause of good government, although it would be a difficult matter to an agreement.

What is needed more than anything else is the growth of a healthy public sentiment which will make untrammeled performance of civic duties more general than it is at present. If, for instance, every voter who is able to walk to the polls would resent the suggestion that a carriage be sent for his or her use, it would decrease the trouble of party managers to a considerable degree and tend directly towards the reduction of election expenses and incidentally towards good government.

a great deal to say regarding party policy and party candidates. Such influence is not necessarily bad, but it is dangerous.

In all that has gone before we have not referred at all to any use of money that is contrary to law or which is considered to be positively corrupt. We have spoken of the use of carriages in that when called to arms, he is ready for any place or duty. Away back in 1861, when General Butler was advancing through Virginia, his army came to where a railroad had been destroyed for a little distance and the locomotive disabled. ordered the road repaired, and called for volunteers who were machinists to examne and see if the locomotive could not be repaired. One man left the ranks, and go-ing to the locomotive, looked it over critically and said: "This is all right; I helped to make this locomotive," and it was soon ready to be fired up and in perfect running order. So we saw in Manila, when the first night attack came on, when there were no animals to haul the batteries, the lattery how for the time being les, the battery boys for the time being became animals and dragged the heavy guns through the swamp. The requirements of this country have made every man a thinker, so when an army is made up of American young men, every one is more or less a general when he goes into the ranks, and when the fight is on he is not a machine working under orders altogether. He is listening to the firing all around and is counting on the probabiliies of the fight as much as is the general in the rear. And still the American loves vital organs. But he fought at Manila peace better than war, and if the world just as at Santiago and Gettysburg. will let us alone, it need not be afraid of When he fell with his mortal wound

Kansas City Star. Advices from the Philippines foreshadow n early cessation of the war in those islands. The reflection will come to those who have lost friends and relatives in the struggle that the dawn of peace will not bring back those who have fallen in battle or perished by disease. That is true, but there can be no crusade, apparently, against wrong and injustice without each against wrong and injustice without some sacrifice. The campaign in the Philip-pines has cost lives that are more precious in the sight of those who have been be-reaved by war than all of the Filipinos. But that is, after all, a matter of personal feeling, which may be freely excused, in hose who have tasted of the grief which death and separation bring. It does not alter the principle involved, nor does it change the fact that the operations of humanity must be judged in the light of eventualities.

ANOTHER SERIOUS RUNAWAYYESTERDAY

Mrs. Charles Johnson and Her Daughter Were the Victims

RESULT FATALLY MAY

The Accident Occurred at 2 O'Clock the Lowell School House-The Ladies Jumped Just Before the Team Crashed Into a Tree - Another Lady Narrowly Escaped-One Horse was Knocked Senseless.

Another serious runaway that may have fatal results occurred in this city yesterday afternoon at 2 o'clock. The victims of the runaway were Mrs. Charles Johnson and her daughter, Miss Johnson. The latter lies almost at the point of death at the residence at 518 East Boulder street and the former is badly injured.

The accident occurred in the south part of the city, almost opposite the Lowell school on Nevada avenue. Mrs. Johnson and her daughter were driving into the city from Broadmoor. They were driving two horses, one a They were driving two horses, one a black and the other a gray. As they were driving under the railroad crossing just south of the Lowell school house the horses became frightened at a passing D. and R. G. train and started to run. They dashed up the hill at a great rate of speed and were heading directly for a tree. The ladies saw their peril and when the team was in front of the Lowell school house they jumped and a moment later the team crashed and a moment later the team crashed into the tree and the buggy was smashed into splinters.

Picked Up Unconscious. Mr. Fred Hastings and another gen tleman who witnessed the awful accident rushed to the assistance of the two ladies, who were lying motionless on the ground. Both ladies were unconscious and it was evident that they were both and It was evident that they were both badly injured. The elderly lady was re-vived sufficiently to tell where they lived and Mr. Hastings and the other gentleman drove the ladies to their home on East Boulder street.

Dr. Garnett was summoned and immediately responded. He examined the injuries of the ladies and found them very serious. Miss Johnson was suffering from concussion of the brain and was in a very precarious condition. Her mother was also badly injured, having suffered severe bruises about the hips, arms and shoulders. Dr. Garnett ad-ministered all the aid within his power to the ladies and relieved their suffer-ings as far as possible.

Horse Knocked Senseless.

In the meantime the horses continued their mad race into the city. Just before they crashed into the tree they

Men worked with the horse and revived it. The black horse continued its rush up the street and a few blocks further up turned over onto Tejon street and ran through the business part of the city, and was finally stopped above Kiowa street without doing any further.

damage.

Mrs. and Miss Johnson have recently come to this city from Missouri and are not very well known. Neighbors, however, have been very kind, 'and have' been assisting Dr. Garnett to their utmost ability. Last night both the injured ladies were still in a dangerous condition. Dr. Garnett was of the opinion that Mrs. Johnson might recover, but he was not able to judge of Miss Johnson's injuries and said he would not be able to tell their extent until this morning, when a thorough examination will be made. ination will be made.

GUNNISON COUNTY PROPERTY IS IN LITIGATION.

Victim Secures Verdict Against D. & R. G. Railroad-Two Attorneys who Wanted to "Scrap" Over a Case-Gandy vs. Cole and Small - Other Court

A suit which was brought on a change of venue from Arapahoe county, was filed in the county court yesterday. It is entitled John James vs. F. E. Robinson and Charles L. Zobrist and asks an accounting for certain mining property.

The plaintiff alleges that on June 20, 1895, e, in company with the defendants, took lease on the Little Earl and What-is-it claims, in the Tin Cup district, Gunnison county. The property is owned by Stephen H. Pease, E. B. Hepburn and the plaintiff. The plaintiff alleges that after taking the lease with the defendants they agreed that he should take charge and supervise the working of the property. before they crashed into the tree they came very near to running over a lady and a baby carriage. The lady attempted to enter a gate, but found it locked. She then turned into an alley that was handy and thus escaped, but those who saw it felt that both the lady and the baby in the carriage were doomed, for the infuriated animals lessees by Mary Landon of Tin Cup. It is further alleged that the lessees contributed as the same of \$2.59, representing the costs of a suit instituted against the lessees by Mary Landon of Tin Cup. of Camp Life - The Kansas and Utah Short Line Run by Armed Soldiers The Natives in Manila "Hole Up" in the Evening and Remain "Holed Up" All Night for Fear of the Guards.

An extremely interesting letter from Vernon S. Stires at Manila is published this morning. It is full of incidents of the life there and gives an idea of the work that the Colorado boys are doing. It is as follows:

The Letter. Manila, P. I., Feb. 27, 1899. Dear Parents and Brothers: I have just been down to see the Twentieth regulars, and they look like a regiment of rookies. Indeed, they say they have not many old vets aside from

ull of good cheer.

We have been on the firing line for 15 days and are now in quarters, so you see we do not have much time to write. We are on guard 24 hours and off 24 hours. When we are off duty we sleep or carry water, and withal it is very an older organization and added very materially to the pleasure of the every material to the pleasure of the every materia

The natives charged the outposts of the South Dakotas and we went over to their support. We were protected by entrenchments after we arrived, but the and we poured volley after volley into them. When we would rise up to fire well. the bullets would spat all around us. One struck the ground right in front of me. Finally the boys got reckless and stood up and poured the lead into them. We saw them carrying off their dead and wounded on their shoulders, but fortunately not one of our company was hit. The bullets tore up the entrenchment not farther than two feet from where I stood and threw clods on the first sergeant. Our pickets are within the enemy's lines and have orders to fire at anybody in advance, whether they are Filipinos or not, as everybody is expected to keep shy of these outposts. We conceal ourselves in the posts. We conceal ourselves in the posts. brush so the insurgents cannot see us and we can see them. They had built little forts under their houses that

for an emergency at any minute. Feb. 29.—Just came in from 24 hours' guard duty, and stood ten hours, which is two hours overtime, and I feel pretty sore. The company went to the firing line at 6 o'clock this morning and I will follow up at 3 p.m. We will support a battery of artillery and have charge of block house No. 7. Six of our boys went out to the Kansas firing line and were in a lively skirmish. They brought back five prisoners. They had to report to captain. The adjutant of the regiment saw them and knew where they had been. Their charge read something like this: "Desertion of camp without leave of the commanding officer." The major said: "Any other time I would have patted you on the back, but when you have orders to stay in

In the county court yesterday the suit of H. Wyman vs. A. S. Blake came up for trial. The former sues for \$125 damages alleged to have been sustained by alterations under the building which the former occupies. The case itself excited very little interest, but a lively fisticular between the attorneys interested came near culminating just outside the court room. Attorneys Musser and Lombard were the disputants and for a few monages. I would have patted you on the back, but when you have orders to stay in camp do not break orders."

Just had supper. We had a new cook and I thought I would founder. Mulli-gan and rice, milk, coffee with sugar; so I feel about first-class. We are going on the firing line tomorrow to stay to suit when you have orders to stay in camp do not break orders."

It is said the natives are getting short of ampunition, as they are firing lead bulammunition, as they are firing lead bul-lets out of their Mausers with no caslets out of their Mausers with he casings over them. That soon leads a Mauser, as they have such velocity and the caliber is small. A BIG SUCCESS

Y. M. C. A. EXHIBITION LAST NIGHT AT TEMPLE THEATER.

Good Audience Attended the Exhibition and Was Thoroughly Pleased With the Work Done-Results of Excellent Work by Director Van Arnam.

It was said at the time of the Y. M. they have not many old vets aside from their non-commissioned and officers. I talked with several who had been through the Cuban war. They said they were only in Cuba 29 days, while we have been here almost seven months and with very little prospects of going home at present writing.

We got mall on the Scandia. I received five letters and a whole host of papers, and I tell you it makes a soldier, and myself in particular, just fairly glow with enthusiasm; they are so full of good cheer.

It was said at the time of the Y. M. C. A. exhibition a year ago that Colorado Springs had not previously witnessed anything like such an exhibition of home talent along the line of physical culture and the same can be said today after the exhibition of last evening. Physical director Van Arnam of the Y. M. C. A. has labored hard and long on the features which were included in the programme last evening and the degree of applause which greeted each number would indicate that entire success had crowned his efforts.

INTENSE SUFFERING

From Dyspepsia and Stomach Trouble

Instantly Relieved and Permanently Cured by Stuart's Dyspepsia Tablets.

A New Discovery, but Not a Patent Medicine.

Dr. Redwell relates an interesting ac count of what he considers a remarkable cure of acute stomach trouble and chronidyspepsia by the use of the nevery, Stuart's Dyspepsia Tablets.

He says: "The patient was a man who had suffered to my knowledge, for years with dyspepsia. Everything he ate seemed to sour and create gases in the stom ach; he had pains like rheumatism in the back, shoulder blades and limbs, fullness and distress after eating, poor appetite and loss of flesh; the heart became af-fected, causing palpitation and sleeplessness at night.

I gave him powerful nerve tonics and blood remedies, but to no purpose. As an experiment I finally bought a fifty cent package of Stuart's Dyspepsia Tablets at a drug store and gave them to him. Almost immediate relief was given and after he had used four boxes he was to all ap-pearances, fully cured.

There was no more acidity or sour watery risings, no bloating after meals, the appetite was vigorous and he has gained etween 10 and 12 pounds in weight of solid, healthy flesh

MARKET LETTER

The Great Republic Mine. The International Investment com-pany's last market letter says, in part: "The writer of this letter remembers well that about two years ago he met Patsy Clark and H. L. Frank, the two Patsy Clark and H. L. Frank, the two chief owners of the old War Eagle company, of Rossland, B. C. We were all traveling together on the Short Line train out of Butte, and these gentlemen told us that they had a greater mine than the War Eagle, and on being asked what it was, stated that it was the Republic; which at that time was a prospect only four or five months old.

the Republic; which at that time was a prospect only four or five months old. The stock was then selling at between 7 and 10 cents. How right these gentlemen were is best understood when we state that that self-same stock that was selling then at 10 cents is now selling freely at \$3.50 per share, and that mine that two years ago was a little unknown prospect is now paying dividends at the rate of \$1,000 a day. That is what the management of the mine is is what the management of the mine is paying out now, but the mine itself is doing better than that; so much better, indeed, that the intention is to pay \$50,-000 a month from June onwards. "A mine like this is enough to make WILLIAM P. BONBRIGHT & CO.

gagement between a couple. It often happens that a family will desire an al-liance with another family with whom they are not intimately acquainted. Then are the services of the profes-sional match-maker invaluable. To be successful in such a profession one must never be known as such to the family the desires to court.

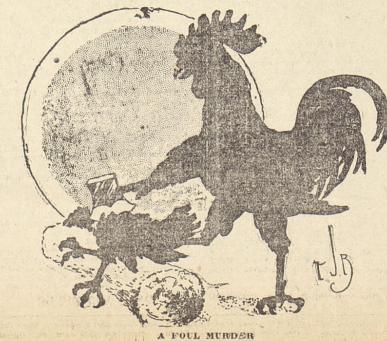

Very often nakodas and midwomen follow this profession for years and yet are not known as such save to those who have employed them. Most of the natch-makers are very honest, and it is their duty to discover all the good and bad points of the couple and point them out to the parents; they give good advice and do everything possible to promote the happiness of the pair. They

travel back and forth to the homes of the young people, who are entirely ig-norant of their motive, carrying compliments and presents and trying in a delicate manner to work on their seniment.-(Ladies' Home Journal. In Texas and Mexico, with flowers and birds to turn winter into summer.
