"The market outlet which was found his trous." work here will arrive shortly, says Mr. Gray, and the company will be ready to begin the work.

Highway Progress

Although much progress has been made in road building, there is still

made in road building, there is still a great deal of work to be done. Highway 129, between Brownwood and Rising Star, will be finished as far as dirt and drainage work is concerned this week, according to reports from resident engineer Leo Enlinger's office, and the road will be ready for state inspection.

Dirt work on Highway 10, south to McCulloch county line, has already been started and culvert and other drainage work will start this week. Several crews of men are employed in the dirt work and it is thought that several crews will work on the culvert construction, which will start near Brownwood and go south to the McCulloch county line.

Work on the connecting link between highways 10, 129 and 7 is ledged on the north part of cour concrete bridges, one over Pecan Bayou and three over the slough, are being constructed in preparation for pouring of the concrete. Work on Highway 7 toward the Coleman county line is nearing completion and is almost ready for inspection.

Mostly local labor is expected to done.

be used on the water project and on a great deal of the highway work, according to reports. Contractors on the different jobs have control of the labor used and have promised their support to the city and county in giving all the work possible to local labor.

RECORD RINGER

LONDON-Francis Fraser clair LONDON—Francis Fraser claims the bell-ringing championship of England. At the Ethham Paris church he has been official bell-ringer for sixty-two years, having held the job since he was 18. Every so often he gets a ring called the "Oxford Triple Bob Major." This requires constant pulling of the bells for two hours and forty minutes, with 5040 changes for different notes.

Fourteen Bucks Brought Back by **Brownwood Party**

Fourteen bucks and one turkey gobbler were brought back from Mason county by a hunting party made up of L. E. Shaw, Dr. B. E. Bell, Ed McGee, Arthur Bell, Bob Rankin, Bill Roberts, J. H. Ragsdale and George Baugh. The party returned to Brownwood Wednesday afternoon after about four days hunting. They report that there are plenty of deer in Mason county this year, but not so very many turkeys.

Speech Scrambler Is Being Tested

NEW YORK, Nov. 20—(P)— A speech "scrambler" to prevent eavesdroppers from listening in on trans-Atlantic conversations is the new-est wrinkle in radio telephony.

The device was demonstrated by Sergius P. Grace, assistant vice president of the Bell Telephone laboratories, last night at a science forum devoted to electrical wonders. It consists of an electric "transmit-ting brain" and an electric "translating brain" which produce a lan-guage spoken by no human being. The "transmitting brain" distorts the natural speech frequencies of tones so as to make the result unintelligible to any one listening in or the ordinary radio. The "translating brain" picks up the frequen-cies and rearranges the inverted les and rearranges the inverted eiving party.

New Day: Mrs. S. P. Martin.

Prayer: Miss Ella Gilbert. For some time the members of the Bangs Baptist church have felt in their hearts the need for trained leaders in the different organiza-tions of our church work. That our church work might be organized to suit all ages. God answered the prayers of the faithful ones by sending to us our present pastor, and wife, and at the close of the revival meeting in which M. E. Cunning ham did the preaching, a number gathered at the church and prom ised the pastor their cooperation for such work. The visiting preacher and pastor Rucker formulated a plan, and organized a B. Y. P. U. since that time some who promised their support have been very faithful, others seemed to have forgotten their promise. The church now has an adult B. Y. P. U. also a Senior, Innior and Brimery union all delays Junior and Primary union all doing excellent work under the very efficient leadership of Rev. and Mrs. Rucker and their co-workers. The Juniors rendered a program Sunday evening before the preaching hour that made all those present rejoice, and to thank God for rending workers to Bangs who has the love of God enough in their hearts to train these different unions that they render just such service to him that will glorify his name.

he second meeting of the Brown ty Teachers Association held at venor high school auditorium, by night and the next meeting

adopted. It was also decided by the teachers that the organization would be known as the Brown County Teachers Association instead of the Brown County Rural Teachers Association and teachers in all schools in the county, whether rural or city school, are invited to become members of the association.

An interesting program of singing and drills by students of Grosvenor school was given after the opening of the general meeting.

Interesting talks were made by R. L. Fortune and Mrs. Ernest Clardy of Brownwood. Mr. Fortune spoke on "The Relation that Should Exist Between a School board and Teachers." Mrs. Clardy talked on "What the Parent-Teachers Association Does for the School."

Business Session

The business meeting followed and then the teachers went into sectional meetings. Following are the sectional meetings and the chairmen: High school, A. E. Hallford; intermediate, Miss Elma Middleton; primary, Miss Mabel Posey; home economics, Miss Goldie Matthews; coaches, Harvey Byrd; and agriculture and manual training, J. T. Stovall.

Stovall.

The meeting for agriculture and manual training teachers was the first to be held by the association and was very interesting. Mr. Stovall made a talk on teaching agriculture and Paul McCasland of Brookesmith talked on value of teaching manual training in schools. Other sectional meetings were also the teachers. enjoyed by the teachers.

Twenty teachers have joined the association and a great many more are expected to join before the next meeting. Following is the member-

Came To Texas

A few years later, Mr. Jones came to Collin county, Texas, where he married Miss Virah Roberts in 1872. The young couple decided on a change of residence in 1873, and naving heard favorable reports of Brown county, decided to move to this section of the country. They made the journey by wagon, and settled in Blanket.

"Yes, we were pioneers," said Mrs Jones. "I don't think I'd like to do it over again, either. The country wasn't very well settled in nose days; there were occasional dian raids, too.

"The country around Brownwood was extremely wild in appearance. Game was plentiful, deer, antelope and wild turkey were everywhere. There were few roads in the coun-Mr. Jones was one of the men tho cleared the road to Comanche. There were no supplies

Brownwood. Everything was haul-ed from Fort Worth and Waco." Mr. and Mrs. Jones have had a cong and happy life together. They have reared eight children, most of whom live in and around Brown-

BODIES AND WRECKAGE AIRMAIL PLANE FOUND BURBANK, CALIFORNI

Three bodies and a pile of wreckage, found yesterday in the Tehachapi foothills north of here, revealed the fate of a northbound Pacific coast airmail plane, caught n storm and fog early Tuesday. Flavius A. Donaldson, veteran ilot who served in the army air corps during the World war, was at the controls Monday night when ne Pacific Air Transport plane left here for Oakland. With him were George Rogers, mechanic, and Miss Jean Markow, who was celebrating her 18th birthday with a flight to Portland, Ore., to visit friends. The ship carried 319 pounds of mail. Radio messages sent by Donaldon to the transport base here hronicled the flight until 2:07 a Tuesday. At that time, after a fight with winds, snow and fog, he reported he could gain no more than

above the highest peaks there, and was circling helplessly over Tejon, where a small emergency landing field lay hidden by snow or fog.

The bodies of the girl and the mechanic were found near the spot where the plane first struck. Don-Because of the frigidaire equipment, the new additions to pumps island of Hawuii, kept a watchful eye on Halemanmau, fire pit to had plowed to a halt 500 feet away on the gentle sloping plateau.

Sherman, Texas

n returned winners in a Payne Park was 26 to 7 with Howard Payne on the long end of the count. although the afternoon was or less suitable to the great ridiron sport, it lacked much of seing a pleasant one to the small rowd of spectators who shook and hivered throughout the four quarers of the rather hotly contested

eather was suitable for playing obtall and as a result the fans the great college pastime, an exdelays to allow the hard work-g atheletes a chance to cool off Although the score would indicate that the Jackets had things about as they pleased, this was far from true. In fact the Tech lads battled very last and forced the Jackets to resort to their aerial for three of the four touchdowns made. ne Tech line yielded plenty of bund when the Jackets were not within striking distance but once

Jackets Start Early

Howard Payne won the toss and cted to defend the north goal, with a favorable wind sweeping on outhward. Tech kicked and after returning the kick-off to midfield, the Jackets opened up an offense that kept the visitors well on the defense throughout the first quarter. Their first drive down the field was halted but it wasn't long until the Jackets were driving deep in ch territory again. But after making a first down on the Matador Lubbock bolstered and after three plays at the tackles had been made the Jackets had been pushed back six yards. Apparantly the drive had opped again but on fourth down McCarver shot a pass to Cloninger who took the ball on the Tech one yard line and stepped over for the game's first touchdown. Mc-Carver fumbled the ball in holding it for Baker's try for extra point and Johnny never did get to try

Jackets drove deep into Tech ter-ritory but again their running game was smeared and again the aerial delivered the scoring punch. The touchdown play that gave the jacket ing the ball on Tech's five yard line, then going over standing up for the tally. Baker's try for extra

New Team Goes In the close of the quarter Coaches Cheaney and Kealineup in the game. Jake had start-ed the tilt in Gilger's place, the latter being crippled. These second stringers stayed in the game during most of the third quarter and it was against them that Tech made their only tally of the day. Doose, who attended Howard Payne and played with the Jacket Scrubs in 1928, paved the way for Tech's score. Starting from his own 17 yard stripe, Doose broke through the center of the line and crashed through and over the secondary for 51 yards before finally being haul-ed down on the Jacket's 32 yard line. The Matadors followed this advantage up by carrying on suc-cessive downs to the Jacket nine yard marker. But four plays saw the drive stopped on the one yard line but the touchdown was not long delayed. Worley, punting un-der pressure from his one yard line sliced one out of bounds on his own 13 yard line. On the first play Wooldridge skirted his own right end for a touchdown but the play was called back and Tech penalized for being offside, Undaunted, Woolfrom idge took a lateral pass Doose on the next play and again went around his own right wing for the score. He then added extra

After the Tech score, Coaches Cheaney and Keaton lost little time in getting their regulars into the game and with these boys back on the field, the tide of battle was changed and that rather suddenly. Early in the fourth period the Jackets drove to Tech's six yard line for a first down but three plays lost yardage and it looked like Tech lost yardage and it looked like Tech had stopped this drive. But Baker called Cloninger on one of his end around sprints and Sylvah went over for the score. Baker's toe did its duty for the extra point and the game was on ice.

the game was on ice.

Gibbs In Long Sprint
Tech took the next kick-off and after being stopped France sent a long punt out of bounds on Tech's
20 yard marker. Two plays failed to gain and on third down McCarver tossed a 20 yard pass to Gibbs who tucked the ball under his arm and headed sould, conving to a halt only after he had raced down the sideline 60 yards for another touchdown. Baker again did his stuff in kicking for extra point.

Tech flashed a better than average team and like all Cawthon coached teams, it fought from first to last. In France the Matadors exhibited a punter that rates with any of them, however his great toe

that netted 73 yards. However this effort could not be included in the total, as the play was called back and Tech penalized.

Sylvan Cloninger and Buck Gibbs had a barrel of fun Wednesday and both experienced a day that everything went well. Each made two touchdowns, Cloninger making the first and third, with Gibbs alternating for the second and final scores.

Bob Bettis and Captain Glasscock

Completed and 2 were intercepted. Howard Payne punted 14 times for 38 yards; Texas Tech 14 yards; times for 38 yards; Texas Tech 24 yards.

Completed and 2 were intercepted. Howard Payne valled between America's two printers of 38 yards; Texas Tech 14 yards; times for 38 bodies, the A. A. U. and the Nation-yard average. Worley and McQueen did punting for Howard Payne; Election of Brundage to the Brothers, Wooldridge, France for Tech. Howard Payne was penalized 38 yards; Texas Tech 49 yards.

Howard Payne was penalized 39 yards; times for 38 bodies, the A. A. U. and the Nation-yard average. Worley and McQueen did punting for Howard Payne; Election of Brundage to the presidency of the A. A. U. in 1928 signalized the beginning of a gerious attempt to heal the breach and yesterday the quiet but hard-work-times for a total distance of 60 complete and apparently lasting peace.

every man in the Jackets' starting lineup played acceptable football. Doose did some pretty good playing for Tech and had lots of fun doing it. The Jackets took pleasure in to be to returned winners in total argument and once more battling proteges of Pete Cawhan, Texas Tech grid mentor, have the dust at the hands of the bownwood Baptists. The verdict bownwood Baptists. The verdict way for that 51 yard waltz—boy he will remember that jaunt for many a day Wooldridge proved a many a day. Wooldridge proved a capable performer in the Tech backfield while in the line work of Teal, at end, was outstanding. Langford also played a good game

as did Captain Durham at center. When the Jackets and Matadors had called it a day Wednesday the by Harry Sinciair, chairman of the cent during September this year and 1930 football schedule for Brownwood soil had been cleared of every thing executing that final and the consolidated oil Corporation. thing excepting that final and Thanksgiving between Southwestern University and the eleven that has not lost a conference game since the final game of the 1927 solidated.

PRESENTING THE NEW CHEVROLET SIX

wide popularity.

Today the Chevrolet Motor Company presents the Bigger and Better Chevrolet Six, a new model

In both the chassis and body of this new sixcylinder Chevrolet you will find expressed, as never before, Chevrolet's well-known policy of progress through constant improvement.

For-without departing from the basic features which have won the enthusiastic approval of over 2,000,000 buyers-Chevrolet has produced a six-cylinder car which represents an entirely new standard of quality, value and refinement in the low-price field.

Your first impression of the new Chevrolet will be one of striking fleetness, grace and beauty. The car is longer, lower and modernly smart. The radiator has been deepened and its appearance enhanced by a curving tie-bar and chrome-plated parabolic headlamps. The long hood lines sweep back unbroken to blend gracefully into the new Fisher bodies. And never was Fisher's fine craftsmanship more evident than in the bodies of the new Chevrolet Six!

Not only are the smart, graceful, new bodies roomier and more comfortable, but as you study them you will discover many gratifying new features and pleasing refinements-many examples of that painstaking attention to detail which is the basis of true quality.

Mechanically, too, the new Chevrolet Six is better automobile. The wheelbase is longer. The frame is stronger. The steering is easier. The clutch is more durable. There is a smoother, quieter, easier shifting transmission. In fact, wherever finer materials and more advanced design could add to Chevrolet quality or increase Chevrolet's traditional economy of ownership-improvement has been made. See the new Chevrolet Six-and you will agree that here is the Great American Value!

AT NEW LOW PRICES « «

Chevrolet has long been one of the lowest priced cars in the world. Yet due to the savings of volume production and increased manufacturing efficiency, the Bigger and

Better Chevrolet is offered at new low prices. Come in today. See and drive the new Chevrolet Six. Learn the new economy of owning a modern, fine quality, six-cylinder automobile.

Nothing could mean more to the

progress and development of a city than modern, well equipped hotels

that are large enough to serve any situation that might arise, thinks

the Davenport Chevrolet Company in congratulating Hotel Brownwood

influence and are happy because

Is Ready to Grow

ject and cooperated with the build-ing of the hotel in every way. It is with much pleasure that the instiution congratulates Southern Naional Hotel Corporation and employees on the formal opening of Brownwood's twelve story, 225 room Chevrolet Dealer

Night clerk George Foster is also who come to the hotel because places. He came from the was night clerk.

J. B. Mayes, auditor, takes his position in Hotel Brownwood after quite a bit of experience in hotel

n a short time by regular airways service—Brownwood, in the heart of long stood out as an overnight stop-ping place, rather than a town to be speeded through in order to get to other places, but now that the new twelve story. 225 room Hotel Brownwood is opening it will be nore than ever a place to stop in

and spend the night, Brownwood can truly be called he "Cross roads of Texas" because of the fact that so many important tate and federal highway which connect with other important highways, cross in Brownwood. For many months an intensive road uilding plan has been carried on in the county, as well as a program to get state and federal designations on some of the highways which pass hrough Brownwood and Brown

In the proposed federal highway, Canada to Gulf," Brownwood is one of the most important towns on the route. In this proposal Brown-wood will have a straight outlet to Canada on the north and to the Gulf of Mexico on the south. The Canada to Gulf highway would come part of the route on state highway No. 129 which comes into Brownwood straight from Canada through North and South Dakota, Kansas, Oklahoma and into Texas at Vernon and to Brownwood then ough San Antonio and to the Gulf at Corpus Christi.

Much has been said concerning the construction of the new hotel here as well as its future possibility.

State highway 129 comes into Brownwood from the north after Cisco. It goes into highway No. 10 on through Brady on No. 9 to San Antonio and Corpus Christi, which is partly the route of the Canada to here as well as its future possibili- is partly the route of the Canada to

ties and of the benefit which Gulf Brownwood will derive from the building. After all publicity is put out concerning the hotel and all way No. 67 at Stephenville, which phases of it, not enough has been comes from Dallas through Glen said or will be said concerning the Rose and the highways follow the six men who worked so diligently same route to Brownwood. Highway and effectively to secure the \$100,- No. 7 goes straight to Coleman, 000 in Brownwood, necessary to then to Abilene. Number 7 goes into guarantee for the construction. highway No. 23 at Coleman, which There was a committee of six goes on to San Angelo and highways Mr. Wallace was born near which was appointed to raise this from there lead straight to the Houston and started his hotel career money. These six men left their Mexican border at Presido and on Mexi various businesses and went about through Northern Mexico. Highway

eed with the construction.

Hamilton which connects with the This committee was headed by Pecan Belt highway at Priddy. J. F. Renfro, the other members There is a good road to the San were Roy Morris, E. B. Henley, Sr., W. Lee Watson, J. J. Timmins and N. Lee Watson, J. Le W. Lee Watson, J. J. Himmins and now are to build a state designated highway from Brownwood through whom Brownwood should turn in thanks for the new hotel which will be officially opened Friday ing that "all roads lead to Rome."

This statement could be aptly changed to say that "all roads in Texas directly or through their con-nections lead to Brownwood. A study of road maps shows this to be Hotel Promotion practically true and that many, many important highways lead to Brownwood and connect this Heart of Texas city with all important cities in the state.

Travel Here Increasing

First National Bank has since the beginning of the project for Hotel Brownwood been one of the chief Travel on the highways to Brownackers. All along the institution as wood is increasing daily as the roads are constructed and although the a whole and the employees as indi-viduals have talked the hotel proroad building program for Brownwood and Brown county has not been completed, it has gone a long Na- way toward completion and it will of system of highways in the state will

Hotel Seen as Aid in Making Health Resort

Hotel Brownwood is one of the everal reasons why Brownwood hould be one of the leading health esorts of the state.

resorts of the state.

The Hot Wells which are only a short distance from town have already been recognized for their health-giving properties.

In discussing the plans for the construction of the hotel this fact was mentioned and considered as one of the future possibilities.

It was thought that with piping the waters directly from the wells into the building where it could be easily obtainable that patients would come to Brownwood more easily obtainable that patients would come to Brownwood more readily when they were assured that they could get treatment immediately in their hotel rooms and that besides taking the healing baths they would also have the comforts of a modern and up-to-date hotel.

The possibility of this yet being done is often mentioned by many here in connection with the future here in connection with the future of the new hotel,

Hotel Block Was Formerly Home of

Where the new Hotel Brownwood now stands there formerly stood the two story stone building which was occupied by the Austin-Morris Hardware and Furniture Company. This establishment had been locat-ed on the corner for many years. Before the firm became Austin-Morris Company it was known as

consolidated with the Morris Furniture Company and that company moved into the store and enlarged the business to its present proportions.

When the promoters of the new motel decided that the corner was an ideal location for the the hotel the Austin-Morris Company sold and then during the months of November and December of 1929 held mammoth auction sales to dispose of their stock prior to moving from the building for wrecking. The Masonic Temple was completed and the store moved into that building so that the new 12 story hotel

We wood are in a position to be among the ones here to receive benefits from the new business. With their expert mechanics they will be in a position at all times to serve the traveling public which will be day.

The toll taken by motor accidents in France last year was ten lives a day.

We Welcome--that the new 12 story hotel ilding could be constructed where now stands.

Two Otis Micro Elevators Part Hotel Equipment

Two Otis Micro elevators are used for the transportation in the new Hotel Brownwood. Running from the basement to the twelfth floor of the building they provide each floor with quick service. These new type cars are automatically controled so that they cannot be stopped be-tween floors as they seek the floor level. When the power is shut off between floors the cars will not stop until they have reached the floor

One of the cars has entrance from one of the cars has entrance from two sides and can be used for the transportation of food and dining room supplies from the first floor to the roof garden, to be taken in-to the utility kitchen on that floor. Besides the operating equipment and the signal lights on the control board in each car there are two safety appliances which will insure safe descent by the passengers in case of trouble.

Hotel Requires Large Quantity of Fine China

In the operation of a modern and up-to-date coffee shop such as that in the new Hotel Brownwood a large quantity of fine china is required. The china for the new hotel was furnished by the T. M. James & Sons China Company of Kansas City. To them went the task of outfitting properly the needs of the

outlitting properly the needs of the coffee shop.

In securing the large quantity of china which would be needed for the feeding of more than 500 people at one time, as the new hotel is equipped to do, the selection must be carefully made.

In making the order for the new hotel there were many kinds of

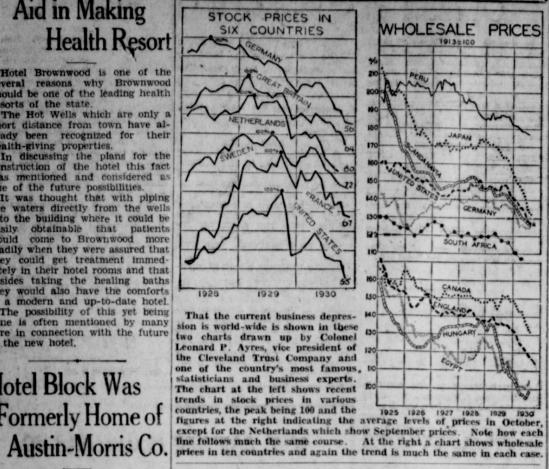

In making the order for the new hotel there were many kinds of dishes which were purchased, even though it was known at that time that there would be only rare occasions such as formal banquets and entertainments of this nature when these designs would be needed.

Placing the orders much was left to the direction of the China conceause of their position as distributors of imported chinaware, were in best position to choose the kinds best suited.

In the purchase of the imported china there were several things to be considered, first a design which would blend with the finish of the coffee shop, the banquet room and the roof garden. In designing the furnishings and interior of these comes there was carried out to a great extent the now fashionable modernistic designs and with this n view it was necessary to choose a china which would blend with hese.

A Substantial Evidence of Faith in Brownwood

The conception, completion and opening for business of a new institution today is more significant than usual. It is evidence that what depression has been is temporary, and that tomorrow will find us going forward toward greater achievements.

The Hotel Brownwood . . . Brownwood's newest institution . . . is completed and ready for business. We join Brownwood in welcoming this fine new hotel and its management to Brownwood. We appreciate the evidence of faith which the builders of this hotel thus express in this section of Texas. For seventeen years we have served Brownwood with electric service. We have worked with the citizenship of this city for its balanced development, and we know that faith in its future is not misplaced.

We bespeak continued success for any servicable institution locating in Brownwood.

When the contractors got the hotel job here they immediately said that only brick from the local plant would be used because they already knew its quality and value

as a building material.

Special Blend Face Brick face brick of a shade of dark red. In all there are six shades of brick in the building, three shades of red, two shades of copper and one shade of green. Also all clay work re-quirements in the building, such as walls of every room and hall and every partition in the whole build-ing are made of partition tile. All ing material for buildings in several towns in Texas and in other states.

In figuring the brick and tile in the building it was found that 400,-000 bricks and 75,000 pieces of construction tile went into the con-struction of the hotel. A piece of tile is equal on an average to six bricks and this makes the equiva-lent of 850,000 bricks used in Hotel Brownwood or in other words, 77 carloads of brick and tile.

have congratulated Texas Brick Company very highly on the high type of material they furnished for

Texas Brick Company congratulates the contractors and architects on the fine building they have constructed and the high class of materials used and the grade of construction work and congratulate owners and managers on what they have done to give Brownwood one of the finest hotels in the South, says W. H. Gifford, Texas Brick Company manager, Hotel edition

Cherry Trees Like Frost

IRONDEQUOIT, N. Y., Nov. 20-(UP)—Autumn weather, with its frosty mornings, means nothing to two cherry trees owned by Mrs. Frank Marsden. The trees, one a sour cherry and the other a sweet, each bore a second crop after large crops were picked in July.

med Jacobs opened the first cof- detailing at length the ones in which dining room." the vogue for coffee houses spread It was not until the early probably in importance the 1832, he quotes a traveler: inns and taverns of the English

the 'Vulgas Erittanicus,' published in they are open, there is a rush, like 1810," says Ludy, "and this shows a that at the booth in a contested electory serving and the state of the same and when they are open, there is a rush, like that at the booth in a contested elecboy serving customers who are tion. Every man, woman and child grouped around long tables, pouring rush to any seat which they may the bevarage from a small coffee pot happen to find and in a very short into a dish." This latter article was time the food upon the tables disapparently a little larger than a appears, consumed by the hungry coffee cup of today, but without a mob. If you have a servant of your handle and probably would be best described as a small bowl." Ludy own, he must bribe the cook. If you have no servant, you must bribe one of the quotes as follows from "M. Mission's Memoirs and Observations of His Travels Over England," published in translation in England in Wants of what is to be gotten in the place of what is to be gotten. Then he place of what is to be gotten in the place of what is to be gotte

Are Meeting Places

"These coffee houses, which are very numerous in London are ex-tremely convenient. You have all manner of news there; you have a good fire, which you may sit by as long as you please; you meet your friends for the transaction of busi-ness and all for a plenty, if you don't care to spend more.

Sounds like the coffee shop of to doesn't it? With the exception of the "good fire, where you toast your toes." The Settles has a ventilation system which cools the cof-fee shop, rather than the fire which warmed it in England. Big Spring has long had the habit of transacting business and exchanging gossip

An interest fact, which Ludy cite as "well known" is, according to that writer, the evolution of the modern theater from the English Inn of the Elizabethan times. When religiou uses were suppressed in 1529, by act of parliament, travelers were de-prived of a resting place and inns multiplied. But the religious houses long had been giving litugical per-formances, to the amusement of the guests and the new inns took up the custom. As Ludy says, "many of the churches and abbeys formerly had, on certain anniversaries, been accustomed to exhibit morality plays and as these were held in abeyance, a desire for popular theatrical exhibitions was formed."

Style is Changed

When Elizabeth became queen and the new style of inns came in, plays ten and in these the galleries, which were a feature of the inn yards, pretented a kind of amphitheatre which naturally lent itself to the accomnodation of an audience.

Just as the original inns of carwanseries spring from the need of cavelers for shelter, so with the im-provement in means of travel the size and convenience of inns proved with more patronage. With the advent of the stage coach in England inns were established at the various oing places and arranged espe change of horses and so on. Ludy

With the advent of the stage coach to France, the modern word "hotel" began to be applied as English inns. As Ludy says, "With the coming of the stage coach, which on the continent was the diligence, or rather differently constructed vehicle, the frequency of tours throughout France and Italy, with occasional adventures into Germany or Switzerland, caused the creation of a new expression and a new recreation for wealthy Englishmen of the eight-

eenth centur; Grand Tour

"This was the grand tour. The chief pivotal points in this travel were London and Paris. The stage coach improved the roadside inn in England and to some extent the desire to do business with the traveled Englishman le dto an improvement in the inns and hotels of France and Italy during the latter half of the eighteenth century. It was in this period that the French 'hotel' began to be applied to the elaborated inns, born in France and England, although it was not until the days of the French republic that the word

was properly naturalized in France.

'The finest inn in Europe," Ludy quoted Arthur Young as writing in 1787, was the Hotel Henri IV at Nantes. Listen, "It cost 400,000 liv. (17,500 pounds, or about \$87,000) furnished and as let at 14,000 liv. per annum, with no rent for the first year. It contains 60 beds for masters and 25 stalls for horses. Some of the apartments of two rooms, very neat, are six livers a day; one good, 3 liv. but for merchants 5 liv. per dieum for dinner, supper, wine and cham-ber, and 25 f. for his horse. It is without comparison the first inn I have seen in France and very

cheap."

As to the first inn in America,
Ludy quotes Colonel William Byrd
of Westover as saying of the men
who founded Jamestown, Virginia,
"they built a church that cost no
more than 50 pounds and a tavern
that cost 500 pounds."

"Unfortunately," says Ludy, "we
have no details about this first inn
in America and can only suggest the

in America and can only suggest the date of its construction, which must have been between the years of 1607, when the city was founded and 1616, when the settlement was at its large sum spent upon its building according to Colonel Byrd, the Jamestown tavern was probably not any too good. Even a century and any too good. any too good. Even a century and a baif later, the inns, taverens and ordinaries in Virginia were not regarded as much more than shelters for travelers. Henry Cabot Lodge, declares: "The taverns were probably the most uncomfortable habitations in the provinces, although he admits that in the latter half of the eighteenth century 'a good inn could be found' here and there in towns."

"In 1650," says Ludy, "a man colonial and early republic hotels, manners. This is the motto of the

400 CARLOADS MATERIALS USED IN BUILDING

A LOT ENTERS INTO BUILDING 12 STORY HOTEL BESIDES THE FAITH, VISION AND SUCH LIKE

Many things go into the build-ing of a hotel—from the first pro-posal for a hotel to the successful

ompletion and operation of the usiness after the building has been

ambitions of the men, the faith

constructed. Stories are written of

that people have in the city in

which the hotel was built, the men who made the hotel possible, the men who did the construction and

the men who have charge of its op-reations, but not much is said of

the actual amount of material it takes to make a big building, like the twelve story Hotel Brownwood.

There are some people who think in terms of what went into the

building alone—the actual number of carloads and pounds of cement, brick, sand, steel, etc., used in the

Would Make 5 Mile Main It is surprising when these ma-terials are figured, the amount of

various materials that are required. How many people would think that there are more than 400 carloads of

material in Hotel Brownwood. That is the conservative estimate of the number of carloads of material actually used. The material used in the building if on railroad cars would make a train five miles long—figuring this with 70 feet as the

average car.

Largest item of building material, if counted by carload lofs, was the rock which went into foundations, etc., which was 126 carloads or 2800

Next largest number of carloads was the sand used in the building, 96 carloads. There are about 93,000 pounds of sand to the carload and this would make 9,120,000 pounds of sand in the structure.

sand in the structure.

Brick and tile are next in number of carloads, 77 carloads. There

are more than 36 carloads of brick and more than 40 carloads of tile in the building, or in other words, 400,000 bricks and 75,000 pieces of tile of all sizes. One tile is equal

to six bricks, so there is the equivi-lant of 850,000 bricks in the build-

in. Eleven thousand bricks make a

There were 43 carloads of cement used in the construction of the building. There were 26,000 sacks of cement, 600 sacks per carload, which were actually mixed into morter and

put into the construction of the hotel building.

Using this in other words, 23 car-loads or 400 tons, 800,000 pounds. Thirty-five thousand pounds of this kind of steel makes a carload.

Six Cars Cast Stone Fifteen carloads of plaster went into the building. Fifteen carloads of plaster are equal to more than

Cast stone, which was used in the

ly large item of material. Six car-loads of this cast stone were used. Four carloads of millwork or the interior trimmings such as base-

of the building also was a fair-

More than 23 carloads of reinforcing construction steel was put into the building by the workmen.

doords, mouldings, window and be bought for the purposes to which it was put. The building could not have been constructed without every door frames, etc., were used.

77 Carloads Brick and

126 Carloads Rock.

was used to the extent of 2 carloads item of the material and every item and is the famous Texas pink granis as important as the other. When ite. All these carloads of material does not seem so important, but when added together makes even more than 400 carloads, Every load of the material is of the highest quality and best grade that could all the trial, hopes and aspirations of the planners, the builders, the of the planners, the builders, the owners and the managers. As a

whole the material makes the most modern, convenient, hospitable hostelry in this entire section of Texas-Hotel Brownwood. Texas Materials

Great amounts of the materials were furnished by Brownwood manufacturers or dealers and every item of it by Texas companies. The rock is Brown county product, crushed in Brownwood and Turnished by Hall Brothers Rock Crusher. Building sand was furnished by Texas Sand and Gravel Company of Waco. The brick and tile which went into the building were made here in Brownwood and furnished by the Texas Brick Company. The cement used is the Trinity Portland product furnished by the Cameron Lumber Company. Reinforcement steel came from the Austin Brothers of Dallas. Plaster used in the Pront," has just completed anillding was furnished through the other novel, entitled Higginbothem Lumber Company here. Cast stone came from the Pyramid Stone Company of Hous-ton. Millwork was furnished by Ingram Company of Fort Worth and the granite came from C. F. Roehl of Fort Worth.

These building figures were fur-nished by Walter Brown, construc-

jected to anti-Chinese campaigns was followed by a statement from President Ortiz Rubio that the President Ortiz Rubio that the "federal government would per-mit no campaign against foreign-
