IT'S THE LAW
in Texas

WRONG SIGNATURE ON LEGAL PAPERS MAY COST TIME, MONEY

Should a married woman sign important documents with her own given name or use her husband's first name? Is "Junior" or "Senior" legally part of your name? Should you sign your middle name or initial? Is "Mr." or "Mrs." part of a legal signature? Lawyers find that people are often at a loss to know how to sign their names to legal documents. And, while signature discrepancies ultimately may be straightened out, the process can be expensive.

In legal effect, a name is used merely as one method of distinguishing one person from another. Under the Common Law, since very early times, a legal name has consisted of one Christian or given name, and one surname which is the family name. Generally, use of both names is necessary for legal identification.

The law does not pay too much attention to the middle name or initial. However, although the use of the middle name or initial is not required, it is wise to use it since it may be important for identification in some cases.

According to attorneys, married women have more difficulty with their signatures than most

other people. When a girl marries she, of course, takes her husband's surname. Thus Mary Lou Jones legally becomes Mary Lou Brown when she marries James E. Brown. But, in practice, she usually does not stop there—she uses his full name as her own, signing herself as Mrs. James E. Brown, instead of Mary L. Brown (or Mary Lou Brown) which is correct.

Can this apparently minor error in Mrs. Brown's signature cause any trouble? Let us assume that the Browns decide to sell their home, which they have owned fifteen years, and move to Oregon. Five years pass, and their former home is now owned by George Smith, who has made a deal to sell it at a nice profit. In checking the title of the property, the name "Mrs. James E. Brown" turns up in Smith's abstract, as it appears on the deed by which James and Mary sold their home.

For the title to be clear, the land records must show that the Mrs. James E. Brown who sold the house and lot was the same identical person as the Mary L. Brown or Mrs. James E. Brown whose name appears on the deed conveying the property to the Browns many years before.

In order that the purchaser may be safe, lawyers and courts must not overlook the possibility that they may be two different persons. If so, the first Mrs. Brown may have died leaving heirs who have not yet relinquished their interests in the home. Other possibilities would present serious implications also.

Proof of identity in this case could involve tracing the Browns through several states, or other methods equally or more expensive and time consuming. While waiting for this proof, George

Smith might lose his chance to take a profit. The intended purchaser may have to begin anew his search for a suitable family shelter. The Browns may be out time and money in correcting the discrepancy.

In this situation, the "minor" variation in Mary's signature has resulted in trouble for everyone involved.

Reversely enough, other married women feel that their maiden surname is still legal and continue to use it. For instance, a wife may register her automobile in her maiden name instead of her married name. This is not in compliance with the law requiring a car to be registered in the name of the owner. Her maiden surname is gone for good, unless she is divorced and wants to resume the use of her maiden name. Then it may be returned to her by a court order.

The law does not consider "Junior" or "Senior" a significant part of the name, as regards identification. However, it will not be incorrect to add such terms to your signature, if you wish. Similarly, "Mr." or "Mrs." are not legally important or necessary.

(This column, based on Texas law, is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who knows the facts, because the facts

and SOCIAL SECURITY

Wage earners and self-employed persons planning to retire this year under the new Social Security Act should get in touch with the Amarillo Social Security Office, John R. Sanderson, manager, announced today. Because of the nature of certain changes in the law, it is important that these persons know just how they may be affected by them before actually retiring.

"Those who retire before July 1, 1952, will not qualify for the maximum benefit—except in rare cases," he declared. "And only in a few instances can the \$80

monthly benefit be paid before January 1953. This is the main reason why planning retirement this year should ask us where they stand."

The maximum retirement payment under the new formula is \$80 a month and the minimum is \$20 monthly—depending on the average monthly earnings.

"Beginning April 1952, two new factors enter the old-age and survivors insurance picture," Sanderson said. "One, the new formula for figuring benefits may be used for the first time. And secondly, those aged persons whose work came under social security for the first time beginning January 1951 may, by April, have enough credits to qualify them for benefits."

The manager pointed out that beginning January 1951 regularly employed domestic and farm workers, many self-employed persons, and others were brought under the provisions of this Federal insurance system for the first time in its history. A representative from the

Amarillo Social Security Office will be in Clarendon on Tuesday, March 11, at the DPW Office at 9:00 A. M.

Mr. and Mrs. Lloyd McCord and children were guests Sunday in the home of her parents, Mr. and Mrs. Pete Hearsh and Cora Lee at Groom.

Dinner guests in the home of Mr. and Mrs. Jack Gray and family Sunday were Mr. and Mrs. L. M. Putman and Joan, and Pfc. L. M. Putman, Jr. and wife.

Mr. and Mrs. Oscar Thomas visited Mr. and Mrs. Walter Hanna at Floydada Sunday.

Miss Wanda Hartman of Wellington and Leo Underdown of Amarillo visited Saturday evening with his parents, Mr. and Mrs. C. E. Underdown.

Guests in the home of Mr. and Mrs. J. I. Spurgeon Sunday were Mr. and Mrs. Bob Hutson of Borger.

NOTICE TO PROPERTY OWNERS
The School Tax Collector is asking everyone who owns property located in the Clarendon Independent School District, to come in and render your taxes for 1952, if you have not been contacted by the Assessor. It is impossible for the assessor to contact each and every one who is a property holder in this District. This is especially important if you have bought or sold property during the past year. The School Tax Office is located in the Chamberlain Insurance Building. (2-6c)

CARD OF THANKS
We sincerely thank our many friends who were kind to us during our recent sorrow. The beautiful flowers, the sympathetic words, and tender acts of love have given our dark cloud a silver lining.
Gratefully yours,
The family of Mrs. Mongole.

Facts truck owners should know about hauling bigger payloads

WANT to know why you can carry more payload with Dodge "Job-Rated" trucks?
First, they've got better weight distribution. This means that bigger payload capacity is engineered into a Dodge "Job-Rated" truck. Many trucks carry too much weight on the rear axle, not enough on the front. But in a Dodge truck, the right proportion of the load is carried on each axle.
Besides this better weight distribution, a shorter wheelbase provides easier turning, easier parking. Come in and try one of these payload-packing, easier-handling trucks for yourself. Get all the facts about hauling bigger payloads.
Carry more! In Dodge "Job-Rated" trucks, the engine is placed forward and the front axle back — for better distribution of the load. You can carry bigger payloads—without overloading.
Haul faster! Dodge "Job-Rated" trucks are powered by high-compression engines to give you top performance with rock-bottom economy. Big power gives you pull and speed that save time.
Get longer life! There's a Dodge truck that's "Job-Rated" to fit your road and load condition — with load-carrying and load-moving units factory-engineered to stand up on toughest service.

of the Rio Grande to the western edge of the 18th Congressional District. The northeast corner of the Panhandle appears to be in the best shape for moisture and cover. Those counties lying below the Caprock are the hardest hit in our section. The entire central portion of Texas is hard hit. Recent rains in Eastern Texas have changed soil moisture and plant cover conditions, and this section is in good shape. Most of the Panhandle seems to have good cover except for a few small areas. These small areas can certainly produce a lot of dust when the wind gets to blowing.

Mr. and Mrs. Fred Lynn and Gentry of Victoria, Texas spent Friday night and Saturday night in the home of her parents, Mr. and Mrs. C. C. LaGrone and family.

Mr. and Mrs. M. L. Pittman visited in the home of Mr. and Mrs. Bert Bost at Skellytown Tuesday and Wednesday.

To The People of The 18th District

MARCH 31, 1952, AN IMPORTANT DATE TO MANY: The 82nd Congress on April 5, 1951, by Public Law 16, extended the date for filing claims under the War Claims Act of 1948, as amended, from March 1, 1951, to March 31, 1952. Therefore, those of you who are entitled to file claims under provisions of the War Claims Act should make immediate arrangements to file your claims. The War Claims Commission is most anxious that everyone having the right under the provisions of such act be fully advised as to the deadline for filing claims. If any of you are in doubt as to your rights to file a claim under this act, please write to me or to the War Claims Commission. Any letters coming to me on the matter will be promptly submitted to the War Claims Commission for full processing and consideration.

FARM INCOME: Contrary to the beliefs of many big city folks, the net farm incomes are still far below those of the non-farm individuals. The per capita income of the American farmers last year from all sources was \$1,020.00, compared with a per capita income of \$1707.00 for the non-farm population. The income from farming alone amounted to \$806.00 per capita.

MOISTURE AND WIND EROSION CONDITIONS IN TEXAS: The latest reports from the Soil Conservation Service shows the major part of Texas severely hit by drought. The hardest hit is the entire southwestern portion of the state, from the lower reaches

FOREIGN AID: I have recently obtained some figures on foreign economic and military aid since July 1945. I wish I had the space to put them all in, but will have to wait until later to do that. I thought you might be interested in the totals. The total economic aid from July, 1945, to September, 1951, was \$31,191,091,000. Military aid was \$4,500,799,000. The economic aid includes grants and credits utilized. The biggest sum, as you perhaps suspect, went to the United Kingdom. In economic aid grants it received \$2,370,289,000, plus credits utilized in the amount of \$4,727,836,000. The military aid amounted to \$349,495,000. The total 35 1/2 billion plus was divided among approximately 90 countries and possessions of countries. I will tell you more about it later.

Mrs. Ermine Blair and Mrs. A. J. Emmons were Amarillo visitors Monday.

Misses Bobby Emmons of Lubbock and Gladylene Emmons of Canyon spent the week end with homefolks.

Mrs. Addirene DuBose of Amarillo spent the week end with her mother, Mrs. J. R. Ayers.

PMA CHAIRMAN URGES MORE EFFECTIVE USE OF SUPERPHOSPHATE

Faced with a continuing shortage of sulphur for use in the making of superphosphate, farmers of Donley County can do a number of things to make better use of supplies which are available.

Because of this situation, the chairman makes the following suggestions:

On land that has received moderate to heavy phosphate applications over a period of years, application rates can be decreased for a year or two without serious decreases in crop yields.

Since lime makes native phosphate and past applications of phosphate more readily available, the use of lime will help release for plant use substantial amounts of phosphate that would otherwise remain "locked" in the soil. Adding lime before or at the time of applying superphosphate usually makes the phosphate more available.

A proper balance of lime, nitrogen, phosphate and potash and other materials is needed for maximum production. Soil testing is one of the best ways to determine this balance. Such tests help the farmer determine what fertilizers are needed and the amounts.

A green manure crop turned under also helps to make phosphate in the soil more available. Green manure crops also help to restore humus and legume crops and nitrogen.

The chairman said that all of these ways of saving on superphosphate will be considered in approving soil and water conservation practices under the Agricultural Conservation Program this year. He urges farmers to cooperate in every way possible so that our limited supplies of superphosphate may be used most effectively to produce the crops needed to meet 1952 production goals.

ROTATE FOR PRODUCTION AND PROFIT

Crop rotation brings production and profit, results on the soil conservation farm in Page County, Iowa, indicate.

Reporting on the tests, PMA committeemen say that corn

yields on the corn-oats-meadow rotation plots have been four times those on the continuous corn plots. Measured in feed units, the total production of the rotation plots has been twice that of the plots in continuous corn. The gross per acre income for the rotation plots was almost double that of the continuous plots.

From the standpoint of conservation, the continuous corn plots lost about 40 tons of soil per acre each year. That was four times the loss from the rotation plots. The continuous corn plots lost six times as much organic matter as the rotation plots.

ATTEND GOLDEN GLOVES TOURNAMENT

Clyde Wilson, Bill Bentley, and Grady Henson attended the National Golden Gloves tournament of Champions at Chicago last week. Mr. Wilson and Mr. Henson returned home Friday. Mr. Bentley returned Saturday morning.

Kenneth Davis, formerly of Clarendon, reached the semifinals last week, defending the championship in the feather-weight division. Winners in the finals will be determined this week.

HOMES CHANGE HANDS

Clarendon was a busy place last week with all the moving going on. Mr. and Mrs. William Payne have bought and moved into the home formerly occupied by the George Reeves, located a block east, a block south, and a half block east of main street.

The Reeves moved into the Bud Anderson home now owned by Mr. and Mrs. Kirk Doshier, and Mr. and Mrs. Walter Hughes have bought the Payne home three blocks east of main street.

IN SEARCH OF BARE FACTS—Lt. Col. C. C. Schaefer, left, of San Antonio, Texas examines the cold-weather garb worn by Dr. Paul Siple, who is in Korea experimenting with the Army's newest fashions for frigid fellows. The jacket is part of the new vapor-barrier suit, which is worn next to the skin.

New Weekly Feature Makes Its First Appearance

"It's the Law in Texas", a new weekly feature, makes its appearance in today's edition on page five.

It is the first of a series of columns that will appear in this paper each Thursday. The articles will discuss points of law that every person needs to know.

The write-up being published today tells how a person's name should be signed to legal documents. It points out that proper signatures on important legal papers may save both time and money.

Among topics to be explained in other columns are the liability of a homeowner for accidents occurring on his property, the question of who inherits in event a person dies without leaving a will, and others of equal interest.

Distributed as a public service by the lawyers of the state, the weekly column is prepared under supervision of the State Bar of Texas Committee on Public Information. Each statement made will be carefully checked by the Bar group to insure conformity to applicable Texas laws.

The rendering of legal advice

on specific personal problems is for lawyers, specialists in the field. But "It's the Law in Texas" will give you background knowledge about the law and discuss in everyday terms, legal information that will help you in your daily activities.

RETURNS FROM KOREA

Pfc. Billy Jack Owens arrived in Clarendon Tuesday night after spending the past year in Korea, and will visit in the home of his parents, Mr. and Mrs. C. B. Owens. Jack entered the service September 25, 1950 and sailed for Korea in February of 1951. He has served with the Army Engineers. Under the troop rotation plan he returned to the States and landed at Camp Lawton, Seattle, Washington, Feb. 28. His furlough was issued from Ft. Sill, Okla.

Another son of Mr. and Mrs. Owens, Pvt. James Wayne Owens, is with the Field Artillery and is based at Camp Roberts, Calif. He entered the service Jan. 17 of this year.

Mrs. A. J. Hicks and Pamela and Mrs. J. I. Spurgeon visited in Plainview Monday. Mrs. Will Haley of Plainview accompanied them home for a visit.

Mrs. Jack Pyeatt and Donna Jo of Amarillo came Monday to spend a few days in the home of Mr. and Mrs. Owen Pyeatt and family.

Mr. and Mrs. W. J. Lewis, Jr. and Mr. and Mrs. Lloyd Shelton are in Amarillo this week to attend the Fat Stock Show.

Mr. and Mrs. T. G. Wiley and boys visited Sunday afternoon with his parents, Mr. and Mrs. M. F. Wiley at Lakeview. Mr. Wiley is able to be at home now after spending several weeks in the Memphis hospital.

Mr. and Mrs. N. L. McBrayer of Ft. Worth visited relatives here from Wednesday thru Sunday.

Mr. and Mrs. Leldon Davis and son, Roger, of Palacios, Texas were guests Saturday night in the home of Mr. and Mrs. W. M. Cross.

Sadie Beth Ewing of Phillips spent Saturday night with Jeanie McAnear.

Mrs. G. W. Bradshaw and Mrs. D. B. Koen were Amarillo visitors Tuesday.

Shall We Promote and **FIGHT** *For Our Jr. College*
Or Stand The Chance To **LOSE** *This Valuable Asset*

This week has been proclaimed Public School Week. The local faculty and School Board is asking everyone to visit our schools this week and become better acquainted with the problems and benefits of our schools.

• Have we as a community neglected the upholding and promotion of one of our grandest assets. It appears that we have! --- So now is the time to wake up and begin to do something --- To think about just what our public schools mean to us as a community --- and the value of our Junior College.

The stark fact that the public schools and our own Junior College are the greatest force for shaping the citizens of tomorrow should be too obvious to need emphasis. Should our enrollment fall to a point where our college would be taken from us --- we would stand no chance whatever to regain our loss, for Junior College's are established now according to population and a much higher tax valuation than this community could possibly ever produce.

Let us all, as a community, begin to think and work toward making our Junior College more attractive to our own students here at home and for those within a thirty to sixty mile radius. We can make our Junior College one of the best in this part of Texas if we all work together. Watch for future developments and be ready to do your bit for a bigger and better Clarendon Junior College.

Federal Land Bank Stockholders To Ask For Legislative Changes

Mr. Rayburn L. Smith, who represented the Donley County National Farm Loan Association members at their Annual Stockholders' Meeting in Houston on February 20 and 21, reports a very interesting and informative meeting.

The third greatest volume of

loans ever made by the Houston bank during its 35 year history were closed in 1951. It was further reported that The Federal Land Bank of Houston made 29% of all long term farm mortgage loans in Texas for the year 1951. The stockholders went on record to ask for changes in federal

and state laws affecting various phases of its operation. Resolutions were unanimously adopted giving support to legislation providing for a twelve-man, part-time Farm Credit board to be appointed for staggered 6-year terms of office for the purpose of supervising and regulating the Farm Credit System, with one member to be selected from each of the twelve land bank districts in the United States. The effect of such a change would be to replace the present supervising authority who is an appointee of the President of the United States.

The stockholders also unanimously agreed to support legislation that would provide for a separate board of directors of each Federal land bank. Such board would consist of five men, all to be elected by the locally owned and operated national farm loan associations who, in turn, own all of the capital stock of the respective Federal land banks.

The present members of the district Farm Credit board, consisting of seven members, serve as a board for the four Farm Credit institutions, Federal Land Bank, Houston Bank for Cooperatives, Federal Intermediate

Credit Bank, and the Production Credit Corporation. At present the stockholders of the Federal Land Bank, Production Credit Association, and the Bank for Cooperatives each elect one member with one other being appointed by the Governor of the Farm Credit Administration from the three high nominees of national farm loan associations. Three are direct appointees of the Governor of the Farm Credit Administration. They will also press for state legislation that will place a limitation upon the period of time for which minerals and the surface of the soil can be separated. It will be proposed that the sale of minerals be limited for a period not to exceed 20 years unless production of minerals is being obtained.

Judge J. A. Elkins, prominent Houston attorney and Chairman of the Board of Directors of the City National Bank of Houston, addressed the group on "What Does the Future Hold for Farmers?" Judge Elkins pointed out that the agricultural prosperity of the United States is unusually bright for the immediate future, but cautioned that the great need to insure prolonged prosperity would rest largely upon the people of this nation demanding

economy, efficiency, and sanity in government. He stated that the indifference of the people is largely responsible for the economic ills of our country, and asked for a more active interest in all public affairs.

Mr. Sam H. Bober, successful farmer and stock grower of Newell, South Dakota, addressed the meeting on "The Voice of Ownership." In addition to his general farming operations, he is recognized as an outstanding seed grower who is now marketing his improved grass and grain seed in all of our forty-eight states. He has had a remarkable career, an account of which was published in the July 1949 issue of the Reader's Digest under the title, "From Russian Peasant to American Pioneer."

Mr. Wm. McCraw, former Attorney General of the State of Texas, addressed the banquet group.

Doctors are so busy nowadays that lots of people get well before the date of the appointment arrives.

Geo. B. Bagby will leave Saturday for Dallas to see the Guy Lombardo show at the State Fair Auditorium.

Judging from the amount of liquor seen in the dry states there must be a lot of snakes thereabouts.

Seeks Senatorial Seat

This week Judge Harold M. LaFont made his announcement for the office of State Senator of the newly created 30th Senatorial District of Texas.

In asking the people to elect me to this office, it is with a full realization that whoever the people elect has the responsibility of making the laws that govern over 7,000,000 people of the State of Texas.

should be experienced, honest, sincere and capable.

HAROLD M. LaFONT

As citizens, all of us are interested in the progress and welfare of our Senatorial District and of the State of Texas as a whole, and we have a right to expect our fair share of those things for which our tax money is spent.

Call out the Reserves with a touch of your toe!

Most cars lead a double life. A good part of the time, they're running errands, taking children to school, taking women to stores, taking men to work, taking family and friends to clubs and social functions. It doesn't call for a very great output of horsepower for duties like these. But there are times when you want a car that can do vastly more, and these are the times when you'll want what this year's ROADMASTER has to offer. Beneath its proud hood, there's a Fireball 8 Engine—a valve-in-head that can let loose 170 lively horsepower when needed. And—alongside this engine—there's also an Airpower carburetor which thriftilly feeds fuel and air through two smaller-than-usual barrels for normal driving—which means that you now use less gas at 40 than you'd formerly use at 30. But there are two barrels in reserve—waiting for you to call them into action—and they let loose a soaring rush of power that sinks your shoulders back into the seat cushion, swoops you past a truck—out of a tight spot—up a hill—sets your speedometer needle to registering

added miles more than twice as fast as your watch can tick off the seconds. This is an experience you certainly should know firsthand. You should also know how Buick's Power Steering* provides a helping hand in slow-motion maneuvers—lets you keep the "feel" of the car in straightaway driving. And just for good measure, this '52 ROADMASTER also has the biggest brakes of any postwar Buick—the greatest trunk space since spare tires moved off the front fenders—a warning light that glows when the parking brake is set—and to top it all, the smartest interior fabrics that Buick has ever offered. When are you coming in to look this distinguished performer over? We urge you to make it soon.

*Equipment, accessories, trim and models are subject to change without notice. *Optional at extra cost on ROADMASTER only.

I think that the following is a foregone conclusion by many of the nations top economists; if we continue our present policy of spending ourselves into debt year after year that within a few years we will have a currency so worthless that we will wag handfuls of it around in order to buy the barest of necessities. If on the other hand we elect a conservative minded president

and a congress to back him up, and in addition to all this we change our habits about the "Gimme's" and decide to pay, back up, square off, and start over too abruptly we may find money scarce and find ourselves in a first class depression. The big question with our leaders would be; could we, or rather would we take it. Either way you look at it a serious situation faces us, as we look to the future.

There have been folks who would say that Uncle Zeb was no poet. I s'pmit the following as this week contribution to this art, and in defiance to that belief: You may be fat and out of style. Your waistline may extend a mile; But if you wear a happy smile Folks will stop and chat awhile. —Uncle Zeb, the Poet

Someone has said this: "A candle loses nothing by lighting another candle."

"It's amazing what heights we can often reach just by staying on the level."

The above are from a contribution sent in by Mrs. R. E. Boone of Columbus, Ohio. If some of you would like to have a good luck buck-eye may be just possible that when the season comes around we can persuade her to gather and send us a good supply. How many would like to have one as a Good Luck charm?

Henry J. Taylor, who broadcasts a nation wide program for General Motors put it this way: "Many folks are asking today what became of the Four Freedoms that we heard so much about a few years ago. Instead of the Four Freedoms the result of the policies has been to supply us with Four Fears—Fear of war, Fear of inflation, Fear of bankruptcy and Fear of Defeat."—end of quote. There is much to think about in the above.

The other day in Clarendon I happened in on one of these so-called Rain-Making meetings. You have all heard the old saying, "Curiosity killed the cat," well that was the main reason for my attending. Feeling just a little bit sheepish I sat down on almost a back seat and listened very quietly. Anyway, as the old boy talked and explained the situation I kept moving closer and closer. At the end of the program I was sitting in just about the sixth row; just one row behind the ones that were actually getting out their pocket books and subscribing to the service. Anyhow, it does make you stop and think.

Anyway, if it should prove to be a good thing all of this section of the country round about will certainly owe a debt of thanks to Lee Shaller of Donley County. It was through his untiring efforts and faith in its possibilities that this work was begun in this part of the country. To Denver to talk with Dr. Krick, the cloud-milker, and from community to community over the eastern Panhandle and western Oklahoma Lee told the story. It caught on and many have believed in it

and plans are being laid to set up a giant five million acre project in this area. On the other hand if it turns out bad, we can all go to the hanging, so either way we will have some places to go. As for me, I only wish that my Department of Truth was in operation. We could certainly turn them loose on this one. What do you think? I wonder would a Scotchman, such as Uncle Bob be interested? More about this later.

Donley County Soil Conservation District News

Farmers in the Donley County Soil Conservation District are missing a good opportunity by not using more sweet clovers for both soil improvement and forage.

Biennial sweet clovers are probably best adapted for this area. Planted in the spring, biennials will live for two years making only vegetative growth the first year and producing seed the second year.

Either yellow or white blossoming species may be used; however the yellow sweet clover may have greater tolerance to

drought and unfavorable climatic conditions during the seedling year.

Madrid, a variety of the yellow blossom sweetclover, is probably the best for a combination grazing and soil improvement program. Madrid is shorter, leafier and finer stemmed than other common biennial sweet clovers.

Both yellow and white blossom sweetclovers have grown for years in Donley County along the road sides and in the borrow ditches. There is no reason why they would not grow and do well in our fields and pastures if we would only plant them.

The value of sweet clover as a soil building crop is well known. Being a legume it has the ability to take nitrogen from the air and to store it in the plants and in nodules on the roots.

No other legume so well penetrates the plow sole and sub-soil and opens the soil for aeration and moisture penetration. Its ability to bring up minerals and plant food that have leached to lower depths is important especially to the medium and sandy textured soils. The nitrogen fixing ability of sweetclover is very high, averaging about 117 pounds per acre.

Sweet clover can well be used in pastures and other grazing lands. It produces forage high

in protein which can be grazed moderately the first year but has a high carrying capacity the second year. It is especially beneficial in mixtures with grasses.

Seeding may be early spring with no covering or late spring after a crop of weeds have been killed by plowing. For late planting seed should be covered about one-half inch.

The District has a fair supply of Madrid Clover seed which has been placed with local seed stores in Clarendon for sale at 30 cents per pound.

Mrs. Lola Barns returned home Friday night after attending the Fat Stock Show at San Antonio. She went down with her son, Roy Barns of Denver, who assisted with the judging of Quarterhouse entries at the show. Mrs. Barns also visited her daughter, Mrs. Carter at Stockdale.

They Do "Give A Hoot" For Easy

Easy Roberts finally got rid of the noisy pigeons that used to whoop it up under his eaves.

He must have tried a dozen ways to scare them off. But no matter what he did, they would be right back cooing by his window the next morning.

Then Easy thought of an old stuffed owl he had in his attic. He propped it on the roof so's all the pigeons could see it. They left... and three hoot owls have taken their place. Easy swears the hooting is even worse than the cooing of the pigeons.

From where I sit, quite often a "bright idea" will turn out to be "not so bright" after all. That's why we should never be too cocksure of our ideas and opinions—but always try to keep an open mind. I believe a refreshing glass of beer is the best throat-quencher — you may believe differently. But who's to say one's right and the other is wrong? Let's just practice tolerance. It'll give a lot of hootin' and hollerin'.
