

The Slaton Slatonite

PAGES VOLUME 54, NO. 39 THURSDAY, JULY 9, 1964 Price 10c

Early 200 Attend Meeting

Meeting, Tuesday to replace Tuesday evening at Slaton High School. The meeting was held at 7:30 p.m. and was master of ceremonies, City Engineer H. J. Wallace. He spoke at length on the physical problems, confronting the city. Opportunity was given to ask questions. Mr. Wallace displayed surplus getting up to the speed. Jack Shepherd spoke from their inadequacy of the address system. The people who were expressing up questions.

Reaves explained, with charts and maps, about the places in Slaton where fire protection was not enough because of small lines connecting the fire hydrants to existing water supply. He said that on the whole, the sewer and sanitary system of Slaton would serve for a long while. There was a hint that the Federal Government might come into the picture later, but nobody knows what they would demand.

Water Consumption Soars

Recent 100-degree weather has caused water consumption in Slaton to soar to almost double the 1,894,000 gallons which was the maximum day in 1963. The wells are being pumped to capacity about as many hours a day as they will produce maximum volume. Slaton's daily consumption has varied with temperatures, rainfall, and water rates. It was 142 gallons in 1947, 131 in '58, 135 in '59, 134 in '60, 117 in '61, and 124 in '62. Following the increase in water rates that consumption dropped to 113 gallons last year. It has been increasing steadily this year. The city at present obtains its entire water supply from many small capacity wells. Production from these wells has been decreasing in recent years; in fact, three have been abandoned. It is almost certain the present sources will not be adequate until Canadian River water is received, which is now expected to be in 1967. Water Superintendent Wayne Baker says that recently the supply has been barely sufficient, with pumps and booster stations running at capacity from 6:00 a.m. to 11:00 p.m.

F. A. Wittig, Lutheran Pastor Observes 40 Years Ordination

The fortieth anniversary of the ordination of Pastor F. A. Wittig, Rt. 1, Slaton, was observed last Sunday night under the auspices of Immanuel Lutheran Church, Posey. The message for the occasion was brought by Pastor J. Weldon Smith, Pastor of Holy Trinity Lutheran Church, Lubbock, while Pastor Andrew Mild, of Shepherd King Lutheran Church, Lubbock, served as liturgist. Pastors present were Jimmie Herklotz, Slaton, Harold Pembler, Levelland, Henry Ehlen, Lamesa, Leo Simon, Littlefield. In addition greetings were read from Dr. V. A. Mohr, President of the Southern District, The American Lutheran Church, and letters were read from the congregations at Sagerton, Winters, Abilene, Roscoe, Texhoma, Oklahoma, and Wilson. Letters were also read from former members and friends of congregations served by Pastor Wittig.

Local Rodeo Performers Win Prizes

Local rodeo performers, Don Mitchell, Mrs. Don Mitchell and Jerry Harlan participated in the Stamford Texas Cowboy Reunion that was held July 4, 5 and 6 at Stamford, Texas, and brought home trophies and cash prizes this past weekend. Don Mitchell, local high school agriculture teacher, won second place in one round of calf roping which netted him \$100 in prize money. Don won a saddle at this event in 1959. Mrs. Don Mitchell was runner-up in the ladies' sponsored barrel race which entitled her to a trophy and a cash award. Jerry Harlan, also of Slaton, won second place in a round of calf roping at the annual Stamford event which also netted him \$100 as a cash award. Mr. John B. Butler, owner of Butler Monument Works, was one of the judges in the "Old Fiddlers' Contest."

Brother Of Slaton Man

Funeral services were held at Portales last Friday for Joseph M. Luman, 54, who was fatally injured in a head-on automobile collision 12 miles north of Roswell Tuesday evening. Mr. Luman was the brother of N. J. Luman, who lives on South 7th St. in Slaton. He was 54 years old and operated a dairy at Portales. Also killed in the accident was Mrs. Lavera Ima Kelley, 58, a native of Lamesa but who had lived near Roswell since 1945. Army Pvt. Wesley H. Summerlin, son of Mr. and Mrs. James R. Summerlin, Route 2, Slaton, Tex., completed a field communication crewman course May 22 at Fort Polk, La. Summerlin was trained in wire laying, message center operation and switchboard operation. The 17-year-old soldier entered the Army last January and completed basic training at Fort Polk, La. Summerlin attended Roosevelt High School.

Receives Divinity Degree

Ronald W. Smith, son of Mr. and Mrs. William V. Smith, Slaton, will receive the Bachelor of Divinity degree from Southwestern Baptist Theological Seminary July 17. Southwestern Seminary, largest evangelical seminary in the world, will graduate 110 students in the summer exercises. Approximately 500 are graduated from the institution annually. Degrees and diplomas will be presented by seminary president Robert E. Naylor. Commencement speaker will be Homer G. Lindsay, Sr., pastor, First Baptist Church, Jacksonville, Fla., and president of the Foreign Mission Board and Florida State Convention.

Police Report

Police Chief R. E. Breedlove has furnished the Slatonite a copy of his June report to the City Commission. Police cars patrolled 4415 miles and used 512 gallons of gasoline. 32 arrests were made for offenses ranging from disturbances to murder, and 20 were cleared, leaving 12 still pending. Fines totaling \$1505 were assessed for drunkenness and other misdemeanors, and \$106 of this was "laid out" in jail by people who could or would not pay. Thirty five traffic violations were reported, with \$315 in fines being collected, and \$26 being "laid out". These included everything from one for parking on private property to nine for driving in a dangerous manner. Only eight prisoners were arrested for the juvenile courts. Three were released to parents, and five (from Amarillo) were turned over to county juvenile authorities. There were eleven motor vehicle accidents investigated, which caused a total damage of \$3,033. Three of the eleven accidents occurred on Division Street, which needs widening. It was particularly noted that 89 traffic warnings, without arrests, were issued during the month. Twenty three warrants were outstanding at the end of the month, but only 11 of them were issued this month, and only one for a Slaton resident.

Department Repairs City Water Lines

Slaton was threatened with a water shortage Monday when heavy equipment of the contractors building Highway 84 Bypass broke water lines which connect six of the city wells to the storage tanks. However, repairs were being completed Tuesday. It will be surprising, however, if Slaton gets through this summer without restrictions which have been imposed on use of water in other years here and in neighboring cities, such as sprinkling lawns and washing cars. Looks like we may have to increase the number of producing wells, however small they may be, kill of a few surplus citizens (to be selected by the writer), quit brushing out teeth, or something.

New Cars For Police

The Slaton Police Department is using two new Ford patrol cars, acquired from Slaton Motor Co. under a two-year lease for \$97.50 per month. The city has an option to buy them within six months. Bill Smith of Slaton Motors told the City Commissioners at their last meeting they could save \$406.20 in state and federal taxes by having the two cars bought now and registered as property of the city. However, the state of the city's finances would not permit even this. And there is no agreement between the dealers and the users about whether a police car should be leased, or driven until it breaks down.

WEATHER

The last week has been hot and humid, with only a trace of rainfall. Temperature ranges, courtesy Pioneer Natural Gas Co., have been:

Wednesday	101 - 68
Thursday	98 - 66
Friday	98 - 64
Saturday	98 - 68
Sunday	94 - 67
Monday	97 - 67
Tuesday	97 - 68

Babe Ruth Queen Contest

The contest for Queen of the Slaton Babe Ruth League got under way with the presentation of the teams' candidates on Tuesday Evening June 23, 1964. There are seven teams in the League and each is being represented by a lovely young lady. The candidates are: Polly Neal, daughter of Mr. and Mrs. J. C. Neal of Cooper, was presented as candidate for the Colts and was escorted by Gary Beard of Cooper. Vicki Nowlin, daughter of Mr. and Mrs. Jack Nowlin, is the candidate for the Gingers and was escorted by Gary Glasscock. Jacque Edwards, daughter of Mr. and Mrs. Alton D. Edwards, is the Flyers' candidate and she was presented by Steve Harlan. Linda Alba, daughter of Mr. and Mrs. Jim Alba, is candidate for the Jets and was escorted by Joe Soto. Holly McSween, daughter of Dr. and Mrs. M. Jay McSween, is the candidate for the Chiefs and was escorted by Jerry Burrell. Kathy Edwards, daughter of Mr. and Mrs. J. W. Edwards, is the candidate for the Cubs and was escorted by Dennis Verkamp. Jackie Thomas, daughter of W. J. Thomas, represents the Comets and she was escorted by Pat Wheeler.

Scout News

Four Slaton boys will be a part of the South Plains Council attending the 6th National Boy Scout Jamboree at Valley Forge, Pa. The Slaton group are Eagle Explorers Byron Johnson and Billy Martin, and Life Explorer Douglas Williams. All three are members of Explorer Post 125. The fourth member from Slaton is Life Scout Allen Underwood of Scout Troop 125. The Slaton group is a part of the 259 boys and 23 adults from the South Plains Council who left by chartered bus to make the 21 day trip. Highlights of the trip are to be visits to Ford Village at Detroit, Niagara Falls, Ontario, Canada, New York World's Fair and Washington, D. C., before they arrive at Valley Forge where they will camp for seven days with 50,000 boys from America and 1,100 boys from other nations observing the Jamboree theme of "Strengthen America's Heritage." The group will return to Slaton on July 27.

Slaton Voters On Jury Duty

Charles Becker served on a jury in a civil suit at Lubbock in 72nd District Court last week. Chester H. Smith, W. C. (Dub) Williams and Rudy Dominguez of Slaton have been summoned for probable grand jury duty in 99th District Court at Lubbock Monday of this week. Cecil I. Brashear of Idalou and M. J. Williams of Shallowater were also included in the panel. Seventy three felony cases are scheduled for consideration by the grand jury, including four murder cases and eight of assault with intent to murder. Slaton people serving on juries at Lubbock receive \$4 per day, but nothing for travel expense or meals when not locked up during some petit jury trials. However, the Lubbock city people graciously remit any parking fines assessed while tied up in the county seat.

Ballots Now Available For Absentee Vote

Absentee ballots for the two elections July 28 may be cast at City Hall July 8th through 24th. Separate ballots will be used for the city charter amendment and for a commissioner to fill the unexpired term of Truett Bownds, who resigned as commissioner of Ward 1. The election July 28 will be held at Junior High School in Ward 1, to make it legal. But two sets of judges and clerks and two elections will be held at the same time. The city commissioners decided this would make it more convenient for all citizens than to hold the elections in different places.

Roosevelt 4-H

The Roosevelt 4-H Club entered a float in the Independence Day parade, in Lubbock, Saturday. The float featured an American flag and a 4-H flag. A banner across the center said "4-H CLUBS TRAIN YOUTH FOR CITIZENSHIP." Those working on the float were: Vicki Jo Davis, Brent Davis, Shirley Dickey, Judy Dickey, James Dickey, Walter, Roy Jim Davis, Elaine Reynolds, Wynda Jo Woolley, Carol Woolley, Marty Crossland, Roger Guess, Erlene Savell, Carol Griffin, Donna Griffin, Dee Ann Donley, Cindy Donley, Janie Thomas, Jimmy Thomas, Randy Thomas, Joyce Thomas, Max Thomas, Rex Thomas and Jana Parchman. The adult leaders were Mrs. Ray Dickey and Jimmy Davis.

W. Dikes Dies

William L. Dikes, age 69, died in Mercy Hospital at Slaton Monday. Mr. Dikes had been ill for sometime, but had been in the hospital only four days. He was living with a daughter, Mrs. Ralph O. Moore, at 305 East Lubbock St., when he entered the Slaton hospital. The body was taken to Brownwood Tuesday for funeral services and burial by H. M. Englund, of the Williams Funeral Home.

Bypass Is Now Open

Contractors are making rapid progress on the new route of Highway 84 around Slaton, and a portion of it has been opened to traffic. The STOP signs on FM-41 where it crosses the new highway should mean just that to everybody. Heavy trucks — not the contractors — are already moving over this crossing at maximum legal speeds. The overpasses included in the original plans for safety were dropped when it was found there was not enough money to do the entire job. Reports here are that the next to be constructed will be where FM-400 crosses US-84, but that it may be two years before it can be started. Meanwhile, only extreme caution on the part of drivers will avoid loss of life or injuries.

Awarded Scholarship

Howard Hoffman, Jr., son of Mr. and Mrs. Howard Hoffman, has been awarded a scholarship in Harvard University's summer school program. He will take courses in German language and philosophy, and will return home about August 21. Howard graduated from Slaton High School in 1961 and is an honor student at Texas Tech. He belongs to the Phi Delta Theta fraternity.

Bluebonnet Plans Picnic

Mrs. Floyd Boyd was hostess to Bluebonnet Club Wednesday June 24. Mrs. Boyd presided in the absence of the president Mrs. Travis Taylor. The annual picnic will be August 7 at 6:30 p.m. at the Club House for members and their families and house guests. Next regular meeting will be September 9, 9 p.m. luncheon at the Club House. Games were played with nine members present and one guest, Mrs. Harry Marsh.

Gun Shot Victim

Abelardo Cantu, 17, was in serious condition at Methodist Hospital, Lubbock, Monday, with a gunshot wound in the back of the neck. He had been shot with a .22 caliber rifle about 11:30 p.m. July 4, while sitting in a pickup truck with his brother-in-law, Manuel Hernandez, Jr. They live on the Johnny Wheeler farm, in the Robertson community north of Slaton. Hernandez started to Slaton with the injured Cantu, but had a flat tire on the pickup, and the trip to Mercy Hospital here was completed by ambulance. Cantu was transferred to Lubbock Sunday. It was alleged three shots had been fired into the cab of the truck. A 16-year old juvenile was being held by Crosby County authorities.

News about Railroad Folks For Railroad Folks

Railroad News..

The Missouri-Kansas & Texas Railroad operated its last mail trains between Dallas and San Antonio last Tuesday.

The Postoffice Department will now handle all mail between Dallas and San Antonio by truck on the highways.

Sixty per cent of the revenue from the Texas Flyer and the Texas Special came from mail, and the Katy has asked the Texas Railroad Commission to permit it to discontinue all passenger service between Dallas and San Antonio. Hearing has been set in Austin July 5.

Troy Bickerstaff, whose father was a locomotive engineer at Slaton and who grew up here, has been promoted to the new position of superintendent of airbrakes of the Santa Fe with headquarters in Topeka.

Dean Curtis, assistant airbrake supervisor at Temple, goes to Topeka as senior supervisor of air brakes. Curtis was raised on a farm near Clovis, and played basketball for the House of David when he was younger.

Carmel Eastham moves from Topeka to Temple as airbrake supervisor. He formerly had the Slaton territory. He was a Golden Gloves boxer around Clovis in high school days.

Frank W. Tye, airbrake supervisor at Newton, Kansas, was road foreman of engines at Slaton in 1956 and 1957.

An engineer, fireman and brakeman were killed last Thursday when a Pennsylvania Railroad freight train ran into the rear of a standing freight train in downtown Pittsburg. Conductor and flagman of the standing train were in the way-car, and apparently flagman did not start back to flag until too late to avert the collision. Six cars were derailed, one of them being hurled on top of the engine of the moving train and killing the three crew men inside.

At Palestine, Texas, a 77-year-old Missouri-Kansas-Texas conductor was killed when his clothing caught on the side of a moving train.

Battery-powered electric lights have supplanted the old-

time oil lights in the switch indicators in Slaton yard recently.

Thus passes another era in history. We can remember watching the old lamp - lighter making his rounds on a winter evening, filling the founts, trimming the wicks and lighting the lamps for the night.

He didn't need an education - only a dedication to his job, and the need to earn a dollar or so a day. He felt disgraced if one of his lights blew out during the night.

The Santa Fe has been hiring firemen, at La Junta for the Colorado Division.

Two men are required in the Diesel engine control cabs on all passenger trains.

Heavy transcontinental travel over the Northern route, through Dodge City and Albuquerque, has required re-employment of some men who had previously been cut off or resigned voluntarily.

On freight trains, the head brakeman (or front brakeman, as he is called in the east) is usually riding in the cab while the train is moving.

Directors of the Santa Fe last week increased the regular quarterly dividend to 40 cents per share. It had previously been 30 cents, but an extra year end dividend of 25 cents had been declared in recent years.

Reason given for increasing the quarterly rate was that the number of stockholders had grown to more than 100,000 and it had become too expensive to mail out checks for the extra dividend.

Continuance of the "regular" 40 cent rate will depend on earnings, of course, but if they are maintained at the present rate, the 1964 payments will amount to \$1.50.

Trading in the stock this year has ranged from a low of \$27.75 to a high of \$35.25 a share.

American Telephone & Telegraph stock, also held by quite a number of local people, has increased from a low of 67 to a high of 74 since it was split two for one recently. Its present dividend rate is 50 cents quarterly.

THE 'AMERICAN CRISIS'

Brother against brother, North against South, nation against itself - the split which rent our national fabric over 100 years ago during the Civil War is dramatically pictured at The Travelers Insurance Companies' exhibit at the New York World's Fair.

A desolate battlefield of the North-South conflict is the subject of one of the dioramas showing man's struggles and achievements at the "Triumph of Man" series now being shown to Fair visitors.

The "Triumph of Man" series is a sequence of realistic scenes depicting man's progress from primitive hunter to space age conqueror. It is found under a huge red umbrella symbolizing the present-day protection insurance provides.

The exhibit provides Fair visitors with an 18-minute tour through time on a special walkway which gives them the impression of being out-of-doors, under the stars.

Special acoustical and lighting techniques put the visitor into each setting that depicts a scene of his ancestors' distant past - as man progresses from primitive hunter, agriculturist, scientist

and thinker, to space age man.

The conflict between North and South illustrates the triumph of the nation on a moral issue that threatened its existence. A battered American flag in the foreground symbolizes - in the midst of the battlefield - that, in spite of its differences, the nation was to remain whole.

In sponsoring this World's Fair exhibit, The Travelers hopes to remind this generation of helping Americans protect themselves against financial hardships caused by storm, fire, accident, illness, death and extra long lives.

Among the 70 million Americans expected at the Fair - Northerner will join Southerner to stop and share these dramatic recreations of man's struggle to survive tragedy and find a better life.

Give Lawns Proper Management

Unightly weeds can invade and ruin a beautiful lawn when proper management is neglected, says Albert C. Novosad, Extension pasture specialist, Texas A&M University. A vigorous turf is the best control for weeds and weedy grasses, but when they do infest a lawn, elimination and control with chemicals or by hand becomes an important management practice.

Some chemicals available for controlling lawn weeds include disodium methylarsonate, amine methylarsonate, mapthathal, silvex, and 2,4-D, reports the specialist.

Crabgrass, dallisgrass, goosegrass, sandbur, and other summer-growing weedy grasses in Bermudagrass turf may be controlled with disodium methylarsonate or amine methylarsonate. Novosad says these materials are most effective if applied to weedy grasses in the seedling or young stages when growth is active.

Temporary browning or yellowing may occur when these materials are applied to Bermuda, but this will disappear in seven to 14 days, Novosad points out. St. Augustine is severely burned or even killed by these chemicals, but small bare spots should be covered by new growth in four to six weeks.

Weedy grasses should be mowed three to four days before treatment, adds the specialist. However, treated areas should not be mowed or watered within 48 hours after application. Retreatment or spot treatment is often necessary for good control.

Dallisgrass and other weedy grasses may also be killed by wetting the leaves and stems with mapthathal, says Novosad. This material should be used for spot treatment only as it will kill lawn grasses to which it is applied. However, bare spots left by naphtha treatment will be filled in by new growth in a few weeks.

Pigweed, spurge, fogfruit, morningglory, and similar weeds may be controlled with 2,4-D, the specialist points out. Some weeds treated with this

chemical may require two weeks to show the effects.

These chemicals must be diluted in water and can be applied as a spray or mop, says Novosad. Directions on containers should be followed closely since chemicals can be quite destructive if handled improperly. Many of them are toxic or highly poisonous.

Additional information on the chemical control of lawn weeds can be obtained from local county agricultural agents, adds Novosad.

C. W. Eanes At Camp

Cadet Charles William Eanes, son of Mrs. Maggie Eanes, 720 South 12th Street, Slaton, Texas is one of the approximate 1800 Reserve Officers Training Corps Cadets attending the six weeks U.S. Army General Military Science ROTC Camp at Fort Sill, Oklahoma.

The cadets began their training on 29 June 1964. They will be given the opportunity at the camp to apply the techniques of the military principles they learned in the classroom and will be provided with the maximum permissible opportunities to serve in positions of leadership during the training period.

Cadet Eanes is a student at Texas Technological College, Lubbock, Texas.

DeLeon Completes Advanced Training

Army Pvt. Margarito R. DeLeon, 24, son of Mr. and Mrs. Emilio C. DeLeon, Slaton, Tex., completed eight weeks of advanced infantry training with light weapons at Fort Polk, La., May 22.

During the training DeLeon received instruction in the use of the automatic rifle, the light machine gun and the 3.5 inch rocket launcher.

He entered the Army in January of this year and completed basic training at Fort Polk. DeLeon was employed at Miller Daniel Auto Corral in Lubbock before entering the Army.

Accent On Health

AUSTIN — Without the sun we all would die. But use of sun, like anything, can be carried to extremes.

The sun is necessary for growth processes of all — man, animal and vegetable. Sunshine is a source of vitamin D, as most people know. But what apparently is misunderstood is that ordinarily healthy people can get all the D vitamin they need through routine activities such as handing out the family wash, mowing the lawn or walking to the store.

As some of our senior citizens will tell you, the skin hue of choice fifty years or so ago was a fragile, pale white. One elderly Texas resident tells how she never went to the barn or field without protection of a sunbonnet. And she tells of spending hours trying to bleach her skin with lemon juice and buttermilk.

Today, the skin hue of choice by many is a golden brown. And many a person sweats out a frequent sun bath to attain a coat of bronze.

Overdoing a good thing — trying to acquire a suntan in a day's time — is where the problem begins.

The sun, as a heat source, can give the body first, second and even third degree burns. The medical term for sunburn is "erythema solaris." It's the ultraviolet light in sun rays which does the damage. Since clouds don't remove all ultraviolet rays, it is possible to get burned even on overcast days in mid-summer.

There are other dangers, too. Ultraviolet is associated in many minds with cancer. The rays stimulate cells to divide, and sometimes the cells 'forget' to stop, thus becoming cancerous. It's likely, they say, that

this could happen from any ultraviolet source - either the sun or sun lamps. Of course, only a person subjected constantly to large amounts of ultra violet is in danger. For example, farmers who work under sunlight are frequent victims of skin cancer.

Ultraviolet may also harm the eyes - even when they are closed. The skin of the eyelids is the thinnest on the whole body, and the light can burn right through causing sunburn of the eyes. Ordinary sunglasses offer some protection, but a thicker material - like cotton - offers more protection.

Bask in the sun, if you like, but do it with discretion. (A weekly feature from the Office of Public Health Education, Texas State Department of Health).

Texas Parks and Wildlife Department has reported an unusually large number of snakebites this year - mostly from copperheads. Campers and fishermen have been warned to use extra precautions.

Increase Valuations

Lubbock county commissioners were sitting last week as a tax equalization board to hear protests on county tax valuations. About 300 notices of increases in valuations were mailed out, mostly on downtown property in the city of Lubbock. Only a few were protested.

This is the procedure that will have to be followed by the City of Slaton if a charter amendment is not approved that will permit a higher tax rate on

present valuations. It is a serious affair, with hearings, tests, and appeals. It takes two years or more to produce needed increase in revenue.

Two basic types of paint are used on velvet, crush-resistant linings and cotton types - nylon or melamine finishes which are not used on nylon or silk. Instant finishes, which are achieved with durable or repellent compounds - new type oil and repellent finishes are used in some cases.

MRS. WAYNE LINDER

Conda Wyatt, Wayne Exchange Vows

The wedding ceremony of Conda Wyatt and Wayne Linder was held at the Second Baptist Church, Lubbock, on Wednesday, July 8, 1964. The bride, Conda Wyatt, 27, of Slaton, is a graduate of Slaton High School. The groom, Wayne Linder, 27, of Slaton, is a graduate of Slaton High School. The ceremony was officiated by Rev. J. H. Hester. The bride wore a white gown with a pink and white floral pattern. The groom wore a dark suit. The wedding party included bridesmaids and groomsmen. The reception was held at the home of the bride's parents.

Miss Patricia Mae Shelby

Miss Pat Shelby Will Wed Jerry Kitten

Miss Patricia Mae Shelby, 21, of Slaton, is to be married to Jerry James Kitten, 21, of Slaton, on August 27, 1964. The ceremony will be held at St. Joseph's Catholic Church. The bride is a graduate of Slaton High School. The groom is a graduate of Slaton High School. The wedding party includes bridesmaids and groomsmen. The reception will be held at the home of the bride's parents.

Hearing Concluded

A hearing which had lasted more than a week was concluded at Lubbock last Wednesday. It came out of charges by the United Packinghouse, Food and Allied Workers, AFL-CIO, that the Plains Cooperative Oil Mill was indulging in unfair employment practices involving discharging certain employees for union activities. The hearing was conducted by National Labor Relations board examiner Miss Rosanna Black, of Washington, one of only a few women to hold such a position. She said it might be several months before a decision was reached in the case.

Mrs. Gilmore Gives Book Review At Meet

The women of the First Presbyterian Church were hostesses for the Federated Church Women Monday, June 29, at 3 p.m. in the sanctuary of the church.

Mesdames Byron Johnson and D. W. Walston, Jr., greeted the guests. A musical prelude was rendered by Mrs. C. W. Space. Mrs. Fred H. Schmidt, President of the association of the First Presbyterian Church, gave a short welcome on the theme "Follow Me", the words of our Lord and Savior, Jesus Christ. Then Mrs. L. R. Gregory, Vice President, took charge of the meeting because of illness in the family of Mrs. Joe P. Holland, President. "What a Friend We Have in Jesus" was sung. Minutes were read and approved. Treasurer's report was read. Twenty Dollars was allowed to help a retarded boy, Babe Trevino, to go to the mentally retarded home for children in Abilene. A letter of thanks was read from the grateful mother of the boy.

Mrs. Geo. Green, Welfare Chairman, reported 233 garments had been distributed since the last meeting to needy people. Woolen clothing was being packed in boxes for the summer.

Mrs. Mary Gilmore gave an impressive, interesting and effective review of "Women in the Life of Jesus" by Webb Garrison. She introduced the different types of women who were closely connected with the Master from Rahab the harlot; Ruth, the gleaner; the Samaritan Woman; the Mother of Zebedee; Mary and Martha; Mary of Bethany; the woman of adultery; to Mary Magdalene and the Virgin Mary.

After a free will offering, Mrs. R. L. Smith presented Mrs. Gilmore with a token of thanks from the Federation for her willingness to give the book review on such short notice.

An invitation was given to have fellowship and refreshments in the Educational Building. The table was laid with a dainty design ecru table cloth and was centered with a beautiful arrangement of pink roses and baby breath. Refreshments of punch and cookies were served to 29 members and guests by Mesdames H. E. Anderson and Chas. Stubbs.

School Age Marriages Continue To Increase

School-age marriages may not be wise, yet after one becomes a fact, adults working with the couple have a responsibility to help them succeed. Indications are that they will continue to increase in numbers.

So says Patsy Reynolds, Extension specialist in family life education at Texas A&M University. Marriage is always a time of adjustment, she explains, regardless of the age of the couple. "Add to the normal problems of this period the disapproval and often bitter incriminations of parents and the load becomes almost impossible for the young couple to carry." According to a study made by Dr. B. J. Fallon, Executive Secretary of the West Texas School Study Council, school-age marriages have a divorce rate two to four times greater than for those who marry at age 20 or older. Dr. Fallon directed the survey in 238 Texas schools in 1962.

Conclusions of the research indicate that schools should educate for a "balanced social perspective" if these school-age marriages are to be reduced or those which occur are to succeed, the specialist says.

The parents and community can give the young couple practical education for dealing with problems such as budgets, house cleaning and care and use of household equipment, and preparation for earning a livelihood.

In the event of a school-age marriage, the students should be encouraged to complete their education if at all possible. Human potential is rarely maximized without the benefit of formal education. Less than full realization of human potential constitutes a loss for the individual, the community, and society at large, the study concludes.

Among Other Matters

By J. L. H.

Mrs. Bobby Crowson, the former Nancy Anderson, and son David are spending the week in the home of Mr. and Mrs. H. E. Anderson. Mr. Anderson, who is working out of Amarillo for six weeks is taking over the territory of the Traveling Master Mechanic Jack Swauger, who in turn is attending school in California in connection with the Santa Fe R. R. Mr. Anderson, Master Mechanic for the Santa Fe in Slaton spent the week end here after bringing his daughter and grandson to Slaton. Mrs. Crowson's home is in Albuquerque, N.M.

The Senior Methodist Youth Fellowship will sponsor an ice cream supper at the First Methodist Church July 11th, from 6 p.m. to 8 p.m. The public is invited to come and eat all the ice cream they want, and the charge is a flat rate of 50 cents.

Mr. and Mrs. Larkin Taylor had as their guests over the holidays two of Mrs. Taylor's nephews, Gee-Don and Earl Magness, of Harrison, Ark.

Mrs. Bert McDonald was taken to Methodist Hospital Lubbock, for surgery.

Mr. and Mrs. Earl Morris returned home last Monday after spending a week with two daughters and families. They visited in Richardson with Mr. and Mrs. Arden Maeker, Marilyn and Pam, and in Dallas with Mr. and Mrs. Walt Lyman, Marc and Leslie. On Saturday afternoon a son and family, Mr. and Mrs. Jimmy Morris and Chris drove up from Houston and visited with the family. Another son, Maurice, who was flying home from a business trip in Indiana, stopped over to visit with family before going to Houston.

Thursday's visitors in the Morris home were Mrs. O. G. Lewis and her daughter, Mrs. Linda Denman and son. Also with Mrs. Lewis was a granddaughter, Susan Lewis. The family lives near Rule.

Visiting in the home of Mr. and Mrs. T. Everett McClanahan are Mr. and Mrs. R. C. Brackeen and children Randy Brackeen and children Randy and Helen from Electra, Texas.

Mrs. Ethel Shirley and daughter Mrs. Bobby Herst of Comcord, Calif., are guests of Mrs. M. R. Williams. They are sister and niece of Mrs. Williams.

Mr. and Mrs. Ronnie Gill and daughter Kristi of Ft. Worth, were Slaton visitors last week end, the guests of Mrs. Gill's mother, Mrs. La Wanda Henry. Joining the family were Mr. and Mrs. Clarence Scott of Lubbock and Mrs. Bertie Brown of Slaton.

After attending the wedding of their cousin Raymond Einig and Audrey Arnold, Mr. and Mrs. J. J. Kitten returned from St. Louis, Mo.

Mr. and Mrs. H. L. Marsh spent the Fourth in Clovis, N.M., visiting her sister and husband, Mr. and Mrs. W. M. Holder. Also visiting at the Holders were their daughter and family, Dr. and Mrs. Hank Tucker and children from Tucson, Ariz., and the Marshes' daughter and family, Mr. and Mrs. Glen Fry and daughter Sherry Ann of Roswell, N.M.

Lubbock are spending a few days with their uncle and aunt, Mr. and Mrs. Dudley Berry.

Mr. and Mrs. A. E. (Pete) Ware who spend most of their time at the lake at Brownwood, have been touring the country for the past six weeks. They attended a wedding of a nephew at Stillwater, Okla, and arrived four days after the birth of a granddaughter. The parents of the new little miss are Lt. and Mrs. James Adams. Mrs. Adams is Mr. Ware's daughter. Lt. Adams is stationed at a missile base near the twin cities of St. Paul and Minneapolis, Minn., and the Wares got in a lot of fishing at the lakes near the site. They toured in the states of Nebraska and Iowa and went east as far as Tennessee and Kentucky and are back to their cottage at the lake at Brownwood.

Mrs. Ira McCarver and son, Edwin, visited her twin brother, Delma McCollum, in Sherman, Texas, for two weeks.

After spending several weeks in the home of her daughter, Mrs. Bob McClasim, who has been ill in Carlsbad, N.M., Mrs.

Book Fair Scheduled

The Catholic Daughters held their regular meeting July 8th, with Mrs. James Kitten presiding. The Daughters are sponsoring a book fair Sunday morning July 12th, to be held in St. Joseph cafeteria and July 19th, to be held in St. Joseph Hall. Coffee and doughnuts will be sold during the first book fair.

A Tacky Party was also planned the middle of August. The Daughters will celebrate their 20th anniversary the 15th of August. The members will receive communion in a body on this date.

The regular meeting date has been changed to the first Monday night of each month.

The sick committee for the month of July are Mrs. Arthur Kahlich chairman, Mrs. A. A. Kahlich, Carl Kahlich, Carl Kayser and Rose Kahlich.

Past Grand Regent pins and charms were presented to Mrs. Clarence Buxkemper Bill Farshon, Walter Bednarz, August Kitten, O. F. Kitten, H. C. Heinrich, Louie Melcher, Tony Stefens, Clarence Kitten, Rose Kahlich and Rusty Kitten.

Refreshments were served to 45 members and one guest. A short skit on parliamentary procedure was presented by the lecture, Mrs. J. L. Pivonka and members, Mrs. Leo Kitten won the door prize.

Fannie Patterson has returned to Slaton for a few days. She will spend the night with her son, Benton Patterson of Wolf-orth, who has also been ill. On Friday she will return to Carlsbad to be with her daughter again.

Mr. and Mrs. Claud W. Young spent their vacation in San Antonio with Mr. and Mrs. Gene Collins of Lockney.

Mrs. Sherrill R. Boyd and son Don have returned to Cloudcroft, N.M., after spending a few days in Slaton.

Ma Ricker, mother of Mrs. Claud W. Young, is spending a few days with her son, Cecil, in Lubbock.

Mr. and Mrs. Bill Roche and family left for Six Flags and will return Thursday.

A visitor over the Fourth in the home of Mrs. Vivian Williams was her aunt, Mrs. Mary Cates of Corona, Calif.

A girl weighing 6 pounds, 8 ounces, was born July 2 to Mr. and Mrs. Otto Loranzie Austin, Wilson, Texas; she was named Kathy Sue.

Weighing in at 6 pounds, 10 ounces, a girl, Elizabeth Jane, arrived July 4. The proud parents are Mr. and Mrs. Trincio Herrera, Wilson, Texas.

On July 5 a girl, Christine, weighing 7 pounds, 8 ounces, was born to Mr. and Mrs. Joe

Martinez, Slaton.

Eight pounds, 1½ ounces is the weight of a daughter born to Mr. and Mrs. Jimmie D. Riemer, Lubbock, July 6. The little miss was named Tammie Lynn.

Mr. and Mrs. Jesus Perez, Slaton, announce the arrival of a son, Gregorio Jesus, 8 pounds, 2½ ounces July 6.

On July 7 a son weighing 7 pounds, 6 ounces, was born to Mr. and Mrs. Guadalupe Hinojosa, Ralls, Texas. As yet the young man is unnamed.

A son weighing 6 pounds 15 ounces was born to Mr. and Mrs. Orvil Joe Severt in West Texas Hospital at Lubbock Saturday. They live at 855 South 13th St., Slaton. Mr. Severt works for Nubro Corp. on the

Lubbock Highway, manufacturer and rebuilders of ball bearings.

Tire Pressure — Every farm should have an air pump and an accurate tire gauge. Correct tire pressure will improve traction, reduce rolling resistance, help provide even tillage and planting depths, and increase tire life.

FARM NEWS

Price Reduced
Micronaire, or "Mike", readings will join Grade and Staple as official measurements of cotton quality this year, reports the U.S. Dept. of Agriculture.

W. K. Palmer, in charge of the Agricultural Marketing Service's Cotton classing office in Lubbock tells us that the classing office is ready to take a Mike reading on all cotton samples they receive, and the Mike reading will appear on the Classification Card, right along with the grade and staple.

Cost of the Mike reading service has been reduced from 8 cents to 6 cents per sample, provided the ginner applies for this service prior to the time otherwise the charge will be 25 cents. Grade and staple information will be provided free, as before, under the Smith-Dozey program.

Mike describes fineness and maturity of cotton fibers. Its measured on a scale from 2.4 to 8.0, in steps of one-tenth. It works like this: When compressed air is forced through a sample of cotton, an air-flow instrument registers the Mike reading of that particular sample. Fine fibers permit less air to pass through. Thus, the finer the fibers, the lower the reading. Fineness and maturity affect the spinnability and value of the cotton.

About six weeks ago, USDA announced that Mike readings will be required for all upland cotton that goes under price support loan.

Included in the announcement was a schedule of premiums and discounts, based on Mike readings. If the reading is between 3.7 and 4.8, a premium of 13 points per pound will be allowed when the cotton is placed under the loan. No premium of discount will be allowed when the cotton is placed under the loan. No premium or discount will be allowed if the Mike reading is 4.9 through 5.1, or between 3.3 through 3.6. Al-

so, cotton having a Mike reading of 3.0 to 3.2 will be discounted 50 points, 2.7 to 2.9 150 points and 2.6 and below 300 points. Mr. Palmer says all ginner in the Lubbock territory have been provided with a new Question and Answer pamphlet that explains the new Mike reading service.

COTTON VARIETIES FOR LATE PLANTING

Are you having to replant cotton? It may even be you haven't planted the first time yet. In either case, you need to plant a cotton variety that will produce good yields with mature bolls at harvest.

"It is important at this late date to plant only varieties which offer good yields," says Bill Gunter, Area Extension Agronomist. Based on research at the South Plains Research and Extension Center, Lubbock, several varieties have proved suitable for late planting (June 20-30) over a several-year test period.

Among these are Gregg, Paymaster 101-A and 57-B, Rii-Cot 90, and Stormrider. Stormrider is an open-boll variety; but when planted late in the season, there is little cotton loss, says Gunter.

According to date from J. D. Bilbro, USDA Agronomist at the Center, yields of several cotton varieties have been compared for four years at two different planting dates. Two of the varieties are among those recommended for late plantings. Gregg variety planted June 20-21 in each of the four years averaged 551 pounds an acre. Paymaster 101-A averaged 572 pounds lint an acre. This compares to 602 pounds for Paymaster 101-A planted at the same date.

When planting was June 29-30, lint yield showed a further decline. Gregg averaged 290 pounds an acre and Paymaster 101-A averaged 286 pounds.

Bilbro says micronaire values also followed the yields. Gregg and Paymaster 101-A had higher "mike" values at the late planting dates of June 29-30 than the other two varieties tested. At earlier planting dates, however, micronaire values for the four varieties were about the same.

In-Storage Grain Drying Practical — Grain harvesting time is here and some checking up on farm storage facilities may be in order, especially if you plan to install grain-drying equipment, says W. S. Allen, Extension agricultural engineer at Texas A&M University.

Mechanical grain drying is often a logical answer when harvested grain is too wet for safe storage. Grain dryers do their job by forcing air through the grain to take out excess moisture. Grain can be stored safely after its water content has been reduced to about 12 or 13 percent, says Allen.

In-storage drying, found on most farms, takes place in the storage bin. It isn't necessary to move the grain after it's dried. This method can be used for milo, rice, peanuts, and soy-

beans, explains the engineer.

An in-storage drying system has three components: one or more storage bins, air distribution systems, and a source of forced air. Round metal bins are quite popular for on-farm drying facilities and are available with air distribution systems. A common method of distributing the air is to force it under a crop-drying floor having small openings through which the air can move upward.

This type of drying may use natural air or supplemental heat. It a natural air system, unheated air is forced through by a motor-fan unit. Supplemental heat may be utilized where humidity is high. This will raise the air temperature, and lower the relative humidity, and increase drying speed.

Allen warns of over-drying grain by using air that's too warm. Heaters should not raise the air temperature more than 10 to 12 degrees. Two methods are used to load bins for drying in storage. One is to fill the bin and dry the grain as a single layer, but a more practical way is the multiple layer system. With this method, a layer of grain is placed in the bin and when it is almost dry, an additional layer is added and dried.

Local county agents, says Allen, can supply detailed information on drying systems.

21 Win Blue Awards in Foods-Nutrition Program — The 21 blue ribbon winners of the recent 4-H foods-nutrition awards program (4-H Favorite Food Show) have been invited to submit their records for judging in state and national awards programs.

The 4-H records will be judged this fall, and will count 50 percent of a contestant's total point score. Individual scores made at the Favorite Food Show will count the remaining 50 percent, says Marie Tribble, who served as superintendent for the Favorite Food Show.

Forty-six girls and one boy competed in the state contest. The blue ribbon winners included 7 in the meat division; 6 in the bread-cereal food group, and 4 each in the fruit-vegetable and milk food categories.

The highest scoring member of each of the other three food groups — bread-cereal, milk and fruit-vegetable, will receive a trip to the National 4-H Congress. The record of the first place winner of each category in the state will be eligible to compete in national programs. Six scholarships of \$500 each will be awarded the national winners in each of these three awards programs.

Blue ribbon winners named during 4-H Roundup who are eligible to submit records are: Meat category: Nancy Cline, Texline, District 1; Donna Childers, Iowa Park, District 3; Margaret Gattis, Pottsboro, 4; Jolene Lewis, Murchison, 5; Susan Cohen, Llano, 7; Patricia Schaefer, Wetmore, 10; and Clara Roegiers, Edinburg, District 12.

Bread-cereal foods: Cathy Wilkie, Pampa, District 1; Brenda Duke, Plains, 2; Ernestine Trietsch, Sangery, 4; Joanna

Lewis, Murchison, District 5; Mary Baker, Barnhart, 7; and Carol Ann Rektorik, Robstown, 12.

Milk food category: Michelle Mahaffey, Canton, District 5; Judy Pinnell, Andrews, 6; Candace Cook, Field Creek, 7; and Karin Schott, Castorville, 12.

Fruit-vegetables: Pete Gipson, Lockney, District 2; Jon Ann Carter, Crowell, 3; Gayla Wilkinson, Denton, 4; Sharon Harbin, Eastland, 8.

Texas had a regional winner in the milk foods division last year, and a national winner in the foods-nutrition awards program, Miss Tribble reports.

TAES Developed Wheat Varieties Aid Income-Important contributions are being made to stabilize wheat production and farm income by the outstanding test weight of new varieties of wheat. These varieties have been developed by the Small Grain Section of the Texas Agricultural Experiment Station.

Crockett, Tascosa and Caddo wheat varieties have produced an average test weight ranging from 2 to 4 pounds per bushel greater than varieties grown 10 to 20 years ago. This has resulted in the grower receiving No. 1 wheat prices most seasons. Normally No. 1 wheat sells

from 3 to 10 cents more than No. 2 wheat which means an additional return of \$3.00 on each 100 bushels.

Comparative tests in Texas over an 8-year period gave an average test weight of 61.5 for Caddo, Tascosa and Crockett while Comanche, Tenmarq and Turkey averaged 58.5 pounds per bushel in the same tests.

The Tascosa and Caddo varieties have also proved desirable due to their non-shattering characteristic. Tascosa has repeatedly withstood severe hail storms with less damage than other commercial varieties. Thus it has been widely adopted in the Southern High Plains where some counties seed more than 75 percent of their acreage to this variety.

Tascosa was developed by I. M. Atkins and K. B. Porter, TAES researchers, and released as recently as 1958. It was grown on more than 300,000 acres in 1963.

If you can pay \$19 per month, you can qualify for a \$320 loan

Communist China, recently recognized by France, contains 700 million people or 23 percent of the world's population. The multitude grows by 16,800,000 each year. This annual increase equals the entire population of Greece.

Comparative tests in Texas over an 8-year period gave an average test weight of 61.5 for Caddo, Tascosa and Crockett while Comanche, Tenmarq and Turkey averaged 58.5 pounds per bushel in the same tests.

The Tascosa and Caddo varieties have also proved desirable due to their non-shattering characteristic. "SOME DAYS YOU CAN'T MAKE A NICKEL"
"A fella just doesn't have a chance. His mother stuffs him into a lot of fancy clothes. His dancing school teacher drags him away from the guys. And now this!"
Agreed. But boys often have to learn the hard way. Taking the world as it comes... assuming responsibility, then trying to make things a little better takes the special kind of strength and courage you find in Faith. Those big problems will seem a lot easier for your youngsters to take care of if they can count on this strength of Faith. Now—and all during their lives. This week visit your Church or Synagogue with all your family. It's never too early to find Faith.

HOME OF HOUSTON LIVESTOCK SHOW AND RODEO—The largest livestock exhibition building under one roof in the world will be the home of the Houston Livestock Show beginning 1966. The air-conditioned building covers 12 acres and will have stalls to accommodate 100,000 cattle, 600 horses, 1200 sheep and goats, and a 208' x 80' livestock judging arena will provide separate sheep and swine arenas, an auction arena for breed sales and some cattle, facilities for poultry and rabbits and a milking parlor with observation facilities. The exhibition building is adjacent to the famed Domed Stadium which will house America's and wildest rodeo.

My, How Clothes Have Changed News Leak

The year the attire of this tiny-waisted woman pictured on the left was the rage, both North and South Dakota were admitted to the union. Edison's phonograph was here to stay with its sign of approval by the Atlantic Monthly. Female emancipation began—and our daring young creature covered richly and modestly in straight front, full-backed skirts draped over high and low bustles sought to take her place in the terrifying masculine world of business. Some of these daring young women sat at a new-fangled machine called the "typewriter" and in time were to be called stenographers; this was the year that braids, velvet, chenille and fringe were strewn with a heavy hand over the better hats featured in Aldens first catalog in 1889. Today the frills have been dropped from both the typewriter and mode of dress. Whether you head an office or a household as long as you stick to the classics for the fall of '64, you'll be making a smart buy and look your best. The Chanel "Blazer" suit pictured on the right, combined with its own bright bow-tie to produce the sort of outfit prized by well-dressed women in every occupation. Aldens version is tailored in lumpy wool and nylon blend shined up brassy buttons on the double-breasted front and pockets. Whether in royal blue and gold or in green and beige the wearer of this blazer will be at home everywhere: on plane; suburban street or office.

Federal Bureau of Investigation agents James W. Manning C. Clements yesterday began an investigation of Dallas to try to find out the Dallas News editor's dairy of Lee Harvey Oswald during his two years in Members of the Warren Commission who have been investigating the months the murder of Kennedy in Dallas, were "disturbed" because the Commission was making public the material the News had published. Last Saturday, the News reported that it claimed was given Chief Justice Warren and Jack Ruby, when it was said that Oswald was a propeller slayer of Oswald, when he visited Ruby in the Dallas jail recently. Lawyers for Ruby say they tend to believe he was less than sane since the sentence was imposed and can never be exonerated. I am not at all hesitant to say that a will is a valuable asset. In fact, it is one of the most important assets you own. At least 75% of all men and women have no will. If you are one of the 25% who do, you are in a position to make sure your property goes where you want it to go. The average man has a net worth of \$10,000. If he dies without a will, his family may not get it. If he has a will, his family gets it. It's that simple. Write to: BREWER INSURANCE AGENCY, P.O. Box 22963, Dallas, Texas 75226. Enclosed is a free booklet, "How to Write a Will." It's yours for the asking. No obligation. No charge. After 5 P.M.

STATE CAPITAL Highlights AND Sidelights by Vern Sanford TEXAS PRESS ASSOCIATION

By — Vern Sanford
Texas Press Association
AUSTIN, Tex. — Local governments in Texas may be the main beneficiaries if state government winds up the current fiscal period with an \$80,000,000 surplus as Gov. John Connally predicts it might.

Should such a surplus be reached, Connally told reporters, it is "fairly" certain he will recommend abolishing the ad valorem tax on property for state revenue purposes and leaving that source exclusively to local governments.

Connally said \$20,000,000 of the expected surplus could be set aside in a special fund to retire college building bonds backed by ad valorem tax contributions.

In predicting that the surplus will not be less than \$35,000,000 and probably will reach the \$80,000,000 figure, the Governor joined those who have contended all along that the general revenue fund will be so far in the black by 1965 that new tax problems will be eased if not erased.

Connally also said he contemplates submitting to the Legislature in stages the recommendations of his Committee on Education Beyond the High School.

He still plans to call a conference on morals and ethics, but said he has not picked a time. However, he declined to say whether he would recommend fair employment and public accommodations legislation in order to maintain some state jurisdiction over civil rights under the new federal law.

Illiteracy Fight Stepped Up
A quiet campaign is under way to mobilize South Texas community facilities to combat results in wasted lives and damaged economy.

Fausto Toscano, an assistant to Governor Connally, is in South Texas determining what can be done at the local level to help stamp out the blight of illiteracy.

Toscano has visited seven South Texas counties attempting to establish local literacy centers to teach adults to read and write. He reports that in most counties in Southwest Texas illiteracy is far above the national average, and runs over 20 per cent in some counties.

Texas Education Agency is engaged in the most intensive study of the problem ever undertaken in the state and the director of that study says the problem can be substantially solved in a few years by a concerted state - local effort.

Capitol Hospitality
Texas Highway Department now has a team of travel information officers in the rotunda of the State Capitol. They are stationed in an illuminated tourism booth.

This information team has the task of acquainting the thousands of visitors to the Capitol with the State's other tourist attractions.

New Mansion Asked
Should Texas build a brand new \$500,000 governor's mansion? That is a subject of debate in the capital city.

Building Commission Director H. R. Nieman Jr., has recommended a new structure to replace the 108-year-old mansion. Budget Director Bill Cobb also has testified in favor of the proposal.

Connally, a member of the Building Commission, supports the new mansion plan. But whether he will throw his full backing behind it depends on the state's financial condition when the Legislature convenes in January.

Fisherman's Heaven
Parks and Wildlife Department spokesmen expect the out-sized Amistad Reservoir, now being fashioned from the Rio Grande, Pecos and Devils rivers, to be a heaven for fishermen.

Aquatic biologist Larry Campbell predicts that when the 6-million acre feet reservoir is completed in 1968 it will boast blue catfish from the Devil and Pecos, large-mouth bass from Lake Walk and Devils Lake, and flathead, blue and channel cat from the Rio Grande.

Underway are conversations leading to ward a joint management program for the \$100,000,000 reservoir project with the Mexican government.

SHORT SNORTS
Cigarette smokers are doing it again. Revenue from cigarette tax stamps increased \$58,048 in June over June 1963 and more than \$600,000 over May.

A gold - painted guard rail was installed along a \$90,000,000 freeway section near Winnie in Jefferson County. Freeway connects downtown Houston with Beaumont. Highway Commission Chairman Herbert C. Petry Jr. predicted it will save 21 lives a year.

Cotton still is big in Texas. Lt. Gov. Smith told the International Oil Mill Superintendents Association. During the last 10 years the state has produced an average of 3,900,000 bales a year and more than 1,600,000 tons of cottonseed, with an average value of \$715,000,000 a year.

State Hospital Board Executive Director Raymond Vowell has been appointed to two presidential advisory committees on mental retardation.

Governor Connally has named a planning committee of state officials to develop an administrative internship program in state government.

Republican candidates will attend a political school in Austin on August 20-22.

During the last week in June the State Securities Board okayed eight applications to sell \$2,055,300 in securities in Texas. A total of \$2,400,000 in additional applications were received the same week, but not processed.

know that a brewery played an important role in the the flag that inspired Francis Scott Key to write "The Star-Spangled Banner" 150 years ago this September? It's a fact! A brewhouse floor that the stars were assembled on 1776 flag that was to fly over Fort Mifflin, the stirring morning of Sept. 26, 1776, after all the British fleet to had failed.

R. McGill Mackall, noted portraitist, muralist, designer and teacher, brought the event to life in a seven by five and a half-foot oil painting commissioned by Carling Brewing Company as a means of memorializing those who fought in the War of 1812 - and, in all wars in which our colors have been carried. Carling won a Freedom Foundation Award for this project.

Baltimore is celebrating the 150th anniversary of the writing of "The Star-Spangled Banner" with spectacular events during July and in mid-September. Information may be obtained by writing to the Star-Spangled Banner Festival Committee, 409 North Charles Street, Baltimore, Md., 21201.

Nation's Top Poultry Meeting At Dallas

COLLEGE STATION — The American Poultry Congress and Exposition will have something for the entire family when it opens in Dallas, July 21, says Bill Cawley, Extension poultry specialist. The three - day show will feature outstanding scientists and leaders in the poultry industry as well as one of the largest displays of poultry equipment ever assembled in the South.

Among featured speakers at the Congress will be Dr. W. J. Stadelman of Purdue University who will report on his research concerning pesticide and insecticide residues in poultry and eggs. Other out-of-state speakers include Dr. James Williams, Federal Poultry Disease Laboratory, Athens, Ga. and Richard Carey, Agricultural Marketing Service, Washington, D.C.

Two Texas A&M University staff members will also appear on the program. They are W. S. Allen, Extension agricultural engineer who will serve on a panel to discuss poultry housing improvements and Dr. J. H. Quisenberry, head of the Poultry Science Department, moderating a panel discussion on P.P.L.O.

During the poultry meeting there will be a tea, fashion show and luncheons for the ladies. Plans for the children include air conditioned bus tours of Dallas and a "coke and splash party." A special night has also been set aside for the families attending the conference to see Six Flags Over Texas, Cawley says.

For a copy of the official agenda of the 1964 Annual Meeting of the American Poultry and Hatchery Federation, write the Texas Poultry Improvement Association, Stephenville, Texas.

Farmers produce 57 percent of the raw materials used in industry, yet only about 11 percent of the working force is on farms.

OFFICIAL RECORDS

MARRIAGE LICENSES

C. E. Spence and wife to R. Dale Spence, lot 1, block 5, South Slaton addition, gift.

At Mildred's

If you had seen Mr. C. E. Spence last Friday, going down the street with a paper bag in his hand, and asked him what was in the bag, you probably wouldn't have believed him.

It was a horned toad bagged at MILDRED'S FLOWERS. The little fellow evidently came in through the front door which had been left open. He was having a hard time trying to get around on the slick floor when Mrs. Lee found him. She was trying (with the aid of a broom) to get him out the door when Mr. Spence came in and said he wanted him. So into the bag went Mr. Frog. Mr. Spence went happily down the street with Mr. Frog who was probably wondering what it was all about.

So stop in at MILDRED'S FLOWERS and browse around. You might want a horned frog too! Adv.

FAIR WORLD FOR CHILDREN

Young visitors to New York and its Fair can use a "play break" between sightseeing sessions. To keep them amused in a hotel or motel room, try showing them how to make towers out of Beech-Nut Frosty Mint gum packages! The gum, newly introduced to the public, tastes good, too.

New York is a child's wonderland, as families who go there for the World's Fair will discover. But to help small fry enjoy the metropolis to its fullest, there are a few things you should do.

Get them some children's books about the many sights and sounds they'll find in New York—your library or book store has a long list of such books. Without a few literary "friends" to look for, New York can be a fearsome for a child—crowds, skyscrapers, shopping bags, and everything else that is so big!

Be sure to schedule at least one trip to an Automat—it's likely to please the child more than any of New York's 17,000 other eating places. Youngsters find magic in putting nickels in a slot—and the number of nickels required for an Automat meal will be pleasing to parents on a budget.

A young traveler's essential baggage should include a gaily colored party bag or shoe box filled with treats and toys to relieve boredom enroute and to brighten bedtime play in hotels and motels.

FARM NEWS

Representatives of the Plains Irrigation Ass'n. will hold a series of meetings in the 23 counties of the PCGA this summer to raise \$1 million among the growers to combat the boll weevil moving above the Cap Rock.

Congressman George Mahon introduced a bill into Congress last week making the appropriation of \$1 million in federal funds, to be matched locally. It has President Johnson's approval and will no doubt pass.

First of the meetings was held last Wednesday at Lubbock in the South Plains Electric Co-op building.

Bud Jones, district extension agent, said the extension service would use its personnel and organization within the counties to carry on an educational campaign, and county agents would present the latest information on why the boll weevil must be controlled before it establishes a foothold on the Plains.

Mrs. Jewel Robinson, Hockley county home demonstration agent, and Mrs. Mary Greenwood, county health nurse of Levelland, were injured about 2:15 p.m. last Wednesday when their car struck a highway construction front loader on Highway 385 about one mile south of Levelland.

Reports indicated the loader swerved into the lane of the women's car and was struck by it.

Both were listed in satisfactory condition at a Levelland hospital.

From Auckland, New Zealand, comes a dispatch stating the New Zealand government has taken steps to protect local manufacturers from the competition of imported materials.

Last year, the United States imported a million and a half pounds of butterfat, frozen by a recently invented process, from New Zealand, although the Department of Agriculture had approximately four hundred million pounds of butter in surplus storage. Most of it was purchased at a support price of 58 cents a pound. Some is being used in the school lunch programs, some given to welfare clients, and some is reprocessed to be donated to foreign countries under the Food for Peace program.

Texas representatives have so far been unable to get the approval of the Administration in Washington to limiting imports of beef and mutton from New Zealand.

Department of Agriculture reports that within the last ten years, more High Plains farmers are depending on low producing wells with maximum of 100 gallons per minute for irrigation. These wells are being used to

Colorado City

one half bales per acre, with staple running 1 to 1.32 inches. There is a shortage of cotton pickers in Australia, and the government is offering special inducements for cotton farmers of other countries to move there.

Texas Crop and Livestock Reporting Service estimated the spring pig crop at an average of seven pigs each farrowed by 76,000 sows. This would be 532,000 head, down 16 per cent from last year. This should keep the hog market up, and reduce some of the competition between beef and pork.

Roy Poage of Slaton will be a member of a management panel discussion at the annual Swine Short Course to be conducted at Texas Tech Thursday. The meeting is sponsored by Texas Tech's Animal Husbandry Department and Texas Swine Breeders' association.

Texas Farm Bureau President C. H. Devaney has announced a meeting in Amarillo Wednesday of this week to discuss problems of the cattle industry. Beef imports, declining prices (they went up last week), increased numbers of beef cattle, and government aid are among the subjects to be covered. The U.S. Department of Agriculture has begun work to encourage feeders to market lighter cattle, it being claimed too much fat is keeping prices down.

Reliable baby sitters are available from hotels or by inquiring at the New York Convention and Visitors Bureau across from Grand Central Station on 42nd Street.

Treat the kids to a Slaton Island ferry ride—still only a nickel! It's one of the reasons New York is a Summer Festival—and a very Fair city, indeed.

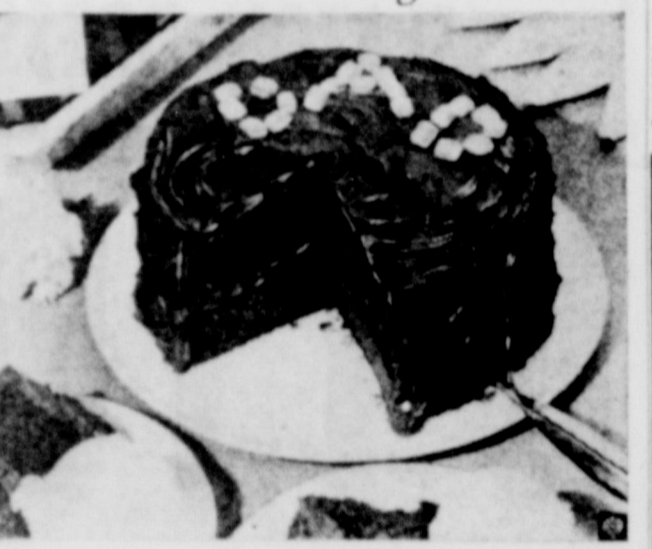

Winners and their home towns are: Craig Lawrence, Perryton; Jeannette Felix, Perryton; Carl Hudson, Groom; Becky Martin, Panhandle; Phil Fletcher, Amarillo; Cindy Gruner, Canyon; Ronnie Vineyard, Kress, and Jorja Duck, Tulia.

Larry Karrh, Hale Center; Sharon Baumgardner, Plainview; Smitty Smith, Stanton; Mary Alice Anderson, Eden; Jerry Gersbach, Holland; Patricia Kay Waythe, Chillicothe; I. E. Valenta, Hallettsville and Barbara Marie Walle, New Braunfels.

The Talent Club program was established to recognize the outstanding work being done by 4-H Club members and to interest them in cooperative activities, said Lynch. It is sponsored by the Producers Grain Corporation of Amarillo. This group provides an all-expense paid educational tour during August for one boy and one girl from each of the eight Producers Grain Corporation districts in the state.

Winners will meet in Amarillo 400 acre feet of water per acre before departing for a one-week Present maddling price is about four to points of interest in the state. Among places the 4-H members will visit are the Pro-

Dazzle Dad With Gorgeous Cake!

Surprise Dad on Father's Day with a chocolate cake you made yourself. Serve it with his favorite ice cream—and make the presentation complete with a thoughtful gift and a carnation for his pocket. What father would not be pleased with all this—especially if the cake is his favorite flavor made with an easy-to-do fudge coconut cake mix! The frosting needs no cooking... just heat, beat, beat it until it's smooth and creamy. Mints form that loved word "Dad."

- Dad's Fudge Coconut Layer Cake**
- 1 package fudge coconut cake mix
 - 4 tablespoons butter or other shortening
 - 3 cups sifted confectioners' sugar
 - 1/2 teaspoon vanilla
 - 1/2 teaspoon salt
 - 2 1/2 squares unsweetened chocolate, melted
 - 5 tablespoons milk (about)

Prepare cake mix according to package directions. Bake in two 8x8 inch pans. Add vanilla, salt, and chocolate mix well. Add remaining sugar, alternately with milk, until of right consistency to spread, beating after each addition until smooth. Then beat vigorously until mixture is creamy. Makes 2 1/2 cups of frosting. Spread filling between layers, on top and sides of cake. Write "DAD" on top with mints or miniature marshmallows.

COLLEGE STATION — Professional farm and ranch management and appraisal is becoming more and more a necessity in modern agriculture. Although the field is relatively small now, it is growing because of the changing nature of agriculture, says Dr. A. B. Wooten, associate professor in the Department of Agricultural Economics and Sociology at Texas A&M University.

Absentee ownership is increasing the need for managers of Texas farms and ranches, Wooten added. Also, as land prices rise and more land is used for recreational purposes, buyers and sellers need to rely on the services of a farm and ranch appraiser to find the market value of a tract of land.

Recently a group of 30 members of the Texas Society of Farm and Ranch Managers and Appraisers and their families met at Buchanan Lake for an appraisal shortcourse. During the two-day meeting, the specialists made an appraisal of the Lappe Ranch in Llano County. The ranch was selected because of its unique characteristic of having almost two miles of Granite Shoals lake water front and a large deer population. These two factors made it an excellent problem for the appraisers, since most land values have been determined on crop and soil productivity, building values and other similar features in the past, Wooten said.

The society meets two times each year; in the summer to study new farm and ranch appraisal methods, and in the winter to study farm and ranch management. Their next meeting will be in January at Texas A&M.

COLLEGE STATION — Hail damage to grain sorghum can be very devastating but it is sometimes possible to produce a crop from the regrowth if the damaged stalks are shredded, says Ben R. Spears, Extension agronomist, Texas S&M University.

Success of this regrowth crop in the central and south central portion of the state, says the agronomist, depends primarily on these factors: insect damage, temperature and soil moisture, and disease.

Insect damage results primarily from the sorghum midge. The larva or maggot of this destructive fly feeds on the internal content of the seed, causing the grain heads to appear "blighted" or "blasted."

The first crop is usually harvested around July 15 in the Angleton area. If damaged by hail, the crop, shredded in the bloom stage, will require another 30 to 60 days before

reaching this stage again, says Spears. Although occurrence of the midge in damaging numbers cannot be predicted, it may be serious if soil moisture is adequate for host plants such as Johnson grass or Sudan grass.

Spears warns that precautions should be taken to detect the midge and that promises of a good yield may warrant the use of an insecticide as a control measure. Among the approved insecticides are Sevin, Endrin, Trithion, diazinon, toxaphene and parathion. Recommended instructions should be followed in their application and all restrictions should be carefully observed.

Temperature and soil moisture are also important considerations. Heat will often limit yields from a regrowth or sorghum as will poor soil moisture, comments Spears.

Head smut is one of the most damaging diseases to grain sorghum and may also be an important growth-limiting factor. In regrowth of a susceptible hybrid, the disease has been observed to range from about the same as the first growth to 400 percent more, Spears adds.

Don Crow of Don Crow Chevrolet Co. has been honored with appointment as an Area Director of the Texas Automobile Dealers Association.

His appointment was announced by Cecil H. Elder of Midland. Elder is president of TADA, a statewide organization with a membership of more than 1,400 franchised new car and truck dealers.

As an Area Director, he will advise with the TADA Officers and Board of Directors on legislation, highway safety, and research designed for the benefit and protection of the motor vehicle buyers of Texas.

"These are important areas of our activity as an association," Elder pointed out. "We are fortunate to have men of this calibre working in our organization to strengthen laws affecting Texas motorists, and to help us provide maximum service and security for the motoring public."

Crow will serve as an Area Director of TADA until the Association's 1965 convention next May.

Be thankful life isn't as tragic as portrayed in TV series.

It may be a bit too early to do your Christmas shopping—who knows who your friends might be by Christmas?

Is there anything more embarrassing than jumping at a conclusion that isn't there?

Boss: "When I was out did you take any messages?"

Office Girl: "No, sir. Why, are there some missing?"

"I'm going home to mother. I should have listened to her 20 years ago."

"Go ahead—she's still talking!"

Breakfast Is Important

Skipping breakfast is not a good idea at any age, and is particularly harmful for youngsters and teenagers, Extension Service food and nutrition specialists say.

The human body needs refueling regularly, and breakfast is the meal that follows the longest stretch of non-eating.

Research has shown that, without an adequate breakfast, fatigue sets in earlier, irritability is increased, work output is reduced, and virtually all reaction time slows down. School children do not learn as easily, for they lack energy and sometimes become behavior problems.

Lack of time is the most frequent reason given for skipping or skipping breakfast, says Mrs. Gwen Clyatt, Extension consumer marketing specialist, and Extension nutritionist. This shortage of time is mostly a habit and can be corrected by revising one's schedule and getting up a few minutes earlier.

Breakfast should be a family affair. Then everyone has the advantage of a good breakfast and the young people form a habit that will stand them in good stead the remainder of their lives.

False Alarms

The Fire Department answered two false alarms Wednesday, one on East Crosby and one on West Division Street.

Besides the inconvenience to the voluntary firemen and the expense to the city, there is always danger of a traffic accident when the fire equipment answers an alarm.

The law provides a fine up to \$200 for turning in a false alarm.

Electric brakes on the aerial tower ride at the New York World's Fair became locked last Thursday, trapping a dozen people aloft.

Firemen and policemen brought a father and his four children down from the 200-foot level after they had been held there two hours.

The other gondola, occupied by two adults and five children, stalled at the 100-foot level. It took rescuers more than three hours to unwind the cable by hand.

ALL ABOUT CARPETS

One chilly evening, a Stone Age hunter put the fleece sheep between himself and the cave floor—and the carpet was born. The Babylonians were making some of the most beautiful ever woven—4000 years before Christ! Invading Roman armies carried carpets with them for warmth and comfort. Cleopatra had herself wrapped in one—and set at the feet of the mighty Julius Caesar. Carpets were also the "jet" transport of the Arabian Nights.

When carpets and rugs first began to appear in Europe from the Near East, they were used on tables and cupboards, and were spread over boxes and chests. This is how they first appeared in pictures and portraits, and they can be especially well studied in the interiors which the Dutch artists loved to paint.

The first rugs to reach the West were Turkish—but some connoisseurs say that the loveliest carpets of all time were the Persian rugs of the Sefavid dynasty (1499-1736). These were worked out by the Persian painters. No money was in obtaining the very best materials for the rugs.

A strictly modern design is the outdoor carpet, known as the outdoor carpet of New Orleans, made even and durable with non-polypropylene fibers on patios, docks, porches and poolside—indoors in recreation beach houses. Only a Vectra is weatherproof, shrink, rot or mildew actually be bound down. Fast outdoor carpet in green, bronze or coral.

125 in 1963 They will area recognize at Plains Council Eagle Scout Honor in October of 1964.

Marketing research transferred from the U.S. Department of Agriculture's Agricultural Marketing Service. Agricultural Research Better overall recognition is expected as of the transfer.

Eagle Scouts

On Monday, July 6, Eagle Scout Awards were made to Explorer Scouts Byron Johnson and Billy Martin at a meeting of Explorer Post 125 of Slaton. These two Explorers are the first from Post 125 to receive their Eagle Award, the highest rank in scouting. Eagles Johnson and Martin entered scouting as tenderfoot scouts when they joined Boy Scout Troop 128 in December, 1959. They later transferred to Scout Troop 125. They became charter members of Explorer Post

ATHLETE'S FOOT HOW TO TREAT IT

Apply strong T-4, liquid. Feel it take hold to check itching, burning in minutes. In 3 days, watch infected skin slough off. Watch healthy skin replace it. Be pleased in ONE HOUR or your 4th back. Use antiseptic, soothing T-4, FOOT POWDER too—fine for sweaty feet, foot odor. TODAY at all drug stores.
