American Legion Auxiliary Decorate Amarillo Vet Hospital Dining Room

The American Legion Auxiliary of Clarendon decorated the dining room at the Veterans Hospital in Amarillo, Sunday, Nov. 11. Decorations consisted of centerpieces for the tables made up of autumn flowers and flags, and plate and tray favors. The Auxiliary also served individual cakes decorated with a flag, and ice cream with the noon meal.

In addition to the decorating, 50 duplicate books donated by the Public Library, were taken to be used in the Library at the Hospital.

Projects as this are made possible through the sale of poppies each year on the Saturday preceding Armistice Day, and on Decoration Day. This money so generously given by the public can only be used for the veteran and his family who are in need of help, and worthwhile projects for the disabled veteran.

The Auxiliary would like to take this means of thanking the Girl Scouts who gave their time to help sell poppies Saturday.

Those going to Amarillo to help with the decorating in the hospital were Mr. and Mrs. Jack Gray, Mr. and Mrs. Mike McCully, Mr. and Mrs. Glenn Hoggatt, and Mrs. Maurice Lane.

Bronchos To Play Irishmen at Shamrock Friday Night

The Bronchos will journey away from home again Friday night to tangle with the Shamrock Irishmen for their last game of the season. This is expected to be a tough game for the Bronchos as the Irishmen are the top team in their AA district and are always a rough bunch to handle. On top of everything else the Bronchos are way below regular strength with several first string players nursing injuries. Part of these players probably will see little or no action at all Friday night.

It has been understood that the starting time for the game has been changed to 7:30 instead of 8 o'clock.

The probable starting line up for the Bronchos, starting at left end; Murff, Tatum, Bain, F. Clifford, Moore, J. Clifford and Robertson. The backfield will be about the same as last week which is quite a change from earlier in the season. Hall and Hearn will fill the halfback positions, Myers will quarter and Scott will be in the fullback slot.

Remember, this is the last scheduled game of the season and the Bronchos will need all the support they can get.

Ike, Truman Talk — Deny Politics

WASHINGTON—President Truman and Gen. Eisenhower talk earnestly during their recent conferences which some observers insist were about "Ike's" running for President in 1952—though this is denied by both men. Eisenhower, back in Paris, repeated that parleys had to do with European defense.

U.S.O. Benefit Dance Next Tuesday Night

Emmett Allen and his Sunset Ramblers will furnish the melodies for a USO benefit dance to be held in the American Legion Hall on November 20th. Ticket sales are now in progress and can be secured at the following places: Skelton's, Bob Moss Pharmacy, and Thornberry Drug.

Mrs. Mildred Ritter is the Clarendon USO Chairman. In a statement yesterday Mrs. Ritter said, "I want to thank Emmett Allen and His Sunset Ramblers for donating their time and talent; The American Legion for making their hall available to the U.S.O. Committee without charge and to the Donley County Leader for printing the tickets free. We have over a hundred boys from this area in service and we have only been asked to contribute \$480 from this county to the State USO Campaign. All of the money collected will go to the U.S.O. Everyone is donating what it takes to put this dance on and I know that we will 'go over the top' in our campaign with this one activity. So I want to ask that everyone buy a ticket when you are asked and thanks a lot to everyone."

REPORT DINNER HELD BY METHODIST WORKERS

Progress of the Stewardship Program of the Methodist Church was checked Wednesday evening at a report dinner at the Methodist Church. Divisional Leaders, Team Captains and Solicitors were in attendance. The meal was served by the Women's Committee.

Team captains and solicitors reported the results of their contacts with Methodist families during the past week. These contacts are being made in order to secure pledges to the budget of the church. Pledges are being audited by Maurice Lane, Lester Schull and C. W. Bennett. It is the feeling of the workers that since the membership has become newly aware of the plan and the needs of the church, and the responsibilities of church membership, the response has been most gratifying.

Progress of the teams is being recorded on a score board made by Lynn Payne and Wm. Payne.

C of C Board Holds Monthly Meeting

The Board of Directors of the Chamber of Commerce held their regular monthly meeting Tuesday night in the Chamber offices. Routine committee reports were made and approved by the Board.

In other business the Board approved the appointment of a State Highway 70 Committee within the local Chamber. At a meeting in Sweetwater on October 31, which was attended by County Commissioner J. R. Bulls and Jimmy Faulkner, a State Highway 70 Association was formed. Odos Caraway, as chairman, and Noel Cudd and J. G. McNear compose the new committee. Mr. Caraway will be the delegate to the State Association and Mr. Cudd and McNear will serve as alternates.

The Board heard a report that the "Christmas in Clarendon in 1951" committee had almost reached its goal on finances and that there was only one team of solicitors left to report. If this team's solicitations are as successful as are the other teams, the program as originally outlined will be carried out.

Bill Todd, Van Kennedy and Jack Brooks, retiring members of the Board of Directors of the Chamber of Commerce, were named by President Phelan as a nominating committee to select a slate of candidates for the annual election which will be held in December.

SANTA AND HIS REINDEER TO BE HERE SATURDAY, DECEMBER 1st

The moon rides high on the new fallen snow, To lend an air of Christmas to the scene below.

When out of nowhere who should appear, But Santa, his sleigh, and four reindeer.

The reindeer pranced, then shuffled and shied, "Look! It's Old Santa Claus," the children all cried.

The scene so vividly brought out in this old Christmas rhyme will become a reality in Clarendon at 2:30 on the afternoon of December 1st. Santa Claus and his four live reindeer will parade through Clarendon that afternoon to bring the spirit of Christmas nearer to children and adults alike.

There definitely is a Santa Claus and it has been borne out through the passing years by newspapers and by word of mouth.

"People from miles around will be here to view this parade," it was asserted by Jimmy Faulkner, Manager of the Clarendon Chamber of Commerce which is sponsoring the event. "Old Saint Nick will pull the reins over his charges as they prance down the street, resplendent in their red harness with shiny, brass nameplates," Faulkner added.

A Central Texas ranchman is bringing the reindeer to Clarendon. They are a part of the herd he owns.

Several years ago this Texas ranchman came to the conclusion that he would try to satisfy his children and all the other children who asked every Christmas season, "Where are Santa's reindeer?" After three years and writing many, many letters this Texas ranchman finally obtained

authority from the United States Government to get reindeer from Alaska.

Today, the only herd of live reindeer in the United States are on his Texas ranch. Their main diet the first year consists principally of oatmeal, just like we eat for breakfast. Each animal eats about two and one-half pounds of the cereal each day. After the first year they do well on peanut and alfalfa hay to replace the lichen moss they eat in Alaska. The moss is highly nutritious but transportation costs prohibits it being used on the ranch.

Animals for the herd are secured each year from Eschscholtz Bay, 90 miles south of Kotzebue, an Eskimo village of 200 population. The bay section is a peninsula on the Bering Sea. Here, camping in deep and heavy snow for some three weeks each year, the herd is rounded up for their trip back to Texas, which is made by airplane. Temperatures where the reindeer are captured sometimes go to 80 degrees below zero.

Gabie Betts Burton Library Notes

By May L. Prewitt

Have you read "The Enemy" by Wirt Williams? The foot note, or reviewer states that "The Enemy" ranks with the finest sea stories of our literature. It is, too, a symbolic drama of the unending conflict between man and evil." Then we have Irving Stone's, "The President's Lady". This is the novel of Rachel and Andrew Jackson. You recall he wrote "Immortal Wife" a few years ago. Our third book to attract adults is "The Stranger Beside Me" by Mabel Seely. This is a unique story that may not appeal to a number of our readers. It is the Double Day Dollar book club choice for November. We have replacements of several of Zane Grey's books, but none of the recent ones by his son.

There is a light romance "Come Into My Heart" by Peggy Gaddis; a mystery of Erle Stanley Gardner's, "The Case of the Angry

Mourner"; three westerns, "Black Sage" by Holmes, "Mesquite Mavericks" by William Colt McDonald; "Smuggler's Trail" by Evans Evans.

For the girls, we offer "Cherry Ames Mountaineer Nurse" by Julie Totham, and for the little people "A Pony For Linda" by C. W. Anderson. He wrote the "Blaze" stories that all children read quite eagerly. The boys

COMMERCIAL FERTILIZERS COULD BOOST YIELDS

Fertilizers could be used in this country to greatly increase the production of crops. Likewise a decrease in the use of fertilizer would cut down crop production in many parts of the country. How much the increases or decreases could be is shown for 23 of the major crops of the country in a report just issued by the U.S. Department of Agriculture.

Combining the estimates of scientists of the Department of Agriculture and of State experiment stations and extension services, the report indicates what increases in production could be expected from fertilizer applications 10, 25 and on up to 300 per cent larger than now. The three main elements—nitrogen, phosphate, and potash—are covered in the report. In a few cases, lime is covered.

For the country as a whole, the greatest opportunities for increasing production through the use of fertilizers are in grain and forage crops. In the Northeast where pastures generally are given commercial fertilizer, the scientists estimate that tripling the present applications of 5 pounds of phosphate to the acre would increase pasture yields 10 per cent. That

would be equivalent to the present production of more than a million acres. Increased applications of nitrogen in the Middle West, according to the report, could increase the production of corn by 600 million bushels and wheat by 200 million bushels. Together, that increase would amount to present production from 14 million acres.

LARGE EXPORTS REDUCE WHEAT SUPPLIES

With exports more than double those of last year, disappearance of wheat in the first quarter of the current marketing year was 10 per cent greater than the same period last year. Stocks of wheat in all positions on October 1 were the smallest since 1946, and amounted to 1,127 million bushels. Farm prices averaged \$2.06 per bushel the first 3 months of the season or 9 cents above the same months last year.

With the average price support level of \$2.19 per bushel, farmers placed about 121 million bushels of wheat under the support program through September. This compares with 101 million bushels for the same months last year. Wheat stocks in all positions on October 1 were 80 million bushels less than last year. Disappearance of wheat July through September this season was 25 million bushels more than last year due to increased exports. Exports amounted to 98 million bushels compared to 43 million bushels last year.

Not Profitable To Crowd Hens

Too many hens in the laying house can cause plenty of trouble during the winter season. Ventilation systems may be ineffective when the house is overpopulated and result in too much moisture in the air, damp litter, wet walls and generally unhealthy conditions. The poultryman who sells the extra pullets rather than overcrowds the laying house will be money ahead, says H. M. Breedlove, county agent.

There is a definite relationship, he says between the floor space provided and the potential egg production of the hens. From three to four feet of floor space should be allowed for each bird in the well equipped poultry house. Where there is overcrowding, and not sufficient feeding space—at least six inches per hen—will not be available and hens that don't get all the feed they need cannot produce at maximum levels.

The well equipped poultry house should contain at least one nest for each five hens, says Breedlove. Too many hens using the same nest will break more than enough eggs to pay for the extra nests, he adds. Be sure there is a supply of fresh, clean drinking water before the hens at all times. About five to eight gallons of water is needed each day for 100 hens and it will pay to put out fresh water at least twice per day.

Guests in the home of Mrs. S. C. Bell Sunday were, Mr. and Mrs. Ben Howard and daughters of Sunray, Mr. and Mrs. Kenneth Bell and daughters of Borger and Mr. and Mrs. Golden Holland and children of Springfield, Colo.

Foxworth-Galbraith Prize Winners Announced

Winners of the Foxworth-Galbraith 50th Anniversary celebration free prize drawing, were announced recently by W. W. Sandifer, manager of the Foxworth-Galbraith yard in Clarendon, Texas.

An R.C.A. portable radio was won by Roy Blackman of Brice Route, and a Rogers Bros. 1847 silver set was won by Kenneth Wilkinson of Naylor Route.

Winners names were drawn recently as a part of a combined broadcast from radio station KGNC of Amarillo and KFYO of Lubbock.

The grand prize of a brand new 1952 Buick sedan equipped with Dynaflow was won by L. R. Frantz of Waka near Spearman, Texas. More than \$5,800.00 worth of free prizes were given away to the friends and customers of Foxworth-Galbraith as a part of their 50th anniversary celebration. The anniversary, which draws to a close this week, is one of the few golden anniversaries celebrated by the many thousands of business firms in the Southwest.

SCHOOL ABSENTEEISM STILL CLIMBING

Absenteeism in the local schools is still on the climb. The report for last week showed a total of 182 absentee days that cost the public school system \$163.80. The lower grades reported 111 absentee days and senior high reported 71.

I. T. Pipes of Kilgore, Texas was a guest in the home of Mr. and Mrs. M. L. Pittman Sunday.

Bucks Barely Win Over Bronchos

The White Deer Bucks, along with a number of breaks and penalties, were able to finish up the game one touchdown ahead of the Bronchos last Friday night at White Deer. The final score was 34 to 27. If the Bronchos had been allowed three touchdowns the score would have been in our favor but such things go along with the game. The Bronchos were on the one yard line at the end of the half and were pushed back from over the goal line only to lose the ball on the three yard line when the game ended. If this score had been counted the Bronchos would have been in position to tie the game. The only way the Bronchos could score and have it counted was to start the play way out in mid field and go all the way. Every time they got close to the goal line things began to foul up.

The Bronchos scored first with Hall racing 59 yards for the counter. White Deer scored next and made their extra point; Hall went over again and Myers made the extra, putting the Bronchos back in the lead; then White Deer pushed the score to 14-13. The first half ended in this manner.

Soon after the second half started, White Deer ran over two TD's. Next was a Bronco score with Hearn traveling 19 yards; then White Deer retaliated bringing the score to 34-20. Scott scored next for the Bronchos going from the 29 yard line bringing the Bronco's total to 27. It was a fast game all the way with neither team showing much defense. The entire Bronco squad displayed plenty of spirit and determination and gained approximately 500 yards rushing and in the air. They lost around a hundred yards in penalties.

Projects Discussed In 4-H Club Meeting

The Donley County 4-H Club met in the office of County Agent H. M. Breedlove on Thursday night, November 8th and projects for the boys were discussed and changes in rations were made on beef calves.

The 4-H Club boys decided that they will have a 4-H Club Rodeo in early May, and those taking part to be club boys. The purpose of the rodeo is to raise money to buy a bus to take club boys to stock shows, judging contests and other gatherings of an agriculture nature. The boys want to put army beds in the bus and this will save much expense when they are attending shows or judging contests. The direct work on the planning of the rodeo will start after the first of January, and the boys hope to be able to purchase their bus in the early summer.

Breedlove says that the boys are working hard on their demonstrations at this time and getting ready for the spring show which will be held in Clarendon in late February. The show board of the county will meet after the first of the year and set the date for the Donley County Fat Stock Show.

No Count Yet On County Balloting

No count had been made Wednesday afternoon on the State Amendment election here in Donley County, but the election results probably will be in line with the latest state returns which show only one amendment carrying at this time, which was the proposal to increase from \$25 million to \$100 million the amount of bonds that may be issued for the Veterans Land Fund.

Youth Center News

Student response to the sale of tickets permitting attendance at the Canteen for the coming year has been slow. You must have your ticket, and for the remainder of the month of November, it may be purchased for \$1. Effective December 1, tickets will cost \$1.50. This money is needed to defray expenses in operation of the Canteen.

Anyone having a surplus of records and wishing to dispose of them is asked to call Mrs. Tom Blasingame, Mrs. Bill Riney or Mrs. Cushing. The Canteen is badly in need of records at this time and their use would certainly be appreciated.

Sponsors for Saturday night, Nov. 17, will be Mrs. Clyde Barker and Mrs. Fitzgerald and for Tuesday night, Nov. 20, Mr. and Mrs. Geo. Schollenbarger.

MILLER

Chiropractic Office

HEADACHES are suffered by many people, some for many years, and during that time there usually has been a continual treating of effects, rather than getting to the fundamental cause of the condition. The sufferer seeks to eliminate or deaden the pain instead of determining the real cause and striving to make abnormal conditions again normal.

CHIROPRACTIC contends that all things were intended to be normal, healthy and happy. It is because of the inability of the life-giving energy, of which we are all possessed, to reach all tissues of the body, that health is not existent in those tissues. Chiropractors do not seek to supply a chemical, nor do they seek to supply by any artificial means a stimulation which shall alleviate the condition temporarily. CHIROPRACTORS DO MAINTAIN that every organ of the body to be normal must be supplied with its full quota of mental impulses or vital nerve energy. The path whereby these impulses or vital nerve energy may be transmitted is through the nerve fibers branching to every tissue cell in the body. The only place where any interference is possible with the transmission of these impulses is where the nerves emit from the spinal column and are subject to the pressure of the hard, bony segments of which the spine is composed. The Chiropractor locates the place of the nerve pressure and removes the pressure by adjusting the vertebra back to normal.

CASE HISTORY: Mrs. H.E.M. writes, "For several years I have been a constant sufferer of severe headaches, which are followed by vomiting. I spent thousands of dollars without being helped. I was given only a short time to live. Then my husband decided to take me to a Chiropractor. At first I had to be led into his office but after a series of adjustments, I walked in alone. Now my headaches have been relieved, and I am sleeping and eating better."

PLOWIN' Out the CORNERS
Uncle Zeb

Definition of a farmer from an article in Texas Agriculture; the voice of the Texas Farm Bureau: "A farmer is a man who starts out with nothing, loses on every-

thing that he grows, and come out even at the end of the year. Nobody knows how he does it. He doesn't even know himself."

Newest member to the Ain't Smoking Right Now Society is O. M. Hamblen of Rt. 1, Happy, Texas. He is a brother to Henry, the Barbecue King. Seriously, when it comes to fixing barbecue and all the sidelines that go with it these Hamblen boys are among the best. 300 satisfied customers will vouch for this fact since the Farm Bureau Barbecue just before the county convention in Armstrong County. Anyway, they

tell me he can fill your stomach with good barbecue, make a speech filling your mind with your responsibility to your farm organization, and then relieve your pocketbook of your dues in a very clever and almost painless way. Anyhow, more power to all these Hamblen Brothers.

Quote from Rep. Rogers: "I'm also convinced that the only way we are going to reduce government spending is to quit collecting more taxes." He said this in reference to his recent vote against the federal tax raise. I take my hat off to the man today with the courage to vote against a tax raise. This takes courage. And he is so right as anyone knows who has ever served on any taxing agency. Just so long as the money is brought in there will be someone around with a good idea of

how to spend it and some more. Congratulations Walter, your words are encouraging.

Here is something that you will never read in the so-called Did You Know ads put out by the liquor industry.

There were 40 cases filed in Potter County during September, 1951 by the Liquor Control Board for violations. In Lubbock there were only 24 cases filed for the same period. Potter is wet, and Lubbock is dry. During the same period and relating to the same offenses Lubbock collected \$9,697.20 in fines and costs compared to \$3,697.20 in Amarillo. These figures are from the Liquor Control Review, a publication put out by the Board. This should surprise some of the so-called Damps, who vote wet for expenses sake.

I was accused of having someone in mind last week when I included the story of the lost coon dog. How could anyone think I would do a thing like that?

Also, several of the Washburn residents, especially four families, thought that Uncle Bob Robertson was the Scotchman referred to in the episode about the pie plates. My, my, I must be more confusing with my generalities in the future. I must be slipping as a story teller if anything that I write would remind anyone of any true facts. I apologize, I apologize, for slipping, that is.

A man is never a hero after once he begins telling about it.

It is said that when one yawns is the only time it is absolutely safe to open our mouths.

One thing about falling in love with one self is that there will never be any need for jealousy.

The Republicans seem to still believe that the past will repeat again in the elections. They seem to think that folks will soon tire of the other party and turn to them for aid and comfort. They still seem to want to reward some party boy with a lot of party seniority with the president's job. It seems they just won't listen to the voice of the People and let the most popular man on their line carry the ball. They need to wake up to the trend of the times before we lose our two-party system and along with it many of our fought for freedoms.

Health Notes

AUSTIN—As the hunting season gets underway Dr. Geo. W. Cox, State Health Officer, urges caution in handling firearms. More than 160 Texans were killed in 1950 as a result of carelessness in handling guns. At a time like this it is more than ever important that we should conserve human life whenever possible. "It is not enough to deplore the waste of human lives caused by the careless handling of firearms," asserts Dr. Cox, "we should learn from the deaths of these victims the lessons of safety which will prevent this needless and shocking waste. With the price of meat at the present high level there is possibility of more hunters going into the field than ever before." The State Department of Health gives the following safety suggestions in handling guns:

Donley County Soil Conservation District News

GRASSLAND FARMING
The term "grassland farming" has become a popular figure of speech in our agricultural language during the last few years. It is fast becoming popular with the cooperators of our local Soil Conservation District.

What does it mean? It simply means giving grasses, legumes, and other sod crops a more important place in the farming system. It means more and better pastures and ranges and more livestock. It means more grasses and legumes in the crop rotation and more and better hay crops

and silage. It means more and better cover crops, grass waterways, strip crops of grasses and legumes, and the use of sod crops in other ways to help conserve land and water.

It means more income and a better standard of living for the cooperators of the District. It means more income for all types of businesses in the District.

Practically all grasses and legumes conserve and improve the structure of the soil. They are the principal agents for controlling erosion on sloping land. Nearly always they improve both soil tilth and fertility and increase the water-absorbing and water-holding capacity of the soil - - - while growing and after being turned under as green manure or

left on the ground surface as a mulch.

The advantages of grassland farming, moreover, are not limited to beneficial effects on the land. Grassland farming takes less labor than cultivated crops. The labor is usually distributed more evenly over the year, and in these times of farm labor shortage this is important. It has increased the income of nearly all the farmers in the Donley County Soil Conservation District who have tried it.

Furthermore, it is usually a more interesting and enjoyable way of farming. Many farmers enjoy work with livestock more than they do the harder labor of planting, cultivating, and harvesting row crops, and good grass

is the main base for profitable livestock farming.

The need for more grassland farming in the Donley County District is becoming obvious. There is no other practical way to plan a soil and water conservation program for a great many farms and ranches.

The District can help you with your conservation problems. Technicians of the Soil Conservation Service assigned to the Donley County Soil Conservation District can assist you in planning your program of grassland farming.

Most every family would be improved if the parents would get back on spanking terms with their children.

Protest Ambassador To Vatican

DALLAS — "The American people will not be led down the road to Rome—They prefer the American way."

This prophecy is made by Bishop G. Bromley Oxnam of New York in the Nov. 3 issue of "The Nation" in an article setting forth reasons why Protestants repudiate President Truman's appointment of an ambassador to the Vatican.

"Protestantism is shocked and outraged by this un-American announcement," Bishop Oxnam writes. The article cites several specific denials made by Mr. Truman of any intention, while he was in the White House, of having an ambassador in the Vatican.

Bishop Oxnam warns that the "road to Rome leads to clericalism." - - - "to political deals with the Roman Catholic pope" and that "the road to Rome is also a road to Washington."

"The road to Rome leads to an alliance with a church that is itself a vast landholder, allied with the reaction in Europe that has often stood against the reform necessary to establish the free society."

"Is the church which insists on being a church and a state to become a member of the United

Nations? Are Mohammedans, Buddhists, Confucianists and other religionists to set up so-called states and likewise become members of the United Nations?" the Bishop asks.

Reprints of the article, "The Road to Rome" may be obtained without charge from Bishop Oxnam's office, 150 Fifth Avenue, New York City 11, N. Y.
