Mrs. Lloyd Risley called on Mr. and Mrs. Tom Shadle Friday morning.

Mr. and Mrs. George Schollenbarger were dinner guests Sunday of Mr. and Mrs. Keith Schollenbarger and family.

Joy, the Trend is to Breeze to church Sunday morning and evening. Too many Wood bury their heads in a pillow and remain in bed, or work to make their names Sparkle, or take their Sweetheart for a drive to the Surf. Maybe we ought to Dial you up and remind you of the Ivory palaces up yonder. So why not Whisk yourself out of bed on Sunday, dress up Spic and Span and Dash like a Comet to God's House? There as the cleaner is applied to your sins you can sing Praise.

We have mentioned Miss Gentry before but this time please send her a birthday card before October 10th. On that date she will be eighty years young. Please don't forget it.

Did you ever listen to such a speech? "Now I sit me down to sleep The speaker's dull, the subject deep.

Soil Conservation District News

"Sediment causes more pollution than any other substance," H. N. Smith, State Conservationist for the Soil Conservation Service, announced recently in announcing a new SCS booklet on the subject.

The publication entitled "Sediment - It's Filling Harbors, Lakes and Roadside Ditches," is now available free from SCS offices.

Smith said sediment ruins lakes, kills fish, and costs millions in taxes for dredging and filtering. It also carries other pollutants, such as chemicals, with it. Most phosphates and pesticides, for example, are carried on sediment. Erosion control measures are effective in reducing pollution from these sources.

The SCS official said the new publication points out that more than half a billion cubic yards of eroded land is dredged each year from streams, navigation channels, estuaries and harbors at a cost of 40 cents a cubic yard. Cost of keeping it out of these places through proper conservation practices would be only a fraction of that.

"Also, our sediment studies on reservoirs show that sediment is damaging practically every lake in Texas," Smith stated. "In fact, several cities have had to build new lakes because the old ones filled with mud. And this is not just a Texas problem—it's also a national problem."

Sediment also destroys spawning beds for game fish, ruins their eggs, and reduces their food supply. In many small streams across the State, sediment has filled the deep pools that were once a refuge for fish during dry weather.

Smith said that the sad thing about sediment is that it hurts the land where it comes from and it hurts the water where it goes. And it's all caused by soil erosion. He points out, however, that it's not just a farm problem. Last year, 1.5 million acres were stripped bare for housing developments, new roads, and other construction. Sometimes it's years before anything is built on this land—and, in the meantime, it erodes.

Smith thinks the only answer to the sediment problem is a

constant vigil on the part of every user of land — farmers, ranchers, housing developers, cities, and others. A sound program of soil and water conservation can reduce sediment damage by as much as 90 percent—nothing else will, he said.

POWDERY MILDEW PROBLEM ON PECANS

Powdery mildew on pecans is becoming an increasing problem in Texas, Jerrai Johnson, Extension plant pathologist, says.

This is due largely to the cool humid weather that has prevailed in the pecan growing areas of the state. The disease usually does not present much of a problem, but this year, due to the consistent rainfall powdery mildew is continuing to develop.

The disease is easily recognized by the white, powdery growth which partially or completely covers the developing nuts.

Johnson stated that a protective fungicide used for pecan scab control, such as Du-Ter, Cyrex, and Dithane M-45, will also help suppress powdery mildew.

These materials should be applied on a two to three weeks interval until the disease is no longer visible, said Johnson.

Another disease affecting pecan growers is pecan scorch. This too, is due to the large amounts of rainfall in the state. Pecan scorch is a physiological disease brought on by an imbalance of moisture, said Johnson, either too much or too little. It causes the leaves to turn brown in between the veins, appearing to be burnt.

The disease occurs randomly in the orchard and may affect the trees differently. Only control would be to maintain a uniform moisture balance under the trees through the use of irrigation, says Johnson.

CREATIVITY AND CARE FOR SUCCESSFUL PICNIC

Creativity and care are the passwords for successful summer picnics.

When purchasing picnic foods, remember those which spoil easily and avoid them. Foods most vulnerable to poisoning are potato salad, egg and pork products, ground hamburger meat, fish, sauces, poultry, dairy products and pastries, according to Gwendolyn Clyatt, Extension consumer marketing specialist.

Temperature control of food is particularly important. Cold food such as milk, salads, raw vegetables and luncheon meat should be stored and served chilled, suggests Mrs. Clyatt. Foods that are mixed with mayonnaise or cream, such as meat salads, and creamy cole slaw should be avoided when picnicking unless they are prepared just before leaving home, then transported in a pre-chilled container that will keep the food cold.

Vinegar mixed with salads, vegetables and salad dressing helps to lower the acidity of food, thereby keeping the bacteria count low. It can be combined with sugar and used as a sweet and sour sauce for vegetables, oil and vinegar dressing on cabbage and lettuce salads or as a marinade with these foods.

Meat should be cooked and served hot or it may be cooked, chilled and served cold. Canned meat is an excellent choice for food to eat outside since it keeps well. It is easy to transport and is easy to cook, reminds the Texas A&M University specialist.

If you have a portable refrigerator, Mrs. Clyatt urges that you use it to transport food from home to the picnic site.

You can improvise by using a heavy cardboard box, lined with several thicknesses of clean paper. Put ice in the box and place a covered bowl with food in it on the ice. Thermos bottles and jugs can be used to transport liquids.

After eating, don't wait to put away any left-over food. If just left in the hot sun, it will spoil quickly.

The creativeness key is stimulated through food preparation, setting the table and serving the food — let all the members of the family have a part in it, suggests Mrs. Clyatt.

The White House Regional Conference on Outdoor Recreation suggested 45 acres of State Park land per thousand population. If 8,500 people left the State, Texas would meet this standard.

AUSTIN, Tex. — Traditionally Austin has been the headquarters site for Texas campaigns of presidential candidates. But George Wallace's official campaign headquarters (American Independent Party) now is located 49 miles to the south, in New Braunfels.

It was moved from the capital city to within 30 minutes' drive of the office of the party's state chairman, Bard Logan of San Antonio. This move is significant—especially to those 600,000 Texans who are expected to vote for Wallace in November.

When the state executive committee of the American Party decided to replace Miss Jane Sumner of Austin with Jack Zengler of New Braunfels; named Sam Rains of Austin as treasurer, replacing Mrs. Margaret Bacon of Austin; and removed Mrs. Jewell Lemons of San Antonio from the committee, charges of "Birch-ism" were hurled. Miss Sumner ran for Congress on the Republican ticket in 1966 and Mrs. Bacon had served as secretary to Liberal Democrat Franklin Spears of San Antonio during Spears' 1966 bid for State Attorney General.

"It's not the Birch people that are causing the trouble," Chairman Logan says, "It's the anti-Birch people. They were all looking for Birchers when they were getting signatures to get Wallace on the ballot. Now that the job has been done, they seem to want to fight."

Logan said he didn't think the

intercine battle would harm Wallace's Texas campaign, and Mrs. Bacon said she still intends to work for votes for Alabama's former governor.

Wallace will be in the state Sept. 16 to speak at a \$25-a-plate fund-raising dinner in Dallas on the eve of the American party's Sept. 17 state convention there. He's also scheduled to speak to the convention.

**GUBERNATORIAL CAMPAIGNS HEAT UP** — Lt. Gov. Preston Smith's announcement that he would not go to the National Democratic Convention in Chicago because he would rather use that time to get better acquainted with delegates to the State Democratic Convention, to be held in Austin Sept. 17, came as something of a surprise.

But it's not the first time Smith instinctively has steered clear of battles within the party—as the Chicago scene was sure to be. He has gained some widespread and rather unexpected support from liberal Texas Democrats because he refused to go with Gov. John Connally, then Atty. Gen. Waggoner Carr and Speaker Ben Barnes to head off a migrant workers' march to Austin two years ago.

Smith, however, says he is serious about wanting to meet and talk to state convention delegates because he wants to command the convention. The September state convention is known as the "governor's convention." It will be interesting to see who wins control — the man who is governor now or the man who is the Democratic nominee.

There's no doubt among Republicans that the star of their state convention in Fort Worth on Sept. 17 will be GOP gubernatorial candidate Paul Eggers. Eggers is running a hard race against Smith.

**CONSTITUTIONAL REVISION RECOMMENDATIONS** — While Texas Democrats are taking a stormy role in nominating a presidential candidate in Chicago, a potentially historic event will be unfolding on the home front.

In a three-day Austin meeting this week, State Constitutional Revision Commission is wrapping up its final recommendations for a new Texas constitution.

Sub-committees completed their year-long studies last month. Fireworks were anticipated on these proposals:

- Four year terms for governors and all other statewide officials who now have two year terms (Recommendation would prohibit direct succession to a second term by the governor).
- Constitutional change that would also give the governor pow-

er to remove and replace appointees to boards and commissions.

- A requirement that state senate closed-door sessions on appointments by the governor be abolished.
- Authority for the legislature to instruct courts as to how they will handle appeals from state administrative agency actions.
- Provisions for county home rule and optional plans for consolidation of political subdivisions and functions within a county.
- Appointment of Supreme Court and Court of Criminal Appeals judges by the governor from a nominating commission slate of three.
- Easier access to courts for taxpayers protesting assessments.

Recommendations agreed on by the revision commission must go to the legislature next year. Legislature then can submit all or any part of the recommendations to the voters — or reject them entirely.

Aside from its recommendations of minor controversial nature, commission has made a good-faith effort to tighten and streamline the constitution and chop out long-recognized dead wood.

**APPOINTMENTS** — Governor Connally reappointed three members of the Pan American College Board of Regents to terms expiring in 1973. They are Lou Hassel of Houston, Leonel Garza of Brownsville, and McAllen Attorney Morris Atlas.

Then the Governor named Dan Eddy of Dallas to the Good Neighbor Commission to serve out the term of the late Walter McBee of Dallas. Eddy, a Salvation Army official, has been credited with establishing the Salvation Army in Mexico, and served there previously as Army field representative.

House Speaker Barnes named these committee:

- To study election laws — Reps. Ronald Bridges of Corpus Christi, James D. Cole of Greenville, Russell Cummings of Houston, Rayford Price of Palestine and J. W. Stroud of Dallas.
- To study recreational water safety — Reps. Ben Atwell of Dallas, J. D. Weldon of Port Arthur, Gerhardt A. Schulle of San Marcos, Bill T. Swanson of Houston and Leroy Wieting of Portland.
- To assist in a study to determine the feasibility of creating a Texas stock exchange — Reps. David Finney of Fort Worth, Don Cavness of Austin and Dick McKissack of Dallas.
- C. R. Baskin will be new acting chief engineer of the Texas

Water Development Board, succeeding John J. Vandertulip, who is joining the International Boundary and Water Commission in El Paso as principal engineer.

Texas Department of Mental Health-Mental Retardation has transferred Wichita Falls Hospital Superintendent Dr. Willard Segerson to that post at Austin State Hospital.

**WILDLIFE PLANS** — Parks and Wildlife Commission adopted a \$17.5 million operating budget for the next fiscal year.

Commission will ask the 1969 Legislature to appropriate money to reopen the fish and water-exchange pass between Corpus Christi Bay and the Gulf across Mustang Island.

Commission also set Texas Duck season for December 14-January 1. Daily bag limit was set at four and possession limit at eight. Goose season will be October 20-January 12, with daily bag and possession limit of five.

Studies of the ecology of prairie chickens and ways to increase their population — perhaps enough to hunt them someday — have been authorized by the Commission for the year beginning Sept. 1.

Open season was set for November 16-November 21 for deer in Devil's pocket unit, Angelina Management area.

**CITY WATER PRICES VARY** — "Water Service in Texas Cities," new publication by the Texas Municipal League, indicates a wide spread in water prices throughout Texas.

Lowest city rate is Uvalde's \$2.50 per 10,000 gallons; highest is Terrell's \$10.25. League said average water prices charged by 61 cities of populations between 10,000 and 25,000 is \$6.00 per 10,000 gallons.

**TIDELANDS ARGUMENTS AGAIN** — U. S. Supreme Court has granted Atty. Gen. Crawford C. Martin an Oct. 14 requested hearing on location of Texas shoreline or the point from which Texas measures its submerged land boundaries.

Last December a decision granting Texas ownership of tidelands to 10.3 miles into Gulf of Mexico held that where shoreline has receded, Texas cannot claim the 1845 historic boundary (which would give Texas more acreage). Federal government also would deny Texas its 10.3-mile area where the shore has built out into the Gulf.

At stake is about 36,000 acres.

Since 1950 the undisputed acreage has yielded more than \$100 million in oil-gas leasing for permanent school fund.

**SHORT SNORTS**

Texas Education agency estimates 123,855 professional educators will be needed to instruct 2,661,454 pupils who will be reporting to classes in September; and concludes that language improvement is the most important educational need to serve children from low income families.

State Banking Commission rejected an application for new American Bank of Commerce, Harlingen.

Attorney General Martin has been in Washington studying how Texas can administer its portion of more than \$100 million appropriated by Congress for crime fighting in 1968.

In spite of increased income taxes and inflation, retail sales in Texas made a three per cent gain in July over June sales, reports UT's Bureau of Business Research.

Texas Adjutant General Thomas S. Bishop says the U. S. Defense Department's decision to close Nike-Hurculese missile sites in Denton, Duncanville and Terrell will mean a \$1.4 million annual loss to Texas' economy.

**Obscenity Law Stands**

U. S. District Judge Adrian A. Spears has held valid the Texas anti - obscenity law, which uses the "contemporary community standards" of "the average person."

Spears upheld the constitutionality of the law. He said he felt there was no federal question involved, so he dismissed the suit attacking the law.

Attorney General Martin, whose office defended in the San Antonio suit, said he will ask the next Legislature to strengthen the law, removing exceptions for foreign films and films in interstate commerce. He also wants authority to get injunctions to stop the showing of films which might be offensive.

**Student Loans**

Texas Opportunity Plan — a state program for making loans available to Texas college and university students — has helped 20,121 students since the program's inception in September, 1966.

Coordinating Board, Texas College and University System reports that 42,000 loans totaling \$14,698,300 have been made, as of May 1, through 104 participating institutions.

**Short Snorts**

State Highway Engineer J. C. Dingwall has named Raymond E. Stotzer of New Braunfels to the job of District Highway Engineer at Pharr in the Lower Rio Grande Valley, succeeding James F. Snyder who is retiring August 22.

State Board of Pardons and Paroles has set Aug. 30 for a clemency hearing for James Lee Marion, who was convicted of murdering Mrs. Fred Turner of Midland on Oct. 29, 1963.

U. S. Government has transferred to the University of Texas 50 acres of land adjacent to the UT Institute of Marine Science at Port Aransas for expansion of the institute.

Arthur H. Dilly of Corpus Christi has been named assistant to the executive vice - chancellor for health affairs of the University of Texas System.

Miss Reasonover said that food definitely should not be kept at room temperature more than 3 or 4 hours. It may be cooler or warmer, she advised, but room temperature is critical.

Principal cause of food poisoning, staphylococcus bacteria, can be spread by clean hands and utensils. The cook can spread the bacteria by a sneeze or cough.

Flies, which spread salmonella infection, are another major source of contamination. But when spraying for insects, be dishes, cautioned the specialist.

**Here! New '69 CHEVROLET TRUCKS!**

Now there are even more reasons why Chevrolet is more truck.

**MORE STYLE**  
Here's the bold new look in pickups—Chevrolet's handsome new hood profile, new aluminum grille, new interior trim colors! You get a cab and Fleet-side pickup box that are double wall, double strong. America's most popular pickup is more truck than ever for '69!

**MORE LENGTH**  
New '69 Fleet-side pickups provide cargo boxes up to 8 1/2 ft. long—haul bigger payloads or king-sized camper bodies! For work or play, you get the riding smoothness of work-proved independent front suspension, the economy of Chevy truck power. Plus easier handling.

**MORE COMFORT**  
New, more comfortable seats are designed with molded foam. Thick insulation hushes road noise. Bump leveling coil springs at all four wheels on most models smooth the way. More comfort!

**MORE POWER**  
New workpower! A spirited new 350-cu.-in. V8 is standard in medium-duty V8 models. Order it for pickups, too! And there's big V8 power in heavy-weights. Chevrolet gives you plenty of workpower!

**MORE VAN FOR THE MONEY**  
Low-cost Chevy-Van delivers loads of economy with big Sixes or work-whipping V8s. Nimble maneuverability in traffic makes light of big loads. Now available with 3-speed Turbo Hydra-Matic.

At your Chevrolet dealer's now

**More trucks are Chevrolets because Chevrolet is more truck!**

**A kid's got a right to some privacy too.**

If your kid's been hiding out lately when he gets on the phone, take the hint. There are probably some things he'd rather discuss without an audience around. And he's entitled. After all, asking a girl out at his age is hard enough. But when the whole family's listening in, a guy could freeze.

Help loosen young Don Juan's tongue. Call your General Telephone business office and get him an extension phone. Then he can have his tête-à-têtes without feeling self-conscious.

When a kid feels you don't want to listen in on all his private conversations, he's more apt to tell you about them. An extension phone gives him that choice.

**Extension phones by General Telephone.**

### Governor Proclaims Nat'l Hi-Way Week

Governor John Connally has proclaimed September 22-28 as National Highway Week in Texas.

In his official memorandum, the Governor urged citizens "to devote thoughtful consideration to the contribution of highways to the lives of all Texans, mindful of the continuing need for more and improved highway facilities."

Theme of this year's observance is "Highways Are For People," pointing up the vital role played by highways in today's society. "Virtually everything Texans buy, sell or consume moves at one time or another over the highway system," the Governor's message noted.

"Highways afford broad avenues by which Texans everywhere move toward a better, fuller life in the enjoyment of the freedom of mobility that the system affords."

"The Texas Highway Department builds, maintains and operates facilities for the benefit of all Texans in every part of the State, fully dedicated to the fact that "Highways Are For People."

The Texas Good Roads Association will undertake general sponsorship of the State-wide Highway Week observance.

The Texas Highway Commission will participate in four major regional gatherings during Highway Week, sponsored by chambers of commerce.

The first of the meetings is scheduled for San Antonio at noon September 25, with a similar meeting planned in Houston that evening. The following day, a regional Highway Week observance will take place in Dallas, followed by an evening gathering in Fort Worth.

Each of the meetings is expected to attract civic leaders from a wide geographic area.

In addition, many Highway Department employees will participate in other special events marking Highway Week in local communities.

Visitors in the Jim Rampsy and Claude Thomas homes for the weekend were Charlie and Pete Bynum of Abilene; Mr. and Mrs. Calvin Bynum and Melinda of Baird; Mrs. Jim Warner and Jimmy and Mrs. Debbie Edmondson of Amarillo; Mr. and Mrs. O. B. Rampsy of Leslie; Miss Geraldine Rampsy of Pampa; Mr. and Mrs. M. C. Rampsy and Lynn Rampsy of Clarendon.

### HINTS OFFERED ON GRAIN SORGHUM HARVESTING

Weeds in grain sorghum this year may cause some problems for harvesters, Henry O'Neal, Extension agricultural engineer with Texas A&M University, says.

Wet weather has caused excessive amounts of Johnsongrass and careless weeds in many fields and the troublesome pests can foul up profits for producers.

The engineer suggests a slower speed to take care of the tough, high-moisture weeds and more care in cleaning the combine.

Each morning the operator should check all grates and sieves for "honeydew" or "syrup" which can collect and cause buildups of dust and trash and cause throwout losses of grain. Straw-walkers should also be checked before starting work each morning.

Before going into a weedy field, it is best to adjust the machine according to the operator's manual and then make secondary adjustments as field conditions warrant, O'Neal points out.

To cover the ground as quick-

ly as possible and avoid seed losses, both in uncleaned heads and cracked seeds, the operator may have to maintain a compromise speed. When the combine "growls" it is an indication of excess speed and probable seed losses.

Losses in profits for the producer can be caused by grain left in the field, cracked seeds, or dockage at the elevator.

In most fields, there is usually one spot which is weedier than the rest. The clean portion of the field should be combined first to get out the high quality seed. The weedy part can wait a longer period as it will usually result in higher moisture grain, O'Neal concludes.

Mr. and Mrs. Roy Jackson of Clarendon visited his uncles, Louie and Edd Jackson of Memphis, Saturday. Edd was pretty sick.

The failure of many teen-age marriages usually is based on three factors — incompatibility, personality failures and immaturity. Teenagers often do not have a sense of responsibility, the ability to adapt to an adult role, the unselfishness and the stability required for a successful marriage.

### TEXAS HIGHWAY PATROL INVESTIGATES 8 RURAL ACCIDENTS

The Texas Highway Patrol investigated 8 accidents on rural highways in Donley County during the month of July, according to Sergeant J. L. Dalrymple, Highway Patrol supervisor of this area.

The crashes resulted in one person killed, six persons injured and an estimated property damage of \$44,780.00.

The rural traffic accident summary for this county during the first six months of 1968 shows a total of 33 accidents resulting in 3 persons killed, 25 persons injured, and an estimated property damage of \$97,273.00.

"School bells" are ringing again. The familiar yellow school buses will soon be back on the highways. The Sergeant reminds all drivers of the state law regulating traffic in regard to school buses. "The driver of a vehicle upon a highway outside of the city limits of any incorporated city or town upon meeting or overtaking from either direction any school bus which has stopped on the highway for the purpose of receiving or discharging any school children shall stop the vehicle immediately before passing

the school bus, but may proceed past such school bus at a speed which is prudent, not exceeding ten (10) miles per hour, and with due caution for the safety of such children."

The Sergeant also stated that a training school for 120 new patrolmen with the Texas Department of Public Safety will start August 27 and a later training school during the month of October.

To qualify for employment in the uniformed services of the DPS, a man must be between the ages of 20 and 35, not less than 5 feet 8 inches tall, have a high school education or its equivalent, be in sound physical condition and be a citizen of the United States.

All interested young men who can meet these qualifications are urged to contact the nearest DPS patrolman or DPS office for complete details concerning the position of a patrolman, training and benefits.

Mr. and Mrs. Freddie Ray, Toby and Cathy of Amarillo visited her parents, Mr. and Mrs. Roy Jackson, Sunday.

Mr. and Mrs. Roy Jackson visited Mr. and Mrs. Sandy Tyler Saturday afternoon

### SS Cash Benefits To 879 Residents Of Donley County

A record \$61,253.00 was paid in social security benefits to 879 residents of Donley County for February 1968, according to Travis C. Bridges, Social Security district manager.

"February was the first month in which increased benefit rates provided by the 1967 amendments to the Social Security Act were payable," Briggs noted.

Nationally, monthly benefits to more than 24 million men, women and children exceeded \$2 billion. 2.2 million receiving benefits were disabled workers under age 62 and their young dependents. About 3.4 million beneficiaries were young widowed mothers and their children. Briggs said that a total of about \$19 million has been paid to orphaned children and their mothers since January 1940, when monthly survivors benefits first became payable.

Most of the changes in the 1967 amendments provided for protection for younger people. Children are now eligible for benefits based on the earnings of

an insured mother who has died or is entitled to retirement or disability benefits. Previously, the mother needed to have worked for at least one and a half years in the last three before retirement, death or disability.

The amount of social security covered work required for payment of disability benefits to workers who became disabled before age 31 has been reduced substantially — for those below 24 to as little as a year and a half.

Widows of insured workers can get monthly benefits as early as age 50 if they are unable to work because of severe disability or after the end of their entitlement to benefits as a widow with a child in her care.

In the county, 72 children of retired, deceased or disabled workers received \$3,527.00 for the month of February. These payments continue monthly until the child is 18 unless some terminating event occurs. If the child does not marry and continues school full time, the payments do not stop until age 22.

Mr. and Mrs. J. H. Hodges of Wichita Falls and Hearn Hodges of Lubbock visited his nephew, Mr. and Mrs. G. W. Estlack Wednesday.
