"However it is permissible for a producer to plant three rows of peas or strips 10 feet wide interplanted with other crops. This would be counted as soil conserving unless it is planted in at least three rows," the agent stated.

WHY NOT A CREAMERY?

There is no better dairy section in Texas than old Donley county. Other sections have found a creamery profitable to dairy cow owners. With the proper number of cows, Clarendon can get a creamery. Our bankers have all along been strong for the cream can method of farm income. They are willing to help with securing a better market for raw milk. Why not a creamery in Clarendon?

KING NO SNITCHER.

Never heard of him before Tuesday, but Joseph King of Harris county, candidate for governor, is the first candidate to mail campaign matter that was printed entirely by a printer. Most of them use a cheap mimeograph machine, the product being illegible in many instances.

King proposes to fire: Pardon and Parole Board; Liquor Control Board; abolish 'white collar' pension investigators and turn it over to the county judges; cut out poll taxes and reduce taxes by reducing state and county hired help in general. He at least has a platform whether we agree with it in its entirety or not. He is a Houston business man.

DONLEY COUNTY MUSEUM.

The management of the Museum invites your presence Sunday afternoon from two to six o'clock during which time the Museum will be open for public view. This civic enterprise, sponsored by patriotic ladies of the Les Beaux Arts club, has grown beyond the most sanguine expectations of the founders. Very little assistance has been given the ladies from the beginning. Little has been asked. The school board has been most gracious in complying with requests within the scope of its authority. Donors have been liberal in giving or lending articles to the exhibit.

Today, the Donley County Museum takes rank among the leading museums of the state. It is a Donley county enterprise. It is maintained for public benefit.

One can vision ahead in the near future a large fire-proof building constructed of native stone located in the richest fossil field in the world. Donley county has been sleeping on her rights. Students could easily be drawn from all parts of the Globe to attend a department of paleontology in the local municipal college. We have the natural resources—all that it takes to make an institution of national reputation. Shall we make use of it?

\$35,000 Holdup!

NETS ROBBERS \$20 IN CASH!

Bandits forced a messenger from a large Chicago firm to give up a satchel containing \$35,000. But their net "haul" was only \$20. The satchel was filled with checks for deposit in the bank. The checks were recovered several hours later from under the seat of a street car where the robbers had thrown them.

Paying by check is a guarantee of protection in the transmission of funds. For the individual, it is effective insurance against loss by burglary, or in other ways.

GARDEN GLANCES

"America beautiful lies in the hands of the gardeners."

If any colorful spots are seen in your glancing pilgrimage this week, you will have to look carefully.

One of the most gorgeous shrubs is the snow ball bush at the south of the Crockett Taylor home. There are several lawns that have snow ball bushes that were partially damaged, and the remainder is blooming now.

The small annual phlox, pinks, periwinkles and many small flowers are to be seen in quite a few flower beds and rockeries, but this is rather a conservative week for

showy plants. However, the dainty foliage of the trees is beautiful at present, and the flowers can be enjoyed later.

TEMPLE OF TRUTH By the Apostle

Forty years ago Glidden & Sanborn of Amarillo sold barbed wire over the southwest. It was high in price, but mass production and competition finally brought down the price. Now that fencing is done with but one wire is enough to make old Glidden flop over in his grave. The single wire is charged with electricity, home made, and is most effective for any kind of animal. I saw some hogs being kept inside a single wire fence near Petersburg recently. The cost is said to be about \$10 a mile.

There is Always Worship Fellowship :: Service

Perhaps the most interesting study on earth is humanity. Many groups of people specialize in a study of societies needs and relationships, some reaching one conclusion and some another. However, all agree that people are more alike than different. Humanities heart every where hungers for the higher things in life; be they beggars or kings, politicians or preachers, leaders or followers, rich or poor, intelligent or ignorant, high or low; all hunger and thirst, grow tired and relax, get sleepy and rest, have ambitions and are disappointed, enjoy health and are subject to the same disease, accumulate wealth and lose it, build reputations and have them torn down, acquires places in the limelight and sink into forgetfulness, and at the last all hold a rendezvous with death. Immortality and life after death is the desire of every human being, whether they admit it or not. The desire is there. God through Christ has provided a Savior for sin sick souls, and he may be had for the asking. Humanities hurt can be healed by Christ, the great healer of all hearts. "Commit thy way unto the Lord, trust also in him and he shall bring it to pass." Be in the services of your church Sunday. We believe that you will not be disappointed.

Regular services at the Baptist Church. You will make us happy by coming.

Jim Haile of Wichita Falls visited in Clarendon this week.

MUSEUM SIDELIGHTS

The Museum has had a number of visitors recently, among them Mr. and Mrs. John Esten Cooke of Rockdale, and T. L. Benedict, former residents of Clarendon, accompanying them were Mr. and Mrs. Joe Horn. Mr. Horn presented to the museum a raw-hide rope made by himself, and Mrs. Horn gave two hand-embroidered bolster shams, made in 1923.

Other loans and donations this week are as follows: a fossil of a pre-historic water turtle, dating back millions of years to the Lower Miocene age, found near Lusk, Wyoming by N. J. Vaughan, a paleontologist from the American Museum of New York, who has been making explorations in Donley County. Jean Taylor loaned some beads and a small carved elephant made of bones and shell, and brought by Alfred Taylor from Panama. Mrs. T. W. Eanes loaned a jewelry box, used in 1863, and an ornamental comb used in 1888. C. L. Polk loaned a horn-handled knife made by himself 35 years ago, a bullet-mold and shoe-pliers 75 years old, and a draw-knife owned by his grandfather a hundred years ago. Mrs. Phil Engle has loaned a painting, done by herself, of the noted old buffalo, Sykes, once leader of the herd on the Goodnight ranch.

George Seaton gave to the museum a curry-comb 50 years old, a crow's nest containing a crow's egg, an odd-shaped hen's egg, and an old history book of interesting age. A churn-dasher given by Mrs. J. D. Swift, a potato-masher used in the old Methodist College kitchen, and a pair of fire-tongs loaned by Tom Tucker, are also late additions to the collection.

OLIVER ROW CROP "70"

Row Crop "70" Brings Modern Power to Modern Harvesting

Roll easily and quickly through your harvest with an Oliver Row Crop "70" pulling and driving an Oliver Grain Master Combine. It's just one more job in the busy year-around schedule of the "70", and as the lucky owner of the outfit you'll know the "70" has everything, does everything and is a beauty to operate as well as to look at. You'll discover its great economy, easy-handling and fast working speeds that get jobs done in a hurry at lowest cost.

Smooth, lively, 6-cylinder "70" power is ideal for operating small combines or similar power take-off jobs, and belt work such as driving a 22x36 thresher. The steady overlapping power of six cylinders means more effective delivered power for such work. Power take-off and belt pulley speeds depend directly on engine speed, and are independent of tractor travel. Finger-tip control of all operations, from the comfortable driver's seat, and automotive steering mean easier driving, time-saving operation. The Oliver Variable Speed Governor Control enables you to use only the fuel needed for the work.

Oliver builds the "70" in two fuel types for maximum fuel economy—the "70" HC with high compression engine for gasoline, and the "70" KD with engine designed for kerosene or distillate. Pick your fuel and your "70". Get modern low-cost tractor power. See us today about a demonstration.

Generally speaking, the longer a crude has been mellowing and filtering in the earth, the tougher the lubricating film it will provide. Sinclair Opaline and Sinclair Pennsylvania Motor Oils each give a lubricating film that is ten times tougher than your engine normally requires.

Isn't this the real problem of Beer
— and almost its only problem?

THERE ARE people, of course, who steadfastly and sincerely believe beer to be intoxicating, or its use sinful, harmful, or a first step toward use of "hard liquor."
 Just as sincerely we hold that the weight of the evidence is overwhelmingly against them...that beer is a mild, wholesome food beverage...and that "there is nothing more promising to combat the evil of too much alcohol than the opportunity of drinking good beer."
 No...it is not in beer itself, we believe, that its gravest problem lies, but in those conditions, undesirable to us all, which sometimes surround its sale.
 How should that problem be handled... by brewers, by retailers, by consumers, and by the public authorities? On its handling, we believe, depends the ultimate success or failure of the art and science of brewing, with all its manifold contributions to human pleasure and happiness and to the farm and industrial welfare of this country.

In that belief, a short time ago the Brewers Foundation was organized... to align the brewing industry with forces working for the public good in this country.
 Our underlying motive... to perpetuate and promote our industry... is of course obvious. But equally obvious, we hope, is the fact that our interests coincide with the public interest.
 Important progress has been made. Brewer-members of the Foundation already represent nearly half the production of beer and ale in the United States; and these members are pledged, individually and collectively, to the Brewers Code, one significant clause of which is as follows:
 "We pledge our support to the duly constituted authorities for the elimination of anti-social conditions wherever they may surround the sale of beer to the consumer."
 Being practical men, we promise no miracles. We cannot immediately or effectively "police" the quarter-million points where beer is sold (nor, to be fair, have we legal authority in many cases to do so). Nor can we, immediately, bring about full compliance with the law among all retailers, nor honest enforcement by all authorities.
 But a beginning has been made...and we do promise that you will see results from it.

How far we can go, and how soon, depends very much on ourselves...but partly also on you.
 Public opinion, once aroused, can operate to bring about honest enforcement of existing laws. Restriction of your patronage only to legal, respectable retail outlets can and will operate to raise retailing standards. Public preference for the products of Foundation members* will bear witness of your approval both to members and to cooperating retailers, and will encourage them to renewed efforts.

This is, therefore, at once a statement of our objectives and an appeal for your support, without which we must fall short of our high hopes. We urgently invite your full and sympathetic cooperation.
