UTILITIES CO. LOWER RATES FOR PUMPING

Officials Meet With Commission; Judge Kelso Present

Judge I. R. Kelso, of St. Louis, Mo., president of the Texas Utilities Company, and allied companies, was in Slaton last Saturday and again Monday conferring with the city officials and to announce a further reduction in the schedule of rates charged the city under contract for pumping the city's water supply.

The reduction amounts to approximately 30 percent below rates heretofore in force, and is a voluntary reduction on the part of the Company, and of course much appreciated by the people of Slaton. This reduction will enable the city to pump twenty-five percent more water at no increase whatever in cost, and will result in cheaper water to consumers, especially those who use a large quantity.

Some five years ago the Texas Utilities Company put into effect what is known as the Development rate, applicable only to municipalities signing twenty year contracts for pumping and street lighting. Since those contracts were signed the Company has made some substantial reductions in its street lighting schedules in all those towns operating under the development rate. It is now putting into effect, under agreement with the cities, a new rate for water pumping, which is a reduction of about thirty percent and will mean an enormous saving to the City of Slaton on its annual pumping bill.

This new low rate will continue in force, under the terms of a contract signed with the city, for a period of five years, and at the expiration of that period the Company announces that there will be another adjustment in its development rate. A few months ago the Texas Utilities Company, by voluntary action, reduced its street lighting rates in force throughout this southwestern section, and Slaton got twenty-two additional street lights without any additional cost. The water pumping rate is on a sliding scale, so that as the volume of water consumed increases the rate is automatically lowered. The new rates are to be effective immediately.

Judge Kelso was accompanied to Slaton last Saturday by E. S. Billings, chief engineer of Community Power & Light Co., of St. Louis; J. B. Scott, district manager of Plainview, and H. L. Allen, local manager at Lubbock. On Monday he was accompanied by Mrs. Kelso and their daughter, Mrs. Renfrow, wife of Dr. L. H. Renfrow of St. Louis.

On Saturday and Monday evenings Judge Kelso met with Mayor Reese, Commissioners Bradley and Loken and City Secretary Harvey Austin, and at the Saturday meeting all the above named gentlemen of the Company, together with J. A. Elliott, Slaton manager, and R. A. Baldwin, local attorney, were present and various phases of the pumping and lighting question were thoroughly discussed.

While here, Judge Kelso gave out some interesting statistics concerning the wonderful development the Company is accomplishing in this southwestern country. Ten years ago they had only seventy miles of power lines, while now they have of 700 miles, serving a vastly greater area with twenty-four hour service and low rates, the lines extending from Pampa to Post and from Portales, N. M., to Post, Texas. Judge Kelso is president of three companies in the southwest, the first, known as the Texas division, is called Texas Utilities Company;

(Continued on Page 2.)

OFF ON BUSINESS.

Dr. J. L. Rice, local dentist, accompanied by his wife, are in Sweetwater and San Angelo this week, transacting business. Dr. Rice stated he expects to return to Slaton during the latter part of the week.

February Express Business Exceeds That of January

Although the volume of express business in Slaton for the month of February was above the record for January, the amount was still far under the required minimum to justify maintenance of free delivery and collection service, according to a report from G. Y. Reed, of Fort Worth, superintendent of the Railway Express Agency, successors to the American Railway Express company.

The volume for February was \$1,048.88, about \$42 more than for the preceding month. The figure required for regular express delivery service is an average of \$2000 monthly. February's gain over January was really larger than the figures indicate, however, due to the fact that January had 31 days as compared with only 28 in the succeeding month.

Mr. Reed furnished the figures to the Slaton Chamber of Commerce and the Retail Merchants' Association, expressing the hope that additional business might be given the company by local business firms.

Mrs. Staggs was Hostess to Club At Saturday Meet

The Civic and Culture Club met last Saturday at the home of Mrs. Sam E. Staggs. With the president in the chair, a lengthy business meeting was conducted.

Delegates were elected to the district Federation meeting to be held in Snyder, and committees were appointed to make all arrangements for the county Federation meeting to be held in Slaton April 27, with the three Federated clubs of Slaton to act as hostess.

A very interesting lesson on Texas History was conducted by the leader, Mrs. W. E. Smart. The Fredonian Rebellion was discussed by Mrs. S. H. Adams, and Mrs. Lanham gave incidents in the early social life of Austin's colony. The Early Laws of Texas, was discussed by Miss Klattenhoff, and Mrs. Robertson gave a report on Noah Smithwick's book.

A plate lunch was served sixteen members and two guests, Mrs. Chas. Culp, of Big Spring, and Mrs. Jack Wolfskill, niece of the hostess.

The next meeting will be on April 13, at the home of Mrs. S. H. Adams.

Funeral for Mrs. McCall Held Sat.

Mrs. T. C. McCall, of Slaton, aged 24 years, died at a Lubbock sanitarium early Friday, March 22, following an illness of about three weeks. Pneumonia, following an attack of influenza, was said to have been the cause of her death.

Funeral services were conducted Saturday afternoon at the First Baptist church at Lubbock, with the pastor, Rev. W. R. White, officiating. Interment followed in the Lubbock cemetery.

Immediate relatives surviving the deceased are her husband, T. C. McCall and two small daughters, ages 5 and 2 years, of Slaton; her parents, Mr. and Mrs. J. A. Green, six brothers and one sister, all of 2008 Eighteenth St., Lubbock.

A large number of friends of the family from Slaton attended the funeral. Pall bearers were N. F. Cherry, W. M. Rust, W. G. Elkins, C. S. Greer, R. W. Amie, all of Slaton, and employed by the Santa Fe as trainmen, and Jack Burk, Santa Fe yardmaster, of Lubbock.

Mr. McCall is an employe of the Santa Fe here, having come to Slaton several years ago.

VISITS SISTER HERE.

Miss Cleon Simpson, of Los Angeles, Calif., is here for a few days' visit with her sister, Mrs. A. R. Keys, and family. Miss Simpson was called from California last week due to the serious illness of her father, Ira Simpson, of Lockney, who was injured in an automobile accident.

Author of "Santi"

ATTORNEY R. A. BALDWIN, OF SLATON

Slaton Man Writes Thrilling Novel; Will be Put on Market Very Soon

Meador Publishing Company, of Boston, Mass., have announced the publication of a work of fiction, entitled "Santi," written by our esteemed fellow citizen and local attorney, R. A. Baldwin. The book is not yet out of the bindery, but it is anticipated that it will reach the dealers within a few days, and all indications are that this is a book that is going to enjoy a vast sale. It will be on sale at local book stores, and throughout the country, our information comes from the publishers that it will be advertised nationally. This it deserves to be.

While Mr. Baldwin's book is not off the press, the editor has been privileged to get galley proofs of the story in advance of publication; and those we have read with delight, the tale holding our interest until up in the wee sma' hours—fascinated, thrilled, pleased, all expectations more than satisfied.

Other newspaper men, too, have had the privilege of reading the galley proofs of "Santi." The literary editor of a big Eastern paper, The Morning Call, of Paterson, N. J., said of Mr. Baldwin: "He has an easy, graceful, fluent style." We found it so. That same reviewer said of the author, "He lays bare the soul of the thrill murderer with a master hand. There is nothing mawkish or morbid in the tale. It is a novel of singular power and macabre interest." The reviewer even went so far as to liken the author of "Santi" to the great naturalistic French novelist, Zola.

That Mr. Baldwin has achieved a work that will receive the plaudits of those best able to criticize, we have not the slightest doubt.

We are not going to tell you the absorbing story that waits for you between the covers of this book. That could not be done like the author has done it. The publishers have correctly described the book. "Santi" is not primarily a crime story, nor purely a detective novel. It is, in truth, both of these things, but we would class it as a psychological novel—the laying bare, with successive thrills, of the inner workings of a criminal mind and a guilty conscience.

The name of the book is taken from the name of the principal character that is drawn with power and realism. Brilliant in intellect is Francis Roland Santi, cool, calm, cold-blooded, self-centered and egotistical, belonging to the young intellectuals and a self-styled superman who conceives himself to be a law unto himself in the social structure. He decides, for his own satisfaction, and as a great scientific experiment, to test the super-sagacity and ingenuity of his own intellectual powers. Accordingly, with unsurpassed coolness and with almost unprecedented precaution, he plans and executes a most diabolical crime. That only starts you on this tale.

What is the effect of an erroneous philosophy on one's life? What wreck and havoc and ruin can be wrought on the innocent by one wrong deed? What great and inexorable law of

(Continued on Page 2.)

Tri-Motored Ford Plane Will Visit Slaton Tuesday

Through the efforts of P. G. Stokes, local Ford dealer, a 16-passenger, tri-motored, mammoth Ford airplane will visit Slaton next Tuesday, April 2.

C. W. Hardin, business manager of the Kenyon Transportation Company, of Minneapolis, the pilot who gave Col. Charles A. Lindbergh his first training in parachute jumping, and worked with Lindbergh for two years when the latter was training at Lincoln, Nebraska, was in Slaton today in conference with Mr. Stokes, and securing a landing place for the hugh plane.

This plane, the largest ever to visit Slaton, will land here at nine o'clock Tuesday morning, Mr. Hardin stated, and will carry passengers for flights throughout the day. From ten to sixteen passengers will be carried on each flight, he said.

The Kenyon Transportation Company has had this big plane in the South during the winter months, making flights at various fields as an aid to getting the public "air-minded". The plane is virtually new, it was said, being out of the factory only three months. It is licensed and has a crew of seven, including two licensed pilots and several licensed mechanics.

Trips will be made throughout the day just as rapidly as loads of from ten to sixteen passengers arrive. A minimum of ten passengers is carried, Mr. Hardin said; as it requires that many fares to meet the high cost of operating the big plane.

From an approximate altitude of 3,000 feet, "Shorty" Rabock, world famed for parachute jumping, will jump from the cabin of this huge craft of the air, according to advance information received here by the local Ford dealers. This feat, it is believed, will be an unusual thrill for all on-lookers. The jump will be made at 3:30 p. m., Mr. Stokes said.

Eaton is Named Leader of Scouts

George Eaton, who for a number of years has been connected with Scouting activities in Lubbock, has been appointed acting field executive at a nominal salary, it was announced Friday by K. N. Clapp, Scout commissioner and acting area executive.

Mr. Eaton will assist Mr. Clapp and the Rev. L. G. H. Williams, president of the council, in doing servicing work throughout the council. He has been connected with Scouting work here for the past six years, being Scoutmaster of Troop No. 6 for the past two years.—Lubbock Daily Journal.

SOUTHLAND GINS 3,738 BALES.

Following the closing down of Southland's gins for the season, it has been announced that 3,738 bales of cotton were ginned there this season. This number is approximately 700 bales short of last season's run in that city, according to the Southland Sun.

VISITING IN ABILENE.

Mr. and Mrs. J. I. Drewry and little daughter, Inez, went to Abilene Friday, where they are visiting Mrs. Drewry's sister, Mrs. Fred Jones, and family. Mr. Drewry plans to go to Sherman to visit his mother before their return to Slaton.

MANY ATTEND PROGRAM.

Many Santa Fe employes and their families, and others as well, attended the Santa Fe Reading Room program, given at the high school auditorium here Monday evening of this week. Dorothy Cameron Concert Company, composed of five musical artists, entertained the audience.

HOME MAKERS CLASS WILL MEET WEDNESDAY.

The Home Makers class of the Baptist Sunday school will hold their next regular business and social meeting at the home of Mrs. W. M. Rust, at 500 East Crosby St., on Wednesday of next week, April 3. The meeting will begin promptly at 2:30 p. m., and all members are urged to be present.

WORK STARTED HERE MONDAY ON CREAMERY

Operation Will Begin By April 10 or 15; To Have Stations

Work was started Monday morning on the installation of machinery for Slaton's new creamery, which will be located in the Saage building at the southeast corner of the public square, the building formerly occupied by the McAtee dry good store.

Considerable equipment for the plant was unloaded early Monday, and will be installed as rapidly as possible, according to G. S. Fraser, president of the Red River Creameries, Inc., of Frederick, Okla. The work is in charge of L. E. Dresslar, who is connected with the company.

A letter from Mr. Fraser, addressed to the Slaton Chamber of Commerce, says that the refrigeration plant will be installed in the building just as early as possible, and that it is expected to have this feature of the equipment ready for use when the creamery begins operating. Date for the plant's opening has been set for sometime between April 10 and 15.

Announcement has been made by Mr. Fraser, the creamery company's president, that approximately fifty cream buying stations will be located over the South Plains section. Cream will be purchased through these stations and will be shipped to Slaton where it will be made into butter at the local creamery. Purchase of cream locally will be a very large source of supply, however.

The creamery's output will be butter, for which the Red River company already has an established market. Two brands of butter are manufactured, "Golden Glow" and "Red River Premium".

After opening the plant and getting started, it is expected that the Slaton creamery will churn a carload of butter per week, according to Mr. Fraser, president of the company, who declares he believes this territory has ideal prospects for dairy development.

Fireman is Hurt At Fire Thursday

While fighting fire at the Paul P. Murray residence at 720 South Tenth St., last Thursday afternoon, Bill Layne, member of the Slaton Volunteer Fire Department, suffered lacerations of his hand. It was believed the cuts were inflicted by broken glass.

Several stitches, to close the gashes, were taken by a local physician, and Bill states his wounds are healing rapidly. He is now back on the job with the water service department of the city.

PASSION WEEK.

This is the week which immediately precedes Easter, and is devoted especially to commemorate the passion of our Lord. The days more especially solemnized during it are Spy Wednesday, Maundy Thursday, Good Friday and Holy Saturday.

It is an institution of very early origin, and is known as Great Week, Silent Week, Penitential Week, etc. Spy Wednesday was a name given in allusion to the betrayal of Christ by Judas Iscariot. Maundy Thursday, or as called by some, Holy Thursday, specially commemorates the institution of the Eucharist.

This is a mighty fine time for men to make peace with God and their neighbors. We are coming to one of the great festivals of the church, the resurrection of the Blessed Jesus, as commemorated by the Master Service over the world.

Let us not at his last come have

Entered as second class mail matter at the postoffice at Slaton, Texas.

Nothing will ever be accomplished in a community way if all possible objections must be overcome before any enterprise is started.

He who insists that he is always right confesses that he cannot learn by experience.

A local farmer says one can get rich farming—provided one can sell out in the end to a golf club.

Funerals, so undertakers report, cost less in Chicago than in New York. Another one of the wonders of mass production.

If we keep up the payments on furniture to the end we may be assured of the possession of antiques.

EASTER TIME.

Easter is a season of loveliness and thankfulness, a holiday beautiful beyond words. It is at this time that flowers come to bloom and all Nature takes on the aspect of Spring. It is at this time that men with faith the world over rejoice in the contentment engendered by that faith.

On Easter Sunday we take our afternoon walks, dressed in the modes of the moment. Just as the very ground beneath us is bedecking itself for the occasion, so do we put on our prettiest to mark this significant day.

But our observance of Easter must not be only an exterior one, apparent only in the garments that we don. To be really in line in the Easter parade, it is necessary to feel inwardly the great emotions that Easter should create. The hallowed traditions of the holiday must permeate us—we should not alone dress better, but should also be higher spiritually on this day of days.

More important than all, we should on this day go to our churches and bow our heads in prayer to the Master whose blessings follow us at every step.

FIGHTING THE FIRE MENACE.

The stock fire insurance companies of the United States, through the National Board of Fire Underwriters, are conducting a practical, educational program to teach the public fire prevention.

As a result of consistent effort fire hazards have been reduced, better buildings have been erected and the public has been saved \$349,956,314 through lower insurance rates than would otherwise have been necessary.

Lower insurance rates inevitably follow a better fire loss record; lower insurance rates inevitably follow a fire prevention program properly conducted; lower insurance rates inevitably follow consistent public service work of stock fire insurance companies.

No business has had a finer spirit of public service than fire insurance, which has given a consistently high standard of public service at a constantly decreasing price.

A CRITICAL YEAR FOR OIL.

According to a review by the Union Trust Company of Cleveland, the present year promises to be a crucial period for the oil industry, with constructive forces endeavoring to check excessive and wasteful production. Efforts to adequately curtail over-production have been stimulated by expanding development and it is upon the success of these efforts that the future health of the industry depends. 'Because of wild-cutting and many other factors, it is extremely difficult to attain complete effectiveness in restriction plans,' the review continues. 'Wild-cutting is a relic of the pioneer days of oil. Statisticians of the oil industry estimate that more money is sunk in the ground for oil than comes out. In former days, the mere finding of oil in the ground meant certain profits. But this no longer is true, with heavy production costs, low prices and excessive output.'

While at the present time oil requirements are the greatest in history and are steadily increasing, supply is far greater than demand. Adequate conservation measures that force cooperative drilling of pools and leave surplus oil in the ground until it is needed, are the only sound solution. Over-production merely wastes our natural resources and interferes with the orderly development of a great industry.

PLANE ABLAZE, PILOT LEAPS.

CHICAGO.—His airplane catching fire while flying to Chicago with the night air-mail, Paul J. Kaniut, pilot on the Chicago-Kansas City route, made a parachute leap from his plane and landed safely near Harmon, Ill., 100 miles southwest of Chicago, early Friday. The plane was virtually destroyed, but only a portion of the 400 pounds of mail was burned. Part of the mail was dispatched from Dallas. Kaniut left Moline, Ill., at 6:30 and about 20 minutes later, the plane suddenly caught fire. He joined the caterpillar club by stepping out of the cockpit and gliding down to safety with his parachute. The plane fell several miles from where he landed.

The mail from Dallas was transferred at Kansas City into Kaniut's plane, operated by the National Air Transport. It was a Curtiss Falcon.

UTILITIES CO. LOWERS RATES FOR PUMPING

(Continued From First Page.)

the second, known as the New Mexico division, is called the New Mexico Utilities Company, and the third, known as the Amarillo and Roswell division, is called Southwestern Public Service Company.

Judge Kelso also while here confided to a Slatonite representative that these companies have now under way a very extensive building program that will greatly widen their activities and bring new capital into this section. Full details of this new development he promised to make public in a short time. He was optimistic over the future outlook in this region, and his faith in this country is unbounded. He is making a tour of all the company's properties and conferring with city authorities over the territory regarding the new rates, which will apply uniformly in all towns and cities having in force the development rate contracts.

She: "Now own up; you men like the talkative women as well as you do the others."
He—"What others?"—Answers.

How to Raise Poultry
By Dr. L. D. LeGear, V. S., St. Louis, Mo.
Dr. LeGear is a graduate of the Ontario Veterinary College, 1922. Thirty-six years of veterinary practice on diseases of live stock and poultry. Eminent authority on poultry and stock raising. Nationally known poultry breeder. Noted author and lecturer.

**ARTICLE IV
A ROBBER IN THE FLOCK.**

Roup May Wipe Out a Whole Season's Profit if Allowed to Gain Headway, Says Dr. L. D. LeGear, V. S., of St. Louis, Mo.

Editor's Note—This is another story in a series of 52 stories on poultry written by the well known national poultry authority, Dr. L. D. LeGear, V. S., of St. Louis. The entire series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

"The best way to cure roup," sagely remarked an old timer in the poultry game, "is never to have it." That may sound like a very weak attempt to be funny, but it is gospel truth. Contagious diseases such as roup do not fall willy nilly from the heavens on some whimsical freak of fate. The way is usually paved for them by the lack of adequate sanitation, improper housing facilities, incorrect feeding, failure to cull out weaklings, the weakening effect of parasites, or by some other form of neglect. Healthy, robust fowls, properly fed and housed in sanitary surroundings, will almost always throw off the germs of disease. Even when they do not, however, their rugged constitutions make the success of treatment practically certain.

Acting on the idea of prevention as the best cure for roup, I never add new fowls to my flock until they have been kept in quarantine from two to three weeks. Even if it is practically sure that the birds come from an uninfected flock, this is a wise precaution. They might be carrying the germs of infection which would mature later with disastrous results. If this should happen before they are added to the flock they can be destroyed or treated as the case may demand without danger of spreading the

SLATON MAN WRITES THRILLING NOVEL

(Continued From Page 1.)

life and of conduct does the Bible teach which is so tragically exemplified in Santi's life? Who in this world is the one infallible detective? Whose law, alone, and in every case, exacts the full penalty for sin? Read Mr. Baldwin's book, 'Santi,' if you want the answer to those questions. We read this wonderful piece of realism, and while we were thrilled in the reading, it left us subdued and thoughtful in the thought that man's laws are puny and futile, and that after all there is something above and beyond man—a law that does govern man's innate nature. Wrong cannot, in the very nature of things, go unpunished, and punishment is here and now, swift, immediate, inexorable.

But the author of this book does not preach. His own opinions about the matter are nowhere expressed. The facts are there. Life is there. The circumstances and scenes are there. You are left to draw your own conclusions from them. For the thoughtful, painstaking reader, the material is there upon which to ponder and reflect, and for all there is the tale itself, as original, as novel and entertaining as any moving picture drama. We are ready to agree with the publisher that "Santi" is bound to find a place well up in the front rank of first novels.

We have said nothing about R. A. Baldwin, the author of this book, because to the people of Slaton and West Texas he is well known. Mr. Baldwin tells us that "Santi" is the first novel he ever undertook; that he spent some years observing, studying, gathering and analyzing the materials essential for a book of this character, and when he submitted it to Meador Publishing Company to see if they could find any merit in it, the manuscript was forthwith accepted.

Mr. Baldwin is a busy man, but it seems that the busier a man is the more time he can find to do things. "Santi," the author assures us, was written in spare moments and of evenings, and purely as a diversion. He also has confided to us that he has commenced his second book, which is to be a type of novel radically different from the first one, but which, we predict, will nevertheless be a thriller, and now that we have read "Santi," we are going to be impatient for his next one.

disease.

Watch young and delicate birds very closely as they are most susceptible to the deadly roup germs. The same is true of fowls suffering from common cold or catarrh. The throat and nasal passages, being already sore and inflamed, are easily infected. Sick birds, no matter what the ailment, should always be isolated. They can be much more effectively treated when away from the flock and they cannot contaminate the healthier ones if the disease should prove to be contagious.

Should any of your flock begin to show symptoms of roup, no time should prove to be contagious.

Should any of your flock begin to show symptoms of roup, no time should be lost in starting measures to prevent further spread. All houses, pens, coops and runs should be thoroughly cleaned and sprayed with a strong solution of a good coal tar dip and disinfectant. Droppings, litter and trash of every description should be removed and burned. All unnecessary equipment of every kind should be removed from houses and yards. Every piece of equipment for supplying food and water should be scrubbed and disinfected. All this sounds like work and it is, but the saving is decidedly worth the work required.

As the inroads of this deadly disease have been known to wipe out as high as 95 per cent of a flock, every owner of a poultry flock should learn to recognize the symptoms. At first they are much like those of a simple cold or catarrh, but more fever, dullness, prostration and loss of appetite. First symptoms are a watery nasal discharge, difficult breathing with wheeze sound and constant shaking of the head to dislodge accumulated matter.

After two or three days the discharge from the nose becomes thicker and gives off a characteristic offensive odor. The nasal passages then become so clogged that the bird must breathe through its mouth. A discharge will also run from the eyes. This discharge gradually becomes thicker, causing painful swellings below or in the eye which often destroy it. As it hardens, this discharge may cause the eyes to be completely pasted shut and may gather in such quantities that the head is swollen to twice its normal size. Quite frequently

these deposits will press down the roof of the mouth so that the fowl cannot swallow. In some cases there is a canker deposit of yellowish matter on the tissues of the mouth and throat. It is easily removed, however, and should not be confused with a deposit of similar appearance which is a symptom of diphtheria.

As soon as any fowl is known to be sick, put it at once to itself as far from the flock as possible and give it one full teaspoonful of epsom salts to remove cold and fever from the system. If the bowels have not moved by the following day, repeat the dose. Give one roup pill night and morning. Wash the affected eyes, nose and mouth once a day with a solution made by mixing one teaspoonful of dip and disinfectant in one quart of warm water. Souse head, eyes and all into this solution each time. Roup will often yield to treatment if caught in time, but each case must be handled individually and more detailed instructions are required than the space allowed for this article will permit.

As a measure of protection for the balance of the flock, after infected birds are removed give epsom salts in a wet mash. Give one pound of epsom salts for each 100 fowls of lighter breeds or for each 75 of the heavier kinds, and repeat in one week. A saline purgative such as epsom salts is invaluable at such a time. By causing the prompt elimination of germ-laden matter, this simple remedy may keep many a good layer on the job without interruption.

But, after all, there's no remedy like the one quoted at the beginning of this article. I do not claim that roup and kindred diseases cannot invade the premises where sanitation and other precautionary measures are always observed. I do not hesitate to say, however, that the flock where such measures do not obtain is infinitely more liable to suffer infection. Furthermore, if the properly managed flock does become infected, the damage will be much less than among fowls not so well cared for. The old maxim, "An ounce of prevention is worth a pound of cure" may be well worn from much usage, but it is still as true as it ever was.

Rural School Provisions Inadequate

Washington, D. C.—Rural junior high schools, according to a report of the Department of the Interior, are growing in favor in all parts of the United States but serious limitations are imposed on them because of failure to provide essential building space and material equipment through which the desirable special activities as media of instruction are made possible.

This report was based upon a study made of 131 of these schools. It was pointed out that of these only 11 are housed in separate buildings; 14 in buildings with elementary schools; 46 in buildings with senior high schools; 58 in general buildings for all schools of the district; and 2 not specified. Only 10 of the 11 separate buildings to junior high-school work, and the first one of these was erected in 1916. It was stated in conclusion that not more than one in three of these schools could be regarded as having adequate housing provisions.

RATS SERVE AS FIRE ALARMS ON ARCTIC SHIP

A procession of rats deserves credit for helping to save for public view the concentration of thrills and stark drama contained in the Fox picture, "The Great White North," showing at the Palace Theatre, Mar. 29.

Sidney Snow, big game hunter, explorer and cameraman, was lying in his bunk on the motor schooner Herman amid the ice floes when he noticed rats going through his stateroom at a rapid rate. One after another they came, all seeming in a great hurry. He reported the incident to the captain in the morning.

"It's a bad sign," announced the captain, and he started a careful examination of the boat. Smoke was discovered near the fuel tank. A frantic hour of deck chopping and fire fighting to save the ship from blowing up followed.

If Mr. Snow had not noticed the rats, the ship would have blown up. All of the men who had a share in the making of "The Great White North" would have been lost—possibly forever.

Attorney R. A. Baldwin transacted legal business in Lubbock Saturday.

J. K. Rogers was a business visitor to Big Spring late last week.

M. W. Uzzell, manager of the Men's Store, is in Dallas today on business.

Mr. and Mrs. T. P. Hord spent the week-end in Stamford, visiting with the latter's sister, Mrs. Blankenbecker. They returned to Slaton Sunday evening.

Misses Audrey Marriott and Vera Leininger were Plainview visitors Sunday afternoon.

Mr. and Mrs. Bert McDonald were the guests of Mrs. McDonald's parents in Lubbock last Friday.

Mr. and Mrs. Charles L. Griffin, of Union, were in Slaton last Saturday calling on friends.

Robert L. Staple, proprietor of a cafe at Monahans, arrived Monday evening to spend a few days with his family.

The series of meetings that is being held at the Baptist church at Union has been pronounced as very successful and interesting. The singing is especially good, under the direction of Professor T. Luther Peterson.

Mr. and Mrs. Richard Douglas, of Lubbock, were in Slaton Sunday visiting with friends and relatives. Mrs. Douglas sang at the Methodist Church during the morning worship hour.

Sidney Anderson, formerly with the Acorn Store at Big Spring, has been transferred to Slaton and will assist in managing the company store here. Mr. Anderson comes to Slaton highly recommended. Mr. Moore, manager of the Acorn Store here, and Mr. Anderson, were associated together in the Acorn Store at Abilene.

Apples, Grown in U. S., are Shipped To 72 Countries

Washington, D. C., March 21.—Nearly one-half of the world crop of apples is produced in the United States, according to a bulletin on apple production, prices and transportation costs made public today by the Bureau of Railway Economics.

"Apples from the United States," according to the bulletin, "are distributed to all parts of the world, reaching 72 different countries during the year ended June 30, 1928. The United Kingdom was the largest market for fresh and canned apples exported from this country, while Germany was the largest market for dried apples."

"Over 93,000 cars of apples were shipped by rail from the producing areas to markets in this country during this same year. Distribution within the United States was widespread, apples from the Northwest reaching all of the states, while those from the Eastern and Central states reached practically the entire territory east of the Rocky Mountains."

"Figures covering the 66 most important markets in the country show that apples from the state of Washington reached all of these markets, those from Oregon reached 55, and those from Idaho 54. In view of the long hauls involved, the distribution of apples from the Western states is significant. Apples from Washington, Oregon and Idaho, in many instances, traveled over 2,500 miles to market. This is further emphasized when it is realized that apples from the state of Washington predominated in New York City, the entire width of the United States separating the origin and destination points. This wide distribution of apples shows conclusively that freight rates do not restrict their movement.

"Prices of apples at all phases of the marketing process fluctuated continuously during the past three years. Fluctuations were often pronounced, with wide daily, weekly, monthly and seasonal ranges in the prices paid to the growers and in the wholesale and retail markets.

"The spread or difference between the low and high prices was often several times the freight rate on a box, bushel or barrel of apples from producing areas to market. The difference between the low and high price at New York City for apples produced in the state of Washington during the 1927-28 season was \$2.09 per box, and at Chicago there was a difference of \$2.83 per box. This spread at New York in the daily average prices of Washington apples was about two and three-fourths times the freight rate on a box of apples shipped from any point in Washington, while the spread of \$2.83 per box at Chicago was about three and three-fourths times the freight rate. The ratio to freight rates of the spread in prices of individual sales was still greater. As freight rates were practically unchanged throughout the periods covered, they were in no way responsible for the ever-changing price situation."

LUTHERAN CHURCH.

Funds Sufficient For Summer Term

LUBBOCK.—Appropriations as finally granted and approved by Governor Dan Moody for the 1929 summer session of Texas Technological College, when supplemented by funds derived from College fees, will be sufficient for the summer session work to be given in accordance with enlarged plans already outlined, according to President Paul W. Horn.

"In addition to the comprehensive list of courses offered last summer, including a large percent of advanced work, other valuable courses will be offered this summer," said Dr. Horn. The enrollment of 965 during the 1928 summer session represented a very substantial increase over the preceding summer, and President Horn is expecting and preparing for a material increase during the coming session.

"The demand for summer work," he said, "has been so pronounced and the attendance at Texas Technological College has been increasing at such a rate that provisions will be made to take care of this demand in so far as it is possible with funds available from summer to summer. The work offered in the summer session is on a par with that done during the regular session, and it is the policy of the College to supplement the regular faculty by men of outstanding ability and reputation in certain fields."

Public Utilities.

Two of our youthful citizens were boasting out in front of the office the other day.

Said the first: "My Pa's got 'lectricity in his hair."

Answered the second: "That's nothin' my Pa's got gas in his stomach."

CLASSIFIED ADS

Classified Advertising Must be Paid Strictly in Advance

Due to the fact that considerable time and expense is required in keeping books on small accounts, and that collecting them is, in many cases, very difficult and unpleasant, The Slatonite will positively no longer accept classified advertisements for publication unless cash accompanies the order.

We firmly believe the classified advertisement column is a profitable column for our customers. This has been proven conclusively time and again. Hence, we believe when the column is used the user should pay for the service.

The rate for this class of advertising is two cents per word for each insertion, with a minimum charge of twenty-five cents. This is very plain and easy to figure.

Please do not ask us to accept classified advertisements over the telephone, for they will positively not be inserted in the paper. Send the "copy" to our office, accompanied by payment, figured at the above quoted rate.—The Publishers.

**now...
in place of attachments
this Extra Electric Cleaner**

*Giving 2
cleaners for
the price of
one*

HERE'S an easier, faster way to clean... without the use of a single attachment. Two electric cleaners—both for the price of one. A big Premier cleaner for the rugs and carpets—and a handy cleaner, the Spic-Span, for lighter tasks.

We want you to test in your own home this new way to speed up housecleaning. It is the climax to Premier's many years of leadership.

The Spic-Span given in place of attachments

The Premier Spic-Span is the result of years of research. It retains all the superiorities of the big Premiers... super-suction, ball-bearings—no oiling! Weighing only four pounds, the Spic-Span can be taken from task to task without waste of time or steps.

It cleans faster and better because it gets its nose close to the dust and dirt. You can plug it into any electric socket and clean mattresses, clothes, stairways, upholstery, automobiles, nooks and crannies everywhere.

Free Demonstration

Why use a big cleaner for little cleaning jobs? With the Premier two cleaner idea, you can cut your housecleaning hours in half. For, as soon as you're finished with the big cleaner, you drop it and pick up the Spic-Span. No lost motion—no unnecessary strain.

The Spic-Span may be purchased separately for \$14.50... or in one of the following combinations. Phone or visit us today and arrange for a private demonstration. No obligation.

Two Cleaners for the Price of One

Premier Duplex and Premier Spic-Span Premier Junior and Premier Spic-Span
Both for \$72.50 Both for \$48

HOMER FRANCIS McDONALD, AGED 4, IS PARTY HOST

Homer Francis McDonald celebrated his fourth birthday March the 20th with a party for his little friends, at the home of his grandparents, Mr. and Mrs. J. H. Teague, 230 S. 10th St. Homer was the happy recipient of many beautiful gifts. Many games were played and an Easter egg hunt was enjoyed by the little folks. Miniature chicks were given as favors, and refreshments of ice cream and cake were served to the following: Teddy Swanner, Pauline Lokey, June Scott, Nancy Nell and Jane Everline, Mary Ruth and Genivieve Verbe, Johnnie and Ruth George, Billie Francis and Leroy Lively, Donna Maul Sanner, Earl and George Green, Billie Lokey, Harley and Evelyn Mansker, Joe Teague, 3rd, Bobbie and Hyden, Jr., Edmonson.

Mrs. McDonald was assisted in entertaining by Eunice McDonald, Cordie Grantham and Ruby Teague.

MRS. L. C. ODOM SHAKES HANDS WITH "AIMEE"

Shaking hands with a governor, or even a President could be a humdrum proceeding, but a chance of this sort to get a "close up" of Aimee Semple McPherson whose "doings" have rocked a continent, is another thing—quite. This interesting opportunity was Mrs. L. C. Odom's on her recent visit to Angelus Temple, when she, with many others, accepted the invitation extended to "first nighters" to "shake".

Mrs. Odom's account of her visit to the Temple is extremely interesting—however, while admitting the good accomplished by Mrs. McPherson, she makes it clear that though the famous evangelist numbers her followers by the thousands, she is not one of them.

In a January issue of Liberty, Jim Tully in an article, "Aimee Semple McPherson" writes:

"Angelus Temple has a seating capacity of between 5,000 and 6,000 people. It is said to be the largest modern fireproof church in the world. It is filled to overflowing many times each week.

It was opened in January of 1923. Since that time the lights have always burned. The doors have not been closed. Prayer has never ceased. Women pray all day in the temple in two-hour shifts. Men, on the same schedule, pray all night.

There is a Bible school which has nearly 1,000 pupils. Angelus Temple itself numbers tens of thousands of members. There are 3,000 Sunday School children. There is a Cradle Roll department in which thousands of parents have dedicated their children. There is a Children's Church, where children carry on their own divine service. This is under the pastorate of Aimee's youthful daughter, Roberta Star Semple.

"There is a group known as the Foursquare City Sisters. They are ready to render any service in the community, large or small. They will give the correct time of day in answer to a telephone call—or bring comfort to the dying.

"There is a commissary in the basement of one of the buildings. All members of Angelus Temple are asked to bring with them each time they come a loaf of bread, a bottle of milk, or some package of food. These articles and blankets and clothing are sent to those in need.

"During the recent flood disaster near Los Angeles, it was the Angelus Temple Commissary which led all charitable groups in caring for the homeless.

"A powerful radio broadcasts each morning and concludes with a recital of sacred music at midnight. This radio is the most popular in the city. It broadcasts all of Mrs. McPherson's sermons.

"The musical department consists of three bands, three choirs, two orchestras and leaders, three organists, three pianists, six quartets, several glee clubs, and many dozens of soloists and musicians.

"It can be easily seen that the dynamic mistress of the organization leads a full and interesting life. Neither can it be gainsaid that, as long as mankind is in such a helpless state, she exerts a power of good in the community."

MISS EDMONDSON ENTERTAINS.

Last week-end Miss Lucille Edmondson entertained a number of her friends with a dance and forty-two party. All reported a very enjoyable time. Lovely refreshments were served by the hostess.

Mr. and Mrs. Hollis B. Moore motored to Floydada Sunday morning to spend the day with relatives.

Get Together Club Met Last Thursday

The Get-Together club met last Thursday afternoon at the home of Mrs. B. T. Slater. The afternoon was spent in sewing.

At this meeting, the following members were present: Mesdames Lucy CLOPTON, L. H. Guyton, Ben Mansker, L. Alexander, O. J. Lovelady, W. A. Johnson, Moody Puckett, M. L. Abernathy, Earl Thornton, B. T. Slater and Roy Ballard.

An all day meeting of the club will be held next Thursday, March 28, with Mrs. M. L. Abernathy.

MISS DEAN, SENIOR SPONSOR, ENTERTAINS

The Senior class was entertained last Friday evening at the Club House by their sponsor, Miss Dean.

The room was beautifully decorated in the school colors, purple and white, while floor lamps, vases and baskets of flowers added color and beauty to the scene. After various games were played, refreshments of ice cream and cake were served.

Purple and white balloons were given as favors, while the plate decorations were purple and white sweet-peas.

The Seniors vote Miss Dean the 'deal' hostess, and express their thanks and appreciation.

Notes, News and Nonsense.

NOTICE.

The Slatonite wants all the news—just anything of general interest, from your honest opinion of your mother-in-law to the name of your favorite bootlegger.

Onita Berry, Hazel Mansker, Rac Darwin and Gerald Woolever spent Sunday in Clovis, N. M., visiting friends.

Mr. and Mrs. T. E. Carr, of Sterling City, are visiting Mr. and Mrs. Gene Carr.

Silas Wilson and family, of Lubbock, spent the week-end with his parents, Mr. and Mrs. W. R. Wilson.

Miss Mary Preston, of Tahoka, was the guest of Dr. and Mrs. Foster Thursday night.

By the way! Have you seen the fern in the window of a local hardware store? It is putting on a free exhibition, showing just what a fern can do by attending strictly to business. Moral: "Concentrate on your business and likewise flourish." A very beautiful and thrifty fern is seen, also, in the window of the sales room of a local automobile dealer.

G. W. Burks went to Levelland Friday.

Miss Thelma Poteet, Vergie Rackler, Katherine McNally and J. M. McNally, of Wilson, went to Tulia Sunday. Inez McNally, who had been in school at Canyon for the winter term, returned with them.

Miss Alta House, of Sterling City, visited Mrs. Ben Mansker and family during the week-end.

Clyde Pogue, yardmaster at Plainview, came down to attend Mrs. McCall's funeral at Lubbock.

J. B. Kness returned Sunday from Honduras, Central America.

Coach Wright went to Amarillo Saturday.

Jewell Johnson has accepted a position as bookkeeper for Scudder Motor Company.

Earl Turner, Machinist, left for Chicago Sunday.

Miss Tommie Kirby, Mrs. T. O. Johnson and Miss Mildred Johnson went to Lubbock Monday afternoon.

T. H. White, traveling auditor, of Amarillo, was here Sunday night.

Born, to Mr. and Mrs. T. J. Blume, a girl.

D. Shearer, of this place, sailed from New Orleans on the 15th for Tolu, Honduras. Mr. Shearer drove from Slaton to New Orleans in his

Arctic Picture Of Importance In Land Claim

Never before in history has a motion picture figured as a possible document for the settlement of an international controversy while at the same time furnishing a series of concentrated thrills mixed with comedy and tragedy. This remarkable film is "The Great White North," which will be shown at the Palace Theatre here Friday, March 29, for the benefit of the Slaton high school girls basketball team.

In addition to its historic importance and its entertaining qualities it is especially interesting at this time in that it shed light on the probable sufferings of the lost members of the Noble polar expedition and of Raold Amundsen and his companions.

"The Great White North" was made under the direction of Sidney Snow, famous big game hunter and explorer. At the time Russia was claiming Wrangell Island, Snow landed on Herald Island, found the dead members of the 1913 Stefansson expedition, and raised the American flag as a symbol that he claimed Herald Island as a United States possession. The raising of the flag is considered by Arctic explorers such as Stefansson to be of vital importance in the future ownership of the Arctic land, especially in view of the controversy over possession of Wrangell Island.

It is said that the island is second only to Alaska in undeveloped mineral wealth. It is sixty miles long and is believed to hold great resources in gold, coal, iron and other minerals.

In the view of Stefansson the flag-raising recorded in "The Great White North" is of value in establishing the first step toward the ownership of the island by the United States, giving what is known in international law as "inchoate title" in order to confirm this, the founding of a colony on the island is necessary.

So far Russia has put forward no claims to Herald Island. If one should be put in the pictorial record provided by "The Great White North" would furnish important evidence in international law toward refuting such a claim.

DID YOU EVER STOP TO THINK?
By Edson B. Waite, Shawnee, Oklahoma

M. H. Aylesworth, president of the National Broadcasting Company, Inc., says: THAT persons who have had the

same or similar experiences are likely to feel kindly towards each other.

There is always a pleasure in finding that the stranger in the smoker has lived in the same little town, or has been to the same college, or has climbed the same mountain, or smokes the same brand of pipe tobacco as we do ourselves. Common experiences, to paraphrase an old proverb, make the whole world kin.

Radio is exerting a powerful influence in giving the same experiences simultaneously to listeners all over the United States, and in many cases, all over the world. The same songs, the same speeches, the same radio dramas, the same sermons are heard by listeners everywhere.

In the United States alone, it is estimated that productions of the National Broadcasting Company, sent by wire to associated stations, are available to at least fifty million persons. There are many millions of others, frequently, in other countries. This common experience is a most potential force in providing community of interest between men. It brings together the people of a nation and the peoples of nations.

A recent broadcast over a network of more than forty stations included parts of the program picked up from a point in the Cascade mountains of the northwest, from San Francisco, New York, Philadelphia and Washington. It included speeches by officials

of two railroads, descriptive matter by an NBC announcer, songs by a nationally known contralto, dance music by a popular orchestra, and addresses by a former chairman of the Interstate Commerce Commission, and finally, a speech by the President-elect of the United States.

Civilization is fundamentally a process of adjustment of individuals with other individuals. Community of interest contributes powerfully to friendly relations. The radio, in providing opportunity for multiple common experiences, thus functions as a tremendous factor in the progress of civilization.

Doctor: "H'm! Severe headaches, bilious attacks, pains in the neck—h'm! What is your age, madam?"

Patient (cooly): "Twenty-four, doctor."

"H'm!" (continuing to write.) "memory affected, too!"—Pearson's.
