## New Savings Association Locates in Park Plaza

BY BOBBY TEMPLETON **Brand News Editor** 

A branch office of the Security Federal Savings and Loan Association. headquartered in Pampa, is being located in Hereford adding both new jobs and fresh investment money to the local

In a joint announcement Thursday by the Deaf Smith Chamber of Commerce and Security Federal, Aubrey Steele, Security Federal president, said that the branch office will be located 1017 Park Ave. in the Park Plaza Shopping Center, owned by the JMZ Corporation. The office will contain about 2,000 square feet and is expected to be built within 60 to 90 days. It will include a drive-in window with provisions for another.

However, loan applications are presently being taken by Jerry Paine at the Deaf Smith County Abstract Office until the new facility is completed. The

new building is to be constructed by Emory Brownlow, local contractor, at a cost of about \$35,000 according to a city building permit.

SECURITY FEDERAL is a savings institution chartered by the federal government. It has a central office in Pampa and two branch offices in Amarillo. As a federal savings and loan association, it is owned by its members, the depositors, and therefore no excessive profit is needed for stockholders. Members do not derive dividents.

Steele introduced the new manager of the local agency as Dwight Turner, 31, who grew up about 40 miles from here in Texico. He and his wife Carol and son Kevin, 7, will be moving shortly before the opening of the new offices.

He has been with Security Federal since 1968 and previously served with First Federal of Amarillo for three and a half years. He received a bachelor of business administration degree from Eastern New Mexico State University in Portales in 1967.

When asked why Hereford was chosen, Steele said, "Hereford is the most stable and best of Panhandle towns and we thought we could offer some services that are not available here now,"

THOSE SERVICES concentrate principally on home loans for both purchasing a new one or repairing and remodeling one already owned. "We have an agressive attitude about home loans and we have the funds in reserve most of the time to extend loans," he

To distribute some of these funds the new savings and loan association will feature pass book accounts beginning at 51/4 per cent interest all the way up to six year certificates of deposit at 7½ per cent interest. The four year CD at 7½ per cent interest is the most popular, Steele

Turner mentioned that the combined reserve of the association is about \$10 million not counting insurance on deposits. The total amount of loans now held by Security Federal is about \$106 million and savings are about \$115

The Hereford office will be a part of the association's computer system in Amarillo through a direct hookup to facilitate immediate processing of new accounts and interest earnings. Interest earned if from day of deposit to day of withdraw.

STEELE EXPLAINED that all savings plans permitted will be offered including guaranteed loan services.

"Homes are as cheap now as they will ever be (in reference to interest rates) and we hope to increase local building activity," Steele noted. "Money is tight and I don't foresee any drops in interest

The association was started in 1928 as Western Building and Loan Association under a home loan charter. The conversion was made in 1935 to a federal charter under the name of First Federal Savings and Loan. But in 1937, the Amarillo offices were established and the name was changed to Security Federal because a First Federal Savings already existed in Amarillo. Two similar

## C of C Plans Girls Rodeo, Hall of Fame

Reports on the upcoming All Girls Rodeo and Cowgirl Hall of Fame topped the agenda items considered by the Deaf Smith Chamber of Commerce board of directors Thursday morning in the CofC

Committee chairmen reported on other items including a possible renovation of the downtown shopping area, standard business hours for area establishments, success of a recent C of C membership drive, creation of an industrial development foundation, promotions of area tourism, and plans for

an all sports weekend next year. Concerning the All Girls Rodeo, Butch White, chairman of the special Rodeo Committee, said that the county rodeo arena is being readied but that the chutes may not be of the required length for official competition. The length is supposed to be about eight feet and the cost could be as high as \$1,000 for

renovation. White said. The rodeo is May

IT IS NOT KNOWN yet whether or not the chutes will definitely have to be converted. But Bill Albright, executive vice president of the C of C, said, "If we're going to put this on and to it in first class style, I think the chutes ought to

meet specifications."

The board decided to consult with an expert livestock dealer before approving the conversion.

In conjunction with the rodeo, a

Western Day will be held May 16 and a parade has been planned for May 17. The

Roy Faubion, chairman of the hall of fame committee, excited the board with the announcement that Hereford was definitely sanctioned by the Girls Rodeo Association for the Cowgirl Hall of Fame.

This means that no other city can

establish a similar institution.

"I RECENTLY visited the Cowboy Hall of Fame in Oklahoma City to see how they set up their hall of fame. They guaranteed me that once we had sanct and of the GRA, we are the only ones no can set up a Cowgirl Hall of Fam. Faubion explained. The hall of fame will be open by the first day of the rodeo on May 16 in the southeast corner

of the county library.

One of the requirements for the institution's charter is a drawing of the proposed permanent hall facility, which Faubion said would be done. "The County Commissioners Court has given us use of the library as long as we need it," Faubion said. "It is definitely big

Also for the charter, a permanent board of directors was selected including Margaret Clemons (GRA); Terry Caviness, C of C director; Sam Morgan, county judge; Jim Sears, Hereford mayor; John Birdsong, country artist; Lynn Anderson, country female vocalist; Dale Evans, actress; Faubion, Albright

and White. Jerry Payne, chairman of the sports committee, said plans are in the air for a comprehensive sports weekend including a track meet, tennis matches, and golf and baseball tournaments. Presently, these activities are sponsored by the C of C throughout the year and next year they are tentatively scheduled to all be held on

March 18-20, 1976. Bill Johnson, membership chairman, said that the team membership drive held during the past week has garnered at least 25 new members and possibly will

attract as many as 50. The goal is for 100

new members by the end of the year. Under the direction of Attorney Mac Tubb, teams were established under chairmen who competed against each other for the largest number of new members. The winner was recognized at a dinner Friday night at the Hereford Country Club.

Bud Eades, C of C president said the chamber should use the prospective member cards and continue where the teams left off especially in signing up farmers and ranchers.

BUSINESS COMMITTEE chairman Clete Corlis reported that the Most Courteous Employee Campaign was really taking hold with over 1,500 ballots distributed. It is for all Hereford employees with the winners taking home prize money of \$100 for first place, \$50 for second place and \$25 for third place. It is co-sponsored by KPAN and The Brand.

The committee also is suggesting to the bicentennial committee to sponsor a flag design contest in connection with the nation's 200th anniversary.

Long range plans call for a possible renovation of the downtown business district through possible tax levies on businesses. In connection with this the board approved the printing poster cards on which all government and school holidays as well as possible business hours will be included. The respective Hereford businesses will check their

[See CHAMBER, Page 2A]

### **Blood Donors** Sought

Urged to replace blood used recently by Les Combs, local residents are asked to donate blood Wednesday afternoon at Community Center. Donation facilities will be open 2-6 p.m. that day.

## Parade, Contest in May Rodeo

When the All Girl Rodeo comes to Hereford May 16,17 and 18, it will be a rip-roaring time not only for the local citizenry, but also for the visiting

The schedule of events, under the supervision of the Deaf Smith County Chamber of Commerce, include the rodeo, a parade, a western art exhibit, western day, poster contest, cow-chip throwing contest, dances and barbecue. To test the stamina of women, special womens milking and greased pig contests will be held.

THE PARADE, set for 2 to 4 p.m. May 17, is being organized by Harold Wheeler, the county adult probation officer. He is presently taking applications for floats. An application form appearing on page 6A of this issue of The Brand. They may be returned to the county courthouse in care of Wheeler. He hopes to match the massiveness of

the parade he organized for the 75th Anniversary Diamond Jubilee. A special feature of the parade is the

parade marshal, who is Jim Shoulders

of Henryetta, Okla. He was the world champion bull rider in 1951, and in each year from 1954 through 1959 as well as the holder of the All-around Cowboy title of the world for each of the years from 1956 through 1959. The All Girls Rodeo was located here

after visits from the Girls Rodeo Association of Denver through cooperation of the C of C.

In conjunction with the rodeo is the official opening of the Cowgirl Hall of Fame, initially located in the southeast corner of the county library basement. It will open the first day of the rodeo a modest collection of cowgirl memorabilia and paraphernalia, but plans call for a permanent facility destined only to match that of the Cowboy Hall of Fame in Oklahoma City.

**HEREFORD** has received official GRA sanctioning for it.

So far the event has been advertised throughout the state and other parts of the country through press releases and personal invitations especially to GRA members. The response has been good

with an expected entrance list of 250 or more making it the largest girls rodeo

Indicating the importance of the event are negotiations to possibly have the festivities televised nationwide or filmed by private interests for later distribution. The main rodeo, the center attraction,

will feature a host of talented cowgirls doing such things as bronc riding and calf roping. The contestants come from all walks of life-not just girls who live on the farm or ranch. Entries are being

[See RODEO, Page 2A]

## Texas Size Events Observe American Agriculture Day

Agriculture is the heartbeat of Hereford and Monday that beat will be heard loud and clear as the Hereford CowBelles gear up for American Agriculture Day.

It will be observed all over the nation. But here, the CowBelles have organized a beef giveaway, television promotional efforts on Amarillo stations, a poster contest and a special agriculture related displays by local businesses at the Sugarland Mall.

Joyce Kaul, CowBelles beef promotion chairman, has organized these events on quick notice and says the celebration is going to be a yearly event, only bigger and better. She has organized the day in cooperation with the Deaf Smith Chamber of Commerce.

THE THEME for Agriculture Day this year is "Almost Everything Starts on the Farm." The purpose of it is to help city dwellers to understand the importance of agriculture to the economy and the impact of domestically produced food and fiber on their way of life, Mrs. Wayne Owen of Lubbock, state president of the CowBelles, explained.

To highlight the recognition day the CowBelles, an Auxiliary of the American National Cattleman's Association, is holding its state convention with the Texas and Southwest Cattle Raisers Association in Austin, March 23-25.

The local unit is featuring a special

drawing for 30 lbs. of ground beef and 55 lbs. of rib eye steaks at 6 p.m. Monday at the Sugarland Mall. Anyone is eligible to sign up for the meat at the CowBelle Table which will be set up in the mall all

THE DRAWING will be conducted by Loyd W. Vaughn, whose family won the Farmers Home administration Farm Family of the Year Award for 1974. He will be interviewed by the Amarillo television stations.

Donating the meat are the Caviness Packing Company, the Farm Bureau and the Federal Credit Union. The Hereford Meat Market is providing the wrapping and packaging.

Also in the Mall, tables will be set up by local businesses to display specific facets of the agriculture field. Pamphlets, demonstrations and explanations will be offered by the companies on their interests in farming and ranching.

Those with displays include Holly Sugar, Whiteface Aviation, George Warner Seed, Southwestern Public Service, Alber Milling Company, Shur Gro. Liquid Feed, Taylor Evans Farm Store, Arrowhead Mills, Oswalt Division of Butler Manufacturing Co. (feedlot equipment), Oglesby Equipment Co.,

### Spring Smile

It's Spring and with it comes smiles even from this stop sign located at the corner of Ave. B. and Grand Ave. During a sleepy night this week the sign sprouted the smile apparently with the help of someone's shaving cream.

#### the bathroom at the time of the accident. Spain said a plastic container with a small A three-year-old girl was flown to the Shriner's Burn Hospital in Galveston Saturday morning after she and her older sister were burned Friday night in the Westway Community, west of Hereford. Norma Cantrera, daughter of Larry

Westway Girls Burned as

Flash Erupts in Bathroom

Cantrera, was rushed from Hereford's Deaf Smith County General Hospital to St. Anthony's Hospital in Amarillo late Friday night, but was flown to the burn clinic in Galveston in the early morning. hours. According to a hospital spokesman in Amarillo, the child had burns on 65 per cent of her body.

Norma's 10-year-old sister, Mary, was listed in good condition at Deaf Smith County Hospital Saturday morning.

Hereford Fire Marshal Jay Spain, who investigated the accident Saturday morning, said the two children were in amount of gasoline in it was in the room. Spain speculated that the container was either tipped over onto an open flame heater, or the heater ignited fumes from the gasoline. The resulting flash that spread through the tiny room burned the clothes from the bodies of the two

The parents rushed the children by private car to Deaf Smith County General Hospital and Norma was transferred to Amarillo by ambulance. Damage to the house was miminal, but Fire Chief Bill Craig said it appeared the bathroom had been engulfed in flames for at least a few

The accident apparently occurred between 9:15 and 9:30 p.m.

## Local Men Dabble In New Science: Solar Power

BY DAN WELTY Brand Staff Writer

If you've ever picked up a water hose in your yard on a hot day and then let the water run until it was cool enough for a drink, you've seen the power of solar

There are very few of them today, but remember when your mom used to hang her clothes on a line outside to dry. She was using solar energy.

With the current fuel shortage and the depletion of our present fuel sources ming a reality, America and the world are turning to alternate energy sources. Solar power is one of these

GID BROWND AND DON VASEK of Brownd Sheet Metal in Hereford are just two of many people across the nation and around the world that have turned at least part of their efforts to utilizing solar power as an alternate energy source.

Brownd was among 25 engineers, architects and heating-air conditioning businessmen who attended a conference on solar power in Boulder, Colo. last August. And one of his young employees, Don Vasek, is also interested in this field

Vasek is a graduate of a two-year vocational college in Oklahoma that deals

\*\*\*\*

with heating and air conditioning. Together, Vasek and Brownd spend their re time working on a solar energy

Scientists believe that more than 10 times the amount of energy needed to run a home falls on the roof of home in the form of sunlight. Solar energy equipment is available now to install in equipment is available now to instant in new homes or to convert to old homes, but there are still a few problems that need to be worked out.

"BUT THE THING of it is that use of solar power is so simple and basic. The government energy agencies until recently recognized only fossil fuels, hydro and nuclear power sources. Now they realize the need for alternate energy sources. And basically solar energy is simple We're limited only by our imagination on how to use it," Brownd said in an interview Thursday.

The easiest solar conversion is the warming of water by the sun. In the early 1900's solar water heating systems were in use in the United States. As fuels became more available, the solar systems were replaced by gas or electric hot water systems. But now the trend may change back to the solar units.

The hot water converted by solar energy may be used in the home as a source of heat, hot water for domestic use

and may be used in a variety of jobs in industrial and commercial applications. Fuel savings up to 22 per cent may be realized by using solar-warmed water.

Sunlight: Unlimited Energy Source ----

THE HEART of current solar energy systems is the solar absorber panel, most usually called a collector. These collectors have now been designed by many different companies and are built in a variety of ways. Basically they use sunlight to heat a fluid flowing through pipes which is then used to do one job or

Brownd and Vasek have built a collector panel using parts of refrigeration units. Coils with vanes are encased in an aluminum box covered on top with glass. The coils are painted black to absorb as much of the sunlight as possible. Fluid flows through the system and is heated by the sun.

Problems that have arisen include using the units day and night, sub-freezing climates, cloud covers. mbing codes and imagination. The imagination aspect has already been mentioned by Brownd. None of these limitations are serious.

Large changes in temperatures from day and night tend to increase system losses due to the re-radiation of the store heat through the collector at night. Careful insulation of the piping and collector usually takes care of the

Cloud covers render the unit inoperative so that at present, a backup system must be available. In high cloud covers, though, more panels may be required to obtain the same heating effect. As yet, no national plumbin codes have been applied to the solar systems, but units are being tested now.

SUB-FREEZING TEMPERATURES provide the most serious limitation in the systems. Designers have come up with various methods for substitution of water in the systems. Some units are distilled water and an antifreeze solution much like that in a car. Other systems use oil and some use air. Brownd and Vasek are investigating the possibility of using

To heat water with their system, Brownd and Vasek would use a storage tank in which there would be coil that the water flowed around. Sun-warmed Freon from the collector panel would travel in this coil, warming the water that flows

The two Hereford men have already built a basic heating system in their shop, using spare parts. The collector panel outside warms the Freon. A compressor pulls the Freon from the panel and through lines to a heating unit consisting of a blower and a heating coil. The warm Freon flows through the vaned coil and a blower pushes air through the coil, warming the air. Although crude, the basic design works well and the two are experimenting with methods to make it

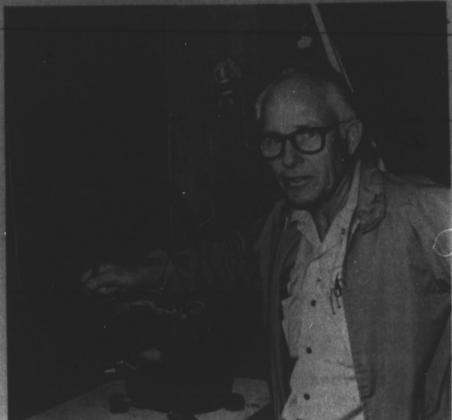

Units are on the market that accomplish the same end. There are over 25 companies currently marketing the collector panels for commercial, industrial and home use.

SEVERAL HOMES have been built utilizing up to 90 per cent of their energy needs from solar sources. Most to date have been experimental, but a Chicago compan, has recently began marketing solar energy homes in the \$30,000 to \$50,000 range.

Solar energy is considered more practical over alternate energy sources since it is simple, available now, does not pollute or create waste products and has an unlimited source of power.

Brownd believes that the use of solar energy will be universal in just a few

"Gosh, with the wind and sun we have in this part of the country, we ought Brownd.

Solar Scientist

Gid Brownd, a local heating and air conditioning contractor, checks the temperature on a line running from a compressor in a solar energy heating system. Brownd and one of his employees, Don Vasek, spend their spare time experimenting with solar

Police Beat

## Area Man Arrested For Theft of Car Stereo

A 20-year old Hereford man was released on \$2,000 bond Thursday after he was charged with the theft of a stereo valued at \$200

Charged with felony theft was Glen Dell Randell Jr. of 711 Miles. According to police detectives, Randell entered the PK Supply store on West Highway 60 Wednesday evening and asked to see if a stereo would fit in his pickup. He apparently took the stereo in it's packing hox out to his pickup and later returned, placing the box on the shelf where it had been. Store employees checked the box later and found it empty, Police said.

In other cases, Brian Haile of 427 N. 25 Mile Avenue reported two tires valued at about \$100 stolen from a closet. Time of the theft was between 4 p.m. and 10p.m. Wednesday. Haile reported 16 tapes and a tape box stolen the next day. This theft occurred while his car was parked at the residence Thursday. Value of the tapes was estimated at \$100.

Marcus Stroud Kemp, 19 of Box 466, was arrested by officers at 1:33 a.m. Thursday for driving under the influence of drugs. Officers said Kemp was apparently drinking after taking pain medicine for a toothache

An accident at 11:20 a.m. Wednesday involved Eulogio Valdez of 322 Avenue A and Leola Cummings Cook of Route 2. Both vehicles were eastbound on East 5th when they collided.

Barbara Lynn Last of 231 Beach was carried to Deaf Smith County General Hospital following an accident at Ranger

and Willow Lane at 3:29 p.m. Thursday. The Last vehicle was southbound on Ranger, A Vehicle driven by Delois Maxwell Farran of 544 Willow Lane was eastbound on Willow Lane, and the two collided at the intersection.

Ms. Last was later transferred to a private physician for treatment.

A two-car accident occurred in the 400 block of Avenue F at 9:30 p.m. Friday. Bennie Earl Sapp of 422 Avenue E. and Jumesindo Pina Hill of 131 Avenue B were drivers of the vehicle involved. Both vehicles were traveling north on Avenue F. The Hill vehicle was attempting a left turn when the two collided

An accident occurred in the 1300 block of West U.S. Highway 60 at 8:02 p.m. Friday. Karen Morrow Ruland of Star Route and Jesus Castillo of 206 Lake Street were the drivers of the vehicles involved. Both were traveling west on U.S. 60 when the Castillo vehicle was attempting a left turn into a business. when the two vehicles collided.

An accident at the intersection of McKinley and Fourth Street occurred at 5:40 p.m. Friday. Myrtle Lavender Morris of Box 2148 was travelling west on Fourth. Steven Neil Easley of 115 Avenue G was northbound on McKinley. The two vehicles collided at the intersection.

An accident at 3:44 p.m. Friday occurred in the 400 block of North Highway 385. Jose Luis Lozoya of 814 Texas and Jim Edward Stallings of 826 Brevard were both turning out of a business when they collided.

## **Appointments On County** Commissioners Agenda

The center of the solar energy system is the sola

collector. Although there are many different

designs, this is one Brownd and Vasek built from

spare air conditioner parts. Freon flowing

The Deaf Smith County Commissioners Court will consider a nine-item agenda when they meet at 10 a.m. Monday at the courthouse. It is the shortest agenda this year.

Solar Collector

Appointments top the list of considerations as three members will be appointed to the Deaf Smith General Hospital Board. Reappointment of the county Health Officer is expected. Dr. D.E. McBrayer is the present county health officer.

Terms expiring on the hospital board include those of Mrs. Harlan VanderZee, Dr. John McCrary, and Tommy

Charlie Gaither of Amarillo College will address the commissioners concern ing a school for those found guilty of driving while intoxicated (DWI). The DWI school was discussed earlier but no

It will be a network of schools in counties in this area so that those caught in other counties can attend the school in their home county. It was proposed earlier that the school would be part of sentences and funded through fines of defendants.

A committee will visit with the court to request use of the Bull Barn for a Mexican Fiesta on Sept. 12 and 13.

Other items on the agenda include a resolution supporting the Panhandle Regional Health Planning Region and correspondence from the Texas Department of Community Affairs.

The meeting is held in the Commissioners Courtroom on the second floor of the courthouse. No other governmental meetings are scheduled during the week.

### Membership Drive Winners Announced

District +AAAA guif tour here week of play. Coach Terry Coronado is five shots back at Priday as howling winds and blowing sand challenged even shot under 80 for the day. third place is Bruce Rice of the hardiest at Hereford's John Plainview, utilizing a score of Coronado with 252 after an 84-Plainview, utilizing a score of 76 for Chad Williams, shot the

lowest total of the day with a 318. Monterey, which had woo team totals the two previous weeks of the tour, slipped to second place today with a 206. Coronado's jayvee team was only 11 strokes out of first place with a 329, while the Coronado varsity carded a 332. Hereford and the Monte

junior varsity tied in fifth place with 330's, followed by Lubbock High at 348, the Plainview or varsity at 354, Hereford's ayvees at 372 and Lubbock High's jayvees at 376.

rd's 335 moved them up to sixth in the total district standings after falling into seventh spot last week. Mon-terey leads district after three strong showing Friday moved em from third to second place and put them within two shots of the leader at 942

Coronado's B team dropped from second to third with a 951. Monterey's junior varsity was fourth with 970, followed by Coronado at 984, Hereford at Q: How much water is actually needed for the production of a good cotton crop? 1,000, Lubbock at 1,009, Plainview B team at 1,062, Lubbock High jayvees at 1,000 and Hereford jayvees at 1,125. Plainview's Chad Williams the exception of a couple of times of the year, the most pre-valent answer would be "All we can get". More specifically, authorities now estimate the carded a 76 Friday to move into the lead for medalist honors in the district. His three week total

> HIGH SCHOOL SENIORS Don't wait until you're near graduation to apply for a choice position with the U.S. Air Force. You see, we schedule our jobs up to six months in advance, and many of the openings for the summer will be filled during the next few weeks. The earlier you apply, the bigger selection of jobs you will have. So, take advantage of your free time and see your local Air Force Recruiter. If you qualify, you can choose the job you really want, and be guaranteed it will be waiting for you when you ate. Act now or the

S/Sgt. Ron Carter 317 E. 3rd St. Amarillo, TX 79105 Call Collect 806-376-2147

Curtis Stoerner, Herd junio lead with a 234. He shot a 79 Friday. Stoerner had medalist honors on the ropes as he shot a 37 on the front nine Friday. A strong west wind made the longyardage holes on the back nine of Pitman that much further, though, and Stoerner turned in a 42 for that half. Coach Russell said Stoerner is shooting con-sistently and that if he can card a few low scores in the next three weeks, he will probably travel to the regional tour-nament with medalist honors.

Sophomores George Yocum is romising 12th on the district ist. He shot an 82 Friday. Billy Word carded an 85, Kelly Lea scored a 91. Junior varsity scores found Mark Fowler with a 91. Doug Walterscheid and Randall Herr with 93's, Tony Albracht at 96, Don Shaw with a District competition moves to

course this Friday. The tour will

finish off the season in Hereford

## Volleyball Teams Down Levelland

The Hereford Whiteface volleyball teams, varsity and junior varsity, won games from Levelland Thursday night and will be preparing for the district match against Plainview coming up Tuesday.

Coach Hellen Reed said both teams played exceptionally well against Plainview and that both teams were ready for the match to decide the district winner Tuesday evening. The junior varsity downed Levelland 15-5 and 15-3. The Herd varsity won 15-4 and 15-2.

The district match against Plainview will be played in Plainview with junior varsity action to get underway at 6:30 p.m. and the varsity to begin 20 minutes after the jayvee game

Tappin' It In

to score a 37 on the front nine of Pitman as the district golfers swung through town. Stoerner made a hard charge on the leaders on the-front nine, but fell to a 42 on the back nine. Coach Terry Russell feels Stoerner is a good possibility for district medalist.

THE DRAWING POWER OF GOD

Have you come under the influence of God's drawing power? Unless a man has been drawn by God Himself that man is in a sad condition. "No man can come to me, except the Father that sent me draw him." John

It is not the Holy Spirit direct and without the word. "It is written in the prophets 'And they shall all be taught of God,' Every one that hath heard from the Father, and hath learned, cometh unto me." John 6:45. It is done by the Spirit, but the Spirit does it through the word, New Testament. "And I, if I be lifted up from the earth, will draw all men unto myself," John 12:32. His being lifted up on the cross is God's drawing power. When the Spirit, through the New Testament, tells you the sad and unselfish story of Calvary, God's drawing power is being exerted on your soul. God's drawing power was exerted at Corinth (I Cor. 4:11), and that people became washed, sanctified ar justified. How was it exerted? Paul was sent there with the New Testment on his lips. What did he say? "For I determined not to know anything among you, save Jesus Christ, and Him crucified." I Cor. 2:2. The sacrifice Jesus made on the cross is

the drawing power of God.

It is not a big building. If some are attracted by an ornate meeting house rather than the cross, they are not drawn to God. Such people will quit when they move to a town where the church meets in a rented hall.

It is not a likeable preacher. 'T'd have been to service today if I had known you were going to preach." The one who said that has never

been drawn by God's power, but only the

preacher's power.

CENTRAL CHURCH

**Worship Service** 

SUNSET and PLAINS

of CHRIST

Bible Study 9:30-10:15

10:25 and 6:00 p.m.

It is not a social program. Wholesome parties, picnics and fellowship dinners are fine, and help to get sinners in a place to be drawn to God, but they are not the drawing power of God. A preacher emphasizing a social program more than "cross-preaching" may build up a big attendance, but his listeners will not have been drawn to God.

It is not kinfolks. If a boy is baptized because his mother wants him to do so, he is not drawn of God. If a husband is baptized "to get in the same church with his wife" he is in no wise drawn to God, but to his wife.

Since our aim, hope, desire and prayer is that all shall come to Christ and be saved let us see just what we need to do to accomp

Paul declares in Rom. 1:15 that the gospel of Christ is the power of God unto salvation to everyone that believeth Now to believe we must come to a knowledge of the Word and of course we must hear, therefore hearing is

the first step in the direction of salvation.

The power that brings this salvation is vividly portrayed in the fourth chapter of Hebrews where the writer says that the Word of God is living, active and sharper than any two-edged sword and that it is piercing, that it even divides the soul and spirit of man that is quick to discern the thoughts and intents of the heart. In John 17:17 He said that the Word of God is Truth. Then when we really know it, what more do we need? What more can we use? The New Testment contains the power.

A ding-a-ling orders Gas air conditioning mow.

A telephone call to Pioneer Natural
Gas brings an air conditioning specialist to
your home for a free survey and cost estimate at no
obligation to you. He'll answer all your questions, and
tell you what it will take to install GAS air conditioning
in your home. It's the first easy step toward having
your dependable GAS air conditioning installed before
the first bot wheth down are here. the first hot, windy days are here.

A GAS air conditioning system is ruggedly built to cool quietly and efficiently. There are fewer moving parts, and no compressor to break down or wear out. Heat from the steady blue flame circulates a refrigerant through the system to cool the air. It's this simple principle that gives GAS air conditioning its long life with no loss of cooling capacity and easy maintenance.

Install GAS air conditioning now. You'll avoid the rush, and be enjoying the quiet, cooling comfort of GAS air conditioning while everyone else is waiting. Give us a ring . . . a-ling.

## P&W Officials **Make Game** Law Proposals

the elimination of antlerless deer tags and a return to the antlerless deer permit system are being proposed by Texas Parks and Wildlife Department officials for the coming hunting

These and other proposals will be discussed during the week of March 24-28 at public meetings. Interested landowners and hunters should check with their local papers for times and places of the meetings in their area to be hosted by department officials. The meetings in their area to be hosted by department officials. The meeting in Deaf Smith County will be held at the county courthouse in Hereford Monday, March 24 at

The Panhandle proposal keeps the mule deer limit the same but changes the bag limit from one to two white-tailed Antlerless deer may be taken by permit only.

Department officials say the liberalization, which applies to either sex.

FUN TIME

A liberalized bag limit on all Panhandle counties, is whitetails in the Panhandle and warranted in view of the low

harvest rate in the area. The second proposal, which would go into effect on a statewide basis if adopted by the Parks and Wildlife Commission, would in effect eliminate either-sex deer seasons in some

37 counties. Instead, antierless deer will be taken by permits issued on an acreage basis. Biologists say they have more control over the deer harvest under the permit system which was replaced by the either-sex season during the past four years in some

Other proposals include: -Drop the requirement that aoudad sheep be checked at check stations in Armstrong, Briscoe, Donley, Floyd, Hall, Motley, Randall and Swisher Counties. Officials say information gathered at the stations is no longer needed.

Permit the taking of one deer, no more than one buck. turkey gobbler or one bearded hen during the special archery season in the Panhandle. The limit last year was one turkey of

## Mrs. Rains Attends Brother's Funeral

Beach attended the funeral of her brother, Benny F. Skinner, 35, Sunday at Seagoville.

The Rev. W. E. Hamblen, officiated at services in the Seagoville Church of Christ. Burial was at Canton.

Mr. Skinner, who was partially paralysed, died March 14 after an illness.

Born April 1, 1939 at Grand Saline, he married during October of 1959. His wife, Charlotte, survives him.

Christ, Mr. Skinner had lived in Oree Johnson of Crowell.

co-owner of Skinner- Davis Utility Contractors. He lived at Hereford briefly as a teenager but spent most of his youth at Grand Saline. He also resided at Plainview.

Survivors include the widow and two children, Donna and Brian, of the home; three sisters, Mrs. Rains of Hereford, Mrs. Imogene Weatherall of Grand Saline and Mrs. Adell Thompson of Plainview; two brothers, Dean Skinner of Grand Saline and Phil Skinner of A member of the Church of Dallas; and his mother, Mrs.

### Sawdust May Prove Beneficial To Cattle

South Dakota State University researchers have found that untreated Ponderosa pine sawdust may have beneficial effects for cattle.

Tests have shown that the coarse sawdust can be used as a roughage substitute at levels up to 15 percent with no substantial loss in animal perform-

And a side benefit of special interest is that the sawdust may reduce cattle liver abscesses commonly associated with high concentrate feeding. Research so far has indicated a significant reduction of liver

The scientists say sawdust used at this level in the ration should not be toxic to ruminant animals or contribute any undesirable factors to meat

## Smoking In County Less Than National Average

(Spi)—What changes, if any, have residents of Deaf Smith County made in their smoking

lung cancer deaths a year, some local people swore off com-pletely, some cut down on the number they smoked and some turned to cigars and pipes as a

County made in their smoking habits in recent years?

Have they cut down on cigarettes? Are they smoking more or less than people in other parts of the country?

For a time, following the surgeon General's report, issued about ten years ago, that smoking was a hazard to health and was responsible for 41,000 pieces, stake cut down on the number they smoked and some turned to cigars and pipes as a substitute.

More recently, however, despite the barrage of medical reports in subsequent years linking cigarettes with heart disease and other illnesses, they have been puffing away at a near-record rate.

## Cattle, Calf Value Down

AUSTIN-The value of Texas cattle and calves was more than cut in half between January 1975 and the same period a year earlier, Agriculture Commissioner John C. White announced recently.

He pointed to U.S. Department of Agriculture figures which showed that the total value of cattle in the state dropped by almost

Total value per head was

estimated at \$130 in January compared to \$285 for the first month of 1974.

At the same time, total number of cattle increased from 16,250,000 head in January 1974, to 16,600,000 in January 1975.

The number of cattle on feed, however, dropped 40 percent for the same period.

Nationally, the total value of cattle and calves on farms and ranches slid from almost \$50 billion to less than \$30

NOTICE OF INTENT TO ENGAGE IN WEATHER MODIFICATION ACTIVITIES

Notice is hereby given that Atmospherics Incorporated of 5652 East Dayton Avenue, Fresno, California, 93727, who holds License No. 2 of the State of Texas, intends to engage in a weather modification operation designed to increase rainfall and decrease halifall, for and on behalf of Better Weather Incorporated, Littlefield, Texas, and will conduct such a program by means of aerial application of artificial nuclei as follows:

The area over, or within which, equipment may be operated, shall include portions of the counties of Deaf Smith, Randall, Parmer, Castro, Swisher, Bailey, Lamb, Hale, Cochran, Hockley, and Lubbock.
 The target area, within which rainfall augmentation and hailfall suppression is intended to occur, can be

The boundary of the target area shall be a line beginning at a point of origin at Littlefield, Lamb County, Texas and running northwest along Highway 84 to its intersection with Road 37 near Amherst; thence due west on Road 37 to its intersection with Road 303; thence due north on Road 303 to Sudan; thence northwesterly on Highway 84 to its intersection with the western boundary of Lamb County; thence due north through Lazbuddie to Highway 86; thence easterly on Highway 86 to the western boundary of Castro County; thence due north along the western boundary of Castro County; thence due east along the southern boundary of Deaf Smith County; thence due east along the southern boundary of Deaf Smith County and Randall County to a point approximately four miles west of Happy in Swisher County; thence due south along Road 1424 through Edmonson to its intersection with Highway 87 near Hale Center; thence southerly along Highway 87 to Abernathy; thence westerly mang the southern boundary of Hale County to to its intersection with Road 37 near Amherst; thence st corner of Lamb County; thence four miles ng the eastern boundary of Hockley County; west to Road 168 south of Anton; the west to a point three miles east of Highway 385; thence north to a point on Highway 84; thence northwest along Highway 84 to the point of origin at

3. The equipment, materials and methods to be used in conducting an operation within this area of approximately 2,200 square miles, include a 5 cm radar system, cloud seeding aircraft, and the aerial application of silver iodide or other nuclei considered appropriate to the artificial nucleation of clouds or weather systems.

4. The person in charge of this program shall be Thomas J. Henderson, Atmospherics Incorporated, Fresno,

5. The program may be operational at various times throughout the period from 23 April 1975 through 30 October 1975.

6. Any person who feels they may be affected in some adverse way by this program may file a formal complaint to the Texas Water Development Board, P.O. Box 13087, Capitol Station, Austin, Texas, 78711.

dryers suitable for use in this area for drying corn and grain sorghum, the different methods of drying, advantages and disadvantages of each, and the do's and don'ts of grain drying.

This is primarily designed for producers of corn; however, grain sorghum also will be discussed. With the increased acreage of corn in the area and

the moisture levels which most farmers harvest corn, many farmers are considering the use of portable grain dryers or the installation of grain dryers on their own farms.

This meeting is designed to assist farmers and answer questions they may have concerning the feasibility of drying grain on their own farms.

Of course, there are other advantages concerning the use of grain dryers. The advantages of getting the crop out early without waiting for corn to dry in the fields may make it possible to follow corn with fallseeded wheat.

"We would like to encourage \$1 billion and poultry and all farmers of the Hereford area eggs decreased \$739 million. who are interested to attend this meeting in Friona," said Juston McBride, Deaf Smith County Agricultural extension agent.

### Club Schedules Old Fashioned Square Dance

Old fashioned square dancing will be the purpose of a party planned by Merry Mixers Square Dance Club Friday night at Community Center.

The dance, which will be open to the public, is scheduled April 18 at Community Center. This is in addition on the Merry Mixers calendar to the annual Spring Fling slated May 10 at Sugarland Mall.

Mr. and Mrs. Clyde Whitaker were welcomed back into the club after returning from Utah. Guests included three couples from the Dimmitt Promenaders, the Tommy Fowlers, the Billy Harmans and the Gary

Twenty-three Merry Mixers were present at the dance Friday. Stwart Rowan called.

## \$495 Million **Drop Places** Texas Fourth

AUSTIN-Texas fell from third to fourth in cash receipts for 1974, dipping \$495 million to trail California, Iowa and Illinois.

According to Agriculture Commissioner John C. White, a \$622.8 million drop for livestock and livestock products was responsible for the decrease. These products brought in \$3,051.8 million. Crop totals rose \$126.3

Meat animals showed the most severe loss nationwide with a difference of more than \$4 billion from 1973. Dairy receipts were up over

Food and feed grains, cotton, all oil-bearing crops, vegetables, fruit and tree nuts showed gains nationally.

U.S. producers received more than \$95 billion for crops and livestock, an increase of more than \$6 billion. Government payments added \$534 million, dropping from \$2.067 million.

Figures were released by the Texas Crop and Livestock Reporting Service. Production costs and the resulting balance will not be completed until late summer.

Spring Reminder Poiscn ivy is an obliging little plant. If you forget how to identify it, it reminds

### **Hanging Basket Adds Nature To Settings**

Hanging baskets continue to gain in popularity and to add a touch of nature to many surroundings, says a landscape horticulturist for the Texas Agricultural Extension Service. Any plants with drooping foliage such as ferns are

excellent for hanging baskets.

33 Medal of Honor Recipients Work for VA

A counseling psychologist in Des Moines, Iowa, and a veterans service officer in Portland, Ore., recently became winners of the Veterans Administration's first Sam Rose Awards for exemplary accomplishments in assisting veterans and their families.

The Veterans Administration a recognized world leader in research and development of prosthetics and sensory aids, share its findings and expertise with public and private medical organizations and practitioners.

ON SPECIAL ELECTIONS Senator John O. Pastore (D-RI) has proposed that a constitutional amendment requiring a special Presidential election when an appointed Vice President becomes President.

Numerous succulent plants also do well in hanging baskets and will tolerate heat and drought. Flowering plants such as periwinkles, portulaca and petunias make excellent additions to hanging baskets. Galvanized wire baskets with pressed or sphagnum moss iners make good containers. Use a good potting soil. Baskets exposed to drying winds need watering two to three times a

Agriculture Day"! It's a time to farmer. be aware of the great con-tribution made by our farm and ranch community and to and labor costs. Another point recognize the vital part these seldom understood or apfolks play in the well being of

Two hundred years ago, eighty five out of every hundred Americans lived on a farm. Today, only 5 per cent of our people farm the land. Yet, even now, as it was then, Agriculture is still the strength of this country.

Over the years, as America has become less rural and more urban, a loss of understanding has developed between the rural producer and the urban consumer. Nonfarmers have felt that the farmer has been "getting rich" from the prices paid over the count by the consumer. The farmer, meanwhile, sometimes feels like the consumer is deliberately trying to break

And of course there's justification for feelings on both sides. Perhaps American Agriculture Day is a good time to get together and to try to better understand each other.

From the consumers view point, the only major variable in a time of inflation is in the other 5 percent who provide us quantity, type and quality of with the highest standard of food that he uses.

Naturally he's more sensitive to prices he pays on regular cent of our spendable income? trips to the super market, than on infrequent purchases of "Hard goods" such as automobiles, refrigerators or TV sets. Food cost variations are especially felt by consumers on limited or fixed incomes, primarily those who are retired. The consumer generally feels only one reaction to a price HEAVY DONATION increase in the grocery store-a feeling of helpless resentmentdirected toward that unknown guy who orginates the product—the farmer! To the consumer, a price increase of 1 cent on a quart of milk, represents a "rip Hotel in St. Johns", when it off" even though it amount to less than a 5 percent increase horse and wagon from the he figures the farmer is making another "Nickel on every dollar".-not realizing that increased costs, more often

Tomorrow is "American than not, never even reach the

into transportation, processing and labor costs. Another point preciated by the consumer is the tremendous increase in the cost of producing agricultural products, even to the point of forcing farmers out of business. When production costs exceed market prices-PRODUCTION STOPS. The farmer hangs up his "quitting business" sign.

Food items become scarce what happens to prices? Up-Up-Up-anytime a shortage exists-prices rise. Conversely when production is plentiful prices remain reasonably stable. So it's really in the best interest of all consumers to keep the farmer in the blackmaking a profit and producing in his traditionally, efficient

The consumer needs what the farmer produces, as each year the demand for food increases. The farmer needs a reliable market for his product—one that will at least pay for the cost of production—each, needs the

deals with the jurisdiction of county and district courts.

Judge Nelson said he was unable to testify before the House Judiciary Committee due to a lack of time, but that his desires and the desires of the West Texas Justice of the Peace Association.

of which he is president, were known. The House Joint Resolution Nelson and the WTJPA are concerned with deals with the jurisdiction of civil court. This is similar to small claims court in which judgements are sought against persons owing money. In the past, maximum limit on the claims for the civil court was \$200. Nelson and his peers feel the amount is old-fashioned and should be raised to \$500.

## The Voice of Business

U.S. Chamber of Commerce

the world famine spreads to the U.S., or the economy collapses.
Others are fasting, "so there will be more food for the world's free enterprise, capitalist food to the samply set aside a contribution equal to the value of the food he has foregone.)
We tend to lose sight of how phenomenally well America's free enterprise, capitalist food

Who's right? Neither, as far as I am concerned.

I don't see any harm in what the "squirrels" are doing, although I don't see much need for it either. If their food caches bring them peace of mind, the modest expense is probably worth it. There are those who would disdain the practice as 'hoarding." But on the other hand, it cound be defended as prudent obedience to the biblical injunction to privide for the lean years.

Many of the fasters appear to be pure of heart but soft of mind. The belief that what one American doesn't eat will automatically become available to feed the hungry elsewhere betrays a vast naivete about the economics of food production.

The American farmer produces what he thinks he can sell. If very many Americans reduced their food consumption sharply, farm production would eventually fall off correspon-dingly. Thus, the net result would be less food, not more.

CONSTRUCTIVE ALTRUISM

There is a way for the fasters—or anyone else—to get more American food to the hungry overseas: Donate money to one of the international relief agencies that distribute food to the hungry. The agency will buy from the farmer, the farmer will raise more in anticipation of an expanding market, and the world's food supply will grow repeated agricultural failures larger. (an individual who are simply the price they pay

free enterprise, capitalist food production system works.

conveniently overlook the related fact that with only six per cent of the world's population, we produced in 1972: 44 percent of all wheat for export, 76 percent of the corn, 85 percent of the soybeans, 28 percent of the rice, 36 percent of the cotton, and 62 percent of the sorghums raised for grain.

Of course, much of our exported food is sold. But then, we pay for the raw materials we use, too. No one else, anywhere, has demonstrated an ability to produce more food at less cost surely, that is an excellent reason for laying claim to scarce resources.

> THE FAILURE OF SOCIALISM

It's instructive to examine the other side of the coin, too. Professor Irving Kristol points out that there would be no world food shortage if just three countries could feed themselves: China, India and Russia. It is no coincidence that all three espouse a socialist philosophy of agricultural

There's no physical cause preventing these countries from growing enough food. Their

wants to connect the act of for dogmatic insistence on the superiority of central aconomic could simply set aside a conplanning, in the face of overwhelming evidence to the

And that's food for thought.

It is fashionable to criticize Open-toed shoes are very this country today for "conpopular this season. They suming" 35 percent of the come in all sorts of shapes world's raw material with only and materials. We see high six percent of the world's heel, wedge and low heel population. But people who make this observation often dress while others are appropriate and the street of the street propriate only for sport or casual wear.

Or else be sure you will it -Old English Rhyme.

"DOC" COWAN

Fine jewelry, gemstones, are investments in pleasure and beauty. A source of lasting satisfaction, karat gold jewelry set with iamonds, emeralds, pearls, ubies, sapphires...brings to its owner constant enchantment. Good jewelry lasts. Most women reading this column make a certain investment in clothing. They invest in their appearance. Yet will the shop that sold the dress, the pants, the blouses, the coat buy back that apparel after it has been worn? What of the jewelry, the brooch, the earrings, the pendant, the bracelet? If its fine jewelry, it is more than an investment in appear-An important factor con-

tributing to the value of gemstones is portability. Any fine gemstone represents a high concentration of value in a small object. This is a tradition and a fact. The owner of fine gemstones can transport great wealth on his person. This fact gives fine gemstones a world-wide security value. Gemstones may be the most secure commodity because they are so easily carried. Many wealthy families invest a certain amount of their funds in jewels. When everything else fails. Even their governments, they can take or send their gems out of the country and realize a quick return on their investment. Rich Europeanshave practiced this type of security for many years: Sotheby Parke Bernet is an

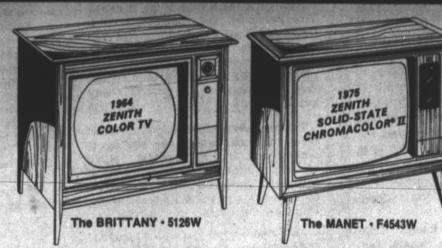

exclusive dealer of art objects and jewelry which sells its goods at auction. In the past year such "investments" as antiques, paintings and fine wine have plummeted. But an extremely fine 5.60 carat marquise diamond ring sold for \$52,000 to serious, investment-minded bidders. There were other examples at this sale last fall which prove that fine jewelry is indeed holding its value.

Cowans is the best local source for fine jewelry. Whatever your reasons for buying, we are the jewelers trained to serve.

## School Board Code

(EDITOR'S NOTE: The following is the Code of Ethics as adopted by the Board of Directors of the National Association of School Boards)

As a member of my local board of education, representing all the citizens of my school district, I recognize:

1. That my fellow cifizens have entrusted me with the educational development of the children and youth of this community.

2. That the public expects my first and greatest concern to be in the best interest of each of every one of these young people without distinction as to who they are or what their background may

3. That the future welfare of this Community, of this State, and the Nation depends in the largest measure upon the quality of education we provide in the public schools to fit the needs of every learner.

4. That my fellow board members and I must take the initiative in helping all the people of this community to have all the facts all the time about their schools, to the end that they will readily provide the finest possible school program, school staff, and school facilities.

5. That legally the authority of the Board is derived from the State which ultimately controls the organization and operation of the school district and which determines the degree of discretionary power left with the Board and the people of this community for the exercise of local autonomy.

6. That I must never neglect my personal obligation to the community and my legal obligation to the state, nor surrender these responsibilities to any other person, group or organization; but that, beyond these, I have a moral and civic obligation to the nation which can remain strong and free only so long as public schools in the United States of America are kept free and strong.

As a member of the Board of Education, it shall by my constant endeavor.

1. To devote time, thought, and study to the duties and responsibilities of a school board member so that I may render effective and creditable service.

2. To work with my fellow board members in a spirit of harmony and cooperation in spite of differences of opinion that arise during vigorous debate of points at issue.

3. To base my personal decision upon all available facts in each situation; to vote my honest conviction in every case, unswayed by partisan blas of any kind; thereafter, to abide by and uphold the final majority decision of the Board.

4. To remember at all times that as an individual I have no legal authority outside the meetings of the Board, and to conduct my relationships with the school staff, the local citizenry, and all media of communication of the basis of this fact.

5. To resist every temptation and outside pressure to use my position as a school board member to benefit either myself or any other individual or agency apart from the total interest of the school district.

6. To recognize that it is as important for the Board to understand and evaluate the educational program of the schools as it is to plan for the business of school operation.

7. To bear in mind under all circumstances that the primary function of the Board is to establish policies by which the schools are to be administered, but that the administration of the educational program and the conduct of school business shall be left to the employed Superintendent of schools and his professional and non-professional staff.

8. To welcome and encourage active cooperation by citizens, organizations, and the media of communication in the district with respect to establishing policy on current school operation and proposed future developments.

9. To support my State and National School Board Associations.

10. Finally, to strive step by step toward ideal conditions for most effective school board service to my community, in a spirit of team work and devotion to the publix education as the greatest instrument for the preservation and perpetuation of our representative democracy.

## Ways To Trim Budget

A lot of proposals have been made for the federal government to cut its spending, and thus cool off inflation, but practically nobody has come up with specific ideas on where to

Rep. Jim Collins of Dallas has made 22 specific proposals to President Ford and Secretary of the Treasury William Simon which he says will trim the budget, and without sacrificing our well being. Here are some of his specific proposals:

Congressional responsibility-Let's make it clear to the Nation that the responsibility for our economic future rests with Congress. Congress wrote the poor laws and now Congress must pass good laws to correct our present situation.

No new taxes-As a measure to restore the confidence of the American people in our economy, Congress should clearly affirm that there will be no new taxes or tax increases in the next five years.

Welfare Reliback-Congress should roll back federal spending for relief and welfare programs to the 1970 level. With the present economic situation, this government cannot afford to be as generous as it was during the

Effective balance-let us call for a 10 percent cut in the salaries of the President, Vice President, and cabinet members. Congressional salaries should be dependent on the balance of the budget. If there is a deficit, Congressmen would take 10 percent cut in salary, but for every \$2 billion surplus, they would receive a 1 percent salary

Trim the federal payroll-Congress should order the reduction of the Washington bureaucracy. With regional office management underway, we should reduce the high-paying supergrade jobs in Washington by at least 20 percent and the rest of the Washington bureaucracy by 15 percent?

Auto regulations-Federal automobile regulations have increased the sticker price of cars in America by hundreds of dollars. Let's transfer the bureaucrat in the Department of Transportation who dreams up these regulations to a permanent position in

Discourage welfare-It should be national policy that any welfare recipient who is offered a job paying the subsistence level has the right to refuse that job; however, such refusal will immediately result in their removal from the welfare rolls.

Reduce Pentagon jobs-We need to reduce the number of civilians who work in the Pentagon to previous peace-time levels.

Foreign ald-We need to eliminate excessive foreign aid. The U.S. Government has to borrow the money it gives away and pay added interest on these loans.

Amtrack-Let's continue profitable Amtrak operations such as those in the Washington to Boston corridor, However, we must close down all of Amtrak's losing runs.

Bring Congress closer-Congress should be in session half of the time and spend the other half of the time working in their districts. We spend too much time in Washington and pass too many laws. We pass more than the country can afford and give America more government than people want.

Stop federal buildings-Congress should enact a moratorium on new construction of federal buildings within a 50-mile radius of the Washington area. There already too many bureaucrats taking up space in our Capitol.

Business incentives-In order to get our economy moving and reduce the unemployment rate, Congress should provide additional deductions for depreciation, depletion, and investment credit. With business moving for depreciation, depletion, and investment credit. With business moving forward again, economic prosperity will return to America.

Revenue sharing-With the Federal government already in debt over \$486 billion. there is no federal money to share. Revenue sharing to the tune of over \$30 billion in five years causes an expanded federal budget through deficit spending.

Ease pollution controls-Place a moratorium on new pollution control laws until energy needs are satisfied in this country and the inflated Middle East prices are reduced.

## Talk of Texas

By Jack Maguire

VALLEY OF THE GIANTS -Did men 16 feet tall once roam the Paluxy River around what is now Glen Rose, Somervell County?

Dr. C. N. Dougherty thinks so. For several years, he has spent a couple of afternoons a week searching out and photographing the river bed in Dinosaur State Park. Along with the tracks these prehistoric monsters left in the soft limestone, there are also footprints of giant men. Dr. Dougherty, who has written a book called "Valley of the Giants," has photographed manlike tracks that measure 211/2 inches in length.

Paleontologists know that dinosaurs roamed that area of Texas millions of years before man. Their tracks, found in great numbers along the Paluxy, are accepted as authentic. As yet, however, scientists aren't ready to accept the man tracks as dating back to the dinosaur period.

"I cannot prove what I believe," Dr. Dougherty says. "But I do accept the fact that man and dinosaur were contemporaries."

LEGACY - Detroit, Red River County, hopes to erect a statue to its most famous son, John Nance

Although "Cactus Jack" Garner lived most of his adult life in Uvalde and went from there in 1932 to become the first U.S. vice president from Texas, he was born in a log cabin near Detroit.

His father, who ran a Detroit saloon, later moved his family to town where young Garner attended school.

SHADES OF THE PAST -Matagorda County ranchers still conduct cattle drives each fall and spring, but now they use public highways instead of trails.

In the fall, ranchers gather as many as 500 head of cattle around the town of Wadsworth and drive them 30 miles over roads to the lush grass on Matagorda Peninsula. Once they have wintered there, the three to four-day drive is repeated and the cattle are returned to their home range.

Matagorda County law permits the use of the roads for cattle drives. Motorists are sometimes distressed, however, when they have to wait while the herd stops to rest.

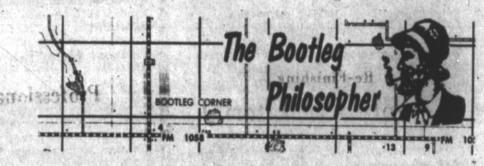

BELIEVE-IT-OR-NOT -Allan Shivers, who served as governor of Texas longer than any other man, also once defeated himself in an election.

In 1952, Texas laws permitted candidates to cross file and run under more than one party banner. That year both the Democrats and the Republicans nominated Shivers for governor. Allan Shivers, the Democratic candidate, defeated Allan Shivers, the Republican candidate, 1,375,547 to 468,319.

This is the only instance in the history of Texas politics when a candidate won an election by defeating himself.

HAVE YOU EVER WONDERED - Why some old-time, hand-cranked cash registers had a slab of marble on the shelf above the money drawer?

Tom Kunkel of Richardson, who collects old cash registers as a hobby, says the marble helped the merchant detect counterfelt coins. A piece of silver dropped on the marble gave out a clear ring if it was the real thing.

Editor's note: The Bootleg Philosopher on his Deaf Smith grass farm on Bootleg Corner expresses admiration for the telephone people this week, more or less. -0-

Dear editor:

While I've never been able to get a telephone I could call somebody else on but nobody could call me on -something I have long desired - I believe that if the telephone people set their minds to it they might develop such an instrument.

The reason I say this is because of an article I read in the news last week showing how smart the telephone people are. As I understand it, they have succeeded in reducing the rate on long distance calls and getting more money for them all at the same time.

Under a new rate schedule allowed by the Federal Communications Commission, the Bell system has announced that a call can now be dialed from coast-tocoast for as little as 22 cents.

OBVIOUSLY that's a bargain.

Where else in the world could you get somebody to string a wire from Hereford to Los Angeles, Calif., and let you talk over it for 22 cents?

Of course there are some restrictions on this. You can talk for 22 cents all right, but for only one minute. Talk longer than 60 seconds and the rate goes up immediately. If cattlemen and car manufacturers were as smart as telephone people they wouldn't be losing money today. How many men are there we won't count women, everybody knows the answer there - in the United States who can limit a longdistance call to one minute? Garry Cooper is the only one I can think of and he's not here anymore.

THE WAY it looks to me, this one-minute-for-22-cents deal is like selling an ice cream cone to a kid for a penny for the first lick, but charging 24 cents more if he eats the rest of it. I take my hat off to the telephone people. They know something about human nature, not to mention finance.

> Yours faithfully, J.A.

## 🦛 The Brand Files 🥌

#### 1 YEAR AGO

Dick Fellers, 34 was named recipient of the annual "Outstanding Farmer" award presented by the Hereford Lions club Wednesday at the Civic Club Center. Described as a young farmer who 'made it the hard way," Fellers owns a farm about six miles northeast of Hereford and farms t total of some 1,600 acres. . . . . Several little girls from Hereford competed recently at twirler contest in Canyon. Both tournaments were held at the Activity Center on the West Texas University campus. . . . . Vance Hennington cracked a twoout, double-sacker with the bases loaded at Whiteface Field Friday afternoon to score three runs and pushed the Herd to an 8-6 win and gain a split with the Plainview Bulldogs in the first day of district action.

#### **5 YEARS AGO**

It's spring, but on Thursday the day before the new season officially arrived it was still too cold to cycle through the park. As much as four inches of snow was reported through the county.... The biggest opposition to creation of a junior college in Hereford in the immediate future has risen from the rural areas of Deaf Smith County. The opponents which include several on the 20 members steering committee of the proposed two-year college-in general support the principle of a local college but contend they can't afford to establish it at least not now.

#### 10 YEARS AGO

Several farmers investigated the potential afforded by an new cash crop during a two and a half hour session here Tuesday night. And after hearing a Knox County farmerturned agronomist describe the crop as one possessing many gold benefits, the 40 or so in attendance apparently concluded that the crop does have definite possibilities for Magic Triangle agriculture. . . . Dr. Jan C. Bonsms, livestock scientist from South Africa, will highlight a breeders conference here Friday at the Bull Barn.

#### 20 YEARS AGO

Around 100 workers were busy this week cutting seed potatoes for the 1955 crop, and the number was expected to double during the next two weeks, when most of the current crop will be planted. . . . . Despite increased tempo in the county tax offices on sale of auto mobile license plates, indications were that employees will be faced with a landslide business during the next 10 days. . . . . The Hereford Lions Club will go into the broom and mop selling business next Wednesday afternoon, according to Ray Cowsert, drive chairman who said that the sales campaign will open shortly after noon, and will be completed the same day.

### 30 YEARS AGO

A benefit dance will be sponsored here by the Hereford Firemen it was announced today. Proceeds from the dance will be donated to the Central School Cafeteria the announcement stated.... Following appointment of a special Swimming Pool committee this week a meeting was called at 8 Friday night, March 22, in the County Courtroom in Hereford; all persons interrested in discussing a pool and possible means of constructing the project were invited to attend. . . . Approximately 150 young people and their leaders from the Christian Churches of the Panhandle and Southwest Plains will assemble at the local First Christian Church tomorrow evening and Saturday for the annual World Fellowship Meet for young people.

### 50 YEARS AGO

A concentrated campaign will be begun by the Chamber of Commerce and Park Board of City Government in an effort to throughly clean up Hereford this summer, and to installa spirit of rivalry among home owners and renters that will result in a prettier and more desirable home town for all residents. . . . The Kelso Wurdack Co. has let the contract for their new brick building and ice plant at Hereford to Contractor George Parr of Amarillo, according to word received here this week. It is understood that the material has been ordered and construction work will start as soon as it is assembled

## The Good Things

The news is so often bad-after over a year of Watergate now it's economic gloom-we often tend to forget the many. blessings all Americans should appreciate-and enjoy.

Last year this time gasoline was short and there were lines at stations everywhere. Watergate was in full flower, clouding the nation's conscience and mood. Today we have ample fuel, a new President and new national mood, and prices are beginning to come down.

A look at conditions in other countries will make one thankful. Fuel and food prices in many European countries are double those in the United States. While we have seen inflation run prices up in this country in recent years, we still have the most abundant selection of food, at the lowest prices, of any major country in the world.

The recession is not all bad. People are beginning to appreciate work. Those working often do a better job in a new frame of mind. Some are learning to work for the first time. Others are learning no one owes them a living, a job, a home, a car or two, etc. And, while for many of those unemployed there is hardship, we have more benefits today for such people than ever before.

Americans are free to travel anywhere they wish, the winter has been mild, the country is not at war, and spring is just around the corner. The news isn't all bad!

1976-77 biennium, an increase of \$2.8 billion over the current budget.

In the past the LBB recommendation has been viewed as a bare-bones budget. This is not true of this year's budget. Rather, the LBB attempted to address the critical demands for state funds in a realistic

During its deliberations from July, 1974, through the middle of January, the Legislative Budget Board underwent a more drastic change than at any time since its creation in 1949.

The State's budgetary process was redesigned along the lines of the zero-base budgeting concept used in other state governments and private industry.

Under this system, all program managers were required to justify their total dollar expenditures instead of relying on the traditional method focusing only funds additional their current levels.

In addition, they were

AUSTIN-I believe the the Legislative Budget billion budget for the required to offer alternative levels of cost and performance for all programs and rank them in priority order.

Simultaneously, LBB organized a process for in-depth and extensive evaluation of state agency programs And their ability to produce results.

During the more than 50 hours it met, the heard and the subcommittee Legislative Budget Board also reviewed recommendations of the Program Evaluation Unit and approved the initial new natural gas at the report required under wellhead at 75 cents per Mcf. House Bill 169.

This report is not merely a resource document, but is intended Mcf. The reduced price would to focus legislative curtail production of thought on programs so that questions can be raised as to program results.

report provides overview of how all agency programs fit into areas of governmental services, such as services to youth as a whole rather than on a piecemeal basis. The report then looks at selected agency programs

McCall's Pattern

## The Speaker Reports

by Bill Clayton

nference to denounce the S. Senate Oil and Gas Products and Distribution Subcommittee for refusing to hear public testimony on a number of energy bills which could rock the foundation of this state's economy.

started mark-up on the bills March 11. Among the proposals being railroaded gh this committee are: 1. Set a price ceiling on

The price of new intrastate gas in Texas is now deregulated and currently selling from \$1.70 to \$2 per marginal wells and diminish the incentive for full production. Texas has shown that there is an over-demand for deregulated intrastate gas The format of the at higher prices. To control an the market would only depress the economy and discourage production at a time when there is a shortage of domestic energy.

2. Prohibit boiler use of natural gas. Many utility

determine what each contributes to the whole.

In view of this type of realistic planning by the LBB and its staff, I hope the Legislature will not consider this budget as a listing of bare necessities. I believe this budget meets the state's needs and at the same time maintains our tradition of fiscal responsibility.

contracts with natural gas suppliers. This provision would not give these companies enough time to convert their energy sources to fuel oil, lignite or coal. 3. Give the Federal Power Commission authority

process of renegotiating

to breech contracts in "emergency" situations. This provision states that the company would be compensated at the same rate as the highest gas sold by the company, plus any additional price the FPC deems necessary. This would encourage companies to go along with federal attempts to preempt state authority and drive Texas-contracted gas from the state at higher prices than currently being

4. Make all new transportation and gathering facilities common carriers. This would put additional controls on an economy that is already feeling the strangulation of too much regulation. Letting the market system determine its own course seems to be a lesson we have yet to learn.

5. Instigate oil import quotas. This would drastically drive up the price of domestic oil and put the burden of the increased price on the back of the consumer.

6. Rollback the price of crude oil. This would decrease the incentive to drill and frustrate producers who have made investments within the present price structure. It would perpetuate the two-tiered price system.

7. Establish a National **Energy Supply Corporation** This would place the government in competition with private industry. It is the first step toward complete tion of our oil and gas industries. Its presence in a free market system would only serve to further discourage and depress domestic oil production.

It seems that both Congress and the President are out to discourage future production of oil and gas, mandate future recession and move in the direction of nationalizing our oil companies. Such policies demand strong reaction from Texas and other oil-producing

Stopping or slowing down the leasing of state-owned lands for drilling is one of the most effective ways of telling the federal government that Texas is not willing to stand by while our prices are cut and our resources depleted.

The Texas Senate has already unanimously passed a bill which would keep gas produced on state-owned lands in the state unless there was a surplus.

It is time for Texans to seriously consider such proposals if the federal government continues to disregard the nation's oil-rich states. I believe we should unite

and focus on the following energy policy alternatives: 1. Maintenance of the Oil Depletion Allowance

2. Gradual deregulation of all oil and gas 3. Plowback guarantees

on a windfall profits tax 4. An all-out effort to develop nuclear power plants and other potential energy Texas leads all other states in both the production and consumption of natural gas. We produce 38 per cent of, the nation's gas and consum 58 per cent of that gas.

We are currently producing at capacity and continue to run the risks of sen capital investment losses and environmental hazards in offshore and inland exploration.

Texas is tired of bearing the burden of domestic oil and gas production for the rest of the nation, while sustaining attacks from the federal government. It is time we unite together in pronouncing a strong energy policy which will benefit all

nimbus cloud, or thunderhead. It's the most active and most dangerous, of all the clouds.

dit.

thunderheads, which often feature a large anvil-like top, and which tower up to 30,000 to 40,000 feet, or higher, usually move from west to east. They bring with them heavy rain, and strong winds.

The leading edge of the cumulonimbus, far up above, can sometimes be seen spreading out (the anvil top) as it moves toward the viewer. The lower edge is only manutes away when this stage is reached. Dangerous up and down drafts are known to exist in thunderheads.

Beware of lightning to the west or northwest in the warm months; if seen in the east, the thunderhead producing it will usually pass you by.

Heavy rain usually comes in the first stage of the build-up, later lighter rain.

MAKING A

DESERTARIUM
What's a desertarium?
It's a terrarium planted
with cacti and succulents, plants which thrive in desert conditions. Terrariums are all the rage and some are spectacularly beautiful, but I think desertariums are a bit more exotic and they're certainly easier for beginners.

they're certainly easier for beginners.

Since the cacti and succulents you'll be planting in your desertarium require minimum amounts of moisture in the air, select a terrarium planter with an open top. A large brandy snifter, fish bowl or aquarium are all attractive and well suited to the purpose. Use a very sandy soil, or layer different colors of sand – this latterplanting medium is very attractive and the colored sand can be purchased at sand can be purchased at aquarium supply stores.

Next buy several varieties of cacti and succulents - small ones, of course. Some interesting ones to look for which make for an intriguing desertarium are the bishop's cap, the sand dollar, or the bunny ear. A small jade plant or aloe are two succulents which will add delicate beauty. Cacti and succulents don't grow much indoors so arrange much indoors so arrange your plants according to their size at the time of planting - it won't change much. In the winter, keep your desertarium in a rather cool place and water only very occasionally with room-temperature water. In the summer, it will thrive in a sunny window with a southern expodow with a southern expo-sure, and may require slightly more watering. (Water very minimally only when soil dr sand is bone-dry.) Cacti retain water in their sturdy stems and succulents hold water in their plump leaves so neither requires frequent waterings. Actually, both varieties rot easily so keep them free of excess mois-ture in the soil or air.

Let Carol Rose show you how you can qualify for FHA, VA or Conventional Loans

Mrs. Travis McPherson. A

school students will be judged

April 16. Prizes, including \$5 to a winner from each school and

\$10 to the best over-all com-

petitor, will be awarded April 17. Entries will be and used at

poster contest for element

ness and public locations.

Laura Thompson. RETURNING JUNIORS

Honorary membership in lational Honor Society was resented to high school student ank Stringer Wednesday uring a special assembly as

Given for the first time in NHS history, the honor will be destowed annually to a deserving member of the local community. Stringer, a senior, was selected by honor roll members for honorary recognition and welcomed into the meritorious organization.

James Arney NHS treasurer, amounted the honor.

Numerous guests, including parents of NHS members, were present at the assembly, which preceded a reception in the high school cafeteria. They were presented by Mrs. Betty relcomed by Mrs. Betty

Oglesby, organization sponsor. A college scholarship of \$200 was awarded to Danny Collins, HHS senior. The school grant was presented by NHS president Shyla Thomas on sehalf of the honor society.

Outstanding teachers cited included Mrs. Bonnie Wuerflien, John Claypool, N.D. Kelso, Nick Nixon, Terry Williams and Mrs. Dorotha

Musical entertainment was performed by an orchestra intet and vocalist Lesly Euler. A sonata in E minor was presented by Delfine Ulibarri, Angeline Haschke, Hilda Garza, Blake, Allen and Gilbert

Terry Hetzel, NHS secretary, defined the purposes and goals of the academic-minded

organization. She explained the from the top 15 per cent of the senior class, top 10 per cent of juniors and best 5 per cent of

the NHS students on the new registry by principal Jerry Don George and faculty member, Phil Barefield.

Miss Thomas administered he oath of membership to atudents who have qualified for NHS membership. The 1975 enrollment follows:

THREE YEAR SENIORS

Food Show held in Amarillo last week. Southwest Foods was the heme for the 1975 event.

JoAnn Wagner won the Senior Main dish division with Texas Beef Nugest, Rhonda Hagar was first alternate in the Senior Side dish division with Pineapple Sweet Potatoes. Micki Merritt was a blue ribbon winner and also selected as one of the most outstanding in the Senior Bread and Dessert division with Southern Pineapple Tarts and Sandra Stallings made a good showing with Coconut Cream Puffs in the Senior Snack and Beverage

JoAnn will compete in the State Food Show to be held during State 4-H Round-up the first week in June at College

We'd like to share these recipes with you.

#### **TEXAS BEEF NUGGETS** JoAnn Wagner

1 lb. sirloin steak (cut in 1/2" slices)

1 c. corn flakes, crumbled 1/2 c. finely chopped pecans

1/2 stick aleo

1 c. milk

1 t, worcestershire sauce 2-3 c. flour seasoned with salt and pepper to taste ¼ c. grated dry parmesan

2 T. flour 5 oz. pkg. sharp cheese, grated

Cut beef slices into bite size squares (about 11%" squares). Shake pieces in bag with seasoned flour until each piece is individually coated. Refrigerate while continuing preparation.

In a bowl, thoroughly blend corn flake crumbs, chopped pecans, parmesan cheese, paprika and nutmeg. Set aside.

In a saucepan, melt oleo, add flour and stir until flour is dissolved completely. Add milk; heat and stir until mixture

grated chese and worcestershire sauce and continue stirring and cooking until cheese melts. Keep warm. Set

oven to 400 degrees F. Dip each floured beef cube in cheese sauce, allow to drain a little, then roll in bowl of dry mixture so all sides are well coated. Place on well buttered or teflon cookie sheets, leaving

Eight Deaf Smith County 4-H spaces between each. (At this members received top stage, may be placed in recognition in the District I 4-H refrigerator until needed, if prerer to prepare ahead of

> Bake about 15 min. Until cubes are a deep golden brown. Cool slightly before removing from pan with spatula.

Cost of recipe: \$2.24 Cost per serving: 37 cents.

PINEAPPLE SWEET POTATOES Rhonda Hagar

1 can of sweet potatoes, drained (No. 3 can) 1 t. salt

1/4 c. chopped pecans

1 small can pineapple chunks,

Crushed corn flakes (2 cups) Juice from pineapple 1/2 c. bronw sugar

Mash potatoes; blend in salt, pecans and beaten egg. Form balls around pineapple chunks; roll in cornflakes.

Place rolls in shallow buttered pan. Combine pineapple juice with brown sugar and butter in saucepan, bring to

Cook for 5 minutes, stirring constantly. Pour over potato balls, Bake at 350 degrees for 20-30 minutes.

Yield: 8 servings Cost of recipe: \$1.28 Cost per serving: 16 cents.

**SOUTHERN PINAPPLE** TARTS Micki Merritt

Pastry: 1/2 c. butter, softened -1 pkg. (3 oz.) cream cheese,

2 T. sugar 11/2 c. all purpose flour %c. chopped pecans Filling: 2 eggs

1 c. firmly packed brown 1 can (8 oz.) crushed pineapple, drained a it is marrie

butter or margarine, Oven: 350 degres F.

Pastry: In a small mixer Lower heat to simmer, add cheese, and sugar. Mix at low speed until well blended. Add flour; mix thoroughly, Form

> Cover and chill 30 min. Press chilled dough into bottom and up sides of 10 muffin cups. Sprinkle ½ c. chopped pecans in bottom of pastry-lined cups. Spoon filling over pecans. Sprinkle remaining pecans on

Bake at 350 degrees for 30 min. until golden brown. Cool 15 minutes before removing from pan. Cool completely; serve pan. Cool completely; serve with whipped cream, if desired. In small mixing bowl, combine eggs, brown sugar, pineapple and melted butter. Stir until well blended. Makes 10 tarts.

COCONUT CREAM PUFFS

½ c. butter

1 c, flour

Bring water and butter to a boil. Stir in flour and continue stirring until mixture leaves sides of pan and forms a ball.

Beat in eggs, one at a time and continue beating until mixture is smooth and velvety. Drop from a spoon onto baking sheet. Bake 45 min. in 400

degree oven. Cool.

Cut off tops and fill with coconut pudding. Cream puffs may be garnished with whipped cream or cool whip and fruit.

Serves:8 Coconut Pudding: 1c. sugar ½ c. cornstarch

1/4 t. salt 4c. milk 1 c. flaked coconut

2t. vanilla Mix sugar, cornstarch and salt in top of 2½ qt. double boiler. Gradually add milk, mixing until smooth. Add flaked coconut. Place over boiling

SCHEDULE YOUR INTAKE Lunchtime is a crucial period of the day for dieters. lit's halfway between breakfast and dinner and, coming in the middle of the day as it does, it's usually a time when we're quite hungry. If we eat lunch too late, we're usually so famished that we gonze ourselves to excess and if we cat it too soon, we usually get an overwhelming case of the nibbles before the afternoon is through. Try to schedule lunch at a point in the day that is exactly equidistant from the morning and evening meals. In other words, if you breakfast at eight and dine at six, have kunch at one - five hours after breakfast and fine hours before dinner. Figure the number of hours between your first meal of the day and your last, then set the mid-point as your hunch hour. You'd be surprised how this can help you keep your appetite gauge on an

If you discover, however, that you're really hungry in mid-morning several hours after breakfast, you're doing something wrong and it probably has to do with what you're eating for breakfast. My standard dation for dieters on 1,000 calories a day is to allot 250 of them to the morning meal. That's not a whole lot of calonies but you'll find that they go further toward keeping you satisfied if you pack as much protein and bulk into the 250 allotment, Eggs at 80 calories each are good high-protein breakfast fare and fresh fruits, especially citrus, are refreshing and provide low-cal bulk. If you're accustomed to high-calorie sweets for breakfast, you've probably discovered that you have to eat much smaller quantities of them once you start dieting to keep your calories down, It's much more satisfying to eat plenty of food that will really stay with you (assike sweet carbobydrates whose food value is used up almost immediately and thus leaves you hungry within an hour or so). Eating small amounts of high calorie foods is okay for a sometimes treat, but not for

I think 350 is a good lunchtime allotment. Some folks would say it's proportionately high for a dieter on 1,000 calories a day, but I think you need that many calories to satisfy your mid-day hunger, and to get you through the long afternoon. A lot of sandwiches are in the 250 to 300 calorie category and with a low-cal salad or cup of soup, that can make a hearty soul-satisfying lunch, bility for those who like it. Again, try to get the ein of meat, fish or cheese and the bulk of bread or etables. Eat each meal, and especially lunch, with the firm determination that you will not touch another norsel until the next mealtime rolls around - better the

Now, 400 calories for dinner might not sound like a lot, but to keep 1,000 calories a day, that's all you can have at the evening meal. And it's not so bad. You can have about three ounces of meat, or four or five ounces of certain fish or chicken; and you can have a vegetable, even a small baked or boiled potato, and a salad, and some fruit or gelatin for dessert,

## "WORSHIP GOD"

Worship with us the Lord's Way, in the Lord's Church. Let's Obey Christ and follow Christ and the Apostles. Eph.

We believe in speaking where the Bible speaks, and remaining effect where the word of God is offent. I Pet. 4 Verse 11. We do not believe we can after or add to the word of God. II Jan. 9-11, Also, Rev. 22:18-19.

We believe in ministering one to another, studying Gods word for the addication of ourselves and edification of each

other. Rm. 15:14. The word of God is taught in the Assembly of the Church Men teachers teaching one at a time. The only teachers God shorizes in the Public Church Assembly. I Cor. 11:23-40 -

We sing and Pray. Col. 3:16-17; Eph. 5:19-20 - 1 Tim. 2:8. We give of our means and partake of the commution at the appointed time. I Cur. 16:1-2 - Lu 24:29-30; Acts. 20:7.

We believe the Communion to be a spiritual ordinance faced in the Church by Christ. Communiced by the Lord and might and practiced by the Apostles. As Baptism when occupanted by faith, repentance and confession, puts the sellever in Christ. The communion heeps us in covenant relationship with Christ and other Christians when accompanied by the Christian Graces as Peter declares in II

We believe we will be held accountable for the way we alle Gods word. For this we will answer in the day of

Judgment. 1 Pet. 4:17, Rm. 14:12. The word of the Lord only will save. We believe we must caver to keep the unity of the spirit in the bands of peace. Eph. 4:3-6. We must carnessly contend for one Fulth. Jude

We invite you to come worship with us -

## right to work. If it fails to break

will damage the structure. One of the slogans of the times is "plant and grow vegetables." The very first step in making a garden is to prepare the garden soil well. It should be turned

new season, the hyacin

terns on the bough

ance and the forsythian

ners to start gardenin

moisture, snow and rain. Use the old method of testing the soil

for wetness; kick the crust off

the soil and scrape up a fresh

handful. Squeeze the soil tightly in your hand, then toss it up-

ward and outward about six

pressed clod breaks, the soil is

up, the soil is too wet, working it

deeply; work in agricultural limestone or basic slag (our soil really seldom needs lime as we have enough minerals. For 100 square feet of garden area, use liberal amounts of compost or peat moss (chopped and moist). This will improve

the texture of quality of the soil. At planting time, work ten ds of a 5-10-10 or 10-10-10 reliable fertilizer into 100 square feet of garden area.

The success of gardening is in the soil and maintenance. Most vegetables, fruits and herbs will prosper in soils with PH of 6.0 to

Haste often hinders rather than aids in gardening. The soil should not only be prepared correctly, it should by free of the cold March temperatures. Sunshine raises the temperature and seed will grow and produce much better if the soil is warm.

Remember, March is fickle and often tricks of weather are played. So us your weather eye and instincts. I tried a bit of work outside this afternoon and found the March wind cold and penetrating. Soil was cold too, but did work very well.\$ Soil should be friable, that is, it

March really begins with a should have enough humus in it die when exposed to hot surense of spring. As crosus to make it pliable and, when however, if properly hardened releases the fresh winds of the pressed in the hand, it should they will take root and grow not feel clammy, because of the clay condition. Instead it needs a free, loose texture. All this hand their beautiful yellow adds to the quality of the soil and makes it more workable

By The Garden

Gate With Glad

Tulips add a bit of lush green to the gardens and their leafy WORD OF CAUTION:Do not ars point skyward. All this, purchase inferior plants or seeds. Even though the pur-chase price is more, in the long run, the dividends are higher, with the first day of Spring (the 20th of March) really stirs up a yen within and the increase in quality is Yes, it is time for real action well worth the price paid.

now-set out trees, shrubs, strawberries, rhubarb; prepare It is far better to have the best when buying trees, shrubs, roses, or plants for transoil and plant the early nting, than to purchase trees; get the garden tools ready for those busy days. Confusion often exists, and several of a low quality. Also, always buy fresh garden materials; a wilted, poorly-grown plant seldom ever does some are early beavers about gardening, about when to work well. One of high quality is owrth for more than three or the soil, especially after winter

four of poor quality.

Named varities are also important. Know your garden friends by name, at least the common name, and if possible ow the botanical name and some of the facts relative to the history and productive

For a better tomorrow, it will take unified action. Gardeners are well aware that we are faced with a crises. The Chinese positive thinking, and includes the thought of opportunities.

Gardeners must have positive

thinking and measure up to the best methods, of work with diligence and faith. History the plastic. indicates that Americans have faced similar problems and

The president of National Garden Clubs Inc., Mrs. Mary Kittle, challenges gardeners, "to explore the opportunities awaiting us." This we can do. and win many victories through gardening.

rhubarb, swiss chard, beets, carrots, lettuce, radishes, okra, artichokes, and others, have ornamental value and combine beautifully with flowering plants and achieve an over-all attractive effect. Plant and grow vegetables, along with flowers. Flower gardens can be made attractive and beautiful with border planting of some of the named vegetables.

For those who have limited space and are new gardeners, I suggest some of the above combinations. Also, remember marigolds and herbs tend to keep down insects and do not need spraying.

Plants for transplanting should be hardened before they are transplanted to the outside garden. Weak plants will soon

Vestern Land Roller Turbine Pumps

lolly Sugar Road Hereford, Texas

To harden plants grown in the house, place them outside in a spot protected from the wind and sun during the day. Bring them in the house at night. The procedure should be continued at least five or six days, to toughen them for the move to the garden. Sudden exposure to winds and bright sumbine will cause the tender plants to collaps from the sudden change to wind and hout shunshine

When transplanting and putting out new plants pur-chased, give aboost feeding of a fertilizer 5-10-5. If plants respond the first applic skip a week or two and then give

another feeding.

Another word of warning, one rden enemy is the cut worm. When planting or transpla tomato plants, use the following precaution. Cut with scissors and remove the bottom of a seven ounce plastic-foam cup. Then make a cut from the top of the bottom of the cup.

Slip the cup around the stem of plant at the soil level, wrap piece of plastic and tie around the circumference of the cup and fasten tightly with the word for crisis indicates lengthwise-cut edges

overlapping slightly.

Mound up a little soil around the cup to keep in place-and your cutworm worries are over because they cannot penetrate

This suggestion comes from a national horticulturist and she that there are many rewards for gardeners. who vegetables, as well as those who are ornamental gardeners. Let's be serious and concerned for humanity by growing and sharing our vegetables with others. Also, share and encourage the new gardeners.

Blossom by blossom announces the coming of spring. . . the forsythia is one of psing's many beautiful forsythias in bloom in Hereford.

## HD Club Tours Decor Shops

Interior decor was discussed by North Hereford Extension Club members Thursday while on a tour of Yocum Decorators and Paul Jones Upholstery.

A business meeting was conducted in the Pioneer Natural Gas Flame Room after the field trip. Moderated by president Mrs. T.E. Brisendine, members voted to donate funds to a Girlstown resident, Kathy Skinner, for an Easter dress

Mrs. Cliff Johnson served refreshments to Mmes. Paul Hoff, Iva Saltzman, J.A. Crofford, Neil Lemons, Dewayne Holly, A.E. Hodges and Roberta Campbell.

Fish Story Yeah, the fish was too small to bother with, so I got a couple of guys to help me throw it back in the lake.

#### State Realtors President Talks In Amarillo

Men and women in the Amarillo area real estate profession are expecting a generally upswing talk on the state of the real estate business in Texas from Julio S. Laguarta of Houston, who will speak Tuesday night (April 8) in the Amarillo Country Club. Laguarta is the president of the Texas Association of Realtors.

Laguarta assesses the Texas business situations as "getting stirred up and beginning to move out." He is president of Laguarta, Gavrel and Kirk, Inc., in Houston, a large commercial and industrial firm, with extensive interests in many parts of Texas. He will be given a special welcome to Amarillo by two past presidents of TAR Franklin Jeffers and Don Mason. Mrs. Laguarta will accompany her husband, as will E.W. Luedtke of Austin, the TAR executive vice president. Leroy Land of Lubbock, regional vice president, will formally introduce the Houstonian to the dinner gathering at 7:30 p.m.

Dan Boston, president of the

Amarillo Board of Realtors. announced this week that five other area boards, Dumas, Pampa, Dalhart, Borger, and Hereford would be coming to hear Laguarta. The presidents of these boards are Emmett H. Sanders, Dumas; Fulton E. Thomas, Jr. Dalhart; Richard C. Hatfield, Borger; Mary Lea Garrett, Pampa; and Betty Gilbert, Hereford.

Not a Speck of Dirt

Susan Compton, right, of Hereford joins Judy Vittman of Colorado Springs, Colo., in a firearms cleaning session as part of the ROTC program at West Texas State University. It will eventually lead either to the Army or a law enforcement career. (STSU Photo)

## Texas Keeps Up With The Time Change

Nostalgia is "in" these days, with special focus on the 1950s. Books, magazines, television series and even clothing styles are harking back to the mid-century.

Whether those were really good times or bad times is a matter of opinion. One thing is certain: a lot has happened in Texas since 1950.

cent more Texans in 1970 than

there were in 1950. Motor vehicle registrations grew even faster - three times faster than the population. There were 143 per cent more

vehicles in 1970 than in 1950. kept by the Texas Highway Department, road and street mileage in Texas increased only 10 per cent during the 20 years following the mid-century year.

Almost all that modest increase in mileage is accounted

for by the addition of city streets as the urban areas of Texas

Texas' Interstate system added 3,208 miles to the state's road network. Impact of urban growth was much greater, with urban streets and highways growing from 28.3 thousand miles in 1953 to 52.7 thousand miles in 1973.

The population has increased, By and large, however, the for one thing. There were 45 per highway program since the mid-1950's has consisted mainly of upgrading and modernizing older routes with only relatively small additions of sections of highways on new locations.

A good illustration is the transition and transfer of county Market System.

The increase in Farm to Market Road under state maintenance since 1950 has paralleled the decrease in miles of rural roads under county jurisdiction. County roads

simply have been taken into the period. state FM system at the request and with the cooperation of county governments, or have

become suburban area streets. Farm and Ranch to Market Roads increased from 23.6 thousand miles in 1953 to 37.4 thousand miles in 1973, while county road miles decreased from 153.8 thousand to 137.2 thousand miles in the same

One other modern day statistic from the Highway Department: Highways, streets, roads and even alleys in Texas - forming the state's most basic transportation resource occupy only .29 of one per cent of the land area, a small investment of resources when compared to the benefits

### Sprouse Filed As Unopposed Nominee

filed as the unopposed nominee for District 13 of the State Bar of Texas Board of Directors, Executive Director

H.C. Pittman announced. The 30-member policymaking board governs activities

Harlow Sprouse of Amarillo of the State's 25,000 lawyers.

Voting will be by mail balloting April 15-30. The winners will take office July 3 at the close of the Bar's Annual Convention in Dallas. Board members will serve three-year

There is a story of a fellow who worked on the railroad. A train came by, and as he waited for it to pass, he waved to a man in the rear car. "I know that man," he said. "He's president of the railroad company." "He and I started to work here together many years ago." "That's strange," replied a coworker. "Why is he president of the company and you still work here where you started?" He replied, "He started towork for the railroad company and I went to work for the thirty dollars a month."

Late Filings May Lead To Mistakes

With less than a month remaining until April 15, the annual deadline for filing individual income tax returns, the Internal Revenue Service (IRS) is cautioning taxpayers to watch out for the last minute mistakes that can delay refunds or , worse, cost money.

Ronald Archer. minstrative officer in charge of the Amarillo IRS office, said today that a disproportionately large number of taxpayers traditionally wait until the final days of the filing season to send in their returns. One result of this, he said, is that thousands of returns come in with simple mistakes that can only be attributed to haste.

"We can't do much with a return that shows up without a taxpayer's name, which is not as uncommon as you might think," Archer said. "The same

those on which there are no social security numbers. But these things and the frequent matherrors that crop up mainly just cause delays in processing. The sadder thing is the money taxpayers lose because of

The tax official said that when people are harried and trying to get the return in the mail by the deadline they frequently overlook legitimate deductions which could save them tax. They may forget that trip to the dentist or doctor that the insurance did not cover, the interest paid out all year on their revolving charge accounts.

If you're working up your return now and want some advice, the IRS has experts answering toll-free phone calls from throughout North Texas at. 800-492-4830.

## Agriculture Day To Feature Farm, Ranch Productions

Almost all food and fiber tarts on a farm or ranch. Every imerican — urban and rural — hould be interested in fficiency on the farm, because

it combats inflation, strengthens the dollar, and provides the brightest opportun-ity to narrow the trade deficit.

"These are some of the reasons why American Agricul-ture Day will be observed on March 24, the first Monday of pring," explains Dr. H.O. Kunkel, Dean of Agriculture at Texas A&M University.

"Agriculture is still America's strength. Farmers today make it possible for America to produce the world's

highest standard of living. "In 1975, only about 5 per cent of our people farm the land. Virtually all of our production is from the family farm. Yet so that urban Americans can obtain a better understanding of the largest buyer obtain a better understanding of "In 1975, only about 5 per employs three out of 10 non-farm workers in the United

States," Kunkel emphasizes.
"Farmers must be businescmen, efficiency experts, envir-onmentalists, conservationists, purchasing agents, and just plain hard workers. They know no eight-hour day. They are in a risky business, that takes the right amount of rain, sunshine, fuel, fertilizer, farm chemicals,

varieties, dependable labor, and efficient, costly and sophisticat-

jobs are touched by agriculture each day. It also provides

farmers an opportunity to take stock of the business they are in — that of producing consumer products. Communicating and creating a better understanding of each person's role is a major goal of American Agriculture Day, observed nationwide for the first time in 1975, after regional successes in the past.
As communities and citizens

join in American Agriculture Day activities, they are building a better platform of understanding with all segments of the food and fiber team, including production, processing and marketing, Kunkel says.

The observance is sponsored by the National Agri-Marketing Association (NAMA), in cooper-ation with many other agricultural organizations, agencies, universities and private citizens.

The average size of agricul-

tural loans increased in Texas

last year, but dredit quality

March 24 — the first Monday of the spring season - was selected as the appropriate time for the salute to agriculture, since it focuses attention on the mportance of the food and fiber duction to the nation and the world. Land-grant universities of the nation, including Texas A&M University, have achieved many technological improvements for food and fiber

This technology, resulting from efforts of Texas A&M University System scientists with the Texas Agricultural Experiment Station - the states agricultural research agency - and taken to producers and consumers by specialists with the Texas Agricultural Extension Service, has benefited all Texans, Kunkel emphasizes.

## good seed of new and improved Possible Crop Production Cut **Back Worries World Market**

"The world grain market is getting nervous about the movement among American farmers to cut back their production and marketing of wheat, corn and sovbeans this year," Jay Naman, President of Texas Farmers Union said

"A report received today by TWX from a Farmers Union representative in London points out that a successful cut-back in the 1975 U.S. grain crops could reverse the present slump in prices just like adverse weather did at this time last year,"

Naman said. Naman said that Robert G. Lewis, National Secretary of The Farmers Union, is in London to confer with farm leaders from 12 European countries and to explore world farm commodity market conditions. He released the following message which was received from Lewis in London today:

London, March 12, 1975 -Reports that American grain farmers are organizing a voluntary 10 per cent cut-back in their 1975 production are getting increasing attention from market observers in this world trade center.

World grain stocks are the smallest since more than 20 years ago, when world popula-tion was little more than half - Farm leaders in Europe, who

the sharp plunge of grain prices during recent months is surprising. Market watchers remember that a similar price slump last year was turned around suddenly and dramatic-ally when bad weather in the U.S. reversed the much advertised prospect of a huge crop. Now news of the production cut-back movements among American grain farmers has added a new element of uncertainty to grain buyers eternal worry about the

that of today. In this situation,

With world grain stocks at historic lows, anything but a big grain crop in the United States would leave the world still short of grain.

weather.

Few of the Americans who are questioned here give much credence to prospects for success of the production cut-back movement in the United States. But Europeans are not so sure. They have seen their own farmers win both political and economic gains through such militant demonstrations as mass rallies, "tractor parades," withholding of produce, and in Norway even through a nationwide farm

both buy from and compete with American farmers, are inclined to be sympathetic and to think that it is entirely possible that such tactics by farmers might work in the U.S. too".

Beef prices in the United Kingdom slumped from 41 cents a pound a year ago to a low of 28 cents last fall. Militant protests by the National Farmers Union of England and Wales, including a mass blockade of ports to prevent landing of imported meat and cattle, brought government action that has raised cattle prices to 44 cents a pound today.

Just recently more than 1,000 angry farmers marched in a driving rain in London up to the parliament building to protest against a 40 per cent drop in prices of eggs. Some sixty members of parliament and political party leaders confronted the farmers in a stormy session, and Sir Henry Plumb, President of the National Farmers Union and leader of the demonstration, presented a petition demanding emergency action directly to Prime Minister Harold Wilson.

contracted part of their crops in Negotiations between the 1974. Also 15 per cent of the agricultural lenders surveyed required at least partial for-Farmers Union and the British Government and Europoean Economic Community officials are now underway and remedial action is expected soon.

The demand for operating loans increased in 1974 while those for feeder cattle and dairy

Loan Numbers Increase

appears to be deteriorating.

That's the result of a recent survey of 100 Texas agricultural What do lenders see in store lenders by Dr. Wayne Hayenga, economist for the Texas Agricultural Extension Service.

Credit Quality Falls As

"About one-half of the lenders and a majority of the bankers expect lower ranch earnings during the first six month of this year, with an increase in spending by farmers and ranchers," reports the

The demand for refinance loans is expected to be higher than usual, according to about half of the lenders surveyed.

Most lenders expeept short-term and long-term interest rates to stay about the same for the next six months, with a

possible downward tredn.

"About 40 per cent of the banks in Texas are soliciting farm and ranch accounts," says Hayenga. "Loan fund availability does not seem to be

## Compost Pilot Project Here

The obvious solution to the depletion of our soils and the disposal of feedyard manure are all one and the same-composting." claims Fletcher Sims Jr. of Canyon.

Compost, according to the dictionary, is "a mixture of decaying organic matter used as fertilizer."

Composting is an art. practiced for centuries but overlooked in recent genera-tions, says Sims. "Chemical fertilizer has proven to be a temporary measure and its use has reduced soil fertility." claims Sims. On the other hand, composting improves yields and improves soil conditions, along with reducing water consumption and tillage, he contends.

For uninformed readers, it

should be pointed out that Sims is president and owner of Compost Corporation, with offices in Canyon and a pilot program in the Hereford area. While it is natural for him to proclaim the benefits of composting, he also offers other credentials for his statements.

Sims was reared on a farm in Missouri and graduated from the University of Missouri with a major in biology. He was employed as a biologist by the state of Missouri before World War II, and later went to work for the U.S. Fish & Wildlife Services. In that job, he worked in the 12 Plains states, which coincidentally form the world's top grain-producing area.

Sims says his composting ubled each year since he started a pilot program in Hereford in the winter of 1972. In the summer of 1973 he began to serve as a consultant and establish other compost operations around the country.

His composting operation starts by taking manure from feedyards and placing it in windows-a ton to the lineal foot. The manure is broken up and sized and the moisture content is adjusted, which usually means adding water in this area. The bio-dynamic starter is introduced to the manure and these pedigree microbes start a fermentation. After the culture is mixed in the pile, it is periodically aerated while a temperature of about 140 degrees is maintained.

The material is usually hauled to the fields in dump trucks and there it is reloaded into spreader trucks. Sims says the usual application is about one ton to the acre, and the spreader can cover about 30 acres an hour. He estimates the cost as about half that of applying chemical

## Soybean Prices Lower, **But Production On Rise**

Soybean prices are expected to be somewhat lower in 1975, but producers are planning to

1975

Texas Agricultural Extension

"Farmers will probably get about \$6 per bushel for their 1975 crop of beans," points out Gerlow. "That's down some from record prices the past two years but still a good price."

The Texas A&M University System economist expects soybean acreage in the United States to jump more than four million acres to a total of 57,106,000 million acres. Some 47 per cent of the national increase will be the Delta states. where a large amount of cotton land will be planted to

"In Texas soybean acreage is also expected to take a sizeable 400,000 acres. This is an increase of about 45 per cent." That's how the soybean notes Gerlow. "A large portion of this acreage increase will be in the Gulf Coast area where soybeans are now being planted in rotation with rice."

> In addition to the Gulf Coast, soybeans are also grown in Northeast Texas and in the High

According to the economist, soybeans yield about 25 bushels per acre on the average in the Gulf Coast while average yields in the High Plains are about 35 bushels per acre. Considering yields and production costs along with \$6 soybeans, average income per acre should range from about \$29 per acre in the Gulf Coast to more than \$63 per acre in the High Plains.

## Farmworker Jobs Down By A Half By 1985

Jobs for farmworkers, who from 3.8 per cent in 1972 to 1.6 in comprise nearly 90 percent of all 1985. agricultural workers, are exhalf between 1972 and 1985.

Department of Labor's Bureau of Labor Statistics (BLS).

In an article published in the Winter 1974 issue of the BLS Occupational Outlook Quarterly, Neal Rosenthal and Hall Dillon say 1.6 million jobs will exist for farmworkers in 1985,

The authors attribute the pected to decline by nearly one- decline to rising farm productivity. Improved So predict two labor machinery, fertilizers, seeds economists in the U.S. and feed will permit farmers to increase output with fewer

> Improved mechanical harvesters for vegetables and fruits will decrease the need for seasonal or other hired labor.

Developments in packing and inspection, and storing systems down from 3.1 million in 1972. for fruits, vegetables and other farmworkers' share of total employment will also drop— employment requirments.

## **Breeding Herd To** Be Down for 1975

Texas but the number of cows Placements were down 42 per and calves is up. While cattle cent in the seven major feeding feeding has remined under states. pressure during the past two years, the breeding herd should be under pressure to be reduced 1975, according to a livestock marketing specialist for the Texas Agricultural Extension Service.

'In Texas cattle feeding on Feb. 1 was 47 per cent below levels last year," points out Dr. Ed Uvacek. "At the same time feeding levels were down 37 per cent in the seven major cattle feeding states,"

Uvacek syas that placement of cattle and calves into Texas feedlots has also dropped considerably—being down 56 per cent in January compared to

With most feedlots facing a breadeven cost for Choice steers of about \$42-45 hundredweight-and market prices nowhere near that level-the feeding industry will continue at a crises level," contends Uveck. On the other hand the number of breeding cows in the United

States is up four per cent over last year, with cow and heifer numbers up six per cent is "This means a large calf crop

in 1975 that will continue to add to the woes of the cow-calf operator," notes the specialist. 'These excess supplies should stimulate a liquidation of cows during the year."

## Vegetable Growers In Same Plight As Others Vegetable growers are in the a number of farmers growing classification. of the products." of the products." whether an individual pro-

Marvin Sartin, area specialist with the Texas Agricultural Extension Service, says costs of growing vegetables have risen dramatically over the past couple of years. For growers to remain in business, average prices must be higher now than

"The High Plains vegetable industry is rather small compared to traditional crops like cotton and grain sorghum." Sartin says. On the other hand,

On the Texas High Plains, vegetables are produced for both processing and fresh market. Processing vegetables are usually grown under overproduction and low prices the price structure is locked in.

The economist says a guaranteed price removes the most variable factor in vegetable production and significantly

the next season. Many growers continue to look at last year's prices in making their planting decisions," Sartin says.

There are two types of vegetable growers, he believes. reduces the financial risks. At the same, this limits profit potentials and places these vegetables in an alternate crop

John Larsen, Extension horti-

culturist from College Station;

and Dr. George Elle, professor of agronomy, Texas Tech.

Moderator will be Wendell

Strahan, of Lamesa, past president of the greenhouse

Specific topics for the

morning session will include low

cost drip irrigation, marketing methods, techniques and tools

for greenhouse vegetable indus-

try self-help and container

Afternoon agenda will include topics on the influence of ring

culture of patio tomatoes.

the greenhouse whitefly.

The casual type views fresh market vegetables as a speculative venture. If they are financially secure they may gamble on a few acres, usually picking the wrong vegetables or running astray in production

Seasons of unbelievably high returns or of loss where the price may even be below harvesting costs, causing them to plow up the crop, are a way of life for most of these vegetable

growers.

"Vegetable production is a very demanding occupation,"
Sartin warns, "and keeping up with the markets is not for those casually interested

Another group of vegetable growers are the dedicated individuals who successfully produce quality products and who are astute students of the markets.

"Most of these individuals usually manage to hit the high prices," the specialist says. Even though they will also experience seasons of losses, over the long haul vegetables are quite profitable for them.

culture, drip irrigation and soil heating on two tomato varieties; "Some of these growers the future of flower growing; market their own produce, innovations in continuous feedothers may be shippers ing systems and techniques; who must (or want to) produce a new cost saving cultural part of their product, and still others are simply growers who rely on others for the marketing systems and biological control of

production costs of four popular "While the final decisions production costs estimates for vegetable crops, costs have must rest on price expectations, 1972 as a comparison.

## Vegetable Growers Conference Slated

Greenhouse vegetable and Company, Oklahoma City; Dr. flower growers from throughout the West Texas area will gather in Lubbock Thursday, March 27, for an annual conference, according to Dr. Roland Roberts, area specialist with the Texas Agricultural Extension

Primary on the agenda will be subjects of tomatoes, irrigation, marketing, greenhouse innova-

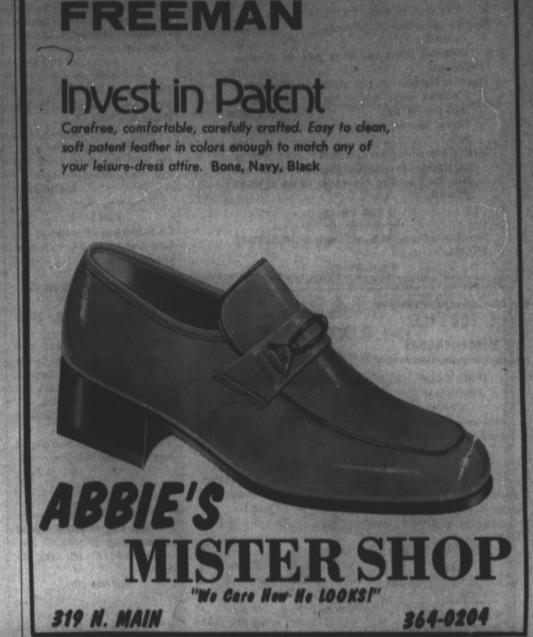

The occasion will be at the Lubbock Hilton, 505 Ave Q,

beginning at 9:30 a.m.
Says Roberts, nine presentations will be in the offering. List of speakers for the one-day event besides Roberts, include Royce Carr, of Abilene, president of West Texas Greenhouse Vegetable Council; Dr. Gordon Powell, Extension fruit and vegetable marketing specialist from College Station; David Fitz, of McAllen, marketing specialist, USDA Agriculture Marketing Service; Bobby Phipps, Texas Tech University graduate student and grower from Plainview; Paul Carrey of George J. Ball

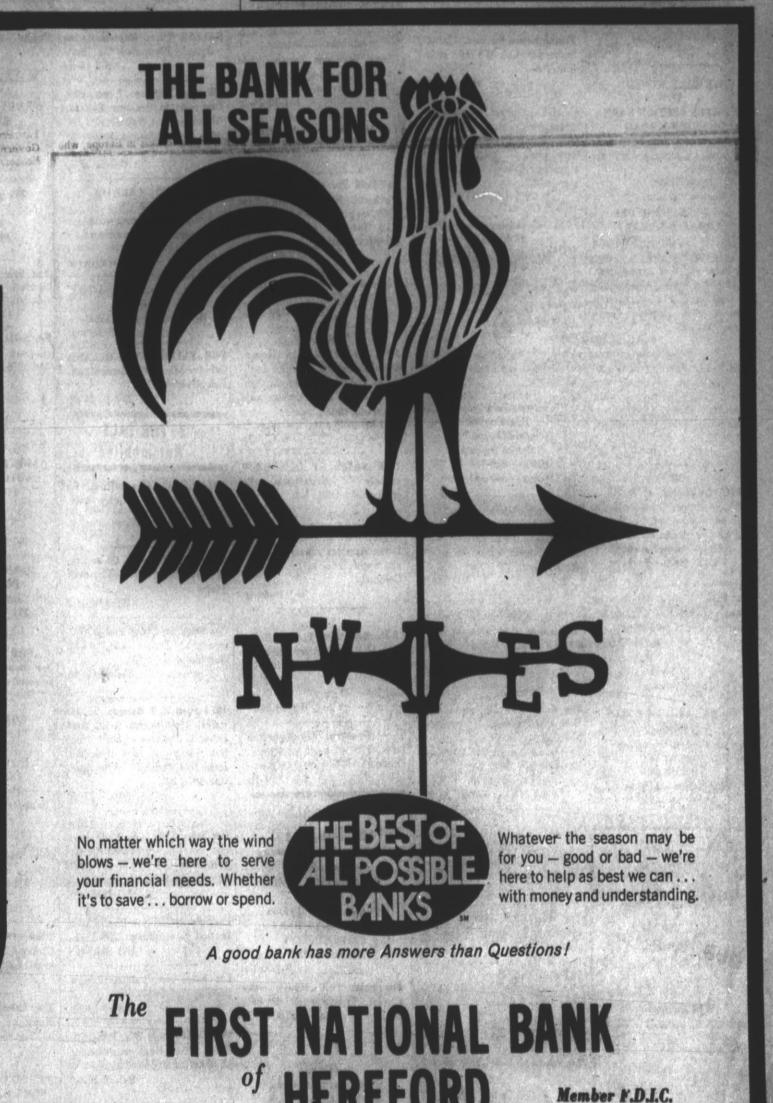

## 125,00 Texas Youth Involved In 4-H Activity

4-H involves a quarter of a million young people in the United States, and 125,000 in Texas At is the nation's largest youth organization and continues to provide a variety of educational experiences for youth between the ages of 9 and 19, points out a 4-H and youth specialist for the Texas Agricultural Extension Service, the parent organization of 4-H.

Among 4-H learning activities are projects, camps, special interest groups, fairs, contests, field trips and tours. Citizenship and leadership training are also a vital part of 4-H.

Governors get little comfort on economic woes.

YOUTHFUL ROBBER

WILMINGTON, DEL .-- Police placed 52 charges against a 15-year-old boy. They range from car theft to first degree robbery. His mother turned him in to Patrolman John Washington just 15 minutes before police arrived to arrest him.

AUSTIN — A senator and representative revived an iding big Texas into five

Houston liberal, and Rep. Fred Agnich, a Dallas Republican, proposed a 1976 referendum on the big carve-

Gov. Dolph Briscoe immediately frowned publicly on their proposition, and few

their proposition, and few colleagues were expected to go along in the legislature.

Agnich recommended a division by population into Central, North, South, East and West Texas.

The late former Sen. and Rep. V. E. "Red" Berry of San Antonio regularly recommended dividing Texas, in the interest of bringing liquor-by-the-drink and horse racing to South Texas.

Gammage and Agnich want

Gammage and Agnich want to increase Texas' clout on the national scene. With five states, they argue, the states of Texas could have 10 U.S. senators and a proportional increase in presidential electoral votes.

Sponsors claim the split-up is authorized by the articles of annexation of the Republic of Texas in 1845.

INTEREST BILL PASSES Governor Briscoe is pondering whether to approve (or again veto) a bill which opponents in the Senate opponents in the Senate charged would raise interest

further on real estate loans. The bill (HB 351 by Rep. Ben Munson of Denison) would provide for spreading all interest charges, includ ing "points" now paid in advance over the life of real estate loans. It also would permit loans of \$500,000 or more for interim construction or real estate financing to individuals at greater than

10 per cent interest. Briscoe indicated he may sign because the bill appears to be more specific on the type loan to which it applies than the 1973 bill which he

Coll W. A. Bassel, 579 (528 APPOINTMENTS TROUBLES

Trouble over appointments Governor in the Senate.

First, he had to withdraw the nomination of Bryan oilman Ford Albritton Jr. for the College Coordinating Board in the face of almost certain rejection. Then, some liberal senators opposed con-firmation of Walter G. Sterling, 73 - year - old Houston manufacturer and son of former Gov. Ross Sterling, as a University of Texas regent, after Sterling admitted a brief membership in the John

Birch Society. Meanwhile, Sen. D. Roy Harrington of Port Arthur had threatened rejection of Mrs. W. Smythe Shepherd of Beaumont to the Lamar Uni-

versity board of regents. About the same time, two liberal senators threatened to vote against former Sen. Dorsey Hardeman of San Angelo if he is reappointed to Texas Water Rights Com-

mission. COURTS SPEAK

The State Supreme Court has agreed to hear a \$10.5 million lawsuit over a collision of two horses and severe injury of a 15-year-old

The High Court also ordered a jury trial in a Port Arthur man's suit against a finance company which he claimed put out a false telephone report that his brother was dead.

A five year prison sentence of a 17-year-old boy for theft was reversed by the Court of Criminal Appeals because he was slapped and choked by a policeman before "confess-

#### APPOINTMENTS

Governor Briscoe named board of regents members for three more institutions.

Appointed to the Texas Tech University board were Don R. Workman of Lubbock, Robert Lee Pfluger of San Angelo and Charles G. Scruggs (reappointed) of Dallas, Gen. G. P. Disosway of Dallas was placed on the Midwestern University board. Homer Lee Bryce of Hender-son, Joe Bob Golden Jr. of Jasper and James Irvine Per-kins of Rusk were reappoint-ed at Stephen F. Austin State

In addition, Briscoe reap-pointed Bernard G. Johnson to the Board of Regents for State Senior Colleges. Wilmer Smith of Wilson, Grady C. Clark Jr. of Cor pus Christi and Heino Staf-fel Jr. of Austin were reap-pointed to the State Seed

and Plant Board. J. D. Wendeborn of Laredo and James D. Keister of Am-arillo were reappointed to arillo were reappointed to the Texas Board of Physical Therapy Examiners.

UTILITIES BILLS SLOWED

Three bills to create a state utilities commis regulate rates and services landed in a Senate subcommittee after a hearing which stretched over a week in three separate sessions.

Utilities spokesmen at-tacked the measures as unnecessary, a handicap to their attracting needed capital and no assurance of lower rates. Proponents by the score

urged the proposed new state agency to help them with their rate problems. Indications are a bill will emerge from the Senate Affairs Con State eventually, but Chairman Sen. Bill Moore of Bryan

So did a measure adopting pact, another prohibiting "child sale," and authority for all home rule cities to levy hotel occupancy taxes for tourist-recreational facil-

Comptroller Bob Bullock said an audit uncovered a \$3 million tax liability against a gas production company.

The Senate jurisprudence committee approved a bill providing that losers in libel and slander lawsuits pay rea-sonable attorneys fees and court costs.

## Auctions Show Dip

AUSTIN-Some 482,000 head of cattle and calves were sold through auctions during January, a 28 percent drop below a year ago but a nine percent increase over December.

Agriculture Commissioner John C. White said the figure reflects the general drop in livestock auction sales around the state.

Only hog sales, totaling 46,000 head, remained on the same level as January 1974.

Sheep sales at auction totaled 52,000 compared with 78,000 last January and 53,000 in December. Eleven thousand head of goats sold were 27 percent below last year and eight percent less than the previous month.

January statistics also show more livestock being shipped into Texas than out.

overexpanding their herds in the early 1970's, spurred on by a healthy beef market. But this Cattlemen who hoped to see attle prices improve this year and the worst of the current attlegult behind them in 1976, time they have been hit by several market disruptions vill have to take another look at verall cattle inventories and orget any real improvement for two, possibly three years. Inventories of cattle and

lves now stand at more than 132 million head, roughly 6 illion more than the market was lifting price ceilings on beef. When the price ceiling can profitably handle. This is a 3per cent jump over a year ago, compared with a normal 1 per came off, the price for beef plunged instead of climbing. ent annual inventory increase. Total losses to cattlemen in 1974 opped \$2½ billion, due chiefly

to an oversupply of cattle.

Disaster hit the feedyards because of high grain prices. Most cattlemen now agree that beef sales will not pick up until fter the recession. That could mean as much as two or three more years of heavy losses, over last year. enough to wipe out many cattle

A partial liquidation is the obvious answer to the industry's problems. But obvious answers aren't always the best. There's a little obstacle known as the "profit motive." It doesn't do a bit of good for a cattleman to cut back on a breed herd that took him five years to build and leave himself unable to capitalize on higher beef prices with a good calf crop when the market does improve.

Cattlemen take the blame for

## Grain Producers Meet Monday

# Ag Action Groups Plan Sessions Here

By O.G. NIEMAN Brand Publisher

With grain prices down \$2 a hundred since harvest and greatly reduced markets looming on the horizon, Deaf Smith and area farmers are calling for an "Emergency Action" meeting here Monday night in the Bull Barn. The public meeting is set for 8 p.m.

Those who planned the meeting have called for three suggested courses of action—two of them aimed at curbing production: (1) Cut back planting by at least 20 per cent, (2) Destroy a percentage of the wheat crop by grazing or plow-up, and (3) Stop all meat imports immediately.

First it was the cattle feeding industry

that felt the blow of America's economic

crisis, and now farmers feel that all ag

producers and agri-businessmen are

being threatened—along with the rural

communities which they support.

This is the theme on which NORM

(National Organization of Raw Materials)

has scheduled two public meetings for all area friends of agriculture—the first in

Plainview's Agriculture Center on

Tuesday at 8 p.m., and the second in Hereford's Bull Barn on Thursday, April

Guest speaker will be Arnold Paulson,

president of NORM, who has lectured

extensively in the Panhandle area during

recent years. His topic will be,

"Economic Solutions Are Possible." The

meetings were announced locally by

Harlan VanderZee, executive vice

president of NORM, and directors Gerald McCathern and A.R. Dillard.

3, at 8 p.m.

GERALD McCATHERN, local spokesman, announced the meeting will be sponsored by concerned agricultural producers, agri-businessmen and financial institutions in Deaf Smith, Parmer, Bailey, Lamb, Floyd, Crosby, Swisher, Castro, Sherman and Oldham counties.

The meeting will be open to all Panhandle, South Plains, and New Mexico area farmers, cattlemen, agri-businessmen, bankers and wives, reported McCathern. He added that a number of area farmers had held a preliminary session here last Thursday and decided to call the "emergency agricultural action" meeting.

Grain producers realize, said McCathern, that without the cattle

materials theory," which recognizes that the wealth of a nation is generated by its

raw materials, and that the pricing or

underpricing of those raw materials (of

which agriculture is the largest) will

reflect on the general status of the

Admission to the meeting here next

Thursday night is free. "Many area

residents in past years have heard Mr.

Paulson predict exactly where our

economic situation was headed and in which we now find ourselves,"

VanderZee said this week. "We believe

he can accurately predict where we are

headed if we continue our present

policies, and that he can tell us how to

pull ourselves out of the present crisis."

requested Paulson to return to this area,

added Dillard, and "we hope all friends of agriculture will come and bring their friends and neighbors."

A group of concerned citizens

\*\*\*\*\*\*\*\*

NORM Session Scheduled

feeding industry there will be no big market for grain this fall. "It is estimated that the cattle feeding industry's demand for grain will be off 42 per cent, nationwide, this fall, and we feel it could be as much as 50 per cent. In addition, the USDA estimates that exports will be off 24 per cent."

McCathern emphasized that grain

McCathern emphasized that grain producers have not forgotten the cattlemen. "We don't want them to feel we are trying to price grain above a point they are not able to feed cattle. However, with the high cost of production, the only solution would be for cattle prices to come up in relation to the grain."

AREA GRAIN FARMERS, he adds, will pledge to do everything in their power to stop beef imports and rebuild the domestic market. "It is virtually impossible to rebuild the livestock feeding industry to its original level before the 1975 feed grain crop is harvested," said McCathern.

The suggestion to cut back planting of feed grains by 20 per cent is not a move to drive up prices, claim area farmers, but to meet the reduction in markets.

"We feel like it is economic suicide to

"We feel like it is economic suicide to produce six billion bushels of corn—which is what the USDA wants—when there is a four-billion bushel market," commented McCathern.

The latest estimate on wheat production is for 2.8 billion bushels, and the largest crop ever was less than 2 billion. With the lost export markets, producers fear they will see prices drop down to the loan level unless something is done to curb the tremendous production.

They think the best way to accomplish this is to graze the wheat land. However, pointed out McCathern, some wheat growers do not want to take the chance of investing more money in cattle to put on

## Special Fund Established For Burn Victims

A special fund for Norma and Mary Cantrera, the girls burned severely in a flash fire Friday in Westway, has been set up at both local banks. It is being sponsored by Garrison Seed, where the girls' father Larry Cantrera works as

warehouse manager.

Tommy Stoy of Garrison Seed said that containers were set out in the banks for donations, which will be placed daily into the special fund accounts under the Cantrera name. Donations of money are sought to help defray the medical expenses of the family as well as to cover other necessary expenses.

Norma, 3, was burned on about 65 per cent of her body and was rushed from Deaf Smith General Hospital via the St. Anthony's Hospital in Amarillo to the Shriner's Burn Hospital in Galveston late

Branding
Time
By Speedy Nieman

THAT FELLER on Tierra Blanca Creek says a successful person is one who went ahead and did the things the rest of us never quite got around to.

WHILE "cautious optimism" seems to be the prevailing evaluation of the nation's economic situation, area farmers and cattlemen are concerned that the worst may be still to come for ag producers. An "emergency action meeting" has been slated in Hereford Monday night, with grain producers as the primary movers behind the session. Then, economist Arnold Paulson will return to Hereford Thursday night to discuss ways to solve the economic crisis.

Secretary of the Treasury William Simon told a cattle industry convention in Austin Tuesday that "the nation's economy will definitely be on its way to recovery by the end of the year. We hope he's right and we definitely think Simon was right when he said: "We have to wake up to the fact that we are gradually dismantling the free enterprise system. We must begin to renew the foundations of the free enterprise system."

HATS OFF to the CowBelles for their promotion of American Agriculture Day here Monday. The special events were organized on quick notice in cooperation with Deaf Smith County C of C. The CowBelles have announced plans to make the observance a yearly event and it could be bigger and better next year!

MAYBE we need to inform our city cousins how to bring down the prices of beef and food. All they have to do is strike

( See BRANDING, Page 2A )

Friday night. She has undergone

operations for the burns.

Mary, 10, is in Deaf Smith General
Hospital where she is listed in good

condition.

The accident was investigated Saturday by Fire Marshal Jay Spain who said the children were in the bathroom at the time of the fire. A small container of gasoline was in the room and it apparently spilled onto an open flame

heater or the heater ignited fumes from the gasoline.

Spain speculated that a resulting flash fire spread through the tiny room burning the clothes from the bodies of the two

Damage to the house was light although it appeared the bathroom was engulfed in flames for at least a few seconds. It occurred between 9:15 and 9:30 p.m.

5-Year Plates Installed

A Hereford driver changes out license plates above as the deadline for having the new five year plates on vehicles draws closer and closer. All vehicles must have plates in place by midnight April 1 and the last chance to get them is by 5 p.m. that day at the county tax office in the courthouse. As of presstime Wednesday, 9,858 plates had been issued, about 3,000 behind last year at this time. Large lines have formed at the tax office but bigger ones are expected at the first of next week, Tax assessor-collector Nell Miller said.

## Father, Daughter Killed When Pipe Hits Wire

A Hereford man and his nine-year-old daughter were apparently killed instantly Sunday evening when an irrigation pipe came into contact with an electrical line carrying over 7,000 volts.

Funeral services were conducted Tuesday in the First United Methodist Church for Russell Jack Harrell, 44, and his daughter Roxanne. Burial was in West Park Cemetery.

Both were killed just north of Hereford on a farm Harrell and his brother Billy were farming. Deaf Smith County Sheriff's deputies investigated the incident and speculated that the daughter may have been playing with the 40-foot section of aluminum pipe when it came into contact with the wire. Apparently the father ran to her aid, only to be killed himself.

Gililland-Watson ambulance arrived at the scene followed by a rescue unit of the Hereford Fire Department. Electricity on the line was not cut off until a Public Service representative arrived minutes later. Fire officials said the aluminum pipe had melted where it was touching the ground, completing the electrical circuit.

Harrell, born in Roswell, N.M., came to Hereford in 1970 from Houston. He was a grain truck driver for T.H. Sossaman Trucking Co.

Surviving are the widow, Virginia; two sons, Mike and Billy Bob of the home; four daughters, Gypsy, Suni, Jackie and Joe Ellen, all of here; his mother, Mrs. Ethel Darrick of El Paso; two brothers, Billy of Hereford and Dick of Houston; three sisters, Mrs. Jimmie Willie of Golden, Colo., Mrs. Bobby Pena of Muleshoe and Mrs. Ronnie Sue Vandagriff of El Paso.

Roxanne Harrell was born in Apple Valley, Calif., and was a student in the Hereford school system. Besides her mother, two brothers and four sisters, she is survived also by a grandfather, J.R. Brown of Fort Sumner, N.M.

## Absentee Votes Climb In Races

Interest is building even stronger in the school race as 73 votes have been cast in the absentee voting as of presstime Wednesday. So far, only nine persons have cast absentee votes in the city election.

The school board candidates are gearing up their campaigns as each is running ads and speaking before organizations in attempts to win votes.

The time left for carapaigns is not much as the elections get closer. The candidates and important dates are as follows:

LOCAL CANDIDATES
CITY COMMISSION:
Mayor—Jim Sears
Place 1—Paul Abaios
Place 2—Emory Browniew

SCHOOL BOARD OF TRUSTEES:

## Commissioners Appoint Hospital Board Member, Health Officer

Appointment of three hospital board members and a county health officer, and the approval of a school for DW1 offenders highlighted a regular meeting of the Deaf Smith County Commissioners Court Monday.

Named to two-year terms on the Deaf Smith County Hospital District board of directors were Tommy Carnahan, Isaias Gamez, and Dr. H.A. Cavness. Carnahan was re-appointed to the board while Donna VanderZee and Dr. Hugh McCrary asked to be considered for reappointment.

Gamez is a longtime farmer in the Hereford area. Dr. Cavness has been active in community affairs and will soon step down from his position as a city commissioner. Re-appointed as county health officer was Dr. Duffy McBrayer.

The course for driving-while -intoxicated violators will be offered here free by Amarillo College. Two officials of the college, along with the adult probation officer of Potter County, appeared at the commissioners' meeting to explain the school. The college expects to receive a grant to offer the classes on a temporary basis in about four Panhandle locations.

The course is entitled "Safe Driving Practices", and the probation for DWI offenders. Charlie Gaither, college official, showed a film to the commissioners which outlined the course and its educational benefits.

After receiving favorable comments from the four commissioners, County Judge Sam Morgan told the officials that the county would like to have the school here and he would use it as a part of probation for some DWI offenders.

Commissiones briefly discussed the possibility of paving repairs around the Bull Barn and decided to draw up specifications for bids on the project. Two alternatives will probably be listed on the bids one for seal coating and one for hot mix paving.

A committee appeared at the meeting to request the use of the Bull Barn for a

Mexican Fiesta Celebration Sept. 12-13.
Commissioners asked the group to secure more details and come back at the next meeting.

meeting.

Criminal District Atty. Andy Shuval appeared at the meeting to request the court consider a substantial raise for his secretary. He pointed out that the pay schedule for a legal secretary is higher than that of a general secretary or clerk. The court denied the request, and it was pointed out the commissioners will study all pay schedules in the fall.

## Auctioneers Learn By Going to School

He's a fast talker and has a quick eye for quick subden moves crowd, but a professional auctioneer isn't

Where does the talent and knowledge ate for the alertness and quick chant that is used so easily by

Well like in any other line of work it comes from long hours of practice and a bit of achooling. Although few in number, schools do exist for suctioneers and one ecially has been teaching aspiring neers for over 41 years.

THE REISCH WORLD Wide College of Auctioneering, probably considered the Harvard of such schools, was the recent training ground for two Hereford men who now proudly proclaim their ability. The college, located in Mason City, Iowa, teaches all lines of auctioneering in a two-week course of concentrated lecture and practice.

Attending one of these recent sessions, held at the first of March were Donnie Fangman and Wayne Walker. They each now carry the title of Colonel, which goes along with the diploma after tion of the course.

They were among 128 students attending the college, which qualifies graduates to preside at auction sales, from cattle to real estate. The tuition for the two weeks is \$395 including the cost of books, room and board and a diploma.

THE TURMS at the college are held four times a year. They begin on the first Monday of December and March for the winter and spring terms and on the first Monday of August and the second

their ability in local suctions, which in this area primarily involve livestock and farm equipment sales. Each is presently self employed in various interests but heir central concern is that of

The course of study involves initially a home learning experience with a ten book home study auction library furnished by the school. It includes records and separate books on the different auctions. opening statements and sayings to use during the sales to prompt higher bids.

SOME OF THE SALES include farm. sents, furniture, auto, purebred implements, furniture, auto, pure animals, real estate, antiques, gro stock, jewelry, machinery, vegetable and fruits, poultry and produce.

jokes to break up the crowd tension when the bidding gets heavy and furious.

The school was founded in 1933 by Col. Joe Reisch and it has since graduated over 15,000 auctioneers in the U.S. and Canada. The owners now are Col. Ken Scott and Col. Gordon E. Taylor, each graduates of the college. Taylor is the principal instructor although faculty membes are from all the specialty ranks of auctioneering.

Fangman, a 1969 graduate of Hereford High School, lives here with his wife Karen and two children, Colby and

Also a graduate of HHS in 1972, Walker and his wife Vicki have a

## Three Men Arrested Here Sunday On Drug Charges

Three out-of-town men were arrested on charges of possession of marijuana among other charges here Sunday evening when officers stopped their vehicle.

Troy Arthur Andrews, 20, of Canadian was charged with possession of marijuans and driving while intoxicated. Kenneth O. Morris, 22, of Clovis, was arrested for possession of marijuana and drunk in public. Jimmy Dean Besire, 21, of Canadian was arrested for possession of marijuana and drunk in publ

Officers received a complaint call on the vehicle driven by the men and stopped the truck near the A&W Drive-in. Upon investigation of the vehicle, a baggie of marijuana weighing about 18 grams was found along with a package of cigarette papers.

A case of vandalism at Hereford High School is under investigation by officers. Sometime during the night Saturday, vandals broke into the school, apparently through a window on the north side of the vocational building. Several teacher's desks were searched with papers scattered about. Several lockers were also gone through, with papers scattered on two floors of the building. Paint supplies used by the cheerleaders were scattered and broken about the building and a chemical fire extinguisher was emptied over the rubble.

A window estimated worth \$35 was broken sometime Sunday night at the Hereford Community Center. Rocks were apparently thrown at the windows by

Offices arrested three illegal aliens in two separate cases over the weekend. One was also charged with drunk in

A car-pedestrian accident at 6:03 p.m. Sunday resulted in only minor injuries to

a young girl. Grace G. Martinez apparently rushed into the path of a car driven by Steven Lynn Brashear of 143 Juniper. Although the vehicle hit the child on the upper left leg, she was not injured seriously. The accident occurred in the 700 block of Knight. Cars parked along the street were blamed for blocking the view of both driver and pedestrian.

An accident occurred in the alley of the 200 block of Main at 12:36 p.m. Saturday. A car driven by Margaret Guinn Romero of Summerfield was northbound in the alley and a vehicle driven by Carole Jean Vogel of 305 Stadium Drive was backing from behind a building when the two vehicles collided.

Lyle P. Taggart of 201 Fir was the driver of a vehicle that struck a parked car in the 200 block of centre at about 1:34 p.m. Saturday. Taggart had turned the corner from Plains onto Centre headed north when his attention was diverted and he struck the other automobile. It belonged to Allan Louis Wagner of 603

A collision of two vehicles occurred in the parking lot of Ideal Food Store 3:01 p.m. Saturday. Drivers involved were Rosene Lance Dawson of 302 Avenue J and Clarkie Adams Cook of 237 Fir.

Essie Lee Edwards of 810 Brevard was the driver of a vehicle that struck a parked car belonging to a Sealy woman at 5 p .m. Monday. The Edwards vehicle was backing out of a driveway when it and a vehicle owned by Mary Ruth Brown of Sealy, Texas collided.

Two cars backing from opposite sides of the street collided with one another in the 300 block of Sampson Monday. Shari Lynn Hughes of 335 Stadium was the driver of one car, Mary Malone Gamel of Amarillo was the driver of the other.

Yocum Decorators Opens

Miss Teen Hereford Donna Kendall, left, and Miss Hereford Monica Herring, middle, brighten the grand official opening of Yocum Decorators Saturday as they serve coffee to Mrs. Earl Yocum. The shop, located in Downtown Hereford, has been serving the community for several weeks. The opening was sponsored by the Deaf Smith County Chamber of Commerce.

Graduate Auctioneers

Wayne Walker, left, and Donnie Fangman display their large diploma received after completing the two week auctioneer course at Reisch College in Mason, lowa.

## Ministers Join In Holy Week Observance

The Hereford Ministerial Alliance has been conducting noon services each day this week in observance of Holy Week. The services held by area ministers consist of the theme "From Bethany to Olivet," dealing with the events of the life of Jesus on each day of His last week.

The services, assisted by lay persons, last from noon to 12:25 p.m. through Friday at the First United Methodis.

Church. They began Monday.

The service today is "The Day of Fellowship," conducted by Rev. Jose Gilligan S.A., pastor of the San Jose Catholic Church.

The concluding service Friday will be, "The Day of Crucifixion," conducted by Rev. Roger Knapp, pastor of the Presbyterian Church.

Rev. Doug Manning, pastor of the First Baptist Church held the service Monday. It was "The Day of Authority." The Tuesday service, "The Day of Teaching" was conducted by Rev. Gene Brink, pastor of the First Christian Church. Dr. Jordan Grooms, First United Methodist Church pastbr, conducted the Wednesday service "The Day of

Branding ...

for lower wages.

THE PROPOSED legislation which wouldn't change Texas' 55 mph speed limit but would "take the danger out of being close" was a tough problem for many members of the Texas House as it passed by a 70-69 vote. A Senate-House conference committee is currently working on a compromise for the bill.

Some felt it might endanger the state's eligibility to participate in federal highway funds, and many felt that a majority of Texans favor the bill. While there is no doubt the speed limit cut down on traffic deaths and saved gasoline, many people protested the manner in which speeding violations increased insurance premiums. Providing that a 55-70 violation could not be charged against the driver's record for increase of insurance premiums or suspension of license sounds like a sensible action to us.

## **Agriculture Day Winners Named** Garza, 2nd place; and Kevin Foster, 3rd

Funeral services for two eight-year-

aid boys will be held at 3 p.m. today in

the Frio Raptist Chlerch following their drowning deaths Monday night. Gary Paul Hathaway and Thomas

Michael Williams, who both attended

Hereford schools and were cousins, were

found in an irrigation tailwater tank at about 8:45 a.m. Tuesday. The incident

occurred on a ranch known as the

"Crumm Place" about eight miles

Dimmitt fire fighter David Spain said

a search began for the boys about 10 p.m.

Monday night after they failed to return to the Hathaway residence. Williams was in Dimmitt visiting his cousin during the spring break in classes. Williams was a

third grade student at Shirley Elementary

School. Hathaway was in the second grade at Northwest Elementary School.

Spain said the search party covered a 10-mile area around the Hathaway

mortheast of Dimmitt.

Agriculture was in the limelight Monday as 44 persons went home with 85 pounds of meat won in a drawing to commemorate American Agriculture Day. It was sponsored by the Hereford

The drawing was held along with some 13 displays that were set up by area businesses in the Sugarland Mall. They featured farm and ranch related equipment and production. The beef give-away was especially organized to-

Ag Meeting ---

### from Page 1

the wheat acreage. Therefore, there is talk of plowing up some of the wheat. This has already been done by some producers in Oklahoma and Kansas, said McCathern.

"THE INFLATION RATE in agriculture on production costs has been something like 30 to 40 per cent. compared to about 10 per cent for other industries. Things are not like they were 10 years ago, or even two years ago. A farmer who spent \$7,500 on fertilizer in 1973 would spend \$22,000 on the same amount this year," claimed McCathern.

He compares the ag situation to the problems of the oil industry several years back. If the farmers can't make enough to produce, they'll be forced out of business and this country will be at the mercy of those countries who can sell us feed and cattle, said McCathern.

### from Page 1

. . . . . MAYBE I shouldn't toot my own horn, but I will ring my own bell. The Brand was presented the coveted "School Bell Award" last week in Houston at the Texas State Teachers Association convention. It's nice to be recognized for something you should be doing anyway. We enjoyed a quick trip to Houston to pick up the award, which is the third such nonor for The Brand. It's a tribute to our news staff and to the local TSTA unit in preparing the nomination!

FREEDOM of speech was arranged by ancestors who couldn't possibly have had an idea of what all was going to besaid.

. . . . .

promote the beef industry which has fallen into hard times during the past

Other activities held included a poster contest among elementary school children and interviews on local radio and Amarillo television stations. Loyd W. Vaughn, head of the FmHA Farm Family of the Year, 1974, conducted the drawing and was interviewed.

Joyce Kaul, CowBelles beef promotion chairman, said next year the ag day celebration would be planned further in advance and probably feature expanded activities. This year the meat was furnished by the Caviness Packing Co., the Farm Bureau, and the Federal Credit Union. The Hereford Meat Market

provided the wrapping and packaging.

Winners of the poster contest competed in the 1st-3rd grade and 4th-6th grade categories with the first place in each receiving \$5, the second place, \$3, and third place, \$2.

The contest winners are as follows: 1st-3rd grade-Jean Sherman and Sheri Templeton, tie for 1st place. 4th-6th grade—Cynthia Streun, 1st place; Robert residence Monday night, then resumed the search at daybreak Tuesday. The bodies of the boys were found in the task about one-fourth mile from the home by two members of the search party.

The boys allegedly had been playing on a large pipe leading to the center of the tank. The bodies were found about six foot from shown. At least one of the large page is a large pipe leading to the center of the tank. The bodies were found about six foot from shown. At least one of the large page is the large page in the large

feet from shore. At least one of the boys could swim, Spain said, but cold water probably hampered their efforts to stay

Michael Williams is survived by his parents, Mrs. Jeffries of Hereford and Thomas Williams of Levelland; a sister, Susan Williams of Hereford; and grandparents, Mrs. Naomi Williams and Loyd Glidewell of Dimmitt.

Paul Hathaway is survived by his arents, Mr. and Mrs. Gary Hathaway of nmitt; a sister, Debbie Louise of the home; and grandparents, Mr. and Mrs. Ed Hathaway and Loyd Glidewell, all of

Seven persons were given five pound packages of ground beef and 37 more

were given two ribeye steaks each. The ground beef winners were Mrs. Rex Lee, Gelene Hunter of Dimmitt, Mrs. J.C. Gandy, Lewis Larrymore, Frances Gerina and Mrs. James Gamez.

Winning the steaks were Betty Henson, Beth Wyly of Vega, Mark Grimsley, Mrs. Buster Miller, Phillip Johnson of Friona, J.C. McCracken, Rose Valdez, Mrs. Guy Lawrence, Petta Cluck of Dimmitt, Tony Gorman, Roger Huber. Floyd Cole, Virginia Skaggs and Paula

Also Mrs. Jack White, Mrs. E.K. Brink, Cindy Hairgrove, Mrs. L.F. Shannon, Pat Riggin, May Jetton, Jimmie Victor, Joan Hopper, Mon McDonald, Vicki Davis, Gail Johnson, Cari Hoffman, Mrs. Edwin Bridges, Cindy Hoffman, Billie Cluck of Dime Joe White, Mrs. Edwin Schilling, Maxine Slaughter of Dimmitt, Sherry Hoover, Rose Valdez, Mrs. Edwin Owens, Sam. Nunley and Glen Burrola.

#### **Brand Is Bell Ringer**

The Brand was presented the coveted "School Bell Award" during the Texas State Teachers Association convention in Houston last week. The award was based on "continuous coverage" of school news and activities, Carolyn Waters, president of the local TSTA unit, is shown with Brand Publisher O.G. Nieman who holds the authentic brass bell and plaque. The local TSTA unit submitted the nomination for the award.

## Court Case Dispositions Listed

County Judge Sam Morgan dismissed 17 cases and disposed of another 27 cases during court action the past two weeks.

The 69th Judicial District Court met Wednesday but verdicts were not available as of presstime. The Justice of the Peace court handled six major cases in addition to other misdemeanor cases.

JP Glen Nelson handed out three sentences and received another set of three cases which were filed. Two were filed for thefts and another for felony driving while intoxicated (DWI).

The other cases were for passing of bad checks. Sammy Lee Ogan and Jovita P. Salazar were fined \$25 plus court costs and restitution and Ruby M. Hale was fined \$50 plus court costs and restitution.

The DWI's topped the county court cases as has been the case

for the past few months. The dismissed cases were thrown out of court mostly because the cases were old. Other reasons for dismissal can include lack of evidence, at

## Program Recalls Dolly

Bicentennial prompted a biographical report about Dolly Madison given for Lone Star Study Club members Tuesday afternoon in the home of Mrs.

John Jacobsen Jr. Mrs. J.E. Shirkey delivered the program concerning the "Cinderella of the White House." Mrs. Madison was official White House hostess for 16 years during presidential terms of Thomas Jefferson and her husband, James Madison. Stemming from a strict Quaker background, Dolly was the daughter of John and Molly Payne. She married John Todd as a teenager and had two sons, however the youngest child and her husband died early in the

The young widow fell in love with Aaron Burr, who was not interested in marriage at the time, so she turned to Senator James Madison and the couple

At Dolly's urging, Madison eluctantly accepted President

Jefferson's offer to serve as Secretary of State. Impressed Madison's charm and grace, Jefferson asked her to be official hostess at all White House social affairs. She acquiesced and served in that capacity for Jefferson and as First Lady after her husband's election to

Her past ties with Burr, a controversial figure, were a slight detriment to Madison's political career, Mrs. Shirkey

Mrs. Madison's love for beautiful possessions saved many White House treasures, including the portrait of George Washington, from fire. During Brittish siege of the mansion the First Lady stayed behind to pack several of the paintings and silver pieces. Thus, these antiques were saved before they could be consumed in the flames, which destroyed most of the White House.

Her last appearance at the White House in an official capacity occurred 50 years after the Jefferson administration. The famed hostess, at age of 88, served in the receiving line with the fire station was particularly President James K. Polk.

During a brief business as they received replica fire organization at 364-6171.

#### **BB-BS** Group Tours Fire Station, Picnic

Members of Big Brothers-Big Sisters of Hereford and their young friends enjoyed an outing Saturday of a trip to the Hereford Fire Department and a picnic in the park.

According to Jo Anne Dwyer, director of the local program, 16 Big Brothers-Little Brothers and Big Sisters-Little Sisters went on the outing. The group were taken on a tour of the Hereford Fire Department by Volunteer Fire Fighter and Deaf Smith County Sheriff's deputy Reuben McGilvary.

interesting for the youngsters

fighter helmets and checklists for hazards in their homes, as well as a chance to see the fire fighting equipment at first McGilvary instructed the tour

in some basic do's and don'ts about fires and fire prevention. The children were told to tell their parents when they got home to map out locations of windows and practice fire drills in case of a blaze.

Mrs. Dwyer pointed out that there is still a long waiting list for children in need of Big Brothers or Big Sisters. Persons wishing to volunteer their time may contact the local

manager of plant services for the Borger Phillips facilities. It was explained that he was not related to the company owners.

The Ekofish operation is a giant undertaking which has cost about \$2.43 billion for drilling operations in the North Sea off the coast of Norway. Today the seven fields have established by Phillips and crude oil is being pumped out at a rate of about 135,000 barrels a

day. It is principally for the European market.

Pipelines are being built directly from the sea platforms to England and Germany and eventually oil is being shipped to the U.S.

A literal city at sea, the operations in the North Sea consist of living quarters, the drilling platforms, the separation and processing plants and a huge 1 million barrel capacity oil storage tank. The tank is featured in the Phillips television ad-

The project began through the cooperation of four foreign governments for rights to drill off their shores. Phillips is footing the complete ex-ploration and drilling bill. At one point though in 1968, the project almost halted as the first hole drilled came up dry.

The Borger plant mana ointed out one situation which might affect future oil development and refinement in Texas. That is a proposed state legislative bill to levy a production tax.

"If this bill is allowed to pass, then oil companies will not expand present facilities within the state nor would any new ones be built," Phillips said. The bill does not allow costs to be passed onto consumers and so the companies would have to absorb the costs and decrease funds available for exploration.

"I encourage all to write legislators to have the legislation defeated," he said

"Let me tell you one thing before you go any further,"

"What's that?" he asked. "Don't go any further,"

## Sometimes Lasso plus Bladex\* makes as much sense as Lasso plus atrazine.

Especially if your corn will be used for silage or you're planning to follow corn with another crop.

But no matter if your corn farming operation calls for Bladex or atrazine to be tank mixed with Lasso, Lasso is the right herbicide to start with.

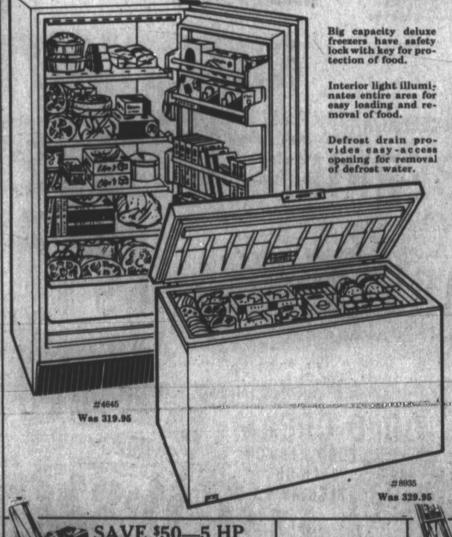

Corn farmers in this part of Eastern Louisiana have found that a Lasso based tank-mix controls pigweed and most annual grasses. Even reduces competition from some of the toughest weed problems your corn has to face.

Like cocklebur, seedling Johnsongrass and annual morningglory. Something else makes Lasso the corn herbicide to start with-it has absolutely no carryover. When you use it in a Lasso plus Atrazine tankmix, you minimize the possibility of carryover damage, because you've reduced the atrazine rate. And that makes it easier for you to follow corn with other crops.

So no matter what your corn herbicide needs are, get started right with Lasso. It's the best herbicide to start with.

## Group To Stage 'Fiddler'

"Fiddler on the Roof" will be presented by the HHS Choral department on Friday and Saturday, May 16 and 17, at the Hereford High School

Casting for the musical is expected to begin after the Easter Holidays. The

musical which is a two act play takes the viewer back to the era of the Russian Reveloution, in a small village in Russia, called Anatevka. Tevye, the main character of the play, faces the many problems experienced by many Jewish families during that era.

Although the musical is considered by many as a serious play, comedy sections can be found all throughout the.

Among some of the songs that will be sung are 'If I Were a Rich Man," "Sunrise, Sunset," "Far From the Home I Love" and "Tradition."

Hess Dance Studios of Amarillo will be in charge of the choreography for the Rusian and Jewish dances.

General Director for the play will be Don Moore while Nick Nixon will be conducting the Hereford High School Or-

Take That!

Herd first baseman Mike Foster tears into a pitch in the second inning of the first game in the doubleheader against Plainview. The Herd lost both games 15-3 and 8-6 and have a tough one

ahead—a district twinbill against the Monterey Plainsmen in Lubbock Tuesday. Monterey is the defending state champion.

## LOSES TW

Hereford dropped three straight games Saturday and Monday as they fell to nonconference foes Canyon 13-10 and lost both ends of a district twinbill to Plainview 15-3 and 8-

The losses move the Herd season mark to 6-7 while giving the Herd an 0-2 start in the district race.

The district opener, the first game of the doubleheader against Plainview, began gloomily as the Bulldogs scored one run in the first inning, five in the second, five in the fourth and four in the fifth. A late rally by the Herd in the fifth inning brought the Herd three runs, but it was too little too late as Planview claimed the game on the ten-run lead rule after the fifth inning.

Ray Martinez was tagged with the loss for the Herd. He was relieved in the fifth by Vance Hennington. Plainview N. Hwy 385 garnered 15 runs on 11 hits with no errors. Freddy Longoria was the Hereford got ten runs on 12 hits winner for the Bulldogs, giving with three errors. Canyon collected 13 runs on 13 hits with up three runs on three hits. Hereford committed six errors four errors. the contest. Mike Foster, Harvey Torres and Mike

#### Think radial...and Look to the Leader MICHELIN

Before radial tires were even a glimmer in the eyes of other manufacturers, Michelin 'X' steel-belted radials were proving themselves in millions of miles of actual road use all over the world. Now other tire manufacturers make radials. But how can they catch up with Michelin's 25 years of radial experience? Maybe they can't.

Michelin X'-first in steel-belted radials.

The most experienced radials on the road.

BETTER GAS MILEAGE Think radial ... and look to the leader MICHELIN

> Michelin steel-belted radials roll more easily than conventional bias ply tires. You go further for longer and use less gas on the way than with conventional tires. The steel-belted radial construction of the Michelin reduces rolling resistance, making it easier for your car's engine to push you along. Less power is needed so less gas is used. You get measurable gas savings.

## FHA Week To Be Observed

The Texas Association of Future Homemakers of. America will observe FHA-HERO Week April 6-12 with the

theme "Reach out and touch." In Texas there are 72,000 members in 2,050 chapters who will celebrate the week with activities which show the concern these young people feel for others. The young men and women who are members of oday's FHA chapters are interested in projects which expand their knowledge and skills in all aspects of home and family living and in home

economics occupational areas. Nationwide in membership and effort, Future Homemakers of America is cosponsored by the U.S. Office of Education through the Division of Vocational and Technical Education and the American Home Economics Association. Nation Headquarters are

State Headquarters are located at the Texas Education Agency, Austin. Mrs. Elizabeth Smith is the State Advisor of the Texas Association.

High school homemaking teachers and members of the state home economics education staff serve as advisors to chapter, state and national youth officers, giving guidance and counseling to the program.

The annual state meeting of the Texas Association will be April 17-18 in the Convention Center, San Antionio. More than 5,000 members and advisors are expected to attend.

The theme of the meeting is "Pass It On-Reach Out and Touch." Activities are planned to provide delegates further information and ideas for planning worthwile chapter programs. The program is planned and carried out by State and Area officers and the orgainzation.

Keynote speaker for the meeting will be Dr. William Purkey; popular speaker and authour from the University of Florida. Dr. Purkey's talk "Pass It On-Dial Direct" will treat person responsibility and ability in a world that sometimes

forgets the person.
Other highlights of the meeting include a talk by wellknown humorist and salesman of the good life, Jerry Clower. Non-members who have contributed their time and effort to the organization will be awarded honorary mem-

Scholarships will be awarded to outstanding members of the organization and there will be a breakfast honoring members who have gained significant achievement. Installation of eleven newly elected officers will climax the meeting.

#### April Wedding Slated

Mr. and Mrs. Alfonso Martinez of Hereford announce the future marriage of their daughter, Llolanda, to Ignacio Padillo, son of Mrs. Connie Padillo of 224 Ave C. The couple plan to exchange vows April 19 in St. Anthony's Catholic Church. Miss Martinez, who attended schools at Morton, is employed at Hereford Cartage. Her fiance attended local schools and is selfemployed.

#### L'Allegra Club Welcomes Guests

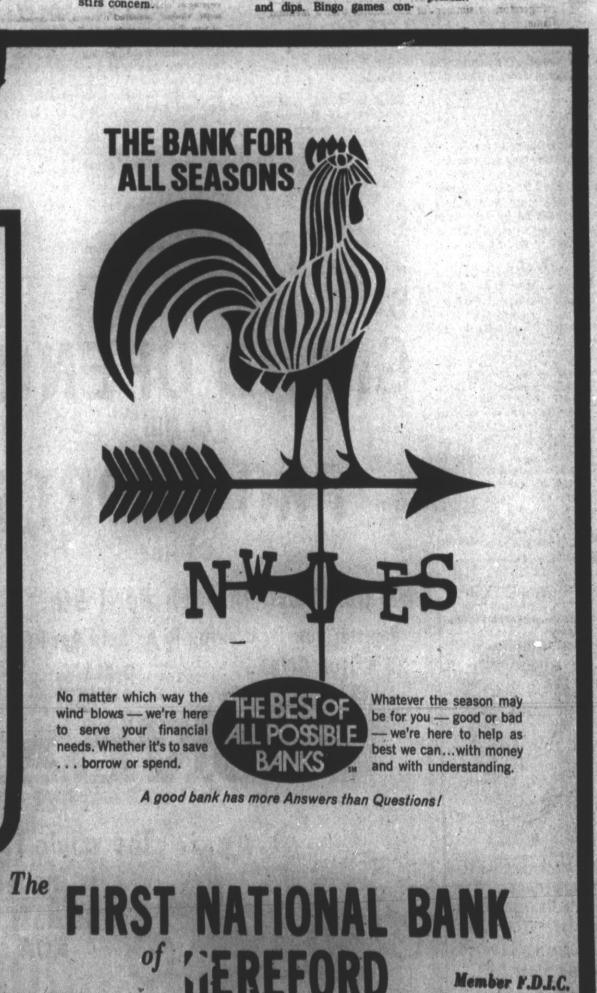

A picnic menu, traditional games and a sing-along were highlights of guest day last week for L'Allegra Study Club at Community Center.

Old-fashioned songs led by Mrs. Wesley Gulley and Mrs. Gerald Parker to launch the informal program. Familiar games, including relay races and hop scotch, were played before a lunch of hot dogs, chips cluded the entertainment.

Recognized guests included Mmes. Ken Walser, Edward Allison, A.T. Griffin, Tom LeGate and Bob Reinaer. Hostesses were Mmes. Eddie Reinauer Jr., Alex Schroeter, Dwaine Walker, Dennis Lomas and Tommy Carnahan.

Eleven members were present.

## SUSAN DUFF MASTRO

HOME-MADE DIETER'S SOUP

For dieters, anytime is a good time for soup. And aren't homemade soups really the best tasting? Even the most reluctant cooks can enjoy boiling up a big soup pot and I chose the following recipes because they're my favorites, because they're fun to make and because they're low in calories, I think you will like

The first recipe is so chock full of satisfying nutrition and so very filling and tasty that it makes a lunch or a light supper all by itself. Try it with a fresh orange or apple for dessert - I'm sure you'll like it.

CALCUTTA CURRIED SOUP

Place in a large pot over high heat: a two-pound quartered chicken (fryer), one 16-ounce can of tomatoes, one small onion (peeled and coarsely chopped), one tart apple (peeled, cored and coarsely chopped), one-eighth teaspoon of ground mace, two teaspoons salt, and one-half teaspoon of curry powder. When mixture comes to a boil, reduce, heat and simmer for 45 minutes or until chicken is fork tender. Remove from heat, take out chicken pieces, and chill broth overnight in refrigerator, allowing fat to harden on the surface. While still warm, remove skin and bones from chicken and cut into smaller pieces. Chill chicken pieces. About a half hour before ready to serve, skim fat from broth, Add chicken pieces and one-half cup thinly sliced peeled carrot and one-half cup chopped green pepper. Cover pot and simmer for 15 minutes before serving. It has a deliciously unusual taste!

This next recipe is the dieter's answer to a craving for a thick creamy soup. This one is full of fresh mushrooms and better than any canned cream of mushroom soup I've ever had,

ALICE'S WONDERLAND SOUP

(Makes about 4 cups; 53 calories a cup.) In a saucepan, combine one-half pound fresh mushrooms finely chopped, three cups canned chicken broth (dilute to make three cups if broth is condensed, or make your own chicken broth if you prefer), one cup skimmed milk, one tablespoon minced onion, one-half teaspoon salt and one-eighth teaspoon pepper. Bring mixture to boil over high heat, Reduce flame and cook about 15 minutes or until mushrooms are tender. You won't believe that such a succulently tasty soup has only 53 calories in each cup. Try it for lunch with a small mound of cottage cheese on lettuce and a few slices of melba toast, You'll almost forget that you're really on a diet.

The third recipe is a little different from the ordinary soups and may be served hot or cold. GAUCHO GAZPACHO

(Serves 6 at 50 calories per serving.) Beat with an electric beater on high speed until smooth, or puree in a blender the following ingredients: 2½ cups canned peeled tomatoes, 1/3 cup wine vinegar, 1 tablespoon olive oil, 1 chopped onion, 2 chopped green peppers, 2 cloves garlic pressed through a garlic press, 1 tablespoon Worcestershire sauce, 2 teaspoons mild curry powder, salt and pepper. May be served hot or cold. Either chill for 2 hours in the refrigerator, or simmer for 20 minutes over a medium

#### Couple To Marry

Miss Helen Lucero, daughter of Mr. and Mrs. Rumaldo Lucero, and Arthur Castillo, son of Mr. and Mrs. Ramon Castillo, will marry at 2 p.m. April 5 in Thompson Memorial Baptist Mission. Friends and relatives of the couple are invited to attend. The bride-elect is employed by Southwestern Bell Telephone Co. at Amarillo and is a 1972 Hereford High School graduate.

The prospectice bridegrom is with Aircraftsman Incorporated, Amarillo He is a graduate of Hereford High School and Northrop Institute of Technology at Inglewood, Calif.

### Old West On Display At Fair

DALLAS--Browse through the Consumer Services exhibit at the State Fair, Oct. 4-20, and for a moment become a part of Texas at the turn of the century.

The antique post office front from Hico, along with part of the old Lometa Bank, will be on display, capturing the flavor of a by-gone era at the exhibit in the Texas Department of Agriculture

Food and Fiber Pavilion.

Post office boxes which once stood in the Waxahachie Post Office will contain material explaining the varied functions of the Consumer Services division.

Visitors to the exhibit will also be treated to an accourate reading of their weight, courtesy of the weights and measures section according to Agriculture Commissioner John C. White.

Department of Agriculture John C. White.

**FASHION SEWING WITH QUILTED FABRIC** Quilting adds new dimension and visual interest to the plainest fabric and extra fascination to prints, when part of the print is outlined. It also provides extra warmth, no small consideration these days,

To get just the right thickness of fabric, which is becoming to your size or build, prepare your own quilted fabric. I find that many of the quilted fabrics sold by the yard look too much like loungewear to be used for a small Chanel-style jacket such as the one illustrated. Also, the stitches in many ready-made quilted fabrics are too long and loose and the backing often sleazy.

As the face for quilting, select a tightly woven fabric such as chambray or a tightly knit fabric like tricot

jersey. A lightweight padding such as Thermolam is the next layer. The backing should be a lightweight woven fabric compatible with the woven face fabric, or a light weight

knit for a tricot face fabrie, Quilt all the fabric that will be needed before cutting out your pattern pieces. After observing the layout of your pattern pieces, you can quilt sections; not long lengths of fabric,

Pin the three layers - face, padding and backing - together. Hand baste along the four sides and at six-inch intervals down the

lengthwise grain.
Use thread that will be compatible with the fabric, If the face fabric is polyester and cotton chambray, use polyester and cotton thread. If the face fabric is nylon tricot, use a spun polyester thread. You may like a matching color thread or one that contrasts with the fabric.

Before starting a large quilted section, practice on a

12-inch square in order to get the right tension, pressure and stitch length. The thicker the fabric, the longer the

With chalk, mark one horizontal and one vertical line, which intersect in the center of the section of fabric to be quilted. Start quilting at the center and stitching to the edge of the fabric. Cut and tie threads, Go back to the edge of the fabric. Cut and the threads, Go back to the center and repeat the procedure along the other three lines. Using a quilting attachment on the sewing machine, set the space guide for the width you want between rows of stitching, Make horizontal and vertical rows of stitchings thisgonal lines for a diamond pattern, rows of stitch

or follow curved lines of a print Stitch all rows from top to bottom in one direction Stitch all vertical rows from one side to the other, all in the same direction. Baste around curved designs before-

'To cut out your pattern pieces after quilting, fold the fabric with right sides together. Pin the pattern section to the top layer only. Slip the scissors between the two layers of fabric and cut the top layer. Use this as a guide for the second piece. It is not necessary to repin.

Front edges, neck edge, sleeves and lower edge of the jacket may be finished with fold-over tape or braid. Finish the edges of seam allowances by pinking and stitching; with zigzag stitching on the edge, or with bias

READER SERVICE: What is your sewing or fitting problem? Write Fannie Gleeson in care of this newspaper. The solution will be written up in the column and may help others with a similar problem.

#### **TOPS Officers**

#### Delegates Return

Highlights of the recent Texas Grand Lodge and Rebekah Assembly at Galveston were described by local delegates to Hereford Rebekah Lodge Tuesday evening in IOOF Hall.

Mr. and Mrs. Merl Bridges attended the annual convention and witnessed ceremonies bestowing degrees of chivalry to several state Rebekahs. Mrs. Lois Bishop of Plainview was one of those honored. She is the sister-in-law of E.E. Bishop of Hereford Oddfellow Lodge.

The visitation committee reported calls on Mrs. Vera Pickens and Mrs. Thelma Chisum, Rebekah members who reside at King's Manor. It was also announced that 76 ill individuals had been visited and nine cards sent.

Mrs. Bridges was hostess to 17 members present.

A recent report revealed 1,241 Spanished-American War veterans, ranging in ages from 87 to 104, were on Veterans Administration compensation and pension rolls. The average age was 95, with 36 veterans 100 years or older.

Miss Barton, daughter of Mr. and Mrs. Harold Barton 607 Ave. J., is employed as a typesetter at The Hereford Brand under supervision of publisher O.G. Nieman. After graduation, she plans to continue working.

## Stage Band To Attend Clinic

Amarillo Junior College for a stage band clinic April 5.

Dr. Rich Matteson from North Texas State University will conduct the clinic

The program being presented will include "Willow Gold" and 'Dark Orchid' by Sammy

High school stage bands in

The Hereford High School the Panhandle include Stage Band will be traveling to Hereford, Palo Duro and Amarillo High School. Junior Colleges invited to the clinic included Amarillo,

Clarendon and South Plains. The clinic for every band will consit of a concert by each band, and a session with Dr. Matteson. Other stage bands at the clinic will be allowed to listen to each group's concert.

BY SALLY AND

BUYING A USED CAR - II

Experts generally agree that you're safer buying a used car from a new car dealer than from any other source. Most new car dealers have a used car lot where they sell their customers' trade-ins, Pick out a dealer that has big and well-equipped service facilities where he can recondition each car he takes in on a trade, If you don't know the dealer, you can check his reputation with the local Better Business Bureau, or your local consumer

#### SAFEWAY WILL BE **CLOSED ALL DAY EASTER SUNDAY**

So that our employees may have the opportunity to observe Easter with their families. your Safeway store will not be open for business next Sunday. Your cooperation in planning to complete your food shopping ahead of Easter will be most appreciated. We hope that your family, too, enjoys a happy holiday.

## Students Stricken With Rabies

Late last month, four A&M University students doing field work in the mountains of bitten by a rabid animal.

The incident touched off a crisis which, in the end, gave gratifying proof that the assive bureaucracy of the United States government can respond to American citizens in immediate need.

By the time my office was called in on the case, precious hours had already elapsed from the time the students were bitten. The students had somehow got word of their plight to the Medical Center in Brownsville. And, not knowing exactly where to turn for help, the doctors at the Center called in the Coast Guard in Texas.

However, the mountains of Northern Mexico in the vincinity of San Carlos are hardly accesibly by common means Despite the quickness of their response, Guardsmen soon

Dr. Milton C. Adams **OPTOMETRIST** 335 MILES Phone 364-2255 OFFICE HOURS

Mon.-Fri.- 8:30 to 5:00

discovered that there was only Federal Aviation Adone way the students would be ministration. In order to reone way the students would be able to be reached

That one way was by air-and

then, only by helicopter.
This is when the authorities in Texas turned to me. By this time they were desperate. Unless the anti-rabies treatment was begun within a matter of hours, there was no medical way the students could be

WE TRIED THE State Department first and hit a blank wall. Turning to the Defense Department, we found officials there impressed enough with the urgency of the situation to give us their total cooperation.

There are only a handful of helicopters large enough and with enough fuel capacity to make a round-trip, non-stop flight to transport the students as a group to the Brownsville Medical Center. Luckily, one such helicopter was located in Corpus Christi.

The problem then became one of getting permission from the Mexican government to enter their air space. We wnet to the Mexican embassy here and called our own embassy in their country. Together with the cooperation of top officials in

enter American air space coming back from Mexico, we eded their approval. And, we

Throughout all this, we were in constant contact with the doctors in Brownsville, making sure that we were still within the all-too-brief time limit they had specified. Four incredibly hectic hours had elapsed from the initial desperate call to my office. But, we had made it.

The helicopter was in the air and the students would soon be under the care of our physicians

MANY CRITICISMS are levelled at the multi-layered bureaucracy that holds up America's system of government. The overlapping juridictions, the endless red tape, the impassive walls of secretaries to the secretary, have given birth to an unfortunate image of our government as some sort of lumbering giant with impossibly slow reflexes.

And, to be frank, this reputation is all too often

But it is especially important to remember that, in cases of emergency and when the lives made to work. It can respond.

Ad- their families in Texas that will testify to this .

> Their story is not only an instance where the Federal bureaucracy came through, but it is a case study of what can be accomplished through the cooperation of all the distinct governments involved...

> From the local and state authorities in Brownsville, Corpus Christi and Texas to the high level officials here in Washington and in Mexico, the crisis was resolved with both human sympathy cooperative efficiency.

And at a time when confidence in government is frequently shaky, this comes as welcome reassurance.

## San Jose Celebra La Semana Santa

La Iglesia de San Jose ya ha dado principio, con el Domingo de Ramos, a la Semana Santa. Durante esta semana las glesias Cristianas conmemorancruz seran a las 8:30 p.m. los eventos de los ultimos dias de la vida de Nuestro Senor Jesucristo, de su muerte y de su

## Social Security Investigates SSI Monthly Recipients

Supplemental Security Income (SSI) monthly checks will have to answer several questions which will be asked by the Social Security Administration. This is so a redetermination tinuing eligibility, " said Travis C. Briggs, social security

At this time, the social security office is sending letters

converted from Welfare on January 1, 1974. It is the recipient's responsibility to contact the Social Security Office so that all necessary information may be obtained. may be made as to their con- In most cases, there will be change, and a person will continue to receive his checks in the usual manner without any interruptions.

> However, there have been cases in which an SSI recipient

was receiving the incorrect amount, and this had to be corrected. The person who gets the checks, whether for himself or on behalf of someone else, is responsible for giving the Social Security Administration all information which would cause those checks to be increased, decreased, or even if there would be no change in the amount payable.

It is preferred that the person receiving the checks appear in person because at least once every two years a face-to-face interview is required. If a person cannot come into the office (or meet with our representative), he should contact the Social Security Office by telephone.

If a person fails to contact us within a reasonalbe period of time, it may become necessary to suspend that person's benefits. Therefore to avoid interruption in checks, a person should contact the Social Security Office immediately when he receives a letter asking him to do so.

The Amarillo office is 317 East Third St. The phone number is 376-2241.

Let leftovers cool before putting them in the refrigerator, say Texas Department of Agriculture home economists. Putting hot foods directly into the refrigerator, especially a frost-free model, increases costs. Moisture is drawn into the air from uncovered liquids, making the refrigerator work harder.

No Changes "Has James changed much in the years he has beer

away?"

"No, but he thinks he has

He keeps talking about wha. a fool he used to be."

## "WORSHIP GOD"

Worship with us the Lord's Way, In the Lord's Church. Jno. 14:6, Mt. 16:18 Let's Obey Christ and follow Christ and the Apostles. Eph.

We believe in speaking where the Bible speaks, and remaining silent where the word of God is silent. I Pet. 4. Verse 11. We do not believe we can alter or add to the word of God. II Jno. 9-11. Also, Rev. 22:18-19.

We believe in ministering one to another, studying Gods word for the edification of ourselves and edification of each other. Rm. 15:14.

The word of God is taught in the Assembly of the Church. Men teachers teaching one at a time. The only teachers God authorizes in the Public Church Assembly. I Cor. 11:23-40 and I Tim. 2-11-12. We sing and Pray. Col. 3:16-17; Eph. 5:19-20 - 1 Tim. 2:8.

We give of our means and partake of the communion at

We believe the Communion to be a spiritual ordinance placed in the Church by Christ. Commanded by the Lord and taught and practiced by the Apostles. As Baptism when accompanied by faith, repentance and confession, puts the believer in Christ. The communion keeps us in covenant relationship with Christ and other Christians when anied by the Christian Graces as Peter declares in II

the appointed time. I Cor. 16:1-2 - Lu 24:29-30; Acts. 20:7.

We believe we will be held accountable for the way we handle Gods word. For this we will answer in the day of

Judgment. 1 Pet. 4:17, Rm. 14:12.

The word of the Lord only will save. We believe we must endeavor to keep the unity of the spirit in the bonds of peace.

Eph. 4:3-6. We must earnestly contend for one Faith. Jude We invite you to come worship with us -

The Church of Christ So. Miles and Gracey Sts.

#### Cannon of Floydada. Grimsley was named outstanding student in Deisel Mechanics 1407. Income Increase Helps VA Pensioners

A \$400 increase in income limits for Veterans Administration pensioners saved 74,000 veterns, widows and children from reduction or termination of benefits this year and made others eligible for the first time, Jack Coker, VA Regional Director, said today.

Coker said there is no or children. estimate to the number of new eligibles under the increased

Potentially eligible, he ex-

plained, are veterans 65 years and for parents receiving of age or older and younger veterans who are totally and permanently disabled from nonservice-connected causes. Other income must not exceed \$3,000 annually if there are no dependents. The annual limit is \$4,200 for veterans with spouses

Similar limits apply for widow of veterans who died of rates for 2.3 million veterans nonservice connected causes and survivors on VA pension

I take medicine (probantins) for an ulcer. Can this cause dryness of the mouth? If so, how can I stop the dryness? - D.L.

This medicine and many others can cause this condition. A safe method of stopping mouth dryness is to suck on hard candy when it occurs. This will increase the amount of saliva and stop the dryness, Can birth control pills cause infections? - K.B.

Studies indicate that those women who take the combination" birth control pill have a higher incidence of vaginal infection than those women who take the "sequential" pill or no pill at all,

ituation worse.

BY U.S. SEN. JOHN TOWER

The Senate Commerce Committee'is working now on a bill that would have catastrophic consequences for all Texans and for nearly all

interstate market are, by comparison, abundant.

The purpose of the Stevenson-Hollings bill is to reduce the The bill, authored principally by Senators Adlai Stevenson of Illinois and Ernest Hollings of South Carolina, would extend federal price controls on natural gas to natural gas produced and sold within the same state.

I can think of no better way to perpetuate a nationwide natural gas emergency, to cripple the economies of South and West, and to Create a perhaps unhealable rift between producing and non-producing Senators Stevenson and

Hollings have proposed their bill as a means of dealing with severe and growing shortages of natural gas on the interstate

But the remedy they propose is like treating a man with a cold by locking him in a deep freeze, or like curing a headache by amputating the head. Price controls are caused of the natural gas shortages, not the solution to them.

The Federal Power Com-

mission has since 1954 had the power to set the price at which gas industry has concluded that the shortage of natural gas on the interstate market is artificial, and has come about solely because the government has set the price of natural gas too low.

Dr. Edward Mitchel of the University of Michigan, project director of the National Energy Project sponsored by the American Enterprise Institute, says flatly that: 'The FPC regulations have caused a huge shortage of gas."

Dr. Paul McAvoy of the Massachusetts Institute of Technology constructed an econometric model of gas policy, tested it, and discovered that "no matter how serious the FPC is about solving the natural gas shortage, it cannot do so with the perpetuation of present pollicies.

Dr. Charles Cichetti of the University of Wisconsin said: "I cannot help but feel that the current crisis has been created by government interference in the natural gas industry." The artificiality of the natural gas shortage is clearly Texans make it very clear to
