

REMIEDIABLE DEFECTS FOUND IN MEN REJECTED FOR ARMY

AUSTIN. — A substantial percentage of registrants rejected for full military service on physical grounds, have remediable defects, which if corrected, would permit training of the men in the armed forces, State Selective Service headquarters disclosed recently.

Lieut. Col. J. W. H. Beck, chief of the medical division of the selective service system in Texas, said that of 37,132 registrants classified 70 per cent were qualified for full military service, 12.72 per cent for limited service only and 17.28 per cent were classified as unfit for any military service.

The principal causes for classifying these registrants as unfit for military service are: Eye defects 1,306, defective teeth 817, hernia 861, cardiovascular disease 701, tuberculosis 278, diseases of the nervous system 776, syphilis 1,982.

"It is an appalling fact that approximately one-third of these men were disqualified for full military service simply because they had not received proper care and attention earlier in life," said Colonel Beck.

Fruit Outlook At Clyde Is Best In The Last 15 Years

CLYDE. — Fruit growers in this territory—the California of Texas—enter the first stages of the harvest season with brightest prospects in 15 years, veteran growers report.

Some say it looks like the greatest fruit crop in history, and none denies there has been more moisture stored up in the deep sand than now. The soil is fairly seeping with precipitation.

Strawberries, comparably a new crop here but highly profitable, are just now coming into production. Following in quick succession will be berries, grapes, plums, apricots, peaches and finally the greatest money crop of them all, apples.

There is a ready demand for every strawberry grown here and the producers have to go no further than Abilene to find a buyer. They usually get around \$2.50 per case, of a little better than 10 cents per basket. At this rate the growers are able to make up to \$300 per acre. The Klondike is the best variety for this area.

Berries Sure Thing

The old "stand-by" spring money crop is berries — both dew and blackberries. They also pay off nicely and are almost a sure crop. The same goes for grapes.

The mere fact that apricots are producing this year shows what a fruit crop is in prospect. About nine times out of 10 apricots are killed by late freezes.

Another significant item pointing to high production this year is fact that the trees had a rest last year. During that time they stored up moisture and were well cared for by orchardists who are always looking ahead to the next year.

With all food commodities selling higher than two years ago—the last real crop was made then—growers can expect much greater profits this time.

While April 22 is the latest date on record of a killing freeze, growers are still a little "shaky" about weather that might take a toll of their greatest crop.

HEAP BIG INJUN, HIM SAY 'UGH' TO TOURISTS

It isn't the tourists' fault that he has been taught, back east and by way of numerous wild west stories and the movies, a great deal that is not true of Indians, that he approaches the Indian on the streets of the Southwestern towns with some such inquiry as: "How. How muchan blanket?"

The tourist should not be amazed, then, if the Indian replies: "Ugh. Heap good blanket, Sellum fl'teen dollah."

As a matter of record, that is just about what the Indian will reply if he is so addressed. He knows, from long experience that the tourist will likely so address him and will, of course, expect a similar reply.

Also as a matter of record of which the Indians and the entire Southwest area are proud, is the fact that the tourist will seldom find an Indian, especially one engaged in the commercial enterprise of selling blankets, curios, jewelry, and what-not on the streets, who is unable to converse most grammatically.

If the tourist will say: "Good afternoon. How expensive (or how cheap) is that blanket you have?"

The tourist will likely hear, "Good afternoon. The price of this blanket is fifteen dollars."

And, if the tourist, after making whatever purchases he decide upon (or even if he makes no purchase) will find the Indian quite able to talk comprehensively upon various subjects the tourist is likely to introduce.

It may be remembered that the Indian has had exceptionally good educational facilities, not alone in the schools that have been established even since 1880, but in his constant contact with the white man in this area. Most of the Indians speak three languages: Their own, Spanish and English.

Others are even more adept at languages and excel in the various schools in foreign languages as well as in the Romance languages. Because of their own peculiar range of language sounds, many of them are exceptionally proficient in German.

They have learned German, French, particularly through association with German and French Padres, and a few of them could get along very well were they suddenly transported to Italy.

But—they have a good sense of humor and they aren't going to disappoint the tourist who expects them to say, "Ugh."

There are approximately 9,000 separate local taxing subdivisions in Texas, each with the power to levy and collect taxes.

FORMULA IS GIVEN TO KILL CATERPILLARS

Leaf-eating caterpillars can be controlled on any plant by spraying the leaves of the plant with a mixture of arsenate of lead and water. The usual mixture is one pound of arsenate of lead and fifty gallons of water. When the water evaporates from the leaves the poison is left on them and any insect eating the leaves will get a killing dose of poison before it does much damage.

It is safe to spray arsenate of lead on trees that will have no ripe fruit for several weeks, but apricots should not be sprayed now unless extreme care is taken in washing the fruits before eating them. It is safe to spray peaches, plums, apples, pecans and shade trees. Leafy vegetables such as lettuce, collards, cabbage and mustard should not be sprayed with arsenate of lead.

IT PAYS TO ADV. SLOGAN STILL HOLDS GOOD

NEW ALBANY, Ind. — George W. Sluder, 51, put a classified advertisement in a newspaper asking for a wife.

Mrs. Sarah Gresham, 75, answered. As the two were married, each for the third time, Sluder said:

"I guess if the young folks nowadays get married younger the old folks can get married older."

THAT SNAKE IN THE GRASS MEANS CASH FOR FARMER

OMAHA, Neb. — Snakes, just common ordinary snakes, are really the farmer's friends says Lew Johnson, Ashland (Wis.) naturalist.

He figures the average bullsnake is worth about \$400 a season to a farmer, because he estimates each snake's summer diet at about 200 rats. And a rat, he says, can do \$2 to \$48 worth of damage to a farmer's property.

Cakes of salt were once used as currency in Tibet and Abyssinia, where "salting money away," originated.

Jam is made by the yard in Syria. The natives spread it on cloths to dry in the sun. The dried jam looks like a small rug.

More than 90 per cent of all oil wells in North Texas are small pumpers.

SIX WAYS TO MAKE A SOLDIER HAPPY TOLD BY CHAPLAIN

CAMP BARKELEY, Texas — Want to make a soldier happy?

Then follow the advice of First Lieut. George D. Adkins, assistant chaplain of the Forty-Fifth Division, who passes on these tips to parents, wives and sweethearts of the boys in uniform.

1. Every soldier likes to get letters—lots of them. He's happy when he receives mail and sad when he doesn't. Write him once or twice a week, at least.
2. Laundry service in the Army sometimes isn't all that it might be. Send along an extra pair of socks (preferably brown) or a couple of handkerchiefs or a towel.
3. Send friend doughboys some candy—either homemade or store-bought. Wrap it in wax paper.
4. Occasionally the canteen runs out of postage stamps or your soldier boy can't go to the post office. Mail him a book of stamps.
5. Send the home town paper and magazines.
6. Resolve to send a little package every week. It will give him something to look forward to. Almost anything will please him, except a can of beans.

Salem Witchcraft Executions

According to E. C. Nevins' "Witchcraft in Salem Village," there were 17 actual executions for witchcraft in Salem and nearby New England, including Giles Corey, the last victim of the delusion, who was pressed to death between stones on his refusal to plead guilty or not guilty.

HOW TO KEEP FIT IS TIMELY BIT OF ADVICE

Toughen Up, America (Whittelsey House), is a new and well-timed addition to the many, many books on how to keep physically and mentally fit. The advocate of toughening up to meet the gravest emergency in the history of this democracy is Dr. Victor G. Heiser, who has written and published earlier book relating to the physical well-being of his fellows. He writes from many years of professional experience, and as one who has marked and contributed to the progress of medical science.

This newest book has ample justification. Its author stresses in an introductory chapter the fact that the successes of the German army have been in part due to the physical stamina of the soldiers who have been compelled to participate in carefully planned exercises from their childhood. And to that citation, he adds his opinion that the German people today, though denied many important foodstuffs, are better fed than the American people in this land of plenty.

It should be noted that he says "better fed." This is due to preparation of diets with the proper proportions of the elements that go to the making of strong bodies, clear heads and vigorous health. The ruthlessness of German soldiers and the lying tongues of their official spokesmen aren't due to balanced diets, of course, and this health adviser doesn't mention these.

It is these, however, that the American people must reckon with. And, to make secure our way of life, we must give proof that we

have not been made as soft by easy living as our critics have claimed. No better course could be followed than that of rebuilding the strength of this people to meet the sternest test that the future may bring. Toughen Up, America! is a book that tells how. It shows what every American can and should do to make and keep himself physically in shape to face any ordeal. He should do that, not only for his own well-being, but because home defense will be as essential as military might, if and when aggression reaches our shores.

**WHEAT FARMERS
VOTE MAY 31ST
ON QUOTA PLAN**

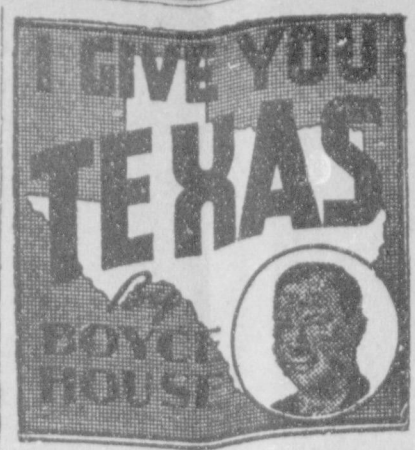

"The wheat marketing quota, on which farmers will vote May 31, offers a double protection—protection of supplies for the consumer and protection of the market for wheat growers themselves," declares E. L. Pierson Callahan County AAA Secretary.

"The marketing quota insures plenty of wheat for every probable demand by consumers in this country and abroad. A quota on wheat may be proclaimed only when the total supply exceeds a normal year's domestic consumption and exports by more than 15 percent. With exports practically shut off by military blockage, there will be almost 2 bushels of wheat on hand for every one which is likely to be consumed this year in the United States.

"In view of this supply, marketing quotas are necessary to protect the income of all wheat farmers. In the last 2 years, the wheat program, principally the loan, has held the United States wheat price 30 to 40 cents above the world price. However, on the face of the large supply in prospect for the coming year, the loan needs the added protection of the marketing quota. Because loans on an uncontrolled surplus would involve too much risk, they are prohibited by law when a wheat marketing quota is voted down.

"If the quota is approved, farmers will be able to sell without penalty all wheat they raise on their acreage allotments. The farmer who has seeded within his acreage allotment can sell his wheat just as he always has. He is also eligible for a Government loan on all his wheat.

"The farmer who overplants his allotment may store the wheat produced in excess of the quota. If he sells or uses it, a penalty will be collected. If he stores it, he can get a loan on the excess at a lower rate than that available to the cooperation."

The wheel of events spins and we are today where the world stood nearly a century and a quarter ago, which makes timely and significant the words of Robert G. Ingersoll regarding another military genius whose far-reaching ambition at last resulted in his own downfall:

A little while ago I stood by the grave of Napoleon—a magnificent tomb of gilt and gold, fit almost for a dead deity, and gazed upon the sarcophagus of black Egyptian marble where rest at last the ashes of that restless man. I leaned over the balustrade and thought about the career of the greatest soldiers of the modern world.

I saw him walking on the banks of the Seine, contemplating suicide. I saw him putting down the mob in the streets of Paris. I saw him crossing the bridge of Lodi with the tri-color in his hand. I saw him conquer the Alps and mingle the eagles of France with the eagles of the crags. I saw him in Egypt in the shadow of the pyramids, where thirty centuries looked down upon him.

I saw him in Russia where the infantry of the snow and the cavalry of the wild blast scattered his legions like winter's withered leaves. I saw him at Leipzig in defeat and disaster—clutched like a wild beast—banished to Elba. I saw him escape and remake an empire by the force of his genius. I saw him on the frightful field of Waterloo where Chance and Fate combined to wreck the fortunes of their former king. And I saw him on the lonely isle of St. Helena, with his hands clasped behind his back, gazing out upon the sad and solemn sea.

I thought of all the orphans and widows he had made—of the tears that had been shed for his glory—and of the only woman who ever loved him (trust from his heart by the ruthless hand of ambition). And I said: I would rather have been a French peasant and worn wooden shoes; I would rather have lived in a rut with the vines growing over the door and the grapes growing purple in the amorous kisses of the autumn sun, with my loving wife knitting by my side as the day died out of the sky—yes, I would rather have been that man and gone down to the tongueless silence of the dreamless dust than to have been that imperial personation of force and murder known as Napoleon the Great.

COTTONWOOD

Mr. and Mrs. H. H. Cooksey were called to Big Spring last week on account of the death of her father who died suddenly.

Mr. and Mrs. Jack Reeves and son of Prairie Valley visited Mr. and Mrs. John Jones last week end.

Mr. and Mrs. V. V. Strahan and family of Lamesa visited home folks this week.

Mrs. T. A. Coppinger and R. G. have been visiting relatives the past week.

J. H. Strahan left for Lamesa to work.

L. M. Purvis went to California a few days ago and came back to Phoenix, Arizona last week and was united in marriage with Miss Mattie Stone. They were married on Wednesday and returned home Thursday afternoon. We all welcome Mrs. Purvis to our community.

Mr. and Mrs. Jimmie Lane from Odessa visited her mother and father, Mr. and Mrs. Louis Coppinger this week.

Mrs. Roy Speegle of Putnam visited with her aunt Miss Eunice Hembree on Tuesday, Miss Hembree is ill this week with a cold.

An epidemic of measles has spread throughout this community the past two weeks.

Billie Mack Coppinger spent the week with J. R. Bryant of Brownwood.

Prof. Holder, wife and children of Burkett spent Friday evening in the home of Mr. and Mrs. Norman Coffey.

Mrs. Edna Earl Tucker spent the week end with her baby and parents, Mr. and Mrs. R. J. Cason of Dressy. Mrs. Tucker works in the school lunch room.

Mrs. Ola Yarbrough and baby of South Texas visited her parents Mr. and Mrs. J. H. McElroy last week end.

Mr. and Mrs. C. L. Brandon and family spent the week end visiting Mr. Brandon's parents Mr. and Mrs. J. B. Brandon.

Mrs. J. E. Free has returned from Wichita Falls where she has been with her daughter, Mrs. Andrews who has been ill.

Cottonwood H. D. Ladies Hear Miss Clara Brown Talk

Forty-five percent of the people in the United States are not physically fit. "The food we eat makes us physically fit, gives us alert minds, and steady nerves, stated Clara Brown, County Home Demonstration Agent, at a meeting of area seven in the home of Mrs. Harry Varner at Cottonwood Friday afternoon April 25, 1941. Women of America should see that their families are well-fed and also properly fed. By so doing they have played an important role in the National Defense program.

The demonstration given by Miss namon rolls, butterscotch rolls, tearings and coffee cake were baked and served.

Those present at Mrs. Varner's were Clara Brown, home demonstration agent, Mrs. J. D. Cauthe and Miss Maurine Eubanks of Admiral, Miss Maggie Wilson of Atwell, and the following members of the Cottonwood club: Miss Eunice Hembree, Miss Susie Coats, Miss Missouri Strahan, and Mesdames, S. E. Archer, Lloyd Bryan, Sub Peavy, Floyd Coffey, Harry Varner, John McElroy, Sam Moore, Bryan

Bennett, J. F. Coffey, John Coats, A. A. Holley, O. D. Strahan, Will Varner, W. R. Thompson, B. Strahan and Norman Coffey.

The next regular meeting of the Cottonwood club will be Friday afternoon May second at 2:00 in the home of Mrs. John Coats west of Cottonwood. A program will be given on salads. Fruit salads, vegetable salads and combination salads will be stressed. Serving salads will also be discussed.

Since the beginning of 4-H Club work on a nation-wide basis, it has reached over 8,000,000 rural young people.

More than 430 million handkerchiefs valued by factories at \$20,000,000 are made in the U. S. each year, according to the census.

**JOHN TAYLOR SERIOUSLY
INJURED FROM A FALL
LAST MONDAY AFTERNOON**

John Taylor was seriously injured Monday afternoon. He is a pumper on the Valley Osage Oil Company lease about eight miles north of Putnam, on the Slaughter. He had a little time off Monday afternoon and decide to clean out a cistern on the place. The cistern was about twenty five feet deep, and had been let down and was coming out, when he was within about five feet of the top when the chain broke letting him fall. He landed on his right foot and broke his ankle running the bone out to the side. The fall also fractured his spine.

He was gotten out of the cistern and taken to the County Hospital for first aid treatment. After an examination the injury was found to be so complicated it was decided they were not equipped to handle the case, so he was taken on to Abilene, and placed in the Hendricks-Memorial hospital where he is at present. It will likely be six or eight months before he will be able to return home to his employment.

**W. H. SHANKS REPORTS
5,200 APPLE TREES IN
ORCHARD AT CLYDE**

Apples can be grown in Callahan County successfully as has been shown by the actual production in the Clyde territory in 1939, when some orchards produced four and five thousand bushels as fine apples as can be grown any place. Some varieties do better than others in this territory; but the delicious appears to be the best apple grown in this county.

W. H. Shanks reports that he has 5,200 apple trees in his orchard with 2,500 peaches and plums. Besides a large nursery in connection with the orchards. Mr. Shanks states he has 4 thousand apple trees with blooms on them this year. He states further that he was secretary of the Chamber of Commerce and a cashier of the bank of Clyde and was responsible for the shipment of apple trees that set the original orchards there except the Perrin orchard that gave us the information and knowledge that the finest delicious apples would grow at Clyde. Yes, apples can be grown in the larger half of Callahan county successfully.

Nearly 225,000 persons work for the Texas petroleum industry. They and their families make up almost one million Texans who get their entire living from petroleum.

The average Texas oil well has to produce nearly three months out of the year to pay its owner's taxes and the land-owner's royalty.

More than one-fourth of the total land area of Texas is now under lease for oil and gas activity.
