It's a woman's WHIRL

BY LAVON NIEMAN

Seems most women's clubs are busy preparing material for yearbooks. As in the past, we at the Slatonite will like a copy of your yearbook in order to do a better job reporting club news.

The reporter of your club has an important job (or we think so). We would like to encourage all reporters to bring their club news in at the earliest possible date. Deadline is 5 p.m., Tuesday unless your club meets on Tuesday night, and then we'll try to get it in that week's paper if you will call or bring it by early Wednesday morning.

While on the subject of reporting, I would like to mention something else. On showers... if one hostess could be designated to turn a story into us by deadline time, it would be appreciated by us... and the bride or honoree.

If you folks at Southland are afraid Tommie Wilke has quit her reporting, don't be dismayed. Her phone was out of order Monday... and too, there's a wedding in her family Friday.

She has threatened to quit if she doesn't start collecting more news though.

And another dear rural correspondent that will be back pecking away on her typewriter next week is Doris Thomas who will again be reporting the Roosevelt goings - on. Why don't you people over there surprise her and call her (Phone 842-3572) all the news you know by Monday noon and let her know you are glad she's back at the typewriter.

Now that I've mentioned Tommie and Doris, I'll just have to express my gratitude to Polly Melugin who reports the Wilson News and Mrs. Anna B. Gentry who reports the Posey News.

Rural correspondents aren't paid very well. They report because they enjoy it and love their communities and the people in them. You can make their job much easier by reporting your news to them promptly.

In a recent release we received, it stated that perhaps people took our country and our free heritage, as well as its symbol -- the flag -- much too much for granted. It listed 16 days of the year when it would seem vitally important that the Stars and Stripes be flown proudly everywhere in these United States.

Labor Day, which is this coming Monday, was one of the days listed. Two more very soon are Sept. 17 which is Citizenship Day and Oct. 12 which is Columbus Day.

If you own a flag, fly it. If you don't, maybe it would be a good investment.

Bridal Courtesies Honor Miss Kitten

Miss Charlene Kitten, bride-elect of Steve Ball, was honored recently with a bridal shower in the home of Mrs. Alex Bednarz.

Mrs. Nestor Kitten, mother of the honoree; Mrs. Bill Ball, mother of the prospective bridegroom; and Mrs. W. L. Meurer and Mrs. J. J. Kitten, grandmothers of the honoree,

were special guests.

Assisting at the bride's book was Miss Cassandra Kitten, Misses Joan Bednarz and Joyce Kitten presided at the serving table.

Yellow and gold, the honoree's chosen colors, were used in table decorations which also featured silver appointments. An electric mixer was presented as the hostess gift. Approximately 150 guests attended.

Mrs. O. F. Kitten was hostess last Sunday for a kitchen - gadget shower honoring Miss Charlene Kitten, bride - elect of Steve Ball.

Mrs. Nestor Kitten, mother of the honoree, and Mrs. Bill Ball, mother of the prospective bridegroom, were special guests.

A cookbook was the hostess gift. Forty - five guests attended.

Homemaker of Month

Mrs. Gilliland Shares Recipes

Mrs. Jack Don Gilliland, mother of three children, was selected as "Homemaker of the Month" for the Slaton Young Homemakers. She was also asked by a reporter from the Slatonite to share some of her favorite recipes with us.

She is shown in the picture above with her children, Lance, 6, Steve, 7, and Tyra, 2. They will be in the first, second and third grades this year, and Mrs. Gilliland (or better known as Charlene) says she knows it's going to keep her busy keeping them in school and enough clothes washed and ironed.

Tyra is seated in front of her bedroom dresser that Charlene antiqued this summer. One of Charlene's favorite pastimes is antiquing furniture and she refinished Tyra's complete bedroom suite this summer.

Although not being a hobby, Charlene spent many hours this summer canning and freezing fresh vegetables and pickling okra. Her recipe for pickled okra is below.

Charlene's husband is manager of Wilson Lumber and Supply. The couple was raised in Slaton and reside at 345 So. 9th Street.

The Gillilands are members of the Church of Christ. They enjoy watching football games and going fishing.

Obey Traffic Rules and Signs Around All Schools

Dear Driver:

TODAY, MY DAUGHTER, who is six years old, started to school for the first time. Her brother was with her, but he's only nine himself, and he still looks pretty little to me. Their cocker spaniel, whose name is 'Scot' sat on the front porch and whined his canine belief in the folly of education as they waved "goodbye" and started off to the halls of learning.

LAST NIGHT WE TALKED ABOUT SCHOOL — my daughter and I. She wondered what the teacher would be like . . . she hoped she could sit beside Mary (the little girl next door). She said her "letters" for me—just to be sure she knew them. Oh, we talked about a lot of things —tremendously vital, unimportant things. Then she tried on her plaid pinafore to show me . . . and then to bed.

SHE LOOKED SO HELPLESS — sound asleep, with "Princess Elizabeth" (that's her doll) cuddled in her right arm. You see, I'm her daddy. When her doll is broken or her finger is cut, or her hand gets banged, I can fix it—but when she and Brother start to school, when they walk across the street, then they're in your hands.

THEY'RE NICE KIDS, both of them. They like to ride horses and swim and hike with me on Sunday afternoon. But I can't be with them all the time. I have to work to pay for their clothes and education. So please help me look out for them. Please drive carefully past the schools and intersections—and please remember that children do run from behind parked cars.

PLEASE, DON'T HURT MY KIDS! —A Proud Daddy

THE GOLDEN YEARS

LEAVING MONEY TO HEIRS? HERE'S A WARNING FOR YOU

You are of retirement age and have an estate of, say, \$24,000. It is neatly wrapped up in a good will for your children, which means they will get \$8,000 each.

When a decent interval after the funeral has passed they can drop by the lawyer's office and pick up their bonanza.

If this is the way you are figuring things -- which is about the way most retired people seem to be figuring them -- you are living in a dream world.

This week a 40-year-old man, who will be called Whitmore, revealed just what had happened to the estate of his retired father. The estate amounted to roughly \$75,000. As of this week, about \$12,000 of this, or nearly one dollar out of every six, has gone up in smoke. And the five children still haven't gotten their hands on any money, though the funeral of the father was nearly a year-and-a-half ago.

These are Mr. Whitmore's figures (and as you read them keep in mind that the administration of the estate has been of very high caliber and the integrity of the attorney and courts involved is beyond reproach):

State inheritance tax	\$6,884
(This would vary in each state.)	
Attorney expense	1,600
Administration expense	1,200
Funeral expenses for father	1,022
Federal estate tax	692
Court costs	191

Then there were bonding costs for the administrator, federal and state income taxes owed by the father, and a few other odds and ends.

The five children probably will get all their money in about two years after the father died, and instead of getting the \$15,000 each the father had expected will wind up with about \$12,000 each.

What can you who plan to leave your \$24,000 at \$8,000 each to your three children do about this matter?

1. You can figure in advance, or right now, that they aren't going to let you out of the cemetery, once they get you there, to come pound on your lawyer's desk. Which is one reason why the legal profession has been getting by with so much nonsense on estate matters.
2. You can figure, also now, that you have to pay taxes to die as well as to live, and that state and federal governments, no matter what, will probably take a cut out of whatever pot you leave;
3. You can figure, now, that it is an effort for anybody to unravel an estate, especially one involving real estate, and that the attorneys and administrators doing the job are entitled to be paid;
4. You can make certain that you have an honorable lawyer ... but also a knowledgeable one who knows how costs and taxes can be reduced on an estate. You also can talk to a trust officer in your bank to see if any sort of trust arrangement ...

might be better for your heirs than a will;

5. You can tell your children you don't have as much money as they think you have -- you won't have after you die. And remind them they won't get it next Tuesday, and unless they're lucky won't get it even next year.

For the GOLDEN YEARS 36-page booklet, send 50¢ in coin (no stamps) to Dept. CSPL, Box 1472, Grand Central Station, New York, N.Y. 10017.

An eastern professor visiting the University of California was impressed by the beautiful buildings, the miles of eucalyptus-lined lawns, the athletic fields. "Wonderful," he said to his guide, a dean, "and just how many students do you have here?" "Let me see," the dean answered thoughtfully, "I'd say about one in a hundred." ... A Republican in Congress ruefully reports: "A young man wrote his congressman that he had decided to enter politics but was having a hard time deciding which party he should represent. His congressman replied: "Son, which party you happen to choose doesn't matter too much. Run under the banner on which you can get elected. If elected as a Democrat, you'll have lots of company; if elected as a Republican, the game laws will protect you."

SUNDAY'S SERMON

RESPONSIBILITY

If it is true that some modern teenagers do not have the proper respect for their elders, a sense of proper responsibility, and adequate respect for their country and its tradition, then who is responsible?

A certain portion of the responsibility must fall on teenagers — the teenagers of yesterday who are the parents of today.

There is no shirking, no casting aside of the trust that training, discipline — and love — within the family circle set the pattern of young footsteps.

The child must be led. Youth must be advised, counseled, and, at times, disciplined. A child should not be excused for a wrongdoing on the basis that he or she isn't old enough to know right from wrong. They must be shown what is right and what is wrong.

Too many dodge their parental responsibilities. Too many excuse or place fault where it does not belong.

Basically, teenagers are no different than they were a generation ago. There may be an obvious minority to consider an exception. These, for one reason or another, have been denied the guidance of responsible parents.

FROM HAWAII -- Miles Beard, son of Mr. and Mrs. Beard, returned Sunday night from a "dream in a trip to Honolulu, Hawaii where he visited relatives. He came with some coral he obtained while there. (SLATONITE PHOTO)

BEARD HOME FROM HAWAII

A first cousin just the same age who happens to be from Honolulu, Hawaii can be quite advantageous. Any boy who is the son of Mr. and Mrs. Miles Beard, of Slaton, thinks that a trip to California is a dream in a trip to Honolulu, Hawaii where he visited relatives. He came with some coral he obtained while there.

A person may not own land in Hawaii. One leases the land, but can own his home. The houses are of loose construction and very open. There are cars in Hawaii, but most young people rent cars, which are plentiful. The cars are small and older models.

There are hardly any true Hawaiians left. They have intermarried with the Orientals, which is the main nationality now. There is one island that is owned by the Robison family, that is trying to keep the native Hawaiian alive. One can only enter the island by invitation and once a Hawaiian leaves he may never return.

Rodeo Slated At Boys Ranch

The 346 boys now at Cal Farley's Boys Ranch will put on their 22nd annual Labor Day rodeo, Sunday, Sept. 4th and Monday, Sept. 5th.

Nearly 100 Ranchers will ride for awards and honors. The Brahmas and horses used in the bull-riding and bareback-bronc events are professional rodeo stock. A special event will be the "stick-horse" race for the four to six-year-olds.

The boys who are learning meat-cutting and cooking as their future vocations will barbecue giant-size beef sandwiches for spectators and visitors who arrive early to picnic. Ranchers who do not ride will be working as ushers, in the parking area, at concession stands, or helping around the chutes. All of the boys will have a part in the rodeo.

The climax of the rodeo will be the naming of the Junior and Senior All-Round Cowboys, two of the highest honors that can be earned by the boys.

Performances will take place at 2 p.m. in the Ranch's arena. Tickets for either performance are available in advance from the Boys Ranch office, Box 1890, Amarillo, Res. Reserved box seats are \$2.50, general admission is \$1.50, and childrens and servicemen's tickets are 75¢. All proceeds will be used for future expansion of the Ranch.

TIPS FOR OUTDOORSMEN

by Vern Sanford

.22 BIRDSHOT CARTRIDGES—If you are one of those rare sportsmen who is so good a shot with conventional shotgun loads that there is little challenge left, try shooting birds—quail and smaller game—with a .22 rifle, loaded with shot-filled cartridges.

Size 8, 9, and 10 are good shot sizes to use. Using such a pee-wee load is guaranteed to test the skill of even the best marksman—and the shot won't hurt your gun barrel.

CHOOSING A CAMP TRAILER—There are so many trailers on the market today that the novice camper is certain to be bewildered. One user suggests that the most useful trailer for a camper is one that has built-in conveniences, such as bunks, gun and fishing rod racks, and that measures 17 to 19 feet in length.

HANDY THING TO HAVE—Ask any one of a dozen experienced sportsmen who do much camping if he has a roll of friction tape with him and he will answer yes.

This little commodity is invaluable outdoors. It is ideal for starting campfires in wet weather, or for binding together brush and limbs when erecting quickie bad-weather shelters.

FLY-FISHING SKILL—Most experts claim that less than five per cent of an angler's success when fly-fishing is due to the fly selected.

On the other hand, skill and aptitude in presenting a fly to the fish is responsible for more than ninety-five per cent of his catches.

Think of that, chum, next time you lazy out on your fly-casting practice.

NYLON SOAP CONTAINER—Drop a bar of soap on the ground at camp and it gets covered with dirt that's hard to get off.

Eliminate this nuisance by dropping your soap in the toe of an old nylon stocking. Hang the stocking near the wash basin and soap up without removing the bar from the stocking.

Suds come right through the fine nylon mesh.

RODS IN COMBO—Ads often offer "combination" casting and spinning rods.

Such a rod, if of high quality, can be used as a makeshift, or in an emergency. But for best results use casting rods for casting and spin rods for spin fishing.

Police Check Thefts, Two City Mishaps

Activity on the police scene was relatively quiet the past week, according to a check of records at the police station.

Three cases of breaking and entering of homes were reported, several complaints on dogs were filed, one burglary was reported, and 18 jail arrests were made.

Two accidents were investigated by police. A Monday crash occurred on Lynn near 21st street when a car driven by Gary M. Angle, 15, collided with a parked car owned by Pioneer Natural Gas. Angle was injured and taken to Mercy Hospital. The crash occurred at 7:57 p.m. Damage was estimated at \$1,100 to the cars.

In another accident last Friday at 1:05 p.m., a car driven by Glenna M. Payne was in collision with a pickup driven by Naomi J. Boyd. Damage was estimated at \$350 to the car and \$5 to the pickup.

Huser Hatchery reported a burglary last Saturday morning. The building had been broken into, and missing was \$2,40. Vandalism also was reported. Pip Dawson also reported Saturday that his house was entered and phonograph records taken. Two juveniles were later questioned and admitted taking the records.

Ramos Rolfe, 455 S. 3rd, and Ruby Warren, 1055 S. Oklahoma, also reported their houses had been broken into with clothes and other items missing and some vandalism occurring.

One woman reported her 13-year-old daughter was bitten by a dog, and several other dog complaints were called into the police.

Jail arrests included five for possession of alcoholic beverages by minors, seven for drunkenness, three for disturbance, two for making alcoholic beverages available to minors, and one for drunk-in-car.

Dove Season Opens Sept. 1

Dove season opens today (Thursday) in the North Zone of Texas, with shooting hours from noon to sunset.

The mourning dove daily bag limit is 12, and the possession limit is 24, according to hunting regulations announced by the Texas Parks & Wildlife Department.

The north zone dove season is from Sept. 1 to Oct. 30. The South Plains and Panhandle area, covering a major portion of the state, South zone season opens Sept. 24 and extends to Nov. 22.

Shotguns must be plugged permanently to three-shell capacity and may not be larger than 10 gauge. Hunting doves with rifles is prohibited.

Resident hunting licenses are \$3.15. Individual fishing licenses cost \$2.15 for both residents and non-residents. Basically, persons 17 years of age and under 65 need the regular Texas resident licenses.

New hunting and fishing licenses are required Sept. 1, start of the new fiscal year. In Slaton, licenses are available at Lasater-Hoffman Hardware and White's Auto.

Hunters are reminded that permission should be obtained to hunt on land other than their own.

COTTON TALKS

FROM PLAINS COTTON GROWERS, INC.

Some three weeks or more ago Donald A. Johnson, Executive Vice President of Plains Cotton Growers, Inc., reported USDA plans were in the mill to "freeze" about 85,000 acres of the 1967 Texas cotton allotment and about 150,000 to 200,000 acres of the national allotment.

Involved are acres not planted in 1966 as a result of the required productivity adjustments on allotments transferred by sale or lease from an area of low productivity to areas with high yield histories. Johnson reported that USDA was planning to "freeze" these acres at the state level, depriving producers of the opportunity to plant them.

Now the report has been confirmed. But Johnson still maintains the procedure is outside the law in that it will reduce the national minimum allotment below the minimum 16 million acres set by Congress in 1958. Under Secretary of Agriculture, John A. Schnitzer, replying to a question from Congressman George Mahon, has said in a letter that instructions to implement handling of such acreage are now being printed. Mahon asked: "Will the sale of cotton acreage from low yield to high yield areas hurt our state and affect the state and national allotments?"

In short, Schnitzer replied that the state's allotment would be the same as if no acres had been transferred and that no one would be adversely affected by transfers. But in the same paragraph he said that the acreage apportioned to counties and to producers from the state allotment would exclude acreage not planted in 1966 because of sale and lease transfers. The state gets the acres, but is not allowed to plant them.

PCG is not willing to drop the matter, and reproduced below is the text of a letter to Mr. Mahon from Johnson, through which Johnson hopes to get additional consideration for his views.

"Reference is made to your recent letter from Under Secretary John Schnitzer concerning the effect of relative productivity adjustments under allotment transfer provisions on future State allotments.

"We are in agreement with and fully appreciative of the fact that... the State of Texas will not receive a reduced share of the national acreage allotment for 1967 or any subsequent year because of productivity adjustments."

"But, as we understand them, two other statements later in the same paragraph are difficult to reconcile.

1. "However, the allotment attributable to the history acreage reduced as a result of the adjustments will be frozen at the State level, that is, it will not be distributed to counties or farms."

2. "The freezing of allotments in connection with sales, leases and transfers by owners does not adversely affect any person involved in the transactions — either in the first year of the transfer or any subsequent year."

"Texas' share of the 16.2 million acre national allotment in 1967 has been set at 6,841,084 acres. But if something like 85,000 acres of this is to be frozen at the State level and not passed down as acres available to counties for planting, does this not have the effect of reducing the State's cotton allotment by almost 1-1/4 per cent? And will

not each producer, including those involved in sales and leases, suffer his proportionate share of the lost acres? "If our thinking is correct, it would appear that the combined total of such frozen acres for all

the cotton producing states would reduce the acres available for planting in 1967 and future years below the 16 million acre legal minimum set by Congress in 1958.

"Also, we would like to know what effect the acres 'regarded as planted to maintain the allotment and history acreage' will have on the State's projected yield. Dividing total State production by an acreage higher than that actually planted would tend to reduce the average per acre yield for the State, which in turn would depress projected yield. And under the present program projected yield is syn-

onymous with dollars and cents to our producers.

"These are matters we feel need further clarification from the Department. And if our views prove correct, we would urge that the acres under discussion be made available to producers for planting, giving them the full benefit of the 16 million acre legal minimum allotment and eliminating any detriment to projected yield computations."

One of the most frequently and fervently discussed subjects in Texas lately has been the Texas Water Plan and the future

water requirements of Texas which prompted its conception.

In this area, Plains Cotton Growers, Inc., has its Water Committee. Texas Tech has the West Texas Water Institute. There's a "2020" Water Committee with representatives from business, industry, agriculture and finance. The West Texas Chamber of Commerce has its Water Resources Committee.

And all of these are seriously concerned with the future of the area as it relates to water for municipal, industrial and ir-

rigation uses. But it's not just West Texas or Texas or even just the United States that has water problems. Here are some water facts from an article in Business Week, which quotes a study committee of the National Academy of Sciences.

Over 97.2 per cent of the world's water is in the oceans or inland seas and is unfit for use without costly refinement. Another 2.1 per cent is frozen in glaciers and icecaps, leaving only 0.7 per cent in rivers, fresh water lakes and underground deposits. That 0.7 per cent still might

be sufficient to answer all fresh water demands if it were all above the earth's surface. But, say the experts, two of the most unchanging things about the world's supply of usable water are its unequal distribution of the fact that 97 per cent of it is underground.

The report does say that there is no indication of an over all shortage of water in the U.S. for the balance of this century. But there is danger of regional water shortages, particularly in the northeastern states.

The U.S. and the world has the same problem Texas has — unequal distribution.
