1878 A COUNTY-WIDE PUBLICATION, SERVING DONLEY COUNTY and ITS TRADE TERRITORY 1948

Soil Conservation Meeting To Be Held November 19th at Mulkey Theatre

Another group of West Texas communities are to be visited November 15th to 19th, inclusive, by conservation minded officers of Burlington Lines and the Second National Bank of Houston, who are continuing their cooperative efforts to bring the pressing need for the conservation of our topsoil and other natural resources to the attention of every person who can be reached. Included in the present plans also, are the United States Soil Conservation Service and the Texas A&M College Agricultural Extension Service.

A series of five soil conservation meetings are scheduled in as many strategically located towns in the territory served by Fort Worth and Denver City and The Wichita Valley Railways. This is the third series of similar meetings held along the lines of these railways during 1947 and 1948.

H. M. Breedlove, county agent, announced that he had been advised by the Fort Worth and Denver Railway that the meeting would be held in Clarendon on November 19th at the Mulkey Theatre at 2:30 in the afternoon.

A large group of news writers and representatives of Burlington Lines and the Second National Bank of Houston will be present at each meeting, where talks are to be made by O. Dooley Dawson, vice president and manager of the bank's agricultural department, Houston; Dr. Roy L. Donahue of Texas A&M College Extension Service, College Station; and H. M. Bell of U. S. Soil Conservation Service, Fort Worth; Roy Jewell of Hedley, Chairman of AAA committee in Donley County and J. R. Porter, chairman of Board of Supervisors of Donley County Soil Conservation District.

Dawson, a Texas A&M College graduate in 1932, has acquired a wide range of experience in soil conservation work. He was in the U. S. Soil Conservation Service in Texas for 11 years before affiliating with the Bank, has traveled thousands of miles over Texas, and has talked to more than 50,000 persons in bringing home to individual Texans today's vital message of conservation. His talk naturally will deal with the relationship of soil conservation to business and industry generally, and to its great importance to each and every citizen.

Dr. Donahue, a native Texan, presently is Supervisor of Tennessee Valley Authority Program in cooperation with the Extension Service. From farm laborer to university professor, his experience in agricultural work has carried him over much of the United States, including posts

General Election Draws Good Vote

Voters in Donley County turned out in full force Tuesday to re-elect Harry S. Truman to the Presidency of the United States and give their support to Lyndon Johnson as Senator and Gene Wörley as Congressman. The hospital support election also carried by an overwhelming majority.

Only partial returns on some of the candidates were tabulated Tuesday night but they gave a definite trend as far as all candidates and other issues were concerned.

The unofficial returns gave Truman 1372 votes, Barkley 1368; Dewey 241, Warren 239; Thurman 71. In the Senatorial race Johnson received 1285 and Porter received 342. In the Congressional race Wörley received his usual majority with 1508 votes against Haley's 74.

The hospital issue carried with 1119 votes for and 179 against with the Hedley box still out, but it has been understood that the issue carried down there by a good majority.

School Carnival Is Great Success

The P.T.A. sponsored school carnival, which was held last Thursday night, was a great success in two ways. A sizeable amount of money was raised and everyone who attended seemed to have a very enjoyable time throughout the entire evening.

It was understood that over \$1,500 was raised in the queen contest and the carnival, as a whole. Miss Janet Mooney, daughter of Mr. and Mrs. Bill Mooney, was chosen as queen to reign over the occasion and was crowned at the High School gym at 6 p. m. Thursday evening. The other contestants served as attendants.

It has been reported that the money derived from the carnival will be used by the P.T.A. organization to improve the lighting system in the Elizabeth Stevens ward. This was something that has been needed badly for a long time and the ladies who put in many tireless hours to see that the carnival was a success, are to be complimented highly.

Bronchos Sparked To Beat Wheeler Friday Night

MRS. E. A. WEAVER BURIED AT QUAIL

Mrs. Emma Arminta Weaver, 77 years old, resident of Hall and Donley counties since 1908 died at her Quail residence Sunday night. Funeral services were held there this morning with Rev. B. A. Hansard officiating, assisted by Rev. L. S. Stonecipher.

Survivors include two daughters, Mrs. J. L. Dollar of Quail; Mrs. Melvin Green, Pampa; three sons, O. R. of Morton, L. H. of Alamogordo, N. M.; O. J. of Wellington; two sisters, Mrs. J. L. Weaver, Hanlon; Mrs. B. L. Adkinson, Wellington; and a brother, Jim Hubbard, Hanlon.

Burial was in Quail cemetery with the Murphy-Spicer Funeral Home in charge of arrangements.

WALDROP SERVICES HELD THIS MORNING

Funeral services were held this morning at the First Baptist Church for Vernon Emerson Waldrop with Elder Grant C. Glazier conducting and Elder F. J. Blake and Elder T. K. Lyman speakers.

Mr. Waldrop, age 73 years, retired farmer, passed away at his home here Monday afternoon. He was a resident of the Brice community for a number of years before moving his family to Clarendon a few years ago when he retired.

He is survived by his widow, of Clarendon, three daughters, Mrs. Ora Lella Reber Littlefield, Ariz.; Mrs. Nannie Ruby Duncan, Wynnewood, Okla.; and Miss Della Waldrop, Clarendon; four sons, Young L. and Vernon E. Waldrop, both of Borger, William E. and James Waldrop, Clarendon; one sister, Miss Suda Waldrop, Amarillo; and two brothers, L. L. and W. H. Waldrop, both of Clarendon.

Pallbearers were Star Johnson, Cal Holland, Joe Woods, J. C. Johnson, Chas. Murff and Hope Lemons.

Burial was in Citizens Cemetery with the Murphy-Spicer Funeral Home in charge of arrangements.

That spirit to win is running at its highest peak this week as the Broncos prepare for their onslaught against the Wheeler Mustangs at Wheeler this Friday night. The entire Bronco squad has that determination to win and they will be in there 100 percent to do a job of it as they need to win this game and the one against Memphis next week to average 500 percent for the season.

Coach Clinton reported that the boys were in good shape for the game and that they had come a long way since the first of the season as a ball club that can give any of the boys plenty to think about. "The boys are going over there to win Friday night and I think they can do it," he added.

Tatum is the only regular who will not see action Friday night. He is suffering from an injured knee which will probably have to be put in a cast. There are other regulars who will get to sit on the sidelines also but this will be due to the fact that some of the second team has moved into their slots. Incidentally those boys, called the second stringers, have been holding their own with the regular squad all week and either team would be a first class outfit to send out on the field. The Captains for the week will be Buster Bain and J. P. Carille.

The probable starting line-up starting with right end will be as follows: Heatherly, Clifford, LaGrone, White, Travis Mulanax, Whitaker and Wilson. In the back field will be Jenkins at the quarterback slot, Bulman in the full-back position and two spark plugs from the Lefors game in the other two backfield positions: Carille at left half and Trussell in the right half spot.

The game time Friday night will be 8 p. m. so get the 'ole bus gassed up and ready to go along and give the Broncos that moral support they need from the sideline.

FARM NEWS

HURRAH, YIPPEE, and all of that old stuff, anyway that is what we promised if we got any more money for the Agricultural Conservation Program. We did get some money last Monday, October 25. We first got \$2,000.00 and Mrs. Ritter was so happy she screamed and she got \$2,000.00 more to keep quiet. She's been so busy ever since that she hasn't had time to make much noise.

The money is going fast but we still have some left, so if you need any assistance for a good conservation practice just come on in and we will be more than glad to help you all we can.

We want to remind you that it is coming time for you to elect your 1949 Community Committeemen. If you are happy with the man you have go show him you are by casting your vote, if not, do your part to elect another one. You will be notified in plenty of time when and where the elections will take place, and if it is not convenient for you to vote let us know and we will send you a ballot which can be mailed back to the office.

R. A. Beverly looks much happier this week since the rain. He hasn't been able to build many terraces or tanks since it got so dry. We are going slow on approving dams, tanks, and terraces until we know how many more farmers plan to leave stubble on the land or apply 20% superphosphate to their winter legumes.

We want to thank the Farm Bureau for the good food and entertainment they presented last Friday night. I know that we were not the only ones that enjoyed it, because Mr. Wood said they fed 225 people.

ENTHUSIASM GROWING IN IRRIGATION PROSPECTS

The prospects for irrigation in Donley County are growing right along. John Gillham's well is still holding up good with a steady stream flowing around 500 gallons per minute. A new well being drilled this week on the Kermit Evans farm south of Ashtola looks mighty good at this time. Drilling will probably be completed by noon today and after the casing is set they should be ready to pump the well some time Friday. The depth of the well is 208 feet with 120 feet of water sand. The drillers figure the well will probably fill an 8 inch pipe.

BRONCHO MOTHERS CLUB TO SPONSOR CAKE WALK SATURDAY NIGHT

The Broncho Mothers Club will sponsor a cake walk Saturday night at 7 p. m. If you wish to donate a cake for this walk to help the boys, bring it to the H-B Electric Shop by 5 o'clock.

Everyone come and win one of these nice cakes for 15c.

NEW TRAIN SCHEDULE

Effective Sunday, Nov. 14th, schedules will be as follows:

South Bound train No. 7 will arrive Clarendon 11:10 AM instead of 11:50 AM.

South Bound train No. 1 Zephyr will arrive Clarendon 12:34 AM instead of 1:25 AM.

North Bound train No. 8 will arrive Clarendon 7:31 AM instead of 7:06 AM and North Bound train No. 2 Zephyr will arrive Clarendon 8:34 PM instead of 8:56 PM.

The Zephyr trains Nos. 1 and 2 will stop at Clarendon on Flag only when having passengers to discharge or get on and Parties holding round trip tickets should notify agent of their desire to get on this train in advance of train arrival.

RUNDALL SELLS INTEREST IN BUSINESS HERE

Announcement was made this week of the purchase by Homer Estlack of the interests of Lon Rundell in the partnership of Rundell & Estlack Machinery Company. Mr. Rundell moved to Marlin, Texas several weeks ago due to his health, and has sold his interests here to avoid the inconvenience of having his business interests so far away from his permanent home. He sold his 291 acre farm located north of Martin to Cap Morris.

"The business will remain in the same location and will feature Allis-Chalmers Farm Machinery, Oldsmobile automobiles and appliances as has been the policy in the past," Estlack stated.

BROTHER OF LOCAL MEN DIES IN IDAHO

Roy E. Taylor, brother of A. M. Taylor and Homer Taylor of this city, passed away at Nampa, Idaho Sunday night. Funeral services were held there Tuesday afternoon.

Mr. Taylor was raised and received his education here in Donley County. He had lived at Nampa for the past 12 years.

Other survivors include 3 daughters, one son, two other brothers and two sisters.

S. W. LOWE BUYS CONTINENTAL AGENCY HERE

It was announced this week that S. W. Lowe had purchased the interests of Johnnie Blocker Jr. in the Continental Oil Company Agency here. Mr. Lowe checked in as the local Mileage merchant this morning.

Mr. Lowe was formerly with the Sinclair Refining Company. The latter company has withdrawn from this portion of the country due to distribution difficulties. Mr. Lowe will maintain his offices at the Continental Oil Company warehouse and invites his friends and customers to visit him there.

GENERAL RAIN VERY BENEFICIAL

The general rain which was received here Sunday night and Monday was welcomed by practically everyone even though it slowed down the cotton pulling and other crop gathering operations. The moisture varied from around an inch to three inches in some sections of the county. It was just exactly what the wheat farmers were waiting for, and it should help considerable in holding down the dust storms that were in prospect if it had remained dry.

MUSICAL VESPER SERVICE AT METHODIST CHURCH SUNDAY

AVIATION CLUB TO SPONSOR DANCE NOVEMBER 13

On Saturday night, November 13th the Donley County Aviation club will sponsor its second informal dance at the Clarendon Municipal Airport between the hours of 8:30 and 1:00 o'clock.

Again, cokes, coffee and doughnuts will be available at a nominal fee. Cards and dominoes will also be available for those not caring to dance.

The loud speaker system has been completely overhauled and no annoying breakdown can occur this time. The records for the music will be expertly selected ahead of time and will contain a wide enough variety to please the most "choosy" of dance critics.

Two more night plane rides will be given away at this dance which added to the four last dance makes a grand total of 6 free rides. Again, weather permitting, these rides will be used this same night.

Remember the price is only 75c per couple or 50c stag with an excellent chance of drawing free plane ride. That's cheap enough for a nights entertainment.

LELIA LAKE SCHOOL TO RE-OPEN MONDAY

Supt. Craig Johnson reported this week that the Lelia Lake school would re-open for school Monday, November 8th. The school has been in recess for cotton picking.

Mr. and Mrs. Geo. McKee visited relatives at Borger Sunday.

FARMERS IN DONLEY COUNTY MAY LOSE \$150,000.00

The farmers in Donley County may lose as much as one hundred and fifty thousand dollars in one year if the farm program bill passed near the close of the last session of Congress is not amended. The price of cotton is always lower than the government loan rate and this bill passed provides for a reduction, in the loan on cotton, of as much as \$20.00 per bale. This is not the only defect of this bill, and unless it is amended the farmers of the nation are the ones to suffer.

The Honorable Eugene Worley has said that it is easier to pass a bill than to change one after it has been passed. He also stated that in the last session of Congress there were some eleven hundred lobbyist in Washington supporting various bills and that of this number there were only eight representatives of farm people.

The Farm Bureau Federation is conducting a special drive to secure new members, and the membership fees collected are used for the purpose of providing representatives for the farm people. The FBF saved the average farmer more last year than his membership fees would have been. They did this by getting tax free gasoline for farm use. They were responsible for that bill passed by the state legislature in 1945.

Other things being done at the present time includes the rural road improvement bill. They plan to do this by taxing natural resources, other organizations would rather have a heavier tax on farm products. Farm Bureau is trying to get amendments in the national farm program to benefit the farmers.

Now is the time to pay your dues and become a member of this organization. You who are not members are urged to join, and those who are members and have not paid their 1949 dues are urged to do so as soon as possible. Let's help ourselves and JOIN NOW!

SERVICES HELD TUESDAY FOR MRS. N. E. DAVIS

Funeral services were held Tuesday afternoon at the First Baptist Church for Mrs. Nancy Elizabeth Davis with Rev. L. A. Sartain officiating.

Mrs. Davis, age 79 years, passed away Monday afternoon at the Groom hospital. She was a native of Georgia and had been a resident of Donley County for the past 32 years.

Survivors are one son, Z. D. Davis, Clarendon; a sister, Mrs. Joe Orr, Crowell; three brothers, Jonathan Blevins, Smithville; Henry Blevins, Crowell and William Blevins, Truscott, Texas; and four grandsons, Colvern, Wendell, Jerry and Z. D. Davis Jr., all of Clarendon.

Pallbearers were Frank Hardin, Glenn Williams, Dudley Wilson, A. H. Moore, Mark Raney and A. W. Simpson.

Burial was in Citizens cemetery with the Murphy-Spicer Funeral Home in charge of arrangements.

Broncs Defeated By Lefors, 18-13

"The game just didn't last long enough," was the conviction of local football fans who watched the Clarendon Bronchos chalk up 13 points against the Lefors Pirates in the fourth quarter there Friday night.

The Bronchos were held to a no-score game during the first three quarters of play while the Pirates made three touchdowns, two in the second period, and the other in the third.

H. Dickerson, Lefors back, intercepted a pass on the Broncho 20, thrown by Jimmy Jenkins and ran it back for Lefors' first score. A few minutes later, he intercepted another of Jenkins' passes deep in Lefors territory. A 60 yard run by Freddie Newson was followed up with a ten yard run and score by Friday Todd just before the half-time. Late in the third period, Lefors made their third score with a pass from Rice to Butler. Lefors made no conversions at all.

A highly successful aerial attack brought the Bronchos' points in the fourth. Jenkins carried the ball over from the five climaxing a sixty yard drive, 20 of which were made by passing. Jenkins kicked for the extra point to bring the score to 18-7. A few minutes later the Bronchos opened another aerial attack which again paid off with a touchdown. Wayburn Wilson tossed one to Jimmie Jenkins in the end zone from the 20 which was miraculously completed as it bounced from a Lefors blocker's hands into Jenkins'.

CITY-COUNTY LIBRARY NOTES

By May L. Prewitt

The new books added this week are as follows:

Junior Section: "The Phantom Freighter", one of the Hardy Boy series, and "Cow Country" by Will James.

Fiction Section: "Mary Arden" by Grace and Ruth Livingston Hill; "The Victory of Paul Kent" by Garth Hale of Lubbock Tech, and it is a recent Book of the Month edition, and "A Treasury of Dr. Stories" by Fabricant—that is they are collected and edited by him. It consists of a collection of thirty-five doctor stories by the world's greatest authors. It is an entirely new departure in anthology. In this

unique collection you will find pieces that reflect moods, sentiments and behavior of these professional people.

A non-fiction edition is "John Goffe's Mill" by George Woodbury, who was formerly a Harvard archaeologist, and he relates how the old New Hampshire grist and saw mill is rebuilt and turned into a rural industry designed for happy living. Next of interest is "Bride of Fortune" by Kane. This is a novel based on the life of Mrs. Jefferson Davis, and is quite popular as a southern best seller. Last is "Birds In the Garden and How To Attract Them" by Margaret McKinney. It gives excellent suggestions, 48 garden birds in full color, and 86 superb photographs.

While reading "Flower Grower" this week I noticed that the "Book List" section recommend-

ed three books of our Library Garden Shelf. They are "Roses for Every Garden" by Allen; "Garden Magic" by Biles; "Garden Flowers In Colors" by Foley, I think was the third one mentioned.

We now have exactly a hundred memberships. When you consider that 25c furnishes reading material for 3 months, this is inexpensive reading. Children's Book Week is from Nov 14 to Nov. 20th. I wish we could provide for more books for children, but their books are as expensive as grownups. Except a few collections. Some of the series are inexpensive, but the funds are rather limited and there is a fair supply for all the patrons. Langford once said, "No matter what the rank or position may be, the lover of books is the richest and happiest of the children of men."

Mrs. Geo. Norwood and Mrs. Bess Stricklin spent the weekend visiting their daughters, Mr. and Mrs. Robert Semrad and Mr. and Mrs. Courtney Brook and family.

MARTIN

By Mrs. J. H. Helton

Those to visit in the home of Mrs. R. W. Davis the past week were her sister, Mrs. J. B. Burch of Dallas, a brother J. R. Shannon of Ogdon, Utah, and a nice also of Dallas.

Mr. and Mrs. W. D. Higgins and Bobby Neal Cole visited Sunday in the home of their son Dock Higgins at Amarillo.

Sam Cannon of Vernon and Lennie Cauthen of Memphis visited Wednesday night in the home of their sister, Mr. and Mrs. Geo. Bulman.

Mrs. Barry Norton and son of Pampa are visiting in the home of her parents, Mr. and Mrs. Will Jordan.

Gary Fitzgerald of Clarendon spent Friday night and Saturday with Mrs. Pete Land.

Mr. and Mrs. R. C. Rodgers of Amarillo visited in the home of

her mother, Mrs. R. W. Davis Saturday night and Sunday.

Mr. and Mrs. W. W. Mangum of Turnersville, Texas spent Friday night with Mr. and Mrs. Ben Kyser. They all visited Mrs. J. E. Hollingsworth in Amarillo Saturday.

Mr. Rufus Pool of Calif. visited last week in the Richard Cannon home. His mother Mrs. Pool accompanied him home for a visit. Mr. and Mrs. Frank Davis and girls of Hedley visited Sunday in the Kyser and Davis homes.

We are sorry to report at this time that Mrs. Otho Elliott got her leg broke Saturday.

Those attending the house warming at W. D. Higgins Friday night were Mr. and Mrs. Will Jer-

dan and Perry, Mr. and Mrs. Walter Morrow, Mr. and Mrs. F. C. Crofford, Mr. and Mrs. Stevenson and Juanell, Mr. and Mrs. Guy Sibley and Wanda, Mr. and Mrs. L. L. Waldrop, Mr. and Mrs. Ray-

mond Waldrop, Bobby and Tommy. Refreshments of cocoa, coffee and cookies were served.

Mrs. Van Kennedy was in Amarillo Saturday.

THE TEMPLE OF TRUTH

By the Apostle

One reason some women are happier than others is that they pay more attention to getting results from a frying pan than their own.

When in doubt as to whether to use a fork or a spoon at a swanky feed, just play safe by using a knife.

Bachelors must have horse sense. They are always stalling around.

One great advantage in being a dog is that some one else must pay the tax.

There are two happy periods to a fishing trip. One is just before you get to the place to fish, and the other is when you are leaving the darn hole.

A small town is where every one else knows it is a boy before the father does.

A local girl tells me that if she ever falls in love it will be at purse sight.

Ninety percent of the men who look around to find an argument are said to be single.

The latest thing out is a Wallace salad. It consists principally of eggs and tomatoes.

A man's reputation is a blend of what his friends, enemies and acquaintances say behind his back.

Now that the political arena has cleared, we will go right on wondering what this old world is coming to.

One of the heights of disappointment is reached when a friend of long duration drops back into the limbo of mere acquaintances.

Sorcery Skirt

Skirt that can be worn three ways is shown above as pictured in the November issue of Cosmopolitan magazine. Cinch the waistline tightly with its cummerbund and top it with a revealing blouse, as shown at lower right, and you're ready for cocktails. Raise and tie the cummerbund into a snug fitting bodice, as shown at lower left, and you're dressed for dancing. Leave the bodice high and cover it with a simple jersey as shown above, and you're set for luncheon.

Big Shipment

When the American Bible Society finished printing 150,000 Japanese Bibles, the largest edition that ever came from the presses, it required eight box cars to carry these books from New

York to the coast for shipment to Japan. The Japanese are showing such interest in the Bible that another large edition was put on the press by the Bible Society.

State Breeders Seek New Chick With More Meat

Poultrymen in Texas will have an opportunity to win cash awards while working toward improvement of their own flocks by competing in a new three-year, nationwide program launched at a meeting of leaders of the nation's three-billion-dollar poultry

industry at Lexington, Ky., last week, Oct. 28th.

The new Chicken-of-Tomorrow, announced by H. L. Shrader, senior extension poultryman of the U. S. Dept. of Agriculture, is designed to bring superior meat-type chickens to American dinner tables by encouraging the breeding and development of plumper, meatier birds which can be more economically produced.

"The initial three-year Chicken of Tomorrow program which concluded last June in Delaware, proved conclusively that definite improvements in meat-type characteristics can be achieved," said Shrader, who is chairman of the contest committee. "Much valuable breeding information has been distributed to the growers, while scientific data compiled by committee officials has proven of the utmost importance to the entire poultry industry.

"Inspired by the success of the initial contest, the nationwide interest created in the development of superior meat-type chickens, the educational value of dressed bird shows, and the opportunity to further improve the product, the national committee agreed unanimously that a new three year program is imperative," Shrader added. "At the request of this committee, A&P Food Stores have agreed to continue sponsorship of the contest."

Current plans call for a series of state and regional contests in 1949, additional state and regional trials in 1950, and a national championship final in 1951, with a new set of awards offered by the food chain.

Texas activities in the Chicken-of-Tomorrow program have been under the supervision of a hard-working committee headed by F. Z. Beanblossom, poultry marketing specialist at Texas A&M College, College Station. The ex-

cellent calibre of the state competition is indicated by the fact that two state contestants, Frank W. Allenson of Brenham and Western Hatcheries of Dallas, were among the 40 entrants throughout the country selected to compete in the national finals last June in Delaware.

Health Notes

From statistics compiled by the State Health Department, Dr. Geo. W. Cox, State Health Officer has disclosed that a lack of proper refrigeration contributes materially to the total disease outbreaks for one year, caused from foods other than milk and milk products.

During the year, there were 299 outbreaks of diseases from contaminated foods, incapacitating 12,526 persons, 7 of whom died. "The food poisoning was usually caused from contamination through insanitary conditions, infections of food handlers, or of even more significance, lack of early and adequate refrigeration," Dr. Cox said. "Even when

contaminated, foods will seldom develop toxins sufficient to cause poisoning if properly refrigerated promptly after preparation. Outbreaks caused from foods have totaled nearly six times the number caused from water of milk."

The State Health Officer pointed out that the consuming public is, in many areas, protected by proper enforcement of sanitation standards for eating establishments such as are set up in the United States Public Health Service Milk Ordinance and Code. The public is entitled to a good, clean, safe and wholesome food supply, including milk which has been produced under strict sanitary conditions and properly refrigerated. This is a great protection against disease outbreaks caused by contaminated foods of various kinds, and Dr. Cox said this was especially obvious in view of the fact that no disease outbreak has as yet been traced to pasteurized grade A milk, which had been adequately refrigerated.

Donley County Leader, \$2.50 year

DEBUNKS POPULAR THEORIES ABOUT POPULARITY

DENTON — Because he debunked popular theories about popularity, Dr. Merl E. Bonney of the department of education and psychology at North Texas State College has won recognition from Edward Albert Wiggam, author of books popularizing the findings of science.

Chapter 12 of Wiggam's "New Techniques of Happiness" is devoted to Dr. Bonney's six-year study of a group of Denton school children.

Friendly attitudes, kindness, helpfulness and willingness to give way to others do not necessarily win friends and achieve social success, Dr. Bonney said. Nor will a high I.Q. reveal whether children are going to be

popular or well-adjusted; achieve social success, the NT psychologist found.

Giving a flat "no" to both these general misconceptions, Bonney discovered that the popular pupils were not necessarily friendly but combined friendliness with aggressiveness; made positive contributions to the group.

"The latter is especially important," he concluded.

A woman's promise to be time carries a lot of wait.

For High and Low Blood Pressure Available at Rexall Drug Company

If your John Deere Equipment needs parts replaced, you'll find it pays to replace them with only genuine John Deere Parts.

Why? Because each John Deere Part is the identical twin of the part built into your equipment. It's made from the same high-grade materials . . . from the same patterns and dies . . . with the same quality workmanship as was the original part it replaces. Genuine John Deere Parts are made to fit right . . . to last longer.

Check over your John Deere Equipment now. Get it set to go when the next working season arrives. Place your order with us for genuine replacement parts for your John Deere Equipment the next time you're in town.

From where I sit... by Joe Marsh

"Husbands, Wives, and Marriage"

Maybe you read that survey published recently in a national magazine, entitled "Husbands, Wives, and Marriage."

It showed that among happily married couples, those who criticized themselves outnumbered those who criticized the other person. Among unhappily married couples, it was just the opposite—each one tended to criticize the other.

That's the way it is in our town, as I guess it is in yours. Criticism, whether it's of a wife's taste for hats, or a husband's taste for pipe

tobacco and an evening glass of beer or ale, is a sure start towards unhappiness.

As for what made happy marriages, companionship within the home was listed most important of all. And from where I sit, a husband and wife who can spend an evening by the fire—with nothing more exciting than a mellow glass of beer, and a friendly conversation—are a truly well-matched couple!

Joe Marsh

A sweetheart for a winter start!

Want to get off to a good start? Then let your Conoco Mileage Merchant steer you right...

He'll tell you that when it comes to fast, smooth winter starts, a lot depends on having the right kind of oil in your engine. He'll tell you, too, the right oil is winter-grade Conoco Nth Motor Oil. For two reasons:

First, because winter-grade Nth is specially refined for cold-weather performance. It's lighter... freer-flowing. Saves wear on your

battery... and on your nerves... because it gives you faster starts.

And second, Nth oil extra-protects against "dry" friction starts... saves wear on engine parts... because it contains a special, added ingredient that actually OIL-PLATES metal surfaces. And this extra film of lubricant stays up... won't all drain down, even overnight!

So, if you want to start off right—and right off—on the next wintry morning...

Make a date to Oil-Plate!

Baptists To Meet In Houston Nov. 7-11
 Ten thousand Texas Baptists are expected to converge upon the city of Houston November 7-11 for their centennial celebration.
 The annual convention of the Woman's Missionary Union will be held in the historic First Baptist church of Houston November 7-9. The Brotherhood convention will open on Monday the 8th, with sessions in the city music hall. The closing sessions of these two pre-convention meetings on Tuesday evening will be the opening session of the Baptist General convention in the city auditorium.
 The feature of the opening session will be a pageant depicting one hundred years of organized Baptist work in Texas. Dr. Wallace Bassett, for thirty years pas-

tor of the Cliff Temple Baptist church in Dallas will deliver the president's message.
 Out-of-state speakers include Mrs. W. C. Tyler, Blue Mountain, Miss.; Dr. Arnold Ohrn, Washington, who is secretary of the Baptist World Alliance; Dr. John Caylor, Atlanta, Georgia, editorial secretary of the Home Mission Board; Dr. T. L. Holcomb, secretary of the Sunday School Board, Nashville, Tenn.; and Dr. R. G. Lee, Memphis, Tenn., president of the Southern Baptist convention.
 The annual sermon for the convention will be preached Wednesday noon by Dr. Forrest Feezor, pastor of the First Baptist church, Wac-

president of the Southern Baptist convention, Dr. Lee.
MIDWAY
 Mrs. John Goldston
 There were only 28 out for Sunday school Sunday. Hope all will come back next Sunday.

KAPPA-SUB DEB CLUB

The Kappas met immediately after school in the home of Mae Morris. It was decided that the Sub-Debs would decorate the banquet hall for the banquet to be given for the football boys. More definite plans were made for the Presentation Dance. The meeting was adjourned and lovely refreshments were served.

Those present were: Juanita Carpenter, Layma Tatum, Portia Hay, Jane Johnson, Louva Hunt, Alma Hunsaker, Jo Ann Davis, Pat Pittman, Patsy Blair, Doris Wallace, Jean Ballew, Anne Thompson, Sybil Head, Mary Edna Elmore, Nell Bentley, Fanchon Allred, Alice McCrary, Jo Ann Ritter, Shirley Brumley, Jo Anne Sibley, Nancy Bennett, and the hostess, Mae Morris.

BRONCHO MOTHERS CLUB ORGANIZED

The parents of the football boys met in the Club room Nov. 1st with a large attendance for the purpose of organizing a Broncho Mothers Club. The meeting was opened with Mrs. Walter Clifford presiding. Election of officers was held with Mrs. Clifford being elected president; Mrs. A. P. Thomason, vice Pres.; Mrs. Al Covington, Secretary; Mrs. Regan

Bain, Treasurer; Mrs. Henry Tatum, Reporter.

A very interesting talk was given by Mrs. Jones of Childress, (mother of Coach Max Jones). Being president of the Bobcat Mothers Club of Childress, Mrs. Jones gave some very helpful as well as interesting suggestions for the club.

Very interesting talks were also given by Coach Beryl Clinton and Max Jones.

Plans were made for a cake walk to be held by the Mothers Saturday night at 7 p. m.

A banquet for the boys was discussed and further discussions will be made at the next meeting which will be held in the home of Mrs. Regan Bain Nov. 8th at 7:30 p. m. Every mother is urged to be present at this meeting.

ENTERTAINS WITH FAMILY DINNER

Mrs. W. H. Patrick entertained with a family dinner party Monday evening. Her sisters, Mrs. Geo. Cook from Pebble Beach, Calif., Mrs. Helen Officer of Tulsa, Okla., Mrs. Esletta Hearne, Mr. and Mrs. Wesley Knorpp, her brother, John Bugbee, and daughter and husband, Mr. and Mrs. Harold Bugbee and Mr. and Mrs. W. H. Patrick were present.

JUNIOR H. D. CLUB

The Junior Home Demonstration Club met Thursday, Oct. 28 at the Club room with Orna Bentley and Dessa Day as hostesses. The Club room was decorated with black cats and jack o'lanterns giving an air of Halloween. The afternoon was spent in making curtains for the Clubroom.

Refreshments of pumpkin pie, whip cream, and coffee were served to the following members: Ruth Jenkins, Nora Decker, Marguerite Carpenter, Ola Williams, Audra Allred, Mildred Larimer, Ruby Blackman, Dessa Day, Orna Bentley.

Reporter.

CONTRACT BRIDGE CLUB

The Contract Bridge Club met Friday with Mary Cooke at her home. The entertaining rooms were made attractive with bowls of chrysanthemums and autumn leaves. Mrs. Pat Slavin won high.

At the conclusion of the games a salad course was served to: Mrs. C. T. McMurtry, Mrs. Floyd Lumpkin, Mrs. W. K. Hardin, Mrs. Walter Knorpp, Mrs. Claude Moore, Mrs. Pat Slavin, Mrs. Emmett Simmons, Mrs. W. J. Lewis Jr. and Mrs. Allen Cooke.

MARTIN QUILTING CLUB

The Martin Quilting Club met in the home of Mrs. Lois Stevenson on Oct. 28 with an all day quilting. A delicious luncheon was served at the noon hour to guest Lois Hutchins; members, Helen Land, Lela Bulman, Gracie Crofford, Blanche Higgins, Bessie Helton, Eunice Land, Ruby Fitzgerald, Lois Sibley, Sallie Christie, Margaret Waldrop, Ruby Jordan, and the hostess, Lois Stevenson. One quilt was quilted. Helen Land received a Pollyanna gift. Next quilting will be with Ruby Fitzgerald on Nov. 11th. Club Reporter.

CUE AND CURTAIN CLUB

The Cue and Curtain Club held their weekly meeting in the home of Mary Edna Elmore.

The program, which was on Dialect, was led by Wilson Lane. Bill Porter gave an imitation of a Scotchman talking. Patricia Estlack and Jackie Brooks imitated an Italian and Ladelle Cox a Chinese. Sandra Shelton gave a portion of a reading in which a small girl talks. Jane Johnson gave an interesting reading in negro dialect. The program was concluded with a round table discussion led by Mrs. Joe Jones who brought out many interesting facts about her homeland, Sweden.

Lovely refreshments of sandwiches, spiced tea and cookies were served to the following members: Dorris Knorpp, Lynn Leathers, Jane Johnson, Ladelle Cox, Mae Morris, Ramona Rhea, Wilson Lane, Tommye Gattis, Darrel Proctor, Jackie Brooks, Sandra Shelton, Doris Jean Wallace, Patricia Estlack, Mary Ann Landers, Willeta Riney, Mary Edna Elmore, Inelle Cox, Mrs. Jolly Johnson and one guest, Mrs. Joe Jones.

Mr. and Mrs. N. C. Hudson of Happy spent Monday night and Tuesday with Mrs. L. M. McCracken and Mrs. Jim Heckman and family.

1926 BOOK CLUB

Mrs. Homer Bones and Mrs. Frank White Jr. were hostesses at the meeting of the 1926 Book Club on Tuesday afternoon. Delicious refreshments were served.

Mr. John R. Gillham showed two interesting films, "Body Defenses Against Disease" and "Highway Mania." Mrs. Bill Thornberry discussed Federation news, and Mrs. Nathan Cox conducted a Constitutional Drill contest. The officers for the club year, 1949-1950, were elected.

MENTAL HEALTH FACT SHEET

Extent of Mental Illness

1. Nearly 700,000 people in the United States are patients in mental hospitals.
2. Approximately 300,000 are in their communities unable to gain admittance.
3. One out of twenty 15 year olds will some day be a patient in a mental hospital.
4. One out of ten persons are sufficiently sick mentally to require medical attention.
5. Fifty-three per cent of all hospital patients are in mental hospitals.
6. One-quarter of a million patients are admitted to such hospitals every year.
7. One-half of these are new cases.
8. About half the patients of general medical practitioners are suffering from nervous and emotional disorders.

9. About one-third of those admitted to general hospitals are suffering from nervous and emotional disorders.

10. One out of eight men were rejected by the armed forces for neuropsychiatric reasons.

11. About one-third of the medical discharges from the armed forces were for neuropsychiatric reasons.

12. A large percentage of the cases calling for special attention by social agencies, courts and public schools are handicapped by mental disorder or defect.

Facilities Are Inadequate

1. Mental hospitals throughout the United States are overcrowded about ten per cent on the average. Many much more seriously.
2. Ninety-seven per cent of hospitalized mental patients are in tax-supported hospitals.
3. Most communities in the United States have no psychiatric clinics.
4. Personnel cannot be trained fast enough to meet hospital and clinic needs.
5. Funds available for the maintenance and treatment of mental patients do not provide adequate housing, food, clothing and other necessities.
6. For most patients there is insufficient medical service.
7. There are only 4500 psychiatrists in the United States.
8. Ten thousand new psychiatrists are needed.
9. Psychiatric social workers, psychologists and nurses are

similarly in short supply.

10. Psychiatric education in medical schools is in need of drastic improvement.

11. The American Psychiatric Association recommends \$5.00 a day for acute cases and \$2.50 a day for continued treatment cases in order to provide adequate service in mental hospitals. No state has met this standard.

There Is Hope Ahead

1. Scientific treatment results in the discharge as recovered of 17% of the patients in mental hospitals, and 29% are discharged as improved even with the present insufficient staff and other facilities.
2. Newer methods of treatment are even more promising.
3. There is little evidence that mental disease is increasing. As our clinics and hospitals increase the existence of cases becomes more evident.
4. One-half the patients in mental hospitals are due to one form of mental disease — de-

mentia praecox on the treatment of which definite progress is being made.

Mr. and Mrs. Cap Morris returned home Monday night. They attended the Grand Chapter of the Eastern Star at Ft. Worth and visited their son and wife, Mr. and Mrs. Carl Morris at Austin.

Mr. and Mrs. Farrar of Melrose, N. Mex. spent the weekend visiting Mr. and Mrs. Sam Lowe. Mrs. W. T. Lowe who had been visiting them at Melrose, accompanied them to her home here.

Mrs. Ruth Killough of Amarillo who has been visiting Mrs. Clyde Martin returned to her home Wed.

Mr. and Mrs. Frank White Sr. returned home Monday night from a two weeks visit with relatives at Colorado City, Rising Star, San Angelo and other places.

Principal Speaker At Boy Scout Banquet

Dr. Elbert K. Fretwell, Chief Scout of the Boy Scouts of America, will be the principal speaker at the 20th Annual Banquet of the Adobe Walls Area Council. The Annual Banquet will be held on November 22nd at the Frank Phillips Junior College in Borger. Five hundred Boy Scout Leaders and Friends of Scouting are expected to attend.

DR. ELBERT K. FRETWELL, Chief Scout Executive, Boy Scouts of America and Editor of "Boys' Life"

Dr. Fretwell, who served for several years as Chief Scout Executive, is well known all over America as an accomplished speaker. Before becoming Chief Scout Executive in 1943, Dr. Fretwell was Professor of Education at Teachers College, Columbia University. He has been identified with the Boy Scouts of America since its earliest days and served on its National Exec-

utive Board for many years. Rev. E. Douglas Carver, President of the Adobe Walls Area Council, has announced the following committee to be in charge of the Annual Banquet. Chairman, Hueyn Laycock, Pampa; Carl Fisher, Phillips; Wm. E. McClellan, Spearman; W. W. Grooms, Goodwell; Hugh Burdette, Pampa; Lawrence W. Smith, Pampa.

In addition to Dr. Fretwell's address the Annual Banquet Program will include the presentation of Silver Beaver Awards for distinguished service to boyhood and the report of the nominating committee.

O. L. Smith Sr. who has been staying with his daughter, Joyce Smith who was ill at the home of her grandmother, Mrs. Monica Harvey, left for his home at Las Animas, Colo., Friday. Joyce is improving nicely.

Mr. and Mrs. W. L. Landers have moved to Amarillo to make their home.

Mrs. C. D. McDowell and Mrs. Frank White Jr. were in Amarillo Monday.

Mr. and Mrs. Merle Scoggins and daughter Dendra of Borger and Mrs. Jessie Chase of San Diego, Calif. spent the weekend visiting Mr. and Mrs. Ernest Hunt and family.

The Birthday club was hostess when they honored Mrs. G. I. Spurgeon with a house warming party Friday afternoon in her new house. Twenty-two guests were present and brought gifts.

Mr. and Mrs. Geo. Wayne Estlack and Mr. and Mrs. Maurice Lane attended the Homecoming at Canyon Saturday night.

Health Notes

The "dog-days" of the mid-summer months originally derived their name from the prevalence of rabies spread from rabid dogs at that season of the year, but actually rabies occurs at all times of the year. During the past year the State Health Laboratory found 847 animal brains positive for rabies. Four deaths occurred in humans.

Dr. Geo. W. Cox, states, "Few persons need to be warned that rabies is a fatal disease yet proper precautions against its spread are often neglected. Stray dogs should be humanely destroyed or impounded, and all household pets should be vaccinated. Annual vaccination efficiently practiced will stamp out rabies in Texas."

The State Health Officer stressed this fact as important: A dog suspected of being rabid should not be killed at once, but should be kept confined for ten days, since this is the infective period before death of the animal. If the dog does not develop rabies within ten days, the individual bitten is safe as far as that particular bite is concerned. Further observation of the animal should be at the discretion of the veterinarian since many other conditions resemble rabies.

The head of the suspected animal should be packed in ice and sent to the State Health Department for examination. Freezing the brain, or killing the dog prematurely or in such manner as to injure the brain may make correct laboratory findings impos-

sible.

Mr. and Mrs. J. R. Bulls and Mr. and Mrs. Lee Holland attended the Methodist district conference at Pampa Thursday (today)

Mrs. Ruby Ford of Delhart visited her uncle and aunt, Mr. and Mrs. William Payne Saturday.

Mrs. Forest Sawyer is visiting her daughter, Mr. and Mrs. C. L. McQueen.

Mrs. Marguerite Goodner, Mrs. Reast, Mrs. Rufus White and Misses Chloe Darden, Ruth Richardson, Lucile Polk and Edgar Mae Mongole attended the Delta Kappa Gamma meeting at Wellington Saturday.

Mr. and Mrs. O. C. Watson returned Friday from Dallas and Ft. Worth where they visited relatives and attended the State Fair.

Mrs. Katherine Lane left Thursday morning for Fayetteville, N. C., after visiting here for several weeks with her mother, Mrs. Cordia Thompson.

Mrs. C. D. McDowell and Mrs. A. L. Chase visited Mrs. Walter Frasier at Groom Friday afternoon. Her grandson, John Frasier, accompanied them home for a weekend visit.

Mr. and Mrs. Hubert Arnold of Canadian and Mr. and Mrs. W. L. Meek of Vici, Okla. were guests of Mr. and Mrs. E. R. Grant.

Mr. and Mrs. Jack Semrad of Amarillo visited homefolks over the weekend.

Mrs. Lola Barns and Mrs. Frank Lyle were Amarillo visitors Monday.

Mrs. A. P. Todd went to Memphis Monday to spend this week with her daughter.

Mrs. Marion Cross and son Bill visited Mrs. Smallwood at Brice Saturday.

Billy Ralph Andis visited in Clarendon on his way to Austin Friday to see the University play football.

Mr. and Mrs. Fibwers of Hereford visited in the G. W. Bradshaw home the weekend.

Mr. and Mrs. Harold Phelps attended the homecoming at Canyon Saturday.

Mr. and Mrs. Jack Hays and two children of Dallas are visiting homefolks this week.

Mr. and Mrs. Jack Semrad and Mr. and Mrs. Richard Carter and son Richard Earl, all of Amarillo visited in the Henry Tatum home Sunday.

The ordinary heater wastes heat at ceiling level—but the amazing DEARBORN SAF-T-CABINET forces heat outward and downward, from wall-to-wall, at FLOOR LEVEL!

With the DEARBORN you get all the heat you're paying for—and get it where you want it!

The SAF-T-CABINET stays cool all the time—no matter how long the Dearborn is on. You have to feel it to believe it.

Come in and see the beautiful new Dearborn Heater line... they're THE WORLD'S FINEST, SAFEST GAS HEATERS

Thompson Bros. CLARENDON, TEXAS

REMEMBER?

REMEMBER when a bare bulb like this was the last word in lighting? That's when you started calling your electric bill a "light" bill.

Then electricity began to take on more chores. It learned to cook and sew and clean, to wash, and iron, preserve food, entertain the family—in general, to make life healthier and happier and easier all around. Lighting became only a fraction of that job.

Naturally, you came to depend on electric service for more and more jobs—until now you couldn't imagine living without electric service! Today your electric service bill is just about the biggest bargain in the family budget—yet what else does so much, for so little?

Yes, it's a service bill today—it does your chores, cleans your home, cooks your meals, and gives you more time for "living."

West Texas Utilities Company

A note of appreciation To my friends....

I wish to take this means of expressing my sincere appreciation to my friends in this area for their patronage and good will during the time I have been in business in Clarendon. I have enjoyed serving you in every way, while having been connected with the Allis-Chalmers Machinery Company for the past 15 years and other associated lines in the Implement, automobile and appliance business.

In selling my interests in the Rundell & Estlack Machinery Co., I wish to state that your continued patronage of this firm will be appreciated personally by me, and know Mr. Homer Estlack will show you consideration and cooperation alike in all future business transactions.

Lon Rundell

WHEN YOUR BILLS BECOME PAST DUE YOUR CREDIT IS IN DEFAULT

No one should have to be reminded in these times that they should get, and keep, their financial house in order. There are some people, however, that ask for credit and then forget to meet their obligations according to the government regulations.

You are required to pay all bills that become due, not later than the 10th of the second month following purchase. If you will do this you can keep your credit rating A-1.

Your merchant has no alternative when your bills become delinquent but to turn down requests for additional credit until all past due accounts are paid. Abide by the government regulations and avoid credit embarrassment.

BE CAREFUL OF YOUR CREDIT... SO DESIRABLE AN ASSET TO BUILD UP, SO EASILY BROKEN DOWN.

Merchants Displaying Our Membership Cards Are Merchants Who Will Help You Protect Your Credit

ALLEN J. BRYAN, MANAGER
Clarendon, Texas

we need **LEAD** in our plants

Lead is absolutely vital to telephone service. Today it would require a pole 1000 feet high to hold all of the connecting telephone wires now placed in a single 3-inch lead-covered cable.

Lead continues to be in short supply with vital atomic research having first claim. The telephone industry like other industries receives only a rationed quota.

Our expansion program, although proceeding at a fast pace, would be completed even faster if it were not for this continued shortage of vitally needed lead.

Mrs. Roy Clayton left for her home at Pomona, Calif. Wednesday after being with her mother, Mrs. Bauer the past 3 months. Mrs. Bauer has been quite ill.

Mrs. John Sneed returned home Wednesday morning from a 2 weeks visit with relatives at Cooper and Talco and other places.

PLOWIN' Out the CORNERS
by Uncle Zeb

From an article on gossiping by Lou Jeanne Reck in the *Clarendon High School Scribe*: "What pleasure do people find in ruining some people's name? There is no earthly sense in it. It does no good what-so-ever. It only gives them something to do, and if they cannot do any better than that they should crawl in a hole, or something lower than gossiping." Anyway, Lou Jeanne told us all off, and I think she put it well. Hope everyone read her theme.

Talked to P. L. Adams and he was still a faithful No-smoker. Mr. Boggess stumped his toe, but is going to try again, and he did slow down. Others that were ready to join the club: J. E. Johnson, Lonnie Hood, and Ed Laycock, however please don't kid us if when you see us we have changed our mind. Does anyone want to join a Non-Smoking club? There would be no dues, no entrance fees, and no penalties. Let me hear from some more of you. You could even vote alike in 1950, or different. Anyway, let us hear from you, especially someone from Clarendon.

Dedicated to Uncle Jay and the Caterpillar.

Some fellow finally came along and bought the thing, most for a song.

I know you hate to hear, 'tis gone 'tis gone, and far away, 'tis gone.

Heard: several men woke up in the dog-house over their wives reading their mail. It seems, they were invited to spend a weekend "On an Island with you," by some beautiful woman. Anyway, I saw one man still hunting the gal, and another still explaining to his wife. I am glad Mama trusts me, or does she?

If we could keep our eyes on God, our hands on some good work, and our feet on the ground, we would get along alright.

The following are from the scrap book of a friend:

Every time you stay in the home of young parents, their baby cries again for the first time.

Grandma used to tell us that people respected honest rags, and that assafetida would keep away disease.

The way to succeed is to listen to everybody else's opinion and then go ahead and do the right thing in spite of it.

The Lion's Roar

By Dee Lowry
The Lions Club held its regular meeting Tuesday, Nov. 2nd in the club hall. Attendance was above the average for this meeting. Lion McCully seems to be working at his new job.

Minutes of the Directors meeting were read and approved, and final plans were made for Ladies Night to be held Nov. 9th. The Club will not meet at the noon hour next Tuesday.

The program consisted of a reading by Jackie Brooks and three numbers by Miss Smith's high school choral club.

This parting thought: "A good Lion owes it to his club to attend its meetings."

Pfc. Geo. Thompson, Pfc. Dudley Trussell and Pfc. Joe Smith will be stationed at Barstow, Calif. They have been visiting homefolks here.

Price Daniel To Speak At Legion Convention

Price Daniel, Attorney General of Texas, will be principal speaker at American Legion District Convention to be held at Dalhart November 13-14. The 38-year-old Attorney General was Speaker of the House of Representatives in

PRICE DANIEL

1943. When the 48th session of the House ended in 1943, Daniel waived his legislative exemption from military service—entered the Army as a private. He served one year as an enlisted man, then graduated from the Judge Advocate General's Office Candidate School as 2nd Lieutenant, and was discharged from the service as a Captain in May, 1946. He served in the Pacific Theater of Operations with the Marine Corps. He was commended by the Army and Marine Corps as a foremost authority on legal rights of servicemen. Daniel is co-owner of three Texas newspapers, and has served as President of the Gulf Coast Press Association. J. R. McArthur of the Paris (Texas) Echo said of Daniel: "He has behind him an experience seldom rated by much older men. His integrity is unquestioned."

LOCAL YOUTH WINS HONORS WITH DOGS AT DUMAS

Kenneth Burns, young dog showman, was quite happy Monday when he came into the Leader office and reported that he took two high honors in the Open Dog Show at Dumas Sunday. Young Burns' adult and puppy cockers each won first place in their class and he also won the reserve champion of the show. He competed with dog breeders from as far away as College Station and a large num-

ber from Amarillo. The Gabe Betts Burton S. S. Class met at the home of Mrs. L. L. Taylor Friday for an all day quilting and covered dish luncheon. At the noon hour the lovely luncheon was served to 17 guests. One quilt was quilted.

Mrs. Wesley Knorpp, Mrs. Geo. Cook, Mrs. Helen Officer, Mrs. Estella Hearne and Mrs. Harold Bugbee visited in Amarillo Tuesday.

THE DONLEY COUNTY LEADER & THE CLARENDON NEWS

A COUNTY - WIDE PUBLICATION, SERVING DONLEY COUNTY and ITS TRADE TERRITORY

CLARENDON, DONLEY COUNTY, TEXAS, NOVEMBER, 1948.

NOTABLE NEWS EVENTS IN PICTURES

← HOME WRECKED BY HURRICANE →
 —(Left) Mr. and Mrs. M. B. Albrington of Fort Lauderdale, Fla., stand by the pitiful heap of possessions that represents all that remains of their concrete-block home. The recent hurricane with gales and pounding seas wrecked their new cottage on the Florida beach. Only the foundation of the house remained.

→ BABY LONG NECK ARRIVES
 —(Right) Baby Bedalla, whose arrival at the Washington, D. C., Zoo early in October, makes the giraffe herd there the world's largest. Baby Bedalla, a healthy, strapping 6-day-old, measuring five feet tall, gets a licking from her mother. The father and mother giraffe were brought from Suez 11 years ago.

TEN HORSEPOWER DIGGER IN ACTION—In these days of power-driven machinery, a ten-horse team is a rare sight even in Australia. This ten-horse team is in use in building an irrigation canal in the Murray Valley soldier settlement near Victoria, Australia, where between 500 and 600 miles of irrigation channels are being excavated. Horses are being used in moving the dirt in preference to motor-driven machines because the stamping of the horses' feet helps bind the soil on the banks of the irrigation canals and thus prevent water erosion. The horses are worked all abreast instead of being strung out in five pairs as is customary in this country.

TWO JUST ALIKE—This pair of unrelated twins cause people of Van Dyke, Mich., to go about muttering in confusion. They are Marie Kohler (left) and Charleen Rogacki (right), both six years old and as much alike as two peas in the proverbial pod. They are not related to each other in any way except in the duplication of their physical characteristics. Their closest friends have difficulty in distinguishing one from the other.

RED REVOLT OR ATOMIC WAR—Constantine Baldyreff, powerful Russian rebel leader, says revolt in Russia is the only alternative to atomic war. Baldyreff says the great mass of Russia's 167,000,000 people only need leadership to revolt.

VICTIM OF HIT-AND-RUN DRIVER—Struck and injured by a hit-and-run driver near Las Vegas, Nev., this mule-tailed fawn seems happy to have 18-month-old Ronnie Gay Bernkrant as his nurse. Ronnie, daughter of Dr. and Mrs. Louis Bernkrant, is proving a capable nurse. Dr. Bernkrant took X-rays of the fawn, fixed up a fractured pelvis and started the deer on the road to recovery. He is happy in his new home.

U. S. DIPLOMATS OFF TO EUROPE—Secretary of State George C. Marshall, (right), with Lt. Gen. Walter Bedell Smith, U. S. Ambassador to Russia (left), and Paul G. Hoffman (center), Economic Cooperation Administrator, board the President's plane Independence at Washington Airport for return to Paris.

SERGEANT HAS HIS OWN ARMY—Sergeant Joseph D. Ferguson and his wife are shown with their ten children in their home at Komiya, Japan, where the sergeant is stationed with the First Cavalry Division. The Fergusons, who hail from Kewa, Wash., recently had their latest visit from the stork. It is believed that the sergeant has more children than any other soldier of the United States occupation forces in Japan.

U. S. BOMB GUIDED BY HEAT—Sergeant William B. Holiman, Daniels, Md., makes final adjustment on Felix, new U. S. Air Force bomb designed to guide its own fall on a target that gives off heat, such as ships, factories, oil refineries or war plants. Air Force designation of the new bomb is VB-6. When dropped it seeks out its target, controlled by heat waves.

BERLIN BLOCKADE Menaces

As Russia Uses Veto Again

(Condensed from New York Times, Copyright 1948.)

VETO by Soviet Russia has blocked efforts by the Security Council of the United Nations to solve the Berlin problem by having Russia lift the food blockade of that city in effect for the last five months.

This was the twenty-seventh time that Soviet Russia has exercised the right of veto to block action by the Security Council. The vote came at a night session of the Council on October 25 on the proposal submitted by six small-power neutral nations for solution of the Berlin controversy.

When the issue was submitted for vote, nine nations voted in favor of the proposal, but Soviet Delegate Andrei Y. Vishinsky raised his hand in opposition, thus exercising Russia's right of veto. Vishinsky was joined by Delegate Dimitri Manuilsky from the Russian satellite State of Ukraine.

Nations favoring the neutral power proposal were: United States, Great Britain, France, Canada, Argentina, Belgium, China, Colombia, and Syria.

U. S. Leaves Door Open

But the United States left the door open for a possible solution of the controversy through negotiations outside the United Nations. Knowing that Vishinsky would exercise the right of veto on the ground that the United Nations has no right to take up any German question so long as Germany remains under occupation by the four Great Powers, American Delegate Phillip C. Jessup, even before Vishinsky had vetoed the proposal, declared this to the Security Council:

"The three Western Governments have indicated their acceptance of the principles contained in the resolution. If the Government of the Soviet Union would give reciprocal assurance that the program suggested in that resolution would be carried out, it can be done."

This was understood to mean that the United States and the other two Western Powers—Great Britain and France—are willing to inaugurate talks with Soviet Russia outside of the United Nations, if Russia will indicate that the suggestions made by the six neutral nations will be carried out. These proposals call for the immediate lift-

ing of the blockade of Berlin by Russia and the settlement of other issues, including that of German currency, through negotiations which would begin as soon as the blockade is raised. If Russia is sincere in its claim that the United Nations has no authority to take up the Berlin controversy, action of the United States leaves the door open for

uphold that charge and condemn Soviet Russia before the world as a threat to peace. Such action could be taken in the General Assembly where Russia would have no veto.

While the United Nations debated the Berlin situation in Paris, Soviet Russia has been active on the two fronts on which it has conducted the

—Warner in The Indianapolis Tribune

"On one wing and a prayer."

—Fitzpatrick in The St. Louis Post-Dispatch

"Glacier at the door."

early solution of the Berlin controversy.

Still Before United Nations

Although the neutral nations have been blocked in their effort to bring about a solution, the controversy between West and East remains before the United Nations. Vishinsky's veto did not remove the entire Berlin issue from the agenda of the Paris meeting.

Charge brought by the United States, Great Britain and France against Soviet Russia—that Russia has become a threat to world peace—remains before the General Assembly of the United Nations. The General Assembly can

contest with the Western Powers: The campaign of words through which Soviet propaganda has been broadcast has continued with increasing tempo, and the campaign of action through which direct results have been sought has been unrelenting.

Propaganda and Action

In the campaign of words, Russia has been using the United Nations as a sounding board from which Soviet propaganda has echoed to all parts of the world. At times Russia has threatened; at other times she has been conciliatory. She has hinted at compromise, even that the blockade of Ber-

lin might be lifted. But when the final test came in the Security Council, Russia again exercised the right of veto to prevent a settlement of the Berlin blockade.

In the campaign of action, Russia has kept up the drive to achieve the main goal of her present European policy, that is, the defeat of the Marshall Plan for Western Europe. Russian pressure has been intensified in two countries vital to the success of the Marshall Plan—Germany and France.

In Germany Russia has taken steps in the last few weeks to indicate that, no matter what action the United Nations might take, the Kremlin is determined to swing all Germany into the Russian orbit. This design was seen in Russian preparations to set up a Communist-led All German Government in the Soviet Zone—probably an important step toward demanding the withdrawal of all foreign troops from Germany.

Communist Strike in France

In France Communists pressed home the campaign to cripple French production through the coal miners' strike, now more than four weeks old. Communist forces in France have made the coal strike a weapon against the Marshall Plan. With coal production halt-

ed and 400,000 coal miners idle, the French Government may be unable to curb inflation and to stabilize currency—a program that is a commitment of that Government under the Marshall Plan.

There has been much speculation among representatives of the Western Powers over the ultimate, and probably sinister, aims back of various Russian moves.

In Eastern Germany the Russians have stepped up organization of a heavily armed "People's Police," eventually to number 400,000 men. There was a shake-up in the Soviet-backed Socialist Unity Party—a coalition of Communists and Social Democrats—which resulted in tighter control by the Communists. Last week there was put before the People's Council, a sort of super-party organization purporting to represent "all Germans," a proposed constitution for a united Germany. Core of the proposed Government would be a "People's Chamber." Anti-Communists, which the Russians call "Fascists and Militarists," would be barred from all political activity and from participation in the proposed Government for United Germany. Apparently Russia is taking steps to insure Communist control for Eastern Germany, even without the backing of the Soviet occupation forces.

Look for Dramatic Move

Western circles have advanced the theory that Russia is preparing for a

(Continued on Page 6, column 5)

\$40,000,000 Annual Rice Crop in Texas

By JOHN E. KING

RICE for many years has been one of the most stable grain-growing industries in Texas. There has been steady expansion of production as more acreage was made available for rice-growing.

Texas and Louisiana have been in a close race for leadership among the rice-growing States for a number of years. Some years Texas has outranked Louisiana, while in other years Louisiana has produced more rice than Texas.

Texas now holds first place, having produced more of this valuable food grain for the last two years than Louisiana, its neighbor on the Gulf Coast. The Texas crop in 1946 amounted to 17,716,000 bushels, harvested from

grain binder. The grain was cut and tied into bundles much as wheat was harvested. It was allowed to dry in the field and then hauled to a thresher and threshed as other small grains.

Development of modern drying methods has made possible the use of grain combines for rice harvesting. Rice growers now use combines in the fields and cut and thresh the grain in a single operation. The threshed grain is then dried mechanically.

Heat from gas flame is the method most commonly used for drying rice grains. It is necessary to drive all moisture from the threshed grain to prevent spoilage by mold or mildew.

Recent scientific study has made possible the use of the infra-red rays from

Texas PRISON RODEO

Wildest Show on Earth

By FRED GIPSON

(Condensed from Rocky Mountain Empire Magazine, Denver, Colo.)

IF THERE'S a show on earth wilder than the rodeo pulled off every fall by inmates of the Texas prison system at Huntsville, Texas, you'll be wise to prepare for complete disintegration of your nervous system before you go to see it.

That rodeo is the maddest, roughest, zaniest scramble of wild animals and wilder men ever captured and turned into an arena. It's outlaw versus outlaw, no holds barred. (But if you think for a moment the exits aren't barred, merely look behind you—right down

Texas prison farms to see the show. They occupied a separate screened-off balcony, under the guns of more prison guards; and a study of their faces was something else to think about. Without their prison garb, one would have difficulty distinguishing them from a similar congregation of civilians.

Like all rodeos from Sulphur Gap to Madison Square Garden, this one started off with the monotonous rigamarole of introducing rodeo officials. But the moment the huge arena was cleared of these Important People, the monotony definitely ceased. There was a sudden crashing of chute gates flung open, and

rampaging bulls were outdoing Gypsy Rose Lee for strip-off effect. They were shedding convicts all over the place, tossing them high, piling them up in all sorts of shapes and positions, then whirling to gore and trample them.

Convicts are a hardy breed, however. They came rolling to their feet, dodging around and under and over bulls, getting quickly into the clear, then hot-footing it for the safety of the chutes. Only one man was carried out on a stretcher, and he was sitting up before the bearers got him out of sight.

There was a brief pause wherein I got a breath or two, then here it came again—bronco-busting this time, with convicts screwed down deep in their saddles, whooping and yelling, cutting hair with every rake of their spurs. Some were making a ride of it. Others were getting off the hard way.

Out came an old convict mounted on a big grunting bronc that was rolling his belly up to the sun and trying to hang his chin on the moon, all at the same time.

Music and Entertainment

A break came in the rough stuff. The prison's Rhythmic Stringsters came out into the arena under guard. One with a long stretch ahead of him sang "Moonlight and Shadows" in a way that made me shiver, but he got loud and enthusiastic applause from the Cowgirls' Goree band—also under guard.

The Dallas County Quadrille, a group of hired entertainers, rode into the arena and put their mounts through the paces to the fiddling tune of "Git Along Home, Cindy" and with a caller directing the turns and shouting in a sing-song voice:

"Now you're right and now you're wrong,
Swing that pretty gal all night long."

And while fiddles wept and galloping hoofs pounded, mounts and riders wove a gay-colored pattern in the swirling dust.

Rodeo Self-Supporting

C. C. Springfield, who handles publicity for the Texas prison system, came over to explain that the Texas prison system rodeo is the only prison rodeo in the world. It is self-supporting; it costs the taxpayers not one cent. In fact, it has become a big money-making proposition.

All proceeds of the prison rodeo go into the prison educational, recreational and rehabilitation funds. Out of this

(Continued on Page 7, column 4)

—PAGE TWO—

TEN WILD BRAHMA BULLS—Ten prisoners from Texas Prison System at Huntsville ride ten Wild Brahma bulls in opening number of Texas Prison Rodeo. Some prisoners make very short rides—others stay on a little longer.

the black bore of a shotgun in the hands of a cold-eyed prison guard!

The rodeos are held each Sunday during October in the prison arena just east of the "Big Walls." One of these shows is about all any normal spectator can stand. It does one's heart no good to sit and chew on the tip-end of it for two solid hours.

25,000 Spectators

In the stands sat perhaps 25,000 spectators. Several thousand of them were convicts brought in from the various

out into the arena lunged a stampede of wild Brahma bulls, pitching and bawling and kicking, doing their savage best to dislodge the striped-suit riders mounted behind their humps.

Ten Bulls at a Time

"You'll notice we turn out ten bulls at once in our opening scramble," the FBI man next to me said with ill-concealed pride. "Madison Square Garden turn out only five."

This brag was lost on me. My attention was still on the arena where those

COMBINES HARVEST TEXAS RICE—Three combines harvesting rice on the 600-acre rice farm owned by A. Helmer Seaholm near Eagle Lake, Texas. The combines are owned by Carl Seaholm of Eagle Lake, Victor Richter of Lissie and William Waddle of Eagle Lake. A fourth combine owned by A. Helmer Seaholm was working in the field but is not shown. The four combines work, working day and night to keep the supply of freshly threshed rice for the mechanized drying plant sufficient to keep the plant in operation.

412,000 acres. The crop was valued at \$38,798,000. In 1947 both acreage and total yield in Texas were larger and the value of the crop was in excess of \$40,000,000. The 1948 crop bids fair to be larger than the total yield in 1947.

On Gulf Coast Prairie

Production of rice in Texas is concentrated on the Gulf Coastal Prairie in Brazoria, Chambers, Colorado, Jefferson, Matagorda and Wharton counties, although the grain is grown in other counties where water can be made available for flooding the fields.

Texas rice is grown under irrigation. Fields must be flooded after being seeded and the growing grain kept well watered throughout the growing season. Large quantities of water are required.

Water for irrigating Texas rice farms comes principally from channels of the Colorado, Brazos, San Jacinto, Trinity and Neches Rivers. Where artesian wells can be drilled with adequate outflow, the rice fields are watered from these wells.

Rice growers say their fields require from 24 to 30 inches of water during the growing season. Rice is planted in the spring and harvested in late summer or early fall. Fields are kept covered with water from shortly after seeding to the time the heads are well filled with grain. Irrigation canals are then closed and the fields are allowed to dry out during the time the grain is ripening so it may be harvested.

Harvest With Combines

Formerly all harvesting of rice was done with the old-fashioned reaper or

electric lights for rice drying. Electric power companies have conducted extensive experiments in developing this process. Great rice-drying plants have been built in which the grain is moved on conveyors through drying chambers to remove all moisture. Formerly all these drying plants used natural gas as the heat producing element in drying chambers. But in recent years, millions of dollars have been invested in electric rice-drying plants in which huge batteries of infra-red lamps have been installed so they direct the penetrating heat rays on to moving conveyors on which rice grains to be dried are spread several inches deep.

Infra-Red Rays Dry Rice

Scientific study has shown that the infra-red rays penetrate each grain of rice and drive out the moisture from the interior of the grain far more effectively than heat from a gas flame or other heat-producing fuel. The infra-red rays have been shown to be the most effective drying agent yet developed.

The use of the combine for harvesting and the improved drying methods have tended to reduce the cost of rice production. This has meant greater profit to the rice grower, which, in large measure, accounts for the increased production. Texas has taken the lead in developing these improved methods of harvesting and drying and these in turn have been largely responsible for making Texas the leading rice producing State of the Union.

In addition to Texas and Louisiana, (Continued on Page 6, column 1)

CURRENT COMMENT

By STAFF EDITOR

Shortages Hinder Recovery

FOOD and coal shortages have slowed world reconstruction and helped develop inflationary pressures, the United Nations reports.

A study by the Economic Affairs Department shows that both shortages of coal and low nutritional standards in food have considerably reduced productivity and retarded industrial production.

Almost all of Europe and Asia suffered a decline in the per capita production and consumption of food in 1946-47, and the food situation has been even more acute in 1948 as result of poor harvests in Europe. The United Nations reported that this additional deficiency has been only partially offset by increased grain imports from exporting countries.

Ban Undesirable Comics

The un-funny funnies that feature murder, mayhem or lust have been banned in 50 cities of the United States, says the American Municipal Association. Most of the cities have set up censorship committees that pass on comic books before they are offered for sale.

It was also reported, however, that the constitutionality of the laws under which cities have banned undesirable funny books are being challenged. A recent decision by the United States Supreme Court held unconstitutional a New York law that prohibited distribution of magazines composed principally of criminal stories or stories of bloodshed or lust.

Giant Carrier

Engineers in the Navy base at Philadelphia are laying out on their boards the biggest, most powerful aircraft carrier the world has ever seen. Construction of the vessel will begin in a few months at Newport News, Va., and it will join the fleet early in 1953.

The carrier will displace 65,000 tons and will be able to launch planes the size of the B-29 bomber from a flight deck 1,030 feet in length and entirely without obstructions.

Old carriers had to have islands on their flight decks for navigational purposes and to direct gunfire. The development of radar, however, has made it possible to get rid of the islands.

In the modern carrier, two devices are needed to launch and take on planes at high speed. One is a catapult, which hurls planes into the air. Another is arresting gear which brings the

plane to a stop when it returns to the flight deck. The new carrier will have four, instead of the usual two, catapults, and they as well as the arresting gear will be more powerful than any previously constructed.

Planes launched by the vessel, it is reported, will have a fighting range of more than 2,000 miles.

Electric Nation

Ninety-four per cent of the Nation's 39,750,000 occupied family dwellings now have electric service. In addition, electric consumers are daily buying more of the accessories such as stoves and radios that burn power.

About 85 per cent of the electric industry's patrons are residential and rural type. Commercial users—such as small stores, filling stations, and theaters—make up about 13 per cent. The remaining one per cent include large industrial plants, electrified railroads, and highways which are illuminated.

The Edison Electric Institute also reports that customers are using more electricity than ever before. In 1940 the average annual use per domestic consumer was 952 kilowatt hours. For the 12-month period ended last June 30 average annual use reached the total of 17,505 kilowatt hours.

The industry, even at that, is not at the saturation point, because some homes do not yet have electric service and new homes and shops and stores are constantly being built. During the first six months of this year 1,123,000 customers were added to power lines. Of these, more than 819,000 were residential users.

Steel Industry Prepared

The United States fabricated steel industry would be prepared in the event of war to put into operation any government plan of production with minimum delay, T. R. Mullen, President of the American Institute of Steel Construction, told the annual convention of this organization in Quebec, Canada. If war should come, there would be little need for conversion of facilities of the steel industry, he said.

"The industry at present has facilities for any production that might be called for," he declared. "Many plants

have increased facilities since World War II and are prepared for any call the government might make."

Espionage Rings

A special report of 1,000 pages, made public by the House Un-American Activities Committee, declares that two Communist underground rings were operating in the State Department in the nineteen thirties. The report covers the private questioning of witnesses.

The committee statement quoted Whittaker Chambers, self-styled form-

times the speed of the fastest bombers used in World War II and as fast as the speediest jet fighters yet developed.

Symington also said that jet-driven planes have flown "hundreds of miles an hour faster than the speed of sound." This means that the X-1, supersonic rocket research plane developed by the Army Air Force, has flown at a speed of 860 miles an hour or even faster. Speed of sound at an elevation of 35,000 feet is 660 miles an hour. Aviation experts say Capt. Charles E. Yeager, first supersonic pilot, has attained a speed of 1,000 miles an hour.

—Des Moines Register

"This Will Take a Little Time."

er Communist, as saying that he and Alger Hiss, former State Department official, belonged to one group. Chambers said Hiss tried to get one Noel Field, also a State Department employee, to join the group, only to discover that "Field was connected with another."

Rocket Plane Speed 860 Miles

Air Secretary W. Stuart Symington has officially disclosed that the United States has developed a jet-driven bomber that can fly with a speed of more than 600 miles an hour—three

Lend-Lease to Russia An 'Old Account'

Rule of Berlin isn't the only disagreement between United States and Soviet Russia. Moscow is long overdue in settling its huge, \$11,000,000,000 lend-lease account left over from the war. The U. S. has just sent a new request for settlement of the bill.

Russia broke off negotiations last March. The Soviet Union is the only country that got sizable quantities of lend-lease that has balked at settling its war-time account. Great Britain and France both closed their accounts more than two years ago.

In general, the United States has asked Russia—as it asked other Nations—to pay a reasonable sum for only the civilian-type goods it received under lend-lease up to September 2, 1945. This in other cases has averaged less than ten per cent of the total aid given. No payment has been asked from any Nation for actual materials of war.

Civilian goods sent to Russia included \$1,078,965,000 in machinery and equipment, 2,800,000 tons of steel, 1,198 locomotives, 11,155 freight cars, \$10,910,000 in construction machinery, 8,071 tractors, 375,883 motor trucks, and 2,670 tons of petroleum products.

Bright Outlook for 1949

Noting that personal incomes are setting a record for 1948, the Bureau of Agricultural Economics predicts that the 1949 incomes will be just as high. And what's more, the Bureau predicts a continuing boom in employment for 1949.

At the same time, the Federal Reserve Board paints a rosy picture of the Nation's farmers. Their buying power this year, Reserve Board experts say, is more than twice what it was before the war.

However, the agency adds, "Incomes received by farmers who operate small acreage have been small, and it appears that sizable numbers of these farmers have been taking industrial jobs and have been leaving the farms."

The Board estimates that 10 per cent fewer persons worked on the farms at the end of 1947 than before the war, while non-farm population has risen nearly 20 per cent since 1937.

Education's Army

A national drive to recruit at least a million new teachers for grade and high schools is being planned by the National Commission on Teacher Education and Professional Standards. Its first objective will be to persuade more young men and women to become trained teachers. Last year the Nation's colleges turned out only 20,000.

Particular emphasis is to be laid on recruiting for grade schools. Educators consider the first eight or nine years of a child's schooling the most important of all. And they are alarmed because the greatest teacher shortage exists in schools below the high school level.

2,300 College Scholarships

Aptitude tests will be given on December 11 to candidates for 2,300 college scholarships under the Naval Reserve Officers' Training Program. Applications must be submitted by November 15. High school boys in their senior year and graduates between the ages of 17 and 21 may apply. Forms are available at most high schools and colleges and at all Naval recruiting stations.

Candidates who pass the aptitude tests will be interviewed and given physical examinations, after which scholarships will be awarded to the highest ranking on a State quota basis. Successful candidates will be given a four-year college course with the government paying for tuition, books and other ordinary fees, with \$50 a month living allowance. Students may select their own schools and their own courses within certain limits. After graduation they must serve for two years on active duty as commissioned officers in the Navy or Marine Corps. Successful candidates will begin their courses in the fall of 1949.

Draft Calls

Fifteen thousand young men will be drafted into the United States Army during December. This will make a total of 25,000 draftees taken by the Army by the end of this year under the new draft law, a previous quota of 10,000 having already been set for November.

Physical examination of potential draftees began about October 4.

Neither the Navy nor the Air Force has asked for men thus far. They expect to fill their manpower needs by enlistments.

The Army, however, plans to increase its monthly draft quotas to about 25,000 men in January and to continue at around that level until it reaches the maximum strength authorized by Congress.

The Army now has about 540,000 officers and men. Its manpower ceiling is 900,000, but officials say it has funds to maintain only about 790,000 men during the current fiscal year, which ends next June 30.

An estimated 9,000,000 men 18 through 25 years old registered for the draft. At least 250,000 of them will be called up as rapidly as the Army can expand its training facilities to handle them.

Veterans' Ventures

It's tougher going now than it used to be for veterans who want to start their own business.

"The veteran who starts a venture of his own today—unless he has a unique idea which no one else has thought of—can expect to face increasingly stiff competition," says Secretary of Commerce Sawyer. "Under present costs he will need more working capital than in normal times, and his risk is greater."

A survey by the Department of Commerce has shown about 20 per cent of recent business failures were World War II veterans.

Podunk Is a Nice Town

There really is a town named Podunk. It is in Massachusetts and it is a nice town in which to live.

Residents of Podunk, Mass., have launched a move to let the world know that there really is such a community and that it is a nice town and has modern improvements.

President R. S. Wakeman of the Podunk Community Club says lexicographers who have ignored the word and newspaper reporters who have banded the word about will be invited to Podunk for a sightseeing tour and a dinner.

Traffic Accidents

Since all of us are motorists or pedestrians, it is not surprising that the largest item on our annual accident bill is the cost of motor vehicle accidents. According to the National Safety Council, our economic losses from traffic mishaps in 1947 amounted to \$2.65 billion.

All traffic accidents are attributable to faults in the driver, the vehicle, the road, or a combination of these factors. "Human failure" of one kind or another is by far the predominating cause, accounting for upwards of 85 per cent of all accidents.

Hawks for Air Power

Falconry is the ancient sport of hunting with various species of long-winged hawks. The powerful, highly trained birds fly from the falconer's wrist after such quarry as pheasants, quail and rabbits. In the hunt the hawk "stoops" (flies downward) upon its victim at great speed, like a dive-bomber. In Britain some hawks have been trained by Royal Air Force falconers to scare away flocks of birds that sometimes hamper landing or taking off of aircraft. Recently London got a request for RAF-trained hawks from airlift officials at Berlin's Gatow airport. They said that birds had become a "potential hazard" to airlift operations.

Indians Burned Coal

The history books usually attribute the first American use of coal to colonists in the East, but investigations reported to the Bureau of Mines indicate that coal was being used in the Rocky Mountain area more than 200 years before Columbus.

The investigations disclosed unmistakable coal and coal ash in connection with fires used by the Hopi Indians of the Arizona pueblos in burning pottery as early as the thirteenth century. Other investigations have uncovered primitive coal workings and crude mining instruments used by the Indians.

\$7 Billion Accident Loss

In the U. S. last year economic losses sustained in mishaps of all kinds reached an estimated \$7 billion, something like a third more than our entire appropriation for the European Recovery Program. It is nearly twice what we spent on education in 1947.

These losses averaged about \$200 per family.

By JOE GANDY
(Copyright, 1948, by the Southwest Magazine Co.)

"The frost is on the pumpkin and the fodder is in the shock," wrote James Whitcomb Riley, the great American poet. I looked out the window one early November morning and saw a miracle had happened during the night. A heavy frost lay on the ground. Beautiful beyond description, the frost covered a field I had plowed the day before. Frost, chemists say, is the poor man's fertilizer, for it contains nitrogen, phosphate and lime.

November brings not only hoary frost, but Thanksgiving. As the Great Day arrives, we humbly bow our heads to thank God for manifold blessings. No prayer should be said without thanking God for blessing America. He has given this nation power, glory, honor, wealth and leadership and may we use the leadership wisely and well.

Yes, we need God's help as never before in our dealings with lustful nations that threaten war, that seek world domination and enslavement of all peoples. Our prayers this Thanksgiving should be for patience, tolerance, kindness and firmness. Above all, that we have peace on earth and be spared the horrors of a Third World War.

Don't try to keep up with the Jones family, for the Jones family may be four-flushing; may be one of those families living beyond its income. The government says 28 per cent of American families are living beyond their income. No surer way to ruin and bankruptcy than to spend more than you earn and owe more than you can pay.

A woman writer in a leading national weekly says:

"I don't know why it is that men think women are not good managers when a woman can manage to walk along a street on a windy day carrying a handbag, three small packages, two big packages, and still have a hand to hold her hat on and one to keep her dress down."

Most women are better managers than most men. They not only manage the housekeeping, but manage the kids and 9 times out of 10 raise them to be useful citizens.

It is hoped by the time this is read

that Russian Communists will have raised the Berlin blockade. Stalin and his gang showed poor judgment when they put on the blockade, which has backfired on Russia. The airlift of the Western Powers made the blockade ineffective and at the same time proved to Europe and the rest of the world that there is latent power for peace

"We humbly bow our heads."

or war in America, Great Britain, and France. Stalin had better respect this power and not blindly plunge the world into another war that he cannot and will not win despite his silly propaganda to the contrary notwithstanding.

I heard a man say the other day (and he was a poor man) that he deplored the tirade against rich men that accused them of every crime from grand larceny to murder. This poor man thinks rich men are an asset to America's domestic economy, that without them there would be no material progress, no big manufacturing plants, no investments in great enterprises and fewer jobs for workingmen. "Why should we hate the rich man? We need his money, his brains, and his energy to build a better world in which to live," the poor man said.

Spreading the gospel of Christ throughout the world by means of phonograph records is the purpose of Gospel Recordings, Inc. It is an interdenominational faith work that operates with all evangelical organizations. To date Gospel Recordings has made master recordings in 93 languages and dialects. The records are played in mis-

sion chapels, clinics, hospitals, house-to-house, street meetings and jails. I personally know the executive of a big printing plant who is also spreading the gospel of Christ. He prints religious tracts by the thousands and sends them free to any one who will distribute them. His address is 715 Jones Street, Fort Worth, Texas. Write to this address if you want tracts free.

A food expert warns there is danger that hunger will stalk the world. He is the noted food nutritionist, Sir John Boyd Orr, of Scotland, lifelong student of agriculture and livestock. Sir John should visit the great Southwest and see how hunger is licked. Not a chance to go hungry here where we raise plenty of black-eyed peas, sweet 'taters, cornpone and sow-belly. Bring on your hungry hordes, Sir John, and we will show 'em how to raise plenty to eat on a few acres in the Great and Glorious Southwest.

A secret of long life was passed on by Mrs. Liddy Lodge, of Denison, Texas, who recently celebrated her 99th birthday. Here is the secret: "Work," she said, "hard work and plenty of it is the only reason I can give for a long life." There's much truth in what she says. Hard work seldom kills, but hard work plus worry will kill. Statistics of life insurance companies show that busy people live the longest. Loafers usually die before their time. Nature abhors a vacuum and it also abhors a loafer, who is a human vacuum. Keep busy and you will live longer and live happier.

Cash income of the nation's farmers reached a new record high of \$17,900,000,000 during the first eight months of 1948, the Agriculture Department reported. The farmers' actual profit, however, was probably less than in the same period last year, remarked the department, because of the increased cost of producing crops and increased cost of living. Gross farm income this year is running four per cent above the previous record high of last year. The dollar ain't what it used to be. I can remember when silver dollars were in circulation, that some folks called them cartwheels. Not so nowadays. If silver dollars were in circulation now, some folks would call them pinwheels.

TEXAS BRIEF NEWS --- from Over the State

MILLIONTH MONEY ORDER

The postoffice at Corsicana has been in existence 84 years and during that time has issued one million money orders.

Postmaster G. C. Hudson wrote the millionth money order on Sept. 18. It was for \$1 and the postmaster sent it to himself. He explained that the money order would never be cashed—that he would keep it as a souvenir.

DOUBLE TROUBLE

Mrs. Dorothy Maddox, admitting clerk at a Fort Worth hospital, found the case of Mrs. Green, hospital patient, plenty confusing.

On the same day she admitted two Mrs. Greens, and they entered within 10 minutes of each other. Both had the same doctor. Both had entered for the same type of major surgery. Both their husbands were employed by the same drug firm.

PREDICTS PLENTY OF BEEF

There will be plenty of beef for the United States by next spring. Bryant Edwards, president of the Texas and Southwestern Cattle Raisers Association, predicted. Edwards told a meeting of the directors of the association at Dallas that excellent grain crops and other feed crops in Texas, coupled with better than average range conditions, assure a plentiful supply of feed for cattle during the winter. Edwards made no predictions as to prices for beef.

TEXAN TRAINS BUTTERFLIES

Dallas has a full-fledged trainer of butterflies.

He is Carl A. Anderson, an income tax auditor. Anderson finds his monarch butterflies in egg-stage on milkweed. He gathers the eggs and raises the butterflies through the caterpillar and chrysalis stages until they become full-grown butterflies by keeping them in glass containers.

When the butterflies spread their wings he feeds them a little sugar and water until they learn to come to him for food. The full-grown butterflies in all colors flutter about the room and follow him until they are given food. But they are strictly one-man butterflies, for they shy away from other human beings.

TEXAS IMPORTS MUSKRATS

Texas finally has imported muskrats from Louisiana, and they were delivered free. One load of 27 muskrats was taken from an area north of Abbeville, La., where Louisiana was cleaning some irrigation ditches. They were placed in marshes in East Texas by the Texas State Game Commission.

The deal with Louisiana proved to be an anti-climax to a proposed swap with Oklahoma in which the Sooner State was to exchange 250 muskrats for 500 raccoons. Texas had caught and shipped 200 coons to Oklahoma when the deal was called off, because Oklahoma had been unable to deliver any muskrats.

W. C. Glazener is director of the experimental work involving the introduction of muskrats into the East Texas marshlands.

\$6,000,000 PECAN INDUSTRY

San Antonio now does a pecan business that amounts to \$6,000,000 a year. A group of eighteen business men say the volume can be doubled and have set to work on plans to make this a \$12,000,000 industry for the Alamo City.

The pecan industry has become "big business" since 1940 when the annual output of these nuts exceeded 100,000,000 pounds. Texas produces 40,000,000 pounds of the Nation's pecan crop each year, and 20 per cent of the country's pecan output is processed in San Antonio.

Formerly all nuts were cracked by hand. From 5,000 to 6,000 workers were employed in cracking nuts and extracting the meat. Now all this work is done by machinery. With 10 machines the work formerly done by 6,000 persons is done more quickly and efficiently. A team of two men and eight women can extract 500 pounds of pecan meats an hour.

MAKEUP KIT CAUSES FIRE

A woman's makeup kit can be a dangerous thing, especially if it contains a mirror.

Mrs. D. Swilling drove from Agua Dulce to Alice. After she had parked at the curb, she took a mirror from her handbag to inspect her makeup. When she left the car, she left the mirror on the seat.

Later, Sheriff H. T. Sain saw the car in flames. He grabbed a fire extinguisher and saved the automobile but only after considerable damage had been done to the interior.

The mirror, serving as a reflector glass, had focused the sun's rays onto a spot that set fire to the upholstery.

CHEMICAL INDUSTRY GAINS

The petroleum-chemical industry in Texas is mushrooming along the Gulf coast. Oil companies, recognizing the postwar necessity of efficient conservation of petroleum and its by-products, are joining the chemical industry in investing hundreds of millions of dollars in synthetic chemical plants.

Abundance of cheap fuel—natural gas—and the State's huge oil resources are the primary factors attracting holders of synthetic processes to Texas. Since 1940 more than 80 large chemical manufacturing plants have been built, or are now under construction, along the Texas coast. These plants represent an estimated construction cost of approximately \$750,000,000.

MAN LIVES TO BE 101

Benjamin Franklin Blackman, 101 years old, died at his home in Trinity recently. He was born in Texas during the days of the Republic and had lived in the State all his life.

He is survived by two sons, three daughters, 25 grandchildren, 14 great-grandchildren and one great-great-grandchild.

NEW BOOK ABOUT TEXAS

The second book by Judge A. W. Neville of Paris, "The Red River Valley—Then and Now," has just come from the printers. Judge Neville's first book was a history of Lamar county, where he has made his home for most of his 84 years.

The new volume by the Paris author has been designed and printed under supervision of Carl Hertzog, book designer and type expert of El Paso. The book contains 27 pen and ink sketches drawn by Jose Cisneros, Mexican artist, especially for the volume.

CHILD HAS 10 GRANDPARENTS

Claude William Jernigan, Jr., infant son of Mr. and Mrs. Claude Jernigan of Tyler, can probably claim more grand parents than any other child in East Texas. He has ten grand parents going back four generations on both sides of his family.

On the paternal side, his grand parents are Mr. and Mrs. Walter Jernigan of Tyler; his great grandmother, Mrs. Grace Jernigan of Tyler, and his maternal great grand parents, Mr. and Mrs. Claude Florence of Tyler.

On the maternal side he has his grand parents, Mr. and Mrs. John Elliott of Arp; paternal great grand parents, Mr. and Mrs. J. W. Elliott of Arp, and his maternal great grand mother, Mrs. Alice Barron of Arp.

PLANT BLUEBONNET SEED NOW

Now is the time to plant bluebonnet seeds in Texas for blossoms next Spring. The best time for planting the seed of the famed Texas flower is in the early fall about the time the seeds ripen. This seeding time was fixed by nature as part of the plan for self-propagation of this beautiful flower.

The bluebonnet has a tough little seed and best results can be obtained by soaking the seed for about 24 hours before planting. After soaking rake the seed into the soil at once before the seeds dry. The plants thrive in cold weather. Only the worst freeze will damage them.

The bluebonnet does best in light sandy soil that is rich in lime. Bluebonnets should be planted in a sunny place that is well drained. They don't like to be shaded, and they do best without cultivation. Do not fertilize the soil as fertilizer often kills the plants. Small plants can be transplanted, but it is best to plant the seed where the plants are to grow to maturity.

INVENT JET-PROPELLED BICYCLE—These three youthful inventors, who live in Falls Church, Va., have designed a jet-propelled bicycle, capable of speeds up to 15 miles an hour with its single jet. The boys are at work on a three-jet unit which they hope will give them a speed of 50 miles an hour. Left to right they are: John Hunton, 16; Bobby Dent, 15; and Mac Walther, 15.

RANCHER'S WILL AIDS CHILDREN

Children of Texas were listed among the beneficiaries in the will of Frank Hays McFarland, ranch owner, who died at Fort Worth recently.

The will provides that at the death of Mrs. McFarland, a trust fund is to be set up from income of large ranch holdings of the McFarlands. Income from the trust fund is to be used for a day nursery for under-privileged children. It also is to be used to provide low-interest loans to young men and women for education and vocational training.

GOAT KNEW WHERE TO GO

The Rotary Club of Denison acquired a goat with the idea that it would be billeted with any member having a poor attendance record. Such member could pass the goat to another member only by regular attendance.

But the goat escaped and strayed away. Oddly enough, he showed up at the bottling plant of Norman Foebel, a member of the club, and arrived there on the day that Foebel was to have been given the goat because of his poor attendance record.

TO NAME SHIP FOR TEXAN

When the cargo vessel of the U. S. Transportation Corps now called the Acorn Knot steams into San Francisco, the ship is to be christened the USAT Sergeant George D. Keathley. Thus honor will come belatedly to a Texas hero.

Sergeant George D. Keathley was a native of Olney. He has been awarded posthumously the Congressional Medal of Honor for his daring exploits as a member of the 58th Infantry Division on the Italian Front. He was killed at Mount Atluzze on September 14, 1944, after forcing back three enemy counter attacks in which all commissioned and non-commissioned officers of the second and third platoons of the company had become casualties.

HOUSTON RESIDENT IS 117

Houston lays claim to having the oldest living resident of the United States. He is William E. Norris, a retired Negro minister, who says he is 117 years old and has a birth certificate to prove it.

Norris was born in Bordeaux, France, March 12, 1831, and came to this country with his father when he was 6 years old. They were slaves of Joseph Barbee of Galveston until set free by Lincoln's Emancipation Proclamation.

Patrick Barbee, great grandson of Joseph Barbee, is a member of the Houston Fire Department. He gives verification to Norris' claim as to his age.

BUILDS HOT WEATHER HOUSE

Henry Scharnhorst of Edinburg has designed a hot weather home that lets in all the breezes and keeps out only the mosquitoes.

The framework of the house is of the usual construction, but the walls and even the roof are of screen wire.

In case of a sudden shower or rain-storm in the night, all the occupant has to do is to reach out of bed and flip a few electric switches, starting up several small motors. Two motors take a canvas roll from under the eaves and unroll it over the top to provide a rainproof roof. The others swing solid, weatherproof panels over the open screen walls.

Scharnhorst has received U. S. Patent 2,445,386 on his invention.

CHIHUAHUA AS STATE DOG

Texas has no officially designated State dog. State Senator Rogers Kelley of Edinburg has proposed that the Chihuahua dog be made the official State dog for Texas.

"That dog is more Texan than Mexican," the Senator, who is a Chihuahua dog fancier, said. "I'm going to do something about it. I'm going to introduce a resolution at the next session of the Legislature to make the Chihuahua the official dog of Texas. The Mexican Chihuahua is not Mexican at all. It is Texan. Sure, it came from Mexico. But so did Texas."

CAR PARKERS ARE HONEST

G. D. Hindman of San Benito noticed a woman having trouble inserting a coin in a parking meter. She finally gave up and carefully placed the coin on top of the meter and went to do her shopping.

Hindman's curiosity was aroused and he went to the meter to investigate. On top of the meter he found three coins—the one placed there by the woman motorist and two others that had been placed there by earlier parkers who had been unable to operate the jammed meter.

WINTERS MAYOR ENTERS T. U.

Eugene S. Baker, mayor of Winters since 1947, has gone to Austin where he entered Texas University, matriculating as a freshman.

Baker, known to his friends as "Skeeter," was graduated from the Winters High School in 1936 and for the last twelve years has been prominent in religious and civic affairs of his home town. He served as superintendent of the Presbyterian Sunday School for a number of years and is a past president of the Winters Jaycees and of the Winters Volunteers Fire Department. Baker trained with the 90th Division at Camp Barkeley after entering the Army in 1942. He landed with the invasion force on D-Day and was in Germany at the end of the war.

W. L. Pratt will serve as mayor pro tem while Baker is attending the University of Texas.

SPORTING News

TEXAS SPORTS WRITERS RATE HIGH SCHOOL TEAMS

Port Arthur, Amarillo and Brackenridge High of San Antonio are rated as the three top-notch high school football teams, based on team strength indicated to date, by the Texas Sports Writers Association.

Although three teams were eliminated from the top ten teams by the sports writers after the third week of play, the three top teams remained Port Arthur, Amarillo and Brackenridge High of San Antonio. The three teams that were removed from the list of ten top eleven are Brownwood, Corpus Christi and Arlington Heights of Fort Worth.

The Sports Writers rated the ten top teams in this order: Port Arthur, 268 points; Amarillo, 184 points; Brackenridge of San Antonio, 170 points; Odessa, 132 points; Wichita Falls, 122 points; Baytown, 117 points; Waco, 103 points; Sweetwater, 83 points; Highland Park (Dallas), 81 points; Lubbock, 36 points.

NATIONAL GRID RACE SHAFES UP AS CLOSE

Notre Dame, one of the top contenders for national football honors every year, again ranks as the people's choice for 1948 laurels. But football experts would not be surprised if several other teams should equal the won-and-lost record of the Fort Bend, Ind., Irish during the coming season. Georgia Tech and North Carolina could be the southern teams to do it. Southern Methodist Mustangs and the Texas Longhorns also are hungry for football honors in the Southwest. In the East it could be Pennsylvania or Penn State, with the Army and Villanova also given a fair chance. In the Midwest Michigan, Purdue and Missouri are hopeful, while California, Oregon and Denver are given high ratings in the Far West.

DOAK WALKER RANKS AMONG FOOTBALL'S BEST

Matty Bell, Southern Methodist University football boss, pondered long and shook his head doubtfully when asked if Doak Walker is the greatest football player he ever coached. Bell admitted that Doak ranks among the best players he ever

coached during his long years of coaching experience.

Found for found there's probably not another player in the land who can hold a shoulder pad to this 21-year-old, 168-pound junior, who stands one inch under 6 feet, and there is probably no other player in the land who is more on the spot this year than Walker. For two seasons, Walker has been steadily improving, even after his admirers said he could not possibly be any better.

Walker has played in 16 games for the Ponies and has carried the ball 249 times for a gain of 1,204 yards. He has lost only 175 yards. He has completed 72 out of 125 passes for a gain of 798 yards. He has had only 7 passes intercepted. He has crossed the goal line 17 times and has kicked 19 out of 24 tries for conversion points. In two seasons he scored 124 points.

TOWNSEND, ALL-STATE BACK, ENROLLS AT TEXAS U.

Byron Townsend, Texas' greatest high school football player for 1947, has enrolled at the University of Texas, and is working out with the Texas Longhorns.

Townsend was the most widely sought football player in the State and received bids to enter practically every college in the country that rates its football eleven high among school activities. He delayed for months before announcing his decision as to the school of his choice.

Playing with the Odessa High School football team last year, Townsend was chosen as all-State back on the mythical high school eleven.

DUCK OUTLOOK DECLARED GOOD, MANY BIRDS DUE IN DECEMBER

Ducks Unlimited has sent out a report from Pops Glassell of Shreveport, La., the organization's vice president, to the effect that a significant improvement has been noted in the duck population, most pronounced in Alberta, Canada, and appreciably better in the southern areas of Saskatchewan and Manitoba. Glassell in his report credits information on the duck population to R. A. Leeson, organization president.

Although the Southern States already have a few ducks that come as the vanguard of the big flights, the lateness of the hatching season in the Canadian hatching grounds should keep plenty of ducks flying southward through December, Leeson reports. Leeson says that an unusually large number of flightless young may be seen even now in the great hatching marshes.

THE FLOP FAMILY

By SWAN

TEXAS Farm News

Development of a strain of goats that will produce mohair of the finer grades throughout their life is one of the projects to be undertaken at the Bluebonnet Farm, new Texas A. & M. experimental tract near McGregor. Officials at the farm expect to have full support and cooperation of the Texas Angora Goat Raisers Association, Texas Sheep and Goat Raisers Association and other organizations interested in the raising of sheep and goats. This has been one of the chief objectives of the Southwest Texas Angora goat breeders for many years. Mohair growers and warehousemen over Texas report that kid hair is in good demand and the price is satisfactory, but there is little or no demand for mature hair. The clip from older goats is coarse and the coarseness increases with the age of the goat. It is to eliminate this quality that the Bluebonnet Farm project seeks.

Agricultural extension workers in Grayson county, through the use of "pilot plot" experiments conducted during the last few years, have demonstrated that the soils of that county have been

greatly denuded of top-soil by wind and water erosion and the fertility thereby greatly reduced. Experiments have shown that most of the soil is starved for basic elements—nitrogen, potash and phosphate. Experiments conducted under direction of C. O. Spence, associate county agent, reveal that fertilizers used by farmers should be used in formula adaptable to the type soil upon which a specified crop is planted. Previous crops planted also determine to considerable degree the formula and amount of fertilizer needed.

Five Whitesboro farmers have agreed to participate in a program for raising certified wheat seed as a move to improve the quality of wheat grown in that part of Grayson county. Gene Foster, vocational agriculture teacher at Whitesboro, said that 100 bushels of certified Comanche wheat seed have been purchased from the Denton Certified Seed Growers Association, and will be planted in small seed plots. The seed will plant 80 acres and the harvest is expected to be about 1,680 bushels. Farmers participating in the program are: R. D. Butler, Howard Ainsworth, Carman Brookshear, Nick Bone and Jim Thomas.

Artificial insemination of dairy cows is growing in Collin county. Up to Sept. 1 Collin county ranked fifth among the 28 counties in the State that have organized artificial breeding associations. Jack McCullough, county agent, reported that 503 dairy cows had been bred artificially in that county. Dallas county, with 928 cows bred artificially, ranked first; Parker county, with 589 cows, was second; Denton county with 549 breedings, was third; and Johnson county, with 536 breedings, was fourth.

James Driggers and Lack McMahan, Future Farmers of America at Princeton, will receive free trips to the All-American Jersey Show at Columbus, Ohio, as result of their efforts at the Texas Jersey Show held at Tyler in September. Driggers' Jersey heifer was selected at the show to be one of the heifers to represent Texas in the All-American Jersey Show. McMahan was chosen to go with the Texas herd to Columbus as showman and herdsman.

Jack Lynch has resigned as vocational agriculture teacher at Honey Grove and will become a field man for the soil conservation program in North Texas. He will maintain headquarters in Dublin and will supervise soil conservation practices in 52 North Texas counties.

OPHELIA, PLEASE
Don't desert us now that jam season is here. Will raise your pay to \$10 a day and give you afternoons off. Please come back and bake more of those golden-brown Light Crust Biscuits.

Ray Crowell, dairy operator at Abilene, has sold 24 head of producing cows from his dairy herd of Jerseys to a Louisiana buyer for \$7,000. Crowell kept some of his younger cows and now has a herd of 70 head of Jerseys.

Bill Jones, former mule dealer of Abilene who has turned to cattle, has completed a feeding barn 84 feet long on his ranch southwest of Abilene. The barn has feed bins in each end and a self-feeder through the rest of the barn 12 feet wide. Jones has put 50 head of steers on feed and plans to increase the number under feed if the price outlook continues favorable.

By eradicating cedar on his ranch in Edwards county many years ago, O. Q. Marshall, Rock Springs rancher, says the carrying capacity of his ranch has been increased fully 300 per cent. Since the cedar

HYBRID CORN YIELD LARGE—J. S. May and son display corn grown for seed on Texas blackland farm. This corn averaged 75 bushels to the acre with liberal use of fertilizer—250 pounds of 5-10-5 fertilizer and 75 pounds of ammonium nitrate to the acre.

was eradicated every kind of grass is coming back, Marshall says. Range on which he had not been able to graze sheep in 20 years is now carrying sheep the year round. Marshall has lived on the same ranch 20 miles east of Rock Springs since 1889. He is credited with being the first rancher in Texas to eradicate cedar from his land.

Milk output in Texas during August registered an increase of 1 per cent, according to the survey conducted by the University of Texas Bureau of Business Research. Manufacture of dairy products declined 6 per cent from July to a total of 63,300,000 pounds during August. All types of manufacture of dairy products declined from 3 to 17 per cent compared with August, 1947.

Ralph Goolsby, who has been operating a dairy at Abilene, has leased a farm one mile east of Waco and has moved his dairy herd to the new location. Goolsby moved to Abilene from Jones county several years ago and has engaged in the dairy business at Abilene. His dairy farm has been in the drought area for the last two years and scarcity of water caused him to move to Waco. The day after he started moving to Waco a heavy rain fell on his Taylor county ranch.

C. A. Hingus of Friendswood, Galveston county, is plowing 40 acres of old rice land into strips 36 feet wide in preparation for an improved pasture of White Dutch clover and Dalliss grass. The field is being plowed up and down the greatest slope in order to get the maximum drainage. He has fertilized with 500 pounds of superphosphate, 50 pounds of muriate of potash and 100 pounds of nitrate of soda.

More than 10,000,000 bushels of the 1948 wheat crop has been placed under Government loan in Texas, Oklahoma and New Mexico. Latham White, field director of the Production and Marketing Administration, Dallas, reports. White said that about 3,000,000 bushels have been placed under the loan in Texas, more than 6,000,000 bushels in Oklahoma and about 335,000 bushels in New Mexico.

Cleve and Pat Hamilton of Dimmitt have sold 330 head of mixed calves for fall delivery to Tife Younger of Texline for 28 cents a pound.

Here's How Throat Specialists Proved CAMEL MILDNESS

In 30-Day Smoking Test!

● In a recent test, hundreds of men and women smoked Camels — and only Camels — for thirty consecutive days. Smoked an average of one to two packs a day. Each week, the throats of these smokers were examined by noted throat specialists — a total of 2470 examinations. These throat specialists found NOT ONE CASE OF THROAT IRRITATION due to smoking CAMELS!

Prove it Yourself! Make the Camel 30-Day Test in Your "T-Zone"

All Eastland county cotton, quarantined because of the pink boll worm, must be ginned at plants with approved sterilizing equipment in order to meet government regulations. Eastland county does not grow much cotton, but all growers have been asked to abide by these regulations.

In Goliad county Mrs. Anna Dea McGlothling showed neighboring farmers how to shape a natural watercourse into an outlet for surplus water on her farm 12 miles west of Goliad. She did the work with heavy machinery

and plans to sod the waterway with Bermuda grass to prevent erosion. In the meantime she plans to divert the water into other outlets until the Bermuda gets well rooted. She thinks this will be about the middle of 1949.

At least 25,000 acres of vegetables will be planted in Harris county this fall, according to a survey made by Sam Doerre, manager of the Farmers' Co-operative Market at Houston. The acreage will include plots ranging from small kitchen gardens to farms of more than 150 acres. The potential value of vegetables to be grown in Harris county is placed at \$12,000,000.

Chester Iio, manager of the 140-acre Iio Farmers, one of the largest vegetable farms in Harris county, reports that much fumigation has been done on his farm to rid the soil of plant stunting nematodes. Iio recently fumigated 34 acres at a cost of \$40 per acre, and plans to give a field day demonstration shortly to show results obtained. Nematodes are microscopic parasites that attack the root system of many plants. A severe attack of these parasites will reduce yields to almost nothing, and often cause the plants to die. Inroads made on green vegetables are heavy. The spread of nematodes throughout the South has created an unusual problem.

Dwayne Jacobs, 11-year-old son of Mr. and Mrs. Raymond Jacobs of Goliad county, was awarded first prize of \$35 for the best Berkshire gilt and litter in the Sears Swine Foundation swine program in the 4-H Club district. Dwayne's gilt, which he received last year, farrowed in February and had a litter of 10 pigs. At weaning time, when they were 56 days old, all were alive and healthy. The litter weighed 423 pounds, an average of 42.3 pounds per pig.

Elo Condrej, Fort Bend county farmer and stockman, has started mowing operations on 175 acres of native pasture. By mowing this pasture, Condrej says he expects to increase the grazing capacity from one cow to 10 acres to an average of one cow to six acres. Condrej has been one of the most ardent soil conservationists in the county.

Here's Why MORTON CURED HAMS Keep Safer and Longer . . .

STARTING the cure at the bone is what makes the Morton Way of curing meat so sure. It's at the bone area where bone-taint, off-flavor, and souring are most likely to develop. The Morton Way helps stop them before they ever get a chance to start.

And it's this simple to do. Dissolve Morton's Tender Quick in water for a fast-acting curing pickle. Pumped into the meat with a Morton's Meat Pump, this immediately starts the cure INSIDE — gives you a feeling of security and a certainty of results you get only with this method.

Here's why Morton Cured Hams taste Better

After starting the cure at the bone, rub the outside with Morton's Sugar Cure. This sugarcuring salt strikes in, curing toward the center, and gives your meat a rich, old-fashioned, wood smoke flavor.

The result of this double-acting cure — from the INSIDE out and from the OUTSIDE in — is the best tasting, best keeping meat you've ever had — mouth-watering goodness, sweet-as-nut flavor — no bone taint — no waste. Try the easier, simpler, safer Morton Way yourself this year. Morton Salt Co., 120 S. La Salle St., Chicago 3, Ill.

Core your meat the improved MORTON WAY

Preferred by more than a million farm families

Get this important book on meat curing

More than 1,000,000 copies of "Home Meat Curing Made Easy" have already gone in to farm homes. Shows how to butcher, dress, chill, and cure pork, beef, veal, and lamb . . . to make smoked turkey, Canadian Bacon, sausage. Tells the important things to do to get long keeping quality and fine flavor in home cured meat. Send for copy today. Just write name and address on margin and mail with 10¢ in coin to Morton Salt Co., P.O. Box 781, Chicago 90, Ill.

RICE CROP

(Continued from Page 2)
Arkansas and California are important rice growing states.

Rice Growing Problems
Principal problems for the rice grower in Texas are black kernel disease and the maintenance of soil fertility. Most growers produce rice on land for one or two seasons at most and then retire the land to grazing for two or three years. Some growers plant rice only one year in five. By rotating rice on the coastal prairies in this manner it has been possible to maintain soil fertility. Large acreage in each rice plantation is thus needed.

All rice grown in Texas except that needed for seeding purposes—which averages about 3 per cent of the crop—is sold on the commercial market. The food and brewing industries consume most of the Texas crop. Houston and Beaumont are principal rice milling centers in Texas.

Commercial production of rice in Texas dates back to 1897, although statistics reveal that some rice was grown as far back as 1879 when 335 acres of rice were harvested in the State.

The average yield of Texas-grown rice ranges from 45 to 50 bushels to the acre. The average yield and average acreage harvested in Texas during the ten-year period of 1934-43 was 49.2 bushels to the acre from an annual average of 12,938,000 acres harvested.

Better Agricultural Methods
Agricultural experts in Texas and the Agricultural Extension Service of the Texas A. & M. College for several years have been urging rice growers to plant only chemically treated rice in order to insure better

stands and to guard against seed-borne plant disease. Experiments have disclosed that chemically treated seed produce larger yields than untreated seed planted on similar land and grown under similar conditions. For 1945-46 the average for land under experimental tests was a yield of 41 bushels to the acre for untreated seed; 46 bushels for seed treated with 2 ounces of phygon, and 43 bushels for seed treated with 1/2 ounce of the new improved ceseran.

Rice as Livestock Feed
For many years it was believed that rice and rice products could not be fed to livestock successfully. Rice was considered worthless as a stock feed. But this theory, so long adhered to along the Texas coast, has been discounted and proven false by experiments on the J. M. Huffington Ranch near Hockley.

The owner of this ranch during the last two years has fed out many beef cattle on a mixture of rice bran and peanut hay—two products grown on the ranch. He has not found the ill effects that had been claimed to result from feeding rice in any form to his cattle. But, on the other hand, he found that a mixture of rice bran and peanut hay is a well-balanced feed for beef cattle.

Huffington also has proved that rice bran is a good feed for horses. A blue ribbon winning filly at the Houston Fat Stock was entered by Huffington. This filly, he said after the award had been presented, had never tasted any kind of feed except rice bran from the time she was weaned from her mother.

Studies are now being made in many parts of the Texas Gulf Coastal Prairie where rice is grown to find ways for preserving and even increasing soil fertility. It is hoped to find a way that will enable a rice grower to improve soil fertility of land on which he grows rice without having to retire rice land about three years out of five.

Improved farm methods, coupled with improved harvesting and drying methods, have contributed much to the rice growing industry in the past and hold out the promise of larger yields with lower production costs for the future.

USE SUNGLASSES WISELY
The value of sunglasses as eye-protection against heat and light radiations depends upon how these dark specs are used.

You are not using yours wisely, for example, if you read, knit or sew in the sun while wearing dark specs.

Nor are you helping your visibility any by wearing dark glasses for night driving.

Wearing glasses on those days when the sun is in hiding—or after you come indoors on a sunny day—is not making good use of these protective lenses.

If you gaze directly at the sun through dark glasses, you should be reminded that staring at Old Sol is an unwise practice.

Make a habit of focusing your gaze downward.

If the reason you don't wear your glasses when you bask in the sun is because they annoy you, buy a pair which doesn't pinch your nose or slide down.

In the great Southwest where they know Chili best... IT'S Gebhardt's Chili con Carne

A LITTLE FUN

Jokes to Make You Laugh

Essay On Man
A little girl's essay on man: "Man is just a worm in the dust; he comes along, wiggles around for a while and finally some chicken gets him."

Got the Job
Tommy, aged 14, set out to get a job. He asked a foreman of a local engineering works for one. "What can you do, son?" asked the foreman. "Anything," replied Tommy. "Can you file smoke?" asked the foreman. "Yes, sir," replied Tommy with a grin, "if you'll screw it in the vise for me." He got the job.

Name Themselves
The mistress of a Mississippi plantation, inspecting the farm one day, heard the herder urge: "Git along Stumbly, git along Pokey, git along Sleepy, Silly, Nutty, Lazy." "My goodness, Ben," said the lady, "it looks like you've thought up a different name for every one of these 30 or 40 cows." "No, Ma'am, that ain't the way it is. You just let cows alone and they'll name themselves."

Family Heredity
Little boy in woodshed: "Father did grandpa spank you when you were a little boy?"
Father with paddle: "Yes, son."
Little boy: "And did great-grandpa spank grandpa when he was a little boy?"
Father: "Yes, son."
Little boy: "And did great-great-grandpa spank great-grandpa?"
Father: "Yes."
Little boy: "Well, don't you think with my help you could overcome this family heredity?"

Double Trouble
The chief constable of my small home town is also the veterinary surgeon. One night the telephone rang and his wife answered. "Is Mr. Thomas there?" asked an agitated voice.
"Do you want my husband as a veterinarian or as constable?"
"Both," came the breathless reply.
"We can't get our bulldog to open his mouth, and there's a burglar in it!"

Jim Hill's Thrift
Even after becoming boss of a great railway empire, Jas. J. Hill retained his habit of extreme thriftiness. Making one of his periodic inspections one day, he discovered a perfectly good spike lying on the roadbed. With fire in his eye and the spike in his hand, he sought out the section foreman.
Luckily, the foreman saw Big Jim coming with spike in hand. Like every employe, he knew Hill's reputation, so he rushed to meet him and exclaimed: "Sure glad you found that spike, Mr. Hill! I've had three men looking for it for nearly a week."

Day at School
Little Tobey was telling mother about his day at school. "Mother," he said, "today our teacher asked me whether I had any brothers or sisters, and I told her I was the only child."
"And what did she say?" asked his mother.
She said: "Thank goodness!"

Slim Faith
The old colored preacher called his congregation together to pray for rain during a drouth.
"Your faith am slim," he exclaimed. "We is all gathered to ask de Lord for rain, and not one of you hab brought yo' umbrella!"

Independence
A demented fellow who was harmless but whom everybody liked lived in a small town and had no means of support. The "boys" got together and decided to chip in 50 cents each and create a job for—we'll call him Lem. They then appointed a paymaster.
There was an old brass cannon in the town square, and Lem's job was to polish this cannon every day, rain or shine. At the end of the week the paymaster would turn over seven dollars to him.
Lem worked with great zeal for about three months, polishing and polishing. Then one Saturday night he approached the paymaster with a wild gleam in his eye.
"I'm quittin' this here job," Lem announced.
"What's the matter?" the paymaster asked. "Aren't you satisfied with the work and pay?"
"Oh, yes," Lem replied. "But I've been savin' my money. Yesterday I bought a cannon of my own. Now I'm goin' into business for myself!"

The Great Depression
There was a man who lived by the side of the road and sold hot dogs. He was hard of hearing and had no radio. He had trouble with his eyes, so he read no newspapers. But he sold good hot dogs. He put signs up on the highway telling how good they were. He cried, "Buy a hot dog, mister?" and people bought. He increased his meat and bun orders. He bought a bigger store to take care of his trade. He finally got his son home from college to help him. But then something happened.
His son said, "Father, haven't you been listening to the radio? Haven't you been reading the newspapers? There's a big depression on. The European situation is terrible. The domestic situation is awful. Everything is going to the dogs."
Whereupon the father thought, "Well, my son's been to college; he reads the papers and listens to the radio and he ought to know." So the father cut down his meat and bun orders, took down his advertising signs, and no longer bothered to stand out on the highway to sell his hot dogs. His sales fell off almost overnight.
"You're right, my boy," the father said to his educated son, "we certainly are in the middle of a great depression."

Poultry News

Newcastle Disease Among Poultry
A fairly new disease is reported among poultry flocks of the Southwest. It is called Newcastle or "P-E Disease" among poultry raisers. It can affect chickens, turkeys, pheasants, pigeons and even quail, says Dr. W. C. Banks, extension veterinarian of the Texas A. & M. College.
First diagnosed just two years ago in Texas, it has been reported in practically all parts of the State and in nearby States since then.
"P-E Disease" is a virus. It moves from one bird to another by contact, feed, water, air, and probably through the egg. Lice and mites may also be carriers, as well as the recovered birds.
The disease often shows up first in young chicks as a disturbance in the breathing like bronchitis. Then, from two to five days later, nervous symptoms appear. The bronchitis-like disturbance in the breathing may not be noticed, but the nervous symptoms followed shortly by paralysis of some part of the bird, most often the legs, wings, neck, can not be missed.
So far there is little a poultryman can do to combat the disease except remove diseased birds and quarantine the houses and brooders. It may be necessary to remove all poultry for 60 to 90 days and disinfect the houses with a lye solution—one pound of lye to 6 or 7 gallons of water—or a lysol solution—one pint of lysol to 10 gallons of water.

Hybrid Hens Are Better Layers
Hybrid pullets, originated by crossing and re-crossing three regular breeds of chickens, are sturdier and give higher egg yields than nonhybrids. This fact has been demonstrated on numerous farms in the Southwest and in experimental work at the Texas A. & M. College, the Oklahoma A. & M. College, and at many other colleges and experimental stations.
A breed of chickens noted for its laying qualities is generally crossed with another breed that is noted for its sturdiness and hardihood. Another cross-breed is produced in a similar manner by crossing two other breeds that possess qualities the grow-

er wishes to produce in his hybrids.
The two cross-breeds are then cross-bred to produce the hybrid. It takes several years to produce a satisfactory hybrid, but poultry growers have demonstrated that the results obtained are worth all the time and trouble taken to produce them.

Bantam Breeders Group Planned
Organization of an association to be known as the Bantam Breeders of North Texas is to be completed this fall and plans now are under way for an all-Bantam show, according to Tom Gray, Bantam breeder of Bonham.
The idea of forming a Bantam association was discussed during a lawn bantam show at the home of Mr. and Mrs. N. B. Atsip of Bonham. Seventeen varieties were exhibited at this show, including White and Black Cochin, Black Belgian, Black Tailed Japs, Bearded Millie Fleur, Old English, Black Breaded Reds, Silver Duckwing and Wheaton.

Says Hen Laid 14 Eggs One Day
A four-pound Wyandotte hen, owned by William Kennedy, 8-year-old son of Mr. and Mrs. C. V. Kennedy of Huntsville, has Walker county farmers and poultry raisers shaking their heads in wonder.
The Kennedys claim this wonder hen went on an egg-laying spree that started with the laying of 14 eggs in a single day and lasted for two weeks. The little hen laid more than three dozen eggs in two weeks, and skipped but one day, her owners say.
William came to his mother saying his hen had laid an egg in the yard. Mrs. Kennedy came out to investigate and saw the hen lay another egg. She remained to watch the little hen and says that during the next four hours the hen laid 12 more eggs, making 14 for the day.
William and his mother then kept close watch on the hen. Next day she laid seven eggs. Then she missed a day, but next day she laid four eggs. After that she laid only one or two eggs a day for a week. Then on a Sunday she laid three eggs and on the following Tuesday she laid six.
Mrs. Kennedy says the little hen then looked tired and worn out and has not laid for two or three weeks. She is gaining strength and the Kennedys have hopes she may go on another egg-laying spree soon.

This may take time.

Place eight pennies—4 heads and 4 tails—over the numbers 1 to 10 as shown. Now, can you alternate the pennies—tail, head, tail, head, etc.—in four moves, switching two adjoining pennies in each move? See answer at bottom of page.

(Continued from Page 2)
dramatic move in Germany. She could propose—presumably before the Council of Foreign Ministers—that all the Big Four Nations take all their armed troops out of Germany. Russia would propose at the same time that the new constitution which the Communists have prepared be adopted for all Germany.

Such a proposal would put the Western Powers on the spot. To reject it might rouse widespread resentment among Germans, for the Germans in all zones want an early end to foreign occupation. To accept it would be opening the way for possible domination of all Germany by Russia through the Communist Party.

Developments in Germany and France, coupled with disclosures through debate in the United Nations at Paris, have underlined the feeling of pessimism that has marked the Paris sessions. The feeling is this: No matter what words may be spoken or action taken in the United Nations, the real decision in the East-West struggle will hinge on the success or failure of the Russian campaign to wreck the Marshall plan.

PLANT-LIKE ANIMAL
A jellyfish, although a member of the animal kingdom, has many traits of growth like a plant. First it swims, then it settles to the ocean floor where arms or tentacles form. The top moves up and another segment grows under it. The bottom segment has no arms. Then another segment grows beneath the second and so on until a dozen are formed. Now the top with the tentacles breaks off, rolls over and swims away. The next segment grows arms, then it breaks away until all 12 are brand new jelly fish, ready to start the process over again. Some jellyfish are almost too small to be seen, while others are two feet across.

COVER LEFTOVER PAINT
Melted paraffin poured over leftover paint will keep the paint in good condition for future use.

Therefore we ought to give the more earnest heed to the things which we have heard, lest at any time we should let them slip. Heb. 2:1.

HOUDINI DEFIED ALL LOCKS AND BARS

By WALTER KING
(Condensed from The Commercial Appeal, Memphis, Tenn.)

"Challenge! I, the undersigned, have deposited with the manager of this theater the sum of \$100 which I will forfeit to any person who can handcuff me so I cannot escape!"

So boasted Harry Houdini, world's champion hand-cuff king, and he never once lost his money. Whether he was sealed in an iron casket, bound hand and foot and stuffed into a milk can, or handcuffed and locked in the stanchion jail cell, he always succeeded in making a getaway.

Houdini was a big success because he trained himself for his career from the time he started school, and always kept himself in the pink of condition.

Houdini worked for a lock-smith several months in order to study all types of locks and handcuffs. Then he began training himself to withstand great physical hardships. Fortunately, he was gifted with exceptional muscular control. He practiced making his wrists and ankles bigger when he was being tied or shackled, then could relax them to normal size for slipping out of the bonds. For months on end he trained for underwater escapes.

To prepare for immersions in freezing water, he took cold baths until he could climb into ice tanks without feeling numb.

No jail in the world could hold Houdini, but he kept the secret of his miraculous escapes to himself because, he said, "The knowledge would be dangerous in the hands of a criminal."

At Boston he was bound from head to foot by a heavy silk fish line which was

then securely sewn up. It took 45 minutes to complete the job. Houdini set himself free in just over an hour and a quarter but his body was a mass of welts and bruises when he was through with the struggle.

His fame spread rapidly and he made an exhibition tour of Europe. There was hardly a river or harbor in France, Germany or England into which he had not dived manacled hand and foot.

Perhaps the greatest circus stunt in Houdini's bag of tricks was making a five-ton telephant disappear. It was a case of "now you see it, now you don't." When asked how he performed this vast trick the master magician would simply smile and say, "Not even the elephant knows."

Houdini's daring feats of physical prowess brought him the most fame in Kansas City in 1918. He thrilled a large crowd by freeing himself from a straitjacket while suspended in mid-air 30 feet above the street.

Houdini always had a soft spot in his heart for children and invalids. Scarcely a week went by in which he did not perform at an orphanage or a hospital. He even invented a show for blind children.

Houdini had a way with birds and animals too. Dogs, cats, canaries, parrots, and even eagles seemed to love to work with the friendly trickster. His affectionate fox terrier Bobby won considerable fame for his ability to escape from a pair of tiny handcuffs.

Harry Houdini died on Halloween in 1926 taking most of his secrets with him. It was lucky for the world that he chose an honest career. Had he been an outlaw, no jail would have ever held him.

EEL WRIGGLES THROUGH ODD LIFE CYCLE

Roasted, boiled, baked, stewed, fried, pickled, or in jelly, eel meat long has been enjoyed as a food delicacy by many people in Europe and Asia. Americans, however, have generally found eels too shakelike for their taste. The ancient Romans found eel meat a great delicacy. An old French recipe calls for drowning an eel in wine and then stewing it.

In Japan, eel eating has been regarded since ancient times as a remedy against summer lassitude, something like spring tonic. Each year, on a certain day, the season is officially opened, and all who can find it afford the dish take part.

Among the many edible fish consumed in Western Europe, the eel is a favorite, from Italy to Scandinavia. England imports large quantities of eels.

The Wends in the marshy Oder River region of Eastern Germany have given eels an honored place in song and folklore. A Spretwaid swamp home with horsehair in the water. One tale spinner contended they were born of beetles.

Supersonic waves vibrate at between one and two million cycles a second. The highest note audible to man vibrates at approximately 20,000 cycles.

Ultrasonic waves exert great pressure and can be utilized to crush and destroy such deadly agents as tubercular bacillus and other microbes of that character. This pressure also can eliminate the minute filter-passing viruses, such as those causing influenza and the common cold.

Sound waves sent through milk set up agitation which thoroughly stirs the cream content, thus distributing it evenly.

In a further attempt to help farmers, the Mullaard Research Station is now testing a supersonic wave device which could be fitted to milk churns. Sterilization could then be initiated right on the farms.

HOW TO TELL TREE'S AGE

Telling the age of a tree is a nice trick, if you can do it. And there's little reason why you can't!

It's as easy as two times two. In fact, you can amaze your family and friends with your superior nature knowledge by merely applying simple mathematics, according to D. Q. Grove, chief field supervisor of the Davey Tree Expert Co.

There are only two requirements:

1. You must determine the diameter of the tree trunk.
2. You must be able to multiply, at least by 8.

Now that that's all set, the Davey expert is ready to help you unravel the mystery of arboreal ages. The following table, used by Davey field men, provides the ciphers that will enable you to approximate fairly accurately the ages of 17 different kinds of trees. You get the answer by first estimating the trunk diameter and then multiplying that number by—

1. 2½, for chestnut, white elm and tulip.
2. 3, for black walnut, and 3½ for black oak.
3. 4, for birch, sweet gum, chestnut oak, red oak, scarlet oak and sycamore.
4. 5, for ash and white oak.
5. 6, for beech, sour gum and sugar maple.
6. 8, for shagbark hickory.

Most home owners don't realize it takes many years, generally about half a century, for a shade tree to attain mature beauty. The simple system for determining arboreal ages will help bring a keener appreciation of tree values and of the necessity for giving them the attention and care they require to continue to flourish.

BIRDS BEGINNING MOVE SOUTHWARD

Many small birds have already flown south for the winter, and others are going every day. Soon the Summer bird population will have vanished, to be replaced in part by birds that nest far north in Canada and Alaska, and count the snows of our ordinary northern winters as hardship.

The shape of the continent funnels many migration streams from east and west into the same areas in Central America and southeastern Mexico. Although the birds mingle on the common Winter feeding-ground, they sort themselves out when time for return flight comes in Spring. So interbreeding does not occur, and species and varieties remain distinct.

BARGAINS in Industrial Engines. Several 30 H.P. Gasoline Engines in excellent condition. Less than half price. 1-160 HP La Roi 6 power unit, 1-200 HP La Roi 8 power unit and other engines at various prices. Industrial Engines, 732 North Main St., Ft. Worth, Texas. Ph. 8-9554.

MAINTAINER in tip-top shape, Harry Elmer, P. O. Box 25, Bannock, Texas.

FOR SALE—Five new standard Honda automatic water pumps, \$75 each, and one 40-gallon automatic butane hot water tank, \$120. This equipment is slightly used but guaranteed for one year as new. See O. R. KNOLL, Phone 4602, DeWitt, Arkansas.

1947 MODEL, 122-12-ft. IHG combine. Priced reasonable. J. D. Greenman, Box 74, Sumnerfield, Tex.

REAL ESTATE

FOR SALE—2-story brick building and complete stock of groceries on lower floor. The Mullard Research Station is now testing a supersonic wave device which could be fitted to milk churns. Sterilization could then be initiated right on the farms. Write R. D. Willard, Box 97, Wortham, Texas.

FOR SALE—Apartment house, 2 apart with garage, 10 rooms, 2 baths, 2 cars, 208 S. Kaufman Street, Mexia, Texas.

800 ACRES of the best wheat land in eastern Colo. All in cultivation. 520 in summer fallow, wheat up and in fine shape. Immediate possession. Good well and 3-wire fence all around. Also combines, 2 tractors, 2 one-way plows, chisels, rod weeder, drills, 2 Ford grain elevators, 1000 bushels of grain, etc. Terms, 8 miles from town, H. D. Stevens, Burlington, Colo.

FARMS AND RANCHES

FOR SALE—195 acres of fine dairy and/or profitable land with barn and house on prominent highway, ideal location. Box 312, Bonham, Texas.

RANCH IN NEW MEXICO—154 acres with good improvements. Also 100 acres just outside of city limits, with excellent home. All city conveniences. Write for info. Box 891, Carlsbad, New Mexico.

FOR SALE—Small modern farm furnished. Livestock; hunting and fishing close. O. P. McCullum, Locust Grove, Oklahoma.

125 ACRES, \$2,500 cash, new house, good roads, hunting, fishing, schools. Floyd Allen, near Easton, Adams, Wisconsin.

RABBITS

RAISE RABBITS COMMERCIAL—Big income for full time producer, or handily supplement your present income in spare time. We teach you. Send for free bulletin, prices, hatch plans, etc. Get into this amazing industry now. Rabbit Federation, 200 Burrell Building, San Jose, California.

EMPLOYMENT TO CONTINUE

Federal economists predict that the present boom in employment and in personal income will continue through 1949. At the same time, the Bureau of Labor Statistics reports that in August wages of factory workers reached a new high at an average of \$53.86 a week. It said that there was a small drop in retail food prices during that month but that the general cost of living in this country had increased one-half of one per cent.

Speak, move, act in peace, as if this were in prayer. In truth, this is prayer.—Fenelon.

PRISON RODEO

(Continued from Page 2)

has come funds for such things as artificial limbs for prisoners, travel fare home for destitute inmates relieved from the penitentiary, holiday dinners, movies, books for the library and the like.

All rodeo contestants are inmates and volunteers. Trick ropers, trick riders, clowns and such are hired from the outside, but do not compete for prizes. Purses for the winners are not high and no man receives his prize money in a lump sum. He's given credit on the prison system books and can draw on his winnings at the rate of only \$3 a week. This, Springfield explained, is to discourage the building up of class distinction among the prisoners.

For years the Methodist and Baptist churches of Texas have fought to prevent the prison rodeos from being held on Sundays, but with no success so far. The rodeos could be held any day of the week, but it's only on Sundays that the show draws out big crowds and big money.

Milking Wild Mares

The next acts were ready. Wild mares were being crowded into the chutes. The wild-mare milking contest was about to be staged. The convict milkers crowded up to the chutes, reaching through the bars to test the milk flow.

"Don't want 'em running a duster in on me!" one cried.

Another ducked a stream of milk and allowed his mare was fresh enough.

Then out they came, with two convicts to each mare, one to tie his teeth in her ear and pull her head down, the other to dodge wicked hoofs and squirt a few drops of milk into the narrow mouth of a coke bottle. Instantly there were mares and convicts down all over the place, with other mares and convicts leaping over them or stumbling and falling on top.

Mares snorted and squealed. Some lashed out with wicked heels and some reared high, chopping with their forefeet at the men clinging to their heads. One slung a convict loose from her head, slamming his body against a brick wall with such force that the sodden sound of impact carried completely across the arena. The man fell to the ground and lay limp while another mare and two convicts fought back and forth across his body.

Judge Picks Winner

Then a striped figure darted out of the mad scramble and raced for the judge, holding aloft his coke bottle. Reese B. Lockett, mayor of Brenham and judge of the milking events, snatched the bottle out of the convict's hand, tilted it to his mouth to make certain it held milk, then proclaimed the convict winner.

Came more bronc busting, more bull riding, a wild mule race, a wild cow milking, and

More people use Morton's

PLAIN OR IODIZED

When it rains it pours

more contestants carried out on stretchers.

Grand finale of the show was a mad chariot race, with clowns riding two-wheeled carts hooked to wild Brahman bulls in such a manner that the bulls could swing around and run at their own curts if they chose. And some did.

"We're thinking about taking part of our show to Madison Square Garden next fall," Springfield commented as we headed for the gate.

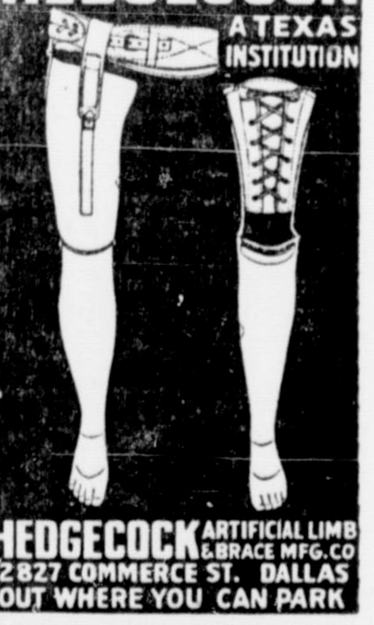

"The FBI man nodded. 'It'd be excellent publicity for the prison,' he agreed.

THOUGHTS ON PEACE

Blessed are the peacemakers: for they shall be called the children of God.—Matthew 5:9.

The truest and surest way in which we can serve our fellowmen is not so much to do anything for them, as to be the very truest, purest, noblest being we know how. —Frances P. Cobbe.

This world can never be made right by force, nor by fear, nor by power. In the long run nothing conquers but ideas, nothing governs but the Spirit.—Leacock.

HOUSEHOLD HELPS

By MARGARET MOORE

NEW IDEAS EASE IRONING TASK

Ironing the family wash is such an ingrained habit, so much a part of the weekly chores, that most women never give a thought to the way they do it. Few women were ever really taught how to iron. They just learned, of necessity, and go on doing the job trial and error, brute force and sweat methods.

There is an easier, scientific way to iron, developed on the basis of original research by Dr. Elaine Knowles Weaver of Ohio State University.

The new methods were launched last year when one manufacturer of irons began teaching women how to iron a man's shirt in 4½ minutes—and do a more professional job than most women can do by their own methods. Now the system is expanded to cover all kinds of garments.

There are three basic rules for the new technique, says the company, which points out that any ironing equipment can be used. First, bring the garment to the iron. Instead of the iron to the garment; second, handle the garment as little as possible, and third, use the left hand as well as the right, for ironing.

Proving that the old-fashioned ironing methods are too much of a job for most women, the company's research showed that with a four-pound iron—which is about the average among new irons—the housewife lifts the equivalent of 2½ tons while doing an average ironing for a family of three.

She does all the ironing with the right hand, lifting the iron and putting it down constantly—and she winds up with tired feet and legs, a tired back, and an exhausted set of right arm and shoulder muscles.

For the new methods, the housewife sits down on a chair or stool which puts her at a convenient height to work on the ironing board. Instead of doing a lot of lifting, she slides the iron as much as possible, and to put it at rest where it won't burn the ironing board cover, she just tilts it back, instead of picking it up and replacing it on end.

The method includes the steps in sprinkling and folding along with ironing—and did you know that you shouldn't roll sprinkled garments up into a tight roll?

If you do that, you just roll wrinkles into the garment, and then you have to iron them out. It's much better to fold each garment loosely, instead of rolling it up, because it gets damp just as well without wrinkling. Avoid using too much water, because then it takes too much time to iron the garments dry.

DOLL'S SNOW SUIT

5672

By MRS. ANNE CABOT

A colorful knitted snow suit in authentic Norwegian design is scaled to fit a 20-inch doll. Knitted in forest green, red and white soft wool, the set is complete even to mittens and after-ski shoes. Dress a discarded doll in this outfit and see how quickly it becomes the "pride of the collection" again.

To obtain complete knitting instructions, stitch illustrations and graph charts of pattern Design of Doll's Snow Suit (Pattern No. 5672) send 15 cents in COIN plus 1 cent postage. ASPARAGUS SOUP

This creamy asparagus soup is the basis for autumn luncheon.

Here's how you make it. Take 2 pounds of fresh asparagus or a 2-pound package of the frozen and cook in boiling salted water until tender; drain, saving the liquid. Dice about half of the asparagus. Add water to the liquid to make 6 cups. Put diced asparagus, 6 bouillon cubes, 2 tablespoons of minced onion, ¼ cup diced celery and teaspoon of salt into vegetable liquid and simmer for half an hour. Force through sieve. Melt ¼ cup of vitaminized margarine, stir in 6 tablespoons of flour and add asparagus stock slowly. Heat until thickened, stirring all the time. Add ¼ cup of sweet cream and the remaining asparagus tips. Serve hot, garnished with pimento cut in any desired shape. Makes 6 servings.

Tip for Asparagus

For a Sunday night supper platter arrange cooked asparagus on the serving dish, top with creamed tuna and a sprinkling of Parmesan cheese. If the platter is of a heat-resistant material it can be put under the broiler for a few minutes so the cheese will melt and turn golden-brown.

HOW TO KEEP HAIR HEALTHY

Is the prospect of a fall permanent filling you with dread? A permanent dye is a good permanent only if a woman's hair is healthy. Hair, after a summer of too much sun, too much wind, and too little brushing, does not have the elasticity and gloss that go with hair and scalp health.

Reconditioning is in order. It means a little effort, but it's worth it because the end result will be hair restored to beauty, and hair that will "take" a permanent the way fine leather takes a polishing.

Without one weapon your fight on the effect of a summer's neglect is lost before it starts. The weapon is the good, the sturdy, bristled hair brush, wielded by you with all the constancy and vigor you can command. Combine massage of the scalp with brushing of the hair shafts and you can change the state of your hair from sickness to health in a month.

The kind of a brush you use is tremendously important and if you're looking for a super duper, see the one that has just come to market—one made of shining lucite with bristles that revolve. The bristles, which are of either nylon or the wonderful boar bristles we simply couldn't get during the war, are set in lucite bearings, rotating freely in the base of the brush.

Does all this sound mechanical and gadgety? It isn't at all. The sturdy, long bristles revolve of their own accord, as they pass thru the hair in normal brushing action and their "feel" as you sweep the brush easily and naturally thru your locks is wonderfully pleasant.

The revolving bristles set in little sockets as they are in this new brush give it another advantage. The bearings are set about an eighth of an inch above the back of the brush. When the brush is turned over, bristles upward, the little raised bearings, set in even rows, give you scalp massage tips.

It is something of a double edged sword in your war on lack of luster. Massage is every bit as potent as brushing in stimulating the natural oil from which all hair beauty flows. With this newcomer to the hair brush field—lauderable and guaranteed for a year—you should find hair reconditioning a pleasure.

TESTED RECIPES

Now is the time to prepare such rich repasts as roast fresh pork, and trot out all the trimmings!

Fresh pork is high in food value, rich in protein and minerals such as phosphorus and iron, and an especially good source of thiamin (vitamin B-1).

Children who do not get enough B-1 cannot grow normally, become tired and cross, and often have poor appetites. Sometimes they have dull aching pains and even neuritis.

To keep our families in good condition, serve lots of fresh pork.

ROAST PORK WITH RUBY PEACHES
1 fresh pork loin 1½ tablespoons flour
1½ teaspoons salt, Few dozen whole cloves
dash of black pep. 3 tablespoons plum jelly,
per peach halves Parsley for garnish.

(Be sure to note weight of pork loin when buying, for roasting time depends on weight).

Mix salt, pepper and flour, and rub well into the outside of the meat. Press a few whole cloves deeply into the fat here and there. Place fat side up on rack in roaster and slip into hot oven (475 degrees Fahrenheit) 15 minutes to warm through. Reduce oven temperature to 350 degrees, start timing, and roast uncovered with no water in the pan, allowing 30 minutes for each pound. (In other words, if your meat weighs five pounds, you will roast it 2½ hours.)

It should come to the table crispy golden on the outside, tender and juicy in the center. Undercooking of pork is unsafe for health. Overcooking makes it thready and unpalatable.

For best slicing, plan cooking time so roast may be done and out of the oven 20 to 30 minutes before serving time.

Drain peaches and save syrup for use later. Arrange halves in shallow baking dish and put a teaspoonful of plum jelly (or any tart jelly) in center of each. Run under broiler until heated through. Arrange on platter with pork roast, garnish with parsley, and serve at once.

HONEY-NUT STEAMED PUDDING

¼ cup shortening ¼ teaspoon salt
¼ cup honey ¼ teaspoon cinnamon
¼ cup sugar ¼ teaspoon nutmeg
1 egg ½ cup milk
1½ cups sifted flour 1 teaspoon vanilla
2 teaspoons baking powder ½ cup chopped nuts

Cream shortening until light and fluffy; gradually stir in honey and sugar. Add egg; beat well. Sift together flour, baking powder, salt, cinnamon and nutmeg; mix with All-Bran. Add first mixture alternately with milk. Stir in nuts and vanilla. Fill greased mold two-thirds full; cover tightly. Steam 1 hour. Serve with orange or other fruit sauce.
Yield: 6 servings.

Double Blankets Can Be Made Single Size

Double blankets are much easier to handle, both in laundering and bedmaking if cut apart and bound separately. They are nice, too, on a warmer night when one may be removed if they prove too warm.

Rusty Curtain Pins

If the curtain pins have become rusted, let them lie for a few minutes in a bowl of water to which ammonia has been added. Then take them out and rub with a dry cloth to remove the loosened rust.

Thank You!!

As soon as you get back from a pleasant week-end, send your hostess a thank-you note. You will be thought of as a perfect guest if you perform this small task to show your appreciation for your hostess' efforts to entertain you.

HEREFORD BREEDERS TO HOLD SHOW

The South Texas Hereford Breeder-Feeder Association's twelfth annual show will be held at Beeville on Nov. 1 and 2. A fine quarterhorse show is to be held in connection with the cattle show. There also is to be a rodeo conducted by Rocky Reagan. Auction sale of the Hereford cattle will be held at 2 p. m. on Nov. 2.

BRIGHTEN THE SOUP

If you are serving chilled cream of chicken or mushroom soup be sure to garnish each bowl with a bright vegetable; use very thin slices of radish, thin cucumber strips, chopped green pepper or parsley or coarsely grated carrot.

NOTICE CHANGE OF SCHEDULE

7:52 A.M. eastbound trolley will run at 8:02 A.M. after Tuesday. Conductor stopping 10 minutes for hot Light Crust Biscuits, butter and jelly.

PARTY-LUNCH SPECIAL:
Cheese Bran Muffins
Make 'em in a Jiffy
... Serve 'em Hot!

Crunchy toasted Kellogg's All-Bran muffins laced with cheese... you'll get "raves" on these every time!

2 tablespoons melted shortening
1 egg, slightly beaten
¼ cup milk
1 cup Kellogg's All-Bran

1. Combine shortening, egg and milk; add All-Bran and let soak for five minutes.
2. Sift flour with baking powder and salt; add cheese. Add to first mixture and stir only until combined.
3. Fill greased muffin pans two-thirds full and bake in moderately hot oven (400° F.) about 25 minutes.
Yield: 9 muffins (2¼ inch size).
