**Surprise Birthday Observance Greet V. M. Ramsey, 82**

Eighty-second birthday of V. M. Ramsey on May 23 brought a surprise party for him in the community center building at Marysville where more than 75 relatives, friends and neighbors gathered for the occasion Saturday evening.

Guests brought a shower of gifts for the honoree and enjoyed visiting, table games, birthday cake and punch. Hostesses were Mr. Ramsey's daughters, Mrs. Sam Sparkman of Muenster and Mrs. Willis Robison of Gainesville and his daughters-in-law, Mrs. Melton Ramsey of Muenster and Mrs. Ray Ramsey of Dallas. Others bringing decorated cakes were three nieces, Mrs. Ernest Rafe and Grady McElreath.

Mr. Ramsey is a native of Marysville and resided there until the Camp Howze project absorbed his farm, then moved to the Valley Creek community. In recent years he lives with his daughter, Mrs. Sparkman, north of Muenster. His wife, the former Jessie Pearl Reeves, died in January 1947 and he "batched" a few years before joining his daughter and family.

He has five children, ten grandchildren and five great-grandchildren. Having most of them with him, along with relatives and friends, made his 82nd birthday one of the best ever.

Among those present from out of town were the Ray Ramseys of Dallas, the Willis Robisons of Gainesville, Cindy Cain of Myra, the Rufus McElreaths and family of Sivelles Bend, Mr. and Mrs. Bream Gaston and sons of Saint Jo, the James Moores and children of Decatur, Shiloh Pastor Rev. Jack Horner of Denison, the Sid Ramseys and daughter of Grand Prairie and the Gordon Ramseys of Gainesville. One daughter was missing, Mrs. J. H. Coffman of Fort Worth, who was prevented from attending on account of illness.

**Franciscan Order Has Reception and Profession Service**

Reception and profession ceremonies for the Third Order of St. Francis, Sacred Heart fraternity, was an inspiring candle-light service Friday night in church with Father Christopher directing the ritual, assisted by J. W. Hess, prefect, and Mrs. Leo Henscheid, mistress of novices.

Received as tertiaries were Mrs. Catherine Gehrig and Mrs. Felix Yosten. The former took Marie as her fraternity name and the latter chose Anne.

Making their profession were Mr. and Mrs. Al Hess and Ben Luke.

After the ceremony Father Christopher gave an address in which he explained the spiritual advantages of the Franciscan Third Order.

In connection with the ceremonies Friday the local tertiaries joined other Franciscans the world over in renewing the Third Order profession. This is the 750th anniversary of the first religious profession of Franciscan Friars minor and in Rome the Holy Father will preside at special rites. The papal blessing was given here.

In the group's May meeting earlier in the week an announcement concerned the indulgence blessing for tertiaries. In March the Holy Father granted use of the short form to be given after every mass on the order's communion Sunday. Here at Sacred Heart, the pastors will leave after mass and then return immediately to give the blessing.

In other business at the meeting a letter was read from Mrs. D. R. Martin and Kathy. In it they thanked members for a spiritual bouquet given as a parting remembrance when they left for France.

The sick committee reported cards sent to the following members: Mrs. Frank Seyler, Mrs. Fred Hoedebeck, Mrs. John Tempel and Miss Mary Becker.

Punch and cake were served. The bride is the former Wanda Whitman of Andrews. Since their wedding the couple live at Garland and both are employed in Dallas. Dave is with a trucking company and Wanda is a bank employee.

The party also gave relatives an opportunity to visit with Don Flusche who returned to Muenster the evening before after being separated from the Navy in California.

## PRICES AND OUR WELFARE

A group of tobacco growers recently went to Washington and appeared before the House Agriculture Committee. Most members of the Committee have been constant advocates of high rigid government price supports for various agriculture products. But the tobacco growers requested a lowering of price supports on their product. Why? Because the high price supports are causing tobacco growers to lose their foreign markets. In other words, American tobacco is being priced out of the market. Other American farm products with prices kept artificially high through government support programs likewise are losing markets.

Ray Vicker, an American journalist, reports on a conversation he had with a Rhodesian

(Africa) government official. "In a free market," the Rhodesian official said, "we might have had trouble competing against your highly mechanized American farmers, and many tobacco plantations would never have been started." But with the high price supports pushing up prices of American tobacco and the government at the same time restricting tobacco acreage, the Rhodesian farmers are growing greater and greater amounts, and taking away our markets.

### Other Products Too

World-wide cotton markets also have been lost to American producers because of high price supports. American wheat is in the same situation, although the American taxpayers generally, and not the wheat farmers, have so far been left "holding the bag." Wheat and cotton farmers are producing not for the market but for the government — to the tune of billions of tax dollars each year. It's costing a million dollars a day in taxes just to store the surplus of agricultural products which the American and foreign consumers do not need or won't buy at government-fixed prices.

The agricultural situation is only one of several danger spots in the American economy. Some of our industrial products which have competed successfully in the world market for a century now are being priced out of the market. The situation is serious — to the industries and their millions of workers whose jobs are jeopardized; and in the long run, to all American citizens.

### American Plants Hard Hit

At any farm supply store in America you are likely today to find bundles of barbed wire from German factories far out-selling American-made wire, even though the German product must be shipped across the Atlantic and carried by train from East Coast ports. The American jobber and retailer get German barbed wire at a price considerably under the cost of the same quality wire produced in American factories, and can sell it for less. American barbed wire is being priced out of the world market — even out of its domestic market. More than 50% of all barbed wire now sold in

Who's Oppressed Now?

America is imported.

The major cause of this is that wages in American steel mills and fabricating plants have been pushed up each year — without sufficient regard to productivity and competition. And the German workers, with excellent machine tools, have improved their per-worker productivity far beyond the margin of wage raises they have been getting from time to time. This puts their companies and their nation in an excellent competitive position. Japan, too, is producing several products that are taking markets away from American industries.

### Of Concern to Everybody

A midwestern company manufacturing nails pays its workers \$2.90 an hour and sells its product at \$9.80 per 100 pounds. Similar nails from a German plant, with wage costs of 90 cents an hour, can be purchased in America for about 15% less. America now imports about 50 times more nails than it exports. The U. S. NEWS AND WORLD REPORT notes that a long list of other American items are being priced out of the market by wage increases out of line with productivity and the reality of competition. These include bicycles, sewing machines, steel

flatware, typewriters, fishing tackle, clocks, watches, clothespins, woolen gloves and fabrics cotton cloth, cameras, plywood, automobiles, tires, radios, turbine generators, and many other items.

Not only the welfare of American industry — the ownership-worker team — but of the whole American population is endangered. Our American plants making barbed wire naturally are having to cut production, closing down jobs. Plants making all these other products likewise are hard hit. Our nation's great production of wealth through manufacturing is jeopardized, and that's of concern to everybody. This situation should be understood and recognized by labor union leaders. Wage raise demands must now be measured against the competitive situation in the world market. The welfare of all of us, particularly the wage earners, is at stake.

## BEST BRAKES

In direct competitive tests of repeated stops from highway speeds, conducted by NASCAR\*, Chevy out-stopped both the other leading low-priced cars—and why not? Chevy brakes are far larger, built with bonded linings for up to 66% longer life.

\*National Association for Stock Car Advancement and Research

## BEST STYLE

POPULAR SCIENCE magazine sums it up: "The fact is, in its price class the Chevy establishes a new high in daring styling..." It's the only car of the leading low-priced three that's unmistakably '59 in every modern line.

## BEST TRADE-IN

Check the figures in any official N.A.D.A.† Guide Book. You'll find that Chevy used car prices last year averaged up to \$128 higher than comparable models of the "other two."

†National Automobile Dealers Association

## BEST ENGINE

Every motor magazine has given Chevy's standard and Corvette V8's unstinted praise. As SPORTS CARS ILLUSTRATED puts it: "Indeed, this device is surely the most wonderfully responsive engine available today at any price."

## BEST ECONOMY

No doubt about this: two Chevrolet Sixes won their class in the famous Mobilgas Economy Run, got the best mileage of any full-size car.

Official dimensions reported to A.M.A.‡ make this clear. For example, Chevy front seat hip room is up to 5.7 inches wider than competitive cars.

‡Automobile Manufacturers Association

## BEST ROOM

## PLUS THESE TREMENDOUS TRIFLES

Who'd want to do without Chevrolet's extra luxuries? Like Safety Plate Glass in every window, the protection of full wraparound bumpers, crank-operated ventpanes, the convenience of single-key locking, a real overhead curved windshield, oil-hushed hydraulic valve lifters in every standard engine for quieter running, a bigger luggage compartment with side wall lining... and the convenience of automatic choke in every model!

## BEST RIDE

You'll be able to tell this yourself, instantly. But MOTOR TREND magazine expresses it this way: "... the smoothest, most quiet, softest riding car in its price class."

HELPING MAINTAIN A HEALTHY AGRICULTURAL ECONOMY

Time was when the old hand pump provided the only water on the farm. But, today, thanks to electricity almost every farm has a good water supply with modern electrically powered pumps. TP&L's industrial and agricultural development programs give assistance to farmers and livestock raisers in developing new and better ways of farming and in establishing new industry in this area to expand markets for farm products. As a business-managed, tax-paying public utility, this Company pledges continued support to the area it serves... actively co-operating with both private and public agencies toward developing end uses for agricultural products, as well as improving farming methods.

This Company has continually expanded its service to rural as well as urban areas. An example of free enterprise at work, TP&L's expansion has all been with private funds. In contrast, more than 5 billion dollars of federal money has already been spent on public power projects. It is estimated that almost 4 billion dollars more will be required to complete federal power projects now under construction or authorized. If all present proposals are carried out, the total additional federal funds required will approximate 10 billion dollars. It is alarming that such a large amount of the nation's power needs are being supplied by agencies largely exempt from taxes and financed or subsidized by your tax dollars.

**Lindsay News**

Mark Hermes is one of 49 seniors who received high school diplomas in graduation exercises at Subiaco Academy this week Wednesday.

Mr. and Mrs. Lawrence Schmitz and daughter Sharon of Dallas spent Wednesday with his father, Theo Schmitz, and took their children, Mike and Sheila back home with them after a vacation in the country. Their other two children, Debbie and Larry missed the trip to Lindsay because they were still in school.

Marlene Bezner of St. Joseph's Nursing School in Fort Worth spent the weekend with her family, the William Bezners, and attended graduation exercises Sunday to see her sister Rosemary get her diploma.

Vacation time for Mr. and Mrs. Robert Hefner of Alhambra, Calif., was spent with her father, Al Kuntz at Valley View and included visits in Lindsay with relatives and friends. At the same time Mrs. Wayne Plumblee and son Mike and Mrs. J. H. Langston and daughter Linda of Tulsa, Okla., visited in the Kuntz home with the Californians.

Spending the weekend here to be at the bedside of their mother, Mrs. John Bezner who had major surgery at Gainesville Sanitarium Saturday, were the Herbert Bezners of Garland and the Ralph Bezners of Fort Worth.

**Father Alcuin Has  
Feastday Surprise**

Father Alcuin Kubis was the honoree Friday morning at a surprise feastday observance... a belated courtesy because he was out of town on the actual date. The event was given by the altar boys of St. Peter's Parish who attended with their pastor. There are 21 acolytes.

A short talk by Father Alcuin and accordion selections by Ronnie and Arnie Zimmerer were on the breakfast program.

The meal was prepared and served in the school cafeteria by four members of St. Anne's Society, Mmes Ben and Tony Hermes, Norbert Zimmerer and Adolph Fuhrmann.

are feeling the pinch again. A few years ago the State of Texas was very proud of the increased salary it gave them. Today that pay scale is inadequate. Teachers are crying for a raise. They and government workers and practically all other salaried people are constantly in a strain because inflation keeps ahead of them. In a worse predicament are millions of retired people, with and without social security, who thought they had provided for old age but find their savings tragically cut down by the declining value of their money. Regardless of any boasts of progress, we have to admit that there is something basically wrong with any system that penalizes thrift.
